Several hundred men, including members of the fire department, set at work at once removing the debris and at 9 o'clock Steffens was uncovered. He was wedged in between huge chunks of iron and stone, but was alive and will recover. Borst was found two hours later not more than our feet from where Steffen was re-eased. He was lying under a mass of shavings and chips, and the heat in his body indicated that he had been dead only a few moments, death being caused suffocation.

The cause of the explosion was the clogging up of a steam pipe which leads from the digester. The loss to the Marinette & Menominee Paper company somewhere in the neighborhood \$75,000. Other men were working ear the mill at the time, but none are missing and not one was hurt.

SETTLE ON PINE LANDS. Baraboo Man Gets Into a Perilous Influx of Citizens in the Northern and Central Parts of

> the State. Pittsville, Wis., Feb. 1 .- [Special.]-The wisdom of the last Legislature in continuing the bureau of immigration, designed to settle the vacant lands in Northern and Central Wisconsin, is apparent upon the slightest investigation. While the present large influx of new settlers is off all expenses after January 31, was not directly due to the efforts of the state evidently favorably received, but was bureau of immigration, yet the impetus given to the movement by the bureau six, to which is left the settlement of the two years ago and continued by the present commissioner, in organizing county immigration societies, distributing literature and awakening an enthusiasm among those interested in having the country settled, has resulted exactly as

Today settlement is going on with a rapidity never before equaled in the set-tlement of a new country excepting the rushes to the Dakotas and Oklahoma for free homesteads. This is evident by the sales of lands, tributary to Pittsville, during the past year. In 1897 the Lyman Lumber company of Minneapolis disposed of 5000 acres of land in this vicinity in forty, eighty and 160-acre tracts, to actual settlers. The J. K. P. Hiles, John Arpin and Necedah Lumber companies each have a record of sale nearly as large, while individual holders of small tracts have disposed of at least that amount in the aggregate. The indications are that during the year 1898 all the available farming lands now in a wild state in this vicinity will pass out of the hands of the lumber companies into the possession of

The country is girdironed with mail routes, and postoffices are numerous all over the land, so that the mail service already reaches almost to the individual citizen. The farmer has but a short distance to go in any case to reach the postoffice. In general it will be a popular innovation to annihilate this little remaining distance so that letters and papers may be dropped at the farmer's door. The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure known to the medical fraternity. Catarrh being a constitutional iterature. Hall's Catarrh Cure is taken internally, acting directly on the blood and nucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers, that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials.

Ice House in the Barn. The idea that a costly ice-house requisite for the profitable storage of ice is not borne out by those who have improvised storage at comparatively trifling expense, says the Journal of Agriculture. A corner in the barn can be adapted by any farmer at all handy with tools, at a cost exceedingly small when compared with the advantages which a liberal supply of ice during the heated season will confer.

The accompanying illustration gives an idea for an ice-house in a barn, and a few hints on points necessary to be

Whatever may be the reason-whether is good times, or a decided reduction in the duty on diamonds under the Dingley bill, the fact remains that since the new tariff law went into effect the importation of diamonds appears to have in-creased tremendously. The importations of cut and uncut diamonds during the months of August, September, October and November, 1896, were valued at \$1,-123,645, while for the corresponding period of 1897 they were valued at over \$5,000,000. The advocates of the reduction of the tariff of 25 per cent. on cut diamonds to 10 per cent., which is the tax under the Dingley bill, insisted that the higher tariff cut off the revenue by putting a premium on smuggling. The putting a premium on smuggling. The operation of the new tariff justified this assumption, for the duties collected on diamonds during the four months men-tioned, under the Dingley bill, aggregate with one quart and one-half pint of milk, three-fourths of a cup of sugar doubt, also, that an improvement in the financial condition has led to a more generous expenditure in luxuries, of which diamonds stand at the head of the list.-

A window shade operated automatically the oven. If you wish to have a good is a Berlin novelty. A U tube, partly creamy rice pudding, never boil the rice filled with mercury, is connected with a bulb containing black wool and one containing air; and when the sun shines the absorption of the rays by the black wool causes the mercury to rise in the opposite side of the tube, closing the circuit of a motor that lets down the blind. When the sun is not out the mercury is level in the two tubes, closing a circuit that winds up the blind.—Philadelphia Rec-
