Nebraska 'The Cornhusker State'

By EDWARD EMERINE WNU Features.

ATOP the magnificent Nebraska capitol stands a figure in bronze, The Sower. It is the symbol of Nebraska and its faith—faith in the plains, in the soil, in nature.

Nebraska is the abode of the sower. The seeds are sown, the plants nurtured, the harvest garnered.

The plains, with nature as the sower, were the camping and hunting grounds of seven tribes of Indians.

Battleground of Indians. Tribe attacked tribe, fighting for this greatest of hunting grounds.

NEBRASKA SOD HOUSE... This picture, taken in 1886, shows how a typical homesteader west of Broken Bow solved his housing problem.

primitive agriculture between wars. Many Indian graves, including Spotted Horse, are buried in Fort McPherson cemetery...

SENATOR NORRIS Many people know about Sen. George W. Norris of Nebraska and his record in the U. S. senate...

This State Has No Funded Debt!

The state government of Nebraska was laid down by the pioneers who turned the sod and planted their crops.

GOV. DWIGHT P. GRISWOLD Gov. Dwight Palmer Griswold was born at Harrison, Sioux Co., Neb., in 1881.

riders lashed their horses from St. Joseph to Sacramento and the Pony Express was born...

The Sower beckoned, and men came with plows that bit into the grassroots.

Cattle Ranching Comes. The buffalo were replaced by cattle, and on the open range thousands of cattle from Texas were fed and fattened.

One of the most interesting things about the new 'Follies of '46' heard on NBC Tuesday evenings...

ODDS AND ENDS—Barry Fitzgerald says he wants to retire to Ireland eventually because there they know best how to cook ham and eggs.

Paramount has Bob Hope slated for "Where There's Life," in which he's a radio announcer who seeks the throne of a Balkan kingdom.

Twenty-first Century - Fox has opened a school to train young men in all phases of the corporation's foreign-operation...

French traders and trappers, hunters of the buffalo, soldiers and adventurers began to wear deep trails in the grass.

Westward, Ho! Rich land in Oregon. Gold in California. Nebraska became the highway of an expanding, restless, imaginative, adventurous nation.

From Independence and St. Joseph came the covered wagons of the Oregon Trail.

CHIMNEY ROCK... Near Bayard, Neb., one of the noted landmarks on the old Oregon Trail.

Darning Secrets

Some of the important little secrets of successful darning are: (1) Use a fine needle and short thread. Long thread pulled back and forth across the darn hole tends to stretch the darn out of shape.

China's Future

China is looking forward to rapid postwar industrialization with the emphasis on heavy industries — power plants, chemicals, railway and highway transportation, aviation and port facilities.

Interesting Ornamental

The Cyclamen, an interesting Christmas ornamental, originating in Mediterranean countries, requires a cool, moist situation, and plenty of sunlight.

Wolf Month

The month of January was named for the two-faced Roman god Janus, with the idea that he could look backward into the past year and forward into the coming year.

Orange Juice

Preparing orange juice the night before to save time at breakfast is approved by chemists at the department of agriculture.

Children's Eyes

Generally a child does not know when he has poor vision. Even if he cannot see the board well, or if his eyes tire quickly when reading, he does not realize that his eyes need attention.

Lungfishes Await Rain

Lungfishes have eyes with pupils that do not change in size. These fishes live on the bottom of swamps and in time of drought they burrow in the mud, plaster over the opening and wait for the rains.

Thirty Per Cent Milk Sold as Fluid

In this country the cattle herds produce about 50 billion quarts of milk a year. Of this about 30 per cent is sold as fluid milk and about 4.5 per cent is canned.

Shooting Stars

Shooting stars don't have tails. The light in their wake persists for a fraction of a second on the retina of the eye, causing the illusion of a tail. Similarly, tracer bullets seem to have tails of light.

Stainless Steel Pans

Stainless steel does not darken in cooking alkaline foods as aluminum does, but once darkened by overheating or scorching, it cannot be brightened as aluminum can.

Planning Meals

A map drawn to indicate the location of foods in the home freezer, helps a hasty meal planner to lay her hand on the right box at the right time.

Eye Accidents

More than 2,000 eyes are lost in industrial accidents annually. About one-third of a million eye accidents incapacitate workers for one or more days.

