Village Board Raises Unskilled Labor Wage Scale to 45c an Hour

Kettle Moraine Sign; Start Action to Return Man; Fire Requests More Hose

Kewaskum, Wis., Aug. 4, 1941
The village board of the village of Kewaskum, Wisconsin, met in regular session with Pres. Schaeffer presiding and the following members present: Honeck, Koopman, Miller, and Van Blarcom. The board considered the report of the village engineer and the village clerk and the following resolutions were adopted:

Resolution No. 2
Resolved, that the village board of Kewaskum, Wis., do hereby raise the wage scale for unskilled labor to 45 cents per hour, effective August 1, 1941.

Resolution No. 3
Resolved, that the village board of Kewaskum, Wis., do hereby request the Kettle Moraine State Forest Association to erect a sign at the entrance to the forest, advertising the village of Kewaskum as the gateway to the Kettle Moraine State Forest.

Resolution No. 4
Resolved, that the village board of Kewaskum, Wis., do hereby request the Kettle Moraine State Forest Association to erect a sign at the entrance to the forest, advertising the village of Kewaskum as the gateway to the Kettle Moraine State Forest.

Golden Jubilee Observed by Holy Trinity Sister

Sister Humiliana, house sister at the sisters' home of Holy Trinity parish in this village many years, spent the week end at the mother house, St. Agnes convent, Fond du Lac, where on Sunday she celebrated her golden jubilee as a sister. Sr. Humiliana was one of three sisters who observed their 50th jubilees at the convent on that day. The others are Sr. Kostka of Fort Wayne, Ind. and Sr. Victoria of St. Agnes convent. Twenty other sisters celebrated their silver jubilees on the same date.

The Statesman staff is joined by the sisters and members of the parish in extending sincere congratulations to Sr. Humiliana on her anniversary marking 50 years in the sisterhood and best wishes for the future.

Sr. Georgia, one of the teachers in Holy Trinity school, returned Saturday and Sr. Amanda, the other teacher, will be back Aug. 16 prior to the opening of school early next month. Both sisters, who were gone during the summer, also taught here the last school term.

Sr. Georgia was accompanied by her cousin, Sr. Vincenza, C. S. A., of Nanty Glo, Pa., who will spend the remainder of the summer vacation here. Sr. Isabella and Clementine returned to St. Agnes convent, Fond du Lac, after being in charge here during the summer up to this time.

Visitors spending this week at the sisters' home are Sr. Mary George, S. C., of Blessed Sacrament Cathedral, Altoona, Pa., Sr. Rita Vincent, S. C., of St. Philip's convent, Crafton, Pa., and Mrs. Della Henderson, Cleveland, Ohio, mother of Sr. Rita Vincent.

It's Sergeant Otto Weddig Now Instead of Corporal

In a letter this week information was received by Mr. and Mrs. John Weddig of this village that their son, formerly Corporal Otto Weddig, of McDill field, Tampa, Fla., has been promoted to the rating of sergeant. The order that he had been promoted came on Aug. 1 and gives the young man another increase in pay. The increase gives him a salary that is very good for a fellow in the army according to the new sergeant.

Sergeant Weddig writes that he is now in charge of the first platoon and the way it is run depends on him. He is now in command over corporals and the only one he takes orders from are officers. He continues that there still are higher ratings and he is going to keep on working and trying to get the next highest rating but it will take lots of hard work and good thinking to do it.

It was 11 months on Aug. 5 since Weddig enlisted, so in another month he will have completed his first year in the army. He writes that he never dreamed he would be a sergeant in 11 months and that it sure didn't seem that long to him because things happened every day and the time flew.

In his letter Otto states that the U. S. O. (now sponsoring a campaign for funds and asking all to give) is doing a lot for the boys down there. The U. S. O. sponsors boat rides, swimming parties and other dances a few nights a week. By going to these affairs Otto has become a member of a bowling team which bowls once a week. Doing his other duties keeps him busy.

Recently Sergeant Weddig met a former roommate of 2nd Lieut. Lehman Rosenheimer, Jr. of this village now stationed at Barksdale field, Shreveport, La., while the two were attending Wayland academy at Beaver Dam. This roommate was very surprised to learn that Lehman was now a second lieutenant in the army air corps.

KEWASKUM MOTHER HAS TWO SONGS PUBLISHED

Announcement has been made by The Exposition Press, New York publishers, that Mrs. Clara Krueger of Route 2, Kewaskum, recently had two songs accepted for immediate publication. The songs are "Nelle" and "Spring Music." Chosen from prize contest entries, the songs will be published in the forthcoming volume "Outstanding Songs—Poems and Lyrics." Mrs. Krueger attended the Kewaskum graded school and is the mother of five children. The Kruegers live on an 80-acre farm near Kewaskum.

PRIESTS HERE ON VISITS

Rev. Sylvester Harter, O. S. B., of Shawnee, Okla., who visited his mother, Mrs. Catherine Harter, at St. Agnes hospital, Fond du Lac, and relatives and friends in northern Wisconsin and at St. Killian the past few weeks was a Kewaskum caller Tuesday for a brief visit with relatives and friends. Rev. Peter Schaeffer of Tulsa, Okla., spent a short vacation the past week with his brother, John S. Schaeffer, and family in the town of Auburn and other relatives and friends.

SCHOOL BEING PAINTED

Painters were at work all during the past week washing and painting the school rooms and halls in Holy Trinity Parochial school. Plastering was also done to improve the ceiling and walls in places and other improvements were made. The work was done by Wm. Metz, Wm. Ogenorth, Alex. and Sylvester Keller.

Miss Stoffel, Edith Brooker are Brides

KERN-STOFFEL

Miss Crescence Stoffel, daughter of Mr. and Mrs. Simon Stoffel of Milwaukee, residents of the town of Kewaskum until the past few years, was married to Paul Kern, son of Mrs. Joseph Kern of Milwaukee on Saturday, Aug. 2, at 9:00 o'clock at St. Catherine's church, Milwaukee. The ceremony was performed by Rev. Roman Stoffel of Sheboygan, brother of the bride, followed by a solemn nuptial high mass sung by Rev. Clarence Stoffel of Cross Plains, also a brother of the bride, and assisted by Rev. Peter Flasch, pastor.

The bride, given in marriage by her father, was attired in a princess style gown of ivory satin fashioned with a charmingly lace yoke, sweetheart neckline, long fitted sleeves and a satin train. Her fingertip veil fell from a tiara of pearlized orange blossoms. She carried a corsage of Easter lilies, white Finch roses and bouvardia.

Mrs. Lawrence Schmitt attended her sister as matron of honor. She was gowned in a dusty pink starched marquisette frock, cut with a high neckline, ruffles outlining the lace yoke, and wide lace hand in the full skirt, matching her wide brimmed hat. Trimmed with violet velvet streamers was her arm bouquet of pink roses, blue delphinium and violet asters.

Dr. Theodore Kern of Richfield was best man and Frank Kern and Lawrence Schmitt were the ushers.

After a trip through northern Wisconsin the newlyweds will make their home in Watwatsa.

The bride is a graduate of the Marquette School of Nursing, Milwaukee, and was employed as a nurse for the Wisconsin Telephone Co. with whom her husband is associated.

SCHMIDT-BROOKER

In a private wedding ceremony performed at the Mission House, Franklin, on Wednesday, July 30, which came as a surprise to their friends, Edith Brooker of this village became the bride of Harvey W. Schmidt, only son of Mrs. Ida Schmidt of Campbellsport. The Schmidts are former residents of Kewaskum.

Mr. and Mrs. Schmidt are enjoying a wedding trip of a week and a half and are expected to return this week end. The couple will make their home in Campbellsport where the bridegroom is employed at the Jaeger garage. The bride was manager of the Kewaskum Beauty Shoppe before her marriage. Her place at the shop has been taken by Miss Eleanor Schief of this village, who formerly was at the Campbellsport Beauty Shop.

TWO MORE HOMES GOING UP HERE MAKES SEVEN IN ALL

Excavation was completed last week on the new home of Louis Schaefer on his lot on North avenue between his present home and that of P. J. Haug. Alvin Voigt and crew did the excavating and this week Schaefer Bros. and their crew of carpenters of Campbellsport began building. Mr. and Mrs. Schaefer intend to occupy the new home when completed and rent their present structure.

Work is also progressing on the new home being built by Reuben "Booby" Schaefer just north of the village limits near the August Schaefer home. This makes seven new buildings for Kewaskum thus far this summer. Besides the above homes houses are being put up at present for Wm. Schaub, Carl Mellahn, Wm. A. Backhaus and K. A. Honeck and a locker plant is being erected by Sylvester Harter.

WEST BEND HOSPITAL TO HAVE FREE CHEST CLINIC

A free chest clinic will be held at St. Joseph's hospital, West Bend, instead of the court house as has formerly been the custom, on Wednesday, Aug. 13. This change is for the purpose of using the fluoroscope for better diagnosis. The fluoroscope is a type of x-ray with fluorescent screen but no film is used and no picture is taken. The patient stands behind the screen and the doctor studies the shadows of the chest area which he sees on the screen. Diseased areas if present are usually detected by the doctor.

The clinic will be conducted by Dr. K. P. Hoel, supt. of the Oak sanatorium, Pawaaukee, under the auspices of the Washington County Board of Supervisors. Clinic hours will be from 9 a. m. to 3:30 p. m.

Will these people planning to attend the clinic call for an appointment to avoid waiting? They may call West Bend 314-R.

FREE BAND CONCERT

Saturday evening, August 9th, on the vacant lot just west of the Miller Electric store on Main street.

SPECIAL NOTICE: Beginning next Wednesday evening, Aug. 13th, the band concerts will be held on Wednesday instead of Saturday evenings. On this evening cash awards will be given to the holders of the lucky slips. Winners must be present to receive prize. Deposit your slips with your local businessman, who hands them out. No slips to children

William Schneider, Mrs. Roepke, 91, Die

WILLIAM SCHNEIDER

William Schneider, 72, widely known farm resident of the town of Kewaskum, passed away at 4:30 a. m. Friday, Aug. 1, at St. Agnes hospital, Fond du Lac, after an extended illness of ten weeks. Brief announcement of his death was made last week.

Born, Nov. 1, 1868, in the town of Kewaskum, Mr. Schneider resided there throughout his life on the Schneider homestead located a mile north of St. Michaels. He was unmarried. Surviving are a brother, Peter Schneider, of the town of Kewaskum; four sisters, Mrs. Herman Volz of West Bend, Mrs. Jake Roden of the town of Farmington, Mrs. Nic. Volz of Kent, Minn., and Mrs. Joe Schladwiler of Farmer, So. Dak., and nieces and nephews.

Funeral services were held on Monday, Aug. 4, at 8:45 a. m. from Miller's Funeral Home in this village and at 9:30 a. m. at St. Michael's Catholic church, St. Michaels. The Rev. A. J. Klapoetke, pastor, officiated and Revs. Herrieges and Hausmann were also present in the sanctuary. Interment was in the parish cemetery.

Deceased was a member of the Holy Name society of St. Michael's church, the members of which attended the services in a body.

Pallbearers were Andrew and Joe Roden, Carl, Joe and Christ Schneider and Orin Conrad.

Mr. Schneider was held in high esteem by his numerous neighbors and friends and his death is a loss to the community. To the bereaved survivors our sincere condolences are expressed.

CARD OF THANKS

We wish to extend our most grateful thanks to our relatives, neighbors and friends for their kindness and sympathy shown us in our bereavement, and the loss of our dear brother and uncle, Wm. Schneider; especially Revs. Klapoetke, Herrieges and Hausmann, the choir and organist, pallbearers, drivers of cars, for the floral and spiritual bouquets, the members of the Holy Name society, traffic officer, Millers, the funeral directors, and all who showed respect by attending the rites.

Brothers and Sisters
Nieces and Nephews

MRS. FRANK ROEPKE

Mrs. Frank Roepke, 91, sister of Mrs. Henry Backus of Kewaskum, died at the home of her niece, Mrs. George E. Rau, daughter of Mrs. Backus, at Watertown on Monday, July 28, at 4 p. m. She had made her home with Mr. and Mrs. Rau for the past two years. On June 20 she fell and fractured a hip and had been confined to her bed since. This injury, coupled with her advanced age, caused her death.

Mrs. Roepke was the former Paulina Bon. She was born in Germany Dec. 12, 1849 and came to this country with her husband. They lived first in Poughkeepsie, N. Y., where they remained for a year. For the past 66 years she had lived in the vicinity of Watertown. Mr. Roepke died 13 years ago.

Surviving are two sisters, Mrs. Backus here and Mrs. Wm. Boettcher of Milwaukee and two brothers, Fred Bonn of Mylo, N. D. and Albert Bonn of Waukesha.

The funeral was held Thursday, July 31, at the Nowack funeral home, Watertown, at 2:30 p. m. The Rev. Wm. A. Eggert of St. Mark's Luth. church officiated and burial was in Oak Hill cemetery, Watertown.

Those from this village attending the funeral included Mrs. Henry Backus and family, Mr. and Mrs. Frank Heppel and daughter Ruth, Mr. and Mrs. Edwin Backus and children.

GEORGE MARSHMAN

George Marshman, native of the town of Farmington, passed away Friday afternoon, Aug. 1, at his home in Plainville, Minn. He had been in poor health for some time.

Mr. Marshman was born on the Marshman homestead in the town of Farmington on Sept. 15, 1865. He went to Minnesota in 1895 and took up farming. He remained unmarried. Deceased retired from farming 12 years ago and moved to Plainville. Surviving are a sister-in-law, a number of nieces and nephews, and a large host of friends.

Funeral services were held Sunday afternoon at 2:30 from the home and then were conducted by the Rev. Schoewe at the Plainville church. Burial took place in the Greenwood Prairie cemetery. Those attending the funeral from this vicinity included Oscar Marshman and sister Cora, Mrs. Chas. Eisentraut and son Earl of Boltonville.

People Suffer Minor Injuries in Crashes

"Bud" Schwind of Boltonville, brother of Jos. Schwind of this village, sustained a badly lacerated ear and cuts and bruises about the head when he missed a curve and the 1941 Chevrolet coupe he was driving left the road, ran down a steep embankment and struck a tree on a town road about 2 1/2 miles south of St. Michaels early Monday morning. Two lady companions suffered minor injuries. Miss Virginia Schultze of Batavia sustained bruises and the loss of several teeth while Miss Rosemary Yearling of Boltonville received a moderate brain concussion. All were treated by a local physician.

Schwind was passing over a hill and was unable to see the sharp curve just over the hill until it was too late to make the turn. The machine went through a fence and luckily didn't tip over going down the embankment. The front of the car was badly damaged where it struck the large tree. One of the young ladies was thrown from the car and the other two occupants were thrown to the right side and against the windshield. Schwind's head shattered the windshield, causing his injuries.

Lucille Stec, Chicago, sustained minor injuries at about 8:55 a. m. Sunday when a car in which she was a passenger collided with another driven by John N. Bremser, Kewaskum, R. 1, at Armstrong Corners at the intersection of State Highway 67 and County Trunk B. Miss Stec was riding in a car driven by D. W. Prindaville, Chicago.

Two Families Move Out, One Other Into Village

Mrs. Catherine Haug, her daughter, Mrs. Roman Strupp and three children, James, Jeanne and Monica, this week moved from their home on the River road near the north village limits to Oshkosh. Mrs. Strupp will operate a rooming house for girl students of the Oshkosh State Teachers college, similar to the one operated by her sister, Mrs. Olga Muenk, former teacher here, who has been in Oshkosh the past two years. Mrs. Haug left Sunday while Mrs. Strupp and daughters left Thursday. James, who has a job in that city, left Wednesday evening. Mr. Strupp will remain here to operate his farm in the town of Kewaskum. Jeanne expects to attend the college this fall. The home and property owned by the Strupps here is for rent and is advertised elsewhere in this paper. The Strupps and Mrs. Haug have been lifelong residents of Kewaskum and the people here deeply regret to see them leave.

