#### KEWASKUM STATESMAN, KEWASKUM, WIS.

## WAR CHIEF SAYS U.S. REQUIRES 11 MILLION MEN TO WHIP AXIS; HOME FRONT MUST BE ADJUSTED

## Patterson Claims Nazis Have 13 Million Men at Their Command; Jap Also Strong in Pacific Area.

By ROBERT P. PATTERSON, Undersecretary of War

Questions raised in recent weeks as to whether America shall have the army of 8,200,000 men which its military leadership has determined to be the minimum with which we can expect to defeat our enemies have not, it seems to me, given due consideration to military necessity.

We are out to win this war. The nation has entrusted the responsibility for this victory to its military leaders. This leadership-the joint chiefs of staff of the army and navy, after the most careful analysis of our enemies' strength, has decided that we must build an armed force of approximately 11,000,000, which includes an army of 8,-200,000 for 1943-44.

aid, a phase of the Lend-Lease Our own men have been in Act upon which a vital part of contact only with the smallest of the cooperative action of the the Axis armies-a part of its Tunisian force of less than a Photo at top shows American quarter of a million men. But soldiers at work in a kitchen fatigue the striking force of this powerpantry in Australia, with newly ful foe has already been felt by erected barracks in background. our troops.

The German field armies are assisted by more than one million men in semi-military organizations, such as the military police, engineers, and supply depots, which in our army are included among service troops.

Reliable sources indicate that the combined number of those in the German and Italian armed forces and those directly assisting them runs well over 13 million. It is evident at this point that the superiority of our enemies in the European theater is of ominous proportions.

A similar analysis in the Pacific area does not brighten the picture. The Japanese army exceeds by many divisions the forces that the United Nations have been able to equip and place in opposition.

Yet the United Nations, and particularly this country, have the potential power to overcome this numerical superiority. These potentialities must be converted to actuality. They must be harnessed and driven toward a single goal, the defeat of our enemies. In that drive our country, the latest of the ma-

American troops land in North Africa. They are the vanguard of a proposed force of 8,200,000 men who will be needed to defeat the Axis, war official says.

needed by our forces, by our Allies | for more arduous labors and sacri-

account has also been taken of the ability of our rapidly expanding and supplies overseas. The conclusion reached was that it was a hard job, but that it could and must be But there are critics of the army

program who ask, "Why should we fight? Why not give more supplies to the British, the Chinese and the Russians and let them fight for us?" The British, with the smallest available manpower and subject to savage aerial attacks, have come nearer than any other of the United

done.

and by our civilian economy. Full fices on the home front. Realism must extend from the fox holes and pill-boxes on the firing merchant marine to deliver soldiers line to the factories and homes of America. When our country is at war, none of us can escape the responsibility of viewing the routine, as well as the emergency duties of life, in the light of their bearing upon the final result-uncon ditional surrender by our enemies.

This nation has done a magnificent job in production for war. But there is an even heavier task ahead. We will have serious problems because of the increasing drain on our manpower. But similar prob lems have been solved in England, Russia, Germany and Japan. Nonessential activities are out for the duration and these countries are fully mobilized-to a much greater extent than we. On every one rests the equal obligation to give service either in the armed forces or on the home front. Why should we suppose that we can wage war successfully without mobilizing our human resources with a thoroughness at least approaching that of our enemies and

ing wool for replacement uniforms for U. S. soldiers and nurses, thus saving valuable shipping space. U. S. soldiers here use British-

American soldiers can obtain British and American goods in post exchanges throughout the United Kingdom. All the British-made goods, including some items such as candy, chocolate and note paper, are given cash-free as reciprocal aid. Such payments as the soldiers make go to the U.S. army finance department.

New Zealand butter in the making. Our army has received 2,032,000 pounds of this staple from New Zealand, under reciprocal lend-lease. Most of the food for American armed forces stationed in New Zealand has been received under this arrangement.

Pilots of the first U. S. Spitfire squadron in Great Britain run to their planes. This airfield was turned over to us by England.

#### To Teach Tropic Farming

An agricultural school that is expected to help offset the lack of ed from the Far East is now being necessary because modern tropical requires many well-trained men to the Far East.

