#### Sowing the Seed and Producing Bigger Crops Work in Joint Effort the Soil of the United States and Canada

CO-OPERATIVE FARMING IN MAN POWER NECESSARY TO WIN THE BATTLE FOR LIBERTY

The Food Controllers of the United States and Canada are asking for greater food production. Scarcely 100,000,000 bushels of wheat are available to be sent to the allies overseas before the crop harvest. Upon the efforts of the United States and Canada rests the burden of supply.

Every Available Tiliable Acre Must Contribute: Every Available Farmer and Farm Hand Must Assist

Western Canada has an enormous acreage to be seeded, but man power is short, and an appeal to the United States allies is for more men for seeding operation.

Canada's Wheat Production Last Year was 225,000,000 Bushels; the Demand From Canada Alone for 1918 is 400,000,000 Bushels

To secure this she must have assistance. She has the land but needs the men. The Government of the United States wants every man who can effectively help, to do farm work this year. It wants the land in the United States developed first of course; but it also wants to help Canada. Whenever we find a man we can spare to Canada's fields after ours are supplied, we want to direct him there.

Apply to our Employment Service, and we will tell you where you can best serve the combined interests.

Western Canada's help will be required not later than April 5th. Wages to competent help, \$50.00 a month and up, board and lodging. Those who respond to this appeal will get a warm welcome, good wages,

good board and find comfortable homes. They will get a rate of one cent a mile from Canadian boundary points to destination and return. and the Episcopal church adjoining. For particulars as to routes and places where employment may be had apply to: U. S. EMPLOYMENT SERVICE, DEPARTMENT OF LABOR

# IN THE WAR

The War Lord Salutes the Field Marshall.

Such is the striking title to a welltimed cartoon in an agricultural paper, showing the War Lord in salute to the farmer. The meaning of it is Council of Defense by the executive that without the assistance that the committee by a vote of 16 to 5. The farmer renders in the matter of promayor's support of the Socialist anti- viding food for the army the fighting ability of that body would be proporhe could not withdraw his support tionally decreased. While the army into the breach was a patriotism equal action was justified under its by-laws. to that of the man who enlisted and the farmer's record in this particular Wausau-A garden contest for this was worthy of the high record that has become his. All over the United production. Fields are enlarged, intensive agriculture has taken the place of slipshod methods, more cattle are and lamb have become scarce commodities. This is all in keeping with the food-controller's demands, and with the heartiness that is now prevalent, it would seem as if the requirements of the boys at the front and the allies in Europe would be fully met. Not only are the tilled acres of the

United States being brought into regulsition, but the wild pasture lands are doing tribute with their cattle and sheep. Working in conjunction with the United States, Western Canada is also doing its share and a pretty large share it is, too. By an arrangement with the United States Government it will now be possible through its employment bureau to secure for the Western Canada fields such help as can be spared. It is thought in this way Canada will have its help to seed its millions of acres of wheat land fairly well met. The large number of young men of the farms who have enlisted and gone to the front has left many of the Western Canada farins weak in the matter of man power This means that Canada can take all that the United States can spare. The wages will be good and the housing comfortable.

In addition to this the free homestead lands of Western Canada offer the greatest inducement to the man with limited means who is willing to undergo some of the hardships naturally accompanying this enterprise. There is also the large area of uncultivated lands that are waiting the man with sufficient means to purchase and equip. And this is not expensive. The cheap lands are cheap and the terms very reasonable. Equipped with tractor or horse power the cultivation cost is slight when the return is considered. Yields of wheat varying from 20 to 40 bushels per acre may be relied upon, and with a set price of over the profits many farmers made in Western Canada the past year.