Mr. and Mrs. Eldon Jewson and baby moved from the upper flat of the Edwin Backus home in the village to Fond du Lac Sunday where the former has secured a position with a concern. Formerly employed at the Kewaskum Aluminum Co., Mr. Jewson and family lived here the past couple of years.

Mr. and Mrs. Ray Erickson and three children last Sunday moved from Tigerton, Wis. into the unoccupied flat in the Fellenz home on Fond du Lac avenue across from the N. W. Rosenheim residence. Mr. Erickson is employed by the West Bend Transit Co.

Mrs. D. Perkins and family are at present moving from the flat above the Gamble store on Main street into the Mrs. Neal Schmidt home across the street and a few doors west to reside. Mr. Perkins left last week for Whiting, Ind. where he is employed by a Mr. Sprout, a friend of his, who conducts a trucking business.

ANDREW MARTIN

John H. Martin of this village received notice on Wednesday of this week that his cousin, Andrew Martin, of Prairie du Chien passed away on Tuesday, Aug. 5. He is survived by his second wife, three sons, one brother and a sister.

Mr. and Mrs. George Martin of Big Cedar lake, accompanied by Mr. and Mrs. John Martin and Mrs. Ida Ramthun, left Thursday morning to attend the funeral which was held the same day at the Lutheran church at Bloomer, Wis., at 2 p. m., the Rev. Baer officiating. Burial was at Bloomer. Deceased was a nephew of Mrs. Ramthun and also a cousin of George Martin. He visited in Kewaskum frequently.

PLAY AT KOHLER SUNDAY

The Kewaskum team will resume league action this Sunday, Aug. 10, at Kohler. A victory will put the locals in undisputed third place. The boys beat Kohler once and hope to repeat but will have a job on their hands. This should be a tough battle. On the following Sunday Kewaskum plays its last home game of the season against Glenbeulah. Follow the gang to Kohler! Fans have been looking forward to this game.

PAPER HAS SUPPLEMENT

Included with the Statesman this week is a supplement containing the text of the new proposed Washington county zoning ordinance. This ordinance will be recommended to the county board but first a public hearing will be held in the court house, West Bend, Monday, Aug. 11, which is open to the public. Louis Ogenorth, Kewaskum, is a member of the park commission.

PEACE EVANGELICAL CHURCH

Welcome to Sunday school at 8:45 a. m. with an informal service at 9:30 a. m. and German service at 10:00 a. m. Richard M. A. Gadow, Pastor

Plymouth Wins by 4-1 in Inter-League Game

GAMES THIS SUNDAY

KEWASKUM AT KOHLER
Campbellsport at Adel
Glenbeulah at Cascade
Waldo at Sheboygan Falls

In an inter-league game at Plymouth Sunday, the strong Plymouth Cheesemakers of the Eastern Wisconsin loop defeated the Kewaskum nine of the Kettle Moraine league, 4 to 1. This was one of 8 games played by the 16 teams of the 2 circuits in an inter-league challenge. All league games were postponed until the end of the season to make this event possible.

In other games Cascade (K-M) beat Elkhart Lake (E-W) and Hilbert (E-W) won over Waldo (K-M) by 6-2. Results of the other contests were not reported. The games were Kohler (E-W) at Campbellsport, Adel at New Holstein, Valders at Kohler (K-M), Glenbeulah at Marytown and Kiel at Sheboygan Falls. The teams in the Kettle Moraine circuit met the clubs in the same standing in the Eastern Wisconsin loop.

Kewaskum's game against Plymouth was tighter than the score shows. The score should have been 2-1 in the pitcher's duel. One of the winners' runs resulted from an error and one from a lucky break. Honeck and Koopman, who has had tryouts with big teams playing every day ball, tangled on the mound. Honeck allowed 9 hits to Koopman's 6 and had 6 strikeouts to Koopman's 7. The team hit Koopman hard but couldn't "hit 'em where they weren't." Eight Kewaskum batters flew out. Nearly all of these were line drives or long, high flies but were hit right at the fielders or were high enough so that the fielders had a chance to make catches.

The Cheesemakers scored 2 runs in the second, 1 in the fifth and 1 in the seventh. Kewaskum's lone tally was scored in the ninth. In this inning Harbeck led off with a single, Theusch forced him at second, H. Marx singled Theusch to third and he scored on an error. Prost hit a line drive to right center with two on, caught by O'Connell on a running stab. Had he missed the score might have been tied. Miller and Pikel, who formerly caught for Sheboygan in the State league, led the winners' hitting while Lautenbach, University of Wisconsin basketball star, shone in shortstopping. Kewaskum would like a return game after the season.

ANNUAL PICNIC AND DANCE

The annual picnic and dance at Boltonville will be held Sunday, Aug. 10. McMaster street parade at 1 o'clock headed by the Random Lake High school band, which will also furnish concert music in the afternoon. Dance music by the Ke-Wayne orchestra. Three free acts by a magician in the park in the evening, also singing and dancing specialties and music. Not a dull moment. Be sure to attend. 7-25-R Boltonville Firemen & Woodmen

The Kewaskum Band

It was disappointing at last Saturday night's band concert to see only about 20 members of a 35-piece band present to play. Village organizations such as the Businessmen's association, firemen and Woman's club, as well as the village board and individuals have done much to organize, maintain and improve the band. They have purchased uniforms, music, instruments. A spacious new band stand has been erected in the village park, another portable one is to be built; the businessmen have given their hard earned cash to sponsor the concerts and now are giving an additional \$10 a week toward prizes. There isn't much more they could do.

Harry Furlong, the director, has worked hard for the band, giving up much time and energy. He comes from Oshkosh twice a week for rehearsals and concerts. Therefore it is hoped the "kids" will do their small part by settling down and taking their music seriously and mainly by being present at concerts as well as rehearsals so that more new band numbers might be taught them. They are only required to put in a couple of hours a week.

Businessmen Change Band Concert Night; To Give Cash Prizes

Will Put Up "Gateway to Kettle Moraine State Forest" Sign, Erect Portable Band Stand

At a meeting adjourned from Tuesday evening, July 29, the Kewaskum Businessmen's association met in the village hall Tuesday night, Aug. 5, with President John Marx presiding and approximately 20 members present.

The committee on the erection of a sign advertising Kewaskum as the "Gateway to the Kettle Moraine State Forest" met with the village board on Monday evening, Aug. 4, and the board agreed to appropriate sufficient funds to defray the cost of one sign to be put up over Highway 55 at the south limits of the village. It was agreed to erect the sign conforming with the new signs being erected by the Wisconsin Conservation Department.

A committee of three—Clifford Stautz, Wm. F. Schaefer and Charles Miller—was appointed to erect a portable band stand at the earliest time possible. The stand will be used for the regular band concerts and will be moved to different places for the concerts.

It was moved by Dr. R. G. Edwards and seconded by E. M. Romaine that the band concerts be changed from Saturday to Wednesday evenings for the remainder of the season. This motion was carried and starting next week the concerts will be on Wednesday evenings. However, there will be a concert on Saturday evening this week, which will be the last on that night.

Motion was made by Paul Landmann and seconded by Harvey Techtman that a sum of \$10.00 be drawn from the treasury of the Businessmen's association to be given in cash prizes at each concert. The motion carried. A committee of three—Carl F. Schaefer, Norbert Becker and Edward Miller—was appointed to take care of all matters regarding the publicity of awarding cash prizes and the distribution of tickets to all the merchants in the village who are members of the association.

A \$5.00 first prize and \$5.00 in other prizes will be given at each Wednesday night concert starting next week. Free tickets on the prizes are given by all the local businessmen. Simply ask for them, sign your name, and be present at the drawing on the night of the concert. If your name is called and you are present, you win a prize. The giving of prizes and changing of the concerts to Wednesday nights will be undertaken as a special inducement to attract people into town that evening as the attendance at Saturday night concerts was not too large.

Although not put into a motion at the meeting the matter of having out of town bands from neighboring cities play at the concerts was also talked over by the members.

A Serial Every American Should Read

ATTACK ON AMERICA

BY GENERAL ARVED WHITE

INSTALLMENT FIFTEEN

and Bravot, two enemy officers, but his warnings had gone unheeded. Foreign forces led by Van Hasek pushed relentlessly forward. His troops were vastly superior in numbers and equipment to the American forces which opposed him. Returning to New York, Benning

that set the earth shaking under them. "In spite of hell and high water!" he concluded as the room cleared of vibrations. "I'll take me days to straighten out this tangle and it'll only take Van Hasek a few hours to run up here with his motorized and mechanized outfits!"

"General Hague probably has told you, sir," Flagwill said, "that we've got to hold on this line. The country is in an uproar and everyone in Washington, sir, feels we've got to have a victory."

"Sure we've got to hold!" Lannes raged. "But don't forget that fifty thousand men are fifty thousand soldiers only when they're shaken down, organized, supplied, and ready to fight."

The Army commander stalked to a wall map and pointed to his dispositions and immediate plan of action. "Mole is taking an artillery lacing at this minute, which means attack on him at daybreak. With the reinforcements I've sent up, he must hold on the Colorado as long as possible. Then he's got to fight delaying actions and make another desperate stand behind the Brazos. Somehow Mole must delay Van Hasek at least three days, maybe for a week, until I can get in shape to take the enemy on here in front of Dallas. It's going to cost us a lot

of men, Flagwill, a lot of men! But I want you to go out and see the situation for yourself - and tell Hague why I'm forced into these desperate delaying actions out in front!"

An hour of patient driving put Flagwill down the Army's projected front. Whole regiments stood about in the dawn, still waiting for orders and supplies. The men were tired and hungry. Shortage of ammunition was general, even in the infantry. Ammunition was reported available at the railhead, but the railhead was swamped with demands and there were insufficient truck trains at present for all purposes.

As the sun shot over the horizon, Flagwill turned back to the Lannes command post. Squadrons of American combat planes had combed the air of Van Hasek's night hawks and the day had quieted down to a rumble of artillery columns and hum of friendly planes.

Given a day or two, Flagwill concluded, the hastily assembled Third Army would shake itself down. American ingenuity somehow would overcome the shortages of the uncoordinated staffs, the obsolete-ordnance, the lack of training in team-play of higher units. At least the officers had sound academic training in the science of war.

General Lannes, his face flushed and harried, his eyes distended, sat feverishly at the end of a field telephone as Flagwill re-entered the command post. After a staccato, fretted exchange he hung up the receiver and got to his feet.

"Van Hasek is driving at Mole. With everything he's got this morning!" Lannes roared. "Only the regiments I sent up to him last night kept Mole from being cracked up early this morning. Says he'll be lucky to hold on till nine. My God, Flagwill, this mess is going to cost us five thousand men, maybe ten!"

By eight o'clock, Mole saw he could hold no longer. Ghostly losses were multiplying, his flanks were threatened. Now the American air service held the supremacy of the air immediately over the heads of Mole's troops, which made possible the dangerous operation of daylight withdrawal.

"I'm pulling out of here now, Lannes!" he shouted fiercely over

the field telephone. "I can't hold another minute! I hope you have strong reinforcements for me at the Brazos."

"All right, Mole, use your own judgment," Lannes retorted. "But no matter what it costs, we've got to delay Van Hasek until I can get my Third Army ready to stop him!"

Benning woke from a brief fretful sleep and went to a porthole. There was a bright sun rising across a smooth sea. He calculated from the speed of the freighter that the craft must be well down the coast of Virginia, perhaps off North Carolina and not far from Cape Hatteras. For a time last night he had flirted with the desperation of jumping overboard on the chance of making shore. Now he had given up hopes of being rescued by the Navy.

He was mulling at the porthole when a figure passed along the deck close to his eyes. The fellow wore a black mustache, dark hornrimmed glasses, his clothes were seedy and his shoulders sagged. But the profile was not to be mistaken. "You knew Bravot was aboard?" Benning said to Fincke.

The Austrian hotly admonished. "Don't talk so much, Bromlitz! How many times have I got to tell you not to mention names?"

"I thought we were clear of all that trouble," Benning retorted. "Not with a brand-new crew on the boat. We still got to watch our tongues."

"You think these sailors aren't Bravot's men?" "Just use your brain, Bromlitz. Sailors wouldn't hardly sign up to get blown to hell, if they knew the score."

"I presume," Benning sneered, "the captain and crew don't even know what their cargo is?" "The skipper knows, and a few of his good men. For two years Schmolz has been laying his plans for just this cruise."

unearthed a vast spy ring. Benning continued to pose as a friend when he unexpectedly met Fincke in Washington, and accompanied him on a mysterious mission which took them aboard a small boat in the New York harbor. Now continue with the story.

the field telephone. "I can't hold another minute! I hope you have strong reinforcements for me at the Brazos."

"All right, Mole, use your own judgment," Lannes retorted. "But no matter what it costs, we've got to delay Van Hasek until I can get my Third Army ready to stop him!"

Benning woke from a brief fretful sleep and went to a porthole. There was a bright sun rising across a smooth sea. He calculated from the speed of the freighter that the craft must be well down the coast of Virginia, perhaps off North Carolina and not far from Cape Hatteras. For a time last night he had flirted with the desperation of jumping overboard on the chance of making shore. Now he had given up hopes of being rescued by the Navy.

He was mulling at the porthole when a figure passed along the deck close to his eyes. The fellow wore a black mustache, dark hornrimmed glasses, his clothes were seedy and his shoulders sagged. But the profile was not to be mistaken. "You knew Bravot was aboard?" Benning said to Fincke.

The Austrian hotly admonished. "Don't talk so much, Bromlitz! How many times have I got to tell you not to mention names?"

"I thought we were clear of all that trouble," Benning retorted. "Not with a brand-new crew on the boat. We still got to watch our tongues."

"You think these sailors aren't Bravot's men?" "Just use your brain, Bromlitz. Sailors wouldn't hardly sign up to get blown to hell, if they knew the score."

"I presume," Benning sneered, "the captain and crew don't even know what their cargo is?" "The skipper knows, and a few of his good men. For two years Schmolz has been laying his plans for just this cruise."

The door of their cabin banged suddenly open. A chunky man with a squarish, rough-hewn, leering face swaggered in. The fellow wore a dirty cotton suit and an officer's cap, and bristled with authority and short temper.

"Who are you two?" he demanded, searching first Fincke's face, then Benning's.

The Van Hasek spy leaped to his feet and gave the identification formula. Benning was more leisurely in rising to identify himself. He guessed that the intruder was Schmolz, skipper of the ship.

"Don't like your looks!" the fellow blurted, fixing Benning with glinting green eyes.

"Don't worry about him, Captain," Fincke promptly intervened. "He's a major—the two of us been working together in the United States."

Schmolz rubbed a cauliflowered ear ruminatively and gave Benning a parting glare in which there was mingled distrust and dislike.

"Major or no major, there's something about your looks I don't like," he grumbled.

Their noon meal was brought in by an American deckhand, Grimes. After luncheon, Fincke went out on deck for exercise. With the complication of Bravot's presence on the ship, Benning knew he must keep to cover during daylight. Also that he must strike against the Van Hasek spy master without delay if he expected to survive this cruise for many days.

Benning sweltered in the torrid little cabin through an insufferable day. With full darkness he examined the mechanism of his automatic pistol and went out on deck. As he suspected, Bravot was living in the captain's quarters. Looking in the porthole he saw Bravot sitting alone on his berth, his face cold and imperturbable as he listened to the news from the Texas front.

Blare of the radio blotted out other sounds on the deck and Benning was not conscious of the figure driving down on him along the dimly lighted deck until stout fingers closed on the lapel of his coat.

He turned to see Schmolz glaring at him out of eyes that seethed with rage.

"See here, Schmolz!" Benning shot back hotly. "I'm not one of your deckhands. Take your hands off my coat! If you object to my listening to the war news over your radio, why don't you post an order to that effect?"

Household Hints

by Lynn Chambers

GOLDEN-RIPE JUICY PEACHES FOR LUSCIOUS JELLY

(See Recipes Below)

IT'S CANNING TIME With food taking on a greater than ever importance under the national defense program, you'll want to make a thoughtful selection for stocking a shelf of extra good jams and jellies for later use.

When winter comes you'll glow with deep satisfaction over your canning efforts of the summer.

