NUMBER 23.

VOLUME XIX

KEWASKUM, WIS., SATURDAY, FEB. 14, 1914.

OF INTEREST TO FARMERS **********

ALFALFA CULTURE MEANS A GREATER SOIL SAVING

to raise timothy instead of alfalfa hay. According to figures given at the Wisconsin Farmers' Course by R. A. Moore, secretary of the Wisconsin Agricultural Experiment association, it requires several acres of timothy to produce as much feed as can be secured from one acre supporting a good stand of alfalfa.

Instead of depleting the soil, alfalfa has the power of adding fertility in the shape of nitrogen to the ground on which it is grown.

As essentials necessary for the successful growth of alfalfa Mr. Moore spoke for a warm, well drained and well prepared soil, as free from noxious weeds as possible, and which preferably has been inoculated with soil from old alfalfa or clover beds. The rate of seeding according to this alfalfa enthusiast, should be under ordipary conditions, at least 15 pounds to the acre, and to prevent killing no cuttings should be taken from the field after early Septem-

Alfalfa is steadily increasing in popularity among Wisconsin farmers. When 10 years ago there were but 17 acres in the state, last the town or village clerk at least year a conservative estimate plac- five days prior to the election. ed the acreage at slightly over 18,000 acres, with every county in the state raising more or less of the great legume.

ADVANCEMENT

OF WISCONSIN

Undoubtedly the greatest agency for giving publicity to Wisconsin's agricultural achievements and opportunities is the Wisconsin Advancement association. At its fourth annual meeting in Milwaukee, on Tuesday, Pebruary 3, there were gathered nearly a hundred of the men and concerns who are working for further settlement and developement of the state.

The Wisconsin Advancement association is the largest and oldest association of its kind in the country at this time. Most of such organizations of the kind come, stay a year or two, and go. caucus purposes. Ballots used at at Milwaukee this week. This one is growing all the time in size, stability and effectiveness. At a banquet given to the mem-

bers and guests from Milwaukee and elsewhere in the state, the program was given over to men in the state college of agriculture and others who are not connected nected with the association. Prof. Moore, Milward and Delwiche of the college of agriculture, President Moehlenpah of the State Bankers' association and Burt Williams, editor of Municipality.

CHOLERA RESISTANT

BREEDING IMPOSSIBLE

An idea which has gained some headway in the state, that it is possible to breed disease resisting hogs from ,cholera immunized animals kept apart for breeding purposes, is scouted by Dr. B. A. Beach of the state hog cholera serum plant.

The only way to prevent hog cholera is by providing wholesome feed, by keeping the herd under sanitary conditions, and by properly vaccinating all animals when such treatment if found necessary or advisable.

The state through the University of Wisconsin College of Agriculture furnishes serum to the residents of the state at the rate of 1 cent per cubic centimeter. None of the serum is sent out until it has been tried out with successful results at the Experimenment station.

STANDARDIZATION

OF FARM CROPS

No matter what may be said on package bearing a label with grades and quality carefully stated is near at hand-near at hand for the reason that it gives an advantage to the producer. It is useless to talk about anything like direct marketing without standardization, and, whether progress is made or not in direct marketing, the fact remains that the goods that are put up in this manner are the ones that will sell the best, which means that they will be most in demand and bring the hest prices. The sooner we get to this idea the sooner we will accomplish something along this line.

-The Statesman has a circulation that makes it a very desirable melium for advertisers,

CHANGE IN THE TOWN ELECTIONS

Wisconsin farmers cannot afford Caucusses May Be Abolished Entirely and Nominations Made by Nomination Papers

Candidates for office in towns

and villages, as well as town officers will do well to read Chapter 686, Laws of 1913, which deals with elections. The new law does not change the mode of conducting the caucuses, only that it makes it lawful to abolish the caucus entirely and that nominations be made by nominating papers, which must contain signers of at least 10 per cent of all the votes cast in said town or village for all candidates for governor at the preceding election. The towns and villages having adopted the new mode of holding caucuses are not in the least affected by this law, which also provides that the usual caucus committee of three qualified electors be appointed, and that at least five days' notice be given before said caucus, which must be held at least seven days before the election. A defeated candidate can get out nomination papers which must be filed with

Section 2 of this chapter provides that the names of all persons nominated either by caucus or nomination papers be placed upon the official ballot. In case no nomination is made the space for such office must be left blank so that it can be written in by electors. Ballots not provided by the town or village clerk shall not be counted in any election, but any voter may write upon his ballot the name of any person for whom he desires to vote for any office in such place as to indicate the office. The names are to be arranged in alphabetical order and to have a blank space for each office so that any name can be written in lieu of the one printed thereon. The ballots for the elections will be similar to the ones now used in nearly all towns this election shall be furnished solely at the expense of the respective towns or villages. Sample ballots must also be provided by the town.

