"If those principles are to be adhered to Fiume must serve as the outlet of the commerce, not of Italy, but of the land to the north and northeast of that port: Hungary, Bohemia, Roumania and the states of the new Jugo-Slav group. To assign Fiume to Italy would be to create the feeling that we have deliberately put the port upon which all those countries chiefly denend for their access to the Mediterranean in the hands of a power of which it did not form an integral part and whose sovereignty, if set up there, must inevitably seem foreign, not domestic or identified with the commerbut there definitely assigned to the signed.

Austria No Longer Exists.

"But Austria-Hungary no longer exsts. It is proposed that the fortifications which the Austrian government constructed there shall be razed and permanently destroyed.

"It is part also of the new plan of European order which centers in the league of nations that the new states erected there shall accept a limitation of armaments, which puts aggression out of the question. There can be no fear of the unfair treatment of groups quate guarantees will be given, under international sanction, of the equal and equitable treatment of all racial or national minorities.

"In brief, every question associated with this settlement wears a new aspect-a new aspect given it by the very victory for right for which Italy has made the supreme sacrifice of blood and treasure. Italy, along with the four other great onwers, has become one of the chief trustees of the new order which she has played so honorable a part in establishing.

"And on the north and northeast her natural frontiers are completely restored, along with the whole sweep of the Alps from northwest to southeast to the very end of the Istrian peninsula, including all the great watershed within which Triest and Pola lie, and has turned towards the great perfinsula upon which the historic life of the Latin people has been worked out through centuries of famous story ever since Rome was first set upon her seven hills.

"Her ancient unity is restored. Her lines are extended to the great walls which are her natural defense. It is within her choice to be surrounded by friends; to exhibit to the newly liber ated peoples across the Adriatic that noblest quality of greatness, magnanimity, friendly generosity, the preference of justice over interest.

Practically Every European Country Short of Foodstuffs.

Agriculturists on This Side of the Water Are Called on to Save the World From Starvation-Western Canada's Great Opportunity,

Considerable discussion is taking place in the papers as to the amount of money that the United States will have to pay for its guarantee of the price of wheat for 1919. The indications at present are .hat the treasury will not be affected. Instead of wheat going down the outlook now is that it will go considerably above the present guarantee. It is not only the opinion of a man of the experience of Mr. Hoover that gives weight to this assumption, but we have the giaring fact that there will be more mouths to feed for this year, and the next year or so, than there were in 1918, and the quantity of food will be little, if any. greater.

The assumption is based on the fact that Germany, Austria and Poland. and others of the fighting nations, unable to secure food enough in the past two or three years, and still unable to supply it within themselves, will require to be fed. The food can now be taken to them. For some time the soldiers will require to be fed; Italy will have its demands. There will be additional shipping, some of which will be needed for requirements of India. it from us, boy, his time for revenge but it will also make ocean transport easier. Mr. Hoover is possibly better acquainted than any other 'ndividual observer with both the world's food Important to all Women needs and its prospects of supplying them.

He is naturally very closely in touch with conditions on this continent and his position as virtual dictator of the distribution of American-grown food in Europe has given him a possibly unique insight into European needs.

Mr. Hoover says there will be no surplus from the 1918 crop to carry over into 1919. Even under normal conditions this would be a sufficiently Boiled rice, served hot, covered with precarious situation, for there naturally never is any possible guarantee that one or more of the great wheatproducing countries in Europe may not experience a crop failure. Under fuls of boiling water, stir in enough present conditions, however, such lack of surplus is distinctly dangerous, for the very European nations upon which cupful of sugar. Cook a half hour, that continent could normally rely for the great bulk of its wheat, that is to say Russia, Bulgaria, Serbia and Roumania, will for obvious reasons be unable to supply their own demands for the coming year. In addition to this. Mr. Hoover points out that famine in India will call for a substantial proportion of the Australian surplus, and that, moreover, a considerable part of the Australian supply, which for lack of shipping has been accumulating in that country, has spoiled.

And the demand is by no means mated that he would be able to furnish Germany 180,000 tons of grain during the month of April. But it is asserted that the German stocks of all In Use for Over 30 Years. sage.—Take two cupfuls vegetables will surely be exhausted

under the circumstances food enough can be supplied to tide Germany over until the next harvest.

It is quite clear from all this that the world is going to depend more than ever upon this continent to keep the wolf from the door until the wardevastated and anarchy-ridden countries in Europe can once again feed themselves. Already we read of the protests of British soldiers occupying Germany against allowing German women and children to perish of starvation as they are beginning to do. If these conditions prevail in Germany what must be the state of affairs else where in Europe among nations which have fought with us during the last four years?