Automatic Blackout The loading and unloading areas of a large New England manufactropical products formerly import- turing company are completely enclosed so that freight cars and trucks built in Honduras. Such schools are can be run inside the plant to handle their loads. Since it is frequently agriculture is highly technical and necessary at night to raise the large doors in these areas, under blackout lead in the new movement for grow- operations all lights in the immediing in Middle America many of the ate vicinity are extinguished autotropical products for which the Unit- matically when the doors are raised. ed States formerly depended upon and switched on again after they are lowered

for powers to enter the war, mus play the most important part. Army Determines Size After

#### Careful Study of Its Needs

Offensive action requires superiority in numbers. This is the reason we need an army of 8,200,000 including officers by the end of this year. The navy, the marines and the coast guard need 2,600,000 this year. That makes a total of 10,800,000 men and women that must be in the armed forces by the end of this year. This will be less than 8½ per cent of our total population. Thirteen and a half per cent of the German popula-

tion is in the armed forces. Ten million, eight hundred thousand is not a figure pulled out of a hat. It is the requirement determined by those charged with the heavy responsibility of winning this war.

General Marshall says that we need so many planes and so many tanks to win the war. Is there anyone in America who would question his judgment? Admiral King says that we need so many escort ships and destroyers to beat the Axis. Is there anyone in America who would question his judgment? The expert views of our military leaders are accepted on our needs for guns and ships. Why should anyone question their judgment as to the number of men that they need to use these weapons and man these ships?

The staffs of the army and the navy under General Marshall and Admiral King, in full possession of the facts, have made the military decision that a force this size is necessary to win the war. Our Commander-in-Chief, the President of all the wishing in the world does the United States, has approved this not change the nature of war and program. It is America's answer to its impact on all peoples engaged in the Axis. The Axis, I assure you, does not like that answer.

In making this decision full acof American industry and labor and

United Nations combined. We should give tribute to their dead, for they have sacrificed countless lives. But their manpower is not inexhaustible.

We're In the War, Too, and It Will Be Won the Hard Way

This is our war just as much as it is the war of the British, the Russians and the Chinese. We are sending supplies to the utmost of our ability to these and the other United Nations. We will continue to do so. But it will be our soldiers and sailors, and those of our Allies, that will ability so overwhelmingly superior win the final victory. Elemental truths are often the

most difficult to grasp. Throughout all ages people have tried to avoid

can Expeditionary force of 2,000,000 facing up to the reality that war added to the strength of our Allies, is grim business; have longed for that made the enemy surrender. On an easy war; and have hoped that November 11, 1918, the Allies had somehow, some way, victory could 32 fresh divisions in reserve. The be gained without risking too much Germans only had two. The Allies or without experiencing the stark had a total of 213 divisions. The unpleasantness of the conflict. But Germans had 185. The Germans were aware of these figures. Their ability to reason from figures is well known. They decided that they could it, whether in the battle lines or at not win, and they quit.

Now, as then, the enemy must be The hour for realism has arrived made to realize that they cannot count has been taken of the ability for every American. We must brace win. Now, as then, we must make ourselves for mounting casualty lists them see that we are going to see agriculture to produce the supplies | and reverses on the battle front, and | the job through.

## .. A message about the Food Front to every one in this community!

Seaman Jones has a right to talk. He is a farmer's son, and a member of the crew of a hard-fighting U. S. destroyer.

He went through the sneak attack at Pearl Harbor, and lived to fight another day.

His tough ship put in some hard slugging at the Japs in the Battle of the Solomons.

He wants to talk, because he just got a letter trom his Dad back on the farm, telling him that there is going to be a shortage of help to harvest and can our 1943 crop of peas and corn.

And Seaman Jones is puzzled. He wonders why everyone back home doesn't pitch in and help. Isn't food just as important to Victory as planes, tanks and guns?

The answer to that one, Seaman Jones, is that while most of the home folks realize how vital food is in this war, many of them don't yet realize this fact-

> America is going to need every man, woman and child to help pick and can the crop, so that it will be ready to keep our boys strong and well nourished.

Your home folks will come through, Seaman Jones. Not one of them who knows the facts will let you down, or any of our boys who are fighting for America.

Congress Moves to Defer Farm Workers; Climax of Tunisia Campaign Approaches As Allies Close In on Rommel's Forces; Manpower Shortage Grows More Critical

(EDITOR'S NOTE: When opinions are expressed in these columns, they are those of Western Newspaper Union's news analysts and not necessarily of this newspaper.) Released by Western Newspaper Union.

Lining the deck of a U. S. submarine as it docks at Pearl Harbor after a successful raid on the Jap base on Makin island, these marine raiders are ready for the comforts of shore for a while. The raiders, transported to the island and back aboard American submarines, wiped out the garrison and all enemy installations there.

#### FARM LABOR:

#### Deferment Act Passed

Congress demonstrated unmistakably that it meant business in dealing with the farm labor shortage.

