When I had pneumonia last winter she nursed me night and day, and the doctor said I couldn't have lived without her care. But when she wants me to do something I don't want to do, and says, "Look out or you'll catch it," it makes me see red.

By KATHLEEN NORRIS

N MY desk is one of the strangest letters I ever received. I don't know whether to laugh or to cry at its contents. It is from a man, Philip is his first name. He says he is a small male and has never been very strong, although perfectly well. His trouble is that his wife, a big woman, occasionally beats him.

"Mattie is a farmer," Philip says. "She and three brothers have big wheat ranches, and she runs them and her relatives, too. One of her brothers whips his wife and children; she went to a lawyer about it He said that as long as the husband didn't cause any injury a man could whip his wife. How that is I don't know. But what I do realize is that if Mattie gets mad at anything she watches her chance, grabs my collar, and whips me with a strap or a whip. Sometimes it makes me mad enough to kill her.

"I came out here for my health," this pathetic letter continues, "and after we married I got a job in the village. I like it here and when she treats me decently I like Mat. But no man ought to stand for this sort of thing. When I had pneumonia last winter she nursed me night and day, and the doctor said I couldn't have lived without her care. But when she wants to accomplish something I don't want to do, and says: "Look out, now, or you'll catch it!" that makes me see red. Has any woman a right to spank a man?"

Question of State's Law.

Philip, I can only say that I don't know. I am not familiar with your state's law on that point, I cannot believe that a state could carry such a statute. Years ago, in England, a man might whip his wife with a stick "no thicker than his thumb." I believe this was repealed. I never heard that this country had

But I do know several cases of men beating their wives. Usually this state of affairs comes to light through divorce courts. One wife, now living in a crowded war-workers' community, told me that in the early days of their marriage her husband gave her old-fashioned spankings whenever she did anything he disapproved. She cured him through a court order and a psychoanalyst's opinion that the man was not quite mentally sound. "He's been like a lamb ever since," she said. "He doesn't want to be sent to an institution. You'd be surprised at the amount of wife-beating that goes on in this camp," the letter continues. "I advise all girls to do what I did. Lots of them jumped into quick marriages when the war began and aren't anything but spoiled kids - husbands and wives alike. Give them a good scare about bringing in legal and medical advice, and they come to their

In Victorian times it was almost the rule that a father of a family should work off the discomfort of too much heavy food, little exercise, and undisputed domestic authority, in thrashing the children. Mothers used as a threat the familiar phrase, "You wait until papa gets home!" Boys cringed and whined and had their dispositions soured for life, because the father found a restful outlet in wielding a strap. Schoolmasters in England quite recently used to cane boys-grown ones in their teens-thereby acknowledging that these youngsters were incapable of responding to reasonable or civilized

influence and had to be cowed by

DOMESTIC DICTATORS

It is possible for various types of weak-minded husbands and wives to rule their households in the same fashion that dictators rule nations-by brute force. A small man, who is weak physically, writes Kathleen Norris that his wife occasionally beats him despite the fact that once she saved his life. A young wife relates the old story of how her husband beats her. These domestic dictators should be subjected to mental examinations, and sometimes just the suggestion of such action will calm their brutal outbursts.

Woman Tells of Spankings. One letter I had recently came

from "Humiliated Wife." Her husband gives her old-fashioned spankings for extravagance, sauciness the car without his permission. She is much younger than She is a humiliated wife, for he takes no pains to conceal from the neighbors that he punishes her in his way, and a lawyer they consulted, possibly one of his lodge friends, assured her that the husband was quite within his rights.

Of course, this young creature must know that she could claim a divorce and alimony in these circumstances. Even "incompatibility" and "mental cruelty" score up their thousands of legal separations every year. But there may be good reason why she doesn't want a divorce. such as a religious law, death-bed promise, or just a 10-year-old girl's reluctance to confess failure, and give up the dream of being a loyal, respected wife.

So my advice would be that she get her husband to talk to a doctor. Sometimes chronic dyspepsia or stomach ulcers drive a man mad. Then see a psychopath or even an alienist. No sane man marries a woman for whom he has so little affection or respect that he can make her life a burden.

If he won't consent to either of these steps, and he probably will object, for it is probable such a man thinks himself infallible, then the wife must go away, leave him for the sake of children she may have if she stays in his home. Such natures as his won't change, and "Humiliated Wife" may live to see innocent confident children similarly bullied and abused, and then she will be helpless. The effect of brutal cruelty on children is deep-reaching. I have known many men and women who have never recovered from the horrors of a brutalized childhood. Asylums are full of them.

Grandmother Punished Children. One lovely woman that I knew would never leave her five beautiful children alone with her own mother; no, not for an instant.

"She used to enjoy punishing us, too, when I was a child," the woman told me. "She is a wonderful, brilliant, popular figure in certain circles. But she worked off all her nervous energies on us as children. Sobbing, pleading, and crying constituted my childhood. When father sent my sister and I to boardingschool it was heaven, except for the thought of the other two little sisters who were being whipped at home. One of them is a nervous wreck to this day."

So don't risk that, "Humiliated Wife." You haven't been able to save yourself from disillusionment, and heartbreak but you can save your children.

Men who feel themselves unimportant and frustrated in business ambitions frequently take their satisfaction in hurting any innocent helpless thing who comes their way.

But there are plenty of jobs for women now. So slip away and find work, and don't come home until your husband's eyes are opened to the true beauty, dignity, companionship and equality of marriage. Unless the man is either mentally unbalanced or he must know that he is as faulty as you and as all of us. And it isn't for any one to take the attitude of a domestic dictator.

To Get Bigger, Better Crops, Farmers Should Toss Their Plows on Junkpile, Says Expert

By ELMO SCOTT WATSON Released by Western Newspaper Union.

