BOYS AND GIRLS CORN GROWING CONTEST

The Contestant.

Any boy or girl between the ages of 12 and 17 inclusive. Contestant does not have to be attending any school. The Washington County boys and girls corn growing contest which will be conducted along new lines this year will be based on both PRODUCTION AND QUALITY.

Each contestant must plant one acre of corn. Rows to be 3 feet and 8 in. apart.

The corn planted must be Golden Glow, Wis. No. 12. This will not be furnished by the state but may be purchased from any corn grower. A list of Golden Glow corn growers of the state will be furnished on application.

The acre plot will be measured in the fall by the superintending committee. The corn must be husked by the contestant and the committee will weigh this corn at the time the acre plot is measured.

An exhibit based on ten ears must be made at the county fair. The premiums awarded will be 60 per cent on production and 40 per cent on the quality of the ten ear exhibit. Each town will have its production champion and its quality champion. Person having highest average on production and quality will be town champion.

Heretofore this work has been done through the county superintendents' office and that office will continue to give its hearty co-operation to the county agent, through the schools and teachers.

Prizes: First prize each town, scholarship valued at \$15.00; Second prize—\$3.00; Third prize—\$2.00.

Sweetstake, first prize winners above competing: First prize silver loving cup, value \$15.00; Second prize silver loving cup, value \$10.00; Third prize silver loving cup, value \$5.00.

FOOD DRAFTS AT LOCAL BANKS

I desire to direct your attention to the arrangements made by the American Relief Administration for the delivery of food stuffs to the famine-stricken districts of Europe. The American Relief Administration carries stocks of staple foods, consisting of flour, bacon, beans, corned beef, lard, vegetables, and condensed milk at central depots in Hamburg, Warsaw, Vienna, Prague and Budapest.

In every community of our great state there are citizens who have relatives and friends in Europe to whom they desire to send foods. Heretofore they have been sending packages through the mails, or by express, direct to their friends. But a small proportion of these packages reach their destination safely, and in many cases, packages are lost enroute. At some of the European ports thousands of such packages are being held awaiting transportation.

The American Relief Administration has perfected plans by which delivery of food stuffs can be made from their several warehouses in Europe. Their plan provides for the purchase in this country of what is called a FOOD DRAFT. These Drafts are issued for amounts of ten dollars and fifty dollars. The purchaser of a Draft sends it to his relatives or friends in Europe. The recipient of this draft, on presentation at the American Relief Administration warehouse, receives foods as follows:

(A) 2 1/2 lbs. Flour, 10 lbs. Beans, 5 lbs. bacon, 8 cans milk—\$10.

(B) 140 lbs. flour, 50 lbs. beans, 16 lbs. lard, 10 lbs. corn, 12 cans milk—\$50.

(C) 2 1/2 lbs. flour, 10 lbs. beans, 7 1/2 lbs. cottonseed oil, 12 cans milk—\$10.

(D) 140 lbs. flour, 50 lbs. beans, 45 lbs. cottonseed oil, 48 cans milk—\$50.

The bankers of Wisconsin have never failed to do their part in work of a public nature. During the war period banks took the lead in aiding the Government in every possible way. The bankers of Wisconsin may well be proud of the banks and their record.

In the matter of co-operating with the American Relief Administration, I have every confidence you will sustain the splendid reputation you have made and desire to suggest and urge that you immediately make a requisition on the American Relief Administration, 115 Broadway, New York City, for a supply of Draft Books, literature, and address.

SANATORIUM SITE WANTED

In an effort to find the best possible site for the new tri-county tuberculosis sanatorium to be erected by Fond du Lac, Dodge and Washington counties, the joint committee appointed by the three county boards is advertising for property suitable for the purpose. As a result of a careful study of the question of site selection, made by the committee with the assistance of experts on the subject and based on the experience of existing institutions, the committee announces that there are certain important points which will govern the selection of the site. The one most nearly meeting the requirements will be chosen, whichever one of the three counties it chances to be in.

Accessibility will be the first thought to be considered. Proximity to a railroad and well kept highway will naturally reduce the initial cost of construction and of hauling fuel and other supplies after the institution is in operation. It will make it easier to get the patients to the sanatorium and more convenient for relatives and friends to visit them.

The site should not be less than five acres in extent, according to experts, and it is urged that larger tracts which offer diverse advantages will be given priority for out-of-door recreation by convalescent patients, and make it possible to provide a garden and possibly an orchard are desirable. Preferably the ground should lie on the southern or eastern slope of a hill so that it will be protected from the prevailing winter winds.

Beauty of landscape is important because of the length of time that the majority of patients must remain at the institution. A wooded site overlooking a river or lake is especially desirable. Low, swampy land should of course be avoided.

A good pure water supply, abundant and easily accessible, and adequate sewage disposal, facilities for sewage disposal, and the accessibility of electric power are among the engineering problems which will be considered in the selection of the site.

The earnestness of each of the three counties interested to secure the sanatorium is striking proof of a remarkable change which has taken place in the public attitude toward tuberculosis as the result of the systematic international campaign of the last decade. Ten years ago communities fought against having a sanatorium located in their vicinity, arguing that its presence would decrease the value of surrounding property. This attitude has been found to be true and now those same communities would fight just as strenuously if an attempt were made to take the sanatorium away. From the public standpoint, tuberculosis has been proved that there is less danger of infection in a sanatorium than out of it and that the very presence of the institution as a center of education in the health of the community is a distinct advantage to the community.

Mr. S. M. Pedrick, Ripon, Chairman of the Tri-County Sanatorium Board, is receiving the offers of sites.

MANY OPERATIONS WHOLLY UNNECESSARY

Expert Specialist Cures Without the Knife

That too many sufferers are unnecessarily operated on, who could have been cured without this, too, frequent use of the knife, is the claim of Dr. Karass of Milwaukee Expert Specialist.

A slight pain is often pronounced appendicitis, a costly operation is performed, when in reality the abdomen is opened the appendix is found healthy. Dr. Karass merely operates, he never mutilates the body God made in his own image.

Goitre, gall stones, appendicitis, tumors, enlarged tonsils, adenoids, ruptures, piles, fistula and diseases of women are cured by Dr. Karass without operation, pain or loss of time. The doctor also treats among many ailments diseases of the heart, lungs, stomach, kidneys, brain, nerves, liver, including rheumatism, epistaxis, paralysis, catarrh, asthma, head noises, dizziness, deafness, weak lungs, stomach trouble, bloating, head aches, and special diseases. One of the principal reasons for the wonderful and almost miraculous results, Dr. Karass obtains in the treatment of chronic and long standing diseases is due to the most thorough and painstaking examination he makes of every one who calls on him. He gets at the direct cause of the disease which he removes thereby effecting a lasting cure. As Dr. Karass speaks several languages any one not speaking English can be understood. Examination free to all. Dr. Karass will be in his office in the Republican House, Kewaskum, Wis., every Friday between 9 A. M. and 12 (noon). The doctor is in Campbellsport, Wis., in the Northwestern Hotel every Tuesday between 9 A. M. and 12 (noon). Milwaukee office 413-Grand Ave.—Adv.

DOLLARS AND CENTS

Counting it only in dollars and cents, how much did that last cold cost you? A man may not always stop work when he has a cold, but perhaps it would be better if he did. It takes about ten days to get completely rid of a cold under the usual treatment. That time can be much shortened by taking Chamberlain's Cough Remedy and proper care of yourself, in fact, a bottle of this remedy, if the house is a mighty good investment during the winter and spring months.—Adv.

BUY GENERAL STORE

Louis Schaefer, formerly of this village, who for the past ten years successfully conducted a confectionery store and ice cream parlor at Juneau, Wis., and which business he disposed of several weeks ago, last week in company with Joseph Ihde of Juneau, purchased a general store at Juneau, known as the The Schwaberts & Co. store, the leading and largest store in Juneau and vicinity. Both men have good business ability and are well acquainted with that business. Mr. Ihde has been employed as clerk for Mr. Schwaberts for many years. That they will be successful in their new undertaking there remains no doubt. We wish them an abundance of luck and prosperity.

FOR THE CHILDREN

Too much care cannot be exercised in selecting a cough medicine for children. It should be pleasant to take, contain no harmful drug and most effective in curing their coughs and colds. Long experience has shown that Chamberlain's Cough Remedy meets these conditions. It is a favorite with many mothers.—Adv.

LOCALS LOSE TWO GAMES

The local basket ball team went down to defeat at the hands of the Seeger Specials of Milwaukee by a score of 11 to 36 at the Opera House last Sunday evening. The locals were outplayed in every stage of the game and never had a chance. The Seeger Specials is the best team in Milwaukee, and came to this village with a particularly strong line up. On Wednesday evening the locals journeyed to Cedarburg, where they met with another defeat by a score of 29 to 38. The game was an exciting one from start to finish. Spatz Miller of the local quintette started for the home boys. Sunday evening, February 29th the local team will clash with the strong Schleisingerville team at the Opera House for the second game of a series for the Championship of Washington county. This promises to be the best game of the season. The Slinger team has a very strong lineup, the members of the team have played together for the past seven years, and as a result have developed wonderful team every player is a good basket shooter. The locals will have O'Malley of Milwaukee in their lineup, who is a first class professional, a clever guard and basket shooter. He at present is captain of the Alpha Gamma Phi Marquette University team, in which position he has established a state-wide reputation. He is noted for his generalship upon the floor, and in the successful manner he is able to coach. The game is in progress. He is one of Milwaukee's best. A hard and interesting game can be looked forward to as both teams are bound to win. Manager Schaefer will be at the game with Young or Fogarty, as the Doughboy team is touring through the western states and are unable to get back home in time for Sunday's game which will be the biggest and most important game of the season.

