Oulja Board Sald No.

A local tobacco salesman stopped in at a combination grocery and to- ing dialogue which took place during bacco store kept by a colored woman. He spent some time trying to convince her of the merits of a brand of chewing tobacco. She was undecided whether to lay in a supply. He was very anxious to get her on his customers' list. They argued back and forth until she was almost convinced it would be good policy to carry his line. Finally she said with an air of finality: "Let the ouija board tell me what to do." The little three-legged pointer was put into commission and whether propelled by her fingers or going of its own volition, it made speedy tracks to "No." And the tobacco salesman left without the order. -Indianapolis News.

The Sure Way to Test Roofing is on the Roof

Some men think that they can tell good roofing by smelling it. Figure it out yourself. How is any man's nose going to tell him how long roofing will last and how much protection from storms, snows and rains it will give.

And protection and lasting qualities are what you pay money for.

The only sure way to test roofing is on the roof.

That is where Certain-teed Roofing has been tested by time—tested for wear tested for shelter—all over the world.

Certain-teed Roofing has never been known to wear out on the roof. It is guaranteed for 5, 10 or 15 years, according to weight.

Private Brands and Big Profits

Some dealers will try to sell you private brands of roofing, not because they are as good or better than Certain-teed, but because there is more dealer profit in them. Those profits come out of you.

Dealers make a fair profit on Certainteed, but they are limited to a fair profit because so many dealers handle it and everybody knows the price.

Don't take a gambler's chance on an unknown brand. Buy for known value at a price which is fair to everyone.

Any reliable dealer can get Certain-teed for you quickly from a nearby Certainteed warehouse or jobber. He gets it when he wants it and he gets what he wants. He can afford to sell you at a fair price.

Certain-teed Products Corporation General Offices, St. Louis

Beware of the dealer who tells you he has Certain-teed, but tries to sell you a private brand. He probably wants a bigger profit.

Make the Wost of Your Tractor Power

TRACTOR will do better and more work if it operates machines implements especially designed for tractor operation instead or noise machines. A horse plow is inconvenient to use with a tractor, whereas a self-lift power plow works with it like a one-unit machine. The same is true of harrowing. Horse harrows are all very well for harrowing with horses, but when it comes to fractor operation they are not quite as convenient as they might be.

The International Leverless Disk Harrow was designed especially to meet the need for a rugged, efficient disk harrow that could be managed by the tractor opera or withou difficulty or inconvenience, working as a one-unit outfit. The gangs are set by merely backing the tractor, the operation being automatic. They are straightened by the simple act of pulling a cord tied to the tractor seat, this operation also hing autoriatic, so the operator doesn't have to stop for the wet spots or go arour 1, but straightens the gangs by a jerk on the cord—and rolls across like a

"Government Divided Against Itself," Says Assistant Secretary Leffingwell.

PENNY WISE, POUND FOOLISH

While Country Faces Crisis, Many People Have Turned Gamblers and Wasters-Opposes Bonus and Increased Pensions.

New York, May 3.-The government of the United States "is deadlocked against itself, a government of obstruction," Assistant Secretary Leffingwell of the treasury declared in a speech before the Academy of Political science.

Failure of the government to deal in a constructive way with any one of the vital national problems he attributed largely to the fact that the government is "divided against itself." "It is at least questionable," Mr. Leffingwell continued, "whether the progress of reaction would have been so complete or so disastrous if our institutions had not given this country, a perilous journey from Viadivostok mational senator, was named providuring the most critical period of the to Paris. Capture of Juarez Opens Way for Advance on the Capital.

NO FIGHTING NEAR BORDER

Celebration Follows Revolt of Garrison -Both Campaigns Started by Carranza Failed-Federal Troops Go Over.

Juarez, Mexico, May 4.-The bloodess revolt of Juarez and capitulation of Gen. Francisco Uhbalajo and his Yaqui Indians at Casas Grandes, virtually gave to the Sonora revolutionists control of the state of Chihuahua and paved the way for an unobstructed advance against Torreon, whence a campaign is to be launched against Mexico City.

Events moved rapidly. At 2 o'clock the garrison revolted and a popular celebration followed. Federal officers unfavorable to the revolution were superseded. Abel S. Rodriguez, former sional governor.

General Urbalejo, commanding the last large body of Carranza troops in the state, joined the revolt and plans were made for an immediate advance through Chihuahua upon the interior strongholds the Carranza government still holds.

Mexican agents her persists in their assertions that furclining battle will hasten the end of their struggle.

So far as indicated by information available here, either from official or rebel sources, the two campaigns begun by Carranza have been failures. His effort to attack the Sonora troops from the state of Chihuahua has been brought to an end by the defection of every garrison in that state, and the xpedition sent from the south through the state of Jalisco to check the southward movement of rebels through the states of Sonora, Sinaloa and Nayarit has not succeeded, largely because of the harassing by small rebel groups who have been striking at the railroad extending through Guadalajara toward

In a few words she explained Dave's Morrison was all sympathy. "It's a that means-he must go in knowing big story, you know," she said, "but we won't think of it that way. Not a line, so far as I am concerned. Edith Duncan is the girl we need. sort of adopted sister to Dave. She may know more than any of us."