THOMAS GRAY, the famous I English poet, has made immortal the plowman who "homeward plods his weary way" and for two centuries the plowman and his plow have been the theme of song and story, building up the idea that they are the benefactors of mankind. In fact, "Venerate the plow" was the motto engraved upon the medals offered by the Agricultural Society of Philadelphia early in the Nineteenth century to stimulate agricultural experimentation, and more than a dozen of our states have the plow as one of the symbols in their great

In the face of this tradition it may come as a shock to most Americans to be told that instead of venerating the plow, we should look upon it as an enemy of agriculture and the tool that is responsible for "all of the erosion, the sour soils, the mounting floods, the lowering water table, the vanishing wild Itte, the compact and impervious soil surface" which have bedevilled the American farmer In recent years. Yet that is exactly what an agricultural expett tells us in a new book.

He is Edward H. Faulkner and his revolutionary idea is developed in the book "Plowman's Folly" published recently by the University of Oklahoma Press. And lest it be thought that he is only a theorist, a "visionary" and a "book farmer," let it be added immediately that he is the son of a successful farmer, that he was trained in agriculture at Williamsburg Baptist institute (now Cumberland college) and at the University of Kentucky, that he has been a county agent in Kentucky and Ohio, a Smith-Hughes teacher of agriculture and a soil and crop investigator in private employment. Moreover, he has carried on his experiments in garden plot and on a farm scale on land which he owns in Ohio and by his crop yields has translated theory into solid fact.

Folly," Mr. Faulkner says that his Book "sets out to show that the moldboard plow which is in use on farms throughout the civilized world, is the least satisfactory implement for the preparation of land for the production of crops. This sounds like a paradox, perhaps, in view of the fact that for nearly a century there has that agricultural scientists almost to a man have used and approved the use of the moldboard plow. Nevertheless, the statement made above is true and capable of proof. Much of the proof, as a matter of fact has come in left-handed manner from scientists themselves. The truth is that no one has ever advanced a scientific reason for plowing."

At the beginning of "Plowman's

He then proceeds to examine all the reasons that are given for plowing and points out their inconsistencies and even absurdities. "Assuming plowed land to be better for plant growth, we should find grass growing more freely on plowed land than on similar unplowed land near by." he points out. "Weeds, too, should show preference for plowed land. Volunteer growth should take over and develop more rankly after land had been plowed than before. Is this so? Observation is that, until plowed land has subsided again to its former state of firmness, plants develop in it quite tardily, if at all. When dry weather follows the plowing, it may be weeks or even months before either natural vegetation or a planted crop will make normal growth. The fact is that 'bare' land. which notably erodes worse than soil in any other condition, consists almost wholly of land that has been disturbed recently by plow or cultivating implement. The only other hare land is that which has been denuded of top soil by erosion or other forces. There is significance in the fact that erosion and runoff are worse on bare land, and that bare land is defined above.'

The effect which plowing has upon this top soil is the principal reason why the author of "Plowman's Folly" considers this instrument an enemy, rather than a benefactor of agriculture. In fact, the principal thesis of the book is that it is wrong to plow natural fertilizers deep into the soil and that this natural fertilizer-crop residue and green manure

This pretty girl seems to be heeding the ancient injunction, "Venerate the plow," as she examines what has been preserved of one of the first three plows made by John Deere, the Yankee blacksmith who invented the first successful steel plow in

forest or a meadow.

Disk Harrow Better

"We have developed some useless theories in that field," declares Mr. Faulkner. "Men have come to feel, for example, that centuries are necessary for the development of a productive soil. The satisfying truth is that man with a team or a tractor and a good disk harrow can mix into the soil, in a matter of hours, sufficient organic material to accomplish results equal to what is accomplished by nature in decades." In fact, it is the disk harrow, rather than the plow, which should be the farmer's principal instrument in producing more and better crops. Here

The organic matter disked into the top of the soil not only decomposes and adds to the fertility of the soil, but acts as a sponge to hold moisture where it is needed. Faulkner believes there is a capillary movement of water upward from the subsoil. When the surface of the soil contains organic matter, this top layer not only holds water, but is able to receive it from below. Conversely, when the soil has been plowed, the loose layer at the surface loses its capillarity while the layer of green manure plowed under actually insulates the upper surface of soil from

This "blotter" is often the reason why a crop shows lack of moisture when there is moisture in the subsoil. The crop has used all the been a science of agriculture, and moisture in the loose layer of top until the organic matter plowed under has become completely decomposed and packed. Although the author of "Plow

man's Folly" believes that the disk harrow is the farm tool which should more and more replace the plow, he admits that it does have its limitations. It is difficult to handle on side hills and it won't work so well on stony soil. Nor is it the complete answer to the question of how to get rid of weeds. He concedes that there is no such thing as completely weedless farming but he does believe that the system of farming which he advocates tends to get rid of weeds while the plow tends to encourage For every time land is them. plowed, seeds are buried for future sprouting. Then when it is plowed again some of the seeds are brought to the surface for growth, while more seeds are turned under to await their turn to sprout, and so on, ad in-

Under Faulkner's plan of using the disk harrow rather than the plow, the weeds are mixed up into the top soil and their seeds are never very far below the surface. When such seed grows into a plant and the plant is cut, then there is no reservoir of seed far under the surface to take its place. Gradually a field may get rid of weeds entirely, if they are cut before they mature, although, of course, there will always be some weeds grown from seed that is blown or carried into the

Not a New Idea.

But the problem of weed control is, after all, of lesser importance than the problem of preparing the soil so that it will be more productive. In advocating his plan, Faulkner does not claim that it is new. 'No new technical discoveries are to be aired here," he says in his first chapter. "The discussion is concerned wholly with reducing to praccrops-should be incorporated into tical terms, employable in any the top soil (which, as everybody body's backyard or on any farm, soil for producing crops."

recognizes, is the really good soil) | the scientific information possessed just as Mother Nature does it in a for decades but hitherto not put to any extensive use.'