Since a record breaking peach crop, the third greatest in the history of the country, is expected, plan to put up many, many jars of this golden ripe fruit, not only as jam, jelly, or marmalade, but as conserve combined with other fruits.

"Ripe Peach Jelly. (Makes 6 medium sized glasses) 2 1/2 cups juice 3 1/2 cups sugar 1 box powdered fruit pectin To prepare juice, pit and crush thoroughly (do not peel) about 2 1/2 pounds fully ripe peaches. Add 1 cup water, bring to a boil and simmer, covered 10 minutes. Add a few peach pits, crushed, to mixture while cooking. Place fruit in a jelly cloth bag and squeeze out juice.

"Peach Marmalade. (Makes 11 small glasses) 4 cups prepared fruit 7 1/2 cups sugar 1 bottle fruit pectin To prepare fruit, peel off the yellow rind of 1 medium orange and 1 medium lemon with sharp knife, leaving as much of the white part on the fruit itself. Put rinds through food chopper twice. Add 3/4 cup water and 1/2 teaspoon soda, bring to a boil and simmer covered 10 minutes.

Cut off the tight skin of the peeled fruit and slip the pulp out of each section. Add pulp and juice and the juice of an additional lemon to the rind, simmer, covered 20 minutes. Peel 1 1/2 pounds of ripe peaches. Pit, grind or chop fine. Combine with fruit. Mix sugar and fruit, place in a large kettle. Bring to a boil, boil gently 5 minutes. Stir constantly while boiling. Remove from fire, stir in bottled pectin. Then stir and skim by turns for 5 minutes to cool slightly and prevent floating fruit. Pour quickly and paraffin at once.

Peel 1 1/2 pounds of ripe peaches. Pit, grind or chop fine. Combine with fruit. Mix sugar and fruit, place in a large kettle. Bring to a boil, boil gently 5 minutes. Stir constantly while boiling. Remove from fire, stir in bottled pectin. Then stir and skim by turns for 5 minutes to cool slightly and prevent floating fruit. Pour quickly and paraffin at once.

Peel 1 1/2 pounds of ripe peaches. Pit, grind or chop fine. Combine with fruit. Mix sugar and fruit, place in a large kettle. Bring to a boil, boil gently 5 minutes. Stir constantly while boiling. Remove from fire, stir in bottled pectin. Then stir and skim by turns for 5 minutes to cool slightly and prevent floating fruit. Pour quickly and paraffin at once.

Peel 1 1/2 pounds of ripe peaches. Pit, grind or chop fine. Combine with fruit. Mix sugar and fruit, place in a large kettle. Bring to a boil, boil gently 5 minutes. Stir constantly while boiling. Remove from fire, stir in bottled pectin. Then stir and skim by turns for 5 minutes to cool slightly and prevent floating fruit. Pour quickly and paraffin at once.

Peel 1 1/2 pounds of ripe peaches. Pit, grind or chop fine. Combine with fruit. Mix sugar and fruit, place in a large kettle. Bring to a boil, boil gently 5 minutes. Stir constantly while boiling. Remove from fire, stir in bottled pectin. Then stir and skim by turns for 5 minutes to cool slightly and prevent floating fruit. Pour quickly and paraffin at once.

PATTERNS SEWING CIRCLE

just it to give yourself plenty of leeway for reaching, stretching, sweeping, dusting and so on. This design (No. 1360-B) is simple to make and it really is necessary to a busy day.

Checked gingham, flowered percale, plain-colored chambray or seersucker all look very attractive made up like this, with braid and buttons to match or contrast. You'll enjoy following the pattern which includes a sew chart.

Barbara Bell Pattern No. 1360-B is designed in sizes 12, 14, 16, 18, 20 and 40. Corresponding bust measurements 30, 32, 34, 36, 38, and 40. Size 14 (32) requires 3 1/2 yards of 35-inch material with nap; 2 1/2 yards edging. Send your order to:

SEWING CIRCLE PATTERN DEPT. Room 1324 Chicago 311 W. Wacker Dr. Enclose 15 cents in coins for Pattern No. Size Name Address

Up 25,661 Feet Afoot Nanda Devi, a 25,661-foot summit of the Himalayas, is the highest mountain ever climbed by man, says Collier's. Although encircled by almost insurmountable peaks which have frustrated the best mountaineers for 50 years, it was reached by an expedition consisting of four Americans and four Englishmen on August 29, 1936. No oxygen was used, despite the fact that unconsciousness usually occurs at 22,000 feet.

HERE'S one of those very satisfying everyday dresses that's decidedly out of the ordinary in charm and practicality. The lines are really as good as those of your favorite afternoon dress. The skirt sweeps, from a high, small waistline, to a flare that ensures working comfort and looks pretty besides. You can draw the waistline in as slim as you please, by means of the back-tied sashbelt—and ad-

ple butter fills the bill and uses much less sugar than jams and jellies. (Makes 6 pints) 4 quarts cooked and sieved apples 2 cups sugar 1 teaspoon cloves 1 teaspoon allspice 1 1/2 teaspoons cinnamon 6 cups sugar 2 cups cider vinegar Combine apples, 2 cups sugar, and spices; cook until thick. Add remaining sugar and vinegar. Cook until thick, stirring constantly. Pour into hot sterilized jars and seal immediately. This may also be cooked in a pressure cooker or in the oven to prevent sticking.

Since some fruits do not convert into jelly easily, a commercial pectin is usually employed to make the fruit jelly properly. Often fruits which jelly easily, that is, those which have sufficient pectin in themselves are used in combination with fruits which do not. Crabapples, unripe grapes, currants, gooseberries, cranberries, quinces, huckleberries, and blackberries jelly well. If enough of them are not used in the combination, better use the pectin and play safe.

Conserves ought to have a place of honor on the canning shelf for there's nothing quite so yummy as these sweet, jamlike mixtures of several fruits delightfully enhanced by nuts, meats and raisins. Serve them forth on relish trays or as garnish on meat platters and they'll make a delicacy of the most humble meal.

"Harlequin Conserve. (Makes 15 6-ounce glasses) 25 ripe peaches 10 red plums 1 fresh pineapple 1 pound white grapes 1 orange Sugar 3/4 pound walnuts or pecans Wash fruits thoroughly. Prepare peaches, plums, and pineapple; cut in small pieces. Halve grapes and remove seeds. Slice whole orange very thin. Cook fruits slowly over low heat until soft. Measure, add 3/4 cup sugar for each cup of fruit. Cook over slow heat for 20 minutes, then add nuts. Cook slowly, stirring occasionally until thick and clear, about 1 1/2 hours. Seal in hot sterilized glasses. (Released by Western Newspaper Union.)

Use of Satire A satire should expose nothing but what is corrigible, and make a due discrimination between those that are not the proper objects of it.—Addison.

"Driving a cross-country bus is a man-sized job," says Bus Driver WALTER STINSON

"That's why I go for the Self-Starter Breakfast!"

THE Self-Starter BREAKFAST! A big bowlful of Kellogg's Corn Flakes with some fruit and lots of milk and sugar. It gives you FOOD ENERGY! VITAMINS! MINERALS! PROTEINS! plus the famous FLAVOR of Kellogg's Corn Flakes that tastes so good it sharpens your appetite, makes you want to eat.

Let's go to town - at home!

NO TELLING what tomorrow's weather may be. It foils the best forecaster. But we do want chintz for the windows. We do need a carpet sweeper, a new percolator, and a new end-table in the living-room. And we don't want to slosh around rainy streets to hunt them. Problem: How to thwart the weather man. Simple enough! Let's sit down by the fireplace and read the advertisements. Here it's comfortable and snug. We'll take the newspaper page by page, compare prices, qualities, brand-names. Tomorrow, rain or shine, we'll head for the store that has what we want, and home again in a jiffy.

"Buying at Home"—through the advertising columns—gives you wide selection, more time to decide, and satisfaction when you decide. MAKE IT ONE OF YOUR PLEASANT HABITS!

NEW PROSPECT

Alex Kuclauskas of Rockford, Ill.,
spent the week end at his home here.
Mr. and Mrs. Venus Van Ess of Ad-
ell visited Sunday with Mr. and Mrs.
Wm. Bartelt.

Mr. and Mrs. Aug. Bartelt of West
Bend spent the past week at their cot-
tage at Forest lake.

Mr. and Mrs. John Meyer of West
Bend spent Saturday and Sunday with
the Geo. H. Meier family.

James Devine returned to Wilmette,
Ill., Monday after spending the week
end with his family at Forest lake.

Mr. and Mrs. Frank Meyer and Miss
Audry Dennis of Milwaukee visited
Sunday with Mr. and Mrs. J. P. Uelmen.

Mr. and Mrs. Clarence Hill and daugh-
ter Beverly of Fond du Lac spent
Sunday with W. J. Romaine and the
Richard Trapp family.

Mr. and Mrs. Venus Van Ess of Ad-
ell and Dr. and Mrs. Jerome Van Ess
of New York were dinner guests of Mr.
and Mrs. Wm. Bartelt recently.

Richard Trapp and daughters, Vir-
ginia and Marilyn, Mrs. Lester Butzke
and Mrs. Alex Kuclauskas were Fond
du Lac business callers Friday.

chestra. Admission only 30c. Every-
body Welcome—adv.

Mr. and Mrs. Henry Becker spent
Sunday evening with Mr. and Mrs.
Ernst Becker at Kewaskum. Their
daughter Gladys, who spent the week
end with her grandparents, returned
home Monday evening.

Mr. and Mrs. J. P. Uelmen and their
guests, Mr. and Mrs. Art. Jordan and
son Billy, were entertained at dinner
at the home of Mr. and Mrs. Adolph
Heberer and Mr. and Mrs. Erwin Sel-
fert at New Fane Monday last week.

Mr. and Mrs. J. P. Uelmen enter-
tained the following Tuesday in hon-
or of their guests, Mr. and Mrs. Art. Jor-
dan and son Billy of Seattle, Wash.,
Mr. and Mrs. Adolph Heberer of New
Fane, Mr. and Mrs. A. W. Krueger and
son Gordon, Mr. and Mrs. Ed. W. Ra-
ber and daughter Judith of Milwaukee.

VISITORS FROM WASHINGTON
Mr. and Mrs. Art. Jordan and son
Billy of Seattle, Wash., spent from
Friday until Wednesday with Mrs. Au-
gusta Krueger and Mr. and Mrs. J. P.
Uelmen. Mrs. Jordan is better known
here as Miss Frances Marx, youngest
daughter of the late John M. and Mar-
chanda Marx, who conducted the mer-
chandise store now owned by Mrs.
Wm. Quandt at New Fane. This was
Mrs. Jordan's first visit here since she
left thirty-one years ago.

WAUCOUSTA

Wendell Engels was a West Bend
caller Monday.

County Agent Notes

ARTIFICIAL BREEDING ASSOCIATION PLANS OPEN HOUSE AUG. 12
An open house program to show
sires, barn, laboratory and other e-
quipment will be held by the East Cen-
tral Breeders' association whose head-
quarters are at Waupun on Tuesday,
Aug. 12. Six sires are owned by the as-
sociation and dairymen are cordially
invited to visit the premises where
these sires are housed. To encourage
visitors a dairy field day with an ap-
propriate program will be presented.
Each family is to bring its own picnic
luncheon.

Below is a statement of the tentative
program to be presented:
10:00 a. m. to noon—Inspection of barn,
laboratory and sires, demonstrations
etc.

12:00-1:30—Picnic luncheon in park
with band music furnished by the
city of Waupun.

1:30-2:30—Short talks by the officers
and veterinarians of the associa-
tion.

2:30-3:30—Talks by Dr. E. C. Heizer
and Prof. Geo. Werner of the dairy
husbandry, department of the College
of Agriculture.

Those who are interested in the arti-
ficial breeding of dairy cattle will find
this field day an excellent opportunity
to acquaint yourself with the East Cen-
tral Breeders association set-up. Wash-
ington county is one of six counties
comprising this organization. Dairymen
should avail themselves of this oppor-
tunity to learn more about this newer
method of cattle improvement.

84th ANNUAL COUNTY FAIR PLANS BEING COMPLETED

The 84th annual Washington county
fair will be held on Saturday, Sunday
and Monday, Aug. 30, 31 and Sept. 1st,
at the county highway grounds at Slin-
ger. The fair dates are less than a
month away. Many people have already
selected the articles they will ex-
hibit. Some others haven't. There is
still time to take inventory and decide
on what exhibits you wish to take to
the fair. Remember, the fair offers op-
portunity for both young and old to

exhibit. The fair is held primarily for
the welfare of the young people of the
county. It is primarily a junior fair and
as such it invites any boy or girl be-
longing to any junior organization of
the county to exhibit. B-Y Scouts, Girl
Scouts, Campfire girls, C.Y.O., F.F.A.,
and 4-H'ers are eligible.

The premium list has been increased
somewhat over former years. About
\$2000.00 will be awarded exhibitors,
according to E. E. Skallskey, secretary.
The fair is under the supervision of a
county board committee consisting of
Otto Keller of Barton as chairman,
George Raebel, Richfield, and Harvey
Dettmann, Farmington.

The public is cordially invited to
come to Slinger and enjoy the fair.
There is no admission charge and there
will be plenty of free parking space
available.

WISCONSIN MUCK FARMERS POTATO AND VEGETABLE MEETING

The annual summer meeting of the
Wisconsin muck soil potato and vegeta-
ble growers will be held on the Ow-
en's farm near Dousman on Saturday,
August 9th. All muck potato and vegeta-
ble growers are invited. The pro-
gram will get under way by 10:00 a. m.

STATE CONSERVATION CAMP

The annual State Conservation Camp
for 4-H people will be held at the Wis-
consin Dells on Sept. 4, 5, 6, and 7th.
It is being planned to make this camp
inspirational and instructive along all
lines of conservation. To accomplish
this goal the services of some of the
state's best conservationists have
been arranged for. This camp is very
largely supported by private donations
and is free to those who attend it. Any
older boy or girl who would be inter-
ested in attending this conservation
camp should make application with Mr.
Skallskey or Miss Bilstein, county home
agent, in the near future. Only a limited
number can attend.

E. E. Skallskey
County Agricultural Agent

WISCONSIN UNIVERSITY HONOR

JOS. E. DAVIES, WATERTOWN BOY WHO ACHIEVED LASTING SUCCESS

MADISON, WISCONSIN.—The
saga of a Wisconsin boy's life
revealed this week in this uni-
versity town when the cardinal-collared
toga of a Doctor of Laws is
placed over the shoulders of Joe
Davies, a local boy who made good.

Within the span of less than 50
years this Wisconsin-born and Wis-
consin-bred boy

IT'S A WINNER!

The McCORMICK-DEERING No. 8 Field Cultivator

There's such a variety of work that the McCORMICK-DEERING No. 8 Field Cultivator does that it really saves time and money. You can use it for killing weeds, preparing seedbeds, following, soil conservation work, and orchard work.

Three types of teeth available—stiff teeth or heavy spring teeth for deep cultivation and light spring teeth for shallow cultivation in plowed ground. Wide selection of shovels and points.

See us for full information.

WEEKLY NEWS ANALYSIS By Edward C. Wayne

Soviet Claims Strong Counter-Attacks Stall German Drive in Three Sectors; Japan Feels Weight of 'Crack Down'; British Get Invasion Threat Warning

EDITOR'S NOTE—When opinions are expressed in these columns, they are those of the news analyst and not necessarily of this newspaper. (Released by Western Newspaper Union.)

SOMEWHERE IN ENGLAND—A four-motored Consolidated "Liberator" just received from the United States, is shown in flight over England. It was flown across the Atlantic by a crew composed of Americans, Canadians and English, and made the crossing in just over eight hours, according to the British. These ships have a wonderful record of service with the R. A. F.

NAZIS: Real Trouble

Claims by the Russians that they had not only stopped the Nazis along the entire 1,000-mile front, but that they had taken the offensive at points, asserting penetrations as deep as 100 miles had been made, featured the Russo-German war news.

There were many observers who believed the Russian claims to be fairly accurate, pointing at many admissions from Berlin tending to show that the high command was dissatisfied with the progress being made.