But Edith knew absolutely nothing; nothing except that her own heart was thrown into a turmoil of emotions. She spent the day and the evening downtown, rotating about the points where Dave might likely be found. And the next morning she called on Irene Hardy.

In spite of all efforts at self-control she trembled as she pressed the bell." She had never met Irene Hardy; it was going to be a strange experience. introducing herself to the woman who had been preferred over her and who One had apparently proved so unworthy of that preference.

She had difficult things to say, and even while she said them she must fight a battle to the death with the jealousy of her natural womanhood. And she must be very, very careful that in saving things which were hard to say she did not say hard things. And, most difficult of all, she must try to pave the way to a reconciliation between Dave and the woman who stood between her and happiness.

Irene attended the door, as was her custom. Her eyes took in Edith's face and figure with mild surprise. Edith was conscious of the process of a quick intellect endeavoring to classify her-solicitor, music teacher, business girl? And in that moment of pause she saw Irene's eyes and a strange commotion of feeling surged through her. So this was the woman Dave had chosen to love!

No: one does not choose whom one will love; one loves without choosing. Edith was conscious of that; she knew these years. And suddenly a great new truth was born in Edith Duncan. bedrock of all nature! ..

Books, magazines and newspapers are sent to these men from the American Library Association. In the larger hospitals, containing ever 800 patients, special librarians are placed. To the smaller hospitals, through the co-operation of many publie libraries, library visitors are sent to visit the wards once or twice a week and learn the book needs of the pa-

A special effort is made to supply to ex-service men in hospitals the books in demand as a result of the training given by the Federal Board for Vocational Education.

More Books for Blind.

The A. L. A., in co-operation with other agencies already interested in work for the blind, is printing books in the new Braille type. Because of Mr. and Mrs. James Foley visited at the newness of the revised Braille adopted for teaching to the American Paul Koenigs visited with friends at war blind, literature printed in it is limited to fewer than 200 books. Miss Gretchen Paas of Milwaukee Though the total number of blinded soldiers is small, their need of books Floyd Peters transacted business at is great, and the "magic of print" can do much to restore hope and useful-

Not only for former service men who are sick or disabled is the association working. The value of books proved so great to men in camps that efforts are still being made to connect discharged soldiers and sailors with libraries wherever they may be. Hundreds of letters have reached A. L. A head-C. A. Baumbach of Milwaukee was quarters from former service men telling of the lack of library facilities in Miss Irene Awe of Plymouth is a particular localities to which those men have returned.

Direct Service Provided.

In many cases there is a state library commission or a nearby library to which a man can be referred for the books he needs, but if there is no such organization through which he can be served, books for almost any serious purpose may be borrowed directly from the A. L. A. War Service, 24 West Thirty-ninth street, New York city. The only expense in connection with these loans is prepayment of return postage on books borrowed

The A. L. A. has published lists of books to help ex-service men who are studying to advance themselves in their work. "Five Hundred Business "One Thousand Technical Books" and reading courses on practical subjects are now in preparation.

Other Work Being Done.

Other branches of work which the A. L. A. War Service is carrying on include service to the Merchant Marine, Coast Guard and lighthouses, service to industrial communities which are resultant from the war, service to United States forces overseas. This work is carried on with money received from the United War Work funds, the use of which is limited by the conditions of the gift to these specific purposes.

The service of the Merchant Marine department provides free library service to seamen on American merchant ships in the form of "crews' libraries," bookcase boxes, each containing about 80 books. These libraries are exchangeable at principal ports. Books and magazines are sent also to men in coast guard stations, in lighthouses and on lightships.

Imitation of Precious Stones.

The opal is more difficult to imitate than is the diamond. But from artificial corundum, stained with chrome -Nic Tahia, aged 40 years an in- alum, real rubies can be made, and very cheaply. If the coloring agent is titanium oxide, the product becomes a genuine artificial supphire.

Value of Training.

The value of systematic physical training for executives is being recognized by industrial concerns throughout the country. It is well known that exercise for those whose work does not normally provide it makes for efficiency and little loss of time through illness

Dogs in Warfare.

Airedales are accounted one of the best breeds of war dogs. When the Airedale detects the foe he makes no fuss; he merely makes a low growl and stiffens his body-hints sufficient for the human sentinel, who immediately puts his dumb friend's advice to good

Ancient Perfume.

It seems strange to read of saffron as a perfume, but such it was almost universally, and an element of "ro mance" about it lies in the story told by Hakluyt of a pilgrim smuggling, at his staff.
