Communications should be accompanied by the name of the writer; not necessarily for publication, but as evidence of good faith on the part of the author. Write only upon one side of paper; and, in giving names and dates, be careful to make them plain and distinct.

GEO. NUGENT, Editor.

The hanging of the millionaire murderer, Dr. Duestrow, proves that justice has not only got west of the Mississippi river, but that it is doing pretty well as far south as Missouri.

The fight between the royal monopolists, Carnegie and Rockefeller, for control of the steel rail business, should be allowed to proceed, even to the destruction of both of them.

The total cost of the official records of the rebellion has been this far \$2,334,328; and, when completed, it is figured that the work will cost \$26,785 per volume, or a total of \$8,000,000.

The labor leader of England, John Burns, is credited with having made a will that no court can break. He leaves his best love to his wife, a sound constitution to his son, his books to the parish and his debts to his country.

It is said that "the newly reported revised statutes of Wisconsin gave a legal definition of the newspaper advertising 'square' as one inch in depth and the column width." At this rate, some of "the boys" would be tempted to narrow their columns.

The Minneapolis Times has investigated the report that a telegraph operator of that place had "invented a very compact and economical steam engine and sold the invention to an English syndicate for a fabulous sum;" and, as a result of the investigation, that paper says the engine has not been sold and is not capable of accomplishing the work claimed for it.

The young men of the Marquette College Alumni association, at Milwaukee, are opposing any legislation towards the return of the Pere Marquette statue from the national capitol to the state capitol; and, while many believe that the statue will be eventually returned to the state, comparatively few believe that the present legislature will pass any such measure. It is also predicted, by those who are not partial in the matter, that ultimately the statue of Roger Williams will be returned to Rhode Island, also.

The United States supreme court has finally decided that Joseph R. Dunlop is guilty of having sent obscene literature through the mails. This will give the publisher of the Chicago Dispatch two years in prison to study up on what is acceptable advertising matter for his paper; and, as he is an able man in every other branch of the business, the Dispatch will be improved by the lesson. Of course it will be a little hard on Mr. Dunlop, but a publisher should be willing to undertake anything that will improve his paper.

The man who resigned the Mercantile National bank presidency, rather than cease his free silver advocacy, last summer, Wm. P. St. John, died in New York city last Sunday night as the result of kidney and stomach troubles. He was treasurer of the Democratic national committee during the late campaign and an ardent supporter of Bryan and Sewall, and it is believed that the work he did during the campaign impaired his health. As a man who had the courage of his convictions he will long be remembered in the political history of this country.

The secretary of agriculture, J. S. Morton, had a half-page picture of his country home in Nebraska printed in a recent issue of the Congressional Record, and Senator Vest has asked that "the picture be printed, in order that the people of the country might see how Morton uses public documents to show off his country residence." However, if the secretary put a picture of "Arbor Lodge" in one of his agricultural reports for the purpose alleged, the punishment prescribed by Vest would only prove a pleasure to Morton—it would "show off" the residence more than ever.