Better Pans

Pans with flat bottoms are steadier, heat faster and are more economical of fuel on electric, coal or wood ranges.

Hero Color-Blind

John Paul Jones, famous U. S. naval officer, was color-blind. Many men, but few women, have the shortcoming.

Uses of Peanut

Peanuts are now being manufactured into meal and flour, as well as salad oil, oleomargarine, peanut butter and candy.

Ancient Trade Center

Marco Polo, passing through Tabriz, Iran, centuries ago, found it full of busy merchants and it full of busy merchants and it full of busy merchants.

Dried Egg

Good quality freshly dried eggs have practically the same value as shell eggs, as they contain vitamin A and D of protein. They also have thiamin and riboflavin, two of the B vitamins needed to keep the body running smoothly.

Dust Removal

Various kinds of brushes are needed for dust removal. The toilet bowl brush is more sanitary rather than bound in a tight head. Wash, rinse and shake after use.

Electric Lighting

In 1940, 84 per cent of our population lived in electrically lighted houses. Of the homes wired for electricity by the end of that year, 95 per cent had electric irons, 63 per cent refrigerators, 54 per cent vacuum cleaners, 49 per cent vacuum cleaners and 35 per cent coffee percolators.

Whole Cotton

Scientists at the University of North Carolina are experimenting with the whole cotton plant as a cheap source of cellulose for making paper and rayon.

Soviet Automobile

Reports from Russia reveal that one of its engineers has developed an automobile without a gasoline motor. It picks up its power from wires imbedded below the surface of the road.

Suffered Falling Vision

Like most persons in middle age, Abraham Lincoln was troubled with falling vision in his forties. He obtained his first glasses the day before he delivered his famous "Lost Speech."

Food Changes

Changes in the food picture sure to come are pre-packaging of fresh fruits and vegetables, more pre-packaging of fresh meats, and better and more effective packages generally.

Farms Electrified

Previous to the war, 85 per cent of the farms in Denmark were using electricity, and 90 per cent in Germany, 95 per cent in France and practically 100 per cent in Holland were electrified.

Fill Reservoirs

Erosion from cuts along highways and in roadside ditches is a common source of the soil that fills reservoirs and reduces storage capacity.

Egg Hatchability

Scientists have tested the effect of airplane transportation on the hatchability of eggs and found they could be carried 5,000 miles or more without severe loss.

Nutritive Value

The nutritive value of a food is measured by the extent to which it will satisfy an animal's daily needs for each of the various dietary essentials.

Why Girls Tend Switchboard

In the early days switchboard operators were boys, replaced later by girls, because "girls are steadier and do not drink beer," a history of the telephone industry shows.

Bright Onions

Buy onions that are bright, clean, hard, well-shaped and dry-skinned, and store them in a cool dark place.

Spots Enemies

The woodcock has eyes set far back in its head so that it can see

HOUSEHOLD MEMOS... by Lynn Chambers

Follow Rules for Melt-in-Your-Mouth Muffins (See Recipes Below)

Quick Hot Breads

Taste-tempting hot breads add a flavorful touch to any meal. Golden-crust muffs or fluffy biscuits are the perfect accompaniment to meat and salads and go equally well with a glass of milk for a snack or with coffee or tea for breakfast.

Don't shy away from making muffins because you fear only fair results. Quick breads are the most easily mixed of all baked goods and you need to bear in mind only a few simple rules to have success.

The most important point to remember is not to "over-mix." Muffin batter, for example, should be "bumpy" — stirred only until the dry ingredients are dampened by the liquid. Biscuits should not be worked to death—they will be far more flaky and tender if the cook is not too ambitious.

Quick hot breads are an easy way to put appetizing appeal into the simplest meal. Served with butter and jam, they will really give the family something to look forward to even if the main dish is a hash from left-over roast or soup and salad from an accumulation of dabs of food in the refrigerator.

