News From Our Soldier Boys. John Schaefer received a letter this week from Frank Keller at Ft. Trumbull, Conn. The writer states that, while enroute from camp to town to send his wages home, Otto Schaefer was knocked down and robbed of the money. It was after 7 p. m. when he left camp, and shortly after some passing soldiers found him lying unconscious under a bridge. They immediately notified headquarters and the unfortunate young man was taken in an ambulance to the hospital, where he continued unconscious for several days.

There is nothing in the letter to indicate how much Otto lost by the robbery further than he had just over paid the same day and that the highwaymen took his watch as well as all the money he had with him. In the same letter Frank states that Otto Dopke had been laid up in the hospital with the measles; also that John Weddig has been moved to Ft. Monroe, Va.

A Remedy for Smut in Oats. The loss to the farmers of Wisconsin on account of smut in oats, amounts to hundreds of thousands of dollars annually, all of which may be saved by treating the seed oats before planting. A simple and cheap method for preventing oat-smut has been found. All that is necessary is to thoroughly saturate the seed oats with a solution made by adding one pound of formalin to 50 gallons of water, allowing the seed oats to remain saturated for two hours before spreading them out to dry.

To use this remedy, place a layer of oats 4 inches thick on the barn floor and sprinkle them with the formalin solution until they are entirely wet. Then another layer will be placed on top of the first and sprinkled as before, repeating the process until all the seed oats have been sprinkled. Then leave them in the pile for two hours, when they should be spread out thinly to dry. If they are to be sown broadcast, it will not be necessary to dry them. Formalin may be purchased at any drug store, and costs from 35 to 50c a pound. About one gallon of the solution is enough to sprinkle a bushel of oats, hence one pound of formalin is enough to treat 50 bushels of seed oats. Formalin is not dangerous to use and does not corrode the flesh. The oats will not be likely to be injured by it, even if left in the pile somewhat longer than two hours. E. S. GORP, Horticulturalist.
