

Kewaskum Shut Out by Helm in Opener

LAND O' LAKES STANDINGS (Northern Division) Won Lost Saukville 1 0 West Bend 1 0 Germantown 1 0 Granville 1 0 Mequon 1 0 Kewaskum 0 1 Newburg 0 1 Cedarburg 0 1 Slinger 0 1 Grafton 0 1

Scores Sunday—Saukville 6, Kewaskum 0; West Bend 14, Newburg 5; Germantown 5, Cedarburg 3; Granville 10, Slinger 7; Mequon 4, Grafton 3.

This Sunday—Kewaskum at Newburg. Bobby Helm tossed a three-hitter at Kewaskum as Saukville shut out the Chevrets in the opening game in the northern Land o' Lakes division here Sunday, 5 to 0.

Helm did a masterful pitching job in whitewashing the powerless Chevets. Along with his 3-hitter he struck out nine batters. Helm, who passed four hitters, had men on the bases in only four innings, setting down the losers one, two three in the remaining five frames. He was in danger in only the eighth inning when Kewaskum filled the bases. But he got the side out without damage.

A. Duenkel started for the Chevrets and went along pretty well until the 8th inning when he was nicked for three hits and allowed three walks and was relieved by Manager Honeck. Saukville scored three runs in this inning on top of the two scored in the third frame. Duenkel gave up eight hits, walked four and whiffed eight in seven and one-third innings. Honeck was touched for one more hit, walked none and fanned two in the last inning and two-thirds.

Helm not only was a pitching ace but was his team's hitting hero as he banged out three singles in four trips to the plate. Fielder McGaw connected safely twice. The Kewaskum bingles were divided.

This Sunday the Chevets will try to notch one on the other side of the ledger when they play at Newburg, which was defeated by West Bend last Sunday, 14-5.

KEWASKUM HIGH SCHOOL BAND IN MUSIC FESTIVAL

Bands from 17 high schools participated Saturday in the annual East Central Wisconsin School Music Festival at Beaver Dam. A parade climaxed the event. Schools entered besides Kewaskum included Beaver Dam, Fall River, Fox Lake, Hustisford, Random Lake, Slinger, Cambria, Horicon, Juneau, Mayville, Randolph, Columbus, Port Washington, Cedarburg, Hartford and Menomonee Falls.

PUPILS VISIT PLANT

The seventh and eighth grade pupils of Holy Trinity school visited the Regal Ware, Inc. plant last Friday. They were shown through the factory by employees.

2,775 Trees Planted by Local FFAC Chapter

2,775 trees have been distributed to and planted by the members of the Kewaskum chapter of Future Farmers of America this spring. These trees consisted of 1425 Norway pine, 525 white pine, 500 white spruce, 200 jack pine, and 75 elm were planted by fourteen chapter members.

These trees are distributed without cost to these members by the Wisconsin Conservation Department for use in windbreaks, shelterbelts, solid forest plantations, underplantings, and land conversions.

Agriculture Classes Take Trip to Madison

Members of the Kewaskum High school senior vocational agriculture class and young farmer evening class recently took an educational trip to Madison according to D. W. Scheid, agricultural instructor there. The tour was planned as the first of an annual trip for this group.

Among the points of interest visited by this group were the Electric Research farm near Verona, the university steel dairy barn experiment project, the university campus, and other scenic and educational points.

A high point of interest was shown in the experimental milk parlor and in the handling of milk from cow to bulk cooler by means of a pipe line.

This trip was the climax of the young farmer evening classes held this past winter on "Dairy Cattle Management."