Cheese Muffins

(Makes 12 medium-sized muffins)
 2 1/2 cups sifted all-purpose flour
 3 teaspoons baking powder
 1/2 teaspoon salt
 1/2 cup grated American cheese
 1 egg
 1 cup milk

Prune Muffins

3 1/2 cups flour
 1/2 teaspoon salt
 4 teaspoons baking powder
 1/4 teaspoon nutmeg
 1/2 cup shortening
 1 cup brown sugar
 2 eggs
 1 1/2 cup milk
 1/2 cup cut, cooked prunes, well drained

Prunes and nuts for decoration

Lynn Chambers' Menus

- Calves' Liver with Onions
- Scalloped Potatoes
- Green Beans
- Jellied Fruit Salad
- Cheese Muffins
- Beverage
- Steamed Pudding
- *Recipe given.

Sift together first four ingredients. Cream shortening and add sugar gradually. Then add beaten eggs and milk. Add dry ingredients and mix thoroughly. Mix in prunes. Turn into greased muffin pans and decorate each muffin with a half a prune and nut.

Bake in a moderately hot (400 to 425 degrees) oven for 25 or 30 minutes. What are our standards for making biscuits? Perfect biscuits are light and fluffed, fairly straight and even on the sides, level on top, well shaped and regular. Their tender crust is golden brown and rather smooth. When broken open, they show a creamy white, fluffy crumb which is even and fine-grained.

Over-mixing, or too long kneading of the dough makes biscuits tough with a pale crust. Speed and light handling are essential for flakiness.

Under-mixing, on the other hand, causes lack of flakiness in biscuits. These biscuits also lack in volume. The fat needs to be well distributed for a flaky texture. The proportions for plain biscuit are as follows: 2 cups of flour, 2 teaspoons baking powder, 1/4 teaspoon salt, 5 tablespoons shortening and 1/2 cup milk. The dry ingredients are mixed; the fat cut in, and enough milk added to make the dough. Knead the dough for about 30 seconds, then roll and cut. Use a hot oven (450 degrees) and bake biscuits for 12 to 15 minutes.

Apple Sauce Biscuits

2 cups flour
 3 teaspoons baking powder
 1/4 teaspoon soda
 1/4 teaspoon salt
 3 tablespoons fat
 1 egg
 1/2 cup tart apple sauce
 1/2 cup thick sour cream

Buttermilk Biscuits

2 cups pastry flour
 1 teaspoon salt
 4 teaspoons baking powder
 1/4 teaspoon baking soda
 4 tablespoons shortening
 3/4 cup buttermilk

Sound Advice

Harry—Don't you think I should marry a girl who can take a j-k?
 Jerry—That's the only kind you'll get!

It Hurts to Give

Tramp—Could you give me something to eat?
 Lady of the House—Why, yes, if you'll cut some wood for me.
 Tramp—Let's not spoil it, lady. Just keep it a magnanimous gesture.

No Trouble At All

Hubbie—If I should die, would you visit my grave often?
 Wife—Of course I would! I have to pass the cemetery anyway whenever I go to my hairdresser!

Or An U?

Nit—What month begins with a U?
 Wit—There isn't any such month.
 Nit—How about AUGust?

Slightly Funereal

Reactor—Don't you like the way we've laid out this town?
 Disinterested Prospect—Yeah, it certainly looks dead enough.

Big Girl

Star—I can't get into my shoes!
 Director—Oh, your feet have swelled, too?

Gags

BEST LAUGHS OF THE WEEK

MOPSY by GLADYS PARKER

THE FIRST WAS AN ACCIDENT SO I PUT THE OTHER ONE ON TO BALANCE IT!

LIFE'S LIKE THAT By Neher

STICKY FINGERS by Gluyas Williams

FARM FUN

Nit—What's the best way to irritate a farmer?
 Wit—I don't know. What?
 Nit—Trample on his corn.

Nothing Wasted

Scotch Bride—Where's MacTavish?
 Wedding Guest—He's behind the car trying on the old shoes.

Way Off Key

Jones—Yes, Brown has organic trouble.
 Smith—Why he looks perfectly healthy to me.
 Jones—You should just near him play in our church some Sunday.

Very Grammatical

Teacher—What would a man talking on the radio be, a verb, an adjective or a noun?
 Smarty—Announcer!

Alive Anyway

Harry—How would you like to be the second husband of a widow?
 Jerry—I'd rather be the second than the first!

Danger Ahead

Soldier—What's a booby trap?
 Soldier—Ice cream and cake made by the girl friend.

THE SAILOR GETS A BREAK

Before long the navy will cease to be outdressed by the army.

