SATURDAY, SEPT. 29, 1900.

JOHN M. PALMER, who was nominated as the Gold Democratic candidate for the presidency in 1896, died of heart failure at his home in Springfield, Ill., last Tuesday, aged 83 years.

The census figures show that New York city has 25,000 more women than men, indicating that the young men of Gotham are still inclined to "go west and grow up with the country."

The striking miners of Pennsylvania have so added to their ranks by marching about the mines that they are to be stopped by the authorities of Luzerne county, on the ground that people and property at Hazleton are endangered during such demonstrations by the strikers.

The orange crop of California this season aggregates 15,000 acres, and it is said that \$47,000,000 is now invested in the industry. It is believed next year's crop will fill 20,000 acres. California is almost as famous for fruit as she was for gold.

As a result of numerous hold-ups on the Omaha street railway, the company has made a standing offer of \$500 for every dead handit produced at the coroner's office, and \$250 for every live handit turned over to the authorities. The greatest danger now seems that the citizens of that place may become lopsided from carrying shooting irons in their hip-pockets, though the boom in the demand for such weapons likely will be welcomed by dealers therein.

The growth of city population, as revealed by the new census returns, indicates the persistent ebb of the tide of population cityward. Deplored as this tendency is by people with old-fashioned notions, the fact is reasserted in the present enumeration of population; and while there is quite a uniform percentage of increase in the first and second class cities, there also is a larger ratio of growth in the cities which have the advantage of ocean or lake facilities.

Spain is about to change its way of reckoning time, and on Jan. 1st the hours of day will be numbered from 1 to 24, instead of by the present system. The change is officially approved and directed by the Queen Regent in a decree establishing the new method throughout the kingdom. The computation of the hours will be made from midnight to the following midnight, in hours from 1 to 24, omitting the words afternoon and forenoon. The hour of midnight will be designated as 24. The interval between midnight (24) and 1 o'clock is to be designated as 0.05, 0.10, 0.20 and 0.50. This is a change that has been very much discussed, and it is probable that Spain leads in the movement that may become general throughout the world.

The loss of lives at Galveston now foots up to nearly 6,000, or approximately one-sixth of the census population. The island and the adjacent main land likely will add 2,000 more to the list of killed. The actual property damage is reported as being incalculable, but it is believed that the individual losses and losses in public property such as paving waterworks, schools, hospitals, churches, etc., will easily amount to \$30,000,000. This estimate takes no account of the direct or indirect injury to business. Relief funds continue pouring in, and a collection for the storm sufferers was taken up in all Catholic churches of Wisconsin last Sunday. The governor of Texas apportions the relief money among the various communities afflicted by the storm. At Galveston the railroad managers are urging the committees to cut off all relief supplies on the ground that there now is employment for all able-bodied men.

Iron and coal productions determine the position of countries in the industrial world. Since in both of these staples the United States now holds first place, our country may rightfully take rank as first among industrial nations. Last year the American output of coal amounted to nearly 200,000,000 tons, or about one-third of the total yield of the mines. This figure indeed may be considerably short of the actual amount, inasmuch as two years ago the United States was credited with 196,282,000 long tons of 2,240 pounds, and since then tremendous strides have been taken, a largely stimulated production having been caused in the past year by the enormous activity in manufacturers. In the past two years the coal production in the U. S. has surpassed that of the United Kingdom. While our coal deposits are still practically inexhaustible, those of Great Britain have reached their maximum development, and will show a decline before long. In the output of iron ore, the United States also takes first place, with England second.

Arthur, son of Peter Hammen, met with a very painful accident lately. While working around a feed-mill his hand was caught by the machine, taking off parts of three fingers. He is now under the care of Dr. Bemis.

A very large and enthusiastic crowd attended the Democratic rally in C. Koch's hall last Saturday evening. Attorney Martin Hughes of Sheboygan was their able adviser. After speaking about trusts, imperialism, the Boer war, etc., for over an hour, he concluded by assuring his audience that he did not want to influence votes; that all he asked was for the voters to consider the issues before voting, and that if they do so he is feels sure they will vote for Wm. J. Bryan and Chas. H. Weiss.

Um—ah—why, by George! you had a storm here night before last, didn't you?" "Yes," carelessly replied the visitor; "something of a breeze."

"Something of a breeze? Why, it was a hurricane—a regular tornado! This is an account of it—one, two, five, nine pages of the manuscript. Oh, our Allegash correspondent is all right, and don't you forget it. Listen here—um, um!" The dread demon of destruction, "The howling hurricane's heavy hand—'h'm, h'm!—'The lurid lightning's lambent lash—'by jing! that fellow knows how to sling a pen, doesn't he?—'The raging, resonant roar of the embattled elements tumultuously thundering toward the terrified town.' Ah, he's a bird, and no mistake. Something of a breeze, indeed! Now let's see what he says on page six. 'The chariot of the storm-kings flying through the air, gushing its fangs as it rolled.' What do you think of that, hey? Say, now, if that doesn't mean a terrible hurricane what does it mean?"

"Huh! The wind blew down two or three fencibles, a sign, a shed or two, a few dead trees, and St. Pettingill's rickety old barn. All that your correspondent's alarming alliteration really means is that he faced the breeze with his mouth open and got full of wind.—Tom P. Morgan, in Judge."

How To Gain Flesh

Persons have been known to gain a pound a day by taking an ounce of SCOTT'S EMULSION. It is strange, but it often happens.

Somewhat the ounce produces the pound; it seems to start the digestive machinery going properly, so that the patient is able to digest and absorb his ordinary food, which he could not do before, and that is the way the gain is made.

A certain amount of flesh is necessary for health; if you have not got it you can get it by taking