Mr. John Sammons of the town of Eden was pleasantly surprised last Thursday evening by 95 of his friends and relatives, the occasion being Mr. Sammon's and his brother Tim's fifty-eighth birthday anniversary. Dancing was the main pastime of the evening and violin and guitar selections were rendered by several of the guests. At 11 o'clock, a dethe matter of crops and market- licious luncheon was served, afing, the fact remains that the one | ter which the guests partook in great matter to which attention | the merriment until the wee hours should be given in Wisconsin is of morning, when the guests dethat of standardizing crops and parted for theri homes, all wishpackaging. The day of the small ing John and Tim many happy returns of the day.

Bowlers Defeated

A party of bowlers of this village went to West Bend last Tuesday evening and bowled a match game with a team from that city. The West Bend bowlers were determined to get revenge for the defeat they suffered in this village several weeks ago and were in good form, they defeating our boys very badly. The team of this village consisted of the following: Jos. Eberle Jr., Jos. Mayer, Carl Brandstetter, John F. Schaefer and Wm. Eberle. Several rooters accompanied the team,

MEETS A TRAGIC DEATH LOCAL BASKET

Little Son of Mr. and Mrs. William Calvey of Osceola Drinks a Vapor Mixture. Death Came Suddenly

Thomas, the fifteen months old son of Mr. and Mrs. Wm. Calvey of the town of Osceola, met death in a most tragic manner at their home in Osceola Saturday. The little boy died from drinking a mixture that was being used over a lamp in the treatment of whooping cough.

The accident happened about noon time. Mrs. Calvey's sister, daughter were visiting at the Calvey home. The little girl was ill with the whooping cough. One 33 to 23. of the treatments was to heat the mixture over a lamp so the child could breathe the vapor, the mixture was prepared at noon, there being enough to fill a cup half full.

Mrs. Blackmore left the room for an instant, leaving the cup standing upon the table. The little Calvey boy took the cup and

drank the contents. When the fluid was missed in was at once suspected that the little boy had taken it and an effort was made to get the assistance of the physician at Dundee but he being absent from the village it was necessary to send to Campbellaport.

Regular Winter Weather

We certainly are having regular mid-winter weather at present. The thermoneter on nearly every morning of this week registered between 10 and 18 degrees below zero. Sleighing is very good and people who harvested ice two weeks are sorry, for it is now about fifteen inches thick. According to an old belief, we will have an early spring, for the groundhog did not see its shadow on Candlemas Day.

BALL TEAM WON

Defeated The Strong Menomonee Falls Basket Ball Team Here Last Saturday Evening. Final Score 33 to 23

Three cheers for the local city basketball team. They succeeded last Saturday evening in defeating the strong Menominee Palls team, which defeated our boys badly at Menominee about three weeks ago. Our boys were bound to win the game, and by playing true basketball all the time, final-Mrs. T. Blackmore, and her little ly became the victors of one of the best games ever witnessed in this village. The final score was

> The first half of the game was in Menominee Palls' favor, the score being 9 to 8. However, our boys came back in the second half and the last ten minutes of playing resulted in our boys gaining a ten-point lead over their rivals. Menominee put up a good game, but our boys seemed to be at their best and held the opponents

to 23 points. The game, was full of spirit and the crowd kept yelling all the time, at some times so loud that the whistle of the referee could not be heard. Everybody, who was in attendance claimed that the game last Saturday night was one of the fastest and best played games ever played in this village. A game like last Saturdays' was a pleasure to see and if the boys would always play that kind of a game, they certainly would deserve record breaking crowds. The attendance last Saturday was not very large, and our

boys met a deficit, Elwyn Romaine, for the locals, made 6 field baskets, scoring nearly half of the points for our team. The rest of the players however, played a very good game and their guarding prevented the opposing team from making more goals. A slight change in the lineup was made in the second spent last Sunday and Monday half, when M. Rosenheimer took Walter Schneider's place, Fol-

YOUNG WIFE CALLED AWAY ASSOCIATE EDI-

Mrs. John Haug of the Town of Auburn is a Victim of the White Plague

Mrs. John Haug, nee Bohnacker, wife of John Haug of the town of Auburn, passed away at her home last Monday, after an illness of four years with tuberculosis. Deceased had reached the age of 25 years, 8 months and 19 days. She was born in Chicago on the 18th day of May in the year 1888. She was married to John Haug on June 10th, 1909. Besides her husband she leaves to mourn her loss, two small children, Ella, age 3 years, and John an infant of fourteen months.