Moreover, he does not just advocate a theory but he cites his own experience to prove that his theory is practicable. For example, there was the way he demonstrated its validity with the tomatoes which he transplanted, even though he shocked some of his neighbors with what they considered his "careless methods." First he harrowed down a crop of

rye that had grown three feet tall. mixing rye and soil until hardly a trace of vegetation remained. Then he marked the land off in rows, using an instrument he designed himself to pack the worked soil of the rows firmly. This was done to patch the soil back together so nature's capillary action-carried on by the plant root system-could keep on elevating moisture to the surface for his tomatoes. He cleaned all the dirt from the roots of his tomato plants and laid them along the rows on the surface. He covered the roots with rich soil and packed it down by foot.

By late afternoon every plant set in the forenoon was pointing toward the sky and "by the following morning every plant without exception was standing upright." No water was used in transplanting, and that was sufficient evidence that nature's own watering system was at work.

Prize Tomatoes.

Not only did the tomatoes live, but his neighbors who had been dubious of his "careless" methods had to admit that his was "the finest hood." There was further proof of the fact when he sold his tomatoes, for he received as much as 25 cents a peck above the top price in the Cleveland market. "One reason for this was the exceptional weight of my packed pecks," Mr. Faulkner explains. "Fifteen pounds is the standard weight of a peck of tomatoes. It was not unusual for a peck of my tomatoes to weigh 16 pounds and many weighed 17. Most local tomatoes that year weighed from 10 o 14 pounds to the peck."

What the author of "Plowman's Folly" did with tomatoes, he also did with sweet potatoes, cucumbers and beans. And lest it be thought that his methods apply only to "garden truck," let it be recorded that they apply also to field grain. Several years ago he began "nudging" the United States department of agriculture to experiment with his theory of "surface-incorporation." Finally one of the leading agronomists of the department set up a demonstration.

"Perhaps the intent was to dis prove my theories," writes Mr. Faulkner. "On the contrary, the outcome of the tests completely confirmed them . . . The results of this official experiment proved that, by working organic matter into the surface instead of plowing it in, the resulting grain yield could be as much as 50 per cent greater. The very first year of this trial showed such a result."

And these are only a few of the iluminating facts to be found in the 161 pages of "Plowman's Folly." But they all lend emphasis to its author's contention that "the sooner we make ancient history of many of our present farm practices, the earlier we will realize that the Garden of Eden, almost literally, lies under our feet almost anywhere on the earth we care to step. We have not begun to tap the actual potentialities of the

CHEST PAINTED

BLUE TO MATCH

Many young homemakers are gaily setting forth to buy junk furniture for remodeling. The first thing they learn is to consider each piece not for what it is but for what it may be. The 40-year-old buffet shown here was picked up.

The sketch shows how the main part of the buffet was remodeled to make a chest under a window in a combination sewing and guest room. A wood chisel is useful for removing carving that is glued or and either putty or plastic wood may be used for filling screw holes and other holes. If the piece is varnished, it is best to rub it down with sandpaper to remove the high gloss before painting. What be came of the mirror and legs of this buffet is another story to appear soon.

NOTE-This sketch is from BOOK 7 of seven also contains directions for more than 30 other things to make from odds and ends. A whatnot is made of spools;

The Questions

1. What is an erg? 2. Which of the following canals handles the greatest volume of traffic: Suez, Panama, or Sault Ste. Marie?

3. A wind that blows regularly at fixed seasons is called what? 4. What city is called the Queen City of the Lakes?

You Women Who Suffer From

Heed This Advice!

If you—like so many women between the ages of 38 and 52—suffer from hot flashes, weak, dizzy, nervous feelings, distress of "irregularities", are blue at times—due to the functional middle age period in a woman's life—try taking Lydia E. Pinkham's Vegetable Compound at once. It's the best known medicine you can buy that's made especially for women.

or women.

Pinkham's Compound is famous
to relieve such distress. Taken regularly—it helps build up resistance egainst such annoying symptoms. It also is a fine stomachic tonic.

Thousands upon thousands of women—rich and poor alike—have reported benefits. Time and again Lydia Pinkham's Compound has proved some women's happiest days proved some women's happiest days often can be during their "40's". Also beneficial for younger women to helprelieve distress of female month-

Terminate Sept. 30

The hosiery salvage program which has been in effect since Nov. 16, 1942 will be terminated on Sept. 30.

Though collections continue to be remarkably high, this action is taken because the proportion of silk and rylon being returned is on a declining scale due largely to the fact that little or no hosiery in any quantities in reither silk or nylon has been manufactured for the past several months.

Battlefield, After All

Italy's unconditional surrender to the Allies did not spare that country from becoming a bloody battlefield in the war.

Trapped all along the Italian boot when the Badoglio government gave tip the fight, German forces put up stiff resistance as Allied armies swarmed ashore to occupy the main- will set aside a certain percentage land. Bitter fighting occurred near of their stock for civilian use. Any Naples and in Rome, where Germans were reported to have seized control to establish their own puppet regime, in the name of Benito Mus-

Meanwhile. Italian service men, told to resist German attempts to ored. prevent them from giving up, appeared divided in their loyalty to the Badoglio government. While Italian soldiers were reported aiding the Allies in the south, the Germans claimed many others were standing by the Axis in the north, where the Nazis planned a last ditch fight along the mountain range of the Po valley.

Escorted by the British navy, three Italian battleships and an assortment of cruisers and destroyers reportedly were steaming for Allied ports in North Africa, there to join in the fight against Germany.