The Dominion and Provincial Governments are working conjointly in an increased production propaganda. Among the important steps that have been taken to bring this about is the recent order by which it is made posin the country of production. This establish himself,-Advertisement. will give those residing in the United States, owning lands in Canada, the opportunity to place them under cultivation at much less cost than in the past. Another inducement is the privi. Register. lege of taking sheep and cattle in to Canada. These are now accorded free duty. Provision is also made that those requiring seed and unable to ob- lands in 14 states of the United States tain it in any other way, may get it are to be opened in 1918. it will be seen that it is not only the fertile lands of Western Canada that has increased nearly three-fold.

# To The American People

There is no foundation for the alleged violations of law attributed to our Company by agents of the Federal Trade Commission and I want to say emphatically that Swift & Company is not a party to any conspiracy to defraud the Government. Nor has Swift & Company been guilty of improperly storing foods or of making false entries or reports.

Conferences of packers, where prices have been discussed, have been held at the urgent request and in the presence of representatives of either the Food Administration or the Council of National Defense. And yet the packers have been accused of committing a felony by acting in collusion on Government bids!

We have done our best, with other packers, large and small, to comply with the directions of the United States Food Administration in all particulars, including the furnishing of food supplies for the U.S. Army and Navy and the Allies, now being handled through the Food Adminis-

We will continue to do our utmost, under Government direction, to increase our production and assist the Food Administration. We consider that the opportunity to co-operate whole-heartedly and to our fullest powers with this branch of the Government is our plain and most pressing duty.

The Trade Commission Attorney has, by false inference and misplaced emphasis, given to disconnected portions of the correspondence taken from our private files and read into the Record, a false and sinister meaning with the plain purpose of creating antagonistic public opinion.

The services of the packers of the United States are most urgently needed, and I regret exceedingly that we should at this time have to spend our efforts in defending ourselves against unfounded, unproved, and unfair assertions such as are being daily made public.

### ISAAC STEPHENSON IS DEAD

Former Wisconsin Senator Was Largely Responsible for Development of Michigan Lumber Industry.

Marinette, Wis., March 18.-Isaac Stephenson, former United States senberman, is dead at his home here. He firms the opinions many officers have was eighty-eight years old. Mr. Steexpressed for weeks in the face of of- phenson had been ill for a week due ficial forecasts to the contrary from to the infirmities of old age. The principal scene of his operations in the lumber industry was in northern Michigan that section owing a large part of its development in the lumbering and mining industries to his efforts. His properties in that section are still among the largest holdings in the state. Born near Fredericton, New Brunswick, June 18, 1829, he spent his early youth on his father's farm and in working in the lumber woods. He

had practically no schooling. In May, 1907, he was appointed to fill the unexpired term of Senator John C. Spooner, resigned, and was elected to succeed himself in 1909.

LENROOT AND THOMPSON IN CLOSE RACE AT PRIMARIES.

Davies Has Big Lead Over McCarthy on the Democratic Side in Early Returns.

Milwaukee, March 20,-Fragmentary returns from Wisconstn's senatorship primaries gives Irvine L. Lenroot a small lead over James Thompson, the La Follette candidate, for the Republican nomination, but the final results

are in deep doubt. Incomplete figures from scattered precincts in 20 countles gave Lenroot 2.957, Thompson 2,936. On the Democratic side stood Davies, 1,971; McCarthy, 316. Berger, Socialist, was given 236 in the same precincts,

Factional lines have been shot to pieces by the struggle over the "loyalist versus bolshevik" issue, with the result that the political experts are unable to pick any typical precincts from which to figure out the results in advance of the actual returns. Lenroot is going stronger than ex-

pected in some La Follette precincts, which is taken as an augury of victory. Joseph E. Davies, who resigned as head of the federal trade commission to chuck his bonnet into the ring, apparently has won over Dr. Charles McCarthy, militant progressive, by a large margin, as the latest returns in-

dicate. Country towns so far reporting indlcate that Davies is beating McCarthy by four or five to one in the rural dis-

tricts. A record vote for a spring primary was piled up in the state. In Milwankee the final count is expected to set a new high-water mark. In some city precincts the waiting lines of voters extended a block.