RAILROAD BILL UP TO WILSON

House and Senate Override Demands of the Union Labor Leaders.

PRESIDENT'S O. K. ASSURED

Forces of Organized Workers Caught Napping by Celerity With Which Chairman Cummins Forced Measure Through Senate.

Washington, Feb. 24.—Organized labor lost its fight to defeat the railroad bill when the house, after a five-hour debate, adopted the conference report on the measure by a majority of 100 votes.

The yeas were 250, nays 150, with one member "present." Previously a motion to recommitt the bill, made by Representative Barkley of Kentucky, was defeated by a vote of 171 to 225.

The president will have several days to act on the bill before the railroads go back to their owners March 1 under the proclamation issued some time ago.

Republican Floor Leader Mondell made the final appeal for the conference agreement, and the result showed nearly all the majority party members in line. Representative Esch of Wisconsin, chairman of the committee on interstate and foreign commerce and author of the original house bill, led the forces favoring the report.

Cham Clark, minority leader, was not present. Representative Kitchin of North Carolina, former party leader, was among those attacking the bill.

Most of the opposition to the bill was based on the financial and labor provisions. Representative Sims of Tennessee, in charge of the fight against the measure, and Representative Barkley, the two conferees refusing to sign the conference report, dealt chiefly with the financial features, particularly the provision for rates giving an average return of 5 1/2 per cent by groups of roads.

Most of the middle Western members voted for the bill. Illinois, however, furnished eight opposing votes. Wisconsin six, Michigan four, and Minnesota three. There were no negative votes cast in the Iowa or Indiana delegations.

The last act of legislation required of congress to provide for the return of the railroads to their owners was completed when the senate, voting 47 to 17, adopted the conference report on the Cummins-Esch bill. Three Republicans and fourteen Democrats opposed the act.

The bill having been previously approved by the house now goes to the president for his signature. With March 1 fixed as the date for the return of the roads, the time allowed for the president to sign the measure, is extremely short.

Throughout the debate the provisions most subjected to attack and criticism were those providing for the 5 1/2 per cent guaranty and the restrictions designed to prevent strikes on the part of the railway employees.

There was also general criticism of Samuel Gompers and the American Federation and of the policy of the organization in seeking to prevent the enactment of the bill.

Senator Cummins defended the guaranty provision by saying that it was not a guaranty at all, but merely a "direction" to the interstate commerce commission to adjust the rates so that a return of 5 1/2 per cent shall be derived.

Senator Robinson (Dem.), Arkansas, one of the conferees, said: "The labor provisions, fairly construed, do not justify the assaults made upon them. This is not a government of labor organizations. It must not be perverted in character so as to become the means of denying rights of justice to any class of law-abiding citizens."

Referring to the labor board provided for in the bill, he said: "It is astonishing that the labor organizations should assume the position that wage demands cannot fairly be determined by any tribunal which human wisdom can conceive, or which American statesmanship may devise."

Washington, Feb. 24.—Congress will have to appropriate funds for reconditioning the 30 former German liners which the shipping board has been trying to sell. Chairman Payne said, if the controversy which has arisen over the proposed sale of the vessels results in legislation requiring their repair and operation by the government.

The chairman estimated that \$75,000,000 would be needed to refit the vessels, which have been in transport service.

Now Cowboys' Local No. 1. Reno, Nev. Feb. 24.—A cowboys' union, said to be the first of its kind in America, is being organized here under the auspices of the trades and labor council and will seek affiliation with the American Federation.

RALPH A. HAYES

Ralph A. Hayes of Cleveland, Ohio, recently appointed assistant to Secretary of War Baker, who has left Washington to co-operate with the American graves registration service in Europe in the matter of returning to American soil the United States soldiers who died in France, and to make preliminary inspection for the accommodation of bodies in French burial places of those whose nearest of kin permit their interment permanently in France.

NO WHISKY REVOLT

Michigan Prosecutor Says Report is Big Hoax.

Major Dalrymple Starts for Scene of Alleged Rebellion With Posse and State Troopers.

Iron River, Mich., Feb. 24.—"There hasn't been such a hoax put over on the country since the fake armistice report as this report of the 'rum rebellion' in Iron county," said District Attorney Martin McDonough in an interview, continuing, McDonough said: "There is no rebellion in Iron county. It is a clean county. Prohibition is being enforced to the limit and my office is giving the federal agents every aid possible."

"I wired the governor and the attorney general of the state and the attorney general of the federal government at Washington demanding a full and complete investigation as to who started the report of this so-called rebellion."

Chicago, Feb. 24.—Major A. V. Dalrymple, chief of the "raiding squads" of the central states, left Chicago over the Chicago train for Iron county at the head of an armed posse of picked United States revenue agents for the mining district of Iron county, Michigan, where an open revolt against the eighteenth, or prohibition, amendment to the federal Constitution has been reported. A troop of Michigan constabulary will meet Major Dalrymple at Marquette.

Major Dalrymple will proceed under orders directly from Washington to arrest the state's attorney of the county, two deputy sheriffs, the chief and captain of police and three influential citizens.

"The action of the county, known as the 'upper peninsula' district, is almost isolated from the remainder of the county at this time of year by the heavy snows, and the federal agents expect to make a good part of their journey in sleds.

"This is a showdown, between the federal government and the violators of the federal amendment," said Major Dalrymple. "I am going to enforce prohibition."

N. Y. GIANT OF WORLD CITIES

New Census to Show the American Metropolis to Be the Largest City.

New York, Feb. 23.—New York will be shown by the 1920 census to be indisputably the largest city in the world.

Results of the census will, according to census officials, give to the metropolitan district of New York a population of 5,500,000, as compared to an estimated population of 7,500,000 for the metropolitan district of London.

The population of New York, exclusive of adjacent territory, census officials declare, will be between 5,500,000 and 7,000,000, as compared to 4,768,883, which was the federal census figure in 1910. In 1911 the population of London proper was 4,522,467, or 243,919 less than New York's population in the previous year.

Lobby Is Country's Menace. New York, Feb. 25.—Lobbying by class interests at Washington more seriously menaces the government than foreign complications over the League of Nations, Senator Thomas of Colorado declared.

Paper Shortage Hits Army News. New York, Feb. 25.—Because of the acute newspaper shortage the publicity bureau of the army announced that it had decided to discontinue temporarily its syndicate service to 2,800 newspapers.

Strike Paralyzes Argentine Trade. Buenos Aires, Feb. 24.—The strike of the steamship crews of the Milhanovich Steamship company, which has been in progress since last Saturday, is causing heavy losses to shippers, leaving virtually paralyzed commerce.

Chewing Gum Price May Go Up. New York, Feb. 24.—Several chicle dealers who sailed for Yucatan on the steamship Esparanza said the strike fever had spread to the natives who gather chewing gum in the rough, and they were demanding more pay.

RESERVE BOARD TO FIX CREDITS

Will Exert Power to Get Nation's Business Back to Pre-war Basis.

AMENDMENT IS RECOMMENDED

Asks Congress for Permission to Establish Normal Maximum Lines of Credit Accommodation for Member Banks.

Washington, Feb. 25.—Determination of the federal reserve board to exert the full power of the reserve banking system in regulating and controlling the credit situation—a course designed to aid commerce and industry in restoring a pre-war equilibrium—was disclosed in the board's annual report, made public here.

With this as its announced policy the board was prepared to "test the ability of the system to check expansion and to induce healthy liquidation." The board explained it was aware of the implied power to rectify the condition which confronts the country. This power necessarily followed the authority for and employment of an elastic system for reserve credit and note issue, it was added.

Recommendations also were made to congress for amendment of the reserve act which would permit reserve banks, with approval of the federal reserve board, to establish normal maximum lines of credit accommodation for member banks. An ascending scale of rates would be provided in event money was borrowed above the maximum line. This, the board believed, would induce banks to hold their own large borrowers in check and thus work to the end that credit expansion on a large scale would be stopped.

Warning was given that the country must guard against too rapid deflation. While the board was in entire sympathy with measures to overcome this evil, it pointed out that remedies employed to correct inflation might create conditions worse than inflation itself.

"Deflation merely for the sake of deflation and a speedy return to 'normal'—deflation merely for the sake of restoring security values and commodity prices to their pre-war levels without regard to other consequences would be an insane proceeding in the existing posture of world affairs," the report says.

The granting of extensive credits to foreign trade and the resultant keen competition in our own markets with the foreign buyer was charged by the board as being "one of the potent causes of high prices." It was shown that the demand for commodities from abroad was so far in excess of the supply that the increased cost of credit can be and is absorbed in the price. Speculation, therefore, has not been effectively checked by advances in interest rates.

REAR ADMIRAL PEARY DIES

Discoverer of the North Pole Passes Away at Washington After Long Illness.

Washington, Feb. 21.—Rear Admiral Robert E. Peary, discoverer of the North pole, died at his home here early Friday after an illness of several weeks, as the result of pernicious anemia.