The navy is being recast, with these historic upside-down pants, sailor collars and demi tasse hats doing a fade out for snappier and more modernistic clothing.

Tradition is a fine thing and the old-time sailor suit was good enough for countless stout-hearted Americans to fight and die in, but nobody could feel swankily tailored in it.

Some people say, however, that the garb was a fine thing: It made the wearer fighting mad.

The change is not official yet, but the navy is trying out completely new uniforms—Jack Tars, and they are fully as smart as the army, marines and aircorps. Pants are pants, the buttons are in the right place and there is no lacing remotely associated with them. The old blouse with the wide collar is also gone, as is the traditional salt hat.

Strike up the band.

Here comes a sailor, Freed from (at last) Farragut's tailor!

You can now join the navy and look as good as if you were in the army.

When a girl has to choose between the army and the navy it will be all even so far as the costumes are concerned.

Those old-fashioned bell-bottom trousers were designed so that a tar could shake 'em off swiftly if he went overboard, but modern youth can break swimming records even in a paratrooper's field regalia.

Nobody knows why the hat was designed, but it was never a fit and was one reason why so many boys joined the army.

Opry Horse Notes

If there ever was a New York theatrical season wallowing the notion that only dirt pays in the show world and that the big rewards go to the author who gets his ideas from under the linoleum, this is it. All the big money making musicals (with one exception) are of the refreshingly wholesome type. And away on top as money makers are the revivals of old time favorites, notable for loveliness of words and music.

"Show Boat," first produced almost twenty years ago, and revived in 1932, is back, for instance, and as terrific as ever. Believable human beings, decent impulses and the glorification of the more wholesome things of life mark every minute of the show.

On the other hand, there is that sign in 12-foot letters in Times Square that should help place some of the responsibility for juvenile crime, "Rougher and Tougher Than 'Murder, My Sweet'."

IMAGINARY ANGLING

This spring I'll go fishing. With a rod I cannot buy. On the line nobody's selling. I will tie a missing fly.

When the fish that isn't biting

Strikes and runs beneath a rock. I will haul him in directly. With the reel that's out of stock.

Miami Beach is one of the few places on earth benefited by the war. It had a boom all through the disturbance. If Germans had held out another year, there wouldn't have been a room in the place under \$500 a week, without bath.

And if the Japs hadn't quit as they did, any realtor would have been able to sell a covered wagon for the price of a waterfront hotel.

BROADWAY, 1946

Author—I've got a new show. Producer—What vintage? If it's under 26 years old I can't use it.

Old adages revised.

If you cry "woof" often enough you may get a mink.

A Hereford bull was sold at auction in Oklahoma the other day for \$51,000. And without potatoes or butter! It was a case where a redflag caused no trouble.

Spencer Tracy has been rumored

in and out of "The Rugged Path" so many times they are thinking of changing the name to "Are You With It?"

We know one of the most disappointed mothers in America. Her son is not handsome enough for a future indorsing of fine whiskies and yet too good looking for beer ads.

They say of a certain admiral,

"That's his story and he's Stark with it."

Dear Hi—Speaking of automobiles,

remember how owners of the Franklin used to swear by it, because of its easier riding wooden frame and less troublesome air-cooled motor?

Ely Colburn is off to Europe with a plan for controlling the atomic bomb. Once you sign that you have it in your hand it is up to somebody to take you out in spades.

George Trevor, by the way, drove a Mercer racer while at Yale and used to prowl around looking for a Stutz Bearcat to challenge.

SEWING CIRCLE PATTERNS

Princess Frock Is Flattering Gay Aprons Make Welcome Gifts

Lovely Princess Frock.

A STRIKING side button princess frock that's wearable and flattering to every figure. Wonderfully easy to make—it will be lovely in a soft plain fabric highlighted with a huge flower trim. Ruffling edges the neck, closing and pert pocket.

Pattern No. 8958 is for sizes 12, 14, 16, 18 and 20. Size 14, short sleeves, needs 2 1/2 yards of 35 or 39-inch fabric; use scraps for applique.

Gift Aprons.

APRON styles sure to please every home-maker. Gay bib styles to make up in pretty flower prints, checks or bright stripes. And if you like a shorter apron, a jaunty little tie-on with cherry applique. Aprons make the most acceptable gifts, too.

