

Haebig, Miller and Klein Are Winners in Bowling Tourney

The annual West Bend Bowling association was completed Monday night with K. William "Bill" Haebig of Kewaskum winning the all-events crown, the Pick Maltsters of West Bend taking the team event and Ray Klein of Kewaskum ending up as the singles champ.

Competing in doubles and singles events during the final week of the tournament, Haebig wound up with a 1943 total to win the all-events prize of \$30. He blasted out a 648 series in doubles events with his 53 pin handicap boosting his score to 706. In singles competition he shot a 659 set and in team competition he rolled 578, both with handicap. Even without handicap, the state assemblyman from this village averaged 197 per game.

Haebig not only won the all-events title but paired up with Roman "Jimmy" Miller of Kewaskum to take the doubles crown on a 1296 total, with handicap. In singles events Haebig ranked fifth high.

Leaders in doubles, following Haebig and Miller, were H. Roate and R. Knickel 1284, C. J. Kleinhaans and F. Kleinhaans 1275, J. Ecker and A. Novotny 1235, and G. Heimerman and B. Baumhardt 1233. Ed. Backhaus chalked up the high single game in doubles with 257.

The 3175 total registered by the Pick Maltsters carried through as the high team series. Ending up with a hot 1992 game, the Maltsters hit 3019 without handicap, a tourney record. Other top teams were: Alamo 1374, Wach's tavern 3612, Kirchner Electric 2998, and Pick Manufacturing 2964. The high single game rolled in team events was Merle Graff's 260.

Klein smashed out a 698 set with handicap to take the singles title. He was followed by Vic, Del Ponte 636, F. Pierret 667, Hank Kirchner 667, Haebig 659, and Carl Benice 659. High individual game in singles was Charley Geiger's 240.

Special prize for all-events high without handicap was won by Elmer Bandle. He put together sets of 685, 559 and 560 for an 1841 total.

Prize money will range from \$120 and down in team events, \$175 and down in doubles and \$60 and down in singles. Prize money and awards are now available at the establishment where the bowler did his league bowling. Several trophy and merchandise awards will go to the top winners.

1952 County Fair Dates Announced

Dates for seventy-five Wisconsin county and district fairs were announced this week by Charles Drewry, supervisor of fairs for the Wisconsin Department of Agriculture.

First of the county fairs will open on July 24 at Darlington, Galesville, Madison, Slinger and Tomah. The Virgoqua fair is the last of the season with dates there set for Sept. 15-21.

The Washington county fair will be held at Slinger on July 24-27.

Other fairs scheduled in this area include Beaver Dam Sept. 4-7 (Dodge), Cedarburg Aug. 7-10 (Ozaukee), Fond du Lac Aug. 6-10 (Fond du Lac), Plymouth Aug. 23-Sept. 1 (Sheboygan).

Fair committees in 55 communities have chosen the last two weeks in August for their expositions. 26 fairs will be held before Aug. 15 and 15 after Sept. 1. General information on the administration of county and district fairs will be found in the Fairman's Handbook or by writing the supervisor of county and district fairs at State Fair Park, West Allis.

The Wisconsin State Fair this year will run from Aug. 16 through the 24th at Milwaukee.

MARRIAGE LICENSES

David Backus, Kewaskum, and Virginia M. Haack, Kewaskum; wedding May 3. Edward Volm, Kewaskum, and Adeline Matenier, West Bend; wedding May 3.

Being a husband is just like any other job, it's much easier if you like your boss.—Leo J. Burke

Kewaskum Junior Prom Friday, May 9

King Dan Rodenkirch and his queen, Marlene Zuehke will reign at the Kewaskum High school junior prom next Friday night, May 9, in the school gym.

Music for this year's social event will be supplied by Herbie Breitzman and his orchestra. Dancing will be from 9 p. m. to 1 a. m. The theme of the prom will be "Tulips and Heather."

Following the queen and king in the grand march will be members of the queen's court and their escorts, who are as follows: Ariene Backhaus and Floyd Droher, Ann Kadinger and Leroy Koller, Pat Stenham and Richard Hunter, Mary Backhaus and George Hanrahan.

Chaperones at the prom will be Mr. and Mrs. Elmer Zuehke, Mr. and Mrs. Harold Perkins, Mr. and Mrs. Wayland Tessar, Mr. and Mrs. Harry Koch and Mr. and Mrs. John McElhatton.

Indians Win Two More, Share Lead

Table with 2 columns: Team Name, Wins, Losses. Rows include Kewaskum, Lomira, North Fond du Lac, Oakfield, Campbellsport, Rosendale, Brandon.

Results last Thursday—Kewaskum 13, Rosendale 7; Oakfield 7, Campbellsport 6; Lomira 11, Brandon 2.

Games Thursday—Kewaskum at Lomira, North Fondy at Campbellsport, Rosendale at Brandon, Oakfield bye.

Games next Monday—North Fondy at Kewaskum, Brandon at Oakfield, Campbellsport at Lomira, Rosendale bye.

Games next Thursday—Kewaskum at Campbellsport, Oakfield at Rosendale, Lomira at North Fondy, Brandon bye.

The Kewaskum Indians won two more games the past week to make it three in a row in Tri-County conference play and take over a tie for first place with Lomira, also unbeaten in three starts. The tie was broken Thursday afternoon of this week when the two teams met at Lomira.

Last Thursday Kewaskum walloped Oakfield 16-7 and on Monday they won another easy victory over Rosendale 13-7. The Indians out-slugged the Oaks in a free-for-all which included 23 runs, 24 hits and 13 errors. Third baseman Gordon Wierman unloaded two doubles and three singles for a perfect day at the plate. Don Meisenheimer pitched for the winners with Ronnie Vorpahl coming in to finish the final inning. Kewaskum collected 17 hits and Oakfield 7. The Oaks committed 8 misuses and the Mitchellmen 5. Arnie Meier of North Fondy pitched a no-hitter against Brandon the same afternoon.

Monday was another hitters' day for the Indians with Dick Bantjer and Carl Koepke slamming out home runs as Rosendale was downed 13-7. On the Daler field the Indians staged a rousing six-run rally in the fifth frame to beat down Rosendale. Besides the two homers, Gordon Wierman banged out two hits and Meisenheimer connected for a triple. Vorpahl hurled the victory, giving up 10 hits. The Indians also garnered 10 safeties off Urian and Klimke of the Dalers. Both teams played errorless ball.

Oakfield . . . . . 299 640 1-7 7 8 Kewaskum . . . . . 134 116 x-10 17 5 D. Collen, W. Collen and Jerahek; Meisenheimer, Vorpahl (7) and Ramthun.

Kewaskum . . . . . 430 660 0-13 10 0 Rosendale . . . . . 014 062 0-7 19 0 Vorpahl and Ramthun; Urban, Klimke (5) and Smit.

PUPILS ATTEND PLAY

On Saturday afternoon, a school bus load of the sixth, seventh and eighth grade pupils of Holy Trinity school went to Fond du Lac to see the play, "Our Miss Brooks," at St. Mary's Springs academy.

Kannenberg & Marx Open CPA Office

Elder Kannenberg, son of Mr. and Mrs. Fred Kannenberg of West Bend, and Ralph J. Marx, son of Mr. and Mrs. John Marx of Kewaskum, on Thursday, May 1, opened an office in the Central building in West Bend. The young men, who are certified public accountants, will operate under the firm name of Kannenberg & Marx. An announcement of their association appears on another page of the Statesman.

Kannenberg and Marx both are war veterans. Kannenberg served during World War II. He is a graduate of the West Bend High school and of Marquette university. Until the present time he has been working in Milwaukee as an accountant. He is married to the former Gertrude Beck, daughter of Mr. and Mrs. George Beck, R. 2, West Bend, and is the father of two children.

Marx served as a first lieutenant in the infantry during World War II and in January of this year returned from six months of duty in Korea, prior to which he was stationed in this country. He is a graduate of the Kewaskum High school and of Marquette university. He took his CPA examination after release from duty following World War II. Marx is married and the father of a two year old son. The Marx family resides in Kewaskum.

NEIGHBORING PRIESTS TAKE OVER FOR FATHER LA BUWI

During the absence of the Rev. F. C. La Buwi, who submitted to an operation this week, masses on Sunday and holidays at Holy Trinity parish will be read by Capuchin fathers. On Tuesdays, Thursdays and Fridays of each week Msgr. Lederer of Campbellsport will be here for communion and mass. On Wednesday and Sunday evenings Msgr. Lederer will also have the rosary and benediction at 7:30 p. m. On Wednesday mornings Father Ulrich of Barton will distribute Holy Communion at 7:00 o'clock. There will be no week day masses on Mondays, Wednesdays and Saturdays. Children of the parish school will say the rosary in the church each day after school.

SIX-MILE LONG GRASS FIRE AT WEST BEND THURSDAY

Firemen battled for several hours at West Bend before extinguishing grass fires which burned along a six-mile strip adjacent to North Western Railway tracks Thursday morning. The two-alarm fire started about 9:50 a. m. Locomotive sparks or hot ashes apparently caused the fires. The flames swirled into a wooded area and also burned some railroad ties but did not spread to nearby buildings. Neighbors with brooms and garden hoses aided the firemen. The flames spread toward a bulk fuel plant and the firemen rushed to the site to protect the highly-inflammable area.

WIN PRIZES IN SKAT

Prize winners at a skat tournament held at Hessler's tavern on Wednesday night were as follows: 1. Wilmer Probst, 27-4-23 net games; 2. Walter Schmidt, 291 points; 3. Erwin Hahn, club solo 5-72; 4. Willard Probst, 20-2-17 net games.

CARD PARTY

A card party will be held at St. Matthew's church hall, Campbellsport, sponsored by the Holy Name society, Sunday evening, May 11, at 8 p. m. All popular games will be played. Door prizes and other awards will be given. Lunch served. 5-2-21

BUILDING PERMITS

The following building permits were among those issued by the county clerk's office: April 18—William Baumgartner, town of Wayne, build silo; April 24—Alvin Westernman, town of Wayne, build addition.

Nowadays the only kind of money most of us make is spending money.—Homer Phillips

New Doctor Moves In; Others Change

Dr. and Mrs. J. L. Raschbacher and two children of Milwaukee have moved into one of the Schmitt Bros. new homes in Roseland Heights. Dr. Raschbacher, who at present is completing a year as resident doctor at the Milwaukee Deaconess hospital, will open a practice in Kewaskum in the near future in the Harry Maaske Realty company building on North Fond du Lac avenue. The young doctor is a graduate of the Marquette University Medical school, Milwaukee.

Mr. and Mrs. Norman Jaeger and daughters have moved into their new home on Clinton street from the lower apartment of the Jess Reindl home on the same street.

Mr. and Mrs. Dorwin Peraino and family this week end will move from the rooms on the north side of the L. Rosenheimer home on Fond du Lac avenue into the apartment in the Reindl home vacated by the Jaeger family.

Mr. and Mrs. John Vorpahl and family will move from the rooms on the south side of the L. Rosenheimer home into those on the north side vacated by the Perkins family.

Death of Mrs. Katherine Mathias, Former Resident

Mrs. Thille Zelmet received the news of the death of a friend, Mrs. Katherine Mathias, at Duluth, Minn. on Saturday. Mrs. Mathias, nee Hirschboeck, spent the first years of her life in Kewaskum where she attended Holy Trinity Parochial school.

The family later moved to Milwaukee and for the last several years she made her home with a brother, Dr. Frank Hirschboeck, in Duluth. Her husband and an infant son preceded her in death many years ago. She was 74 years old.

The funeral was held at Milwaukee on Tuesday of this week.