Rear Admiral Peary had been suffering for nearly two years. A few weeks ago he underwent an operation for blood transfusion, but this failed to relieve him.

Admiral Peary was born in Cresson, Pa., May 6, 1856, the son of Charles and Mary Peary.

Since his triumphal return from his arctic expedition and the subsequent controversy over the discovery of the North pole, Admiral Peary has not been in the best of health.

It was in the afternoon of September 8, 1909, that the following few words reported to the civilized world for the first time this crowning achievement of three centuries of effort:

"Indian Harbor, via Cape Ray, N. F., Sept. 8.—To the Associated Press, New York: "Stars and Stripes nailed to the North pole. PEARY."

Peary's actual attainment of the pole had been just five months before, on April 6, 1909.

Speculators Get Inside Tip. New York, Feb. 25.—Warning against speculation in the Estonian mark has been issued by the government. Its announcement says that offenders will be punished by death.

Miss Losanitch was decorated by her country for her services during the war.

DENIES SHIP DEAL

Wilson Had No Agreement to Sell Vessels to Britain.

President Sends Message to Senate Explaining the Situation—Copy of Proposed Agreement Submitted.

Washington, Feb. 23.—President Wilson in reply to Senator Brandegee's resolution, informed the senate that he had not entered into any agreement or understanding with officials of Great Britain concerning the sale of former German liners seized in American ports, nor had he entered into any agreement or understanding with respect to what disposition should be made of them by the United States.

At the same time he transmitted to the senate a copy of a "proposed agreement" between the allied and associated governments at Paris, under which each is to retain as its own "the complete title to and use of all ships captured, seized or detained during the war as a war measure."

This agreement further provides that in case the ships so retained by any allied or associated government are in excess of the claims of such governments for war losses in merchant ships such government shall not make a claim for a share of other ships ceded under the treaty of peace.

Ships so ceded will be distributed among the other governments on the basis of the number of ships lost and not replaced by the enemy vessels seized or captured by them during the war.

It also provides that since the ships to be retained by the United States, Brazil, China, Cuba and Siam would exceed their claims for merchant tonnage lost the commission shall determine a reasonable value of the excess and that these countries shall pay such sums to the commission for the credit of Germany in making reparation for war losses of merchant ships.

The president said that while he felt confident that congress would make the disposal of the funds to which he had agreed he had no authority to bind congress to that act, "but must depend upon its taking the same view in the matter that is taken by the joint signatories of this agreement."

NO TRIAL FOR HINDENBURG

Each Crime to Be Specified, Berlin Cabinet Tells the Allies—Witnesses Scattered.

Berlin, Feb. 21.—Germany intends to prosecute vigorously every man on the extradition list against whom there is prima facie evidence of the commission of a crime. But Germany has no intention whatever of instituting proceedings against General von Hindenburg, Bethmann-Hollweg and other "leading" ministers—the charges specify individual crimes.

Following the session of the cabinet which considered the last note of the allies, Eugene Schiffer, minister of justice, left no doubt regarding this.

He said Germany was determined to hasten as much as possible, but that the difficulty of locating witnesses, some of whom are in distant colonies, forced delay.

Welsh Miners Strike. Porth, Wales, Feb. 25.—Thirty thousand miners went on strike in the valleys of the Rhondda valley. The shutdown is almost complete.

Red Forces in Murmansk. London, Feb. 25.—Bolshevik forces have seized Murmansk and shipping in the harbor there, following a revolution which broke out at that port Saturday afternoon, according to a Lloyds dispatch from Vardo, Norway.

Rob Tammany Club of \$5,000. New York, Feb. 25.—Eight masked gunmen entered the Tammany club, Eighth assembly district, and robbed 30 members who were playing cards of about \$5,000. They escaped before an alarm could be given.

Liner Is Held Up by Strike. Rotterdam, Feb. 23.—The transatlantic liner Noordam, which was scheduled to sail Thursday night for New York, will not depart for an indefinite time because of the dockworkers' strike.

MAY ARREST THE PROHIBITION ARMY

Sheriff of Iron County Threatens Dalrymple and Deputies.

REFUSE TO ISSUE WARRANTS

Dry Officer Declares He Will Continue Drive on the "Rum Rebels" Without the Documents—Trouble Is Expected.

St. Louis, Feb. 25.—General Palmer telegraphed Assistant Attorney General Frierson at Washington authorizing him to take any steps he deemed necessary in the alleged "whisky rebellion" in Iron county, Michigan.

Iron River, Mich., Feb. 25.—When Maj. A. V. Dalrymple and his 16 federal aids arrive here the major will be promptly arrested by Chief of Police Sensilla on a warrant sworn out by State's Attorney Martin S. McDonough of Iron county on a charge of circulation of false and malicious libel. The warrant was sworn out before Magistrate J. B. Curley. When Chief Sensilla serves it he will be accompanied by the state's attorney.

Furthermore, in view of the failure of Major Dalrymple to get warrants at Marquette, if any of the 16 federal agents under Major Dalrymple seek to make an arrest without due process of law, they will be arrested.

Refuse to Issue Warrants. Marquette, Mich., Feb. 25.—Warrants for the arrest of Prosecuting Attorney Martin McDonough and half a dozen others, including police and deputy sheriffs of Iron county, on charges of conspiring to obstruct prohibition enforcement in the northern peninsula of Michigan were refused by United States Commissioner H. B. Hatch in the absence of direct instructions from Federal District Judge Sessions, United States District Attorney Myron H. Walker or Attorney General A. Mitchell Palmer, following formal application by Supervising Federal Prohibition Agent A. V. Dalrymple.

Dalrymple Promises Arrests. Major Dalrymple announced the arrests will take place when the squad of 13 prohibition agents from Chicago arrives in Iron River from Negaunee, where they remained while their leader came on to Marquette for the warrants.

"The attempt of McDonough to minimize the seriousness of this affair by declaring reports of a 'rum revolt' to be the greatest hoax since the false report of the armistice, will not get him anywhere," said Major Dalrymple on the way from Chicago. "We do not expect any trouble, but we are prepared for it and it's war to the hilt on McDonough and the district attorney of Grand Rapids as well as all other Albertsons in this neck of the woods who think they can defy the law and the government."

"Bolshevism and anarchy are fostered by the fact that Americans are a lawless people in that they have no respect for a law that abridges their personal liberty, and if we are to have a law, inefficient, sloppy enforcement of the law we are going to have rioting, bloodshed and disorder everywhere. We've got to stamp this thing out here once for all if respect for law and order is to be sustained, and I don't care who opposes us, whether it's the district attorney at Grand Rapids, or local authorities, they've got to get out of the way."

The Dalrymple drive is causing great excitement in the Iron range county, and the supervising federal prohibition agent was met by a large crowd at the Marquette railroad station when the Chicago train pulled in.

Feeling Is Running High. Feeling in Iron River is reported as running high against the invasion of the peninsula by Major Dalrymple and his "demon squad," and trouble is expected if the Philippine veteran carries out his announced intention of raiding every place in Iron county where there is reason to believe a "moonshine" still or contraband stock of liquor exists.

THE "BLUES" Caused by Acid-Stomach

Millions of people who worry, are depressed, have nervous depression, feel blue and are often melancholy, believe that these conditions are due to indigestion. Nearly always, however, the cause can be traced to an internal source—acid-stomach. No health is so vulnerable as acid-stomach, beginning with such well defined symptoms as flatulence, belching, heartburn, bloating, etc. If we do not get back to normal, our degree of other all the vital organs. The nervous system becomes deranged. Digestion suffers. The blood is impoverished. Health and strength are undermined. The victim of acid-stomach, although he may not know the cause of his ailments, feels his hope, courage, ambition and energy slipping. And truly life is dark—worth much to the man who has acid-stomach.

The COW PUNCHER By Robert J.C. Stead

CHAPTER VII.—Continued. "Real estate is the only subject I would trust him on," she continued. "I must say, Dave, that for a shrewd business man you are awfully dense about Concord."

CHAPTER VIII. Upon the return of Irene Hardy to the East it had slowly become apparent to her mother that things were not as they once had been. It seemed as though she had left part of her nature behind—had outgrown it, perhaps—and had created about herself an atmosphere of reserve foreign to her earlier life. It seemed as though the loneliness of the great plains had settled upon her.

"Whatever has come over Irene?" said Mrs. Hardy to the doctor one evening. "She hasn't been the same since she came home. I should not have let her go west alone."

"Not exactly burst. It will not be so sudden as that. It will just ooze away like a toy balloon pricked with a pin."

"The firm is, I beg you, Bert, to believe that if I had known your intention I would have tried to dissuade you."

"Why me particularly? I am only one of the great public. Why don't you give your conclusions to the world? Now that you see the reaction setting in doesn't honesty suggest what your course should be?"

"I should think this is a matter of sufficient interest to the family to be discussed seriously," retorted Mrs. Hardy, who had an unfortunate habit of becoming exasperated by her husband's good humor. "Irene is our only child, and before your very eyes you see her—you see her—Do you know, I begin—I really begin to suspect that she's in love."

"It was Doctor Hardy's turn to sit upright. "Nonsense!" he said. "Why should she be in love? It is the unfortunate limitation of the philosopher that he so often leaves irrational behavior out of the reckoning. "She is only a child."