Economic Problem

Though Italy's capitulation was of

Allies, its occupation posed difficult economic problems. To Calvin Baldwin of the office of foreign economic co-ordination will go the task of straightening the situation.

Calvin Baldwin

deficient in coal, iron and petroleum, though it has quantities of mercury, bauxite and sulphur. Secondly, the country's food production is unbalanced, insufficiencies in grains, meats, fish, oils and eggs offsetting surpluses in fresh, citrus and dried fruits, nuts, vegetables, cheese and

Thus, if use is to be made of industrial facilities, raw materials would have to be brought in; if advantage is to be taken of her peculiar agricultural production, some provision of imports of other foods will MILK QUOTAS: have to be made.

RUSSIA:

Regain Resources

Proceeding to shorten their lines administration announced sales of in Russia, made more necessary by the collapse of Italy, the Nazis fell | the establishment of dealers' quotas. back on the Dnieper river, surrendering the vital Donetz industrial basin as they retreated.

Farther to the north, the Germans' withdrawal put Russia in repossession of much of the fertile farmland of the Ukraine, famed for its wheat and cotton.

Although the Reds regained access to coal and iron and foodstuffs, the Germans' destruction of the Donetz's factories and their requisition of the Ukrainian harvests deprived the Russians of immediate use of these resources.

In Moscow, a 224-gun salute marked the Russian successes.

U.S. Air Force Grows The Japanese have sent a new

Zero into Chinese skies, one with a higher ceiling and better diving characteristics, but gradual reinforcement of the 14th U.S. Air Force is making it more and more of a threat to the enemy's defensive and economic outpost on the Chinese main-

Gen. Claire Chennault

Shipment of Lightning P-38s to the 14th AAF gives Maj. Gen. Claire Chennault a speedy fighter to use in combination with bombers at his command.

Although the 14th AAF has been used in support of Chinese land armies and for pounding Jap communications, storehouses and industrial installations set up in occupied sections of the country, it looms of greater strategical importance as a threat to the Japanese homeland if northern bases are gotten.

AGRICULTURE:

Less Cotton

Continued hot, dry weather causing considerable deterioration in the western portion of the cotton belt, was a contributing factor in the department of agriculture's forecast as of September 1 of a 1943 cotton crop of 11.670,000 bales. 7 per cent below the August 1 estimate.

Lint yield per harvested acre was indicated at 25.7 pounds above the 10-year average, but below the record 1942 figure.

Regions hit hardest according to the department of agriculture, include Texas, where production estimates as of September 1 were 375,-000 bales below a month ago; Arkansas, down 200,000 bales; Oklahoma, down 125,000 bales; Mississippi, down 120,000, and Tennessee. down 45,000 bales.

Wheat in Loan

Because farmers are able to obtain more for their wheat on the market than the \$1.28 a bushel advanced on loans by the Commodity Credit corporation, pledges on the 1943 crop approximate half of the total prevailing at this time last Then, 94,418,000 bushels were WPB's regulation under which it being held by the U.S. On the 44,355,725 bushels in loan,

\$56,964,137 was paid out, the CCC stated. Warehouses held 39,370,000 bushels, and 4,985,459 bushels were stored on farms. Officials estimated that the entire 1943 loan stock would not exceed 200,000,000 bushels. As of September 8, the govern-

ment held about 127,000,000 bushels of wheat, and was disposing of 11/2 million bushels daily for feed in deficit areas.

RUBBER:

Synthetic Hopes High

If all of the necessary materials going into the manufacture of synthetic rubber can be supplied in 1944, 000 tons, Bradley Dewey, newly named rubber director, declared.

Even as Dewey spoke, the War Production board ordered 12 major textile mills to devote their facilities exclusively to the fabrication of cotton and rayon tire cords. Previously, the mills had been making cotton duck for the army.

Production of synthetic rubber in September will exceed 30,000 tons, Dewey said, and tires made from the material are equal to all but the topgrade from natural rubber. Next lomatic preparation before the inyear, a minimum of 30 million tires will have to be made and distributed for essential civilian driving, Dewey

CONGRESS BACK:

Studies Draft, Taxes

The question of deferring fathers and of raising an additional 12 billion dollars in taxes confronted congress when it resumed sessions. Sen. Burton Wheeler to postpone in-

> until January 1 loomed in the senate, while Rep. Andrew J. May declared he would offer a bill to not only prohibit drafting of fathers - but also setting a limit on the size of the

May

Roosevelt's request for 12 billion dollars of new taxes to raise total receipts to 50 billions a year is expected to arouse bitter debate in congress over methsales tax, preferably on manufacturers, a spending tax over certain exemptions, and increased income and corporation taxes have been suggested as revenue sources.

army.

HOGS:

To bring the livestock population in line with feed supplies, the government announced that effective October 1, 1944, it will support prices for good to choice hogs between 190 federal assistance for surgery and Italian prison camps. These men and 230 pounds at \$12.50 a hundred pounds, \$1.25 less than at present. Under the new program, heavy hogs will not be supported.

Pigs farrowed next spring will be sold under the new regulation. According to the government, prospective feed supplies will justify a spring crop of 61 million pigs.

Prices of stocks on the New York market and at other trading centers averaged downward on news of the Italian unconditional surrender. So-called "war stocks," securities of companies now principally engaged on war contracts, declined fractions to one and one half points. Steel, motor, airplane and railroad companies were most affected. Many "peace stocks" went up, including telephone, farm implement, canning, and soft drink issues. Foreign bonds rose sharply.

Washington Digest

Tripartite Picture Clearer Since Meeting in Quebec

U. S., England, Russia Agreed on Fundamental Policies; Observers Optimistic Concerning War and Post-War Cooperation.

> By BAUKHAGE News Analyst and Commentator.