Pattern No. 8957 comes in sizes 14, 16, 18, 20, 42, 44 and 46. Size 16, checked apron, 2 yards of 35 or 39-inch; flower print, 2 1/4 yards; tie-on, 1 1/2 yards.

SEWING CIRCLE PATTERN DEPT.

Household Hints

To keep suede or kid gloves in good condition in a damp climate, put them in a dry mason jar and seal.

Place a piece of wax paper directly beneath the dresser scarf. Then should you spill perfume—nothing serious.

Soak such things as greasy overalls in a good soap solution and thereby make it easier for the washer to do its job.

If pickles are to be used as a garnish for meats or salads, try this way of cutting: Slice in fine strips lengthwise down to the stem, and then spread like a fan.

Put ground allspice, cloves, mace and nutmeg in shakers on the table and let the folks choose their own spices on their desserts.

Roll crocheted and knitted wearing apparel about discarded mailing tubes. This method keeps garments in better condition for wearing than folding.

Look over your clothing, bedding, towels and linens regularly with an eye to needed mending. If you catch breaks early you'll cut down a lot on mending time. Damaged places can be mended more easily and will show less.

If your tablecloth gets stained with milk, rinse it immediately with cool clear water. Then wash. Otherwise the hot water and soap may make the stain permanent.

One of the best home ways to BUILD UP RED BLOOD

If you lack BLOOD-IRON

You girls and women who suffer so from simple anemia that you're pale, weak, "draggled"—this is due to lack of blood-iron. So try Lydia E. Pinkham's TABLETS—one of the best home ways to build up red blood—in such cases. Pinkham's Tablets are "one of the greatest blood-iron tonics you can buy!" At all drugstores.

When ICY WINTER chaps hands

QUICK RELIEF. Freezing weather dries out skin cells, leaves them "thirsty." Skin gets red, sore—may even crack and bleed. Now soothing Mentholatum acts wonderfully. (1) Gently stimulates local blood supply and helps Nature heal. (2) Helps relieve "thirsty" cells so they can retain needed moisture. Quick-smooth Mentholatum, the comforting, medicated balm over sore, chapped hands, cheeks, lips. Handy jars or tubes, 30¢.

County Agent Notes

SOIL CONSERVATION DISTRICT ANNUAL REPORT TO DATE

The Washington County Soil Conservation District made their annual report to the Department of Agriculture, District E. M. Romane, chairman of the supervisors of the district.

During the past year, we made a study of the conservation program in Washington County, continued Rome, and found that 11,111 acres of contouring, 13,090 acres of contour strip cropping, 2,562 acres of wind strip cropping, 6,500 acres of terracing, 2,745 acres of pasture renovation, 21,462 acres of woodland management, and 54,000 rods of stone fence removal are necessary to completely control soil moisture losses in Washington County.

TRUCK CROP GROWERS MEET JANUARY 30-31

Commercial vegetable growers of Washington, Ozaukee and Milwaukee counties took a look at the postwar picture of their industry at a truck crop institute at Granville town hall, Milwaukee County, Jan. 30 and 31.

During the war the vegetable growers made an "all out" effort to boost production to supply their share of vegetables to meet the nation's wartime needs, especially to the war-plant workers in the industrial cities from Milwaukee south to Chicago. At the above conference they considered what they can do to retain their wartime markets, to improve the quality of their products, and to make such adjustments to the postwar economy as may seem necessary.

Lawrence A. Davis, Milwaukee County 4-H club leader, was chairman for the opening session at 10 a. m. Wednesday, Jan. 30, when Don Anderson, agricultural economist at the University of Wisconsin, discussed "Prices and Outlook" and Bruce Carter, rural sociologist, spoke on "Problems Facing Rural Education in Wisconsin."

C. C. Gilman, Ozaukee County agent, was chairman of the meeting Wednesday afternoon, with G. P. Warren, horticulturist at the University, talking on "Recent Developments in Weed Control." O. B. Combs, extension garden specialist, spoke on "Newer Varieties and Hybrids."

S. S. Mathison, Milwaukee County agent, was chairman of the 10 a. m. session, Thursday, Jan. 31, when T. C. Allen, economic entomologist, told of "New Developments in Insect Control," and R. E. Vaughan, plant pathologist, discussed "Disease Control in 1947."