This dissatisfaction was expressed in complaints against the difficulty of the terrain, the bad character of the Russian roads, and the strong resistance of the Russian troops.

Using these statements as at least an explanation and a background for belief in the general failure of the German offensive, observers sought to find the answer in Russian tactics and Russian preparedness.

They pointed out that in the last war, Russia had an army of about 800,000, poorly mobilized, well-led but not enthusiastic for fighting. This force was hurled into the eastern battlefield without good preparation, ran into highly trained opposition and was defeated bit by bit.

This time, apparently, the general Russian plan was to place a good-sized portion of the huge army on the long front, fight a series of rearguard and testing actions to discover where the main Nazi punch would be directed, and to keep the most excellent forces in reserve.

The German drive apparently was hitting in three general directions, Leningrad, Kiev and Moscow, with the heaviest attack in the center, with Smolensk the focal point.

It was around Smolensk that the severest fighting occurred, and it was there that the German effort bogged down most seriously. For better than two weeks there was no real report of advance, and finally came the Moscow claims that the Germans had been hurled out of their trenches and were gradually giving way.

BRITISH: View of Scene

Churchill, expressing the British viewpoint of the Russian scene of action, saw in it a German failure to execute a complete blitzkrieg, but warned that Britain was dealing "with a dangerous maniac" and claimed that the Nazis, failing against Russia, were thinking of turning to a British invasion attempt.

Demanding that the defenders of the islands get themselves "into concert pitch" by September 1, the British leader seemed to attach especial import to that date, a war anniversary for Hitler.

Churchill did not boldly announce that the British had definite information of a planned invasion attempt, but the British viewpoint evidently was that the Russian defeat or victory would not necessarily settle the war.

The final scene of the war, it was plain the British thought, would be fought in the west, either on British soil in repelling the invader, or in a British reinvasion of the continent.

There were many rumors of action in other fields. In North Africa the British heard that the Germans were removing troops, and leaving the campaign to the Italians, who might be expected, once the removal was complete, to fall back as disastrously as they did before.

The situation was extremely tense in Turkey, following the British occupation of Syria, because it was reported that the Germans were massing huge forces in Bulgaria, presumably to move across Turkey into the Caucasus region, and attempt to encircle the Ukraine.

Also it was unofficially reported that unless the Germans captured the Ukraine by mid-August it would be an empty victory, for the Russians would have the grain all harvested and sent east to concentration points at a safe distance from the invader.

The German holdup on the general Russian front was considered to be pretty conclusive evidence that the Nazis might try a southern approach. But what they would run into in the way of Turkish opposition was a big question.

GASOLINE: Curtailment

Gasoline consumption under mandatory control, with a view to reducing the volume of eastern states' demand to meet the oil transportation shortage moved a step nearer when Secretary of the Interior Ickes recommended that more than 100,000 service stations in eastern states close from 7 p. m. to 7 a. m. every night in the week.

This was the first direct move on the part of the government to limit sales of gasoline. Rationing may follow, it was indicated by some sources.

Ickes said he was continuing his appeal for a voluntary one-third cut in consumption, hoping that the station-closing recommendation, "plus the voluntary curtailment will be enough to put us across."

JAPAN: A Winner?

The Japanese situation was highly confusing to the lay mind, for the invasion of French Indo-China, even with the consent of Vichy, seemed plainly an overt act, and one which should merit the strongest possible punishment from Britain and the United States.

Indeed, this was the way it all started out, with concerted action by the U. S., Britain, Australia, Canada and the Dutch East Indies. However, as the days went on and as the Japanese continued to land military forces in Indo-China, there began to be dispatches indicating that the adverse action would be much milder than had been anticipated.

In fact, British sources said that oil shipments to Japan might continue; the Dutch said they had not "yet" abrogated their agreement with Japan for 1,800,000 tons of oil a year; Washington hinted that the "appeasement oil" might continue to go to Japan as long as she did nothing more than invade Indo-China.

Yet there were some things on the other side of the picture, because other British high authorities said "wait and see what happens" on Japanese reprisals; the Dutch announced that if the break came, Japan need never expect to get East Indian oil, for the Dutch had made preparations to destroy all wells and refineries instantly.

The question was whether Japan was the winner or the loser by her move into Indo China, and there was evidence on both sides.

NIPPON: Behavior

If future action against Japan was to depend on the behavior of the Nipponese, there was little immediate evidence that this behavior would be mild.

Almost immediately there was a serious "incident" when Japanese bombers attacking Chungking paused directly over the U. S. gunboat Tutuila, part of the Yangtze river patrol, and dropped some bombs, which damaged the vessel, though there were no casualties.

The ship was anchored in the so-called safety zone across the river from the Chinese capital. One bomb, according to a report from Shanghai, fell only eight yards from the gunboat, caving in a part of the ship's stern and blowing some equipment off the dock.

Also in the Shanghai dispatches came word that the Japanese army had authorized the seizure of American property in North China. Actual seizure of some properties had been made, the consulate reported to Washington.

Some of them were the oil properties at Swatow, Chefoo and Tsingtao and a tobacco plant at the latter town. There were reports of other seizures at Tsinan and Mukden. Some occurred in Manchukuo, Japanese puppet state, but some were in occupied territories of North China proper.

CHURCHILL: Another 'Spot'

Strongest criticism of Prime Minister Churchill in months occurred when he said that "production was satisfactory" and that he saw no need of creation of a minister of production in the cabinet.

It wasn't so much what the prime minister said as the way he said it. He hit back at some of his newspaper critics in such terms that the press as a whole began to get "on his neck."

'So Sorry'

Lieut. Com. W. A. Bowers, U. S. N., is in command of the Gunboat U. S. S. Tutuila, which was damaged by Japanese bombs during an air raid on Chungking, China. The Tutuila was lying near the U. S. embassy at Chungking when the bombing occurred. No injuries to U. S. seamen were reported. Before an official protest could be made, Japanese officials apologized for the incident.

U. S.: Turning Tide

The frank statement by Secretary of the Navy Knox that an American destroyer in the Atlantic had dropped three depth bombs when it believed it was about to be attacked by a submarine focused attention on the "battle of the Atlantic."

It brought by Senator George the statement that he believed the U. S. naval patrol of the sea lanes as far east as Iceland appeared to have been of such assistance to Britain that she was slowly gaining the upper hand in the effort to keep the ocean free for the passage of supplies.

At about the same time however, Germany announced the sinking of 19 vessels in one convoy, totaling 116,000 tons. Yet the Nazis admitted that the sinking was accomplished only with the greatest difficulty.

The German dispatches, in describing the armed escort of the patrol, admitted that there were many armed ships, in fact, claimed the sinking of one and the damaging of another.

Partly due to American intervention, Churchill told the commons, the "battle in the Atlantic is moving progressively in our favor," and this sentiment was quoted and echoed by Senator George.

From the turn of events, however, the senator drew the conclusion that there would be no attempt at invasion of Britain this year. He cited also the difficulty of the German invasion of Russia as one of his reasons.

HOPKINS: To Moscow

The flight of Harry Hopkins, President Roosevelt's lend-lease administrator and personal representative to warring capitals, caused intense interest here, because it was supposedly portending the sending of lend-lease aid to Russia.

Hopkins was scheduled to confer with Stalin in person, also to talk with leaders such as Molotov, Litvinov and others.

His departure was a closely guarded secret until he had arrived safely, and indeed it was a dangerous flight, as the Nazi warplanes were occasionally flying over Moscow.

JOINT: Tax Returns?

One of the most dubious pieces of tax legislation found its central fight to circle about whether or not husbands and wives should be forced to file joint returns.

Few prognosticators in Washington could be found willing to bet that the battle would end one way or the other.

The tax bill came out of committee with the joint returns mandatory, but only after the stiffest sort of a fight, and with only the slightest sort of margin in the committee voting.

One of the first floor battles was to get the administration leaders to agree to open the matter for floor discussion during debate, and in this skirmish the foes of mandatory joint returns won out.

It was finally agreed that an amendment will be offered to remove the mandatory joint return clause, and that this may be debated on the floor.

SABOTAGE: Canadian Strike

A three-day "sort of sit-down" strike in Canada's biggest war industry, the aluminum works, brought from the government the statement that sabotage was suspected, and that thorough investigations would be instituted.

The government formally called the strike a "suspected case of enemy sabotage" and promised that arrests would be made.

BRIEFS:

London: Foreign Secretary Eden warned Japanese "reflect while there is yet time" where their foreign policy is leading them.

Berlin: Fritz Wiedemann and Hans Borchers, expelled from the U. S., were among former consuls to make lengthy reports on their arrival.

New York: Employment in the U. S. is now at its highest peak since 1929, according to the National Association of Manufacturers' survey.

Washington Digest

New U. S. Farm Policy Aims at High Production

Latest Campaign Represents Definite Shift From 'Plowing Under' Plan; Powder Makers Need Cotton Linters.

By BAUKHAGE National Farm and Home Hour Commentator.

WNU Service, 1343 H Street, N. W., Washington, D. C.

"This year and next the farmer is going places. There are certain indications that he will continue to see considerable new money. Indications based on conditions that affect the farmers' general outlook on life, as well as his cash income."

That statement did not come from "official sources"—it didn't even come from a farmer, although he used to be one. It was made in my office by square-cut, square-jawed Conklin ("Pop") Mann, an editor and advertising man, keen student of rural matters, and a long-time friend of mine. Mann was down from New York, bursting with enthusiasm for his favorite theme—assured prosperity on the farm.

Mann believes that business has a job ahead to interpret and readjust its marketing to meet the sweeping economic changes now taking place in American agriculture.

The farmer is now becoming a far more important factor in the distribution of both consumable and capital goods than ever before. That rise in the farmers' economic importance isn't just a matter of great cash income, according to Mann. It is due, rather, to the fact that the farmer now has a sound business platform under him and can plan and work on a basis comparable to any other business man.

"Farmers," says Mann, "are both doing well and experiencing a new sense of economic security because of parity and guaranteed prices for farm products. There is a definite psychological response to their feeling of increased safety. When a farmer is doing well, and feeling secure, look for a strong upward surge in his buying psychology."

Mann interprets the farm in terms of modern industry—he sees the farm as a manufacturing plant, producing the raw materials for food, clothing and numerous other products. "Evolutionary changes, deep down in farm economics," says this agro-idealist, "have taken place which give the farmer a stabilized economic base from which he can plan and work with a sense of security he never had before."

Farmer Psychology I like the way this hard-hitting, successful business man and writer describes the psychology of the farmer as he grew up with him in other days. He asks this question of the industrialist:

"How would I feel about buying anything but necessities if my whole economic structure was a gamble? Suppose I owned a ten or fifteen thousand-dollar plant and a lot of livestock, and once a year, I planted crops, not knowing if the price would make them worth harvesting; how would I feel?"

Mann has a deep inherited kinship for the man who works close to the soil and you cannot doubt his sincerity when he adds:

"Some day a saga will be sung about the courage that kept the farmers going through their darkest days."

I wish I might write that saga for I know it from brave letters that poured into me from radio listeners all through the worst of the depression. I can tell you that they gave me a renewed faith in America that has kept me from being cynical through these days of distrust and doubt.

By the time this column is read, the greatest concentrated drive to increase farm production, to assure the farmer a definite price for what he produces will be on. For the first time in history, milk and poultry producers will be asked to pledge themselves to raise as much of their product as they possibly can—and they will get all the cooperation, advice and assistance that the government can give them. Quite a different picture from "plowing under."

Cotton Linters And Powder Making Cotton linters, the hair-like fibers that cling to the seed after the long, staple cotton is removed in ginning, is a vital ingredient in the manufacture of smokeless powder. Army officials are checking to see whether or not there is going to be a shortage of this product that will seriously interfere with the defense program. They have ringing in their

ears the solemn warning of Rep. Wright Patman, of Texas, in the house of representatives, that there will be a linters shortage by the middle of 1942—or even as early as next February, depending upon how much the defense program is expanded, or whether or not the United States becomes involved in a "shooting war."

At any rate, three plans are being considered in order to meet such an emergency. First, there is the substitution of alpha pulp. This is the wood product that Germany has been using in its smokeless powder since cotton imports have been shut off as a result of the war. This is the same ingredient, too, on which rayon and cellulose industries depend.

Second, the department of agriculture is experimenting with a machine for chopping up staple cotton chine for chopping up staple cotton into short lengths and breaking down the fiber so as to make it usable in place of linters. Within the near future the machine will be given a trial run at the Hopewell bleachery.

Third, a process has been developed for making wood linters out of the southern gum tree—the familiar sweet gum, black, or Tupelo gum. Already one plant in the Midwest is turning out these wood linters which are being used interchangeably with cotton linters in powder which is going to England.

Washington Residents And Car Luxury Midtown Washingtonians—that's most of them—provide no sheltering roof for their servants, either human or wheeled. And so, early in the morning, nose to tail, the parked cars patiently hug the curb, awaiting their masters' will. As the day begins, there is a little knot of colored girls and other servants who are on their way to wake the missus and get breakfast, lunch and dinner and then depart for their own mysterious habitations.

Of course, there are more cars than girls, for, here as elsewhere, the car is the No. 1 luxury. Better walk up three flights to a hall-bedroom than be car-less.

Of course, there are many government employee families which have settled down as contented bourgeoisie, the unambitious but secure beneficiaries of bureaucracy. They eventually own their own neat homes, on which there is plenty of time to work, after four-thirty. There is the 26-day leave each year and 14-day sick leave, occasional furloughs (without pay), retirement and pension to which to look forward. And there is always that semi-monthly salary check, not high in proportion to commercial wages but always there, in good times or bad, for the classified civil servant.

In boom times the salaries of government workers do not go up along with prices, and you cannot strike against the government. Prices are high in normal times in Washington, compared with other cities of its size; clerks and shopkeepers tend to be a little bored and snooty in the capital, and collectors are relentless. But Uncle Sam's pay check is always there, even in, in days of depression, a sizeable share may have to be mailed back to rugged relatives at home who are out of jobs—but even so there is usually enough left for the garage-less car.

Filing of Documents Is Serious Problem In the public mind, the word "waste" is frequently associated with the word "government." If you will look up the word "waste" in the dictionary, you will also find that it is connected with the word "vast" (the Latin "vastus"). There is, of course, a vast waste in all governments and not the least is waste paper. As a matter of fact, the Congress of the United States recognizes this fact for it has created a joint select committee on the disposition of papers in the executive departments. Before papers and documents of any department can be thrown away, the Archives Council passes upon whether or not they have historical value. If not, the council advises the joint committee, which in turn reports to congress on what action that body should take in disposing of them.

The question of storing papers in Washington, the filing case for the emergency, to say nothing of the office, is becoming as serious as the need for providing space for human beings. Documents of historical value are kept in the great Archives building on Constitution avenue where moth and rust do not corrupt nor can thieves break through and steal. Papers of no historical value can be sold for waste, on direction of congress, and the money received therefor turned into the treasury. One solution may be micro-filming, a process used by many libraries in this country and abroad. It is estimated that there are 5,000,000 square feet of office space in Washington now occupied by filing cabinets which could be used for chairs and desks and people. The micro-film is made by photographing a document and greatly reducing the film in size. A whole newspaper page becomes not much bigger than your thumb—special magnifying stands are used to read the print.

Scientific Gadgeteer

Above: Sun telescope made from an old auto axle. Murray is focusing the solar image on a paper receiver here. Right: At the eyepiece of this homemade telescope he checks up on a few stars. The instrument is made of old water pipes, wood and pieces of mirror. Note how the wood is bound with wire.

Keeping track of the sun and checking up on the stars are a few of the things that life is worth living for. Murray, assistant postmaster at Huntington Beach, Calif., has made all his own instruments out of pieces of old junk. These photos take you into the scientific gadgeteer's workshop.

At left Murray has the sun accurately focused on the buff paper blackened tube. The part of his post office is below: From an old of discards Mr. Murray has made an instrument which measures magnetic

Part of gadgeteer of Murray's seismograph.

The hobbyist preserves his seismograph records by giving the lampblack chart a bath in shellac and alcohol. This makes his records permanent.