"She will be eighteen presently. And why shouldn't she be in love? And the question is—who? That is for you to answer. Who did she meet?"

"I suppose human nature is different," she interrupted meaningly. Then her head fell upon the table and her hands went up about her hair. It was not brown hair once but was now thin and streaked with gray. "Oh, Andrew," she wept, "we are ruined! That we should ever have come to this!"

It was now Doctor Hardy's turn to be exasperated. There was one thing his philosophy could not endure. That was a person who was not and who would not be philosophical. Mrs. Hardy was not and would not be philosophical. "This is all nonsense!" said the doctor, impatiently. "There is nothing to it, anyway. The girl had to have

AMERICAN BOOBS KEEP PRICES UP

Secretary Meredith Says People Must Learn Horse Sense.

NATION OF GULLIBLE SUCKERS

Head of Agriculture Department Tells Chicago Association of Commerce Things About This Nation of "Silly Spendthrifts."

Chicago, Feb. 25.—The ruble who bought the gold brick used to be a whimsical novelty in the life of the nation. The yokel who paid \$47 spot cash for the Masonic Temple used to be a stray bit of color in the news of the day. Today—take it from the United States department of agriculture and its secretary, Edwin T. Meredith—the nation is a collection of gullible suckers walking around with exposed bank rolls.

The famous American public, than which there never used to be no "famouser," has become in the last five years as naive as a girl with her first hair net. It has, by its semi-indifference, brought upon itself a high cost of living and a dollar worth 30 cents.

"Food today," said Mr. Meredith, who came to Chicago to speak before the Association of Commerce, "should be as cheap as if not cheaper than it was six years ago. There is more food per capita being produced in the country."

Great Gain in Grain Output. Mr. Meredith produced figures. The figures showed that in the last thirty years the production of grain on the farms has increased from 266 bushels per capita to 406 bushels per capita. That since 1880 production has increased 25 per cent more; that cotton has increased from thirty-six and one-half pounds per capita to sixty pounds per capita; that milk has increased from eighty gallons per capita to ninety-six gallons; wheat from six bushels to eight bushels; the six leading cereals from thirty-eight bushels in 1874 to fifty-two bushels in 1919.

These and a succession of similar figures marshaled by the secretary of agriculture point plainly, in his opinion, to the fact that production on the farms has not fallen off, but increased—that following the natural laws of supply and demand the cost of food should not have increased.

Enter, however, the great, wise American with the nervous bunk roll. Ten years ago a man going in to buy a pair of shoes for \$5 would no more have thought of buying a pair for \$10 than he would of eating them. Today the citizen entering a shoe store or any other kind of a store will come through with any price asked—and no questions asked by him. It is the same in the groceries, in the restaurants, theaters and all other places where the great American ruble is shedding his bank roll.

"Nation of Silly Spendthrifts." "We've become a nation of silly spendthrifts," said Mr. Meredith, "and the result is, we are being trimmed right and left by everybody and anybody. The newspapers prepare the American for his trimming. They keep writing about the high cost and higher cost of living. The result is that an American, when asked some preposterous sum for an article, sighs and says: 'Prices have gone up.'"

"Prices are hundreds per cent higher in some places than they should be. But that isn't my field. That's up to the department of justice."

Next to the spectacle offered by the everyday metropolitan ruble staggering from counter to counter and shelling out his dough in the foregoing yokel manner, the most ironic situation on view is that of this same hick gathered in solemn conference adopting solemn resolutions that the price of eggs should come down and the cost of derby hats be investigated.

"There is only one way, and that is individual education," said Mr. Meredith. "The people as a whole must act and each must act for himself. If we Americans could, by some miracle, recover the ordinary everyday horse sense that distinguished our individual lives ten years ago prices would collapse."

Mr. Meredith spoke before the Chicago Association of Commerce on the activities of the department of agriculture, which the department was in continual contact with the lives of every citizen in the nation, inspecting his meats, cigars, clothes, building his roads, keeping him clear of adulterators, providing him with new flavors and similar countless activities.

The KITCHEN CABINET

SEASONABLE SALADS.

A most pleasing salad combination is the following: Arrange leaves of lettuce on a salad plate, then place ripe pears cut in eighths. After peeling and coring, add a tablespoonful or less of finely shredded celery, two dates cut in quarters, and one small banana sliced. Cover with a dressing, using three teaspoonfuls of bottled dressing and half a cupful of whipped cream. Add more seasoning if need, especially salt, and pour the dressing over the salad just as it goes to the table. Mayonnaise may be used with cream in the same proportion.

Japanese Salad.—Cook one cupful of rice in boiling water until tender. Add one small chopped onion, a teaspoonful of salt, a few dashes of cayenne pepper. Serve garnished with sardines and sweet red pepper cut in strips.

Date and Nut Salad.—Prepare dates cut in eighths and arrange them on lettuce over walnut meats. Serve with French dressing. Stewed prunes may be used in place of the dates and are equally as dainty.

Shredded Cabbage With Cream.—Shred a firm head of cabbage, or if large, a portion of the head. Sprinkle with salt after letting the finely shredded cabbage become crisp in cold water. Add a dash of cayenne and the salt after draining very dry, two tablespoonfuls of sugar and two tablespoonfuls of vinegar with half a cupful of thick sweet cream. Sour cream may be used with a very little vinegar.

Orange and Water Cress Salad.—To serve with duck, there is no more appetizing salad than this. Arrange a nice bed of well-washed water cress on salad plate, place overlapping slices of orange which has been carefully peeled. Serve with a highly seasoned French dressing.

Tomato Salad.—Cut small peeled tomatoes in halves or large ones in thick slices. On each slice or half, heap a teaspoonful each of chopped onion, celery and cucumber and top with a spoonful of thick mayonnaise. Dash over the dressing a sprinkling of paprika just before serving.

Hope and courage and sympathy and trust are great producers, and they are great factors in a man's doing his duty, as well as his having the joy of achievement.

FOOD FOR THE FAMILY. In these days of high-priced eggs the following cake will be most happily received: Eggless Chocolate Cake.—Grate two squares of chocolate in a mortar. Melt it in half a cupful of milk; in another half cupful of milk dissolve one teaspoonful of soda. Mix together one cupful of sugar and a tablespoonful of softened shortening; add a teaspoonful of vanilla and one-third of a teaspoonful of salt, mix all together and add 1 1/2 cupfuls of flour, then beat in the hot milk in which the chocolate has been dissolved and bake in a loaf pan fifty minutes in a moderate oven.

Maple Rolls.—Make a baking powder biscuit mixture as usual; roll in an oblong one-half inch thick. Brush with melted butter and spread with maple sugar grated. Dampen the outer edges and roll up firmly. Cut in slices one-half inch thick, place in a well-greased pan and bake in a hot oven twenty to twenty-five minutes. Chopped nuts may be added with the sugar if desired.

Graham Griddle Cakes.—Take two cupfuls of Graham flour, half a cupful of white flour, two tablespoonfuls of corn meal, two teaspoonfuls of sugar, three-fourths of a teaspoonful of soda, one teaspoonful of cream of tartar, one-half teaspoonful of salt, half a teaspoonful of melted fat and 2 1/2 cupfuls of milk. Mix the dry ingredients then stir in the melted fat and the milk. Beat well and fry on a hot griddle.

Cabbage With Milk.—Cook cabbage as usual in boiling water, drain and add a few crackers finely crumbed and milk with a little butter for richness. Season with salt and pepper and serve after the milk has become thoroughly heated.

Raisin Gruel.—Take a dozen large, choice raisins, seed them and place in a double boiler with a pint of boiling water and cook for an hour. Strain the water and return it to the boiler, thicken with a teaspoonful of cornstarch mixed in a tablespoonful of cold milk, stir while adding and cook ten minutes. Add salt and sugar. When cool add a half cupful of milk and serve.

Thousands Have Kidney Trouble and Never Suspect It

Applicants for Insurance Often Rejected.

Judging from reports from druggists who are constantly in direct touch with the public, there is one preparation that has been very successful in overcoming these conditions. The mild and healing influence of Dr. Kilmer's Swamp-Root is soon realized. It stands the highest for its remarkable record of success.

An examining physician for one of the prominent Life Insurance Companies, in an interview on the subject, made the astonishing statement that one reason why so many applicants for insurance are rejected is because kidney trouble is so common to the American people, and the large majority of those whose applications are declined do not even suspect that they have the disease. It is on sale at all drug stores in bottles of two sizes, medium and large.

There is hunger of the heart as well as hunger of the stomach. "CALIFORNIA FIG SYRUP" IS CHILD'S LAXATIVE

Look at tongue! Remove poisons from stomach, liver and bowels.

Accept "California" Syrup of Figs only—look for the name California on the package, then you are sure your child is having the best and most harmless laxative or physic for the little stomach, liver and bowels. Children love its delicious fruit taste. Full directions for child's dose on each bottle. Give it without fear. Mother! You must say "California."

A lot of successful men don't get written up in the magazines. NAME "BAYER" IS ON GENUINE ASPIRIN

Take tablets without fear, if you see the safety of "Bayer Cross."

If you want the true, world-famous Aspirin, as prescribed by physicians for over eighteen years, you must ask for "Bayer Tablets of Aspirin."

