NO USE TRYING I can't take plain cod-liver oil. Doctor says, try it. He might as well tell me to melt lard or butter and try to take them. It is too rich and will upset the stomach. But you can take milk or cream, so you can take Scott's Emulsion. It is like cream; but will feed and nourish when cream will not. Babies and children will thrive and grow fat on it when their ordinary food does not nourish them. Persons have been known to gain a pound a day when taking an ounce of Scott's Emulsion. It gets through the machinery in working order so that the ordinary food is properly digested and assimilated.

A Letter to the Public. Fall and Winter Goods have been arriving in such large quantities that we were kept busy hustling, instead of enjoying a summer vacation. But we now have our store in such shape that we enjoy the result of the hustling. We have a more complete line of desirable goods than any house in more than one or two counties. Our goods are now in such shape that a glance through our store will show you what you want and need, and that the above statement is correct. It was a hit, upon the part of our buyer, in purchasing early and in large quantities, as it enables us to give you the benefit of a large selection and, what is more, a share in the low prices which we took advantage of. We will not endeavor to mention goods nor prices, as the STATESMAN is not provided to enlarge his sheet this week. A general invitation is herewith extended to all. It will afford us pleasure to show you through our different departments and see you satisfied that we are able to serve you better than ever. Yours for business,

L. ROSENHEIMER, Kewaskum, Wisconsin. P. S.—Don't forget that we buy, at any time, anything produced on a farm and pay the highest market price therefor.

DRESS IN BAD TASTE.

English Women Wear Costly Fabric at Public Gatherings.

Ida Isabel Harper, one of the American delegates to the international woman's congress recently held in London, left the British metropolis with a very poor opinion of her English sisters' taste in dress. "Before leaving for London," she wrote the other day, "we were told by persons who wanted us to be a credit to our country that we must be careful not to dress too gaily over here, that 'nice, genteel tail-made suits' were the proper thing. So the bankrupted ourselves on tailor-made suits of various weights and colors—and we have scarcely seen an Englishwoman wearing one since we arrived. Even in the morning at public meetings the most delicate fabrics are worn, with long trains, elaborately trimmed and often with their drapery about with utter disregard on the dirty floors of halls, theaters and in the streets which everywhere abound. When we saw chiffon dresses trailing through the parks we said to our escort, 'The women here are hardly respectable.' The very first ladies in the city, he answered, 'After becoming acquainted with some of the English women on the subject and they said: 'I do not wear tailor-made suits in the city, but in the country. In the country, but the other nine months of the year we live in them. So we put ours on the bottom of our trunks and packed the steamer rugs on top of them. We have dressed with that in mind, and we are here on top at a number of functions, and it has been interesting to compare our dress with that of the fashionable women on similar occasions in our own country. My opinion is that in the city, and in the country, the English women are quite equal to those in England and America, but in lace and jewelry the Englishwomen are ahead. I think we do not have any garments which are so smart as the English have magnificent laces and jewels as one sees here. The reason is, I think, that in the country, and in the city, they are the inheritance of many generations, and they are passed on from piece to the collection, and in London they are more old and wealthy families congregate than in any one city in the world.'"