FRANK HOPKINS

Funeral services were held at Poynter, Wis. on Wednesday, April 23, for Frank Hopkins of that city. Mr. Hopkins is a former resident of Mauthe lake (then Moon lake), where he served as supervisor for a number of years for the Izaak Walton league, owners of the area at that time before it was purchased by the state of Wisconsin and renamed Kettle Moraine State Park. He died in Florida while on vacation and the remains were shipped back to Poynter.

Herbert Hopkins of Salt Lake City, Utah, son of Mr. Hopkins, and son-in-law of Mr. and Mrs. E. M. Romaine of this village, came to attend the funeral and visited at the Romaine home last week. Mr. and Mrs. Romaine also attended the funeral on Wednesday. Herbert left to return to Salt Lake City on Saturday.

MISS ROSENHEIMER ON WAYLAND HONOR ROLL

Suzanne Rosenheimer, daughter of Mr. and Mrs. M. W. Rosenheimer, Kewaskum, is on the honor roll for the mid-semester at Wayland academy, Beaver Dam, as announced by Dr. Weimer K. Hicks, Wayland president.

Honor roll ranking at Wayland academy places the student in the upper 10% of the student body numbering 225 members.

TREE PLANTINGS ARE MADE BY 4-H MEMBERS

Fond du Lac county is getting off to a good start on a long-time reforestation project by setting up a program of five-acre demonstration plantings on the home farms of 4-H members this spring. Four 4-H members and leaders who are making the acre plantings include Ronald Petermann of the town of Auburn, member of the Kettle Moraine 4-H club.

ANNOUNCEMENT

I wish to take this opportunity to announce my candidacy on the Republican ticket for sheriff of Washington county. George Drueger

Saukville in Lakes Opener Here Sunday

Thirty-six teams are ready for the 30th anniversary opening of the Land of Lakes baseball league this Sunday, May 4. The Kewaskum Chevrolets of the northern division will entertain Saukville in the opener starting at 2 p. m.

In other opening contests Cedarburg plays at Germantown, Grantville at Slinger, Newburg at West Bend, and Grafton at Mequon. Pre-season dope rates Slinger as the top team in the northern division at this time. Besides the northern there are southern, eastern and western divisions in the Lakes circuit.

With perfect summer weather prevailing, the Chevrolets have been able to get in some good practice sessions the past two weeks and they should be in pretty good condition for the opening of the campaign. Most of last year's players will be back and there are some newcomers on the squad. The new members include a couple of boys from Barton, which village has no team in the league this season.

Kilian Honeck Jr. will sponsor and manage the team again this year.

LAKE BERNICE TAVERN NEAR ELMORE IS SOLD

In a recently completed deal, Mr. and Mrs. Albert Schneider of Horicon purchased the Lake Bernice tavern and resort near Elmore from Henry Dreifal. Possession was given on May 1.

Mr. Schneider is a native of West Bend and conducted a grocery store at Horicon for the past several years. Included in the transaction were the tavern, together with tourist rooms and boats.

The new proprietors plan to hold a grand opening on Saturday, May 10.

COUNTY 4-H SPEAKING CONTEST AT JACKSON

The county 4-H speaking contest will take place at the Jackson village hall on Wednesday, May 7, at 8:00 p. m. The talks by the 4-H members will be on the national 4-H theme, "Serving as Loyal Citizens Through 4-H." There will be a junior division for those 10 to 14 years of age and a senior division for those 15 to 20 years of age. Everyone is cordially invited to come to hear these 4-H talks.

BADGER FIREMEN'S TOURNEY AT BELGIUM ON JUNE 21-22

The annual tournament of the Badger Firemen's Association will be held at Belgium on Saturday and Sunday, June 21 and 22. Each fire department in the association is to select a queen to represent it at the tournament on Sunday, and from this group the Badger Queen for 1952 will be selected. Henry J. Hubing of the Belgium department is chairman of the picnic committee.

JOHN KOHN DIES

John Kohn, 77, residing just north of Kewaskum, died Thursday night, May 1, at St. Joseph's hospital, West Bend. The body will be in state at Miller's funeral home after 1 p. m. Sunday. Funeral services will be held Monday, May 5, at Holy Trinity church, Kewaskum. A complete obituary will be published in our next issue.

GRASS FIRE CALL

The Kewaskum fire department responded to a call shortly before noon on Saturday to the Ed. Czada home on Hwy. 55 just south of the village. A grass fire threatened to burn a pigeon coop in the backyard but firemen snuffed out the blaze before any damage resulted.

BIRTHS

BACKHAUS—A daughter to Mr. and Mrs. Howard Backhaus, Kewaskum, Thursday, April 24. They have one other daughter, Jody. JACAK—A daughter to Mr. and Mrs. Sylvester Jacak, R. 2, Campbellsport (St. Kilian), Wednesday, April 23.

Milwaukee, State Beagle Trials Here

The Milwaukee Beagle club's annual spring derby field trial was held Saturday and Sunday at Kewaskum. The dogs were run in the surrounding area and headquarters for the trial were at Joe Eberle's kennels. The derby trial is for the young dogs only and is held each spring. The regular trial for older beagles is held in the fall. One of Eberle's dogs topped a second place award in the meet.

This Saturday and Sunday, May 3 and 4, the Wisconsin Beagle club will hold its spring derby at Kewaskum with Joe Eberle serving as host. On Sunday the club's annual election of officers will also be held and the site for next fall's field trial and specialty bench show will be selected. The club no doubt will again pick Kewaskum for the fall events, which have been held here for many years. Mr. Eberle serves as president of the state club.

The annual spring trial for pointing dogs sponsored by the North-eastern Wisconsin Kennel Club, Inc. will also be held Sunday, May 4, at Kettle Moraine state park near Kewaskum.

IN THE SERVICE

SUBMARINER JESKE IN ATLANTIC ON MANEUVER

Somewhere in the Atlantic (Delayed)—"Enemy" submariner Harvey A. Jeske, chief engineer, U.S.N. son of Mr. and Mrs. Erich F. Jeske, Kewaskum, gained added respect for convoy escorts during the Atlantic Fleet's recent Convex III maneuver.

Assigned aboard the submarine Sea Leopard for the "enemy" role, he was among sailors from 36 states manning 13 submarines in the convoy exercise.

Added respect came as a result of surface warship counter measures during early attacks. Several attacking submarines lost active status when they were detected and beaten to the punch by convoy-protecting escorts.

The Convex III exercise was a giant training maneuver in the control and protection of shipping. Submarines comprised most "enemy" forces. They filled realistic assignments by stalking opposing units while they simulated wartime convoy duties.

Climaxing the Convex III maneuver were submarine versus submarine duels which began in mid-March. The navy said the killer submarines Grouper and K-1 challenged their conventional guppy and snorkel-type brethren in a submarine "free-for-all" for the final phase of the exercise.

GULDAN COMPLETES BOOT TRAINING, SPENDS LEAVE

Jerome Guldan has completed his "boot" training at the Great Lakes, Naval Training station, Great Lakes, Ill., and at present is spending a two-week leave with his parents, Mr. and Mrs. Irvin Guldan, in Kewaskum. Following his leave Guldan will report back at Great Lakes for assignment to a navy school.

ERTLE TO GO OVERSEAS

Pvt. Wilbert Ertle, son of Mr. and Mrs. Philip Ertle of St. Kilian, left Friday for Camp Stoneman, Calif. after spending a furlough at home. From there he will leave for overseas duty in Japan.

PFC. SOLHEIM IN KOREA

Word has been received that Pfc. Donald Solheim of Kewaskum, who has been stationed with the army of occupation in Germany, was recently transferred to Korea.

PVT. SCHMIDT HOME

Pvt. William Schmidt of Camp Chaffee, Ark., is spending a furlough at his home near Kewaskum.

DOERING RACE WINNER

Fond du Lac's 1952 stock car season got off to a start Sunday with races at the fairgrounds. In the feature event, which brought out 13 cars, Marv Doering of Kewaskum came in third. First place went to "Bud" Burdick of Slinger and second to Mace Mellus of the same village.

Regional Woman's Guild Meets Here; Elect Mrs. Tessar

Mrs. William T. Baur, furloughed missionary from India, was the guest speaker at Peace Evangelical and Reformed church, Kewaskum, at the spring meeting of the Regional Woman's Guild on Wednesday. The conference began at 10 a. m.

Approximately 200 members of the Central Region, comprising Washington county and surrounding churches, attended. Regional

MRS. WILLIAM T. BAUR officers were elected. The Rev. F. L. Rodenbeck, pastor of the Peace church, installed the new officers, who are as follows:

President, Mrs. Aaron King, Menomonee Falls; vice-president, Mrs. Jack Tessar, Kewaskum; treasurer, Mrs. Fred Staus, Merton; secretary, Mrs. Louis Endlich, West Bend.

Mrs. Baur, the principal speaker, spoke of India's independence and work on the lepers. In India Mrs. Baur gave much of her time to work among women and children of the Ghandkuri Leprosarium at Daltipur, which is the second largest institution of the kind in India, and of which her husband, the Rev. William T. Baur, is the superintendent. She is a native of St. Louis, Mo. and received her education in the Webster Groves High school and Washington university.

Mrs. E. Imig, synodical president, of Waukesha was also a guest speaker.

HOSPITAL NEWS

The Rev. F. C. La Buwi, Kewaskum, submitted to an operation at St. Joseph's hospital, West Bend, on Wednesday, April 30.

Mrs. Frank Koller, Sr., Kewaskum, is a patient at St. Joseph's hospital since Sunday, April 27, where she is receiving medical care.

John Volm, Campbellsport, formerly of the town of Kewaskum, returned home from St. Agnes hospital, Fond du Lac.

Mrs. Lenor Hirsig, Campbellsport, underwent an operation Friday, April 25, at St. Agnes hospital.

LETTER TO PUBLISHER

Mr. Don Harbeck Kewaskum Statesman Kewaskum, Wisconsin Dear Mr. Harbeck:

The writer is taking this opportunity for thanking you for the many columns of publicity in your paper given to the 1952 Red Cross Fund Campaign.

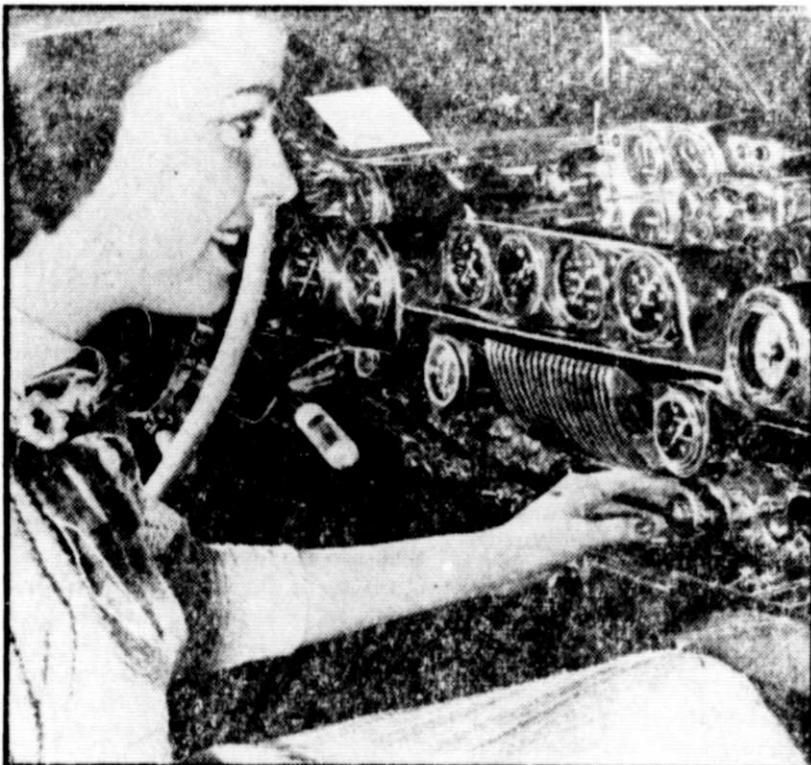

It is difficult at best to be able to estimate just how much good was derived from the newspapers in our Chapter Area. However, it was definitely an important part, and a part without which, we could not have reached our quota—at least not without considerably more hard work.