Deceased was well liked by her many friends and neighbors, she also was a very kind and loving mother and wife. She will be greatly missed by her surviving family and relatives.

The funeral was held yesterday, Friday, at 10 A. M., from the Holy Trinity church in this village with interment in the congregation's cemetery. Rev. Ph. Vogt officiated.

To the bereaved relatives the STATESMAN extends its heartfelt sympathy. May she rest in

CARD OF THANKS.

We desire to express to our sincere thanks to all those who so kindly assisted us during our recent bereavement, the loss of our beloved wife and mother, Mrs. John Haug, and to all those who showed their respect by attending the funeral.

John Haug and children.

"I" May Cost \$750

The case of D. E. Johnson and Charles Witt, co partners known as the Wisconsin Amusement company, against the Western Union Telegraph company for damages to the extent of \$750 for an alleged missent telegram was taken under advisement by Judge Elsner Tuesday.

The Amusement company had undertaken to supply an aviator county fairs, according to the tes-F been engaged to make the flights.

The amusement company 1 through its stenographer, Louis 1 P. tri, offered the followingt ele-Pram in evidence which she claimed to have sent to Mr. Witt when it became known that the avia-7 tor's machine had suffered an acr cident and that he could not appear as scheduled.

"Milwaukee, 9-13-13. "Charles E. Witt, Withers, Wis. "Received special from Wiggin. Can't make Cedarburg and West

Bend. Will make Montello. "Wisconsin Amusement Co." The company alleged that the telegraph operator sent the fol-

Theodore Schmidt Resigns Position to Accept a Position in the Kewaskum Mutual Fire Insurance Office

Theodore Schmidt, who for the past eight months has held the position as associate editor of the Statesman, has tendered his resignation to take effect at once. He has accepted a position with his father in the Kewaskum Mutual Fire Insurance office, to fill the vacancy of Miss Adelaide Schaefer, who also has tendered her resignation. Miss Schaefer's resignation took effect yesterday, Friday. What her intentions for the future are we have as yet been unable to ascertain.

Mr. Schmidt will be succeeded in editor by Donald Harbeck, at present foreman of the printing have charge of the mechanical part of the plant as heretofore.

Our Congressman (From The Hartford (Wis.) Times, Feb. 6, 1914)

Too much credit and praise can-

not be given Congressman Burke

for the manner in which he is looking after the affairs of his constituents. It has always been knownt hat there are two kinds or classes of congressmen at Washington, known as the "Society and hears of these "Society Con- lary 25th. gressmen" doing the "tango, bunny hug, grape vine and some of those other new fangled dances one would actually believe that the people of their districts sent them there for that purpose. While the society congressmen are out enjoying themselves the working congressman is busy at work Jefferson Banner, has been aplearning the wants of the people pointed confidential inspector unof his district and trying to figure out some manner in which he can be of additional service to them. Congressman Burke is known as one of the hardest day last week with six fingers on at the Washington and Ozaukee working congressmen at the na- the left hand. The sixth finger tional capital. If one could be timony, and Chas. Wiggin had present at Washington and see some of these congressmen doing the tango, you would not find Congressman Burke among them but you could find him at work in his office.

Lately every person has received a letter from Congressman Burke, offering to send them certain publications and asking the people in what other manner he might possibly be of service to them. It is safe to say that but few congressmen go to the bother of making such offers to their constituents and trying to find out in what other way he may be of service to them.

