Declares Entente Cannot Cage Germans: Split Over Yielding.

Scheidemann Denounces Wilson and Says 60,000,000 Teutons Shall Not Be Put Behind Bars by Allies' Terms.

Berlin, May 14.-The declaration by Chancellor Scheidemann in the national assembly that the peace terms were "unacceptable" brought the members of the assembly, the spectators and those in the press gallery to their feet to accept foreign contracts so far as in a hurricane of cheers and applause. The chancellor paused in his address and then thundered out the word which announced the German government's rejection of the Versailles con-

Leaders of the various groups, with the exception of the Hugo Haase group, made speeches backing the government.

With the exception of the independent socialists, led by Haase, all factions in the assembly arose and cheered vociferously. The assembly is sitting temporarily in the assembly ball of the University of Berlin on Unter den Linden.

The chancellor described the peace treaty as a "dreadful and murderous" document. He said it would make an retain their present increased forces, enormous jail of Germany, in which 60,000,000 persons would have to labor for the victors in the war. The chancellor said German trade would be strangled should the peace terms be accepted.

Presents a Terrible Picture.

"That is the jail picture in its external aspects," he continued, "without ships because the mercantile fleet passes into entente hands, without cables, without colonies, without foreign settlements, without reciprocity and legal protection-yes, and even without the right to co-operate in fixing the prices for the goods and articles which we have to deliver as tribute.

"I ask you what honest man will say that Germany can accept such conditions? At the same time, as we shall have to bestir ourselves to perform forced labor for the benefit of the entire world, our foreign trade, the sole source of our welfare, is destroyed and our home trade is rendered impossible. Lorraine iron ore, upper Silesian coal. Alsatian potash, the Saar vallev mines and the cheap foodstuffs from Posen and West Prussia are to lie outside our frontiers. We are to impose no higher tariff or protection than existed on August 1, 1914, while our enemies may do as much as they like at every point in strangling us at home. All German revenues must be held at the disposal of our enemies for payments, not for war invalids and widows-all as forced labor for prodncts, the prices of which will be fixed by our customers.

Ministry Meets to Discuss Pact.

The imperial ministry met to discuss the peace terms, but no positive proposals have as yet been communicated to the entente. Practical questions and considerations relating to territorial cessions, which were transmitted to M. Clemenceau, president of delegation, were said to be not of planatory character.

"Even if important changes are not made by the negotiations begun at Versailles, there remains no choice but to bow to compulsion and sign the treaty," says an appeal of the central committee of the independent socialist party in the party organ, Die Freiheit. France, (It has been predicted that the Berlin government, in the event that it should decide to go down in a blaze of glory by rejection of the peace terms. would be succeeded by the minority socialists led by Hugo Haase.)

"Not signing," continues the appeal, "means the retention of our prisoners of war, the occupation of our ray mablockade, unemployment, hunger and that would suffer the most terribly from the consequences.

"Peace, as hard and as oppressive as it may be, is a necessary assumption for the possibility of rebuilding our social and economic life in the

spirit of the revolutionary proletriat." The appeal is prefaced by a denunciation of the severity of the peace 2,645 AIR FIGHTERS KILLED terms. It concludes with a demand that the workingmen of all countries unite against capitalism for a world revolution.

Washington, May 14.—American shipyards will be permitted to accept CRISIS IN CABINET IS SEEN contracts for foreign account so far as that can be done without interfering with the building of the American merchant marine, under a decision of President Wilson, cabled to the White Honse.

The president's action was made known in this statement issued at the White House:

"Secretary Tumulty announced that upon the suggestion of Chairman Hurley of the United States shipping board the president has taken action that will permit American shipyards that can be done without interfering with the building program for American registry."

With the entry of the United States nto the war all steel ships building for foreign account were requisitioned by the government and the yards were prohibited from accepting any foreign

EXPLAIN BRITISH AGREEMENT

War Department Officials Say Transport Accounts Still Are Unadjusted.

Washington, May 14.—Officials of the war department explained that the agreement reached between the United States liquidating commission and representatives of the British government whereby Great Britain will pay to the United States \$35,000,-000 as a final net settlement had to do only with oustanding claims each government had against the other in the production of war materials in the United States and abroad.

The agreement does not take into consideration the accrued obligations of the United States for the transpor tation of troops and supplies in British bottoms, nor does it include various other co-operative efforts. Separate settlements are to be reached on each of these questions.

Wilson Says Freedom of Speech Is Greatest Safety Because When a Man Is a Fool Best Thing Is to Let him Advertise Fact,

Paris, May 14.-President Wilson, in his address to the French Academy of Moral and Political Sciences, vigorously denied that the American people were largely materialists or dollar worshipers.