I am receiving many words of praise and congratulation because the drive was a success—we reached our quota and went beyond. But I am mindful of the co-operation a Fund Chairman needs, and mindful of the co-operation I received as such chairman. Believe me, Mr. Harbeck, you and your paper did play a big part in making me look good as the 1952 Fund Campaign Chairman.

Thanks again. Sincerely, R. G. Larson

**'EAR'S HOW**—By using an oximeter, which shines a light through the subject's ear, the Navy can determine the amount of oxygen in a jet pilot's bloodstream. This device aided in the development of survival equipment for Navy airmen who fly in the rarified air and sub-zero temperatures of high altitudes.

**SORRY, NO KITCHEN SINK**—Nita Nelson cautiously inspects what appears to be the instrument panel of a jet plane, but what is actually the dashboard of Joseph Bailon's custom-built automobile. Bailon of San Leandro, Calif., included both air speed and ground speed indicators, a record player and a snack bar when he constructed his gadget car which was displayed at the third annual National Roadster show in Oakland, Calif.

**STUMPING IN MEXICO**—While we north-of-the-borderites lend our attention to the presidential campaigning, Mexicans too are playing the same game. During a rally, above, for presidential candidate, Adolfo Ruiz Cortines, banners and posters cover a hotel front in Acapulco. Elections are scheduled for July.

**CLASSES YIELD GLASSES**—The hands belong to Clyde Lewis, electrician foreman at the University of Illinois in Urbana. The glasses used to belong to 200 absent-minded students. When Mr. Lewis told a friend that his church was collecting glasses for religious centers abroad, he was directed to the University's lost and found department where he really hit the jackpot.

**Chick Chats**

**FEED AND WATER INTAKE OF CHICKS**

Besides shelter and warmth, the essential items for raising chicks are plenty of feed and water.

It is interesting to the poultryman how much feed and water are consumed by growing chickens—particularly since having the feed-consumption figures helps determine the total amount needed during the growing period.

Chicks' early feed consumption is small, but it multiplies rapidly. During the first week, daily consumption per 100 chicks is only 1.3 pounds, average. It doubles the second week, and the third week daily consumption reaches 4 pounds per 100 chicks.

**100 Chicks—100 Pounds**

The fourth week, daily feed intake per 100 chicks is 5.2 pounds—or 4 times what it was the first week. At the end of the first 4 weeks, 100 chicks will have eaten 100 pounds of feed.

Four weeks later, or at 8 weeks of age about 375 pounds of feed has been consumed by 100 chicks. And at 9 weeks, they are eating about 100 pounds a week.

Altogether, in 24 weeks of growing, 100 chickens will consume about 2,650 pounds of feed.

**Water Consumption**

As for water, the daily intake of 100 chicks will average about 1/3 gallon the first week, 1/2 gallon the third week and 1 1/5 gallons the fourth week.

By the time they are 8 weeks old, the chicks are consuming 3 gallons of water per 100, and at 24 weeks the figure has grown to 5 gallons per 100 per day.

Nothing is more important in raising chickens than plenty of good feed and water. Broiler-growers, who are in business to produce the meatiest bird in the shortest possible time, do not skimp on feed or water. They know that to do so would hold back growth.

Give growing birds all the feed and water they need, if you would succeed as a poultry-raiser.

**KERRY DRAKE**

**MARY WORTH'S FAMILY**

**HAIR-BREADTH HARRY**

**THOSE WERE THE DAYS**

**THE TOSY TWINS**

**THE FUMBLE FAMILY**

**SHE'S NOSY**—Odor librarian Adele Webster identifies a new scent which will be added to the collection of a London concern which maintains a file of odors for manufacturers of soaps, perfumes and disinfectants. The shelves are crammed with more than 8000 "smells," and each librarian is a chemist, able to recognize hundreds of scents.

**OH WHAT HIS JET MET**—Second Lt. Ira Kimes, Jr., of Richmond, Va., demonstrates the accuracy of Communist anti-aircraft guns in Korea and the ruggedness of his Shooting Star fighter-bomber by sticking his head through the hole knocked in the jet's engine wall. Lt. Kimes finished bombing a tunnel before returning to his base.

**COAST TO COAST**—Refused a try at movie stardom, native San Diegoan Mary Sinclair headed for New York where she became known as the nation's most beautiful television actress. That's right; now she's in Hollywood with a long-term contract.

**Timely Tips**

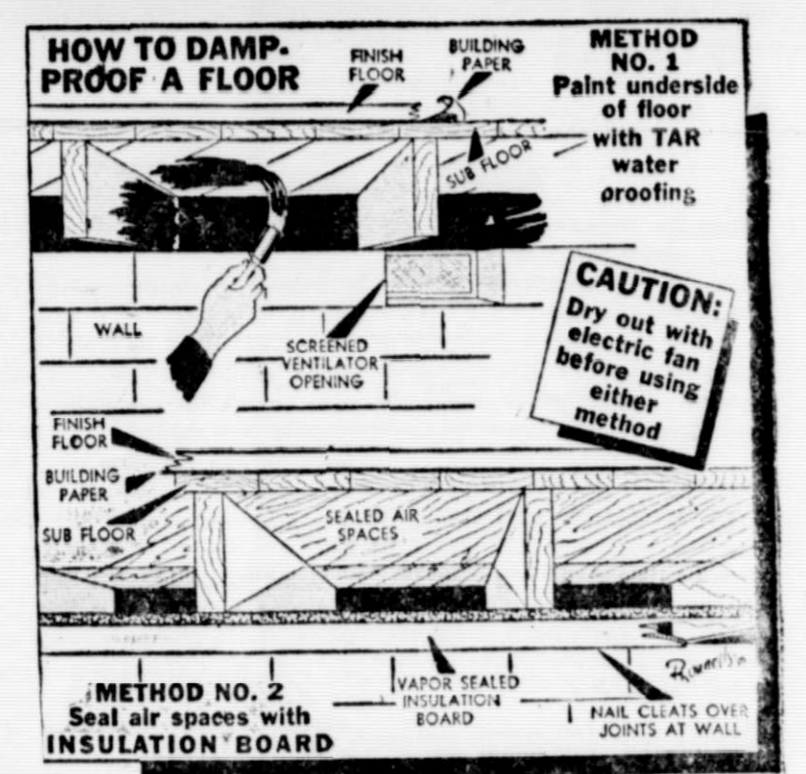

Keeping up interest in a winter-wear wardrobe at this time of year is a problem, particularly with a budget deflated from income tax. But don't despair. Have fun playing tricks and treats with past-dated numbers by adding new touches of color and trims.

That love-of-a-print dress you should throw away because it is definitely worn out will make a stole or collar and cuffs for your dark basic, and a bit of it, too, can trim your hat to complete the ensemble.

New buttons will put a bold, new front on that little suit you wear and wear. Pick something flashy now, like shiny jets or those beaded with brilliant jewels or lustrous pearls.

Pare that full-skirted dress to a sheath, shorten the sleeves and scoop out the neckline and you have a dream of a dinner dress that's slim and trim. Or, vice versa, slash off a sheath dress at the hip and add two deep flounces of taffeta and you have a swishy new silhouette.

**"Mister Fixum's Handy Hints"**

**HOW TO DAMP PROOF A FLOOR**

If the earth was excavated below the water level under your house, you have three possible causes of dampness.

A sump pump is necessary, and the outlet should be far enough away from the house that the water does not seep back.

Three or four strings of field tile laid a few inches under the surface, and all leading toward the sump pump may help keep the surface dry.

The sump pump should be in a dry well, located at the lowest point under the house, and below the surface.

Another possible source of dampness is the gas furnace. Is it installed under the floor, or in a utility room?

The important question is, was the furnace properly vented?

Such furnaces installed in a pit under the floor must have an opening under the floor to get air for combustion.

Furnaces installed in a utility room use air from the room for combustion, unless the burner has a supply vent from the outside.

Furnaces also must be vented properly to carry combustion vapors up the chimney. Otherwise, the vapors escape into the house, often causing a damp condition.

If you have reason to believe your furnace is not properly vented, call your gas company. Its engineers can clear up this point for you.

A third and common cause for damp floors is the natural damp condition under a house.

In localities having good drainage, the four ventilating openings

Bulk milk marketing will be more and more popular in Wisconsin as soon as research and experience can clear the way, according to Stan Witzel, farm engineer at the University of Wisconsin. With the new system milk is piped from the cow's udder to storage tanks, then into tank trucks and off to market without being lifted by human hands.

**EVER VISITED STATE HISTORICAL BUILDING?**

St. Paul—History is not static. Nor can its fascination be measured by the austere exterior of a public building. During the last quarter of 1951, individually or in one of 59 organized groups, 16,614 visitors to Minnesota Historical Society, housed next door to the state capitol, found this out. Attendants answered in person or by letter or telephone, 711 inquiries, while 1,027 readers consulted 3,037 books in the Society library. Fifteen MHS committees held more than a score of meetings, and 870 articles of historic interest and value were added to the vast collection of historic objects here open free to all comers. Only 2,353 are currently paying modest membership dues to supplement the limited state support of the Society.

**CANCER ARTILLERY**—Looking through a plate glass water tank, two feet thick, we see a nurse, acting as a model, lying beneath the nation's largest radium therapy unit. The huge device, which contains one-fortieth of the world's supply of radium, is used at New York's Roosevelt Hospital primarily for the treatment of cancer.

**Food Sense—Not Nonsense**

Worried about vitamins? Afraid of carbohydrates? Puzzled as to whether or not you and your family get enough protein each day? Avoiding fats and sugars? In spite of the fact that an increasing knowledge of nutrition has been one of the offerings of this scientific age, food crazes have been sweeping this country over the past few years like a plague of locusts. The public is both puzzled and concerned. It is ignorant to know there is no substitute for a well balanced diet, patterned on the basic seven food groups.

By an every day selection of foods from these groups you can be assured of meeting individual needs for vitamins, minerals, protein, fats and carbohydrates. All of these are essential to your physical well being. To have a well balanced diet, with all needed health giving factors, select foods from these following groups. (Servings are given as eating guides.)

**Green and yellow vegetables**, such as broccoli, green beans and carrots—one large serving daily. These are rich in vitamin A essential to good vision, and iron to build red blood cells.

**Oranges, tomatoes, grapefruit**—one serving daily. This group also includes raw cabbage and salad greens. These furnish vitamin C, also known as ascorbic acid, necessary for healthy gums and body tissues.

**Potatoes and other vegetables and fruits**. One potato daily and two or more servings of the others. These are thrifty sources of needed vitamins and minerals.

**Milk and milk products**, such as cheese and ice cream. One pint of milk for adults and more for children, daily. These are especially important for protein and calcium. They build strong bones and teeth.

**Meat, poultry, fish and eggs**—one serving meat, fish, or poultry daily, at least 4 eggs per week. These are the high protein, muscle building foods, carrying essential minerals.

**Bread, flour and cereals**. Six slices of enriched, or whole wheat bread, daily, with other grain foods, such as breakfast cereal. Enriched bread furnishes carbohydrates for energy; protein for building muscles; calcium for strong teeth and bones; iron for red blood cells; and the three B vitamins, niacin, thiamine and riboflavin for general good health.

**Butter and fortified margarine**—two or three tablespoons daily. These are high in vitamin A, essential to good vision, and are good "fuel" foods.

The important point is to include foods from each of these groups every day. Your diet will be balanced—your hunger satisfied—your fears banished.