Evidence of this determination was found in the senate's action in passing legislation to defer all essential farm workers from military service. The measure which had required house approval would direct draft boards to defer men employed substantially full-time in production of essential foods and fibers. Although Secretary of War Henry L. Stimson had strenuously opposed blanket farm deferments, sponsors of the legislation contended such action was necessary.

The house meanwhile had moved to combat the farm labor shortage in another direction, by passing a bill appropriating \$261,000,000 to recruit and train 3,500,000 men and women as a "land army."

#### SHOWDOWN:

#### Looms in Tunisia

Evidence had continued to mount that the Allies were preparing a concerted drive that would bring the North African campaign to a climax.

As the ring around the Axis defenders of coastal Tunisia was tightened by the Allied command, two farms. developments spelled progress to-

ward the final showdown. as the unsurge of

## **RUSSIA:**

#### See-Saw Offensives

The see-saw character of the warfare on the Russian front had continued with Soviet offensives pushing on without interruption toward the goals of Smolensk and Staraya Russa, while German counter-offensives were striking with increasing power in the Kharkov sector.

The main force of the Russian drive toward Smolensk had been concentrated on a stretch of the Vyazma-Smolensk railroad. The Reds were reported as having captured scores of settlements south of Belv. Much of the fighting was reported west of the Dnieper river headwaters.

The German offensive further south had ranged from Kharkov to Kursk, with epic tank battles and a struggle for supremacy in the air. A German communique had reported that "Enemy forces encircled southeast of Kharkov have been annihilated with the exception of small remnants." Far northwest of Kharkov and on a battle line extending down into the Donets river basin, the Germans were reported concentrating their reserves and tanks on narrow sectors still held by the Rus-

#### UNITY:

#### For French Factions

Three months of unpublicized preparation had been necessary for the action that was to culminate in a meeting between Gen. Henri Giraud and Gen. Charles DeGaulle and bridge once and for all the chasm that had separated the French North African regime and the Fighting French.

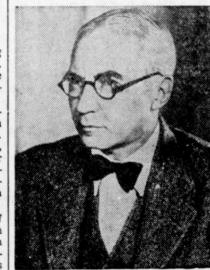

When Gen. Giraud had announced that everything reminiscent of Vichy rule was to be thrown overboard and then had followed with decisive decrees translating words into ac-tion, the day of French unity dawned.

Happily received by the DeGaullists, were Giraud's decrees nullifying all Vichy laws discriminating against Jews, restricting the activities of labor unions and banning Freemasonry.

Even before the Giraud decrees and the resignation from his government of ex-Vichy officials, Fighting French leaders meeting in London rejoiced that events in North Africa had taken a more favorable turn and that Giraud's invitation to De-Gaulle for a conference would meet a friendly reception.

Further evidence of the increasing unity of French interests was the action of French Guiana's government in breaking away from Vichy control and joining forces with General Giraud. This South American possession had previously been under control of Axis-minded Adm. Georges Robert, high commissioner

## Washington Digest **Results Justify Expenses** Of Overseas Propaganda

Axis Has Employed Elaborate Means to Get Its Views Across to Neutral Nations; U. S. Must Use Press and Radio.

#### By BAUKHAGE News Analyst and Commentator.

How about results? That is pretty WNU Service, Union Trust Building hard to reduce to statistics or even Washington, D. C. concrete statements. We know some

The other day, Elmer Davis, head Japs have surrendered with our of the Office of War Information, held a press conference. He opened it with the remark that we were witnessing an Uncle Tom's Cabin without the Simon Legree. I didn't get the significance of the remark until Davis explained that Representative Tabor, who charged Mr. Davis with using the Office of War the occupied territory. Information to distribute propagan-da for a fourth term, had been invited to share the conference but had other duties.

Obviously, the purpose of the meeting was to show how the money for the publication of propaganda camps. was being spent and a good deal of time was taken up on comparative costs of British, American and Axis propaganda efforts. If the OWI carries out present plans, it will be spending at the rate of 45 millions of dollars by the end of the year. Britain, with its separate ministry of information, is spending much more than we are-Germany probably four or five times as much. That's a rough estimate. But the figures didn't interest me so much and I'll tell you why. I had come to the meeting a little early and had been studying the array of literature-arranged on two tablesthe American and the Axis propaganda material. There were handsome publications like the German magazines "Signal," "Berlin-Rome-Tokyo," and Japan's "Nippon." "Signal" costs 75 cents a copy to produce-the art work in all of them must make "Esquire" and "Forenvious. There were tiny tune" pamphlets-these were Americanyou could slip into your hat band. The OWI's masterpiece is "Victory" which was the target of congressional attack-it isn't so bad in comparison with the expensive Axis magazines but it costs only 35 cents to produce.

