A TERRIFIC FIGHTER.

Daniel Boone, the Famous Hero and Kentucky Pioneer, Might Well Be Called the Bravest of the Brave.

Into the depths of wild forests where no white man's foot had ever trod went Daniel Boone, the first settler in Kentucky. He had to fight ferocious beasts and still more savage men, but he never knew fear, and he read about his deeds with the blood of all Americans.

One of this famous family, Mr. W. T. Boone, of Williams-town, in that state, shows that he is like the great hero in one respect, that he will not shed human blood if he can avoid it.

It was to prevent the flow of blood that he first used Dr. King's New Discovery for Consumption. He says: "One very hot summer day I first felt the awful power of a sunstroke. I cannot describe the terrible agony that I suffered. For one month I felt the torture of a dry, burning fever. I could scarcely eat anything. I lost all strength and vitality. Then followed terrible hemorrhages, when blood flowed from my lungs. It seemed that death from quick consumption was very near, and that I was lying on my dying bed, when a good friend urged me to try Dr. King's New Discovery. The result was marvelous. I only used one bottle, and in two weeks every trace of lung trouble had left me and I was completely cured."

The wonderful power of this grand medicine to cure every bronchial trouble makes it the supreme medical discovery of the century. It has cured consumptives given up to die by all doctors. It will promptly cure the most stubborn Coughs and severe Colds, Bronchitis, Pneumonia, Pleurisy, Hemorrhage, La Grippe, Lung Fever, Asthma, Hay Fever, Croup, Whooping Cough and all throat and lung diseases. Dr. King's New Discovery is a perfect life-saver that no home should ever be without. Only 50 cents and \$1.00. Money back if not cured. Trial bottle free. At all druggists.

Augustus—I don't see why you have substituted William's name for mine in your will, Uncle George. I have not been all that I should be, but who has? Uncle—No one, my dear boy; no one. But I thought that, considering my health, a change of her world would do me good. You are a trifle too sultry for me, Harper's Bazaar.

The Tute in Peace and in War.

Nobody ever heard of a Georgia mule stampeding. He will flinch and dodge, and go through other performances, but he never runs from anything. He has a battery of his own as efficient as the close range as a Maxim or a Gatling gun, and on this he depends absolutely. Moreover, he never wastes his ammunition nor misses his aim. Speaking, therefore, in behalf of the Southern-raised mule generally, and the Georgia-raised mule particularly, we could wish that the British commander, in attributing the capture of two of his regiments to stampeding mules, had included a brief biography of the mules in question, in order that full justice may be done. So far as our observation and experience go, neither the music of many hands nor the war of artillery have any effect on the Georgia mule. He might object to a showy uniform, or to the gaudy trappings with which vain men deck themselves, but he does not make his objection known by stampeding. On the contrary, he stands his ground and makes his influence felt in other ways.—Atlanta Constitution.

The proprietor of a country shop once worked himself nearly into a brain fever endeavoring to make out the following note from one of his customers: "Master Creamer, would you let my boy have a pair of Easy tuck shins." However, he probably was not more horrified than the schoolmaster who received a letter from a man who wrote "I have decided to inter my boy in your scull."

The following is from a letter sent to an editor who mailed a few copies of his paper to a man who did not want to subscribe: "I think folks orient to spend their munny for jaypur, my dad didn't, and every one said he was the intelligentest man in the country and had the smartest family of boize that ever lug taters."—Tit-Bits.

Printing Without Ink. The English trade papers have within the past six months devoted considerable space to the discussion of printing without ink, a subject which is of interest to all who read. The basis of this scheme is an invention for printing by an electrical process, the patents covering which have been acquired by an English corporation.

From what can be gathered from the various published accounts, the printing by this method is effected without ink in any form, by simply bringing the plate in contact with chemically-damped paper, the results being a clear print, the density of which can be varied as desired.—X.