In each package of "Bayer Tablets of Aspirin" are safe and proper directions for Colds, Headache, Neuralgia, Toothache, Earsache, Rheumatism, Lumbago, Neuritis, and for Pain in general.

Handy tin boxes containing 12 tablets cost but a few cents. Druggists also sell larger "Bayer" packages. Aspirin is the trade mark of Bayer Manufacturing of Monacetaicidester of Sallicylicacid.—Adv.

**They couldn't be built
now for twice \$7,000**

When the talk turns from politics to railroads,
and the traveler with the cocksure air breaks
in with, "There's an awful lot of 'water' in
the railroads," here are some hard-pan facts
to give him:

American railroads have cost \$80,900 a mile
—roadbed, structures, stations, yards, termin-
als, freight and passenger trains—everything
from the great city terminals to the last spike.

A good concrete-and-asphalt highway costs
\$36,000 a mile—just a bare road, not count-
ing the cost of culverts, bridges, etc.

Our railroads couldn't be duplicated to-
day for \$150,000 a mile.

They are capitalized for only \$71,000 a mile—
much less than their actual value. Seventy-one
thousand dollars today will buy one locomotive.

English railways are capitalized at \$274,000 a
mile; the French at \$155,000; German \$132,000;
even in Canada (still in pioneer development)
they are capitalized at \$67,000 a mile. The
average for all foreign countries is \$100,000.

Low capitalization and high operating effi-
ciency have enabled American Railroads to pay
the highest wages while charging the lowest
rates.

LAY A SOLID FOUNDATION FOR YOUR CROP

No structure is better than its foundation. Your crop is a plant structure and it will be no better than the foundation,—the seed-bed. A poor seed-bed means a poor crop. A good seed bed insures a good crop. Lay a solid foundation for your crop by preparing a good seed-bed.

The INTERNATIONAL DISK HARROW is designed to put your seed-bed in ideal condition. The disk gangs have just the right slant and effectively slice and pulverize every clod, cutting to an even depth all the way across and blanketing the field with a mulch that thoroughly safeguards its valuable stores of moisture. It is rigid and durable. From one end of the harrow to the other the one-piece angle steel frame is without a joint. The steel stub tongue is a backbone that holds the frame and gangs in rigid alignment. Built in and always ready is an angle steel weight box. Replacing long hard oil pipes are grey iron standards adding rigidity to the gangs, and the hard oil flows through the standards direct to the bearings. With a single motion of the feet oscillating scrapers clean the disk blades.

The INTERNATIONAL LINE of tillage implements also includes other essential implements such as smoothing harrows, spring-tooth harrows and 1-horse cultivators. Come in and see us for your tillage implements.

"No, Bill, I wouldn't take a thousand dollars for it."

THAT'S what users say about Delco-Light, the complete electric plant. Levi Stout, Coffee Creek, Montana, says: "I would not take \$2,000 for my Delco-Light if I could not get another." Albert Knopke, Moccasin, Montana, says: "I would rather quit the ranch than do without Delco-Light." Why are these men so enthusiastic? It's because Delco-Light, with its successful air cooling, its one place to oil, its kerosene burning engine and production of four kilowatt hours of electricity per gallon of fuel, gives them maximum service with minimum attention. The experiences of more than 75,000 satisfied users prove these things to be true of Delco-Light. FIND SERUM TO KILL FLU GERMS

Paris Physician Meets With Success in Anti-Plague Experiments.

30,000,000 IN WORLD HIT

New York Hospital Isolates Sleeping Sickness Germ—Paris Doctor Says Influenza and Sleeping Sickness Are Twin Diseases.

New York.—Three-quarters of the world's population have been affected with Spanish influenza, which is now declared to be the same disease as the sleeping sickness, and a serum has been found to cure both, according to reports.

Simultaneously with the receipt of word from Paris that a serum had been made by Dr. Charles Folley which would cure both influenza and sleeping sickness, came a report from Bellevue hospital that a preliminary report had been issued from Mount Sinai hospital of the probable isolation of the sleeping sickness germ.

To produce a serum to cure the encephalitis lethargica, as the sleeping sickness is known to science, it would be necessary to segregate the germ of the disease, as serums are made from the disease germs themselves, the live germs in the blood being killed by the injection into the blood of the dead bodies of the same germs.

The germ of Spanish influenza is said to have been isolated, but no perfect serum is known to have been produced.

Use Flu Germs. Doctor Folley in Paris produced the serum for the cure of sleeping sickness without isolating the encephalitis lethargica germ at all, but by using germs of influenza, which led him to assert that the two are twin diseases and caused by the same germ under different conditions.

The same serum with which he cured many cases of influenza was found equally effective in curing sleeping sickness. This theory of twin diseases is borne out in the famous Mrs. Muntz case here, where the sleeping sickness followed a severe attack of Spanish influenza.

At the office of Doctor Simmers at Bellevue it was said that Mount Sinai hospital researchers were not ready to state positively they had segregated the germ of Spanish influenza.

the sleeping sickness germ and that no formal announcement of the germ's discovery had been issued. A preliminary report had stated the doctors at Mount Sinai had succeeded in finding a "globoid body" of infinitesimal proportions which was believed to be the possible germ or cause of the disease.

To Publish Report.

Experiments with the globoid body are now being carried on at Mount Sinai, a complete report of the findings of the researchers there will be issued in due time, it was said.

Doctor Folley, in Paris said there are 25,000,000 cases of the "flu" annually and 80,000,000 this year because of the world-wide epidemic.

CHILI TO HAVE PLANE FACTORY

British Firm Submits Proposals to Government, Which Are Favorably Considered.

MAKE WORK FOR MANY MEN

Peru Will Try to Solve Transportation Difficulties by Use of Airplanes—Eight Latin-American Countries Have Pilots.

Valparaiso, Chile.—Proposals to the Chilean government for the establishment of an airplane factory in Chile, by an English firm, and the organization of a postal service between the principal cities are meeting favorable reception at the hands of government officials, says the South Pacific Mail.

A detailed report on the project has been forwarded to the government finance minister by Gen. Don Pedro Dartnell, following careful study of the plans as outlined by the John Thomas Aircraft Manufacturing company. In his report the general gives detailed economic, commercial and military reasons for favoring the undertaking.

The introduction of this new branch of enterprise into Chile would undoubtedly stimulate a number of the national industries, comments the paper, "and at the same time find employment of a skilled kind for many hands, while it would also mean the introduction of not less than \$2,500,000 capital.

Would Be Independent. "The military air service would benefit by being made independent of material imported from abroad, while the establishment of an efficient postal service throughout the country would greatly help the population."

Well organized steps to incorporate aviation in the development of their resources are now being taken by eight of the South American republics. Flying is being extensively employed for military and naval purposes and it is expected that aviation to carry passengers to outlying mines and ranches will soon be developed on a large scale, as at present transportation by rail, water and pack animals is extremely slow and difficult.

According to a foreign airplane representative, Brazil has done more than any other South American country toward the development of aviation. Plans are now under way for the establishment of several mail routes and for transportation up and down the Brazilian coast some 1,000 miles, while several planes have been sold for private use.

Air Schools Established. In Uruguay and Argentina government air schools have already been established for both naval and military pupils, while along commercial lines the former all-night trip by steamer from Montevideo to Buenos Aires has been reduced to an hour and a half by the use of the airplane.

Bolivia is rapidly undertaking the use of airplanes, an American ace having recently been employed by the government to set up a flying school. Machines are also being sent to Venezuela and to Colombia where they will engage in military and passenger work.

In Peru, however, airplane representatives say they have found more enthusiasm for flying than in any other South American country. Already several Peruvians have qualified as pilots, and more machines are expected to be ordered at an early date. It is expected that in Peru the many difficulties of transportation, due to the mountainous contour of the country, will be overcome through the use of the plane.

ALLOW FOREIGN SHIPS BOOZE

Palmer Decides Prohibition Can't Be Enforced Except on United States Vessels.

Washington.—Foreign seamen hereafter may have their liquor with their meals while their ships are docked in American ports, according to an announcement by Assistant Secretary House of the treasury. After numerous foreign governments had protested against the order sealing stocks

of liquors on ships in American ports, the question was laid before Attorney General Palmer, who held it could not be enforced except in the case of American owned ships.

"The decision," Mr. House said, "modifies the order of December 11, which made the sealing of liquors in our ports applicable to both American and foreign ships. International country requires that every courtesy be extended to foreign vessels anchored in our water. American vessels are still subject to the requirements."

This sausage is in one long chapter. Up to the day the 138-inch sausage threw its glare into the ring, Mrs. Mary Hifford of Fremont claimed first prize, with a single sausage 70 inches long.

DADDY'S EVENING FAIRY TALE

THE MODERN BIRD.

"This," said the little bird, "is a true story." "Is it now?" asked the canary. "It most certainly is," said the first little bird who had spoken.

"Of course, you know how I came here?" he asked. "I knew there was a great deal of excitement," the canary said, "perhaps you would tell me your story from the beginning. I am sure I would appreciate it greatly if you would."

"Oh, very well," said Buffy. "I will tell you the whole story. But first I will tell it to you as it happened."

"Why, were you going to tell it to me in any other way?" asked the canary with his head on one side, looking most extremely shocked.

"Oh, no," said Buffy. "You quite misunderstood me, or, perhaps, I should say I was not very clear."