WNU Service, Union Trust Building, not quarrel with his action. Death took Darlan from the picture. It Washington, D. C. did not end the arguments, but since

The ink is now dry on the secret footnotes which appear in the memoranda officially recorded after the long and quiet conversations which took place in the presidential study in the White House when the Allied strategists worked out the end of another chapter in the history of World War II.

My own modest notations, scribbled on the backs of envelopes, and on scratch pads, and written in taxicabs, leaning against a White House elm after a press and radio conference, taken down while the President or other officials were speaking, make a clearer pattern.

Words and phrases take on new meanings, rough sketches are filled out in revealing detail.

The speculation, the criticism, the attacks and the apologies which swirled about the Allied policy toward Russia, for instance, it is plain now was built mostly on half knowledge.

While press and public were crying for a tripartite meeting of the presentatives of Russia, Britain and the United States, the arrangements for a whole series of meetings were already being made. It was not until almost the end of the tige with the army and that the So-Roosevelt-Churchill visit that we meetings "on the foreign minister level" had been definitely agreed upon and, second, (which no one was to be formed of representatives situation arising out of the Allied victories in the Mediterranean in which Russia is so deeply concerned but which, militarily speaking, she Churchill, there is a feeling that not has been forced to view from a distance. When we received that news, were unable to indicate its source.

The Darlan Question

Another source of bitter controersy which has been allowed to fester was cleared up at the same Certain groups in England and America from the very beginning violently objected to the choice of Darlan as the man with whom the Allies dealt in North Africa. There have been two revelations on that score which, had they come earlier, might have cleared the air. one after another, he has taken over

and the Russians certainly ought have any dealings whatsoever with lean as far to the left as anyone It now seems that the Soviet leaders, frankly opposed to Darlan and all he stood for, actually accepted his secretary of state and those who the British and American policy on opposed him inside and outside of the the basis of an old Russian saying state department. that in matters of military strategy -or comparable situations-it is sometimes necessary to deal with the devil and his grandmother.

A word from the chief of staff revealed in his annual report to the secretary of war is interesting in this connection. He says of the dipvasion of Africa: "Should an approach be made to a single Frenchman who proved unsympathetic to our purpose, we risked the slaughter of our soldiers on the beaches of North Africa as well as decisive losses to our shipping . . . unexpectedly, Admiral Jean Darlan, Petain's designated successor, and commander-in-chief of all French forces, was found to be in Algiers visiting his sick son when our forces landed. Consideration of a proposal by He was taken into protective custody and when it was found that duction of dads French leaders stood loyal to the Vichy government, a series of conferences immediately followed with the purpose of calling a halt to the French resistance against General Patton's task force in the vicinity of Casablanca.'

The Background

Then, on the morning of November 11, the Germans invaded France and Darlan obligingly rejected the pseudo-independent Vichy govern-President ment and assumed authority in North Africa in the name of Marshal Petain and ordered the French to cease all hostilities.

Just what pressure or argument was used in getting Darlan to vield ods for obtaining the money. A to Allied wishes has never been revealed or what his motives may have been-they may indeed have been prompted by the devil or his grandmother-but those who knew the inside military expediency, did that purpose.

we know now that the head of the Communist state of Russia was able to swallow Darlan, the squeamishness of some of the critics seems a little far fetched. In the days that followed the recall of the Soviet ambassadors to London and Washington, the outcry

over the absence of Stalin at Quebec increased. Roosevelt, Churchill and Secretary Hull were blamed-there was the blow-up over the charges by a columnist who said Hull was anti-Russian. I talked with Secretary Hull about

that time. Whatever his feelings may be regarding communism, he indicated from his remarks to me that Russia was looking sympathetically on the attempts at a joint conference, and a few days later, a high British source stated flatly there was no great divergence of views between the Soviets and the

Both were thoroughly agreed on the necessity of the destruction of Nazi tyranny and Prussian militarism, and it was revealed that Marshal Stalin was rising in presviet army was rising in prestige with learned, first, that the tripartite the Russian people until it was already on a level with the communist party itself. This seemed to indicate, as Captain Rickenbacker said then guessed) that a commission when he returned from Russia, that the ideologies of the policies and of all three powers to discuss the the capitalist nations were growing Today, as Washington looks back on this last visit of Prime Minister

only are Britain and the United States closer in both their war and their post-war aims, but that the possibility of bringing the Soviets into the circle is greater. One reason for this is that certain problems on which there has been disagreement have been met and thrashed out successfully between Roosevelt and Churchill and the way is open to a much more extended discussion with Stalin's representatives.

Meanwhile, the position of Secretary Hull, within the administration. has been greatly strengthened as One concerns the Russian attitude | the functions of all agencies which the question frankly before the President who had to choose between

Hull's Position

Secretary Hull's position is this: the policies which I have sponsored and insisted upon have justified themselves. Either my department must have full authority in the field of foreign relations or I will hand in my portfolio.

The President faces, first, a congress which has had time to think over its position, has heard the complaints and received the advice of its constituents. It returns determined to imprint its will on national policy, foreign and domestic. Its texture is and has been for some time strongly away from the socalled new-deal policies, strongly toward the conservative side. Secretary Hull probably stands higher, has more friends, and can exert more influence with congress than any member of the cabinet. The President needs a congress which will stand behind him if he is to carry out the plans for further conduct of the war and the winning of the peace according to methods he believes it is necessary to employ.

And, of course, there is the fourth term ahead, for continuance in office is essential, the President's friends believe, if he is to mold the post-war world.

Secretary Hull is his anchor to windward. This is due to his political influence and also because he and what he symbolizes both at home and abroad, have become inextricably bound up in world negotiations.