"I have had in recent months one very deep sense of privilege," the president said. "I have been keenly, aware that there have been times when the peoples of Europe have not understood the people of the United States. We have been too often supposed to have been devoted chiefly if not entirely to material enterprises. We have been supposed, in the common phrase, to worship the almighty dollar.

"We have accumulated wealth, we have devoted ourselves to material enterprises with extraordinary success but there has underlain all of that. all the time, a common sense of humanity and a common sympathy with the high principles of justice which order will enable most of the yards to has never grown dim in the field even of enterprise, and it has been my very great joy in these recent months to Interpret the people of the United States to the people of the world.

"I have not done more, I have not uttered in my public capacity my own private thoughts. I have uttered what I have known to be the thoughts of the great people whom I represent. I have uttered the things that have been stored up in their hearts and purpose from the time of our birth as a nation."

President Wilson alluded to his studies in the field of political science and the attempts he had made "to put into the words of learning the thought of a nation, the attitude of a people toward public affairs." He con-

tinued: "A great many of my colleagues in American university life got their training, even in political science, as so many men in civil circles did, in German universities, I have been obliged at various times to read a great deal of bad German, difficult German, awkward German, and I have been aware that the thought was as awkward as the phrases, that the thought was rooted in a fundamental misconception of the state and of the political life of peoples. And it has been a portion of my effort to disengage the thought of American university teachers from the misguided instruction which they had received on this side of the sea. Their Amerisort of inherent and sacred author-

"Now as an utter democrat, I have never been able to accept that view of the state. My view of the state is that it must stop and listen to what I have to say, no matter how humble I am, and that each man has the right to have his voice heard and his counsel heeded in so far as it is

worthy of him. "I have always been among those who believe that the greatest freedom of speech is the greatest safety, because if a man is a fool, the best thing to do is to encourage him to advertise the fact by speaking. It cannot be so easily discovered if you allow him to remain silent and look wise, but if you let him speak the secret is out and the world knows that he is a fool.

"So it is by exposure of folly that it is defeated; not by the seclusion of folly, and in this free air of free speech men get into that sort of communication with one another, which constitutes the basis of all common achievement. France, through many vicissitudes, and through many bitter experiences, found the way to this sort of freedom, and now she stands at the front of the world as the representative of constitutional liberty."

Executive in Prodlamation Says Pact Would "Deliver German Labor to Foreign Capitalism"-Appeals to People to Stand Together.

Berlin, May 12 .- Germany's reply to the terms of peace presented at Versallles on Wednesday will be a proposal "for a peace of right on the basis of a lasting peace of the nations," according to a proclamation to the German people issued here by President Ebert.

The proclamation says the treaty would "deliver German labor to foreign capitalism for the indignity of wage slavery and permanently fetter the young German republic."

The proclamation closes with an appeal to the German people to stand together, knowing no parties, "and to preserve with the government mutual trust in the path of duty in the belief of the triumph of reason and right." The text of the proclamation fol-

One great fact grew in magnitude and sullen portent as the months passed: the gigantic slave-holding interests of the South wewed with growing alarm the spread of abolition sentiment. Subtly, quietly and naturally they were feeling for the means to defend and increase their power. Straws were coming to the surface in that session which betrayed this deep undercurrent of purpose. We felt it and the senator was worried, I knew, but held his peace. He knew how to keep his opinions until the hour had struck that summoned them to service. The senator never played with his lance. The expresident had been solicited to accept Senator Wright strongly favored the plan but feared that the South would defeat him in convention, it being well known that Van Buren was opposed to the annexation of Texas. However, he advised his friend to make a fight for the nomination and this the latter for the change of a dollar, queried: resolved to do. Models that are pleasingly distinctiee

It's always welcome news to many women to learn that we have received a new allotment of these very desirable WELWORTH BLOUSES, for they have found from experience that there's always something pleasingly different about a Welworth model, and that they have all the attractiveness and many of the worth-while qualities usually incident to much more costly Blouses.

Sold here and elsewhere \$2.50 at the same modest price

One of the new models has the front trimmed with tiny tucks crossing wider lateral tucks, while the large collar and reveres are trimmed with fine imported St. Gall Venise lace.

Another late arrival is a particularly pleasing round neck model, with dainty embroidery, hemstitching and two rows of pearl buttons ornamenting front, and with embroidered collar edged with Val. lace.

> Welworth Blouses in this city can be sold here only.

Never has there been a time when the public have looked more keenly for Merchandise News than right now, especially that of trade marked, standardized products. Our equipment and facilities are of the best and our circulation reaches out to the majority of prospective purchasers throughout an extensive territory. If you do not know how to advertise, let us give you the benefit of our experience. Place an ad consistently in the STATESMAN and watch the excellent results obtained therefrom. Don't be a dead one.

