DEATHS OF To Incorporate Eden Village

Petition From Residents is Considered by Court

The petition of Eden residents asking for permission to incorpor ate that village under the laws of the state of Wisconsin was considered in circuit court today, and as there were no objections filed the petition will be granted.

The petition states that the village of Eden now has 150 or more inhabitants and is a half mile in area. The petitioners ask the court to make an order setting forth the boundaries of such territory by course and distance and declare that that village be an incorporated one. The petition is signed by William J. Nast, F. J. Rehorts, J. E. McCarthy, John O'-Brein, Chas, Hildebrand, Frank Moerschen, F. O' Briggs P. F. Plood. R. E. Salter, Henry Grahl, Robert P. Bauers and others The necessary papers were signed at the court house this afternoon,-Fond du Lac Reporter,

N interesting spring hospitality, which is absorbing much attention, is the breakfast to be given by the Demo-A cratic women of Washington on May 20. Like the Jefferson day banquet given annually by the men of the Democratic party on the birthday anniversary of the father of Democracy, Thomas Jefferson, the breakfast of May 20 will honor the patron saint chosen by the women of the party, Mrs. James Madison, the one woman of all who have presided in the home of presidents who has been handed down to fame under an abbreviated Christian name. The beloved "Dolly" during her long life was said to be the most popular woman in the country.

The French govern- track, demolishing the poles and sevment has given encouragement to ering communication with Hattiesthese societies by furnishing expert burg. advice, granting subventions, and permitting long term loans by agricultural credit associations. The general buying is done principally through dis trict unions. High-grade farm machin ery such as is beyond the reach of many individual members is purchased from the surpluses or is loaned gratuitously or upon the payment of nominal fees.

In regard to industrial co-operative production it appears that plants owned and operated by the operatives are not uncommon in France.

It means that if the animal is so diseased as to render the meat unfit for food the meat is destroyed for food purposes, while on the contrary if the disease be slight and of such a character that the fitness of the meat for food is not affected then, of course, the sound meat is passed.

It was pointed out in Washington that ample proof of the seriousness of the charges against Secretary Wilson, Solicitor McCabe and A. D. Melvin, chief of the bureau of animal industry, contained in the resolution introduced by Representative Nelson is found in the fact that for the first time in their official lives they have been obliged to offer a defense before an official investigation is begun or one witness heard. One remarkable feature of the defense is an attack made by Secretary Wilson upon Mrs. Carolina Bartlett Crane, who first called Mrs. Nelson's attention to the secret orders issued from the department of agriculture.

MARYLAND FOR CLARK

MISSOURIAN AND ROOSEVELT GET POPULAR PLURALITY.

Both Will Control Their Respective State Party Conventions, According to the Returns.

Baltimore, Md., May 8.-On the ace of the returns Tuesday Col. Roosevelt will get Maryland's 16 votes in the Republican national convention at Chicago. With the state and city organizations against him, he defeated them both by a close margin

Speaker Champ Clark of the National house of representatives will have a majority of the Democratic delegates to the Maryland state convention and the delegation of 15 to the Democratic national convention will be instructed to vote for the speaker for the Democratic nominauon for president. Colorel Roosevelt wil have 66 votes

in the state convention, just a bare one over the 65 which constitutes a majority of the 129 votes in the state convention. President Tatt will have 63 votes and a further analysis of the returns may show that he may have sufficient friends among the delegates to control the personnel of the Maryland delegation. This will be important if Roosevelt cannot be nominated on the first ballot, as the state Republican leaders will then be able to throw them to Taft on subsequent ballots.

