We declare that the act of 1873 demonetizing silver without the knowledge or approval of the American people has resulted in the appreciation of gold and a corresponding fall in the prices of commodities produced by the people; a heavy increase in the burden of taxation and of all debts, public and private; the enrichment of the money-lending class at home and abroad; paralysis of industry and impoverishment of the people. chusetts went to Windsor today. Prior where they took their trains for Windsor, The route through which the company marched to the station was lined with people who heartily cheered the Americans for their soldierly bearing. At Windsor they were met and welcomed by the mayor and corporation of the town, who presented a formal address to which Col. Walker made reply. He said that they had not come as strangers but as children to their motherland. They still retained their ancient love for

paralysis of industry and impoverishment of the people.

We are unalterably opposed to the single gold standard, which has locked fast the prosperity and industry of the people in the paralysis of hard times. Gold monometallism is a British policy and its adoption has brought other nations into financial servitude to London. It is not only un-American, but anti-American, and it can be fastened on the United States only by the stiffing of that indomitable spirit and love of liberty which proclaimed our political independence in 1776 and won it in the War of the Revolution.

We demand the free and unlimited coinage of both gold and silver at the present legal ratio of 16 to 1 without waiting for the aid or consent of any other nation. We demand that the standard silver dollar shall be a full legal tender, equally with gold for all debts, public and private, and we favor such legislation as will prevent the demonetization of any kind of legal tender money by private contract.

We are opposed to the policy and practice their cordial reception of the ancient or-der and the latter then marched through the crowded streets to Windsor castle, where the guards at the entrance saluted Col. Walker and his officers. The visitors were greeted at the castle gate by the master of the household.

The company was then shown over the castle and to the east lawn at 1 o'clock to be inspected by the Queen, after which they were entertained at

tization of any kind of legal tender money by private contract.

We are opposed to the policy and practice of surrendering to the holders of obligations of the United States the option served by law to the government of redeeming such obligations in either silver coin or gold coin. We are opposed to the issuing of interest-bearing bonds of the United States in time of peace and condemn the trafficking with banking syndicates, which, in exchange for bonds and at an enormous profit to themselves, supply the Federal treasury with gold to maintain the policy of gold monometallism. sunshade, arrived in a carriage drawn by two gray horses and preceded by an outrider. The attorneys for the telephone company, however, moved for a modification of the injunction order and got it. The modified order is a sweeping one and gives the company every right to rebuild its exchange. The company is now at work, and Mr. Felker's bill for legal services, amounting to between \$500 and \$600, is not a pleasant thing for the alservices, amounting to between \$500 and \$600, is not a pleasant thing for the alservices, amounting to between \$500 and \$600, is not a pleasant thing for the algence or taxpayers to look upon, in view of City Attorney Maynard's opinion at the start, which was so ignominionsly overruled.

If was this bill which called forth the few pointed remarks from Ald. Dieckmann. He said he rose to remind the mayor that the bill of Mr. Felker was mayor that the bill of Mr. Felker was mayor that the bill of Mr. Felker was necessing a creek bottom, twenty feet below. Brown ing \$00.

It was this bill which called form the few pointed remarks from Ald. Dieckmann. He said he rose to remind the mayor that the bill of Mr. Felker was an unnecessary expenditure: that nothing had been gained by his retention by the city, for the latter had been utterly defeated in its bent with the Wisconsin

bridge with his team when the structure gave way and precipitated the outfit to the bottom, twenty feet below. Brown had his leg broken in two places.