For the manner in which Con-

gressman Burke answers and looks after the wants of his constituents one has but to ask some person who has written the congressman and asked him to do something. You will find that all such persons have the highest praise for Congressman Burke for the manner in which he attended to their wants and complied with their requests. Just speak to some old soldier, and he will tell you of the manner in which Con-MAY BE CONTROLLED gressman Burke aided him. In quire of any one else who had business at the national capital and wrote the congressman calling his attention to their matter. Such people are unanimous in their praise for Congressman Burke as a public official. By his vote on all questions during his service in congress he has demonstrated that he is a friend of the people. He has vet to cast his first vote in favor on any measure for the trusts or monopolies, or against the welfare of the people. He has been tried and found wanting in no respect. It is for this reason that everybody you meet has a kind word for Congressman Burke, and that time there. everybody is looking for his unanimous re-election.

Miss Louisa Guenther and a friend of Milwaukee spent from last week Friday until Monday morning here with her parents.

William Gruetzmacher, an old resident of the community, passed away at the home of his son Peter last Sunday at the advanced age of 82 years, 10 months and 18 days. Deceased was born in Jehow. Mecklenburg-Schwerin, Germany. on March 21, 1831. He was married to Dora Pamperin on June 18, 1858 and in 1859, they settled in this town. Seven children were born to them, six of whom survive, they are: Dora, Mrs. Fred Stebben of the town of Herman; Augusta, Mrs. Wm. Bruckman, Mary, Mrs. August Mayer, Henry, Peter and Lena ,all of the town of Wayne, Eighteen grand-children and thirteen great grandchildren also survive. The funeral was held Thursday afternoon from the Lutheran chlurch at Kohlsville, Rev. Wm. Weber of-

The Fact Remains

No amount of misrepresentation by the peddlers of alum baking powders, no juggling with chemicals, or pretended analysis, or cooked-up certificates, or falsehoods of any kind, can change the fact that

Royal Baking Powder has been found by the official examinations to be of the highest leavening efficiency, tree from alum, and of absolute purity and wholesomeness.

Royal Baking Powder is indispensable for making finest and most economical food.

-Word was received here Monday of the death of Mrs. Margaret Jaunke of Nara Visa, New Mexico. She died in a hospital at the February term of court as Dalkart, Texas. Deceased is a sister of John J. Engler of Five Corners and Mrs. Chas. Breseman of the town of Wayne.

Too Enthusiastic.

Congressman James P. Maher of New York told one which demonstrates that a man can be altogether too enthusiastic in following his profession. Some time ago, so relates Metzner celebrated Fred Metzthe congressman, two men met in a ner's 29th birthday at the latter's New York town, and after the cordial clutch, began to inquire after each othspent Tuesday and Wednesday er's family. "By the way," said one here with the F. C. Gottsleben of the pair, "how is your son making tendered a surprise last Friday out, the one who went to Texas?" evening in honor of their tin "He isn't making out very well." an Wedding swered the other, with a long-drawn present were: Peter Kirchner, sigh. "As a matter of fact, they have August Kirchner, Charles Prost, got him in jail down there." "Got him in jail!" exclaimed the first, in a surprised voice. "You don't really mean it! What in the world was the trouble?" "It was this way," explained the second. "He studied law and got too eloquent. He was retained by a horse thief to defend him, and made such a wonderful plea that the judge held him as an accessory."-Philadelphia Telegraph.

-Mrs. John Bassil of West Bend What Becomes of India's Gold. visited here last Saturday with A royal commission has been appointed by Great Britain to discover what India does with all the gold it takes away from the rest of the world. In the last ten years India has drawn King's New Discovery ought to latter part of the week with relmore than \$65,000,000 of gold, which is almost one-fourth of the world's the best of all medicines for coughs production in that time, from the western world, and the great part of it has children's coughs. Money back if here on Monday after spending disappeared from the usual channels of trade and finance. To draw this immense amount from the commercial world, and pay for it in goods, is, of course, an economic drain on India Yet it does not seem to suffer more with their brother Albert, who by the process than does the rest of the world when, thinking it has gold Wheat for general use, it discovers that the part of its imagined supply which goe to India is lost as completely as buried.

Heatless Light is Sought. By the way, the humble glow work is to be investigated by Frenc scientists in the hope that it will serv to solve the problem of discovering "cold light." The great objection t of the Kewaskum Mutual Fire all present forms of electric light is the heat they give off. In his ad dress to the National Society of French Electricians, President Danie FOR SALE.-A five year old Berthelot says the glow worm as bay horse for sale. For further machine for the production of light particulars call on George Reindl, is perfection itself. For every te units of energy expended the glov worm, with its cold, dry light, gives LOST-A ladies' watch and chain 100 per cent. of illumination, as was lost in the village of Kewaskum. against 1.2 per cent. by gas, 1.5 per Owner offers a liberal reward to honest cent, by electric light and 14 per cent by the sun. This, according to Mi Berthelot, is due to an "electro-capillary apparatus in the worm, consti-STRAYED-A small black, straight tuted by thousands of cells."