Speaker Champ Clark was backed in his fight by the entire city Democratic organization and he swept Baltimore and gets its 24 votes in the state convention. Clark was also supported by the state organization and was an easy winner over Wilson and Harmon, and will have 80 votes in the state convention. Wilson, his strongest opponent, captured 45, while Harmon received the four votes of Worcester county, the home of United States Senator John Walter Smith, who is a staunch supporter of the

FOR EVERY FAMILY MEDICINE CHEST

To the head of every family the health of its different members is most important, and the value of an agreeable laxative that is certain in

its effect is appreciated. One of the most popular remedies in the family medicine chest is a combination of simple laxative herbs with pepsin that is known to druggists and physicians as Dr. Caldwell's Syrup Pepsin. This preparation is mild and gentle in its action on the bowels, yet positive in its effect. A dose of Syrup Pepsin at night means relief next morning, while its tonic properties tone up and strengthen the muscles of stomach, liver and bowels so that these organs are able in a short time to again perform their natural functions without

SECRET OF COLORED FLOWER

Green Carnations and Pink Lilles Made So by Immersing Stems In Aniline Solutions.

At a recent flower show spectators were astonished at the sight of oddcolored flowers-green carnations, pink lilies of the valley, deep scarlet narcissi and other flowers just as remarkable. The coloring was beautifully delicate and soft, and for a time every one supposed that some clever gardener would make his fortune from the discovery of these new and marvelous varieties of flowers. As a matter of fact, the coloring of the flowers was so simply done that nearly any clever boy or girl could do It with success. The whole secret lies in immersing the stems of the fresh cut flowers in various kinds of aniline so-

lucions. Aniline scarlet dissolved in water to about the transparency of claret has a very rapid action on flowers, coloring them pink and scarlet. ERUPTION COVERED BODY

"Three years ago this winter I had a breaking out that covered my whole body. It itched so it seemed as if I should go crazy. It first came out in little pimples on my back and spread little pimples on my back and spread till it covered my whole body and limbs down to my knees, also my arms down to my elbows. Where I scratched it made sores, and the terrible itching and burning kept me from sleeping. I tried several reme dies all to no purpose. Then I concluded to try the Cuticura Remedies. I used the Cuticura Soap and Cuticura Ointment, also the Resolvent, for about four months, and they completely cured me of eczema. I have had no return of the disease since. We believe FORD MODEL T is fully ten per ceni better in quality than ever before. Not because there have been any changes in design, but simply because of added refinements and conveniences. It is the same car that has given such splendid satisfaction to more than 80,000 owners. The same car that is so familiarly known from "Greenland's icy mountains to India's coral strand." The car of immediate adaptability to the wants of all men. Just as reliable, serviceable and enjoyable on the farm as it is on the paved streets of the city. Surely you see them wherever you go, and they go wherever you see them. Keep these facts in mind: Extreme simplicity in design. Vanadium steel (scient fically heat treated) construction. Magneto built into the motor. Ford planetary spur transmission. Ford spring suspension. Ford rear axle. Quick accessibility to mechanism. 20 to 25 miles per gallon of gasoline. 8,000 to 10,000 miles on one set of tires. Wisconsin Near Top Among American States in Acre Production of Alfalfa

The bulletins of the 1910 census indicate that at that time there were in Wisconsin 17,986 acres of alfalfa, that the yield was 49,794 tons with a value of \$561,983. This means that in this state alialfa was worth \$11.28 per ton, that the yield per acre was 2.77 tons and was worth \$31.25 per acre.

This return is greater than that of all but one or two of the irrigated states in tonnage and much greater in value. It is likewise worth more per acre than the alfalfa crop of any of the middle western states.

The fact that much of this acreage was new seeding from which but one cutting was obtained, is an element in the situation. Again, many started alfalfa fields without proper attention to the plant, which is as feeble as an infant as it is lusty as an adult. There is every reason to believe that alfalfa will be a very profitable corp in Wis-

MORE ACRES USED.

The acreage has been greatly increased since the census year (1910) and more acres will be planted this year than in any previous year.

Alf .lfa comes nearer being a "balanced ration" for dairy cows than any other plant. It likewise contains more of the food elements especially demanded by the dairy cow than any other plant.

The fact that alfalfa makes excellent silage meets the objection of some who are inclined to insist that "clover is good enough.

ALFALFA BEATS CLOVER.

Alfalía contains about 25 per cent more of the nitrogenous elements than clover-and those are the elements most needed by the dairy cow. When fully established in Wisconsin it promises a yield approaching (or perhaps exceeding) four tons per acre. At present values for animal foodstuffs this means an acreage value of \$75 to