BIRTHS

HAUG—A son to Mr. and Mrs. Carroll Haug, Kewaskum, Wednesday, May 7, at St. Joseph's hospital, West Bend. The Haugs also have a daughter. STOFFEL—A son to Mr. and Mrs. Gerald Stoffel, R. 2, Kewaskum, Sunday, May 4. BECKER—A son to Mr. and Mrs. Henry Becker, R. 1, Kewaskum, Saturday, May 3, at St. Joseph's hospital. Mrs. Becker is the former LaVerne Terlinden, daughter of Mrs. Tillie Schaeffer of this village. WIENNER—A daughter to Mr. and Mrs. Marvin Wiesner, R. 1, Kewaskum, Friday, May 2. BALES—A daughter to Mr. and Mrs. Sylvester Bales, R. 1, Kewaskum, Tuesday, May 6. SCHACHT—A son to Mr. and Mrs. Henry P. Schacht, R. 1, Adel, April 26 at Sheboygan Memorial hospital. Mrs. Schacht is the former Marion Domann, daughter of Mrs. Clara Domann, R. 1, Kewaskum.

MARRIAGE LICENSES

Wallace W. Cudnoski, R. 1, Kewaskum, and Jeanette V. Konies, Kewaskum; wedding May 15. Paul H. Althaus, West Bend, and Marjory Alice Koch, R. 1, Kewaskum; wedding May 10. Thomas A. Rodenkirch, R. 2, Kewaskum, and Allynne F. Ramthun, Kewaskum; wedding May 6. Cecil E. Schneider, R. 2, West Bend, and Helen N. Marquardt, R. 2, Kewaskum.

CARD PARTY

A card party will be held at St. Matthew's church hall, Campbellsport, sponsored by the Holy Name society, Sunday evening, May 11, at 8 p. m. All popular games will be played. Door prizes and other awards will be given. Lunch served.

John Kohn, Martin Rimmel, Pietie Die

John M. Kohn, mason and bricklayer, residing in the town of Kewaskum, a short distance from the village, passed away on Thursday night, May 1, at St. Joseph's hospital, West Bend, following an illness of several months. He would have reached the age of 77 years in August.

The deceased was born Aug. 13, 1875 in the town of Kewaskum and was a lifelong resident of the township and village of Kewaskum. He was married to Sophia Staeger on April 21, 1900 and she survives. No children were born to the couple.

Besides the widow he is survived by one sister, Mrs. Minnie Becker of Barton, and two brothers, William Kohn and Math. Kohn of the town of Kewaskum. Surviving also are many relatives and friends.

The body was in state at Miller's Funeral home. Funeral services were held at 9 a. m. Monday in Holy Trinity church, the Rev. Father Allen presiding. Burial was in Lutheran Memorial Park.

MARTIN P. REMMEL

Martin P. Rimmel, 67, of 2524 W. Chambers street, Milwaukee, who was born and raised in Kewaskum, died Friday, May 2, at St. Mary's hospital in that city of a kidney ailment following an illness of 1 1/2 years. A son of the late Mr. and Mrs. Math. Rimmel, he played baseball with Kewaskum teams years ago. He had been employed at Nash-Kelvinator Corp. for the past 23 years.

Mr. Rimmel was born on Dec. 30, 1884 in Kewaskum. He moved to Manitowoc in 1910 and then to Milwaukee in 1921. He was married to Anna Richter on May 25, 1908 in Manitowoc and she survives, together with three daughters, Mrs. Coletta Wakeley, Mrs. Ruth Fleischmann and Mrs. DeLoris Hutt. Surviving further are a sister and five brothers, Adeline (Mrs. J.A. Rodenkirch) of Milwaukee, Nicholas Rimmel of Milwaukee, John of Wausau, Ben of Waupun, Math. and Edward of Milwaukee, and 11 grandchildren. A brother, Joe Rimmel, preceded him in death a number of years ago at Barton.

Funeral services were held Monday at 8:30 a. m. from the Frank A. Zwaska & Sons Funeral home to St. Leo's church at 9 a. m. The Rev. Magr. George Meyer officiated. Burial was in Holy Cross cemetery.

FRED J. PIETTE

Fred J. Piette, 62, an Appleton building contractor, died unexpectedly Sunday afternoon in the Kettle Moraine state park area near Lake Seven northeast of Kewaskum. Mr. Piette was the contractor for the Kewaskum municipal building, the new grade school and Holy Trinity Parochial school in this village within the past few years.