Three things struck me as a result of the conference: first, if there is an even chance of obtaining the results expected, the investment is not worth quibbling about; second, since Davis admits that material got into the Roosevelt sketch which should not have and won't again, we either ought to take Davis' judgment or else fire him. Thirdly, the public hasn't had a chance to know what the propaganda is all about and the criticism of one phase of it utterly distorts the general picture Axis to a pro-Ally attitude. The of the function, purpose and value

We know that from four to six clandestine newspapers are made up chiefly from Allied propaganda material. Of course, by no means all of the

OWI propaganda is spread through publications. In fact, the radio broadcasts represent the greater part of the expenditure.

OWI is confident that this radio propaganda is not wasted as has been charged although it is admitted that the listening audience is being cut down as short-wave sets are seized or wear out and the depreciation is heavy. On the other hand, it is known that the radio broadcasts are repeated-by word of mouth and in clandestine pamphlets and newspapers.

The chief evidence that propaganda is reaching into Germany comes from two sources: first, the speeches of Goebbels and other German leaders who warn against black listening-warning not to believe the foreign propaganda-and, second, the records of trials of persons arrested for this black listening.

#### Effective in Turkey

It is stated that American propaganda has been effective in Turkey because Turks believe it whereas they have caught the Axis in too many lies. Since publications printed in Turkish are still forbidden to be sent into Turkey, the printing has to be done there or the material sent in in French or English.

In Spain, it is said that in spite of strong handicaps-that is, the power of the Falangist party which is openly pro-Axis-American propaganda has curtailed this power,

has swung many people from a proports that 55.7 per persecution of the Catholic church in under 21 were arr in 1941

MANPOWER: Supply and Demand

The problem of manpower for war industries grew more acute as the War Manpower commission placed the steel-producing districts of South Chicago-Northern Indiana on a 48hour week basis and designated 36 areas in the United States as sections in which a critical labor shortage is soon expected.

With the supply of labor for essential war work lagging, the WMC estimated that at least 2,800,000 essential jobs in munitions, transportation, agriculture and other industries must be filled this year from the less essential work classes. Included in this latter category were bartenders, porters, bellhops, night club and music hall attendants, persons engaged in the liquor trade, candy, tobacco and florists.

Labor experts indicated that in order to fill the increasing demand for workers, employers must hire more older people, train and employ more women, use boys under 18 wherever possible and use the physically handicapped for light tasks. Meanwhile, Robert P. Patterson, assistant secretary of war, urged congress to adopt legislation to draft men and women when necessary to fill war factory jobs and work on

action by American forces under Lieut. Gen. George S. ("Blood and Guts") Patton which continued on after the recapture of Gafsa and El Guettar in central Tunisia and apparently had as its ultimate goal the coastal city of Gabes. Replacing Maj. Gen. Lloyd R. Fredendall on this front, General Patton brought with him the reputation of being one of the most offensive-minded generals of the army.

Another development of high significance was the drive by General Montgomery's British Eighth army against Marshal Rommel's Mareth line positions in southeastern Tuni-Characteristically, tight-lipped Montgomery had issued no communiques concerning his early moves: first reports of the offensive had come from German sources.

Together, these two developments indicated that an Allied squeeze play was under way against Rommel's army.

LESS GASOLINE:

#### For East Coast

While the gasoline ration for "A" book holders in eastern states was cut from 3 to 1½ gallons per week, buses and street cars in their presthese motorists were given the opportunity of using the gasoline as they pleased, for the ban on pleasure driving was removed.

In making public the reduction, the Office of Price Administration, Price Administrator Prentiss M. Brown, announced that "A"-book holding industrial workers who motor to their jobs would be allowed supplemental gasoline.

Halving of the basic ration was made necessary, according to a statement by Petroleum Administrator Harold L. Ickes, because only 333,000 barrels of gasoline daily coast civilian and industrial use during April.

Henry J. Kaiser, shipbuilding 'miracle man," was at it again. This time it was on the large-scale production of 500-foot aircraft car-

riers. Some details of Kaiser's new activities were disclosed following a recent visit to the White House. Twelve shipways at Vancouver, Wash., he said, are being used for the construction of medium size airplane carriers. The rate of production is expected to reach six a month by the end of 1943.

The Kaiser carriers will be 487 feet long at the water line, with flight decks of 514 feet. They can be used either as carriers or as aircraft transports. Standard carriers are 761 feet long.

'FREEZE':

#### 200.000 Vehicles

As the nation's transportation situation grew more critical because of heavier loads and lack of new equipment, ODT Director Joseph B. Eastman moved to prevent the "migration" of vehicles from one area to another by freezing nearly 200,000 ent service.

