5500 Bushel of Potatoes are Marketed in This Village Last Tuesday

That Kewaskum has proved itself to be a very good market town has been shown the past week when potatoes have been marketed by the wholesale. Last Tuesday was the largest potatoe day in the history of the village, 5500 bushels being received here. Farmers arrived early in the morning with loads. News Notes of Wisconsin

Madison .- The state highway commission has finished taking applications for state aid for roads and bridges. A total of \$450,805 was asked for by the various counties, though there is but \$350,000 available in the hands of the commission for this work. The commission is preparing a circular which will be sent out soon, explaining the new law and stating that the commission will have \$13,200,000 to spend for the permanent improvement of roads and bridges in the state next year. Only six of the seventy-one counties in the state have made no provisions for a state aid and therefore can receive none under the apportionment.

SPLENDID CANADIAN **CROPS**

Wheat, Oats and Barley Universally Good Throughout Manitoba, Saskatchewan and Alberta

The reports that come to hand from the wheat fields of the western Canadian provinces show remarkably good yields in all parts. Yields are recorded of wheat going 35 and 40 bushels in many places, and cats from 60 to 100 bushels per acre. Barley and flax are splendid. The thousands of Americans throughout the United States who have friends in Manitoba, Saskatchewan or Alberta will be pleased to learn of the great success that has followed their efforts. Many of these have not confined themselves to the growing of grain, but have also gone into the cattle industry. On the luxurious grasses that are so abundant there, in almost all districts, make this industry safe and profitable. The land sales reported by the railway companies and by the different land companies show the great increase that will likely take place during the next year in farming operations. What has been said time and time again may now be well repeated, that theye is no place on the American continent where the same opportunities are afforded the man looking for a home, for the young man starting out in life, the man with a growing up family, who desires wider scope for his ambition. The Canadian government agents located at the propers.

Synopsis.

Jack Keith, a Virginian, now a border plainsman, is riding along the Santa Fe trail on the lookout for roaming war parties of savages. He notices a camp fire at a distance and then sees a team attached to a wagon and at full gallop pursued by men on ponies. When Keith reaches the wagon the raiders have massacred two men and departed. He searches the victims finding papers and a locket with a woman's portrait. He resolves to hunt down the murderers. Keith is arrested at Carson City, charged with the murderer his accuser being a ruifian named Black Bart. He goes to juil fully realizing the peril of swift border justice. A companion in his cell is a negro, who tells him he is Neb and that he knew the Keith family back in Virginia. Neb says one of the murdered men was John Sibley, the other Gen. Hard boil as many eggs as are necessary, allowing two eggs for each plate required. When cool enough to handle remove the shells and carefully cut each egg in half lengthwise. Crumble all the yolks in a bowl, add salt, pepper, paprika, mustard to taste, and finely chopped cold ham or veal in the proportion of about a teaspoonful for each egg. Mix well. Then moisten with lemon juice and olive oil in proportion to suit the taste, adding enough liquid to make a very soft, smooth paste. Replace this mixture in the empty whites and arrange four halves around a lettuce leaf on a plate. In the center place a generous table spoonful of cut up radishes and celery, being careful in cutting these that each piece of raddish shows some of the bright red outside. Around the outside of plate, between the halves of egg, put more radishes, cut in larger pieces than those used in the center. Then put the plates in the ice box until the sandwiches are prepared. Make these of thinly sliced white bread spread with butter and cheese. While any kind of cheese will make tasty sandwiches, if American cheese is used it is better to grate it and then sprinkle it over the buttered bread than merely to slice it. Facts for Weak Women

Dr. Pierce's Favorite Prescription It Makes Weak Women Strong. Sick Women Well.

It acts directly on the organs affected and is at the same time a general restora-tive tonic for the whole system. It cures female complaint right in the privacy of home. It makes unnecessary the disagreeable questioning, examinations and local treatment so universally insisted upon by doctors, and so abhorrent to every modest woman.

We shall not particularize here as to the symptoms of those peculiar affections incident to women, but those wanting full information as to their symptoms and means of positive cure are referred to the People's Common Sense Medical Adviser—1008 pages, newly revised and up-to-date Edition, sent free on receipt of 21 one-cent stamps to cover cost of mailing only; or, in cloth binding for 31 stamps.

Remarkable Success of These Talented Physicians in the Treatment of Chronic Diseases.

The United Doctors licensed by the state of Wisconsin for the treatment of deformities and all pervous and chronic diseases of men, women and children offer to all who call on this trip, consultation, examination, advice free, making no charge whatever, except the actual cost of medicine. All that is asked in return for these valuable services is that every person treated will state the result obtained to their friends and thus prove to the sick and afflicted in every city and locality, that at last treatments have been discovered that are reasonably sure and certain in their effect.

These doctors are considered by many former patients among America's leading stomach and nerve specialists and are experts in the treatment of chronic diseases and so great and wonderful have been Henry Damm was a business cal- their results that in many cases it is hard indeed to find the dividing