E. E. Skalsky, Washington County agent, was chairman of the 2 p. m. meeting Thursday. Kermit Berger, soilman, talked on "Fertilizers for Cash Crops." Rex Eberdt, manager of the Wisconsin Cash Crops Cooperative, gave a progress report on the activities of that organization during the last year.

Moving pictures were shown at each session, and lunch was served at 12:15 p. m. each day. A period of discussion by gardeners present followed each

"VEGETARIAN" POULTRY RATIONS A POSSIBILITY

There is a possibility now that poultrymen soon will be able to do a good job of feeding chickens without going to the expense of including meat scrap, milk, fish meal, or other animal protein feeds in the ration.

If "vegetarian" rations continue to work out as well as they have in check feeding trials of the past year, they can well bring about a virtual revolution in poultry feeding. Such rations are far lower in cost than those used in the past.

In all events the new experimental rations brought about just as fast growth in chicks as did those with protein supplement made up of equal parts of meat scrap, fish meal, dried milk and soybean oilmeal, in repeated tests by members of the poultry staff of the University of Wisconsin.

All that keeps the new rations from being completely "vegetarian" is that they contain a vitamin supplement of 3 per cent fish solubles—a by-product of the fishing industry—as well as some bonemeal to help supply minerals.

What makes these rations more successful than previous ones concocted without animal protein is partly the vitamin-carrying fish solubles and partly a new protein combination made up of soybean oilmeal and corn gluten meal.

In the preliminary tests which indicated vegetarian rations might be valuable, some evidence of rickets appeared. No doubt this was because soybean oilmeal and corn gluten meal are lower in minerals than the animal protein feeds they replace. In later experiments, bonemeal was included in the rations usually at about a 2 per cent level. This eliminated the rickets, but it is not yet possible to state definitely what is the best mineral supplement to use with vegetarian rations.

Four experiments, involving 32 pens of birds, were conducted in broiler production, supplying liberal amounts of protein to promote fast growth. Soybean oilmeal at 15 per cent and corn gluten meal at 10 per cent was one protein feed combination tested, and another was 20 per cent of the soy meal and 5 per cent gluten meal.

Both the vegetable protein combinations produced excellent growth where 3 per cent fish solubles was included. In fact, in all four experiments the average for pens getting such rations was just as good as in check lots getting an expensive pre-war supplement made up of 5 per cent dried skim milk, 5 per cent fish meal, 5 per cent meat scrap and 5 per cent soybean oilmeal.

Another experiment was conducted with lower levels of protein, such as are used in starting birds to be kept for layers. Again vegetarian rations showed up well, a combination of 10 per cent soybean oilmeal and 6 per cent gluten meal—along with fish solubles proving as good as 1 per cent each of

dried skim milk, fish meal, meat scrap and soybean oilmeal.

Still another experiment which also revealed good results with the vegetable proteins—was designed primarily to obtain evidence on mineral and vitamin supplements which might be used in the new rations. There was no conclusive evidence whether 2 or 1 per cent steamed bonemeal is better than 1 per cent when used with 15 per cent limestone grit as the mineral combination, but 3 per cent fish solubles proved to be the best vitamin supplement among those tested.

One unusual vitamin supplement tested was 5 per cent dried sheep manure. Although it was inferior to 3 per cent fish solubles where the protein feed was composed entirely of soybean oilmeal and corn gluten meal, apparently this material can be helpful in rations containing as little as 4 per cent animal protein.

Another supplement tested was miltorganite, a brand of sewage sludge commonly used as fertilizer, and known to be a good source of certain B-complex vitamins. It worked well in this test when used at a 2 per cent level, but cannot be recommended for poultry because other trials have shown it may be dangerous when it makes up a slightly higher proportion of the ration.

Trials with pigs at the Wisconsin station likewise have shown miltorganite can have an unfavorable effect on animals.

Will vegetarian rations be useful for laying and breeding flocks as well as for chicks? That cannot be answered at present, but trials on the matter will be conducted during the coming year.

Prospects appear good that they can be used for commercial egg production, at least, it is generally true that a ration does not have to be quite as good for this purpose as for starting chicks.

Poultrymen who may wish to try vegetarian rations in 1947 will be wise to do so on an experimental basis only, since a good deal remains to be learned about the conditions required to make them produce best results.