The se

They Play Important Role in the Fashion Picture

By **CHERIE NICHOLAS**

and left, are of the casual type for town and travel wear. For these remnants of tweed will work up to good advantage and if you want to give them a "last word" touch, embroider a big scroll monogram somewhere about them—on pocket or sleeve or some other strategic point.

Outstanding on the season's program is the sleeveless long-torso jacket, known as the jerkin. It is the schoolgirl's idol and adored by sportswomen. The jerkin sketched at lower left, is easy to make, easy to wear! Use bright corduroy or suede cloth. Jerkin patterns are available anywhere they sell patterns.

Coolie coats, the popular choice for evening wear, are ever so easy to make for they require little or no fitting. The "coolie" sketched at lower left, is a "perfect little treasure." The material used in this instance is prettily embroidered in quaint little posies. Handsome brocade or metal cloth yields beautifully to the coolie treatment. Women of discriminating taste love coolie wraps made of fine wool or silk crepe in subtle pastel greens, violet shades, or Chinese reds. The newest thing is to embellish them with a restricted amount of sequin or bead embroidery. Note the model in the lower oval inset. In this instance the sheer crepe is in a soft stone blue, the embroidery done in silver threads and beadwork.

(Released by Western Newspaper Union.)

Hat and Bag

Wide use will be made of deep-toned satins and they will be made up similar to the manner suggested above for metal weaves. Silk jersey is also a favored medium. Used in vivid reds, greens or blues to wear with black suits, the new jersey blouses are stunning.

Accent Is on Luxury Blouse Type for Fall

The blouse program as mapped out for fall and winter will use much luxurious fabric. Pastel metal cloth made up in classic simplicity is one of the happy outlooks. Matching the pastel of the metal weave with crepe in identical tone presents endless possibilities for achieving charming effect. In some instances a bit of the crepe used for the skirt is repeated in stylizing accents on the metal blouse.

Drastic Changes Seen in New Fall Silhouette

Here are changes you will find as the new silhouette make their debut this fall. There will be very few if any set-in sleeves. The trend is to deep armhole effects in dolman sleeves, cut all in one with the bodice or blouse top. Bulk above the waistline and slimming of skirts is noted.

Everything is being done to accent lower waistlines, especially with inset belts. Beltless dresses are very new in style stressing sophisticated simplicity.

There will be hosts of pleated fashions that emerge from long-torso lines with pleats manipulated to retain slenderized lines.

Chiffon House Coats

Torrid days call for cool apparel, a need which is filled in very lovely house coats made of pastel chiffons. You can bring the summer to a very happy conclusion wearing one of the very lovely chiffon creations.

Picked Up in World Fashion Centers

You can have a real old-fashioned bonnet done in calico, or a modern version with stitched or pleated pique for the brim.

A fashion of 10 years ago, recently revived, is the blouse that crosses surplusic fashion and ties at the side or in back. The new edition comes in rayon jersey in any number of lovely colors and either matches or contrasts with the skirt.

FARM TOPICS

CARE ESSENTIAL IN FILLING SILO

Dry, Unpacked Materials Spoil Readily.

By **PROF. R. C. MILLER**
(Agricultural Engineering Department, Ohio State University.)

Most effective results in avoiding spoiled silage are obtained by taking proper precautions in silo construction and by harvesting the silage crop at the right period.

In general, silage spoils because it comes in contact with air after it is placed in the silo. Defects in silo construction, use of material which is too dry to pack well in the silo, and too much speed in filling or too little tramping of the material are the chief agencies that permit air to ruin the silage.

Every type of silo whether it be a permanent upright type, a temporary fence structure, or a trench below ground surface can be built to preserve silage effectively if the material placed in the silo is moist enough to pack well or if water enough is added to permit thorough packing of drier material.

The rule of thumb method for determining the correct moisture content for plants going into a silo is that it should be possible to press or wring water from the chopped material. If that cannot be done, water should be added. Plants with 60 to 75 per cent moisture are at the right stage for silage. Materials placed in the silo while too green may result in considerable losses of juice and produce silage which is unpalatable to livestock.

The spoilage of silage at the top of an above-ground silo or at the end of a trench silo cannot be avoided entirely without prohibitive cost. Repacking at intervals of a few days after the silo is filled or putting chopped, wet straw or other material on top of the silage will reduce the loss.

Considerable silage is lost while the silo is being emptied because too great an area of surface is exposed in feeding. This loss can be reduced by feeding from half the area of a surface silo at a time or by taking a slice only a few inches thick from the end of a trench silo.

Egg Production Reflects Kind, Quantity of Feed

Efficient egg production is influenced by the amount of feed it is possible to induce each laying hen to eat daily, according to George P. McCarthy, extension poultry husbandman at Texas A. & M. Normally one hen will eat about 80 pounds of feed a year, approximately half of which should be mash and one half grain for best results.

Egg mash, or laying mash, is the important portion of the feed for hens that are expected to lay. Laying mash is a combination of feeds which are high in protein and other ingredients essential for keeping the hens in good health, as well as for producing a maximum number of eggs.

Laying mash must constitute one-half, or 40 pounds, of the yearly ration. The usual mixtures for laying rations comprise 100 pounds protein supplement and 200 pounds of ground home-grown grains to make a suitable mash mixture. The grains may be corn, maize or hegari in combination with oats.

One hundred laying hens will consume about 3 1/2 tons of home grown grains a year, McCarthy adds. If the net income from the flock is figured on the basis of increased return from home produced grain, the producer will find that he sold his grain at about double the market price. In some cases even greater return can be made.

Farm Notes

The 25 per cent of the people in the United States living on the land are furnishing 50 per cent of the increase in the country's population, according to the bureau of agricultural economics.

A dairy bull, after he is two years old, should be kept a little on the thin side rather than fat. He will be more fit for breeding, and this slight limitation of feed need not injure his growth.

The U. S. department of commerce has ceased publication of statistical information on exports of American farm produce and will keep such information secret because of the war.

THE TWIG CATERPILLAR

So well does the Twig Caterpillar simulate a twig of the shrub upon which he is feeding, that even a sharp-eyed bird can not recognize him. It is small wonder, then, that a person, walking through the wood, may sometimes reach out his hand to grasp what he thinks is a twig, only to have a caterpillar curve around his finger. At any sign of danger he clings with false legs and, holding his body rigid, he stands out from the branch at an angle with it, and thus looks exactly like a twig.

SOYBEAN SPROUTS

Bean sprouts may be added, with good results, to green salads or to meat steaks or fricassees. Since they are very tender they should not be added to hot mixtures until just a few minutes before serving. The beans can be sprouted in any container which has holes in it for drainage and which can be covered. Like any fresh vegetable, the sprouts when formed should be kept in a cool place until they are ready to serve, otherwise the skin will toughen somewhat.

Culture of Dahlias

Although the dahlia is a tender plant, easily killed by frost, it can, nevertheless, be depended upon to flourish wherever tomatoes can be grown, provided only that the grower give it suitable care.

HISTORY OF CULTIVATION

This beautiful flower was introduced into Europe in the year 1789, when one Vicenta Cervantes sent a set of dahlias roots from Mexico to the keeper of the Botanic Gardens of Madrid, Spain. Cavanilles, the director of the gardens, described the flowering of those roots in 1791. Later, from the Madrid gardens, the plants were distributed widely over the continent; an importation was made to England in 1798 but the plants all died because of a lack of knowledge of their proper culture. They were re-introduced, more successfully, in 1804.

From the beginning, these dahlias showed both the single and double forms and gardeners everywhere found great delight in breeding new variants. Interest in dahlias received great impetus when, in 1879, the first cactus dahlia appeared. This variety has petals which recurve at the margins and show also a curious twisting of the entire petal.

METHODS OF PROPAGATION

The dahlia is very easily propagated. One may either buy plants or young dormant roots, or he may plant seed and raise his own stock. It is a more interesting process to grow from seed since dahlias rarely breed true and there is always the excitement of watching for new, striking, or better forms.

The seed should be planted in flats, indoors, several weeks before the usual date of the last killing frost. They should be transplanted into pots as soon as they are large enough to be handled, and later transplanted again to permanent beds or borders.

Although dahlias are usually used in massed plantings, there is no good reason why they should not be interspersed with other plants and thus grown as specimen plants in borders. They must not, however, be crowded, as they respond best to freedom, with plenty of fresh air and good sunlight. They must be sheltered from high winds since their stiff, heavy-headed stalks break readily.

They do well in almost any kind of soil but, like all plants, do best in good garden soil—soil that is light, friable, and rich in plant food. A soil that is too light will produce only small and stunted blooms, whereas a soil too heavily fertilized will cause the plants to run too much to leaf and stalk. It is a good practice, in many sections, to give the plants a mulch of straw manure in mid-summer, which cools the soil and provides extra food. Potash may also be applied, if the plants show signs of deficiency, but be fertilized with care since too much stimulation of growth inevitably results in increase of foliage rather than of bloom.

PROPAGATION BY ROOT DIVISION

When the time comes to set out dahlia roots, the clumps which were stored the previous season should be started into growth so that the location of all eyes can be noted. This can be done by putting them for a short time in some warm moist place, without any soil. As soon as growth begins, cut the clumps apart with a sharp knife, in such a manner that a piece of the stem, with the budding eyes, is attached to each root. The roots should then be planted in rows three to four feet apart, and rather far apart in the row. For a saving of space, plants in opposite rows may be staggered.

The root should be laid on its side, with the growing shoot nearest to the stake which is ultimately to support the plant. The stakes should be already in place when the planting is done. If they are placed after the plant begins to grow, injury may result to the root system.

WINTER STORAGE OF ROOTS

When the plants have been cut down by frost they should be pulled, dried briefly in open air, and then stored in barrels of dry sand or sawdust, in a frost-free cellar. Care must be exercised in lifting the roots so as not to injure them, since injuries cause decay and the decay may spread to healthy roots, causing considerable loss.

For detailed information on dahlia culture, send five cents to Superintendent of Documents, Washington, D. C., asking for Farmers' Bulletin No. 1370.

FIRST-AID to the AILING HOUSE

by **Roger B. Whitman**
(© Roger B. Whitman—WNU Service.)

Condensation on Walls

QUESTION: My small bungalow is built on cinder block foundations. The edges of my floors along the walls have become spotted, and the inside walls to a height of three or four feet are continually damp. What is the cause and what is the remedy?

Answer: There are openings between the top of your foundation wall and the house walls, through which outside air blows in at the floor level. As this air is cold the edges of the floor and the lower parts of the inside walls are chilled and condensation occurs against them. You can probably feel the draft through the crack between flooring and baseboard, and if you lay a thermometer there, you will find that the temperature is low. The remedy is to close all open joints above and below the sill, and any other joints through which cold air can leak in at the level of the floor.

Smoky Fireplace

QUESTION: My fireplace, which I just tried to use for the first time since occupying the house eight years ago, I find draws badly. Its dimensions are 22 inches deep, 35 inches wide and 24 1/2 inches high. Is this too small? Is it possible for a nest to be in the flue?

Answer: The size of the opening in a fireplace should be governed by the area of the flue. The opening should not be more than 10 to 12 times the area of the flue. There are many causes for poor draft in a fireplace, such as: two fireplaces connected to one flue; with this construction, each fire kills the draft of the other; an obstruction in the flue; lack of wind shield and damper; improper construction of smoke chamber. For a good draft the top of the chimney should be at least two feet above the highest ridge of the roof and should not be blanketed by nearby tall trees or buildings.

Poor Plastering Job

QUESTION: I paid \$55 for replastering a ceiling. The plasterer said he would not take down the picture moulding, for he could do a good job with it in place. It is now impossible to get a picture hook on, for the space is filled with plaster. Am I justified in deducting something from his bill? He also splashed plaster on a large mahogany bed. I have wiped it off and used polish, but I fear that when the polish wears off the damage will show.

Answer: By rights you should have the picture moulding taken off and replaced, charging the plasterer for the expense, or giving him the chance to do the job himself. As to the bed, if it is now in good condition, it will undoubtedly remain so, or can be kept in shape with occasional polishing.

Cistern Repair

QUESTION: How can I refinish a cistern that has become rotted and soft from age and wear?

Answer: You should look forward to replacing the cistern; for any repair would be only temporary. One treatment would be to coat the interior with asphalt paint. You should do the job at a time when the walls are thoroughly dry, and should first brush off all loose particles. Get a kind of paint that will not give the water a taste.

Bathroom Wall Finish

QUESTION: Our bathroom walls and ceiling are smooth plaster and have never been painted. How should we fill the cracks and then finish with enamel?

Answer: Fill the cracks with patching plaster; get it at a hardware store. Instructions are on the label. For the first coat, thin enamel undercoater with one-eighth as much linseed oil. Allow to dry thoroughly. Then apply a coat of undercoater, and finish with enamel.

Laundry Floor Surface

QUESTION: What kind of flooring that will not be slippery when wet can be used to resurface a wood floor in a room used as a laundry? Linoleum breaks and wears through quickly.

Answer: Asphalt tiling should be excellent, for it is waterproof and will not rot. You can get it from any dealer in linoleum. Linoleum should not be used in laundries or similar places where the flooring would be wet.

Worn Stair Finish

QUESTION: My front stairs are oak finished in a "golden oak" shade. The finish in the center of the treads has worn, showing white spots, while the outer sides of the treads are still in good condition. How can I treat them?

Answer: Refinish the center parts with oak varnish stain. You can get a color sample card at a paint store to match the shades. Do not make sharp edges when you varnish; blend the new part into the old.

House Numbers at Night

QUESTION: Is there any kind of paint that I can use on my house number that will shine at night and make it easy to see?

Answer: The glow of phosphorescent paint can be seen only in darkness; in a half light it will hardly be visible. An electrical supply dealer can provide a house number lighted by a lamp so tiny that it will hardly work the meter. You can also get a number made of reflectors that are used for highway signs, but the electrically lighted number is more effective.

Rapid Heart Often Due to Nervousness

By **DR. JAMES W. BARTON**
(Released by Western Newspaper Union.)

WHEN an individual is sitting quietly and his heart suddenly begins to beat very rapidly—twice as fast as normal—he is naturally going to become worried. Just as suddenly as the rapidity started up, it stops, and the heart rate is back to 72 or 76 again. When the heart beats rapidly, it is called tachycardia—"tachy" meaning fast, and "cardia" the heart. When the rapid beat occurs suddenly, lasts for minutes or hours, and stops suddenly, it is called paroxysmal tachycardia.

While the cause of paroxysmal tachycardia is said to be unknown the cause in some cases is believed to be nervousness, disappointment, worry or some other depressing emotion. I have one case in mind of a teacher who had worked and planned for two years to take a certain trip and at the last moment circumstances prevented his trip.

From that time he began to have attacks of paroxysmal tachycardia which were controlled by the drug quinidine sulphate, now in general use for these attacks. Others state that these attacks occur when they have to do some special work or duty which is unfamiliar or distasteful.

Attacks Not Dangerous

The treatment of this common type of rapid heartbeat is to assure the patient that there is no danger to life. This assurance is often all that is necessary to prevent further attacks. These attacks can sometimes be stopped by pressing on the nerves of the neck running along the "cord" which runs from back of ear to breast bone.

However, in some forms of tachycardia where there is also some disturbance of regularity (rhythm), of the heartbeat, rest in bed is absolutely necessary, in addition to the quinidine sulphate.

The thought then is when the heart suddenly begins to beat rapidly, is not to become frightened, but to send for your physician. If it is the common type, he can prescribe the quinidine sulphate.

Neurology And Psychiatry

IN MY student days there was not much instruction given on "behavior" problems, or psychiatry. Today many neurologists combine with neurology (knowledge of nerves) the study of behavior (psychiatry) and are thus qualified to tell us when the symptoms are due to a disturbance of the nerves themselves or whether the emotions, circumstances, surroundings are affecting the individual's judgment and so affecting his behavior.

When there is no real disturbance or change in the structure of the nerves or nerve tissue, yet the individual behaves abnormally, the condition is called a neurosis.