And for the President, there is but one objective now-that is, to be the peacemaker as he was the war leader. All else-choice of counsellors, domestic policies, must dovetail into

BRIEFS . . . by Baukhage

It is estimated that enough waste fats are salvaged in army camps within the continental U.S. to make 1,500,000 pounds of dynamite each month, and still leave a residue of rendered grease for soap stock.

WHITE ENAMEL ON DARK WOOD

Question: Last year our dark mahogany stained woodwork was done over with white enamel. Now it is cracking and the dark color is coming through. Is there some way to get better results next time we do it about 11:30 that night and sneaked

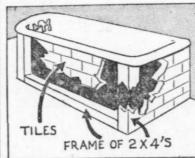

Answer: It is my guess that the surface was not properly prepared before the enamel was applied. Paint will not adhere to a glossy varnish, and the mahogany stain should have been sealed in with a coat of shellac. Your best move is to take off the finish with a hot solution of washing soda or trisodium phosphate-three pounds to the gallon of water. After removing the paint and varnish rinse the wood with clear water. Then bleach out the stain by coating liberally with a hot saturated solution of oxalic acid. Leave it on overnight and then rinse well with clear water. When the wood is dry, smooth if necessary, by rubbing with very fine sandpaper. Wipe off the dust and then finish according to the manufacturer's directions on the can for new woodwork.

Cleaning Entrance Floorings Question: What is the best method and soap to use for cleaning ter-

razzo, rubber tile and linoleum in an apartment building entrance? Answer: As a general rule, a terrazzo floor calls for no more than scrubbing with pure soap and water, rinsing thoroughly and drying. For a polish, use thin coats of paste floor wax; rub each coat well after allowing a half hour for drying. The linoleum can be cleaned in the same way, but great care must be taken not to flood it. Work on tiles in the same way as the linoleum, and, when clean and dry, apply bright-drying water wax, or a wax that does not require polishing. Plenty of clean water should be used to remove all traces of soap. If this is not done, the floors soon will become shabby and difficult to clean, particularly the ter-

MODERNIZED BATHTUB Question: I have heard that an old-style bathtub with legs can be converted to the built-in style. Can

you tell me how? Then we saw the destroyers, but Answer: Take off the legs by slipping them out. Build a support of two by fours in one corner of the room on which the tub will rest, wedging one end and side of the

tub against the wall. Build a frame around the tub, to be finished with tile or some other waterproof material. The room walls should meet the top edge of the tub so that the tub will catch water that drips from seemed to be coming right down on them. Pipe connections should be us from an angle-about like the made according to convenience.

Repairing Pottery Question: I have a Wedgewood pottery jug, pieces of which are chipped out and missing. Is there any tenacious substance that I could

use to fill in the missing pieces? Answer: Genuine Wedgewood should be repaired by an expert. for our machine guns. But the rain Home methods might look botched and show crack-lines. But if you suddenly another Jap ship showed still wish to try the job, use white lead paste thickened with powdered started firing their main batteries at whiting. This will take some months to dry hard. Names and addresses of china and glass repair shops can as twenty-five yards. We started be found in your classified telephone

Bulging Linoleum Question: What should I do for linoleum that has just begun to

Answer: Cut a slit across the middle of the bulge with a razor blade, following a line of the pattern; a line between two squares, for instance. Then work some linoleum cement under the linoleum through the slit with a knife blade, pressing down first one side of the slit and then the other. Use plenty of the cement, wiping off wet smears on Our overtaking shots had both hit the surface with turpentine. Press the bulge back into place and put on weights until the cement is dry. . . .

New Carpeting Over Old

Question: We are going to recarpet our dining-room. The floor is of poor, unfinished lumber. As as a padding under the new?

Answer: Yes, but before laying the carpeting, see that all irregu- from birth, and trained to the saddle larities in the floor boards are taken as a boy out on the broad, cattleout-either by planing or scraping with a floor sanding machine. The But he quite easily shifted to mechsmoother the floor the longer the anized cavalry when it crowded the floor covering will last.

Red-Colored Cement

Question: I recently cemented my sun porch with red-colored cement. Results have been poor, since the What would you advise? Is there a paint that would give it a glossy finish? Would you apply wax? Or is

That was the last I could see of him and I thought he was a goner. there any other solution? Answer: The color used in the "My destroyers chased me down cement evidently was not of the lime-proof variety. The floor can be painted with a synthetic resin have much better flavor, and usually cement floor paint and later waxed, are larger, when allowed to ripen be-

Who's News This Week

Delos Wheeler Lovelace

Consolidated Features.-WNU Release.

YEW YORK .- The worries that clouded the round, good-natured face of Gen. Sir Thomas Albert Blamey last April are fading fast. Two-War General He had night-mares then

Now Depreciates from think-Japs as Fighters ing about the 200,000 Japanese poised on nearby islands for

a jump to Australia. Now he ticks off Guadalcanal, Buna and Gona and sundry imminent captures and opines that the Nips are hardly the fighters they were cracked up to be. The general should be a first

class judge of fighting men. He has been in two big wars, mostly up where the shooting was most prolonged, and is rated a rattling good tactician. He commanded the Australians in Greece and his handling of his battalions is one of the few good memories of that desperate and luckless venture. To the present generation of Australian soldiers Blamey is "Old Tom," 59 years old and a loyal supporter of our own Gen. Douglas (theynever - invite - him) MacArthur. under whom he has commanded the Allied ground forces in the southwest Pacific for more than a year.

When the war started Blamey reduced his own rank so that he might lead the first division of Aussies in the field. He had been the commonwealth's chief-of-staff. Before that long before that, when the Japs were only a faint distant hiss on the horizon, he was chief of police of the state of Victoria. He married late, at 51, and has a son. In the First World war he was mentioned seven times in dispatches. In that war, as in this one, he led a mixed force of Australians and Americans. With these he helped crack the Hindenburg line.

