The floors are spotless and the windows are decorated with house plants. Both Mr. and Mrs. Chase are devout members of the Baptist church. They always decline guidance to the church, declaring that when doing their duty Providence will guard and protect them from all harm. When, however, the infrequent opportunity of going to hear music, of which both are very fond, comes they are glad of assistance, fearcomes they are glad of assistance, fearing, as they say, that in the pursuit of pleasure harm may come to them.

"Mr. Chase has been blind lifty-two years, but his wife lost her sight at 5 years of age and has never seen her husband. He, however, saw her at 18 and thinks of her now as still in the full flush of girlish beauty. Mrs. Chase reads aloud from the raised-letter Bible for the blind, and this is their favorite occupation when at leisure. In order that the wife's fingers may be in good condition to read the husband does the heavier work of the household. The couple are much esteemed by the townspeople, who never allow them to want for anything that money can purchase." omes they are glad of assistance, fear-

Treatment of Gold Coin. There seems to be a difference in the practice of Great Britain and the United States respecting the abrasion of their gold coin, due to wear. In the former ountry old coin is taken at its face value for recoinage. Appropriations are made from time to time to cover the loss to the mint on account of wear. Of course, this rule does not apply to foreign coin, which is taken by weight. In this country the mint receives our gold coin by weight, and all the loss by natural abra-sion is borne by the holders of the coin.

People who complain that their eyes get tired while engaged in such pursuits as writing or sewing might try the ingenious invention of a Glasgow journalist. Finding that his eyes became so tired that he could write only with great difficulty, he hit upon the plan of having some strips of colored paper pasted on his desk close to the inkstand, so that every time he wanted a dip of link his eyes fell upon the colored strips. The result was surprising, and the inventor claims that by this simple device he not only avoided the use of glasses, but also improved his sight.

STARCHING A SHIRT PROPERLY

A Simple Operation that Only a Few Housewives Really Understand. After they have become "bone dry" put the shirts, collars and cuffs through a wheat starch made by pouring foam-ing hot water over a smooth batter ob-tained by stirring wheat flour and cold water together until it is the consistency of thin cake batter. This should be boiled slowly for two hours and then strained through a cheesecloth to leave it perfectly free of lumps. Add to each quart of boiling starch a teaspoonful of white wax such as is especially prepared for laundry need.

The secret of a good, smooth finish to stiff, starched clothes is in the method of starching. This must be carefully done. Spread a shirt bosom over a clean opened this morning and sat there for several hours, stating to the attendants that he desired to see the mayor.