Mr. Eastman's order applied to every vehicle carrying nine or more persons in passenger transportation in the United States, its territories and possessions.

Included in new regulations were: 93,000 school buses; 20,000 inter-city buses; 44,000 city buses; 10,000 rapid transit, elevated and subway cars; 3,000 suburban rail cars; and 3,500 trackless trolley vehicles.

At the same time, in line with the government's plans to keep the nation's automobiles rolling, OPA officials announced that additional precould be made available for East Pearl Harbor and "Victory" tires would be available to certain lower mileage ration passenger carowners.

DETROIT: New tires using steel | LONDON: More than 30,000 Gerinstead of fabric cord at an estimated saving of 15 per cent in rubber were examined by Rubber Director William M. Jeffers on a tour on October 23 and lasting until Noof a tire factory here. Dr. Sidney M. Caldwell, scientist of the firm, said only two plies of steel were necessary, compared with 10 of cotton or nylon, making possible a thin casing and minimum friction.

QTTAWA: Plans for a compulsory, nation-wide health insurance system for Canada were outlined by an advisory committee of the department of pensions and national health. The plan presented to the Dominion house of commons by Ian F. Mackenzie, minister of pensions and health would cost \$256,186,000 a year. Complete medical, nursing, hogoital care and costs of medicine would be available to all citizens. Dental care to all children under 16 years of age would also be provided. Adults above a certain wage scale would pay \$26 a year.

mans were among the approximately 75,000 Axis casualties in the battle beginning at El Alamein, Egypt, vember 5. There were likewise 7,200 German prisoners, according to a statement issued by War Secretary James Grigg. Grigg said British casualties in the battle were 13,600, or 18 per cent of Axis losses.

MADRID: Describing the present international conflict as "a war to the death" which might last six or eight years, Gen. Francisco Franco told the Spanish assembly that objectives of the World war were changed with the entry of Russia into the struggle. Referring to the spread of communism since the Russian revolution, Franco said: "It is not necessary for the Soviet armies to reach nations for the Red revolution to come. No one dreams now of a short war, or of a peace of 100 years."

#### ELMER DAVIS

mer Davis to refrain from partisan political activity.

Conceding that the OWI had indulged in propaganda on behalf of the administration in an article in the bureau's overseas magazine, 'Victory," Davis denied that there was any other evidence to support the charges.

"Our sole function is to contribute to winning the war," Davis pointed out in a memorandum to OWI's 3,000 employees. "We must take care that the utility of this office is not impaired by any action of ours, whatever injury to it may be attempted by others."

SOUTH PACIFIC:

#### Japs Show Concern

Even as Premier Hideki Tojo was warning the Japs that "the war situation is becoming more serious,' Secretary of Navy Frank Knox declared that Japan has lost 1.857,000 tons of shipping, or one-third of her tonnage at the beginning of the war. 'The journey to victory is just beginning," Knox, however cautioned. While Japan was thus exhibiting signs of concern over the war's trend, American warplanes continued to blast at the westward movement of enemy troops and supplies to the islands above Australia, attacking Jap coastal vessels off west-

ern Dutch New Guinea. Further to the south and east, Gen. Douglas MacArthur's air forces kept up a steady pounding on the big Japanese base at Rabaul in New Britain. Other United Nations airmen attacked enemy outposts in the Kai islands between Australia and New Guinea.

#### BEEF

The United States would be faced with a beef shortage even if lendlease and the armed forces took no beef, Roy F. Henderson, food distribution administrator, disclosed. The beef shortage, he said in a statement released in Washington. is not due to a drop in cattle production or slaughtering, or to government purchases, but to the abnormal food demand. Thus if government buying were to be stopped, there would still be a "beef situation.'

He has been a quiet ambassador. He has a lean, quiet look and a shrewd one too, behind neat spectacles. When he smiles a dimple that is practically a sinkhole appears in his right cheek. This is because he smiles so much more with the right side of his sharp mouth. The effect, though this description may make it seem otherwise, isn't bad at all.

IN RUSSIA a Bolshevist by any other name is just as Red. Thus Trotsky was really somebody else. So is Stalin. And Vycheslav Mikai-Like Trotsky and lovich Molotoff, whose Stalin, Molotoff department Altered Moniker of foreign affairs considers Admiral Standley's brusque

speech, was born Scriabin. Molotoff means hammer, plainly a better way to call a man who set out at 15 years of age to break the old Imperial government. Molotoff's official biography

says he was born the son of a shop assistant. That was 53 years ago. By 1905 he was a professed Marxist, and a year later joined a bolshevik group. Ten years later he was on the Bolshevik Central Committee. Meanwhile he and Stalin had met, and started their newspaper, Pravda, and Molotoff had been arrested or exiled thrice. Both Lenin and Stalin schooled Molotoff, and he likes to tell of this.

