Washington, D. Therefore, the President is hereby authorized and directed to intervene at once to stop the war in Cuba, and to establish a stable and independent government of their own in the island of Cuba; and the President is hereby authorized and directed to use the land and naval forces of the United States to execute the purpose of this resolution."

THE PRESIDENT'S MESSAGE.

The president's message on the subject of the war in Cuba and the troubles with Spain went to congress Monday. It presents a good case for the intervention of the United States in behalf of the Cubans, but falls short of what was demanded by the war spirit that exists in congress and the country at large.

The only question is as to the point when forbearance ceases to be a national virtue. That this country should interfere from considerations of humanity is certain, but what the nature of that interference should be is another question.

Spain must withdraw her troops from Cuba, and then the Cubans will take possession of the island, for the Spanish authority can not stand a moment after it loses the support of the military power.

But with the Cuban question out of the way, the United States has other cause against Spain in the matter of the destruction of the Maine in one of her harbors.

Spain must withdraw her troops from Cuba, and then the Cubans will take possession of the island, for the Spanish authority can not stand a moment after it loses the support of the military power.

The war spirit seems to have attacked the whole people of the United States. It is in the air and cannot be avoided. The government will apparently not be troubled with the problem of how to raise soldiers for the emergency.