A simple classification of the neuroses is outlined by Dr. A. L. MacKinnon, Homewood sanitarium, Guelph, in the Canadian Medical Association Journal. This classification makes it easy for us to understand such common conditions as neurasthenia, hypochondriasis, hysteria, psychasthenia and anxiety states.

1. Neurasthenia: A condition of mental and physical tiredness.

2. Hypochondriasis: A hypochondriac is a patient who has the fixed idea that he is suffering from organic disease, when no disease is present.

3. Hysteria: Where patient thinks he cannot walk, cannot remember, throws himself about but never hurts himself because he is conscious—not unconscious as in epilepsy.

4. Psychasthenia: "Psych" means mind or nervous system, "a" means not, and "themia" means strength; thus mind or nerves are not strong and there are thus fears, obsessions, a feeling that he "must" do certain things.

5. Anxiety states: A continuous state of anxiety with rapid or hard beating of the heart, breathlessness, nausea and vomiting, and diarrhoea.

QUESTION BOX

Q.—What causes a bluish-green discoloration of the eyes?

A.—Blue green discoloration is usually due to small broken blood vessels. May be due to a run-down condition, injury and other causes.

Q.—Please give me some advice as to the worth of olive oil as a cure for a sore throat and its effect upon some.

A.—Cause of sore throat should be investigated by your physician. It may or may not be serious.

Q.—Is it possible to purchase bile salts in a drug store, or must I have a physician's prescription?

A.—Bile salts should be prescribed by your physician if he thinks they are needed in your case.

Q.—In the case of long standing sinus trouble, would the taking of several glasses of orange juice daily have a bad effect or intensify the symptoms?

A.—Orange juice has an alkaline effect, so should not aggravate symptoms. However, too much liquid is not considered advisable in sinus conditions.

WE FOUND A BETTER WAY

Personal Confidence
The confidence which we have in ourselves gives birth to much of that which we have in others.—La Rochefoucauld.

Nervous Restless Girls!

Cranky? Restless? Can't sleep? Tired easily? Because of stress of monthly functional disturbances? Then try Lydia E. Pinkham's Vegetable Compound.

Pinkham's Compound is famous for relieving pain of irregular periods and cranky nervousness due to such disturbances. One of the most effective medicines you can buy today for this purpose—made especially for women. WORTH TRYING!

Worthwhile Illusions

Don't part with your illusions. When they are gone you may still exist, but you have ceased to live.—Twain.

THE TRUTH SIMPLY TOLD

Today's popularity of Doan's Pills, after many years of world-wide use, surely must be accepted as evidence of satisfactory results. And favorable public opinion supports that of the able physicians who test the value of Doan's under exacting laboratory conditions.

These physicians, too, approve every word of advertising you read, the objective of which is only to recommend Doan's Pills as a good diuretic treatment for disorder of the kidney function and for relief of the pain and worry it causes.

If more people were aware of how the kidneys must constantly remove waste that cannot stay in the blood without injury to health, there would be better understanding of why the whole body suffers when kidney's lag, and diuretic medication would be more often employed.

Burning, scanty or too frequent urination sometimes warn of disturbed kidney function. You may suffer nagging backache, persistent headache, attacks of dizziness, getting up nights, swelling, puffiness under the eyes—feel weak, nervous, all played out.

Use Doan's Pills. It is better to rely on a medicine that has won world-wide acclaim than on something less favorably known. Ask your neighbor!

HISTORY

—OF THE—
Village of Kewaskum
BY
William J. Mayer
Student at
St. Francis Seminary

(Continued from our last issue)
VI. THE FOUNDERS (Continued)

Nicholaus Guth, Jr.: Was proprietor of the American House and lumber dealer in Kewaskum. He was the son of Nicholaus Guth, Sr., who was born at Hesse-Darmstadt, Germany, and immigrated to this country in 1846, settling in the town of Polk, Washington county. He came to the town of Kewaskum in 1856, and settled in the village in 1865. He was engaged in milling. Nicholaus Guth, Jr. is the successor of his father in the hotel business and the lumber trade. He was born in the town of Kewaskum in 1856. He married Lena Fleischman. (Ibid, 728).

A. G. Koch: merchant; son of Christian Koch, and a brother of William Koch of this village, was born in Kewaskum in 1859. Previous to engaging in business, he was employed as clerk for several years; he was with J. C. Kuhmann for two and a half years; also with David Stolper of the town of Scott. Later he started a store in the town of Scott for his brother Charles. He engaged in business in Kewaskum in September, 1881.
(Picture—The American House)
(Picture—Kewaskum, looking north, 1915)

William Koch: Proprietor of the Washington House, was town clerk in 1877, also justice of the peace. In 1881 Mr. Koch, with Mr. Krahn, built a cheese factory in the village. Mr. Koch was the son of Christian Koch, who immigrated to this country from Brunswick, Germany, in 1847 and settled in Washington county, purchasing a farm in the town of Kewaskum. Christian was one of the pioneers of Washington county. He cast his first vote in this county at an election held in September, 1848, for the purpose of locating the county seat of Washington county. He died in April, 1865. William Koch was born in Germany September, 1846.

Charles Miller: druggist, was born in Bavaria, Germany, in 1840. He came to this country in 1867, before this, being engaged in the druggist business in Germany. His first location in this country was in the town of Barton. In 1870 he went to Milwaukee and engaged in the drug business and in 1874 he came to Kewaskum. His wife was Katie Reck, a daughter of Hobart Reck, who was a soldier in the Union army and lost his life in the war. (Western Historical Company, History of Washington and Ozaukee counties, Wisconsin, 729).

Moritz Rosenheimer: Was born in Schleisingerville, in the township of Addison, Wisconsin, January 23, 1850. His parents were Lehmann and Barbara (Herbst) Rosenheimer. He was but a child when his father established the L. Rosenheimer Mercantile & Grain Company at Schleisingerville (now Slinger) and, until 1874, helped his father in building up extensive interests at that place. In the fall of 1874 in company with his young wife, Lena Weimer, to whom he was married on the 1st of May, 1871, Moritz Rosenheimer established a mercantile and grain business at Kewaskum. Here, with his brother Adolph, who joined him some years later, he built up an extensive business which included his mercantile establishment, a creamery, malt house and bank. Moritz Rosenheimer was president of the L. Rosenheimer Malt & Grain Company until January, 1911, and vice-president of the Bank of Kewaskum since its organization in October, 1904. He died in December, 1927.

Adolph Rosenheimer: Was born on the 25th of March, 1861, in the village of Schleisingerville, Wisconsin. Lehmann Rosenheimer, his father, was born in Dormetz, Bavaria, on June 12, 1821. Adolph was educated in the public schools of Schleisingerville and worked for his father until 1874. When Lehmann Rosenheimer established a branch house at Kewaskum, Adolph and his brother Moritz took charge of its conduct and met with success. In 1891 he incorporated the L. Rosenheimer Malt & Grain Company. In September, 1911, it was entirely destroyed by fire. But it was again rebuilt—a modern business institution of concrete and steel, fireproof, well equipped in every department. He was the first president of the village of Kewaskum when incorporated, which office he held for five years at which time he then declined to again become a candidate. (Carl Quicker, Washington County, Wisconsin, Past and Present, 11, 300, 301, 348).

(Continued in our next issue)
NEXT WEEK: ROADS.

FARM AND HOME LINES
We must never forget that farmers do business on a very small margin of profit. As a group they do most of their buying at retail and their selling at wholesale.
Arthur Puls of Washington county is the first breeder in Wisconsin to receive the Progressive Breeders' Certificate awarded by the Holstein-Friesian Association of America.
For the fifth time A. C. Oosterhuis of Waukesha county, has been elected president of the Holstein-Friesian Association of America. On his board of directors will be two other Wisconsin breeders, H. F. Schroeder of Dodge county, and John Wuetrich, of Clark county.

PRIVATE LETTER

Another letter about the "privates" this week. This one was sent to the Statesman by "several of the many good pals" of Privates Alfonso Schladweiler and Benedict Fellenz, Kewaskum boys, located at Camp Livingston, La. The letter follows:
Camp Livingston, La.

Dear Sirs:
We think that a good paper deserves a break with some real Livingston news. Pvt. Alfonso Schladweiler, former taxidermist of R. R. Kewaskum, and Pvt. Benedict Fellenz, also of R. Kewaskum, are two young men with many friends here and are a real credit to their locality. Kewaskum can sure feel proud of them as soldiers.
Quite a number of boys from Camp Livingston had gone home on furlough and now a number of fellows from the service company and some of the 127th Infantry left on a sightseeing convoy to New Orleans. Pvt. Schladweiler ("Schladde" or "Al" to us), who had been along with a convoy to Biloxi, Mississippi, along the Gulf of Mexico July 4th, did not care to go along this time. He did not shirk his duties when the service company was left short of drivers through this trip. The service company has to get the food supplies to the other company kitchens of its regiment so "Schladde" took to the wheel and showed the boys how a six-wheel drive ton and a half could really be "barreled through in a pinch."

Even though the men and trucks were scarce, the kitchens received their rations almost as fast and promptly as otherwise when four trucks hauled "Schladde" had the wheel and he really showed that he has what it takes. He has the compliments of all his many friends here with him. He handled the situation in a very efficient manner.
Pvt. Benedict Fellenz ("Benny" to us) is also doing his part of handling matters now that drivers are scarce. When the medics needed his driving ability he, too, showed that he has what it takes to handle a four-wheel drive "recon" car and a ½-ton job. Leave it to "Benny" to get there in time; we know he can do it. The army is proud of its two soldiers of Kewaskum and we know that all their friends back there can well feel the same.

Yours truly,
Several of the many pals of these soldiers

LAKE FIFTEEN

Mrs. John Gatzke spent several days with Mr. and Mrs. Wilmer Janssen at Beechwood.

Miss Jeanne Moikentine of Milwaukee is spending her vacation with Mr. and Mrs. Willie Wunder.

Mrs. John Gatzke and daughter visited Sunday with Mr. and Mrs. Henry Haferman and family at Dundee.
Mr. and Mrs. Gust. Lavrenz, Sr. of Campbellsport spent Tuesday and Wednesday with Mr. and Mrs. Willie Wunder.

OLD TIME DANCE at Gonring's Resort, Big Cedar lake this Sunday, Aug. 10. Music by "Pep" Babler and his orchestra. Admission only 30c. Everybody Welcome.—adv.

Mr. and Mrs. Harry Honuth and family of Barton, Mr. and Mrs. Fred Kochs of West Bend, Mr. and Mrs. William Trapp of Beechwood, Mr. and Mrs. Edwin Krawald, Mr. and Mrs. Rob. Ramei and Mrs. C. Krawald of New Fane and Mr. and Mrs. Reuben Schwertfeger of Brandon spent Sunday with Mr. and Mrs. Willie Wunder.

OUR DEMOCRACY

THE GROWTH OF CONSERVATION

1,300,000 SQUARE MILES OF AMERICA WERE ONCE COVERED BY FORESTS.— SMALL WANDER OUR FORERUNNERS WERE CARELESS OF TIMBER.

WHILE THE WEST WAS BEING OPENED— WASTEFULNESS WAS GENERAL

THEN WE WOKE UP PUBLICLY AND PRIVATELY

TODAY— WE ARE CONSERVING FOR OURSELVES AND POSTERITY,— BY PRESERVING FORESTS, HARNESSING STREAMS, PREVENTING SOIL EROSION, AND HAVE MORE LIFE INSURANCE POLICIES AND SAVINGS BANK ACCOUNTS THAN WE HAVE INHABITANTS.

Twenty-five Years Ago

(1916)
Recent deaths included those of Avery R. Van Blaroom, 62, of New Prospect, brother of the late John Van Blaroom of this village; Jacob Heid, 67, of the town of Scott; Gerhard Junk of St. Michaels, brother of Mrs. Barbara Fellenz of Kewaskum, and Wm. Patow of Schleisingerville, formerly of Wayne.

Shortly before going to press the stork hovered over the home of the editor (George Schmidt) and left an 8 pound baby girl, Mr. and Mrs. John Marx of this village are also the parents of a son.

Chas. Groeschel has purchased a player piano from P. J. Haug & Co.

Quite a number from here contemplate hearing President Wilson deliver an address at the auditorium in Milwaukee.

August Ebenreiter, who the past six months had charge of a lumber yard at Miles City, Mont., visited in the village before returning to Montana to take over a lumber yard he purchased at Two Dot.

The local fire department was called out for the first time in four years when the alarm was sounded that Koch's elevator was afire. All members responded quickly but before the apparatus was ready for action the fire was extinguished. Damage amounted to \$50.

The wedding of Edward Emmer of the town of Wayne and Adela Bingen was solemnized at St. Anthony.
A deal was perfected whereby Wm. Schaub, Jr. of this village purchased the garage of Geo. Kippenhan. Consideration \$7,000. Mr. Schaub had been employed at the John Schaefer garage.

NOTICE OF HEARING ON FINAL SETTLEMENT AND DETERMINATION OF INHERITANCE TAX
State of Wisconsin, County Court, Washington County
In the Matter of the Estate of Louis Foerster, deceased.
Notice is hereby given that at a term of said Court to be held on Tuesday, the 25th day of August, 1941, at 2:30 o'clock in the afternoon of said day, at the Court House in the City of West Bend, in said County, there will be heard and considered:

The application of Bank of Kewaskum, administrator of the estate of Louis Foerster, deceased, late of the Town of Kewaskum, in said County, for the examination and allowance of its final account, which account is now on file in said Court, and for the allowance of debts or claims paid in good faith without filing or allowance as required by law, and for the assignment of the residue of the estate of said deceased to such persons as are by law entitled thereto; and for the determination and adjudication of the inheritance tax, if any, payable in said estate.
Dated July 29th, 1941.
By Order of the Court,
Cannon & Meister, F. W. Bucklin
8-1-3 Attorneys Judge

It is important that eggs be gathered often in hot weather and kept cool until they reach market if they are to command the best market returns.

ST. KILIAN

Charles Price and L. Campbell of St. Paul visited several days with friends. Mr. and Mrs. Gust. Freske and daughter Lillian of Butler visited friends.

Leo and Ray Strobel, Louis Schaeffer and Leo Heisler visited at Muskego lake Sunday.
Mr. and Mrs. Ralph Ruplinger and family have moved into the former Peter Flashch home.
Mr. and Mrs. Ira Maney and daughter of Milwaukee visited Sunday with Mrs. Caroline Strobel.

Rev. Sylvester Harter of Shawnee, Oklahoma, spent several days with Mrs. Marie Strachota and family.
Mr. and Mrs. Lawrence Karnitz and family of Two Rivers spent the week end with the Fred Karnitz family.

Mr. and Mrs. Joseph Giefer of Lomira and Mr. and Mrs. Kilian Reindl were Sheboygan callers Wednesday.
St. Kilian defeated St. Lawrence on Sunday by a score of 16-13. Sunday St. Kilian will play Nabob on the former's diamond.

Did You Sleep Last Night?

Enjoy COOL HOME COMFORT with ELECTRIC ATTIC VENTILATOR

It's true that you can't have a refreshing night's sleep even in hot summer weather—and wake up really refreshed.

By attic ventilation, cooler, fresher night air is brought in through doors and windows. The blanket of hot air is expelled from the attic. The whole house is cooled off.

Enjoy cool comfort night and day by installing a modern attic ventilating system to keep fresh cool air circulating through all the rooms in your home.

KEWASKUM, WIS., FRIDAY, AUGUST 8, 1941

Zoning Ordinance Washington County, Wisconsin

The Washington County Board of Supervisors, in an effort to promote the health, safety, and general welfare of the county, and to provide for the orderly development of the county, do hereby enact the following ordinance:

Section I. **PURPOSE AND SCOPE.** The purpose of this ordinance is to regulate the location, height, area, and use of buildings and structures, and to provide for the orderly development of the county.

Section II. **DISTRICTS.** The boundaries of the aforesaid six (6) districts are shown upon the map of Washington County, Wisconsin, attached hereto, being designated as the "Zoning Map of Washington County," dated 1940, and made a part of this ordinance.

