The People's party of the United States, assembled in national convention this 10th day of May, 1900, affirming our un-haken belief in the cardinal tenets of the People's party as set forth in the Omaha platform, and pledging ourselves anew to continued advocacy of those grand principles of human liberty until right shall triumph over might and love over greed, do adopt and proclaim this declaration of faith:

1. We demand the initiative and referendum and the imperative mandate for such changes of existing fundamental and statute law as will enable the people in their sovereign capacity to propose and compet the enactment of such laws as they desire, to reject such as they deem injurious to their interests and to retail unfaithful public servants.

2. We demand the mubile ownership and guard against interference. No disturb-

One thing that some British military experts think the South African war has decided is the futility of night attacks. Night fights may be justified and successful under certain conditions. These conditions are—first, secrecy; second, the employment of the very best troops and the most skillful staff. To attack in force means either that your troops advance in an extremely-close formation and thus lay themselves open to heavy losses; or, if they are disturbed, there is the almost certain chance that a number will go

Materials for repairs come largely from the Wisconsin Valley division. The Dessert Lumber company at Mosinee is furnishing 1100 pieces of piling 30 to 50 feet in length to be used in improvements at Tyndall, S. D. Six thousand pieces of piling and 5,000,000 feet of timber will enter into the construction of the new ore docks at Escanaba. The timber is chiefly Southern pine, although much of it is Douglas fir from the state of Washington. The latter timbers are 40 to 70 feet in length.

Fifty miles of new road is being built from Fox Lake to Janesville, to be completed in ninety days.

James R. Keene's Loyalty.

One of the strongest traits of character of James R. Keene, the Wall street mulor James R. Reene, the wan street multi-millionaire operator, is his loyalty to his friends. He is said never to forget one when trouble comes. Among his early associates after he came to New York from the West is an elderly man, now broken in health and fortune. Years give yield by side they fought the strengt. ago, side by side, they fought the stream-ons fight. After one victory came a de-feat. The other could not raily, and all that he had was lost—all except Mr. Keene's remembrance. It is said that he instance of his staunchness happened not long since. A well-known man "on the street" who had been intimately connected with Mr. Keene and his associates, lost all of his accumulations in an outside venture. He was more than 60 years old, but self-reliant and hopful. "I think I can endure the Klondike," he said bravely to Mr. Keene. "There's no use hanging around the old scenes."

"Come in and see me tomorrow," re-That evening Mr. Keene mentioned the sturdy resolve to a group of old friends, and the next day he turned over

friends, and the next day he turned over to the man who was down a sum of money sufficient to defray expenses in the Klondike for two years. "If he strikes luck," said Mr. Keene to his friends, "we'll all be glad and our money will come back. If he fails, we won't regret the money. That show of the right spirit is worth it twice over."

It is two years since then and the latest news from Alaska is that the old prospector has located claims worth something like a quarter of a million dollars and intends paying New York and his friends a visit.—The Saturday Evening Post.

We Are Nearer Aerial Flight.

Notwithstanding the pessimistic opin-ons of some scientists there is at least one of some scientists there is at least one sound reason for now believing that man will eventually navigate the air. This proceeds from the fact that within the past ten years artificial motors have been produced which approach closely, in relative lightness, the proportion in relative lightness, the proportions which obtain in the motor muscles of birds. The weight of the latter is about in the ratio of six to twenty pounds per horse-power developed, while the most powerful locomotives weigh some 200 pounds per horse-power. Since 1890 steam engines of special design have been produced which weigh less than ten pounds per horse-power.—Octave Cha-nute in the Independent.

"Oh, no," said Arva, hastily, "he would knock things all to pieces. He is very demonstrative, and his paws and tongue reach everywhere. I can see him later."

While she was saying this, Keene had been looking at a painting of a ship on the opposite wall, and an idea forthwith struck him.

The council i called upon annually for the payment of rents for these people and Ald. Luciand Smith have conceived the idea of smodeling the ; bandoned schoolhouse on Grant Street and Marr street an on Grant Street and Marr street and give them over to the families of these unfortunates. Now that the common council has changed the location of the proposed new schoolhouse in the Eighth ward onto Ninth street these gentlement advocate the removal of the old Mar, street huilding onto the Grant street by side for duty in this cause. The plan meets with some support, but on the other hand the property owners and residents in that neighborhood are alligned in opposition to the movement, anticipated that the establishment of sating that the establishment of such houses in that vicinity would have a dis-astrous effect on valuations of property in that part of the city and detract from its desirability as a residence district. They will bitterly oppose any effort to carry out the proposed plans, which to in no immediate danger of being carried out as the buildings which may be used for the tenement surposes will not be for the tenement purposes will not be abandoned until the new structures are erected. Their completion may be delayed till the first of next year, although plans will probably call for their comple-tion as early as the middle of September.

Will be Tried at Fond du Lac.

Fond du Lac game wardens, who have been prosecuting violators of the game and fish laws, caught off the shore of Oshkosh, have been trying those cases in Oshkosh. But they will discontinue the practice. Oshkosh juries have a peculiar faculty of determining a man's improvement in these cases he the testiculiar faculty of determining a man's innocence in these cases be the testimony ever so conclusive as to the guilt of the defendant. All the cases will hereafter be tried in Fond du Lac.

Give Flowers to Passengers. A pretty custom of the Michigan Cen-al railroad is the distribution of bou-

quets to women passengers on the trains at the station of Niles. A man in the employ of the railroad company cultivates the flowers on a five-acre plot near the railroad station, on which there are three large hothouses, where several men are kept at work. The distribution to the passengers is made every day, winter and summer, one train each way, and netimes more, being served.—Indianap-

Puffs under the eyes; red nose; pimpleblotched, greasy face don't mean hard drinking always as much as it shows that there is BILE IN THE BLOOD. It is true, drinking and over-eating overloads the stomach, but failure to assist nature in regularly disposing of the partially digested lumps of food that are dumped into the bowels and allowed to rot there, is what causes all the trouble. CASCARETS will help nature help you, and will keep the system from filling with poisons, will clean out the sores that tell of the system's rottenness. Bloated by bile the figure becomes unshapely, the breath foul, eyes and skin yellow; in fact the whole body kind of fills up with filth. Every time you neglect to help nature you lay the foundation for just such troubles. CASCARETS will carry the poisons out of the system and will regulate