The local firemen's ambulance and first aid squad was called to the scene and according to reports Mr. Piette was in the area to attend a field trial with his son. Mr. Piette was horseback riding and apparently became ill. He was found dead aside of a tree where he evidently sat down to rest.

Surviving are his wife, five daughters, three sons, 21 grandchildren, three sisters and two brothers. Funeral services were held Wednesday morning at St. Joseph's Catholic church in Appleton.

HUGE DERRICK IN DITCH PULLED OUT BY DERRICK

A 92,000 pound derrick was hauled out of a ditch with another derrick after it slid off Highway 55 two miles south of Kewaskum on Monday afternoon. The derrick rested at about a 45 degree angle.

Driven by Paul Schirer of Milwaukee for the Hennes Trucking company, the derrick got over too far onto the shoulder. The second derrick arrived Tuesday to haul the first one out.

Allynne Ramthun, Virginia Haack Are Among Brides

In a nuptial service performed by the Rev. Fr. Francis Eschweiler in the parsonage of St. Michael's parish, St. Michaels, at 4:00 o'clock on Tuesday afternoon, May 6, Miss Allynne Fay Ramthun, daughter of Eldon Ramthun of Kewaskum and Mrs. Frank Tomasek of Mequon, became the bride of Thomas Rodenkirch, son of Mr. and Mrs. Nelson Rodenkirch of Boltonville.

Only attendants for the young couple were Mr. and Mrs. Harold Perkins, Kewaskum, as best man and matron of honor respectively.

For her marriage the bride wore a Palm Beach suit of soft gold with white accessories and a corsage of tallman roses. Her matron of honor was attired in a brown and white checked dress suit with white accessories. She wore a corsage of rose colored roses.

A 6:00 o'clock dinner and reception at the Ramthun home for the immediate families followed the wedding ceremony. Later the newlyweds left on a honeymoon to Canada.

HOSPITAL NEWS

Jay Van Blarcom, Kewaskum, was a patient at St. Joseph's hospital, West Bend, over the week end for medical care for a badly cut hand which he injured when he accidentally fell into some cut glass while working at the Heinemann Dairy here Saturday. Jay, a high school student, is a spare time worker at the dairy.

BACKUS-HAACK

Miss Virginia Haack, daughter of Mr. and Mrs. Edmund Haack, Kewaskum, became the bride of David Backus, son of Mrs. Selma Backus, Kewaskum, at St. Lucas Evangelical Lutheran church in the village on Saturday, May 3. They were married by the Rev. Gerhard Kamies.

The bride was employed in the office of the Amity Leather Products company in West Bend. The bridegroom is in the employ of the conservation department in the Mauthe lake area.

VOLM-MATENAER

Miss Adeline Matenaer, daughter of Mr. and Mrs. Edwin Matenaer, R. 2, West Bend, and Edward Volm, son of Mr. and Mrs. Ben Volm, R. 2, Kewaskum, were married at a 9 o'clock nuptial mass read by the Rev. O. Ullrich in St. Mary's church, Barton, on Saturday morning, May 3. During the service Lillian Wagner sang "Ave Maria" and "Panis Angelicus."

The bride was given in marriage by her father and approached the altar in a gown of imported Mouseline de Soie with a portrait neckline edged with a charmingly lace ruffle. The gown was styled with a fitted bodice and a full skirt fashioned of ruffles of Mouseline de Soie and lace. The skirt ended in a long full lace edged train. Her hand held, scalloped illusion veil was held by a bonnet trimmed with lilies of the valley. Her flowers consisted of white roses and lilies of the valley centered about an orchid.