Real "Daylight" Invented, the train January Sist. Finder tele-Dr. Herbert E. Ives of London has phone to E. C. Doyle, Campbellsport, invented daylight, he says. Scientific men have worked for years trying to accomplish this task. Doctor Ives has been at work for at least a dozen years and he asserts he has finally produced a light which is in every way equal to sunshine. The scientist has designed a powerful incandescent lamp with a special mantle, which is so placed in a cabinet he has designed chased a Buick runabout last week that its rays are immediately beneath Americas, 17c. a reflector. This is made of metal, and the light is forced downward through a series of delicately colored screens, so arranged that the average rava which are not found in the north light are eliminated, and the effect, it is said in that of a perfect harmony of latter part of last week with rel- tended the funeral of Mrs. Persch- light similar in every way to the rays

TWO WELL KNOWN UNPOPULAR MEN

The Soil Robber and the Community Robber.

SOME FARMERS ROB LAND,

Which is the Greater Robber, the Farmer Who Robe His Soil or the Man Who Robe the Community?-A Glorious American Privilege - Time to Pause and Consider.

[Copyrighted, 1914, by Thomas J. Sullivan.] There are many and various kinds of robbers loose today in this land of plenty, but perhaps the two most unpopular of them are the soil robber and the community robber-the farmer who robs his land of its producing strength and the consumer who robs his community of its dollars.

The high grade, successful farmer is the one who increases rather than diminishes the fertility of his land. Every year be changes his crop with that one object in view. He subscribes for and reads very carefully the agricultural reports, paying particular attention to the reports on experiments made by advanced and progressive farmers.

Why he does this is plain. He knows very well that it would be useless to plant good seed in wornout soll. It's his wish and intention to make a profit on his investment in seed and labor as well as in soil, and this, of course, could not be accomplished if the soil were not fruitful.

Bleeding Home Communities. Today there are hundreds of thousands of American citizens who are bleeding their home communities by taking out of the channels of local trade the money needed to transact business and sending it to dealers who do not and who cannot by any possible means return it to do its proper and necessary work in local business

The big city mail order houses that sell goods at retail through the medium of catalogues to farmers and others all over the country buy nothing from their customers. They invariably exchange goods for money, never money for goods. They employ no labor in the communities where their customers must earn their living; they buy no farm products; they own no real estate; they pay no taxes; they have no money on deposit in the local banks; they do not advertise in the local newspapers; they do not give credit; they do not even pay the freight on goods they sell. Every cent taken directly it is responsible for a by them out of the community is per- large proportion of chronic manently lost to the business of that

community. These are all plain and evident

truths, are they not? We would ask this very same farmer who would be insulted were he chargfrom out of town concerns.

Farmer Planted In Community. The farmer plants seed in the soil and in order to produce results he must keep that soil fertilized. Being himself planted in the community, he does his trading in a foreign city and thereby assists his community in becoming

Why should this farmer have greater respect for the seed which he plants than he has for himself, his family or his neighbor?

There is a community in Minnesota in the center of which is a city embracing about 10,000 people, and it is conservatively estimated that some thing more than \$300,000 annually is sent from there to mail order houses for the purchase of goods which could just as well be secured at the home

This estimate is based on the figures secured from reliable sources in the aforementioned community - that is. from the banker, the express agent and the postmaster.

This, perhaps, is the strongest evidence of "robbing" a community. The answer to the above may be that a man has a right to buy where be pleases. It is his money be is spend ing, and he has the right to send it away if he wishes, particularly if he feels that he is to be the gainer

A Glorious American Privilege. Quite true. In this glorious America of ours every citizen is privileged to consult his own pleasure in spending

his money. He can spend it or hoard it up, or he may contribute it for the purpose of building monuments to the memory of great men. No one can lawfully dispute that right. Likewise the soil robber has the right to use his land as he wishes and without any consideration for its fu-

ture fertility. The land belongs to him, and he can do as he pleases with it. He is a free man, surrounded by bundreds of laws enacted for the protection of his rights. Pause and Consider. The parallel drawn between the two

cases has a tendency to give the com munity robber a chance to pause and

He should give the matter very serious attention and thought and endeavor to figure out a method by which he can increase its wealth, just as the honest farmer increases the tichness and productiveness of his soil. In this way only can a large and substantial community be attained