**Favorite Recipes**

**Hot Cross Buns**

1 cup scalded milk  
3 tsp. butter  
2 tsp. salt  
1/2 cup cane or beet sugar  
1 cake yeast  
1/2 cup warm water  
4 beaten yolks or 2 whole eggs  
4 cups flour  
1 tsp. cinnamon  
1 cup raisins

Add butter, salt and sugar to scalded milk. Set aside until lukewarm.

Mix yeast with warm water and stir into the first mixture. Add the beaten eggs and one cup of the flour. Add raisins and beat well until smooth. Add the rest of the flour, sifted with the cinnamon gradually. Beat well after each addition of flour.

Let dough rise until doubled in bulk. Turn out on a floured board and knead lightly one minute.

Roll dough in two-inch balls and place close together in lightly greased round tin.

With a scissors cut a deep cross in each biscuit. When doubled in size again, bake 15 to 20 minutes at 375 degrees. Fill each cross with powdered sugar icing.

**Jonquil Sponge Cake**

Combine 1 1/2 cups cane or beet sugar and 1/2 cup water in saucepan. Place over low heat and stir until dissolved. Then boil gently until it spins a two-inch thread or 230 degrees to 234 degrees by thermometer.

Beat 8 egg yolks until thick and lemon colored. Pour hot syrup over yolks slowly, beating constantly. Add gradually 1 1/2 cups sifted cake flour and 1 tsp. salt. Beat two minutes with electric beater at low speed. Then beat at medium speed for two minutes.

Beat egg whites until foamy. Sprinkle 1 teaspoon cream of tartar over whites and continue beating until very stiff but not dry.

Fold in egg yolk mixture. Blend in 1 teaspoon vanilla, 1 teaspoon lemon juice, 1 teaspoon grated lemon rind.

Pour into ungreased tube pan and gently cut through batter several times to break air bubbles.

Bake in moderate oven 350 degrees for 40 to 45 minutes. Invert cake and cool one hour.

**Deviled Eggs**

Cook eggs over a low flame for 15 minutes. Place in cold water to loosen shells. Chill and cut in half lengthwise.

Remove the yolks and mash with a fork. Season them with salt and pepper. Add enough salad dressing so the mixture holds together. Finely cut celery, chopped olives or pickle relish may be added.

For a deviled egg dish to serve hot instead of cold, prepare the hard cooked eggs and mix the yolks with salt, pepper and a small amount of salad dressing.

Arrange the deviled eggs on a platter and pour over them a medium white sauce. Sprinkle with chopped parsley.

**Black-Eyed Susan Cake**

With both chocolate and white layers, this cake is bound to satisfy everyone. The orange butter filling adds just the right flavor

**Dairy Farmers Advance New Promotion Program**

St. Paul, Minn. — Recognizing that progress in industry is keyed to smart merchandising, the dairy farmers of this state and across the nation are heading into a new era of promotion for dairy foods determined to help America set an even better table.

So reported W. S. Mosrip, president of the Minnesota Dairy Industry Committee, upon his return from the 13th annual meeting of the American Dairy Association in Chicago where he represented this state's 143,350 dairy farmers. Other ADA delegates were Albert Nelson of Swanville, Minn., and D. T. Carlson of Willmar, Minn.

Confronted with the problem of maintaining consumption at a profitable level to provide adequate milk supplies, delegates from 40 states launched a two-pronged program designed (1) to prompt better public understanding of the economic importance of dairying and (2) to promote greater use of dairy foods for good eating.

For the first time in history, milk will have every-month nationwide advertising in the year ahead. Its theme will be "You never outgrow your need for milk." Other wide-sweeping campaigns on cheese, butter, ice cream, evaporated milk, cream and dry milk will enlist the support of manufacturers, distributors, retailers, related food groups and food editors.

The nation's milk producers will finance the countrywide program by investing a penny per pound of marketed butterfat. In Minnesota, he pointed out, the ADA Set-Aside period is for 60 days during May and June.

Five RCA recording stars will be featured in the Milk Festival advertising by ADA in May, it was announced. Boosting their favorite milk drinks will be Vaughn Monroe, Perry Como, Dinah Shore, Eddie Fisher and Tony Martin. Mobilization in underway for a gigantic Ice Cream Festival in June.

There's nothing like a clean, paved barn lot for the dairy herd these first few days of spring.

If you're thinking about putting in a paved lot this year, here are a few suggestions for building one from Stan Witzel, farm engineer at the University of Wisconsin.

Witzel claims the barn lot is most useful if the area is sunny and has some protection from prevailing westerly winds. That means planning the lot for the south or the east side of the barn. Or a board fence between buildings may turn the wind. You only need a little protection.

Next thing to consider is slope of the lot. And Witzel says one-half inch per foot is about right. Carry the slope out from the barn to a broad grassed waterway where drainage water leads rapidly away.

Some farmers are making good use of a two to four foot overfall where snow and slush can be pushed out of the yard.

How much area to pave? Witzel sets up a goal of 100 square feet per cow. You may want additional earth barn lot for drier days ahead.

Clean the lot up before you pave, fill in spongy spots, and grade down the high spots. Sand or gravel—four to six inches deep—fill keep the lot from settling after the concrete is laid. And a gravel base helps cut down damage from frost heaving.

Remember that finished paving will need to be several inches below the inside barn floor level. That lets doors swing free and keeps water from running into the barn.

It's a good idea to dig a foot-deep trench around edges of the paved area. Fill this with sand the same as under the rest of the barn lot. It helps keep out rodents, prevents undercutting from erosion, or cracking from vehicles driven onto the pavement.

He recommends a full four inches of good quality concrete. That would be reinforced with welded mesh wire. If you leave out the reinforcing steel, lay a five-inch slab.

Here's a warning before you start out to do the job. Concrete should never be laid over frozen ground.

**Paved Barn Lot Gets Cows Out Into Sunshine**

When repotting house plants, be sure the soil is slightly moist before you tap it out of the pot, so that it will come away in a clump, roots intact.

Remember to wash a fever thermometer in cool, soapy water after each using—hot water may impair its accuracy or break the glass tube.

Want a new kind of relish for fish? Dice celery and marinate in French dressing or in a little mild vinegar seasoned with sugar, salt and mustard.

To clean painted walls, cover a floor waxer with a cloth and apply paint cleaner to the cloth. The long handle of the floor waxer makes the job easier.

Count first in your closet of fragrance accessories a fine toilet water. It's even more basic than a good suit because you wear it every single day. A morning splash on the skin starts you off fresh and fragrant. Before bed, end your day with a fragrant flourish. Vary your scents often for morning, for evening; for spring, for fall; for frivolous moods, for serene ones; for dining and dancing, for shopping, for sports.

Stop worrying about what you don't have, and start concentrating on your assets. Some of the most glamorous women in the world achieve beauty despite irregular features and figure faults, says Betty Ann. They have learned how to outwit nature.

Let's say, for instance, your blue eyes are your best feature, but they are hidden from view by glasses. That doesn't mean you can't call attention to their beauty.

Wear glasses with delicately shaded blue frames. Always feature some touch of blue in your costume. You certainly have a wide color range to choose from.

When you are in the mood to be dramatic, tie a vivid purple colored scarf around your throat, and wear a matching pair of earrings. Choose hats that flatter your eyes.

If your problem is your nose, whether it be too long or too short, you can disguise or create illusions with make-up. A dark shade of powder on the tip of a long nose will make it appear shorter.

Apply light powder to achieve the opposite effect. The right hair style can also alter the shape of your nose.

What you must do, if you feel that no one feature warrants special attention, is to spotlight your skin. Take advantage of the possibility that it may be flawless. Perfect your make-up application.

If your skin, on the other hand, has its blemished moments, again think of make-up as a disguise. Always keep in mind the fact that you do not have to be beautiful to be glamorous, sophisticated and feminine. All these qualities can be acquired.

What counts is that you have not settled for plainness. You have learned the value of your possibilities, and then done something with them.

Reviewing the spring and summer fashion fabrics in synthetics and silks, it hardly seems possible that a few short seasons ago the fabric picture generally was almost one dimensional in scope and styling. For 1952, there is unlimited variety and high excitement.

The ribbed weaves, in both suitings and sheers; the slubbed yarn fabrics from shantung to the airiest gossamers; the metallic effect in stripes; the fabulous finishes and taffetings that are being applied to give crackling crispness to so many of the new weaves; all these dramatic trends are beautifully illustrated this season.

There is the genius, too, of modern chemistry in the man made fibers that manufacturers have used to create new surfaces and brilliant performance.

**MOST TRAFFIC DEATHS ON RURAL HIGHWAYS COUNTY SHERIFF WARNS**

Traffic accidents on rural Wisconsin highways account for most of the traffic deaths in this state, according to Sheriff Sylvester Naumann of Washington county. State records show that 114 lives were lost during the first three months of this year in accidents on rural highways, as compared with 45 deaths within city and village limits, he pointed out.

"This means that every driver should think twice about his safety before making a trip that will take him away from his home town," Sheriff Naumann warns. "It means we must get rid of the idea that we can step on the gas as soon as we leave the city limits behind us."

He lists the following rules for safe rural driving: Obey posted traffic conditions. STOP before entering the highway from a side road or driveway. Stay in your own lane. Do not follow other vehicles too closely. Reduce speed when approaching hills and curves, intersections with side roads, railroad grade crossings. Never pass on hills or curves, or when line in

your lane marks a no-passing zone. Give a clear signal before turning off the highway. Do not drive when ill or sleepy. Do not indulge in intoxicating drinks before driving. Be alert for slow-moving farm equipment during the spring and summer farming season.

"By correcting our own mistakes, and being alert for the mistakes of others, we can and MUST reduce the rural traffic death toll," he declared.

Council are sponsors of the district conference. The meeting is open to the public.

**WOMEN NO LONGER NEED DIPLOMAS FOR MARINES**

Women applicants for enlistment in the U. S. Marine Corps, all of whom formally had to be high school graduates, are now eligible upon successful completion of the general education development tests, it was revealed by Marine Sergeant Ethel Wilcox, Leatherneck recruiter station at Milwaukee.

Young women age 18 to 30 years, inclusive, may enlist in the Marine Corps or the Marine Corps reserve for periods of either three or four years, with an initial 6-weeks of recruit training at Parris Island, S. C.

A variety of jobs, ranging from administration to special services, at posts and stations throughout the U. S. and in some cases Hawaii,

**New Prospect**

Mr. and Mrs. Frank Bowen visited relatives in Plymouth Monday.  
Mrs. Paul Giese is a patient at St. Agnes hospital. She underwent surgery Saturday.  
Mr. and Mrs. Frank Linde of Beloit were guests of Mr. and Mrs. John Linde Saturday.  
Mr. and Mrs. George H. Meyer and Edith visited Mr. and Mrs. Arno Meyer at Waldo Sunday afternoon.  
Mrs. Dorothy Ebert of Ripon and Miss Gertrude de Lorme of Manitowoc were week end guests at the home of Mr. and Mrs. Richard Trapp.  
Mr. and Mrs. Walter Jandre, Mr. and Mrs. Aug. Jandre and Mr. and Mrs. Richard Trapp were Sunday dinner guests of Mr. and Mrs. Ray Klug at Kewaskum.  
The school meeting held Wednesday evening, April 23, was largely attended. It was voted to close the school the coming year because the anticipated attendance will be too small to keep the school open.

**DOCTORS OF AREA SPONSOR CONFERENCES WITH PRESS**

The first of a series of state-wide medical-press conferences was held in Sheboygan, Thursday, May 1. The discussions between doctors, hospital officials, police chiefs, newspaper and radio reporters was held at the Grand Hotel at 7:30 p. m.  
Sponsors of the meeting were the state medical society and the Washington-Ozaukee, Calumet, Manitowoc and Sheboygan county medical societies.  
The conferences seek to improve the working relationship between physicians and news reporters so that medical news can be reported quickly and accurately.  
Walter Pfister, city editor of the Sheboygan Press, discussed the newspaper's problems in gathering medical news. Dr. C. G. Reznicek, Madison, explained the physician's viewpoint of news about patients and medical discoveries. Dr. A. H. Heidner, West Bend, president of the state medical society, acted as chairman.  
Members of the Kewaskum press were invited to the conference as guests of Dr. R. G. Edwards.