"I will not interrupt any more," chirped the canary. Both birds were in large cages. The canary belonged to a sailor on the ship which was crossing the Atlantic ocean.

The little buff bird had been found on the deck one morning, very nervous and frightened, his feathers wet, his heart beating fast, by the sailor who owned the canary. He saw that the little buff bird was still alive and he took him to his cabin and saw that he was warm again and that he had some of the canary's extra supply of food.

"They thought," the canary said, "that you had been blown out to sea—that is, some of them thought it. They knew you weren't a sea bird and yet very few could believe that you had either flown or blown such a long distance. They said that very few of the water birds would fly such a distance.

And they didn't see how you could have been blown such a distance and still be alive when you got here. You were alive, but very tired and nervous; you were very old and wet and nervous! I should think you would have been dying to a ship like this in the middle of the ocean. But here I am talking some more."

"What did they finally decide was the way I had come?" asked Buffy. "They decided," the canary answered, "that you must have flown from your cage in the cabin of an-

What a Modern Bird!

other ship and that you took a little airing and that a storm suddenly arose and you couldn't find your way back through the storm—and so you happened upon our deck."

"Well," said Buffy, "that wasn't such a bad guess, but it isn't right. I will tell you all about it."

"Yes, I've done most of the talking," the canary said, "and I wanted to hear about you."

"In the first place," said Buffy, "I am happy here and I wasn't so happy on my own ship. I wasn't made such a pet of as I am here. They really didn't care for birds like your master and his friends do."

"So one day I thought I would take a trip. I had heard, during the past few months or more—I'm not much on time you know—though I know when it is spring and winter and summer and autumn and molting time and mating time and such—but on the seas I'm not so certain as to when it happened—"

"Anyway—I'm getting rather too far ahead on my story—I had heard for quite a little while of the wonderful people who flew across the ocean—flew in airplanes. I heard how they won prizes and how fine it was."

"Well, I thought I'd like to do the same. It would be a fine thing for me, a land bird, to fly across the ocean. So I left my ship when my cage door was opened and the cabin porthole was open and off I came to fly across the ocean. I hoped at the end I would receive a big trunk of seed and a nice box of lettuce and a suitcase of cuttlefish for my rewards. But also, I was overtaken by storm as so many flyers are, birds and men. And I was forced to make this landing! But I'm glad I did and I don't believe I'll fly again for awhile. It's still a bit risky—even if one has his wings right with him!"

"Oh," said the canary admiringly, "what a modern bird you are, what a very modern bird!"

Where Can I Find Relief From Itching, Terrifying Eczema?

Question on Lips of Afflicted. There is a harassing discomfort caused by Eczema that almost becomes a torture. The itching is almost unbearable, and the skin seems on fire with the burning irritation. A cure from local applications of salves and ointments is impossible, because such treatment can only allay the pain temporarily. The disease can only be reached by going deep down to its source, which is in the blood, the disease being caused by an infection which breaks out through the skin. That is why the most satisfactory treatment for all so-called skin diseases is S. S. S., which acts by cleansing the blood. Get a bottle to-day, and you will see results from the right treatment. YOUR COLD IS EASED AFTER THE FIRST DOSE

"Pape's Cold Compound" then breaks up a cold in a few hours

Relief comes instantly. A dose taken every two hours until three doses are taken usually breaks up a severe cold and ends all the gripe misery.

The very first dose opens your clogged-up nostrils and the air passages in the head, stops nose running, relieves the headache, dullness, feverishness, sneezing, soreness and stiffness.

Don't stay stuffed-up! Quit blowing and snuffling! Clear your congested head! Nothing else in the world gives such prompt relief as "Pape's Cold Compound," which costs only a few cents at any drug store.

Long Road to Ultimate Consumer. Country Boarder—I suppose we'll be getting some of these nice fresh eggs, for breakfast.

Farmer—Yep; these very eggs but not till ye come down here next year. Ye see, I've got to sell them to the local commission man, and he sells them to the jobber in the city, who in turn sells them back here to the fellow who runs the country grocery, and I buy them from him.—Life.

Twice Robbed. The disgruntled householder reported to the police sergeant that some one had entered his house the night before and stolen a quantity of lead pipe.

"I wouldn't mind it so much," he explained, "only it is the second time I have suffered this week."

"When were you robbed before?" asked the sergeant. "Last Tuesday by the plumber who collected his bill for putting that pipe in."—Boston Transcript.

CAME NEAR DYING

Finally Used Doan's and Was Restored to Health. Has Been Strong and Well Since.

"Malaria fever weakened my kidneys when I was a young man," says L. W. Garrison, 23 F. St., Anderson, S. C. "Finally, ten years ago, I was in such bad shape that I expected to die. Medicine wouldn't help me any more. My back pained as if it were pierced with a knife. Many times I have fallen in the street and didn't have any strength to move until the awful misery was eased up. I couldn't sleep in bed for two years. The kidney secretions passed every few minutes and scalding hot water couldn't water. I thought I was doomed to die, but a friend pleaded with me to try Doan's Kidney Pills and I owe my life to his visit. Doan's helped me from the start and eleven boxes made a permanent cure which has lasted eight years. I have not had one sick minute since, nor missed a day from work." Story told before me. H. S. WISCONSIN STATE NEWS

Antigo—John Mainville, charged with intent to do great bodily harm, was found guilty after a jury had been out 24 hours. The charge grew out of the wounding of Mrs. Anna Lillie, housekeeper for Frank Parsons who was shot and killed in the affray. Mainville was found not guilty of the latter charge when tried last summer, not long after the shooting. The unwritten law was the plea of the defense at that trial. Mainville now faces a sentence of from one to three years.

Wausau—Plans are under way to build a concrete tank along the Wisconsin river to take the place of the bathing beach which was rendered unfit for use with the beginning of work of the dam of the Wisconsin Valley Electric company across the river. The company has assured the promoters that they will give the use of the land for the tank free of charge. In addition the company has said that as soon as the dam is completed the west bank of the river will be parked.

Rhineland—The state board of health and the railroad rate commission have rendered a decision to Rhineland city officials in which the latter are ordered to proceed at once towards developing a new source of supply for the city water. The present supply is obtained from the Wisconsin river and has been condemned unfit for drinking purposes. Boat houses near the intake are ordered removed by the state.

Janesville—Heart balm of \$20,000 is asked by Ruth M. Doyle, 20 years old, of the town of Rock, in a suit filed in the circuit court here against Isaac A. Connors of this city. The action is being brought by William E. Doyle, father and legal guardian of the young woman. Connors is the son of a former prominent democratic politician. The girl's father has also started suit for \$2,000 for loss of services.

La Crosse—With the addition of a social worker, the health department of the city of La Crosse has a completely equipped general clinic, one of the first established in a city of this size in the United States. Miss Mary MacCarville has been assigned as social worker to La Crosse county. She is a graduate of Edgewood academy, Madison, and of Mercy hospital, Chicago.

La Crosse—That the lowly bullhead is the hardest fish that swims was proven at the plant of a local fish company. Three bullheads sent here in a shipment coming from Lakefield, Minn., in a tightly packed barrel came to life when thrown into a tub of water, forty-eight hours after taken out of a Minnesota lake.

Madison—The University of Wisconsin, through the extension division of the College of Agriculture, has arranged with the secretary of the Waukesha County Beekeepers' association to hold a meeting at Waukesha court-house March 8. Special attention will be given to new and up to date methods of handling bees.

Wausau—This city was unable to enlist enough men for a national guard unit, and indications are that Wausau will not be represented by Co. G, which has been in existence here since the early '80s and at different times brought much credit to Wausau. Only fifty-four members were recruited.

Ladysmith—H. C. Mihm exhibits a small lemon tree in his barber shop which contains a lemon measuring 10 1/2 inches in circumference. It is pointed out that the soil which nurtured the large lemon is Rusk county soil, without any sort of fertilizer being added.

Kenosha—Kenosha doctors raised their prices here. Night calls a. c. to cost \$5 hereafter, day calls \$3 and of fee calls \$2. This is an increase of \$1 each on day calls and of \$2 to \$3 on night calls. All doctors in the city came to an agreement on the schedule.

Mantowoc—The city has fixed a license fee of \$50 per year for the sale of malt beverages containing 1/2 of 1 per cent alcohol. No license fee is to be charged for non-intoxicating drinks that do not contain alcohol.

La Crosse—Joe Young Wolf, a La Crosse Indian, received \$750 from a New York fur dealer for the hide of a black fox that he killed on the reservation.

Mantowoc—On March 25, when the local eagle of Eagles initiates a class of 500, the lodge will be the second largest in the state, second only to Milwaukee.

Eagle River—The Dairy Dollar farm, near Eagle River, formerly owned by G. F. Sanborn, is now the joint property of Mr. Sanborn and S. D. Austin of Milwaukee. The farm has one of the largest and most valuable herds of dairy cattle in upper Wisconsin.

Menasha—Still suffering from the effects of poison gas encountered while overseas with the American expeditionary forces, Frank Koniecka, age 22, son of Stephan Koniecka, Racine street, died at an Appleton hospital.

Fond du Lac—Co-operation and uniformity of methods of conducting county fairs were discussed at a meeting of officials of county fair associations of the Fox River valley at a meeting here. A committee was named to fix their dates in the valley.