He likes, too, to boast that he is an old Bolshevist, an early bird among the revolutionists. In Russia he is called Stalin's chief aide. He is, actually, vice premier as well as commissar of foreign affairs but when the Russians say chief aide. they mean to point to his loyalty to his superior. He is Stalin's Har-

ry Hopkins. Molotoff is heavy, but not fat. His hair has grown gray, but his thick mustache is still black. His mouth is strong, confident. His wide forehead tops off a face more than ordinarily good looking.

His wife is handsome, too, and notable as the one-time commissar who gave rouge, fingernail polish,

cosmetics and all the associated doodads back to the women of Russia.

#### Minerals in Body

The human body contains calcium, 1.6 per cent; phosphorus, 0.9 per cent; potassium, 0.4 per cent; sodium, 0.3 per cent; chlorine, 0.3 per cent; sulphur, 0.2 per cent; magnesium, 0.5 per cent; and iron, 0.004 per cent; plus traces of iodine, fluorine, silica, manganese, and others.

of the OWI effort.

In the first place, these publications under consideration are not for our troops abroad or our people at home - though I believe they ought to be given some circulation here simply so that their function is understood, at least when it is compatible with the confidential nature of some of the means of distribution in enemy countries.

It is accepted as the duty and function for one political party to do all it can to discredit the leaders of the other party-according to the rules of the game of politics-but, as Davis quoted the Baltimore Sun, you have to exploit your personalities. People mean a lot more than mere ideas when you are trying to make an impression. Roosevelt can be played up as a powerful symbol to people abroad without affecting the political situation at home. That was done effectively in the case of Woodrow Wilson in the last war, his picture was worshiped all over Europe, as the symbol of the leader of a nation coming to liberate them. But when he came home, he couldn't sell his program to the American people.

#### 'Sell' Allied Cause

I tried to find out what the objective of the OWI was, whether it could show any results.

Purpose one is counter-attack. We know what German propaganda has done, first in softening countries about to be invaded; second, to keep neutrals leaning Nazi-ward. OWI wants to fight fire with fire.

The second purpose is the same as the first and more of it-not merely to nullify enemy effort but sell the prospect the idea that America can win and is winning the war and that American victory will be a greater selfish advantage to the

Germany has been used effectively in Spain.

Of course, this isn't the whole story of propaganda. All is fair in love and war and some pretty precarious tight-rope walking is sometimes done-witness democracy's tete-a-tete with Darlan which history will probably disclose was less a desertion of democratic political methods than waiving of the Queensberry rules of gallant combat. We can't expect the Allies to show their hands to the enemy and there is no use disturbing the squeamish by revealing the possible although not

entirely immaculate condition which might arise from grappling with an especially noisome enemy. What Davis did not go into at this meeting was the question of enemy propaganda directed toward us. That is a very delicate matter and sometimes governments are willing to give the enemy credit for the circulation of certain sentiments expressed by people who are just mad at their own public servants and are exercising the inherent right of grousing.

As I said before, I am much more interested in whether the propaganda job we are doing is effective. As to getting in puffs for the party in power, that is up to the party out of power to stop but one of the inescapable advantages of being an "in" in wartime is that you can squelch some opposition on the ground of patriotism. On the other hand, there was never an administration yet that wasn't thrown out after a war so there is some compensation-furthermore, the party of the opposition doesn't share the

Now that Governor Bricker has announced that he expects the Ohio delegation will support him as a favorite son candidate for the presiprospect than a Nazi victory would dency, politics will be raising its lovely head in every headline.

#### CISTERNS

THE time is approaching when a cistern can be filled with water so pure that it will not develop smell or taste. The first step should be the thorough cleaning of the cistern. Next, the flow pipe from the roof should have a switch to permit the first part of a rainfall to be diverted, so that waste matter on the roof will be carried off. Switches for this purpose can be had from hardware dealers. The top of the cistern should be tight to prevent the entrance of surface water and to keep out small animals and insects. A ventilator in the top can be a pipe two or three feet long, with layers of cheese-cloth tied over the top, to permit the passage of air. Rains in the late fall and early spring should be allowed to enter the cistern, for these, as well as the melting snow in winter, are free from vegetation and other waste matter. I know of cisterns built in this way back. The Head is so tiny you all and filled by this method to supply ought to search it in no time. But pure drinking water far into the summer. Some of them are large enough for the water to last for a year.