To sum up, it may be stated with confidence that the demand for every product of the farm will be unprece dented, and that the agriculturist will receive the highest prices on record for all that he has to sell.

The duty of Canada, therefore, is to keep up its work of assisting in supplying the need. It can do so. It has the land available at low prices; the market is there; railroad facilities are good, the climate and the soil produce the best wheat in the world. Western Canada offers the opportunity and the unceasing flow of farmers into the country indicates the fact that advantage is being taken of it.-Advertise

Thousands upon thousands of women have kidney or bladder trouble and never

Women's complaints often prove to b nothing else but kidney trouble, or the result of kidney or bladder disease. If the kidneys are not in a healthy condition, they may cause the other organs

to become diseased. You may suffer pain in the back, head ache and loss of ambition. Poor health makes you nervous, irritable and may be despondent; it makes any

But hundreds of women claim that Dr. Swamp-Root, by restoring health to the kidneys, proved to be just the remedy needed to overcome such

conditions, Many send for a sample bottle to see what Swamp-Root, the great kidney, liver and bladder medicine, will do for them. By enclosing ten cents to Dr. Kilmer & Co., Binghamton, N. Y., you may receive sample size bottle by Parcel Post. You can purchase medium and large size bottles at all drug stores.-Adv.

### PIPELESS FURNACE Warms the Whole House With One Register

THE HESS

No horizontal pipes; no cold air ducts. The heat is distributed thoroughly and evenly; all cold air is drawn off the floors. Moisture (humidity) added to the air gives your home a healthful

summer atmosphere. SAVES COAL-you can burn ANYTHING; the cheapest soft coal gives results equal to anthracite.

NEVER LEAKS, for all seams are welded and never open from expansion or contraction. The inside is smooth; no flues or smoke passages to clog and prevent radiation.

Here is an improvement that you can't get in any other pipeless furnace: A separate compartment to be connected to your detached bathroom or kitchen, which are not heated by the ordinary pipeless method when doors are closed. This has always been the limitation of the pipeless method. We have overcome it and have secured a patent on this valuable improvement.

### We Guarantee Our Lowest Prices Now to All Buyers

Right now, the dull season, is the best time to buy. Lower prices, later, seem improbable, but if we should reduce our rates before October, we guarantee to refund, to all early buyers, an amount equal to any reduction we may make. There-

fore, you are guaranteed the season's lowest prices on your early purchases. TERMS: Cash, Liberty Bonds, or easy monthly payments. Send us a sketch of your house, for our estimate and our plan, showing size and location of every detail required.

OUR 48-PAGE BOOK on furnace heating is free. Let us send you one, and let us tell you also, how to burn soft coal and get FLAME and HEAT, instead of SMOKE and SOOT.

CONTRACTORS, ATTENTION! Our special contractors' rates mean lower prices and better quality than you can obtain from catalogue houses or dealers. We carry a big line of registers, tin and galvanized pipes and fittings, and can supply anything, big or little, you may need for furnace heating.

We also make Pipe Furnaces (six sizes) for separate pipes and registers

### **ALLOWANCE TO CHILD** IS ROAD TO ECONOMY

Way Is to Teach Youth Early Proper Apportioning of an Income.

The best and most natural way of beginning true national economy, wise pending and wise saving." 80,78 Buth Wardell, head of the home economics department of the University of Iowa, and who last summer started a home economics department in a Cleveland (Ohio) bank. "is by giving the children an allowance. The lesson of properly apportioning an income thus is early learned."

Miss Wardell favors the allowance arrangement at a very early age, say at six or seven. It may then be very amail, and out of it the budding citisen may be expected to provide only school pencils, tablets, etc. The purchase of school books provides a log- 1st) ical next step; a little later some personal belongings, such as shoes, may

"I say shoes," explains Miss Wardell, "because children seem to take more interest in shoes than in most articles of wearing apparel, and be-

cause shoes represent a highly important item to which children frequently pay little heed."

The allowance should provide little margin to encourage careful buying and saving possibilities. It should not necessitate so much care or thought as to burden the growing mal circumstances, be "helped out"

The child's allowance, it may be added, should be for necesities mainly, with but a fair and modest margin for personal luxuries and pleasures. It should always be recognized as allowing for a regular proportion of savings, preferably invested in governmental securities. It should be carefully adjusted, rigidly adhered to or both sides of the bargain. Such respect and observance not only will teach the child good economic habits. but will abolish many too frequent annoyances for the financial head of the family,