La Crosse—Punch boards with candy as prizes are not a violation of the city gambling ordinance, although punch boards offering jewelry as prizes are prohibited, according to a strange ruling which went out from the police department.

Superior—In 1917 Homer B. Corey, local lumberman, gave John Howe, Superior real estate man, a ride in his automobile. The trip ended when the automobile was driven into a train of moving box cars and both men were hurt. Mr. Howe has started suit in circuit court for \$10,000 to compensate him for loss of time, cost of doctor service and other expenses arising out of his injuries.

Chippewa—Chippewa county stands eighth, with thirty-eight herds out of ninety-four herds of seventy-one counties in the state under federal supervision, under tuberculin tests. The counties ahead of Chippewa, with herds under the test are: Winnebago 112; Waupaca, 100; Walworth, 56; Waukesha, 52; Outagamie, 43; Jefferson, 44; Barron, 43, and Chippewa, 38.

Manitowoc—Charles Best, 76, and his wife, Louise Best, 68, both of Kiel, decided after forty-four years of wedlock that marriage was a failure and in circuit court Mrs. Best was granted a decree of divorce although it was the husband who filed the papers in the petition. The court awarded Mrs. Best a division of the property in the amount of \$8,000.

Eau Claire—Dennis Blom, living near Withee, is dead as the result of an accident. While saving laths a piece of wood flew into his face, striking him in the forehead. He was able to walk unassisted to the house, but there he dropped dead. He is survived by his widow and two children. He was 33 years old.

Madison—As a souvenir of the visit of the French educational mission to the University of Wisconsin last year, Col. Reinach, chairman of the mission, has just sent to the university library a handsomely bound and illustrated copy of a work by Arsene Alexandre, on Jean Caries, the French sculptor.

Sheboygan—All saloon keepers here who paid \$200 for a retail liquor license last year, will receive a refund of \$1.66 for the five months' period from Jan. 16, 1920, to July 1, 1920, according to action taken by the council, since the licenses became void when prohibition went into effect.

Madison—The M. G. Madison Seed company, recently purchased by new interests here, has filed papers at Madison increasing its capital stock from \$150,000 to \$250,000. The company contemplates extending its business greatly and recently erected three additional green houses.

Marinette—George A. Mitcheson, Sr., has purchased the east side of Sturgeon island from the N. Ludington company. The deal includes dockage rights on the south side of the island. It is understood that Mitcheson plans to engage in the manufacturing business here.

Madison—Senator La Follette will make no public addresses during his present stay in Wisconsin, announcements of talks in the capital and elsewhere, it was declared authoritatively here. The senator's health is not the best, it was explained.

Waukesha—Eugene St. Peter, 48, a farmer living three miles from Waukesha on the Arcadian road, was found hanging from a beam in the wagon shed on his farm by his wife. He is a former Waukesha saloon keeper and teamster for the Milwaukee-Waukesha brewery.

Beloit—W. M. Van Lone, sealer of weights and measures, has resigned. He has been appointed to serve as officer in the state food department. He will have duties in the counties of Portage, Wood, Marathon, Shawano, Oneida, Langlade, Vilas and Iron.

Appleton—Capt. George Merkle, assistant city health officer, and the man who has been leading the campaign to prevent the spread of influenza here, is seriously ill, a victim of the malady.

Appleton—Because of the theft of water from the city through meter tampering in the homes, the city water department is placing seals on all meters now in use.

Watertown—H. W. Wertheimer has been elected president of the Watertown Canning company. Nearly 100,000 cases of corn and peas were packed last season.

Madison—Articles were approved by Commissioner of Banking Marshall Cousins for the new Farmers' bank of Sheldon. The capital stock is \$10,000.

Sturgeon Bay—The Hill Transportation company will operate the steamer Marquette on Green Bay and on the Sturgeon Bay run this summer.

Beloit—The Beloit common council has voted to rebate \$366.66 of the sum of \$800 each paid for saloon licenses last summer.

Superior—Democrats of the Eleventh congressional district hope to secure a plank in the state platform pledging the party to work for legislation providing for cheap dynamite to clear the cutover lands of northern Wisconsin, according to an announcement made at the district meeting held in Superior. Members of the party also advocated the purchase of TNT that is left in the possession of the government. John A. Cadigan, Superior, and W. V. Silverthorn were elected delegates to the national convention.

Elroy—The wine party which resulted in the death of Raymond Hart and Mrs. Nellie Ward of this place, will be investigated thoroughly by federal and state prohibition commissioners, as well as by Clinton Price, district attorney for Juneau county. It is alleged that the wine was brought to Elroy by Frank Borchard, Northwestern baggageman, who claims that he made the wine and used it before. The investigation will be conducted as soon as the others who participated in the party have recovered sufficiently to testify.

SOY BEAN SEED OF MUCH VALUE

Quite Essential That All Who Raise Crop Should Prevent Deterioration and Loss.

THRASHED WITH SEPARATOR

Machine Must Be Readjusted to Prevent Split Beans—Straw Obtained is Quite Valuable Feed for All Kinds of Animals.

(Prepared by the United States Department of Agriculture.)

Soy-bean seed now is of considerable value, and it is essential that all farmers who have raised it thrash and store it so as to prevent deterioration and loss.

The ordinary grain separator can be adjusted to thrash soy beans successfully, but this machine, if equipped to thrash small grains, must be readjusted when soy beans are to be thrashed, as otherwise a large percentage of cracked seed will result.

Some of the More Important varieties of Soy Beans, Several of Which Are Already Well Known to Farmers of This Country.

The chief cause of split beans is the high speed of the cylinder, which should be reduced at least one-half, although the speed of the fans and other parts of the separator may be maintained at normal.

Satisfactory Machines.

Special pea and bean separators of different sizes are now on the market. These types of machines do clean hulling and split practically none of the beans. Undoubtedly such separators are more satisfactory and economical where a considerable acreage of beans is grown. In sections where there is an extensive seed production, investment in such a machine by a community would be profitable.

Soy beans, if thoroughly dry, can easily be thrashed with a flail. If one has only a small acreage—an acre or so—this method is practical and economical. In a few sections, a corn shredder has been used to advantage in the thrashing work and where the beans are properly cured and dried, the seeds shell out readily when run through this machine.

Soy beans which have been stacked out of doors or housed in the mow previous to thrashing should be thrashed when the weather is dry and suitable for work of this character. Thrashing should not be attempted until the beans have passed through a thorough sweat and subsequently cured so that the seed is separated readily from the straw.

Valuable Feed for Stock.

The straw obtained from thrashing the soy bean for seed is a valuable feed for all kinds of live stock. In many localities the straw is baled at the time of thrashing and sold.

As soy-bean seeds spoil rather easily if not properly handled, care should be exercised in curing and storing. After the beans are thrashed they should be watched carefully to avoid heating and moulding. When thoroughly dry, there is no such danger. The best plan, according to specialists of the United States department of agriculture, is to spread the seed out on a floor immediately after thrashing and subsequently shovel them from time to time until they are thoroughly dry. The storeroom should be dry and have a free circulation of air. Soy-bean seed loses its viability rather rapidly and it is not safe to hold seed for planting purposes more than two seasons. The seeds of the soy bean, unlike those of the cowpea, are rarely attacked by weevils or other grain insects.

POTATOES NEED PLANT FOOD

Most Successful Growers Generally Make Application of Manure to Heavy Sod.

To grow potatoes successfully an abundance of plant food is required. Experiments at the Ohio experiment station show that from 10 to 16 tons of manure and from 300 to 500 pounds of acid phosphate per acre may be used with profit in fertilizing potatoes.

The application of fresh manure to the soil just before plowing is associated with the development of scab on potatoes, so that early winter application of manure is regarded as essential. The most successful potato growers generally apply manure to a good, heavy sod, preferably clover, to be plowed down in the spring.

Make Use of Legumes.

In these days when plant food is so important the greatest possible use should be made of the legumes, the greatest food producers for man and beast.

DELAY IN ORDERING LIME MAY BE FATAL

Last-Minute Deliveries Can No Longer Be Made.

Dealers and Manufacturers Should Have Advanced Information as to Farmers' Needs—Transportation is Uncertain.

(Prepared by the United States Department of Agriculture.)

Farmers probably will not be able to secure lime to meet their agricultural needs if they wait about ordering it until they are ready to apply it. Under old conditions, companies supplying agricultural lime recognized spring and late summer as the two periods of demand, and farmers have ordinarily ordered their lime at the time they wished to apply it, in order to save time and work by including hauling from the railroad station and applying to the land in one operation.

Under present conditions, lime manufacturers are no longer able to adjust their business to this practice. Owing to shortage of labor in their own plants and transportation difficulties, last-minute deliveries can no longer be made with certainty.

For these reasons the department of agriculture urges that spring needs be anticipated and that orders for lime be placed at once. Dealers and manufacturers should have advanced information as to farmers' needs so that orders can be combined and car space used to the best advantage. Delay in ordering may result in failure to obtain the lime until too late.

It is, moreover, the desire of the railroad administration that the season for delivery of lime, which has heretofore been from March to May, be extended to include the period from January to May, in order to relieve, as far as possible, the existing car shortage.

GATE IS MADE STOCK PROOF

Posts Placed 1 1/2 Feet Apart Enable Pedestrians to Pass Through—Cattle Kept Out.