### BRYAN THE NOMINEE.

The Democratic national convention yesterday nominated William J. Bryan of Nebraska for president on the fifth ballot. The nominee is the young excongressman who proved so eloquent that he is now called "the boy orator of the Platte." In describing him and his speech in the convention a Republican paper says: "He has a face whose lines might have been chiseled from alabaster by some master sculptor; his mouth is firm, his eyes bright, his nose Roman, his raven hair is brushed back and falls to his collar. With well modulated voice, which gradually arose in pitch until it penetrated the furthermost limits of the hall, he wove the spell upon his audience. His speech was a masterpiece of fervid oratory With consummate eloquence he stated the case of silver and parried the arguments of the gold men. The convention took fire with enthusiasm. It crackled as by a war of flames. Then cheers swelled to yells and on to screams. Gladness Comes

With a better understanding of the transient nature of the many physical ills, which vanish before proper ef-forts—gentle efforts—pleasant efforts— rightly directed. There is comfort in the knowledge, that so many forms of sickness are not due to any actual disease, but simply to a constipated condition of the system, which the pleasant family laxative, Syrup of Figs, promptly removes. That is why it is the only remedy with millions of families, and is everywhere esteemed so highly by all who value good health. Its beneficial effects are due to the fact, that it is the one remedy which promotes internal cleanliness without debilitating the organs on which it acts. It is therefore all important, in order to get its bene-ficial effects, to note when you purchase, that you have the genuine arti-cle, which is manufactured by the California Fig Syrup Co. only and sold by all reputable druggists.

If in the enjoyment of good health,

and the system is regular, laxatives or other remedies are then not needed. If afflicted with any actual disease, one may be commended to the most skillful physicians, but if in need of a laxative. e should have the best, and with the well-informed everywhere, Syrup of Figs stands highest and is most largely used and gives most general satisfaction.

THE FUTURE OF FARMING.

Steady Decrease in Rural Popula-

Undeniably the best crop that the old farmers produced was men. They sent forth these hardy young children of the soil to strengthen and energize all the higher forces of our civilization. It night be unjust to say that they are not doing it still, but it is to a less extent, relatively, than in what are now called the good old days. The advantages of education extend to the boys on the farm more than ever before, it is true, and Sarsaparilla

The passion to see and enjoy life as it is lived in the great centers of population and business is more intense than it ever was in the days that are past, and education rather stimulates it than otherwise. Even the farmers themselves have the infection, and if they do not encourage they only weakly restrain their educated children from turning their acquirements to what ns to them better account than tillage f the soil. If they can gain fortune eputation and experience in some other alling they frequently like to resume arming as an avocation, but only in comtratively rare instances is it adopted as

These are hard facts, but we might as well face them. The census reports show steady decrease of population and production in the rural portions of the state, yet educational opportunities were never before so general or available as now. It would be a sad confession that there was no remedy for this, but the remedy has not yet been found. Educa-tion benefits the farmer as much as the lawyer, both in his business and his citizenship, and it should not be held re-sponsible for the depression in agricultur-al industry; but the social pace is such bat the husbandman cannot follow it There must enter into the business the lements that make successes along other lines co-operation and capital—before it will become attractive to the educated and the ambitious.—Boston Transcript. much quieter and less disturbing than

a Big Oil Well.

Mrs. Katherine E. Reed, one of the cealthiest women in the oil country, all whose money came from oil, and whose foresight was the means of numerous others amassing fortunes, died re-cently near Sistersville, W. Va. Five ears ago Mrs. Reed was a widow with eight children, and her only possess was a farm which she was unable work, and which, had it been cultivated most scientifically, would not have furished a living for her and her children At the opening of the oil excitent her farm was leased and a well put down. The well proved a duster, and the men who had drilled it prepared to ake away their rig and tools. Mrs Reed begged them to try another well a a location which she had selected for first well, but which the oil experts drillers were hard up, and so was Mrs. Reed, but she finally induced them to make another trial, she agreeing to board them for nothing if no oil was

That well was the biggest gusher in e field, and to this day is a big pro-icer, and is known far and wide as "The Big Kate," after its owner. Mrs. Reed made money rapidly after that, and her farm is today worth \$200,000, and he has taken more than that much oil rom it. Her eight children are all left ndependent, besides having oil produc tion sufficient to keep them in luxury all their lives, if they hold to it.