#### **Mahogany** Cabinet

"Mr. Norcross and I didn't see any-Question: We have a mahoganystained cabinet which we should like Hugh agreed, "That's right. Lane to refinish with light gray enamel. Is there a "sealer" that we could use without having to remove the present finish? Or should we take "Bless you, I don't. He may off all the present finish?

Answer: If the old finish is in fair condition you can finish the piece in the following way: Dull the gloss by rubbing lightly with very fine (000) sandpaper. Then clean the surface by wiping with points. turpentine, and apply a coat of shellac. When this is dry, dull the gloss again, wipe off the dust, and then put on a gray flat paint and finish with enamel.

#### Tar Paper Roof

Potter here shinnied up on to a bal-Question: What is the best way to cony and saw that one room had preserve a roof finished with roofing been used all right. Suitcase on the tar paper? bed wasn't there, Potter, and

Answer: When the roof surface begins to show signs of drying or slight brittleness, mop on a coat of much, but the bed didn't look as if a good brand of liquid-tar roof coating. If the roofing is asphalt, use liquid-asphalt roof coating. Never put tar over asphalt, or the other "How could I? But a man's, all way around.

#### Mending Aluminum

Question: I bought an aluminum double boiler some time ago, and I prized it highly. To my anguish, the top section has four tiny pin holes in it. Is there any possible way of repairing it?

Answer: If you can get aluminum solder from a sheet metal and roofing supply shop, you can use it to repair the boiler. If you cannot get this, you may be able to locate a welder who can do a welding job on aluminum. Your garage man could give you the name of a welder in vour locality.

one of these meat racketeers behind the bars lamenting, "The place ain't so bad, but the food is awful."

The trouble with many people is that when they speak of getting down to bedrock they think more about the bed than the rock. . . . It may be true, but it seems highly im-

probable that a man turned on his radio recently and did NOT get a war commen-. . .

tator.

Elmer Twitchell thinks there should be some sort of a flag or insignia to paste in the windows of the homes of husbands whose womenfolk have gone to war. . . .

He suggests a design, the background of which shows a sink full of dishes. In the foreground would be unwashed plates, denoting:

1 plate-Wife in uniform. 2 plates-Wife and daughter in uniform.

3 plates-Wife and two daughters in uniform.

4 or more plates-Every female relative in uniform. Come in and help dry the platters. . . .

Ima Dodo can't get the withholding tax idea straight. She thinks it means congress is going to put a point valuation on money and withhold everything from salaries over eight ounces. . . .

There will be a 5 to 10 per cent rise in liquor prices soon. This is

fair warning just in case your present bank won't accommodate you with a big enough loan for another bottle. . . .

Elmer Twitchell can't wait for shellfoods to be rationed so he can annoy the waiter by asking how

Cheese is now treated the same as meat by a new OPA order. You have, of course, enjoyed those fine American dinners consisting of a limburger roast, a Swiss cutlet or a tenderloin of Leiderkranz. . . .

King George is working in a war plant in overalls several hours every evening. It is a fine gesture but we think it must slow down the work terrifically. Can you imagine working in a war shop and knowing that a king is at the next bench? Even a duke would put you off stride.

beautiful and movie-wise, but is also a very creative woman with decidedly individual ideas of her own. What Marlene thinks of the humorist we don't know.

Most actors of dramatic parts in radio yearn for a good comedy spot which will land them on the road to fame, but Alan Reed, "Solomon Levy" on "Abie's Irish Rose," reversed things; he started as an ace stooge for Fred Allen and other comedians. After getting a good start that way, he branched out into straight character acting both in radio and the theater. 34

Everybody'd like to know how Grace George, the celebrated actress, was persuaded to make her motion picture debut in "McLeod's Folly," the first picture which the new producing firm of William and James Cagney will make for United Artists release.

Donald Duck's voice made a personal appearance in the lobby of the New York theater where Walt Disney's "Saludos Amigos" was playing. It belongs to Clarence Nash, who's been doing the Donald Duck voice since 1934, beginning with "The Wise Little Hen." 

The first scene that Zoltan Korda planned to shoot for Columbia's 'Somewhere in Sahara," on location in the desert near Brawley, Calif., called for a search by a unit of Nazi mechanized troops, dying of thirst, for an abandoned, dried-up water hole. But-came torrential rains. So Director Korda thought fast-and the script's dried-up water hole became a brim-full water hole, poisoned by Bedouins!

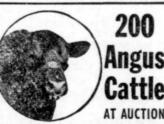

The famous 19th Bombardment group, America's most - decorated squadron, will be glorified in "Suzy Q." forthcoming film about our flying forces in the South Pacific. It will have an all-star cast.