In all the Socialist wards a heavy balloting was registered, but it was surpassed by the vote in certain of the silk-stocking Republican wards.

Muddy roads hampered the vote in the country, but at that the indications are that the rural poll exceeded the estimates,

A Conserving Food

The recognized value

Grape-Nuts

as a "saving" food for these serious times, rests upon real merit.

Unlike the ordinary cereal Grape-Nuts requires no sugar, little milk or cream, and requires no cooking or other preparation in serving.

A trial is well worth while for those who sincerely desire to save.

The Red Cross on the Battlefield, a Vision of Mercy, by Paul Thiriat; African Troops at the Front

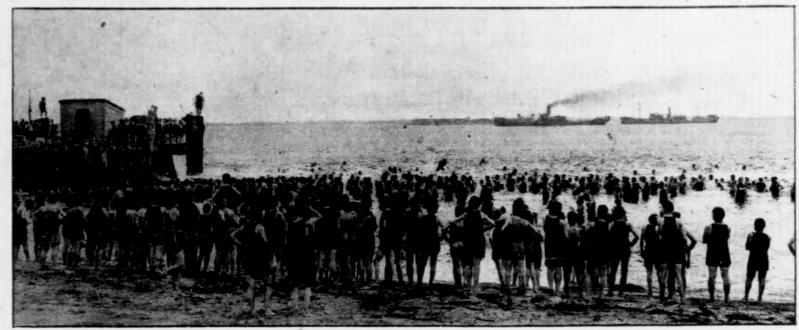

"In the French Army the Red Cross Work Is Carried on by Regimental Bandsmen Often Assisted by the Telephonists and Others. These Obscure Heroes Are Usually Unknown to Fame, Their Names Are Not Mentioned in Dispatches, but Their Deeds Are Among the Bravest. Often Under Terrible Fire They Succor the Wounded and Convey Them to Places of Safety. When the Fighting Is Finished and Their Work as 'Brancardiers' Is Done, the Bandsmen Play the Regiment Back to Camp, or Give Concerts While Their Comrades Rest, Their Music Putting Fresh Heart Into the Fighters as Their Ministrations Put Fresh Hope Into the Injured."

In Full Regalia, Singularly Unlike the Uniforms Worn by Their Comrades of Other Nationalities on the Western Front, These African Chiefs Are Leading Their Tribesmen on the Fields of Northern France. They Came from the British Colonies in Africa and Are Said to Have Been Eager for the Fray.

### AMERICAN SUGAR SENT TO FRANCE

American Price Rigidly Regulated by United States Food Administration.

CONSUMERS HERE PAY

Sugar Cost 35 Cents a Pound During Civil War—Refiners' Profits Now Curtailed.

Sugar is selling today throughout.

America at from 8½ to 9 cents a pound to the consumer, even though there is a world shortage which introduced this nation's sugar allotment to 70 per cent, of normal.

Through the efforts of the United States food administration the sugar market has been regulated as far the producer, refiner and wholesaler in concerned. The food administration has no power to regulate retail prime except by public opinion. Even thousamore than \$5,000 tons of sugar have been shipped to France in the last four months the retail grocer's price is around 8 to \$\frac{3}{2}\$ cents. Should sell this sugar at \$\frac{3}{2}\$ to be asked the American bousewife and asks the American bousewife the pay no more than this amount.

Last August when the food admistration was organized the price sugar rose suddenly to 11 cents a pound. During the Civil War sugar rose suddenly to 11 cents a pound. By regulation of the sugar market and reducing the price to 814 and 9 cents the food administration has succeed the American public at least \$150,000,000 in four months, according a statement made by Herhert House the other day.

"It is our stern duty to feed the lies, to maintain their health astrength at any cost to ourselves. Mr. Hoover declared. "There has been, nor will be as we see it, most sugar for even their present most and depressing ration unless they ships to remote markets for it. If it in our greed and gluttony force their to further reduce their rathe or to send these ships we will have done damage to our abilities to