**PLENTY OF WILDLIFE RIGHT IN THIS AREA**

Populus southeastern Wisconsin doesn't need to travel far to see wildlife. Game Manager Armin Schwengel reports.  
A work crew saw a herd of 10 deer in the Kettle Moraine forest of Sheboygan county.  
About 30 swans are staying over in the vicinity of Newburg in Washington county.  
Three muskrats were killed by cars within three blocks in the city of West Bend.

**STORY OF MINE DISASTER TO BE AIRED OVER WBKV BY SOCIAL SECURITY OFFICE**

The West Frankport Story will be presented by Station WBKV, West Bend, at 11:15 a. m. on Friday, May 9. In this transcribed program, Oscar Pogge, director of the Bureau of Old-Age and Survivors Insurance will explain what social security means to the widows and children of the men who died in the West Frankport, Ill. mine disaster.  
K. A. Albrecht, manager of the

Milwaukee Social Security office, states that this story is a dramatic illustration of the part played by social security in providing family insurance. Although West Frankport experienced a mass tragedy, every family suffers an equal loss when the breadwinner dies.  
"The Social Security Administration is a vital part of every community," said Albrecht. "Every day it is doing its job of providing protection against the loss of earnings to the old-age or death of the worker."

**WIN THE GREATEST HONOR EVER GIVEN A WISCONSIN GIRL**

*Alice-in-Dairyland*

**ENTRY BLANK**

Win

- All-expense trips to nation's leading cities.
- Complete new wardrobe.
- Title of official hostess of 1952 Wisconsin State Fair August 16-24.
- Radio, television, stage appearances.

You may be the lucky Wisconsin girl chosen to wear the 1952 "Alice-in-Dairyland" crown, and represent Wisconsin's great dairy industry nationally. Qualifications and instructions on how to enter are listed below. Send in your application today.

**QUALIFICATIONS:** Contestant must be 18 years of age and not over 25 years of age as of April 18, 1952, must be unmarried, and a resident of the state of Wisconsin. Applicants who qualify will be chosen on their availability, public appearance, personality, natural beauty, health and photogenic qualities. Picture must be attached to entry blank (any type picture, including snapshot).

**HOW TO ENTER:** Merely fill out the entry blank (below) and mail to local sponsor or Alice-in-Dairyland headquarters, State Capitol, Madison, Wisconsin.

**CONTEST RUNS APRIL 18 TO MAY 17, 1952 INCLUSIVE**

**Over-Population In The United States**

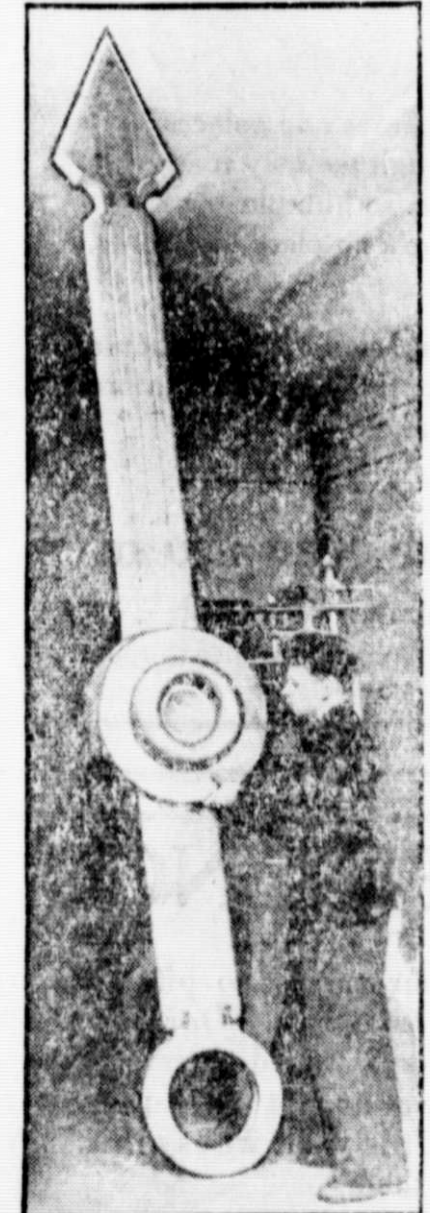

A Department of Agriculture official recently testified before a House of Representatives hearing that U. S. population would be 190,000,000 by 1975 and that farms might not be able to feed this number of inhabitants at present-day levels.

"It will require 530,000,000 acres of crop land to provide for that population of 190,000,000 at the 1935-39 diet levels and that 530,000,000 acres is 68,000,000 acres more than we now have available for that purpose; it is 23,000,000 more than the 507,000,000 acres that were projected as being available by 1975," B. T. Shaw, chief of the Agriculture Research Administration, said.

The Government official is presenting an argument which was presented decades ago when forecasters then feared a rapidly rising U. S. population would outstrip agricultural production. However, scientific advances in agriculture have kept pace with the increases in population, so that today Americans are enjoying a better balanced diet than ever before.

It is highly probable that by 1975 new fertilizers, new farm production techniques, new farm equipment and improved varieties of foodstuffs will have advanced to an extent which will enable farmers to feed more people per acre of cultivation than ever before.

Here is a sample in round numbers of how federal government non-defense spending is growing all the time: The annual report of the Secretary of the Treasury shows that the U. S. Department of Labor spent \$29,000,000 in 1940—but the budget report for 1950 showed that the amount spent in the latter year was \$257,000,000. It isn't the high cost of living; it's the high cost of government, says Minnesota Taxpayers Association.

**RED HANDS** — One of the stainless steel hands, which Soviet clocks say will be fitted to a giant clock on Moscow's Palace of Science, is examined by a Russian workman. Electric bulbs on the hands will render the 20-ton timepiece visible from a distance at night.

**Scandinavian Kin And Friends Invited to Mpls. Aquatennial**

Minnesotans of Scandinavian origin are cooperating with the Minneapolis Aquatennial in a salute to the homelands during the annual summer festival July 18 through 27.

Friends and relatives in Norway, Sweden, Denmark and Iceland will receive special Aquatennial invitations which will be flown across the Atlantic by Max Conrad in his single-engine transcontinental plane on June 10.

"Primary purpose of the flight is to emphasize the close ties between citizens of the Upper Midwest and the Scandinavian Countries," Emmet Duemke, Aquatennial Commodore declared.

The invitations are available now through the various Scandinavian societies and at the Aquatennial office.

As part of the Mid-Summer Day celebration on June 24 at Stockholm, Oslo and Copenhagen, an Aquatennial visitor will be selected to come to Minneapolis via Scandinavian Airlines on an all-expenses-paid trip. He and the friend or relative inviting him, will be honored at Aquatennial events, particularly on Aquastar Night, July 20 at the Parade Stadium.

This huge outdoor spectacle will be presented as part of the Aquatennial Music Festival which will also feature winners in the annual search for Upper Midwest musical talent. New stars are slated for discovery through contests which include vocal, men and women; choral, men, women and mixed; concert band, adult and juvenile; instrumental solo, piano and accordion; accordion band, three classifications; and baton twirling, adult, junior, juvenile, novice and teams. Rules covering the contests as well as the selections required and the official entry blanks may be obtained by writing Mr. C. W. Swanberg, Contest Chairman, Aquatennial Music Festival, Minneapolis, Minn.

Another Aquatennial event of major interest in wide areas is the \$10,000 Minneapolis Aquatennial Powerboat Speed classic opening in Bemidji July 12. Held in cooperation with the Midwest Powerboat Association, six Minnesota towns will offer racing cards preliminary to the Aquatennial event. Records will be kept of points accumulated by each racer in the "marathon" with a \$1000 purse awarded the winner in each town and a "pot of gold" for the high point racer at Lake Nokomis Sunday, July 20. The unique "point marathon" is expected to attract powerboat racing enthusiasts from at least 11 states and promises to afford exciting entertainment throughout Minnesota before Aquatennial officially opens July 18.

**Child's Stuttering Usually Normal**

When parents, teachers and others begin to regard a child's natural speech hesitancy as stuttering, that child is in danger of being turned into a real stutterer, states a bulletin from the Minnesota State Medical association.

A certain amount of repetition is normal. Once a child gets a notion that his speech is abnormal, he becomes tense and self-conscious in the presence of others. Thus, he speaks only with strain and he knows that listeners are expecting him to make mistakes.

Some parents realize that they should not call attention to their child's defects, and they try hard to show no concern. But the child knows by facial expressions and the irritation and commonEANN up in actions, thus causing the child to realize that something is abnormal in his speech.

The child's reactions to such treatment are a feeling of failure and a fear of talking, especially when mistakes are likely to be noticed and disapproved. Also, he will consciously exert himself to prevent abnormal speech, which sets up the cycle; the more the child tries to avoid non-fluency, the more imperfect his speech becomes, and the more mistakes he makes, the greater is the adult disapproval.

The best way to prevent a child from becoming a stutterer is to understand that his early non-fluency is normal, and to refrain from drawing undue attention to his speech habits. Repetition and hesitation in speech are normal in most children, and even in adults. As long as the child talks without self-consciousness, he is behaving normally.

Don't let anyone characterize the child as a stutterer or insist that he speak more clearly or smoothly than he can for the stage of development. Be patient, reasonable and realistic—make clear that you love him and that you mean to train him as best you can.

**First Mistake**  
The original mistake was inventing the calendar. This led, in due course, to having Mondays.—Detroit News.

**FIRST AID for Everybody**

**II--Control of Bleeding**

(This is another of a series of articles, written especially for Central Press Association and this newspaper on first aid, a subject gripping the nation in the light of threatened atomic aggression. The articles are based on the American Red Cross First Aid course. First aid principles, applicable to atomic as well as other disasters, are outlined. The Red Cross offers a 22-hour course free which teaches fully the technique of first aid.)

By Central Press  
**IN THE FIRST ARTICLE** it was pointed out that the first aider must examine an accident or attack victim immediately for bleeding. This takes precedence over examination for breathing difficulties or poison.

In all cases it is best to keep the patient lying down, his head level with the body, until you know whether the injury is serious. This will help in controlling shock. There may be exceptions in the case of atomic attack. When glass, steel and wood splinters are flying everywhere, you may not be able to keep the victim lying down. Get him to safety.

**BUT STOP** bleeding as soon as possible. Direct pressure probably is the most effective method of control—pressure directly into the wound with any available material. If possible, use a sterilized gauze compress. If that is not available, apply a clean handkerchief. If you don't have either, use your hand.

Once bleeding is controlled, bandage directly over any material already placed in the wound. The bandage fixed, look at it frequently to determine whether bleeding has started again. If this is the case, more pressure should be applied without removing the dressing and bandage. Removal will disturb or break the clot forming in the wound which stops the flow of blood.

Loss of two pints of blood is serious and may be fatal. Blood will pour out fast and in quantity if a large artery or vein is cut. The Red Cross course lists six pressure points on which you may press your hands or fingers to stop bleeding. These points are where the

A Red Cross worker shows correct way to apply a tourniquet.

main artery lies close to a bone, affording a firm object against which pressure can be applied.

The pressure points:

Just in front of the ear against the skull.

About an inch forward from the angle of the jaw.

Behind the inner end of the collarbone, down against the first rib.

In the mid-groin where it passes over the pelvic bone.