SINCE "Dogs are people" on the word of the club whose doings are told by Darragh Aldrich over a midwestern radio station, General "Ike" Eisen-

Gen. 'Ike' Holds hower's Scot-Up Captaincy of tie, Telek, This Dog of War certainly rates this column. Especially as he has been invited to be the club's commanderin-chief with the rank of captain.

Commander Harry C. Butcher, naval aide to Eisenhower, has conveyed to Mrs. Aldrich from Africa, Scottie's thanks and his master's gratification. But, alas, General Eisenhower decrees that Telek may accept only a corporal's rank! He's been in service only since October 14, the general's birthday.

Telek was a year old on June 29, But before he reached his first birthday he was a proud father. His wife is Commander Butcher's Caacie, pronounced Khaki. It stands for "Canine Auxiliary Air Corps." Telek and Caacie have a son and a daughter now. Only satisfaction over the way the war goes overshadowed the thrill of arrival of their family, Commander Butcher writes.

Recently Telek tried to eat a scorpion, and now his tongue has the outlines of an elm leaf. The general was away but Telek knew that under the circumstances he was entitled to the comfort of the general's bed, and took it. During bombings | He's the kindliest of persons-Telek and Caacie and the pups go under the general's bed together. "For the general, Telek and

Caacie afford opportunity for escape from war," writes Butcher. More power to them!

R IO DE JANÉIRO repeats her assurance that a Brazilian overseas force waits only a call from the

United Nations, and if the call comes the Brazil's Overseas odds are Force Ready; War that the Chief May Lead It commanding general will be Brazil's war minister, the serious but hard-riding cavalryman, Enrico Gaspar Dutra.

Dutra has been Brazil's outstanding commander for almost ten years and a soldier in fact as well as in heart since he was 16. He made up his mind then, after reading limitless lives of military heroes from the deified Alexander onward. He enlisted, was graduated from the state military academy at 22 and moved up steadily to become a brigadier general after the Sao Paulo rebellion 11 years ago. Four years later he was appointed minister of war. His decorations are numerous and include Brazil's Order of Military Merit.

Unlike some good generals he is highly articulate and his lectures in the general staff school and at the military academy in Rio de Janeiro were long remembered. He-has both the new and old carpeting are written a number of books on milimoth-proofed, would you think it a tary matters and knows mechangood plan to use the old carpeting | ized warfare down to the last gasket and crankcase bolt.

He has been a horseman almost covered plateau of the Mato Grosso. hayburners out of warfare.

The general, a major general now, is stocky, medium tall, with graying hair and no more stern a disciplinarian with his own men than with himself. He is up at five o'clock, color looks faded and quite dull. at work an hour later, and in bed by ten. Only music keeps him up later, and that not often.

> Should Ripen Tomatoes, muskmelons, berries are all better if they are allowed to ripen thoroughly on the vine. They fore they are picked.

PRIVATE PURKEY ON TOMATO HARVESTING

(News Item-Soldiers in eastern training camps are assisting farmers with the tomato harvest.) Dear Harriet-Lest you get the wrong idea about

a new detail I just got harvesting and canning tomatoes I am just writing this note. I know how at first thought it seems funny to think of a jeep who joined up for a global war being in the tomato business, but it is important work, Harriet. When I and a lot of others got orders to help pick tomatoes I did not like the idea of being a Tomato Zouave I told Sergeant Mooney there was nothing about tomatoes in my draft papers and that my number was drawn from a fishbowl not from no tomato can.

Sergeant Mooney says "Shut up, dogface, and do what you is told. You are lucky to get tomatoes. It could be watermelons!" I says to him, "Lissen, sarge, I joined up to be a hero and I never seen no hero with tomato sauce on him." He tells me "You are going to see one now, my boy."

Well, I am very firm with him and I tells him I was drafted to do a lot of things but that none of them had anything to do with ketchup. I tells him I took a oath to fight for four freedoms none of which has got to be picked off of a vine or pressed into a tin can. Also I explains to he was in charge of recruiting, and him that the Atlantic Charter was not drawn up in no tomato patch.

Even when I am arguing that my contract makes no menshun of any work among vegetables outside of a clause where I am serposed to get a couple of cabbage-heads named Hitler an' Tojo, he just slips me a sunbonnet and a pair of overalls and tells me that while it wood be bad enuff for a jeep to be took up on charges of mutiny in the face of the enemy it wood be worser to be charged with mutiny in the face of a tomato.

I am kind of proud on account of I am one of the fastest tomato pickers in my outfit. (I get a average of 97 which is very high. All the boys say I must of had experience and they don't believe me when I say I never picked one before in my life an' always had a idea they grew on trees. The sarge has thrun out a claim that I am a pro.)

Well anyhow, in a war like this we should all do what we get told to do and wherever I can help is okay so long as the sarge don't put me on no detail to pick prickly pears. I send you all my love, my darling

HIMMLER, MAN OF CHARM ("Hitler assured the German people that Heinrich Himmler, newly named for important duties at home, is a kindly, sympathetic man."-News item.)

Do not worry, fellow Germans-Don't feel frightened, sad or blue As I name that gentle fellow Heinrich Himmler over you! Do not credit silly rumors That he is a man of hate;

Oh, I really can't imagine How such tales originate! Ah, that gentle placid face! He's a tribute to the virtues

Of the superdooper race; Treat all talk of ruthless tactics As just simple liverwurst; Himmler wouldn't harm a housefly-(If the housefly saw him first!)

Just the chief of the Gestapo-This he is and nothing more; He plays softly "Hearts and flowers" To drive out the trials of war; He's my Good Will Delegation-He's my little Fairy Prince-He's Sir Galahad (in German)-He's my Chief of Gentle Hints.