Our Job Department is fully equiped with the most modern machinery and type faces on the market, and with our 30 years' practical experience in the job line in some of the best commercial printing offices of the state, makes us able to take care of your printing needs in first-class shape. We exert the utmost care in turning out your work and our prices for high class printing are no higher than you would pay for an inferior grade of work. Mail order work a specialty. Try us on that next order of printing, and we assure you that you will become a booster. No job too large or no job too small.

We have added a new department to our paper, namely: A Classified Want Ad Column. We would like to have you list your wants, for sale, lost, found or for rent advertising with us. All will receive careful attention. Cash or postage stamps must accompany order.

Last but not least, do not deny yourself that Subscription to the KEWASKUM STATESMAN any longer. We are ever aiming to better our paper at all times, and any suggestions which the public have to offer will be cheerfully received. The worth of our paper is being shown by the large number of names being placed on our list weekly.

Grain Seeds From Western Canada Do Well in Ohio.

Demand for Them is Bound to Add Value to the Land of Our Northern Neighbor, Now to Be Had Cheap.

A large area of the land in several counties in Ohio prepared for spring seeding will be seeded with Marquis wheat-a spring variety. This wheat is Imported from Western Canada. It was about three years ago that the first of this seed was imported into the States, and the result, watched each succeeding year, proved that Ohio soil and spring seeding was a success. The demand for the seed has now become so great that one of the largest seed houses in the state, that has been purchasing from Western Canada farmers and importing it, has decided to purchase a large block of land in that country for the purpose of growing the grain themselves. They will devote considerable portion of their Western Canada holdings to growing oats, barley and rye. Their action is a strong indorsement of the product. For some time past a considerable quantity of seed outs has also been imported. The prolific yield reported was what probably gave an impetus to the

introduction of wheat. It was found, though, after a couple of years the quality of the oats, as well as the yield, began to deteriorate when grown seed was used, making it becessary for fresh importations every couple of years. It is possible that awarded \$5,050 in suits for \$17,000 company has promised to give the the same experience may follow the growing of Western Canada wheat. THE MOST DANGEROUS

No organs of the human body are so important to health and long life as the kidneys. When they slow up and commence to lag in their duties, look out! Danger is in sight.

Find out what the trouble is—without delay. Whenever you feel nervous, weak, dixzy, suffer from sleeplessness, or have pains in the back, wake up at once. Your kidneys need help. These are signs to warn you that your kidneys are not performing their functions properly. They are only half doing their work and are allowing impurities to accumulate and be converted into uric acid and other poisons, which are causing you distress and will destroy you unless they are driven from your system.

SHOULD TAKE **PHOSPHATE**

Nothing Like Plain Bitro-Phosphate to Put on Firm, Healthy Flesh and to Increase Strongth, Viger and Herve Force.

Judging from the countless preparations and treatments which are continually being advertised for the purpose of making thin people fleshy, developing arms, neal and bust, and replacing ugly hollows and angles by the soft curved lines of health and beauty, there are evidently thousands of men and women who keenly feel their excessive thinness.

Thinness and weakness are usually due to starved nerves. Our bodies need more phosphate than is contained in modern floods. Physicians claim there is nothing that will supply this deficiency so well at the organic phosphate known among druggists as bitro-phosphate, which is inexpensive and is sold by most all druggists under a guarantee of satisfaction or money back. By feeding the nerves directly and by supplying the body cells with the necessary phosphoric food elements, bitro-phosphate quickly produces a welcome transformation in the appearance; the increase in weight frequently being astonishing.

This increase in weight also carries with it a general improvement in the health, Nervousness, sleeplessness and lack of energy, which nearly always accompany excessive thinness, soon disappear, dull eyes become bright, and pale cheeks glow with the bloom of perfect health.

CAUTION: — Aithough bitro-phosphate is unsurpassed for relieving nervousness, sleeplessness and general weakness, it should not, owing to its remarkable flesh-growing properties, be used by anyone who does not desire to put on flesh.

The Flow of Meat

Two-thirds of the live stock in the United States has to be raised in the West.

One-half of the consumers of meat live in the East.

In other words, most of the live stock is one or two thousand miles distant from most of the people who need it in the form of food.

Fifty years ago, when live stock was raised close to every consuming center, the country butcher could handle the job after a fashion.

But the job got too big.

Now millions of animals have to be moved hundreds of miles to millions of people. Somewhere on the way they have to be turned into meat.

The packers solved the problem. They set up plants where the "live haul" and the "meat haul" were in the right balance. They built up distributing systems—refrigerator cars, refrigerating plants, branch houses. They saved time, money and meat everywhere. The stockraiser benefited in better markets and higher prices; the consumer, in better meat and lower prices.

As the country grew, the packers had to grow, or break down. Because of its present size and efficiency, Swift & Company is able to perform its part in this service at a fraction of a cent per pound profit.