On the body side of the upper arm, halfway between the shoulder and elbow. If hand pressure is difficult to maintain and bleeding is from one of the limbs, a tourniquet may be applied although the tourniquet is dangerous and should not be used if bleeding can be checked otherwise.

There are two convenient places to apply it: (a) around the upper arm a hand's length below the armpit and (b) around the thigh the same distance below the groin. The tourniquet should be a flat band at least two inches wide, never a rope or sash-cord. Wrap the materials twice around the limb and tie a half-knot. Place a short stick on the half-knot and tie a square knot over it. Twist the stick but don't tighten more than is necessary to stop the flow of blood. Loosen the tourniquet every 15 or 20 minutes. If bleeding does not start again, let it remain loose but keep it in place.

**Bible Comment:**

**Solomon's Reign Saw Glory and Beginning Of Israel's Decay**

THE national glory and decay of Israel were associated with the glory and decay of one man—King Solomon, man of wisdom, temple builder, consolidator of the kingdom. At the height of his glory decay began to set in, because he had departed from the wisdom he had sought above all else, and from the integrity, humility and religious devotion so manifest in his beautiful prayer at the dedication of the Temple.

It is commonly said that no man is indispensable, but that notion is frequently discredited by the acts of life and history. Great businesses often fail when the founder and controlling figure dies. Battles and wars are lost and the destiny of nations affected when some great leader falls. Flourishing churches dwindle when no one arises to succeed some outstanding pastoral leader.

In almost every field in which strength and character count one will find innumerable instances where some who died were really indispensable, and failure and decay ensued because no one arose to take his place.

The sort of strength and character that Solomon represented in his early career was indispensable to a strong kingdom. The outward glory lasted while Solomon lived, but decay began when he departed from the principles of his early reign.

The way was already laid for the rebellion and the division that quickly came in Israel after his death.

The story of the rise and fall of the Kingdom of Israel is instructive and full of guidance and warning for our times. Facts and principles that underlie the welfare of nations and peoples are well illustrated.

Opening chapters of the First Book of Kings tell us of the bitter enmities and violent deaths perpetrated then. It would be a mistake to think that such things are missing in today's world, but we can be thankful that we live in a modern democracy with its attendant freedoms rather than in those times.

**FARM LIVESTOCK POPULATION GROWS**

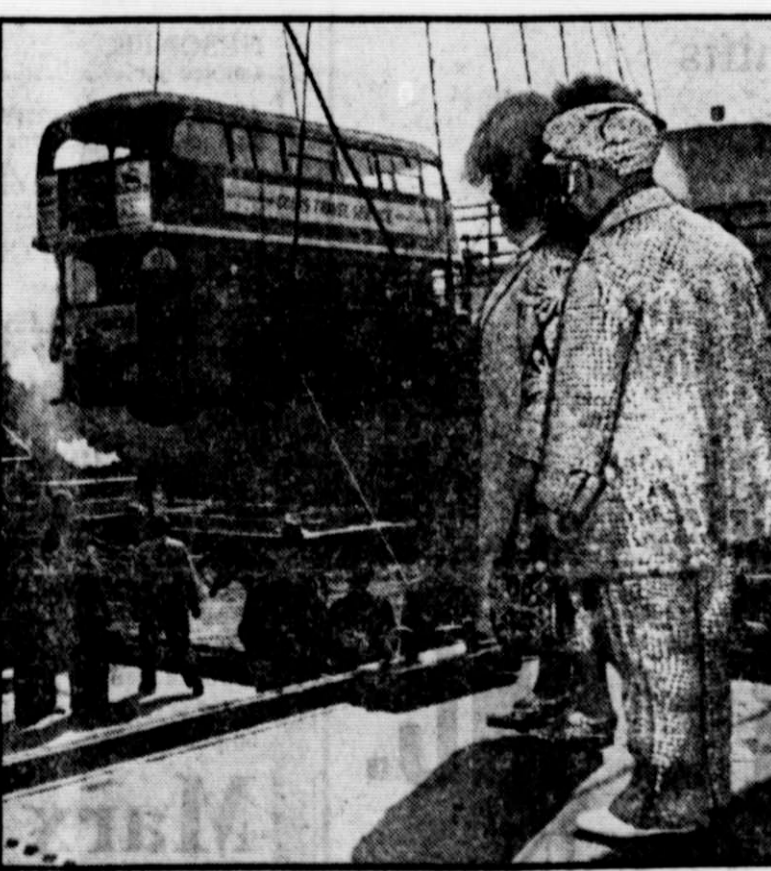

While the January 1 cattle population of the United States was 107% of the total for the year previous, dairy cattle numbered only 99% as many. Hogs were up 2%, sheep 3%. In Minnesota all cattle were up only 5%, dairy cattle down 2%, hogs up 5%, sheep up 23%—a gain exceeded only by Montana's 30% bulge, in hog population. Greatest loss in this region was South Dakota's 5% drop in number of dairy cattle.

**Sports Afield**

By Ted Kesting

There's a kind of trout fishing firmly entrenched in the hearts of many northwoods fishermen that you can adapt to your own fishing no matter where you live—the sport of fly-rod trolling. Outdoor writer Ted James told us about it, and he remarked that it does require a bit different tackle.

You need a fly reel with plenty of backing, 75 to 100 yards. Your line should sink easily; James prefers silk line, with no dressing. It may be tapered or level, and the same is true of the leader. He uses a coil of level 3-lb. test nylon leader material and cuts off whatever length seems indicated by weather and water conditions—anywhere from six to ten feet. The rod should be light but with plenty of backbone—say a four-ounce stick in a dry fly action.

The subject of lures is a thorny one, but there are certain tried and true patterns which should be in one's kit at all times. The Gray Ghost, Black Ghost, Dark Tiger, Supervisor, Green Ghost, Warden's Worry and red and white bucktail, tied on No. 4 to No. 8 hooks will take fish almost anywhere under almost any conditions.

From the standpoint of technique, perhaps most important of all is the knowledge of where to troll. There are certain definite places to troll at certain definite times. For example, in spring after ice-out, the smelt or other small fish are distributed widely around the shore line and the trout follow them there to

Ah, Spring!  
'Tis spring! What Rose-in-hand will toss a petal into the cup of old Khayyam?—Saturday Review of Literature.

**AMAZING PAZO ACTS TO RELIEVE PAIN OF SIMPLE PILES INSTANTLY**

Speed amazing relief from misery of simple piles, with soothing Pazo! Act to relieve pain, itching instantly—soothe inflamed tissue—lubricates dry, hardened parts—helps prevent cracking, soreness—reduce swelling. You get real comforting help. Don't suffer needless torture from simple piles. Get Pazo for fast, wonderful relief. Ask your doctor about the Suppository form—also tubes with perforated pile pipe for easy application.

\*Pazo Ointment and Suppositories

**"Piles were daily torture until I found Pazo gives amazing relief!"**

—Mrs. F. M. H., San Gabriel, Cal.

Amazing Pazo! relieves torture of simple piles fast. Acts to relieve itching, pain instantly. Soothes raw, inflamed tissue. Lubricates and softens dry, hardened parts. Helps reduce swelling, heal cracking, prevent agonizing soreness. So don't suffer needless misery of simple piles. Get Pazo, get real comfort right away. Ask your doctor about it. Suppository form—also tube with perforated pile pipe for easy thorough application.

**Special FLUFFY MACARONI PLUS SUPERB CHEESE FLAVOR OF KRAFT GRATED**

**Here's a Sunlit Hog House**

SCIENTIFIC hog raising for highest profits requires warm, dry, inexpensive housing. Three prime advantages to having movable log houses are cited by animal husbandry experts: Sows can be separated at farrowing time; growing pigs can be kept on clean ground; rye or legume pastures can be utilized in rotation.

When the sun has an opportunity to send its warm and sanitizing rays directly into a hog house, then the farmer adds a plus. When he is able to build quickly a structure that is both economical and durable, then he has another plus. These add up to the sunlit hog house, shown in the illustration.

Easily constructed, the house is 7 feet long, 6 feet wide and 4 feet 10 inches high. Built on skids, it has a 1/2-inch rough floor laid on 2 by 4-inch sills. Studding of 2 by 3-inch lumber supports the Masonite quarter-inch tempered hardboard, which is used for the siding and roof. This material is durable and weather resistant. Since it comes in sheets four feet wide, there is a great saving of time in its application.

Four-inch light strap hinges are used for turning back the roof door. The opening, with an area of 12 square feet, is situated on the narrow side of the gabled roof.

Working drawings for building the sunlit hog house may be obtained without charge by writing Farm Service Bureau, Suite 2037, 111 West Washington St., Chicago 2, Ill., and asking for Plan #FR-196.

**Seed Treatment Brings Big Profit**

One hundred dollars profit from every dollar you invest!

This isn't any wild, get-rich-quick scheme. It simply represents the extra bushels of flax which a farmer will harvest next fall because he treated his seed this spring.

Seed treatment has long been recognized as a part of good farming. Experiments have shown that it is one of the easiest and least expensive ways to boost yields.

"This year, seed treatment will be especially profitable to the flax grower," points out E. J. Mitchell, of the Flax Institute of the United States. "Last fall's unfavorable weather at harvest time resulted in considerable damaged seed. While weather-damage doesn't necessarily destroy a seed's capacity to sprout, it does weaken its ability to resist a number of diseases which lurk in the soil and attack it before it can emerge."

Such seed may do well in laboratory germination tests, yet produce thin stands when sown in the soil.

Twenty-eight typical flax samples from different locations were tested recently by M. B. Moore, University of Minnesota pathologist. In the laboratory, under relatively disease-free conditions, germination of these samples averaged 82%. Planted in the soil, untreated, only 40% came up. When treated with Ceresan M before planting, 78% emerged.

Thus, stands were practically doubled by the use of materials costing only about 12 cents per acre. Seedlings were healthier and emerged somewhat sooner than those from untreated seed. The increased vigor and heavier stands resulting from seed treatment also help flax compete against weeds more successfully.

State experiment stations have found New Improved Ceresan, Ceresan M and Panogen all effective in treating flax. For best results, treatment should be completed at least 48 hours before planting. While a good job of seed treatment can be done with simple home-made equipment, many farmers find it more convenient to have their local elevators treat their seed flax at the same time they bring it in for cleaning.

Farm tenancy in the United States has dropped from about 42 per cent in the early 1930's to about 25 per cent at present.

Cigarettes are the biggest selling packaged item (bigger than soap, bread, and canned foods) in retail food stores today.