Section III. **RESIDENCE DISTRICT "A".** In the Residence District "A," no building or premises shall be used and no building shall hereafter be erected or structurally altered, unless otherwise provided in this ordinance, except for one or more of the following specified uses:

1. Single Family Residences.
2. Accessory Buildings.
3. Home Occupations (not involving the conduct of a business on the premises).
4. Telephone Offices; Telephone, Telegraph and Power Transmission Lines.
5. Park, Playgrounds, Golf Courses and Private Clubs except those whose principal activity is a service customarily carried on as a business.
6. Nurseries and Greenhouses for the propagation of plants only.
7. Farming and Gardening—except farms operated for the disposal or reduction of garbage, sewage, rubbish or offal, fur farms and stock farms.
8. Uses customarily incident to any of the above permitted uses when located on the same lot and not involving the conduct of a business, including the office of a physician, surgeon or dentist when situated within the dwelling provided that no name plate exceeding one (1) square foot in area shall be permitted.
9. Signs pertaining to the lease, hire or sale of the premises, not more than two (2) square feet in area.
10. Churches, Schools, Libraries, Museums and Charitable Institutions.

Height and Area. Lot Area: Buildings or parts of buildings hereafter erected or structurally altered shall provide an area of not less than seven thousand two hundred (7200) square feet per family and no such lot shall be less than twenty-five (25) feet wide. In Lake and Stream plats, such lots shall be not less than eight thousand (8000) square feet in area.

Height: Buildings or parts of buildings hereafter erected or structurally altered shall not exceed two and one-half (2½) stories or thirty-five (35) feet in height.

Side Yard: There shall be a side yard on each side of a building.

Rear Yard: There shall be a rear yard of not less than twenty-five (25) feet in depth and no accessory building shall occupy more than twenty-five (25) per cent of the area of such rear yard.

Setback: See Section X—Highway Setback Lines.

Section IV. RESIDENCE DISTRICT "B". In the Residence District "B," no building or premises shall be used and no building shall hereafter be erected or structurally altered, unless otherwise provided in this ordinance, except for one or more of the following specified uses:

1. All uses permitted in the Residence District.
 2. Roadside Stands.
 3. Dams and Hydro-electric Stations.
- Height and Area:** Lot Area: Buildings or parts of buildings hereafter erected or structurally altered shall provide an area of not less than two and one-half (2½) stories in height and no accessory building shall be erected or structurally altered, unless otherwise provided in this ordinance, except for one or more of the following specified uses:

1. Single Family Residences.
2. Accessory Buildings.
3. Home Occupations (not involving the conduct of a business on the premises).
4. Telephone Offices; Telephone, Telegraph and Power Transmission Lines.
5. Park, Playgrounds, Golf Courses and Private Clubs except those whose principal activity is a service customarily carried on as a business.
6. Nurseries and Greenhouses for the propagation of plants only.
7. Farming and Gardening—except farms operated for the disposal or reduction of garbage, sewage, rubbish or offal, fur farms and stock farms.
8. Uses customarily incident to any of the above permitted uses when located on the same lot and not involving the conduct of a business, including the office of a physician, surgeon or dentist when situated within the dwelling provided that no name plate exceeding one (1) square foot in area shall be permitted.
9. Signs pertaining to the lease, hire or sale of the premises, not more than two (2) square feet in area.
10. Churches, Schools, Libraries, Museums and Charitable Institutions.

ed unless otherwise provided in this section, except for one or more of the following specified uses:

Section V. **RECREATION DISTRICT.** In the Recreational District, no building or premises shall be used and no building shall hereafter be erected or structurally altered, unless otherwise provided in this ordinance, except for one or more of the following specified uses:

1. Single Family Residences.
 2. Accessory Buildings.
- Height and Area:** Lot Area: Buildings or parts of buildings hereafter erected or structurally altered shall provide an area of not less than two and one-half (2½) stories or thirty-five (35) feet in height.

Height: Buildings or parts of buildings hereafter erected or structurally altered shall not exceed two and one-half (2½) stories or thirty-five (35) feet in height.

Side Yard: There shall be a side yard on each side of a building.

Rear Yard: There shall be a rear yard of not less than twenty-five (25) feet in depth and no accessory building shall occupy more than twenty-five (25) per cent of the area of such rear yard.

Setback: See Section X—Highway Setback Lines.

Section VI. CONSERVANCY DISTRICT. In the Conservancy District, no building or premises shall be used and no building shall hereafter be erected or structurally altered, unless otherwise provided in this ordinance, except for one or more of the following specified uses:

1. All uses permitted in the Residence District.
 2. Roadside Stands.
 3. Dams and Hydro-electric Stations.
- Height and Area:** Lot Area: Buildings or parts of buildings hereafter erected or structurally altered shall provide an area of not less than two and one-half (2½) stories in height and no accessory building shall be erected or structurally altered, unless otherwise provided in this ordinance, except for one or more of the following specified uses:

1. All uses permitted in the Residence District.
 2. Roadside Stands.
 3. Dams and Hydro-electric Stations.
- Height and Area:** Lot Area: Buildings or parts of buildings hereafter erected or structurally altered shall provide an area of not less than two and one-half (2½) stories in height and no accessory building shall be erected or structurally altered, unless otherwise provided in this ordinance, except for one or more of the following specified uses:

1. All uses permitted in the Residence District.
2. Roadside Stands.
3. Dams and Hydro-electric Stations.

three (3) acres in area and no such lot shall be less than two hundred (200) feet wide.

Height: No building or part of a building designed, used or intended to be used for human occupancy shall be more than two and one-half (2½) stories or thirty-five (35) feet in height.

Side Yard: There shall be a side yard on each side of a building. The aggregate width of such side yards shall be not less than twenty-five (25) feet and no single side yard shall be less than ten (10) feet wide.

Rear Yard: There shall be a rear yard of not less than twenty-five (25) feet in depth and no accessory building shall occupy more than twenty-five (25) per cent of the area of such rear yard.

Setback: See Section X—Highway Setback Lines.

Section VII. AGRICULTURAL DISTRICT. In the Agricultural District no building or premises shall be used and no building shall hereafter be erected or structurally altered, unless otherwise provided in this ordinance, except for one or more of the following specified uses:

1. All uses permitted in the Residence, Conservancy and Recreational Districts.
2. Aircraft Landing Fields, Hangers and Equipment.
3. General Farming—Including horticulture, dairying, livestock and poultry raising and other similar enterprises or uses excepting farms operated for the disposal of garbage, sewage, rubbish or offal and uses which are hazardous or noxious by reason of the emission of smoke, dust, gas, noise or odors.
4. Manufacturing or processing of natural resources indigenous to Washington County.
5. Lodging and Boarding Houses.
6. Agricultural Warehouses.

Height and Area: Lot Area: Buildings or parts of buildings hereafter erected or structurally altered shall provide an area of not less than two and one-half (2½) stories in height and no accessory building shall be erected or structurally altered, unless otherwise provided in this ordinance, except for one or more of the following specified uses:

1. All uses permitted in the Residence, Conservancy and Recreational Districts.
2. Aircraft Landing Fields, Hangers and Equipment.
3. General Farming—Including horticulture, dairying, livestock and poultry raising and other similar enterprises or uses excepting farms operated for the disposal of garbage, sewage, rubbish or offal and uses which are hazardous or noxious by reason of the emission of smoke, dust, gas, noise or odors.
4. Manufacturing or processing of natural resources indigenous to Washington County.
5. Lodging and Boarding Houses.
6. Agricultural Warehouses.

more than sixteen (16) feet in height.

Side Yard: There shall be a side yard on each side of a building. The aggregate width of such side yards shall be not less than twenty-five (25) feet and no single side yard shall be less than ten (10) feet wide.

Rear Yard: There shall be a rear yard of not less than twenty-five (25) feet in depth and no accessory building shall occupy more than twenty-five (25) per cent of the area of such rear yard.

Setback: See Section X—Highway Setback Lines.

Section VIII. COMMERCIAL DISTRICT. In the Commercial District no building or premises shall be used and no building shall hereafter be erected or structurally altered, unless otherwise provided in this ordinance, except for one or more of the following specified uses:

1. All uses permitted in the Agricultural District.
2. Hotels.
3. Temporary Structures.
4. Business Uses, retail and wholesale, except the storage of old iron, rags, bottles and junk, automobile wrecking yards and such uses as are hazardous and uses which are noxious by reason of the emission of smoke, gas, dust, noise or odors.
5. Any kind of processing or treatment which is clearly incidental to the conduct of a retail or wholesale business conducted on the premises.

Height and Area: Lot Area: Buildings or parts of buildings hereafter erected or structurally altered shall provide an area of not less than two and one-half (2½) stories or thirty-five (35) feet in height.

Height: Buildings or parts of buildings hereafter erected or structurally altered shall not exceed two and one-half (2½) stories or thirty-five (35) feet in height.

Side Yard: There shall be a side yard on each side of a building or part of a building used for human habitation shall provide a lot area of not less than eight thousand (8000) square feet per family and no such lot shall be less than sixty (60) feet in width.

Setback: See Section X—Highway Setback Lines.

6. Tourist Camps when such camps provide not less than eight hundred (800) square feet of lot area for each cabin, trailer, tent or house car and when such camp is clearly bounded by a fence or hedge; provided, however, that no person, persons or party other than the owner shall occupy any tourist camp for more than ninety (90) days in any one year.

Height and Area: Lot Area: Buildings or parts of buildings hereafter erected or structurally altered shall provide an area of not less than two and one-half (2½) stories or thirty-five (35) feet in height.

Height: Buildings or parts of buildings hereafter erected or structurally altered shall not exceed two and one-half (2½) stories or thirty-five (35) feet in height.

Side Yard: There shall be a side yard on each side of a building or part of a building used for human habitation shall provide a lot area of not less than eight thousand (8000) square feet per family and no such lot shall be less than sixty (60) feet in width.

Setback: See Section X—Highway Setback Lines.

Section IX. INDUSTRIAL DISTRICT. In the Industrial District a building or premises may be used for any use except the following:

1. Residential, Education and Institutional Uses.
 2. Uses which are hazardous and uses which are noxious by reason of the emission of smoke, dust, gas, odors or noise.
- Height:** Buildings or parts of buildings hereafter erected or structurally altered shall not exceed four (4) stories or fifty (50) feet in height.