The attendants, Mrs. Allen Batzler, the matron of honor and sister of the bride, Mrs. Alfred Proeber, sister of the bridegroom, Miss Genevieve Wondra, a friend, as bridesmaids, and the Misses Mary Louise and Carol Matnaer, sisters of the bride, who attended as junior bridesmaids, wore gowns fashioned of ice blue Mouseline de Soie. The fitted bodices of the gowns were detailed with a ruffle edged portrait neckline and brief puffed sleeves. The full skirts of ruffled Mouseline de Soie were over hoops for added fullness. The young ladies wore matching gauntlets and floral headpieces of red roses to complete their ensembles. All carried red roses and white sweet peas.

Francis Voim attended his brother as best man. Francis and Ralph Matenaer, brothers of the bride, served as groomsmen, while Ralph Peter and Stephen Matenaer ushered.

A wedding breakfast, dinner and supper were served and an afternoon reception held at the home of the bride's parents. In the evening a wedding dance was held at

Eddie Czaja Buys Gessert Market

In a business transaction closed last Saturday, Mr. and Mrs. Eddie Czaja of Kewaskum became the owners of the Gessert Meat Market in West Bend. The new owners took possession on Monday. They formerly operated the meat department in the Buy-Low store in West Bend for about 3 1/2 years. Mr. and Mrs. Czaja invite their many friends to pay them a visit at their new location.

The business was purchased from the late George Rau by the late August Gessert. Later Earl Gessert and his father formed a partnership and operated it as such until the retirement of Mr. Gessert. At that time the son took complete charge of the market. Mr. Gessert's future plans are indefinite.

Prior to taking over the Buy-Low store meat department, Mr. Czaja was a dealer in wholesale meats in Kewaskum. He has a slaughterhouse in Kewaskum and does his butchering here. The Czajas also own the old village hall building in this village which they purchased from the village with the intention of opening a meat market.

INDIANS LOSE TO LOMIRA, N. FONDY

The Kewaskum Indians, who won their first three games and moved into a tie for first place, were defeated twice the past week and dropped to a four-way tie for second place. Last Thursday at Lomira the locals went down, 11-7, and Monday here North Fondy did it again, 10-7. Although losing to the Campbellsport Belles, Lomira is alone in the league lead. The season closed Thursday with 5 teams still having a chance for the title. Tournament play will follow with the Indians competing in the Kewaskum tourney.

Lomira's win over the Indians on Thursday in the day's big game was its fourth straight. Jerry Schwefel hurried his third victory for the Lions, striking out 11 and giving up nine hits. Meisenheimer and Wierman (6) were touched for 10 safeties. Ed. Garriety with three hits in three trips and Arlyn Rose with a double and triple paced the winners. Koepke homered for Kewaskum.

In North Fondy's victory over the Indians the Orange and Black pushed home three runs in the 6th to clinch the win. Glenn Gongorek needed help from Arnie Meier in the fifth. Ronnie Vorpahl homered for the Indians in the fourth with one man on base. Eddie Leonhardt slammed out three hits and drew a walk in four trips for a perfect day. Pitcher Vorpahl was relieved by Wierman in the seventh. He was nicked for nine hits.

Kewaskum ... 005 000 2-7 9 6 Lomira ... 140 015 x-11 10 3 Meisenheimer, Wierman (6) and Ramthun; Schwefel and Michels. N. Fondy ... 200 503 0-10 9 2 Kewaskum ... 000 320 2-7

MISS ALLYNE RAMTHUN IS HONORED AT SHOWERS

Mrs. Myron Perschbacher, Kewaskum, entertained guests at a luncheon and bridal shower last week Thursday at her home in honor of Miss Allynne Ramthun, who became the bride of Thomas Rodenkirch on May 6.

Miss Ramthun was also guest of honor at a miscellaneous shower given for her on Monday evening by Mrs. Harold Perkins and Mrs. Harvey Ramthun. Miss Ramthun was the recipient of many beautiful gifts and was also presented with a corsage of roses. Bunco was played and prizes were awarded to Miss Mary Backhaus, first; Miss Marion Cudnoski, second, and Miss Joanne Loomis, bosby. A delicious lunch was served by the hostesses. The following guests were present:

Misses Ann Kadinger, Jeanette Krueger, Betty Koerbie, Joanne Loomis, Mary Backhaus, Marion Cudnoski, Elenore Seefeldt, Sandra Ramthun, Joan Miller, Pat Perkins, Joan St. Mary, Phyllis Falk, Mitze Schmitz, Ruth Domann, Joanne Fay and Mary Joyce Gruber and Mmes. Harold Perkins, Albert Sauter Jr., Myron Perschbacher, Henry Weddig Jr. and Harvey Ramthun. Misses Irene Kanies of Milwaukee, Dolly Edwards and Lois Stange presented gifts but were unable to attend.

