Among other stories set afloat by the publication of the dispatches is one that Buller's staff and Warren's staff are not on speaking terms since the Spionkop affair, and the confusion arising has cost so many lives that there was no alternative but to publish the reason pending the recalls. Manila, March 15.—There are hundreds of miles of the Pacific coast of this island unknown to our army, hundreds of miles where we have no garrisons, a long stretch of coast familiar only to such naval officers whose duty has led them to patrol or sound the eastern side of Luzon. A Spaniard in Spain or here in Manila would never think of calling this little hamlet simply Baler; with him it would be "Baler, so heroically defended by the Spanish soldiers," or "glorious Baler," and today if a soldier of Spain can truthfully say: "I was at Baler," he at once becomes great and envied in the eyes of this companions, he is the subject of a his companions, he is the subject of a hero worship of a distinctly commercial and gratifying character—it is considered an honor to drink with a "hero of Baler," During the summer of 1898 the Spanish forces at Baler were having their customary trouble with the Filipinos in that vicinity. On the whole I guess I will knock off here and go over and take another look at the bodt. In fact, I ought to, and see that she is safe. The tide is coming in and she may wash clear."

"If you must, then." said Arva reluctantly; "but don't stay longer than you can help."

"I will be back before it is really dark, "he promised, and set off.

"It's a pretty serious one."

"But there must be a way"—she looked out through the door into the darkness, as though to find the way there. "Let me ask you something. Don't laugh at me if it is foolish. Why not use the stones?" He did laugh, neverthless.

"Foolish? No." he said frankly and admiringly. "It's a great scheme. Of course I can take thin flakes of that rock you speak of, bore holes in them and lash them on. Why not? Yes, that settles the whole thing."

"Oh, does it?" she cried, with her eyes shining. "Then I am a little use, after all. Oh, I am so glad! I wish I could think of something else."

In addition to all this Arva thoughtfully addition to all this Arva thoughtfully baked a great mess of hard corn-bread, mixed with fish grease, to satisfy Fidele's generous appetite. Since the adventure in the quarry the dog's welfare had become of prime consequence to both master and mistress, and he was thenceforth considered in all their plans. "And your boat—is she safe?"

"Not just as I want her. The tide is going out, and I will run her up close ashore and let her ground. She has a lee there, and will be all right unless the wind changes. If it pulls round to the west and holds on till the tide comes back it will pound her a little. But by that time it will probably be morning, and I can take her round the point."

"She will be fully protected, won't she,

"Yes, the Tongue will act as a breakwater. There will be no trouble till the wind gets southwest. It will catch her fair then and pepper her till it gets as far round as northwest; but I don't look for it to do that. I think we shail get nothing west of a southerly wind." "And with a steady wind from there," said Arva, with her eyes sparkling, "we shall be ready to start?"

"Yes, what little is left to do we can oon finish." She drew a long breath. "It seems as though it couldn't be. After all these menths—" she did not finish, but looked off at the water. Keene glanced at her, and saw that she was biting her rebell-ious lip. He drew a little breath—it did

This was done because a great demand had recently sprung up in European markets

for their plumage, which increased the price here inordinately; and that the birds were consequently being so ruthlessly slaughtered that, if it were not in some way stopped, the pheasants would very soon have been entirely exterminat-ed. A congestion, inflammation or ulceration obtained little relief. I was so weak I could not turn in bed. Then I applied to Or. Hartman. I did not know whether he could help me or not, but I followed in a catarrh. It is known by different names, such as dyspepsia, Bright's disease, female complaint, diarrhoea, bronchitis, consumption and a host of other names. Wherever there is a congested mucous membrane there is catarrh, acute or chronic.

There has been a call at the American consulate in Lyons, France, for fish scales, to be used in the manufacture of artificial pearls. The supply is not equal to the demand. It is said that good prices will be paid for them. The scales should be packed in salt as soon as removed from the fish and packed in tin cans. Specimens sent to the consulate from America will be examined and reports about them made to the sender.—New York Tribune. EXCURSION RATES