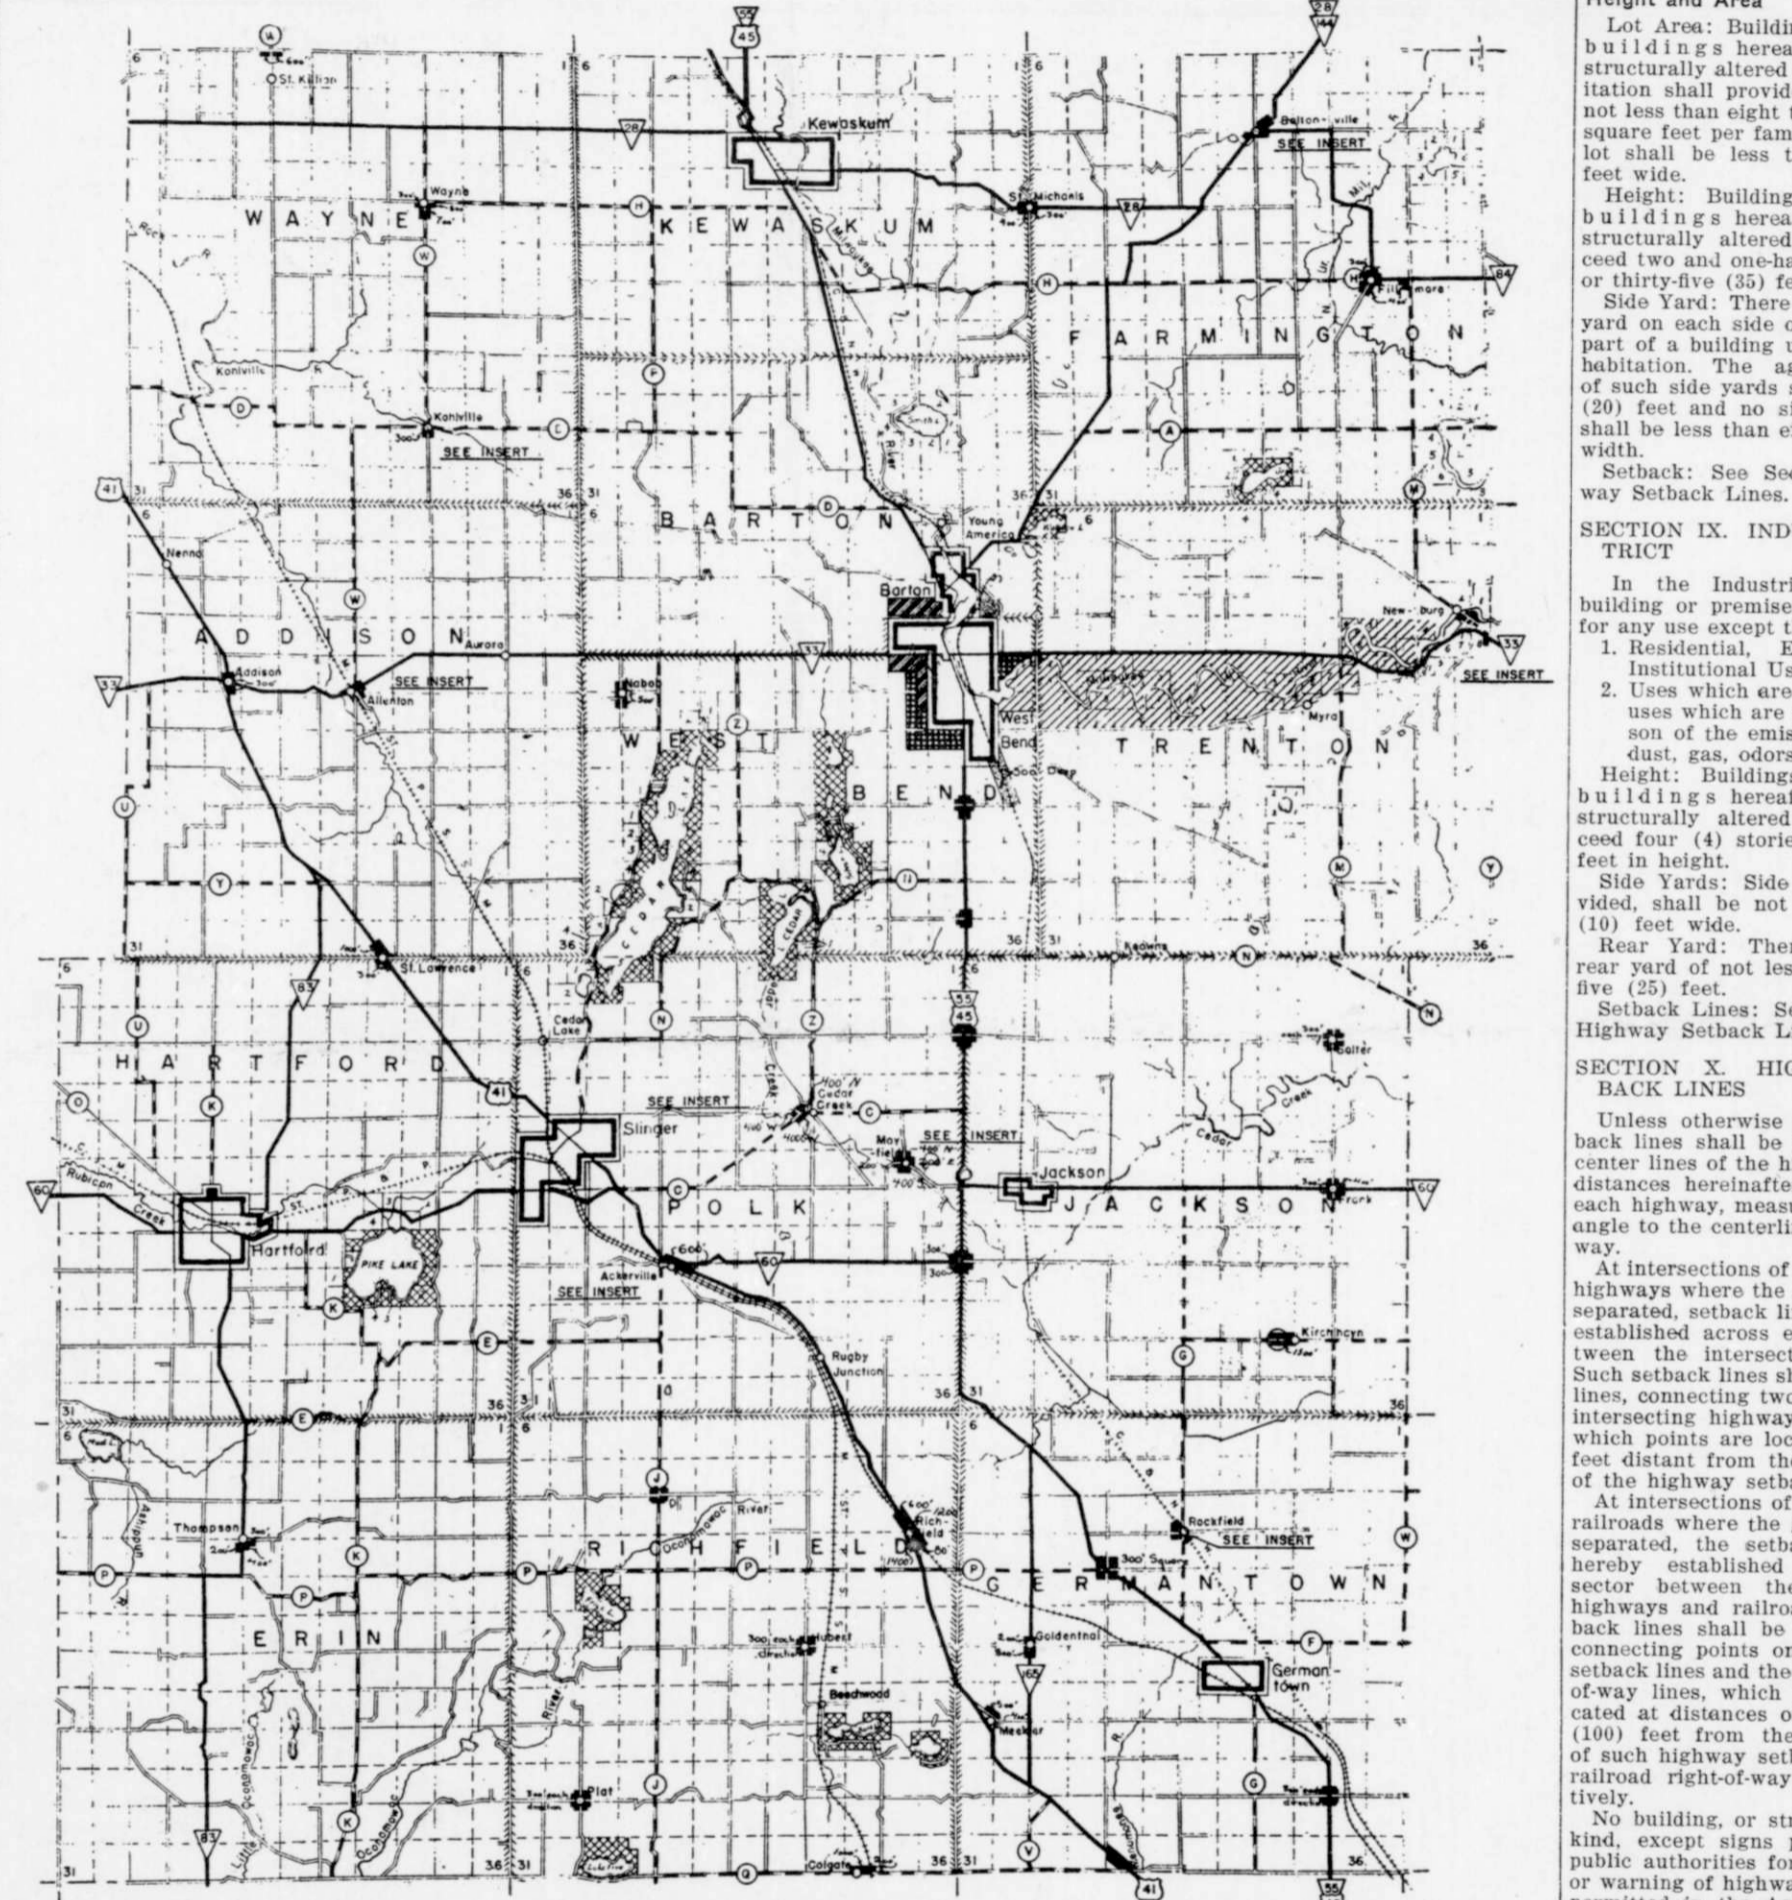

Side Yards: Side yards, if provided, shall be not less than ten (10) feet wide.

Rear Yard: There shall be a rear yard of not less than twenty-five (25) feet.

Setback Lines: See Section X—Highway Setback Lines.

Section X. HIGHWAY SETBACK LINES. Unless otherwise described, setback lines shall be parallel to the center lines of the highways at the distances hereinafter specified for each highway, measured at a right angle to the centerline of the highway.

At intersections of highways with highways where the grades are not separated, setback lines are hereby established across each sector between the intersecting highways and railroads. Such setback lines shall be straight lines connecting two points on the set-back lines and the railroad right-of-way lines, which points are located at distances of one hundred (100) feet from the intersections of such highway setback lines and railroad right-of-way lines respectively.

shall be less than ten (10) feet in width.

Section VI. CONSERVANCY DISTRICT. In the Conservancy District, no building or premises shall be used and no building shall hereafter be erected or structurally altered, unless otherwise provided in this ordinance, except for one or more of the following specified uses:

1. All uses permitted in the Residence District.
 2. Roadside Stands.
 3. Dams and Hydro-electric Stations.
- Height and Area:** Lot Area: Buildings or parts of buildings hereafter erected or structurally altered shall provide an area of not less than two and one-half (2½) stories in height and no accessory building shall be erected or structurally altered, unless otherwise provided in this ordinance, except for one or more of the following specified uses:

1. All uses permitted in the Residence, Conservancy and Recreational Districts.
2. Aircraft Landing Fields, Hangers and Equipment.
3. General Farming—Including horticulture, dairying, livestock and poultry raising and other similar enterprises or uses excepting farms operated for the disposal of garbage, sewage, rubbish or offal and uses which are hazardous or noxious by reason of the emission of smoke, dust, gas, noise or odors.
4. Manufacturing or processing of natural resources indigenous to Washington County.
5. Lodging and Boarding Houses.
6. Agricultural Warehouses.

Lot Area: Buildings or parts of buildings hereafter erected or structurally altered shall provide an area of not less than two and one-half (2½) stories or thirty-five (35) feet in height.

Height: Buildings or parts of buildings hereafter erected or structurally altered shall not exceed two and one-half (2½) stories or thirty-five (35) feet in height.

Side Yard: There shall be a side yard on each side of a building or part of a building used for human habitation shall provide a lot area of not less than eight thousand (8000) square feet per family and no such lot shall be less than sixty (60) feet in width.

Setback: See Section X—Highway Setback Lines.

Section IX. INDUSTRIAL DISTRICT. In the Industrial District a building or premises may be used for any use except the following:

1. Residential, Education and Institutional Uses.
 2. Uses which are hazardous and uses which are noxious by reason of the emission of smoke, dust, gas, odors or noise.
- Height:** Buildings or parts of buildings hereafter erected or structurally altered shall not exceed four (4) stories or fifty (50) feet in height.

Side Yards: Side yards, if provided, shall be not less than ten (10) feet wide.

Rear Yard: There shall be a rear yard of not less than twenty-five (25) feet.

Setback Lines: See Section X—Highway Setback Lines.

Section X. HIGHWAY SETBACK LINES. Unless otherwise described, setback lines shall be parallel to the center lines of the highways at the distances hereinafter specified for each highway, measured at a right angle to the centerline of the highway.

ZONING ORDINANCE
Washington County,
Wisconsin

(Continued from page 1)

"Zoning Map of Washington County" such location shall be determined by the use of the scale contained on such map.

SECTION XIV. INTERPRETATION AND APPLICATION.

It is not intended by this ordinance to interfere with or abrogate or annul any existing easements, covenants, or other agreements between parties, nor is it intended by this ordinance to repeal, abrogate, annul or in any way to impair or interfere with any existing provisions of law or ordinance or any rules, regulations or permits previously adopted, or issued, or which shall be adopted or issued pursuant to law, relating to the use of buildings or premises; provided, however, that where this ordinance imposes a greater restriction upon the use of buildings or premises than is imposed or required by such existing provision of law or ordinance or by such rules, regulations, agreements, covenants, or permits, the provisions of this ordinance shall control.

Nothing contained herein shall be construed to prohibit the permitted use of premises or the erection or alteration of buildings for uses permitted in the various districts on a single lot or tract of land of less area than is required by the district regulations for the district in which such premises

or building is located; provided, that such single lot or tract of land was recorded as such previous to the passage of this ordinance.

SECTION XV. BOARD OF ADJUSTMENT.

1. There shall be a board of adjustment consisting of three (3) members to be appointed by the chairman of the county board with the approval of the county board. The terms of the first three members so appointed shall be for one (1), two (2), and three (3) years respectively. Successors shall be appointed in like manner at the expiration of each term and their terms of office shall be three (3) years in all cases beginning July first in the year in which they are appointed and until their successors are appointed. The members of the board shall all reside within the county and outside of the limits of incorporated cities and villages; provided, however, that no two members shall reside in the same town. The board shall choose its own chairman. Vacancies shall be filled for the unexpired term of any member whose term becomes vacant in the same manner as the original appointment.

Powers and Duties.

1. The board shall meet at the call of the chairman, and at such other times as the board may determine, at a fixed time and place.
2. All meetings of the board shall be open to the public.
3. The board shall keep minutes of its proceedings showing vote of each member upon each question, or, if absent or failing to vote, indicating such fact, and shall keep records of its examinations and other official actions, all of which

shall be immediately filed in the office of the board and shall be a public record.

4. The board shall have power to call on any other county departments for assistance in the performance of its duties and it shall be the duty of such other departments to render all such assistance as may be reasonably required.

5. The board may adopt such rules as are necessary to carry into effect the regulations of the county board.

6. In the case of all appeals, the board of adjustment shall call upon the county park commissions for all information pertinent to the decision appealed from.

Appeals.

Appeals to the board of adjustment may be taken by any person aggrieved or by any officer, department, board or bureau of Washington County affected by any decision of the administrative officer. Such appeal shall be taken within a reasonable time, as provided by the rules of the board of adjustment, by filing with the officer from whom the appeal is taken and with the board of adjustment a notice of appeal specifying the grounds thereof. The officer from whom the appeal is taken shall forthwith transmit to the board of adjustment all the papers constituting the record upon which the action appealed from was taken.

An appeal shall stay all proceedings in furtherance of the action appealed from, unless the officer from whom the appeal is taken shall certify to the board of adjustment, after the notice of appeal shall have been filed with him, that, by reason of facts stated in the certificate, a stay would cause im-

minent peril to life or property. In such case, the proceedings shall not be stayed otherwise than by a restraining order, which may be granted by the board of adjustment or by a court of record on application on notice to the officer from whom the appeal is taken and on due cause shown.

The board of adjustment shall fix a reasonable time for the hearing thereof, as well as due notice to the parties in interest, and decide the same within a reasonable time. Upon the hearing, any party may appear in person or by agent or by attorney.

The board of adjustment shall have the following powers:

- a. To hear and decide appeals where it is alleged there is error in any order, requirement, decision or determination made by an administrative official.
- b. To hear and decide special exceptions to the terms of this ordinance.
- c. Where there are practical difficulties or unnecessary hardships in the way of carrying out the strict letter of this ordinance, the board of adjustment shall have the power, in passing upon appeals, to authorize such variance from the terms of this ordinance as will not be contrary to the public interest and so that the spirit of the ordinance shall be observed and substantial justice done, provided, ever, that no such variance shall have the effect of allowing, in any district, uses prohibited in that district.
- d. To grant a permit for a temporary building for commerce or industry in a Residence, Conservancy or Agricultural District which is incidental to the residential de-

velopment but no such permit shall be granted for a period of more than one (1) year.

e. To grant a permit for the erection and use of a building or premises in any location to a public service corporation or for a public utility purpose which the board finds reasonably necessary for the public conveniences, safety or welfare.

f. To grant a permit for the location of uses listed in Section VIII (2) in the Industrial District, when the Board has determined that the proposed location and use is such as will not be detrimental, hazardous or injurious to the community, nor noxious by reason of the emission of smoke, dust, gas, noise or odors.

g. After public hearing, to designate areas in the Agricultural District to be used for public dumping grounds. The boundaries of such areas shall be defined and they shall be located not less than one-half (1/2) mile from the boundary of the Residential, Conservancy or Recreational District and not less than seven hundred fifty (750) feet from any Federal, State, County Trunk Highway or Town Road. The location of such public dumping grounds may be changed from time to time by the same method by which they were originally established.

h. After public hearing, grant a permit for the structural alteration or erection of a building or structure located or to be located within one (1) mile of the boundary lines of any licensed airport, to a height greater than permitted by this ordinance provided that the Board first shall have determined that the height, use and location of such building or structure will not

constitute a hazard to the normal, safe operation of aircrafts.

SECTION XVI. BUILDING PERMITS; CERTIFICATES OF OCCUPANCY AND USE.

1. No building or structure or any part thereof shall hereafter be built, enlarged, altered, repaired or moved within the areas subject to the provisions of this ordinance until a building permit has been obtained from the County Clerk. Such permit shall be posted in a prominent place on the premises prior to and during the period of construction, alteration, repair or moving. Forms for application for building permits shall be supplied by the County Clerk and a record of all permits issued shall be kept in the offices of the County Clerk.

The term "building" as used in this section shall include any building or structure; also any material alteration in the heating plant, sanitary facilities or mechanical equipment of any such building which may effect a change in its use.

2. Certificate of occupancy and compliance shall be applied for and issued within ten (10) days after the erection, alteration, repair or moving of such building shall have been completed in conformity with the provisions of this ordinance and in conformity with the statements on the application for a building permit.

A record of all certificates issued shall be kept in the office of the County Clerk.

3. No vacant land shall be occupied or used and no building now or hereafter erected, altered, repaired or moved, shall be occupied,

used or changed in use until a certificate of occupancy and compliance shall have been issued by the County Clerk, stating that the proposed use of the building or vacant lands complies with the provisions of the Washington County Zoning Ordinance.

4. A building permit shall have lapsed and be void unless the operations described in such permit are commenced within six months from the date of its issuance.

SECTION XVII. CHANGES AND AMENDMENTS.

The County Board of Supervisors of Washington County, Wisconsin, may, from time to time, alter, supplement, or change the boundaries and regulations contained in this ordinance in the manner provided by law.

SECTION XVIII. VIOLATION AND PENALTY.

The provisions of this ordinance shall be enforced by or under the direction of the county board of supervisors. Any person, firm, association or corporation who violates, disobeys, omits, neglects or refuses to comply with or resists the enforcement of any of the provisions of this ordinance shall, upon conviction thereof, be subject to a fine of not less than ten dollars (\$10.00) nor more than two hundred dollars (\$200.00), together with the costs of the action, or by imprisonment in the county jail of not more than thirty (30) days and every day of violation shall constitute a separate offense. Compliance therewith may also be enforced by injunctive order at the suit of the county or the owner or owners of real estate within the dis-

trict affected by this ordinance.

SECTION XIX. REPEALING AND SUPPLEMENTING.

The several ordinances of this ordinance which are severable, and if the repeal thereof in any particular instance is not in the public interest, shall not be affected by the repeal of this ordinance.

SECTION XX. EFFECTIVE DATE.

All ordinances in effect at the time this ordinance becomes law shall remain in effect until their expiration date.

SECTION XXI. PUBLICATION.

This ordinance and its publication shall be in the Towns of:

each of said Towns its approval to the effect of in the manner provided in Section 59.7, Wisconsin Statutes.