Hartlepool Shipowners Complain of Un-American Agriculturist A serious question in British maritime erests is the increasing sale of British wessels to foreign purchasers for the reason that the original owners cannot make them pay under present conditions. Mr. Yeoman, secretary of the Hartlepool Shipowners' society, has looked into the patter, and he finds that the restrictions placed upon certain classes of British ships before they are allowed to sail are such that only the foreigner, who is not subject to these conditions, can make the ships pay. The chief point at issue seems to be the question of loadline; the foreigner puts in a cargo 100 to 200 tons heavier than the British owner is permitted to do. As the foreigner can also save not a little in wages and the ost of provisions, his total gain in a year opon the present price of one of thes ssels, above the profits (if any) of the ip, under the British flag is estimated ship, under the British hag is estimated by Mr. Yeoman to be 13½ per cent. The seriousness of this question is indi-cated in the fact that in four and one-quarter years the Hartlepool shipowners have sold to foreigners forty-four steam-hips of a total of 62,877 tons. As one emedy for this condition of affairs it is oposed to give the British shipowners ore liberty in the matter of loadline, while still maintaining the care to mini-

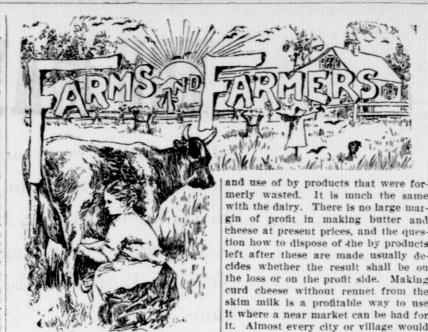

Novelty for Bicycle Riders.

An electrician says he has found a able. micker way of making a fortune that ng wires and selling batteries, and adging from appearances he has good eason for the statement. He has erectd a platform 100 feet long and 10 feet wide at the end of a cycle path. Down this platform is ranged a series of push buttons, which are connected through a battery to an electric bell, and an annunciator. The rider, having paid 10 cents, starts at one end and tries in riding down the line to depress as many of the buttons as possible. When a button is struck the bell rings, and the annunciator registers the particular button. The rider who is successful in guiding his wheel tire over all the push buttons wins 50 cents. This new diversion has created an extraordinary furore. The ncky inventor has organized a company which will sell the platforms outright which will sell the platforms outright, and give territorial protection to pur-chasers during the life of the patent. As a drawing card for owners of seaside and country pleasure resorts, the new diversion would seem to be unique.—New York Personal Resources

Mr. Leon M. Barnes, of Wood bury, Conn., writes under date of May 22, 1895: "This remedy, Ripan Tabules, is not much known at the drug stores here, but Mr. A. E. Knox, the editor of our local paper, is loud in his praise of the Tabules He said: 'Every spring and sum mer I have been greatly troubled with dyspepsia and constipation, and have tried various remedies with no permanent relief. A few weeks ago I came in possession of a couple of boxes of Ripans Tabules, and, somewhat incredu lously, I began their use, and the results have been truly astonish ing. They hit the right spot from the first, and so far this spring I have never felt better in my life." Ripans Tabuies are sold by druggists or by mall: the price (50 cents a box) is sent to The Ripans Chemical Company, No. 10 Spruce Street, New York, Samply vial, 10 cents.

any sarsaparilla, there is every reason why you should use Ayer's. When you take sarsaparilla you take it to cure disease; you want to be cured as quickly as possible and as cheaply as possible. That is why you should use Ayer's: it cures quickly and cheaply-and it cures to stay. Many people write us: "I would sooner have one bottle of Ayer's Sarsaparilla than three of any other A druggist writes that "one bottle of Ayer's will give more benefit than six of any other kind." If one bottle of Ayer's will do the work of three it must have the strength of three at the cost of one. There's the point in a nutshell. It pays every way to use