One complication is that it may not yet be possible to obtain fish solubles in every locality, although the material can be secured from some dealers under that name and from others under various trade names. If fish solubles cannot be obtained, then it is not advisable to try vegetarian rations at present.

Here are some points which poultrymen will do well to bear in mind in preparing the new-type rations:

1. In the vegetarian rations which made good at this station the ingredients were of good quality.

2. Include among the ingredients was 5 per cent alfalfa leaf meal to help supply vitamins. This is standard for Wisconsin rations recommended by the Wisconsin station.

3. Riboflavin, one of the B-complex vitamins, was included in the pure synthetic form at the level of 1 milligram per pound of feed. It is believed essential to provide this extra riboflavin in vegetarian rations to replace the amount which would normally be supplied

in meat scrap, milk and fish meal.

4. In broiler rations, 15 per cent soybean oil meal and 10 per cent corn gluten meal can be used as the protein supplement, of the proportions of 20 per cent and 5 per cent if desired. For pullets to be raised into layers, 14 per cent and 6 per cent appears suitable.

5. So far, it has been necessary to use 3 per cent fish solubles for best results with all-vegetarian rations, although 5 per cent dried sheep manure will do if at least 4 per cent animal protein feed is included.

6. About 2 per cent steamed bonemeal should be used in vegetarian rations, in addition to other minerals such as limestone and manganese sulphate which are ordinarily supplied in good chick starting rations.

MEDIUM SIZE HOG STILL BEST BET

The 200 to 250-pound hog will continue to be popular with packers and consumers.

Although hogs sold this fall and winter have been averaging heavier, James Lacey, extension specialist in animal husbandry at the University of Wisconsin, does not believe this is any indication of any trend toward a change in type or size. He sees heavy weights in the feed lots and on the markets as due to attempts to convert soft corn into marketable meat.

Lacey points out that the consumer finds more attractive the cuts from the hog of medium weight and will generally pay higher prices for them. Such portions need little trimming, they produce only slight waste, and do not require pork to be served at successive meals in order that it be used up by the family of smaller size. The producer finds the medium size less expensive to feed to market finish; the processor finds the 250-pound animal best suited to the sale of meat and by-products.

REDUCE EGG SUPPLY 17%

The brakes are on poultry production! Secretary of Agriculture Anderson has set a 1946 goal of 650 million—that's 17% less than was produced this year.

The heaviest production was requested in the Middle West where the largest increase in egg production occurred during the war when egg drying plants were established.

The egg goal was based on an estimated civilian consumption in 1946 of 242 eggs per person. This compares with 290 eggs in 1945, 251 eggs in 1944, and 295 eggs for 1935-39.

Egg prices may decline more than seasonally this coming winter and early spring, unless exports of eggs or production of dried eggs for export should equal actual exports under lend-lease in the first half of 1946.

Civilian demand for eggs will be weaker as meat supplies increase and army procurement of eggs will be reduced, although this will be offset by return of military personnel to civilian life.

Chicken meat prices during the first half of 1946 are expected to remain near present levels but moderately below

EARLY HATCHED CHICKS PRODUCE EGGS WHEN PRICES ARE HIGHEST

Within the next three weeks OPA ceilings on egg prices paid farmers are due to drop nine cents a dozen.

"Barry" Hayes, extension poultryman at the University of Wisconsin, suggests that this drop in price reminds poultry raisers that September, October, and November are months of good egg prices. After that, as more hens come into egg production, egg prices fall. That is why he thinks poultry raisers should order their chicks early... then their pullets will become layers in time to take advantage of the high egg prices.

Hayes figures that it takes 165 to 180 days for a chick to grow into a laying hen from the time it leaves the shell; so poultry raisers would do well to start ordering their baby chicks from hatcheries in January for February and March hatching.

The extension specialist adds that there will be, later on, a feed shortage of protein and corn. If the farmers get their chicks early they will have mash feeds to start them well, and then the early chicks can take advantage of

pasture at an earlier age.

FARM MANAGEMENT ASSOCIATION ORGANIZED

On Saturday, Dec. 29, representatives from seven southeastern Wisconsin counties met at the College of Agriculture and completed the organization of the Southeastern Wisconsin Cooperative Farm Management Association. Counties represented were Columbia, Dodge, Dane, Jefferson, Rock, Waukesha and Washington. Ben Zinke, director of the Washington County unit, and County Agent E. E. Skalsky represented the Washington County unit.