A short-cut path across a field to an electric car line was blocked by the owner, who fenced it with wire and turned cattle in to graze. Since the path saved a great many steps, he received many protests. The owner gave permission to the pedestrians to put in a gate at each end of the path that would permit them to pass, but prevent the escape of cattle. This was done in the manner illustrated.

An opening was cut in the fence, 1 1/2 feet wide, a post placed on each side, and a third post midway between them, about 1 1/2 feet from the fence line. The arrangement proved to be quite satisfactory.—Werner W. Baummeister, Walla Walla, Washington, in Popular Mechanics Magazine.

TUBERCULOSIS OF CHICKENS

Science Has Demonstrated That Disease May Be Transmitted by Swine to Poultry.

Dr. C. P. Fitch, chief of the division of veterinary medicine at the Minnesota college of agriculture, states that science has shown that tuberculosis may be transmitted by swine to poultry and vice versa.

"Tuberculosis in poultry is a common disease," he says, "and it causes heavy losses. Fowls affected with it become lame, their combs lose their luster, and their flesh falls away. There is a general run-down condition. Tuberculosis can be controlled by the removal of infected birds and by a thorough cleaning up of their quarters. The disease cannot as a rule be transmitted through the eggs. Its introduction can be traced usually to infected fowls."

GREEN FEED DURING WINTER

Cabbage, Turnips, Beets or Potatoes Will Answer Purpose While Fowls Are Confined.

Green feed is necessary if best results are to be obtained with poultry, according to the Nebraska college of agriculture. During the spring, summer and fall chickens that have free range obtain enough green feed, but it must be supplied to them in winter. Cabbage, turnips, beets or potatoes will do. Potatoes and turnips do better cooked, but the others will be readily consumed raw if hung up where the chickens can reach them. Cut clover or ground alfalfa soaked in hot water makes a good poultry mash for winter.

SAVE FERTILITY OF MANURE

No Better Place to Apply Plant Food Than on Fall Sown Cover Crops or on Clover.

If stable manure of any kind is available at this season of the year there is no better place to apply it than on the fall sown cover crops, or on clover and grass sods. When thus applied, there will be practically no loss of fertility—much less than if the manure is kept in yards, especially if uncovered.

THREE YEARS WITHOUT HOPE

A Story of Sickness and Suffering with Final Return to Health. It will do you good to read it.

No matter how long nor how much you have suffered, do not give up hope. Do not decide there is no help for you. There is. Make up your mind to get well. You can. There is a remedy in which you may place full reliance as did Mrs. Rozalla Kanis of 39 Silver Street, New Britain, Conn. This is what she says: "I had cramps for three years and thought I would never be any better. I could not eat without distress. Slept with my mouth open and could hardly breathe. No medicine helped me. I had catarrh of the stomach. Now I have no cramps and am feeling well and healthy. I wish every suffering person would take PE-RU-NA." Catarrh effects the mucous membranes in any organ or part. PE-RU-NA, by regulating the digestion and aiding elimination, sends a rich, pure supply of blood and nourishment to the sick and inflamed membranes and health returns. For coughs, colds, catarrh and catarrhal conditions generally, PE-RU-NA is recommended. If you are sick, do not wait and suffer. The sooner you begin using Dr. Hartman's well-known PE-RU-NA, the sooner you may expect to be well and strong and in full possession of your health. A bottle of PE-RU-NA is the finest emergency, ready-to-take remedy to have in the house. It is fourteen ounces of prevention and protection. Sold everywhere in tablet or liquid form.

Thousands of Happy Housewives in WESTERN CANADA

are helping their husbands to prosper—are glad they encouraged them to what they could make a home of their own—save paying rent and reduce cost of living—where they could reach prosperity and independence by buying on easy terms. Fertile Land at \$15 to \$30 an Acre—land similar to that which through many years has yielded from 20 to 45 bushels of wheat to the acre. Hundreds of farmers in Western Canada have raised crops in a single season worth more than the whole work until it becomes the desired shade. Any druggist can put this up or you can mix it at home at very little cost. It will gradually darken streaked, faded gray hair, and will make harsh hair soft and glossy. It will not color the scalp, is not sticky or greasy, and does not rub off.—Adv.

Farm Gardens—Poultry—Dairying are sources of income second only to grain growing and stock raising. Good climate, good neighbors, churches, schools, rural telephone, etc., give you the opportunities of a new land with the conveniences of old settled districts. GREEN'S AUGUST FLOWER.

Constipation invites other troubles which come speedily unless quickly checked and overcome by Green's August Flower which is a gentle laxative, regulates digestion both in stomach and intestines, cleans and sweetens the stomach and alimentary canal, stimulates the liver to secrete the bile and impurities from the blood. It is a sovereign remedy used in many thousands of households all over the civilized world for more than half a century by those who have suffered with indigestion, nervous dyspepsia, sluggish liver, coming up of food, palpitation, constipation and other intestinal troubles. Sold by druggists and dealers everywhere. Try a bottle, take no substitute.—Adv.

Don't worry about perfect results. Use "Diamond Dyes," guaranteed to give a new, rich, fadeless color to any fabric, whether it be wool, silk, linen, cotton or mixed goods—dresses, blouses, stockings, skirts, children's coats, feathers—everything! Direction Book in package tells how to diamond dye over any color. To match any material, have dealer show you "Diamond Dye" Color Card.—Adv.

When General Pershing arrived in Washington after his return from France he had with him a trunk containing a mass of medals, citations and ribbons and the correspondence concerning it. Attaches of the war department were detailed to go through the material. They had not gone far when they ran across this memorandum which bore the signature of one of the general's aids and a date several months old: "The King of — was here yesterday and left a couple of medals." In the initial of the memorandum, over the initials of the C-in-C, was this penciled notation: "Write him something pretty."

One and the Same. Student, farmer, author, politician and reformer, Sir Horace Plunkett is one of the most versatile of Ireland's sons. He is very witty also. On one occasion he delivered a lecture in Dublin on the best way to improve the conditions among the poor. At that time he was not exactly a finished speaker, and then, as now, a bachelor. The day following his address he received from a lady a note which read: "What you need are two things—first, a wife; second, lessons in elocution." To this he replied: "These are only one."

The Pattern. "That woman claims she made her husband." "So she did; she made a fool of him."

Wasn't Going Into Society. Winnifred came in from the playhouse one day with the dirtiest face one could imagine. Her mother was shocked and exclaimed, "Why, Winnifred, your face is so dirty!" "That doesn't matter," said the baby, calmly, "I didn't not to go anywhere today."

The day following his address he received from a lady a note which read: "What you need are two things—first, a wife; second, lessons in elocution." To this he replied: "These are only one."

The Pattern. "That woman claims she made her husband." "So she did; she made a fool of him."

Wasn't Going Into Society. Winnifred came in from the playhouse one day with the dirtiest face one could imagine. Her mother was shocked and exclaimed, "Why, Winnifred, your face is so dirty!" "That doesn't matter," said the baby, calmly, "I didn't not to go anywhere today."

Pleasant Information. Edith—Dear Jack is so forgetful. Maud—Isn't he. I had to keep reminding him that it's you he's engaged to and not me.

When two women meet they kiss; when two men meet they don't kiss. That shows who likes kisses the best.

When General Pershing arrived in Washington after his return from France he had with him a trunk containing a mass of medals, citations and ribbons and the correspondence concerning it. Attaches of the war department were detailed to go through the material. They had not gone far when they ran across this memorandum which bore the signature of one of the general's aids and a date several months old: "The King of — was here yesterday and left a couple of medals." In the initial of the memorandum, over the initials of the C-in-C, was this penciled notation: "Write him something pretty."

One and the Same. Student, farmer, author, politician and reformer, Sir Horace Plunkett is one of the most versatile of Ireland's sons. He is very witty also. On one occasion he delivered a lecture in Dublin on the best way to improve the conditions among the poor. At that time he was not exactly a finished speaker, and then, as now, a bachelor. The day following his address he received from a lady a note which read: "What you need are two things—first, a wife; second, lessons in elocution." To this he replied: "These are only one."

The Pattern. "That woman claims she made her husband." "So she did; she made a fool of him."

CHRONIC CONSTIPATION

There are people who never have a movement of the bowels without it is produced by a cathartic. Most of them have brought that condition on themselves by the use of mineral waters and strong cathartics that take too much water out of the system and aggravate the disease they are meant to relieve. A mild laxative tonic like Chamberlain's Tablets affords a gentle movement of the bowels that you hardly realize, has been produced by a medicine, and the use of it is not to be followed by constipation.—Adv.

an' a friendly natural tobacco. Keep yo' put-on airs an' "sauced-up" tobaccos for the fellow that likes nut sunndaes better than home made pie—

So says a friend of ours named Velvet Joe. And he just about hits the nail on the head.

Velvet is made for men who think there's no smoke like real tobacco. If you are that sort of man, listen:

Velvet was born in old Kentucky, where more than one good thing comes from. It was raised as carefully as any other Kentucky thoroughbred. But the real secret of Velvet's friendly qualities is its slow natural ageing in wooden hogsheads. Ageing in the wood never hurt anything—and least of all, tobacco.

And so we say, Velvet is good tobacco—nothing more or less. It runs second to none.

The picture of the pipe on the tin needn't keep you from rolling a jim-dandy cigarette with Velvet.