He's the Boy who's Kind to Birdies-He feeds pigeons in the parks; He's our own Big Brother Movement And writes verses on the larks: He helps ladies over crossings. He gives kiddies' heads a pat: When he rides in elevators He will always lift his hat.

Heinrich Himmler! How you'll love

him! In his presence each heart melts; Bring your troubles to him freely And do what he says . . . OR ELSE!

Rally round this knight so shining, Never doubt his gentle touch; And remember, fellow Germans, Himmler will not hurt you . . . MUCH! . . .

A Gallup poll shows that a maority of women favor a draft of the fair sex for noncombatant war work, with men opposing the idea. The opposition of the men is easily understood. They don't want to listen to all those arguments over why the draft board chairman accepted that homely Smith woman and deferred the eyefull known as Miss Jones.

One thing is certain: if we have a draft of women the day when the draft boards have the last word will be over.

A big restaurant chain has filed a petition in bankruptcy. Evidently the reduction of the cracker allotment from four to three per person with a plate of soup wasn't a success. . . .

Once upon a time a taxpayer alone had trouble understanding the income tax. Now it baffles his accountant. And his lawyer has to go to another lawyer for advice.

What this country needs most is a good five-cent frankfurter.

"NO MORE DOSING FOR ME!"

Says happy ALL-BRAN eater!

If you've been "dosing" without getting the lasting relief you wanted, this letter may offer you

real encouragement: "Permit me to compliment you on your wonderful product, KELLOGG'S ALL-BRAN! It certainly lived up to its promises, with me! I'd been taking manufactured laxatives for a long time! But, no more dosing for me, thanks to KELLOGG'S ALL-BRAN! I've adopted it as my standby!" Mr. Alexander Klein, 630 West 170th Street, N. Y. C.

Yes, KELLOGG'S ALL-BRAN really "gets at" one big cause of constipation - lack of sufficient "cellulosic" elements in the dietbecause ALL-BRAN is one of Nature's most effective sources of these elements! They work by helping the friendly colonic flora fluff up and lighten the colonic wastes for easy elimination. Not a harsh purgative! Doesn't "sweep you out"! ALL-BRAN is simply

a gentle-acting, "regulating" food! If this is your trouble eat KELLOGG'S ALL-BRAN regularly. Drink plenty of water. See if you don't find you can give up "dosing" for good! Insist on genuine ALL-BRAN, made only by Kellogg's in Battle Creek.

Fine Powders

Chemists who measure, with a complex apparatus, the areas of fine powders to determine their adsorptive value have found that a cubic inch of some such particles has as much as 15,000 square feet of surface.

FRETFUL CHILDREN Many mothers rely on easy-to-take Mother Gray's Sweet Powders when a laxative is needed by the little ones. Equally effective for grownups—has 45 years of coun-try-wide approval. Package of 16 easy-to-take powders, 35c. At all drug stores. MOTHER GRAY'S SWEET POWDERS

Has 97 Descendants

John B. Marchants, of Burlington, Vt., has 97 descendants, one for each year of his life.

OU WOMEN WHO SUFFER FROM If you suffer from hot flashes weak, nervous, cranky feelings, are a bit blue at times—due to the functional "middle-age" period peculiar to women—try Lydia E. Pinkham's Vegetable Compound to relieve such symptoms. Taken regularly—Pinkham's Compound helps build up resistance against such distress. It helps nature!

LYDIA E. PINKHAM'S COMPOUND

Also a fine stomachic tonic. Fol-

Acid Indigestion

A DAB A DAY KEEPS PO AWAY

New cream positively stops *underarm Perspiration Odor

1. Not stiff, not messy-Yodora spreads just like vanishing cream! Dab it on-odor gone! 2. Actually soothing-Yodora can be used right after shaving. 3. Won't rot delicate fabrics.

4. Keeps soft! Yodora does not dry in jar. No waste; goes far.

Yet hot climate tests-made by nursesprove this daintier deodorant keeps underarms immaculately sweet-under the most severe conditions. Try Yodora! In tubes or jars-10¢, 30¢, 60¢. McKesson & Robbins,

When Your **Back Hurts** And Your Strength and Energy Is Below Par

It may be caused by disorder of Rid-ey function that permits poisonous aste to accumulate. For truly many copie feel tired, weak and miserable

acids and other waste matter from the blood.
You may suffer nagging backache; rheumatic pains, headaches, diziness, getting up nights, leg pains, swelling. Sometimes frequent and scanty urination with smarting and burning is another sign that something is wrong with the kidneys or bladder.
There should be no doubt that prompt treatment is wiser than neglect. Use Doon's Pills. It is better to rely on a medicine that has won countrywide approval than on something less favorably known. Doon's have been tried and tested many years. Are at all drug stores. Get Doon's today.

SHALL WE LET HIM COME HOME TO THIS?

A great and disorderly rise in all prices --inflation --- must not and need not occur in
this nation. Either during the war or after it.

EVERYBODY SHARES RESPONSIBILITY

Every man and woman of us, rich or poor, has a responsibility in avoiding dangerous inflation. You personally contribute to bringing on such a national tragedy by mere partial support of the Government in its effort to raise money for the war --- You force the manufacture of new money to pay war costs. Through payment of taxes and buying war bonds you lessen the Government's need for increasing the active money supply.

PROTECT YOUR FUTURE

There never will be a time when United States Bonds will not be paid off dollar for dollar, no matter how great the federal debt becomes. The real concern of everybody must be how much each dollar will buy in goods, in services, in the future. The people of this nation can prevent dollars from shrinking to pennies by lending all that can be spared to the Government. That is the best possible protection to your present savings and your future income.

COMMON SENSE

Il Shot

Every dollar you put into war bonds does three vital jobs:

- 1 It helps to win the war quickly.
- 2. It protects your own future as an investment.
- 3. It protects the nation against inflation---during the war and after it.