**Zipper Sewing Easy When Using Cellophane Tape**

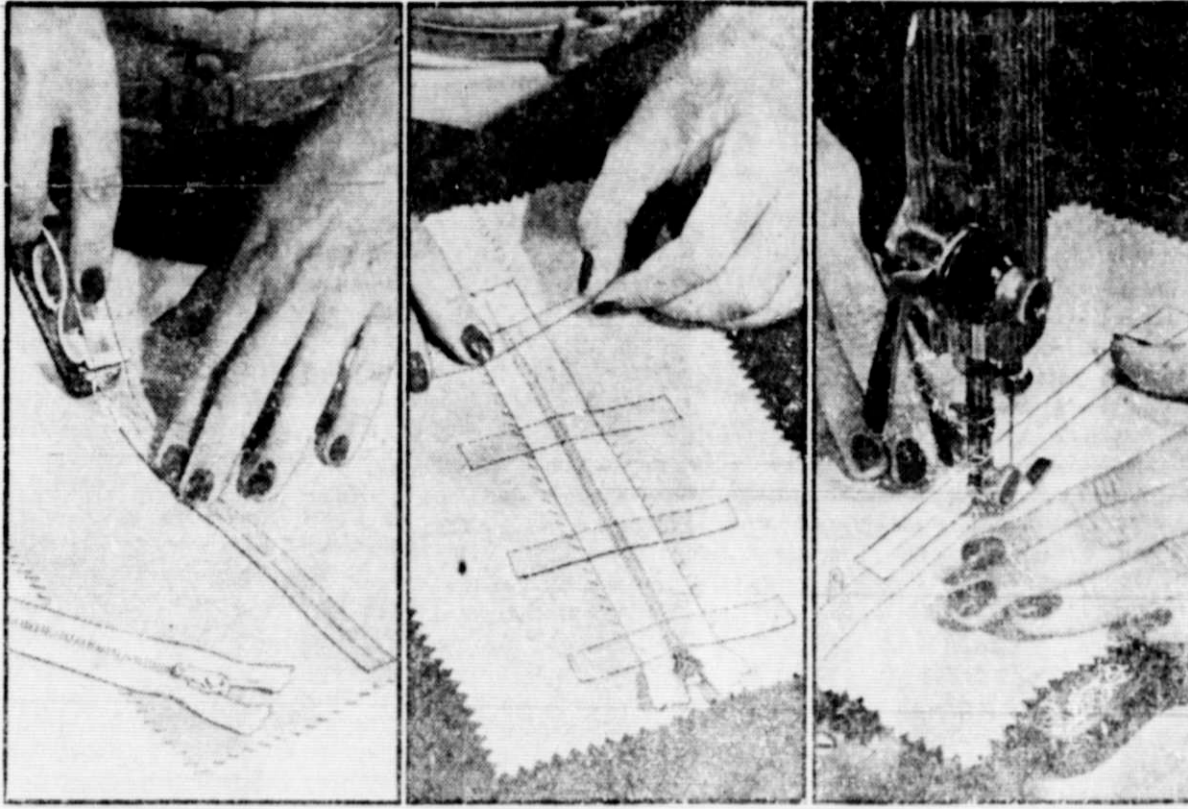

BY EDNA MILES

INSERTING a zipper in a dress or skirt often can be a bugaboo even for women experienced at home sewing. It takes time, doesn't always come out smooth, sometimes means a stretched seam.

That's why a new and sure method of putting in a zipper is such welcome news. It requires only the use of cellophane tape and it's this use that eliminates pinning, basting, ripping—and all the accompanying guesswork.

There's little or no handling of the fabric. This means that seams won't stretch and that you won't pull the zipper tape out of shape. Nor is there a need for pins. When the zipper is in, it's there to stay. It won't buckle, pucker or pull the seam.

We've chosen to show a slit seam, which is right for sleeves or the back opening of a dress. But exactly the same principle applies to the lapped seam type of pocket used in either dress or skirt.

Sew the seam up to the point where the zipper opens. Then press entire seam into place. Now run strip of cellophane tape along entire outside length of opening so that fabric edges will be just touching.

Turn the material and place zipper along the seam on the wrong side of the garment. Use strips of tape crosswise to hold zipper next to the seam. This holds the zipper firmly in place while you sew on the machine.

Now for the actual sewing. Stitch it on either side of the garment except if you have a chain-stitch machine. Run the stitching down one side, across and up the other side. Finally, remove tape and press garment.

**Test Your Intelligence**

Score 10 points for each correct answer in the first six questions:

1. A facade is a:
  - Front of a building
  - Kind of food
  - Fish net
  - Small animal
2. General Burgoyne was a British officer in the:
  - Boer War
  - Boxer Rebellion
  - American Revolution
  - World War II
3. The author of the novel Jane Eyre was:
  - Emily Dickinson
  - Dorothy Parker
  - Emily Post
  - Charlotte Bronte
4. Who said, "I regret that I have but one life to give to my country"?
  - Benedict Arnold
  - Nathan Hale
  - Patrick Henry
  - William Jennings Bryan
5. Alaska was discovered by a:
  - Dane
  - Russian
  - Englishman
  - Norwegian
6. Which of the following is not an official language of Switzerland?
  - French
  - Italian
  - German
  - Spanish

7. Listed below are four occupations and opposite them, jumbled up, are tools used in those jobs. Match them, scoring 10 points for each correct answer.

(A) physician	—T-square
(B) machinist	—stethoscope
(C) draftsman	—miter box
(D) carpenter	—calipers

Total your points. A score of 0-20 is poor; 30-60, average; 70-80, superior; 90-100, very superior.

**Dairy Products Price Decline Due To Pending Legislation**

Milk production has not been an attractive farm operation compared with the production of grain and meat products for the last several years. With the scarcity and high cost of farm labor, production of grain and meat animals dampened the interest of farmers in our most stable and long range profitable farm operation, which is dairying. That is the observation of John Brandt, president of Land O'Lakes Creameries, Inc.

For some time now it has been apparent that the cycle of cow numbers on the farm was on the decline and that, even though the production of milk per cow was on the increase, this increase in individual cow production would soon be overtaken by the decline in cow numbers. With the increasing demand because of the ever-growing population of America, surpluses in milk production would disappear and we would be in the cycle of deficit production with advancing prices giving dairying an advantage so far as comparable prices were concerned with the prices of other farm products. This situation has now become an established fact.

Whether or not the more favorable situation with respect to dairy products will continue and be a factor in again increasing cow numbers and general production of dairy products depends largely upon the action of Congress with respect to the passage of legislation permitting imports of dairy products from foreign countries. The recent sharp break in the butter and cheese markets was partially due to some increase in the production of butter and cheese, but this increase was not sufficient to warrant the decline the dairymen have suffered in the price of butter and cheese. A major factor in the price decline can be attributed to the uncertainty dealing with pending legislation, namely the attempted repeal of Section 104, known as the Andersen Amendment to the Defense Production Act.

Everyone in the butter business knows that if the advocates of the repeal can accomplish their purpose there is little hope of the price of butter going above the support price. At least everyone knows that the immediate effect, coming at the time of the spring flush, will be to settle the butter and cheese market right down against the government peg price. For this reason butter buyers who would normally store any small surplus that would appear on the market at this time just simply keep hands off. The current demand is just about equal to the current supply. There are some small surpluses appearing that might otherwise go into storage at prices considerably above present levels but, with the possibility of the repeal of this amendment, the gamble is all on the losing side.

While some decline in the price level of butter and cheese was expected as a normal trend at this time of the year, the sharp decline to present levels at a time when the holdings of butter on April 1st were the lowest on record can be laid right at the door of the uncertainty with respect to legislation that might be passed by Congress which would give the American market for American dairymen to foreign countries.

Dairying has long been a basic agricultural industry in America. The encouragement of dairying on American farms has done much to conserve the soil and build prosperity for the American dairy

**Pioneers Rush To Farms On Reclaimed Desert Land**

The greatest migration in the history of the United States has surged across the country in the past ten years to create homes and careers in the once arid lands of the Northwest. Sponsored by the U. S. Bureau of Reclamation, the program aims, through an irrigation network of reservoirs and canals, to turn hundreds of thousands of desert acres into productive farms for veterans and their young families. These enterprising pioneers of today are given the land free if they can meet certain minimum requirements, says Richard L. Neuberger, Oregon State Senator. Writing in Redbook Magazine for April, he tells how one young family transformed 70 acres of Idaho sagebrush into a fertile farm and describes the great Columbia Basin settlement south of the Grand Coulee Dam that is scheduled to begin next month and continue for sixteen years.

"More newcomers have migrated to the Pacific seaboard during the past decade than in the entire first century after Lewis and Clark carried our flag over the fastness of the Continental Divide in 1805. Most of the husbands and fathers are veterans of World War II in search of the new homesteads developed in seemingly inhospitable areas by the farsighted Bureau of Reclamation.

"Water is the key to these new farmlands and veterans of World War II get them free, provided they have had some agricultural experience and can show assets of at least \$4,000 to buy the necessary equipment. To help make up this total, a veteran is allowed to assess his car and household goods at a combined value of \$1,000.

"Gene Wilbur is one of the veterans who qualified in all essentials. Beside shaving been raised on an Iowa farm, he had specialized in poultry genetics for a year as an employee of Henry A. Wallace's famous hybrid-corn plant. The great adventure began for him and his family in October, 1948, when his name came up as one of the winners in a public drawing for fifty irrigated homesteads near Twin Falls, Idaho.

"Seven months later, in April, 1949, the Wilburs and their two small children stood amidst rolling sagebrush uplands 1,400 miles west of Des Moines and took stock of what the future might portend for them.

"I'm afraid I felt pretty grim at that moment," Gene Wilbur remembers now. "We seemed to have come to a Sahara Desert. The irrigation ditches hadn't been dug, and I didn't fully realize what water could do for this arid soil. I think only one thing kept me from heading right back to Iowa, and that was all the other young families we had met on the road, going West like us."

"Nearly three years have passed since they first glimpsed the grand Idaho homestead which they had won. Last autumn they brought in their harvest at a cash profit. The dry land which was worth barely \$1,000 when Gene Wilbur first tested its porous qualities has soared after irrigation and cultivation to a value of almost \$14,000.

"The Wilburs set up housekeeping in a barracks building which had been used during the war to shelter Japanese internees at a relocation camp, and the Government continued to give them much of the surplus equipment which had been used in the relocation center—sets of crockery, boxes of stainless-steel tableware, light fixtures, pickaxes, shovels, a suite of bedroom furniture, and an electric sewing machine.

"The drawing for irrigated homesteads out of which Gene Wilbur's name was picked as No. 47, has been one of many to take place in the states of the Far West since V.J. Day in 1945. They have been held in localities as widely scattered as California, Wyoming, Colorado and Oregon. The biggest settlement of all is scheduled in Washington State for next month, when 87,000 acres of the Columbia Basin Project south of Grand Coulee Dam will receive water to transform it from dusty desert to lush green fields.

"And this will be merely the beginning. For the next sixteen years 6000 acres will be wrested from the sagebrush of the Grand Coulee pumping plant every 12 months. Reclamation engineers believe that eventually 50,000,000 acres between the summit of the Rocky Mountains and the Pacific's booming surf can be made productive enough to feed 75,000,000 more Americans."—Redbook.

**They Forgot The Groom**

In its accounts of parties, wedding receptions and picnics our home town newspaper always included an invoice of refreshments. Once the name of the bride-groom was left out, but every detail of a nuptial breakfast was given.—Kansas City Star.

**Behind The Scenes In American Business**

By Reynolds Knight

NEW YORK—Spring, which was to be a big season for retailers during the disappointing Christmas holidays, isn't living up to advance notices. Even the approach of Easter failed to stir buyers until the week before when sales in some categories began to move ahead.

Last Christmas, movement of goods was unexpectedly low and only a late rush managed to get dollar totals up near the previous year. The same situation seemed to be developing this holiday. Department store sales in New York declined 13 per cent since early February.

Although most retailers feel this doesn't bode well for sales in the next few months, one savant, Lucien E. Oliver, national retail merchandise manager for Sears, Roebuck & Co., was more optimistic. He told a meeting of the Textile Fabrics Association he was looking forward to good business this spring, particularly in soft goods. One reason for his bright outlook became apparent the next day when the Sears catalogue appeared containing 1,000 price reductions.

Joseph L. Dubow, executive director of the Merchants Ladies Garment Association had his own answer to the problem—"Get out and sell!"

**YOUTH AND FREE ENTERPRISE—Do the citizens of tomorrow appreciate the free enterprise system?**

Businessmen worrying about the results of a letter-writing contest on "How Can I Help Expand Opportunity in America?" sponsored by the Sheaffer Pen Company. The consensus was that expansion of opportunity depends on free enterprise, racial tolerance and religious opportunity.

"The more than 2,200 finalists' letters expressed a stronger faith in our way of life than many adults seem to show today," said Craig Sheaffer, the pen company's president. "The wide geographical distribution of winners and their different backgrounds prove their beliefs are not peculiar to any one type of teenager or any one section."

More than 75 prizes were awarded to the students. Entries came from every state and Alaska, Hawaii, Puerto Rico and Canada.