The King of All Laxatives

For constipation, use Dr. King's New Life Pills. Paul Mathulka, of Buffalo, N. Y., says they are the always keep a box at home. Get a box and get well again. Price 25c At Druggists or by mail. H. E. BUCKLEN & CO., PHILA-

The American Adding Machine THE LATEST ADDER COSTS BUT \$35

See our exhibit—ask for 10 days' trial

Here is a new price on a competent Adder. On a machine that is rapid, full-size and infallible.

The very latest machine, built by men who know, in one of

the largest metal-working shops. It is an individual Adder, to be placed on one's desk, close to one's books and papers. To take the place of the central ma-

chine requiring skilled operators. It is also intended for offices and stores where costly ma-

The price is due to utter simplicity, and to our enormous output. Seven keys do all the work.

Each copied number is shown up for checking before the

The machine will add, subtract and multiply. With very slight practice anyone can compute a hundred figures a minute. And the machine never makes mistakes.

Countless offices, large and small, are getting from these machines the highest class of service.

Now we make this offer so that offices everywhere may learn what this machine means to them.

GEO. H. SCHMIDT KEWASKUM, WIS. Please send us an American Adding Machine for tendars' free trial.

Just send us this coupon and we'll send the machine. MANUFACTURED AND GUARANTEED BY

American Can Company, Chicago

SOLD IN KEWASKUM, WIS., BY GEO. H. SCHMIDT

Ten Days' Test

We will gladly place in any office one American

There will be no obligation, and charges will be

Let anyone use it. See if any machine can serve better

SCARLET FEVER

Adder for a ten days' test.

Scarlet fever is prevalent. It is one of the most infectious diseases. Scarlet fever is fatal on an average of one in 12 cases. Inlarge proportion of chronic Bright's disease which is not fatal until adult life. Scarlet fever in preventable.

While unquestionably a germ disease, the specific germ has not, ed with neglecting to keep his soil en as yet, been discovered. Scarlet riched to the highest possible degree. fever is characterized by sore to explain how he can deliberately throat and a characteristic skin rob his community by buying his goods rash. The onset is community ab-The onset is commonly abrupt. There is likely to be sick headache, chilliness, vomiting and slightly sore throat. It occurs most commonly two to fourdays after contact. The eruption usually appears within twenty-four hours of first symptoms. Any case of sore throat accompanied by rash should be viewed with suspicion. Many severe epidem-

> ics have resulted from cases so mild as to pass unrecognized. Prevention consists in early discovery and absolute isolation of patients. Many epidemics have been unquestionably traced to dairy farm and milk route infection. Obviously detection and careful survaillance on the part of the health officer offers the only protection fromt his source of danegr. Quarantine should never be less than twenty-one days

> frequently much longer. Inasmuch as scarlet fever is disease most common during school age, is infectious from beginning, is due to contact of victim with patients, adequate school inspection, careful attention to instances of sore throat, rash, etc., offer great promise of preventing spread and hence individual cas-

es of disease. Diagnosis is frequently very difficult for even the most skillful physicians. In case there is any doubt as to nature, suspicious cases should be absolutely quarantined. School teachers and parents should take notice of first complaint of sore throat and be on guard when scarlet fever is in the neighborhood. Never mind records of school attendance. "Health before everything else."

Phoebe le Cautious.

The other day in my walk I came upon two phoebes' nests under overhanging rocks, both with half fiedged young in them, and in neither case were the parent birds in evidence. They did not give their secret away by setting up the bue and cry that nesting birds usually set up on such occasions. I finally saw them, as silent as shadows, perched near by, with food in their beaks, which they finally swallowed as my stay was prolonged. And the nests, both on a level with my eye, were apparently filled only with a motionless mass of bluish mold. As I gently touched them, inking of all laxatives." They are stead of four or five heads with open a blessing to all my family and I mouths springing up, the young only settled lower in the nest and disposed themselves in a headless, shapeless mass. The phoebe is evidently a very cautious bird, though no birds are more familiar about our porches and outbuildings .- John Burroughs in the Atlantic Monthly.