ODDS AND ENDS-Ginny Simms made some extra dollars by selling half a dozen cows from her San Fernando ranch to Bob Burns . . . "Madame Curie" sets a new record for props, with more than 7,200 individual items . . . That cute dog you'll see in "Swing Shift Maisie" passed the tests for "Dogs for Defense" with high marks, but didn't get in because his legs were too short . . . Harry James and his band, appearing in the film version of "Best Foot Forward," have been signed by Metro for another picture; in it James will play a role ... Maybe Merle Oberon really is retiring from the screen to become a housewife!

Margaret O'Brien, the six-year-old who made her debut in "Journey for Margaret," will play her first starring role in "Lost Angel"; she'll appear as a child prodigy trained by scientists, who has had no normal childhood.

\_\_\_\_\_ Nine outstanding writers and nine top directors will join in filming Metro's "Nine Marines," an unusual production which will tell, dramatic fashion, the thoughts of nine marines assigned to hold pass at the cost of their lives.

13-43 WNU-S **Kidneys Must** 

Work Well-For You To Feel Well For You 10 Feel Well 24 hours every day, 7 days every week, never stopping, the kidneys filter waste matter from the blood. If more people were aware of how the kidneys must constantly remove sur-plus fluid, excess acids and other waste matter that cannot stay in the blood without injury to health, there would be better understanding of why the whole system is upset when kidneys fall to function properly. Burning, scanty or too frequent uring-tion 'ometimes warm that something

# \$1,130,000 April War Bond Quota For Washington County

Nation Must Raise 13 Billion Dolla

**THE GOVERNMENT** of the United States is asking us to lend it 13 billion dollars in the next few weeks. We can do it. And we *must* do it. Every American must realize the truth:

0

In this, our toughest war, we've made a good start. We've trained a lot of men-made a lot of weapons-built a lot of ships.

But it's only a start. No man or woman among us would contend for a single instant that we're doing enough *now* to win this war!

#### We've Got to Build More!

We broke all records building 8 million tons of shipping last year. But grim-faced Army and Navy men will tell you that the 18 MIL-LION tons we're building this year still won't be enough!

#### We've Got to Fight More!

From now till this war is won, America must be on the offensive. In ever-increasing numbers, your sons, brothers, husbands must go into actual battle. Our losses have already begun to mount-and they will not grow less.

#### And We've Got to Buy More War Bonds!

Sure we're all buying War Bonds now. But we've got to help pay for our increased fighting and building . . . We've got to match, as best we can, the sacrifice of those Americans who are toiling and sweating on a dozen battlefronts—with the bloodiest yet to come. The blunt fact is this: to keep our war machine going, we've got to dig up 13 billion *extra* dollars this month. 13 billion dollars over and above our regular War Bond buying!

In the next few weeks you may be visited by one of the thousands of volunteers who are contributing their time and effort to this Drive. But don't wait for him. Make up your mind now that before this drive is over, you're going to march right down to your nearest bank, Post Office, or place where they sell War Bonds, and do your duty. And don't ever forget this: in doing your duty, you're doing yourself one of the biggest favors of your life.

For United States War Bonds are the greatest investment in the world—bar none. They're investments tailored to fit your particular situation. And they give you the chance of a lifetime to order and get the kind of world you want to live in after this war. Every cent you put in War Bonds now will help to guarantee plenty of peacetime jobs making peace-living for every one of us.

For your Country's sake—for your own sake—invest all you can!

#### There Are 7 Different Types of U. S. Government Securities—Choose The Ones Best Suited For You:

United States War Savings Bonds-Series E: The perfect investment for individual and family savings. Gives you back \$4 for every \$3 when the Bond matures. Designed especially for the smaller investor. Dated 1st day of month in which payment is received. Interest: 2.9% a year if held to maturity. Denominademption: any time 60 days after issuer is and price: 75% of maturity value.

21/2% Treasury Bonds of 1964-1969: In ily mark etable, acceptable as bank collar these Bonds are ideal investments for funds, estates and individuals. A special ture provides that they may be redeend par and accrued interest for the purpos satisfying Federal estate taxes. Dated April 1943; due June 15, 1969. Denominant \$500, \$1000, \$5000, \$10,000, \$100,000 also \$1,000,000 if registered. Redempt Not callable till June 15, 1964; thereafte par and accrued interest on any interest at 4 months' notice. Subject to Federal to only. Price: par and accrued interest.

Other Securities: Series "C" Tax Notes A Certificates of Indebtedness; 2% Tra Bonds of 1950-1952; United States Sa Bonds Series "F"; United States Savings M Series "G."