Willis Freitag was employed as chairman of the association. He is a farm boy and was graduated by the College of Agriculture in 1929. He has had fourteen years experience as a vocational agricultural instructor in Wisconsin high schools. For the past three years Mr. Freitag has served as farm manager for the Columbus Canning company.

Group meetings to lay the foundation for the farm management work in Washington County will be held on Jan. 15 and 16. Those who have signed up for this service will be sent a notice of these meetings.

Any farmer interested in having the benefit of this service may still become a member of the county unit. Those interested may obtain more information from the agricultural extension office, post office building, West

low the first half of 1946. Supplies of chicken meat are expected to increase due to heavier culling of layers owing to lower egg prices.

E. E. SKALSKY, County Agent

Farm boys and girls of Richland County are starting a weed control program of their own. County Agent A. V. Miller thinks that at least 100 of the county's 4-H members will assist in the project.

On Monday Harold and two cousins, Miles and Victor Zwaska, former residents of Kewaskum, called on relatives and friends in the village.

Annual Meet of County Holstein Breeders Held

The Washington County Holstein breeders held their annual mid-winter meeting in the court house in West Bend on Thursday afternoon, Jan. 24. Frederick Schroeder, Route 4, West Bend, president of the county association, presided at the meeting.

Ray Bast, Route 1, Rockfield, secretary-treasurer of the association, presented the secretary's report reviewing the activities of the county association during the past year. A highlight of the report included a compliment from the national association giving the county credit for having the best attended mid-summer meeting of the year.

Paul Bast and William Nehrbass, both of Rockfield, were re-elected directors for a three year period. Other directors of the association are Carl Mayer and Albert Kuenzi of Richfield; Wm. H. Grubbe, Route 2, West Bend; Ray Bast, Rockfield; Ivan Salter, Germantown, and Frederick Schroeder of West Bend.

Herbert Schroeder, well known Washington county Holstein breeder, and a director of the national association, outlined briefly some of the postwar dairy problems being worked upon by that organization. One of these was the marketing of milk on total solids content rather than in fat content alone. This method, it was pointed out, represented a marketing system based on the actual food value of the milk.

discussed the summer meeting and indicated that an excellent program is already being planned for this meeting. All breeders were invited to attend the state meeting to be held at Richland Center on Feb. 25 and 26.

Plans Completed for Old Settlers' Meeting Feb. 22

The annual meeting of the Washington County Old Settlers' Club & Historical Society, which is being resumed this year after a lapse during the war years, will be held at the Fifth avenue Methodist church in West Bend on the anniversary of George Washington's birth, Friday, Feb. 22.

DAIRY COMPANY HONORS OUTSTANDING 4-H GIRL

Miss Rosemary Falter, Route 1, West Bend, was honored last Saturday at a luncheon given by the Luick Dairy company of Milwaukee. Miss Falter was one of 12 outstanding 4-H club members in the state honored by the dairy company this year.

the outstanding 4-H girl in Washington county. She is a member of the pleasant Hill Troopers 4-H club.

ST. KILIAN

Mrs. Mary Flasch and son Conrad visited the Richard Pree family at Milwaukee.
Hugo Straub, who fractured his leg several weeks ago, was removed to St. Agnes' hospital Monday.
Miss Frances Sohrauth returned to Milwaukee Sunday after spending the past weeks with Mrs. Ray Bogel and family.
Mr. and Mrs. Leo Felix, Miss Rose Felix and Mrs. Anna Felix visited Friday with Kilian Felix at Oak sanitarium, Pewaukee.
Mrs. Rosina Flasch, who had been confined to Wisconsin General hospital at Madison for the past two weeks, returned home Sunday.

Crop specialists at the University of Wisconsin are sending out a warning to all farmers who are being high pressured to buy seed of unadapted varieties.

JOHN MARX

Arthur Kuntz, agricultural instructor of the West Bend high school, next presented an outline of the 1946 sire project. He said that at present local breeders have pledged thirty purebred sire calves out of high producing dams and that close to forty FFA and 4-H club boys have enrolled for the project.

E. E. Skalsky, county agent, briefly