**THINGS TO COME—A new marking and printing machine should be handy in plants which handle a wide range of materials. The unit can print anything from a control number to a full label on glass, plastics, ceramics, wood, rubber, textiles, metal or paper, the manufacturer states. . . . Recently announced delayed light switch for home or office keeps light on for a minute after the switch is flicked—permitting a safe, lighted exit. . . . A new, rapid badge maker will make a photo identification tag for employees or visitors in a minute and a half. . . . Replaceable window is featured on the latest device to protect the face from paint spray and dust. The item comes complete with a plastic general utility shield, a fiber front with glass holder for gas welding and screen window for scaling, heat and cyaniding.**

**BUILT-IN VALUE —** Realty men convening in Philadelphia heard some good pointers on what gives a residential home added value.

Norman Denny, vice president of Levitt and Sons, Inc., said that built-in community facilities such as swimming pools, parks and playgrounds will play an increasingly important part in maintaining long-term values of homes being built now and in the future. He took his text from the remarkable sales success of the firm's development of Levittown, Pa., 20 miles north of Philadelphia in the critical defense area of Bucks county, where homes have been selling at the rate of more than 300 a week since just before Christmas.

This, Denny says, indicates that what's under the roof is only a part of what a man looks for when he buys a house today. In other words, built-in community facilities, for which the Levitt firm has become famous, are not only attractive sales features but extra insurance that the resale value of a home in a properly planned community will remain high compared with other housing.

## Treasury Dept. Announces Changes in U. S. Savings Bonds Effective May 1

Secretary of the Treasury John W. Snyder on Tuesday announced a number of changes in United States Savings bonds which went into effect on May 1—the eleven anniversary of the original offering of Series E, F and G bonds.

Briefly, the changes are as follows:

### 1. SERIES E BONDS.

The first thing that has been done with respect to E bonds issued on and after May 1, 1952 has been to improve the intermediate redemption schedule to give a higher return in the earlier years. Interest will start at the end of 6 months instead of at the end of one year as formerly. The rate accrued at the end of 6 months will be 1.07 per cent; at the end of one year, 1.59 per cent; at the end of 2 years, 2.19 per cent; at the end of 3 years, 2.79 per cent; at the end of 4 years, 3.39 per cent, and so on.

The over-all interest rate on E bonds has also been raised—from 2.9 per cent to 3 per cent compounded semi-annually, the maximum permitted by the law. The \$18.75 issue price on a \$25 bond has been retained—as has the \$4 return for a \$5 investment.

The change in the over-all return has been effected by shortening the length of the Series E bond from 30 years to 25 years, 6 months. The new interest rate schedule does not apply to bonds outstanding for the period up to their original maturity.

The interest rate on the E bond

during the extension period after maturity has also been raised for all bonds which have not yet matured, so that the return will be 3 per cent, compounded semi-annually, during the additional 10 years of an E bond's life under the extension privilege. The new rates on the extension will not apply to bonds which have matured prior to May 1, 1952.

In addition to these changes in the terms of E bonds, the treasury has doubled the annual limit on E bond purchases from the \$10,000 maturity value now in effect to \$20,000 maturity value.

New stocks of bonds with the new intermediate redemption values and the new maturity will not physically be available on May 1. The existing stock of E bonds will be sold throughout the period prior to the availability of new bond stock.

Every E bond sold after May 1 will by regulation, however, obtain the revised terms and conditions. As soon as new stock is available, any purchaser who wishes will be entitled to exchange his old bond (if purchased on or after May 1, 1952) for a new one; but if he does not make the exchange, he will still obtain the benefits of the revised scale, and paying agents will be furnished new redemption schedules applying to the bonds issued on or after May 1, 1952.

### 2. NEW CURRENT INCOME BOND.

The treasury is also offering an entirely new current income savings bond to be designated Series H which will have interest paid by check semi-annually instead of having the interest accrue. This bond will be a companion to the discount E bond and will be promoted along with the E bond. This bond will be available beginning on June 1. It will be issued and redeemable at par. Interest will be paid by check semi-annually on a

graduated scale of rates which has been put as close as possible to the E bond scale. It will be issued only to individuals; will have the same 9 year, 3 month term as E bonds; and will have a similar annual purchase limit of \$20,000 maturity value. Unlike E bonds, however, it must be held 6 months, rather than two months, before it can be redeemed and it will be redeemable only on one month's notice; it will be issued and redeemable only at Federal Reserve banks and branches and at the treasury; and it will be offered with a minimum denomination of \$500.

Administratively, it is too costly to pay interest checks semi-annually on bonds in denominations of less than \$500. Because the Series H bond and the E bond are sold exclusively to individuals, and because they so closely resemble each other in interest return, the treasury will report combined sales of Series E and Series H bonds in the same way that Series F and Series G sales have been reported together.

### 3. SERIES F AND G BONDS.

The treasury is also making significant changes and improvements in the F and G savings bond picture. These two particular series were withdrawn effective May 1, and two new series of savings bonds to be known as Series J and Series K will be a revised Series G bond. The new series will differ from the old series primarily in their higher interest rate schedules. They will pay 3 1/2 percent if held 12 years to maturity, and will pay much higher intermediate yields than F and G bonds. Series J and K bonds will pay approximately

1 1/2 percent if held for one year, 1 3/4 percent if held for 2 years, 2 and one-eighth percent if held for 3 years, and so on. The combined annual purchase limit for Series J and K bonds has been doubled to \$200,000, as compared with \$100,000 for Series F and G bonds. To save administrative expense the \$100 denomination that was available in the Series G bond has been dropped, but all of the Series F denominations will be continued.

## Home Demonstration Work in Northern Washington County

by Mrs. Al Jenkins, Newburg Homemaker club

This week is National Home Demonstration week. To many this may mean nothing, but to a large group of home makers in every community it means a time to look up and say, "We have accomplished many tasks this year, let's set our goal even higher for next year." "Yes, this is true in all the surrounding communities. The homemakers are active and have contributed much to the community and home life.

At the regular monthly meetings, the homemakers enjoyed participating in projects which included, "Lamp Shades, Fruits in our Meals, Knowing Yourself and Others, Soaps and Detergents, Room Arrangements, and United Nations." Each home maker found special interest in at least one of these projects and all the projects were interesting to the majority.

When the Wayne Homemakers, newly organized last fall, held their meeting on fruits in our meals, all the women drew a recipe from a hat and prepared this recipe, which demonstrated fruit in our meals.

Along with their project work the Allenton Golden Agers found time to send gifts to the American Red Cross Army hospital at Camp McCoy, Wis.

If you attended the Barton Firemen's picnic last year no doubt you noticed the concession stand under the leadership of the Barton Homemakers. This was a service to the community and also a good way of making a few extra dollars for the club.

The Allenton Aces Homemakers club has been able to set up swings and other playground equipment in the new community park there. They accomplished this through a project they call "Parcel Post."

A skit presented by the Kohisville Klever Kats was just one way which these homemakers carried out a project to make their community and club United Nations minded. Club talent produced a song to chime in with their theme.

The group called Martha Washington at St. Michaels sacrificed a Christmas gift this year. Instead of exchanging gifts at their Christmas party they gave fruit and candy to the people at the county home, so that they might have a Merry Christmas too.

The North Trenton Homemakers held their meetings at the home of the members in the afternoon. This year they took charge of a program for the county home presenting a skit.

The Newburg Homemakers club

proudly served many people at the Red Cross dinner. The table decorations, the food and the program all presented the homemakers with good opportunities to show their ability and interest in the community. They also took flash bulb pictures of the most interesting and helpful parts of their meetings. These pictures are both educational and enjoyable.

Someone once said, "The aim of the home demonstration program is to help the homemaker to so arrange the various departments of her housekeeping that she may secure for herself, her family, and her community the highest degree of health, happiness and efficiency." The homemakers in this center believe that they have done this through their programs this year.

## HIGHWAY COMMISSION ASKS BIDS ON COUNTY PROJECT

Raymond E. Jensen, vice chairman of the Wisconsin Highway Commission, has requested that bids or proposals be filed for construction of a highway project in Washington County.

tain highway work to be performed this summer, according to Edward J. Konkol, Madison, executive secretary of the Wisconsin Good Roads association. After the bids are received and publicly opened, they are referred to the Governor for final approval, Konkol said.

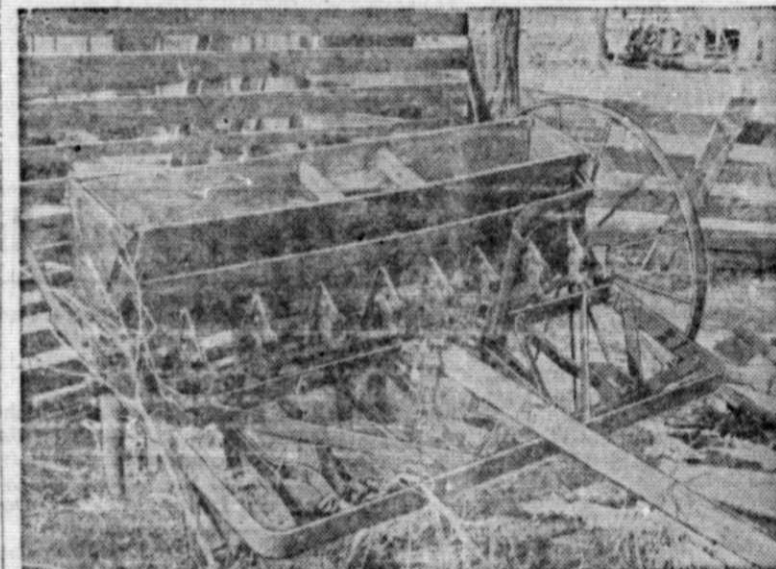

Bids will be opened in Madison, Wis., at 10:00 a. m. on May 6, 1952.

Bids or proposals on the following project in Washington county will be considered.

The project calls for the improvement of .5 of a mile of U. S. Highway 45 which extends on Fourth avenue in the city of West Bend. Specifications call for the grading, draining, the placing of a concrete base course, and surface with sheet asphalt pavement. There will be 15,000 sq. yds. of base course required and 2,700 tons of asphalt pavement. The curbs and gutters will also be improved.

With chronic borrowers, friendship is a matter of touch and go.—Shannon Fife

## Cash In On Your Scrap Before Spring Planting, Farmers Urged

Now is the time to cash in on your old iron and steel scrap, the Steel Industry Scrap Mobilization Committee urges all farmers. "By turning in your scrap before spring planting you will be helping the nation and yourselves," the Committee says.

During the past winter months in many parts of the country scrap iron and steel has been covered by snow. Lying idle on farmer's junk heaps, much of this critically needed metal has been rusting away.

Farm scrap is urgently needed to keep steel mills and foundries pouring out steel for civilian and military needs. Most steel is made from equal parts of pig iron and scrap steel. Therefore, every pound of scrap sent to the mills helps make two pounds of new steel.

Last year the steel industry and foundries required 33,822,000 gross tons of scrap iron and steel. It is expected that an even greater amount will be needed in 1952 in order to meet defense needs and civilian requirements.

"Look around your land for old tools, worn-out parts of tractors, trucks, cultivators and other implements," the Committee asks farmers. "Search for broken tools and discarded pieces of metal that are cluttering up your farm."

Farmers are urged to take their scrap iron and steel to the scrap dealer. If the scrap is unusually bulky, making transportation difficult, the scrap dealer or the local farm agent can be asked to work out arrangements to move it.

Farms always have been an excellent source of scrap and farmers have a big stake in the present scrap drive. In many communities drives already have been organized. If there is one in your town, participate in it. If one hasn't been set up, get your scrap to market anyway. The important thing is to keep the scrap flowing to the mills so production of steel will not fall.