COMMUNION-BREAKFAST AT PARISH MOTHER'S DAY

The Ladies' Altar and Holy Name societies of Holy Trinity parish will have a joint communion and breakfast on Mother's day Sunday to honor the mothers and wives. They will receive Holy Communion in a body during the 8 o'clock mass, followed by the breakfast and a program in the church hall. Ervin N. Pauly is to be the guest speaker. He is a Milwaukee attorney and Marquette university graduate.

BOEGEL AT PENDLETON

Pfc. Lambert Boegel, son of Mr. and Mrs. Oscar Boegel of the town of Wayne, now is stationed at Camp Pendleton, Calif. His address is Pfc. Lambert Boegel 1197492, N Co, 3rd Bn, 2nd Inf. Trng. Regt., Pfc. 3, T & R Comd., Camp Joseph H. Pendleton, Oceanide, Calif.

SGT SCHLOSSER, WIFE HERE

Sgt. Rollie Schlosser and wife and baby of Fort Devens, Mass. are spending the former's 22-day furlough with Mrs. Schlosser's mother, Mrs. Al Runte and family in Kewaskum and other relatives. Mrs. Schlosser is the former Bette Searies of this village.

ZEHREN INFANT IS BAPTIZED SUNDAY

The infant daughter of Mr. and Mrs. Aloysius Zehren was baptized Sunday in Holy Trinity church, receiving the name Joan Elizabeth. Sponsors were Miss Betty Jane Feucht of Mayville and Eugene Zehren of Kewaskum. Guests at dinner included Mr. and Mrs. Alois Feucht and daughters Betty Jane, Charlotte and Gertrude of Mayville, Mr. and Mrs. George Zehren of Campbellsport and Mr. and Mrs. Eugene Zehren of Kewaskum.

MISS MEYER BETHROTHED

Mr. and Mrs. Fred Meyer of R. 1, Kewaskum, are announcing the engagement of their daughter Elvina to Vincent Nigh, son of Mr. and Mrs. Elmer Nigh of R. 2, Campbellsport.

State Beagle Trial, Election Held Here

The Wisconsin Beagle club held its annual spring derby at Kewaskum last week end, May 3 and 4. At the conclusion of the trial the club's annual meeting and election of officers took place. Joe Berle, president of the club, served as host. The derby was for young dogs only and is always held in the spring. The regular fall trial is for older and more experienced dogs. The dogs were run in the surrounding area.

At the election of officers Sunday all present officials were re-elected. Besides President Berle, they are Ed. Arthur, Dodgeville, vice-president, and E. A. Kopp, Johnson Creek, secretary and treasurer.

County Candidates to Seek Election

A number of candidates have announced their intentions to run for Washington county offices in the primary election this week. May 9 was the first day for circulating nomination papers for the fall primary. Papers may be circulated through July 8.

Kenneth William Haebig, Kewaskum, will be a candidate for re-election.

Anton P. Storal, county clerk, will be a candidate for re-election.

Paul L. Justman, county treasurer, will be a candidate for re-election.

Sylvester Naumann, sheriff, cannot be a candidate, having served two terms in office. George Brugger will be a candidate for sheriff.

Richard R. Driessel, coroner, will not be a candidate for re-election.

Lawrence P. Berend, clerk of circuit court, will be a candidate for re-election.

Arthur C. Snyder, district attorney, will not be a candidate for re-election. On Wednesday Atty. LeRoy J. Gonring, West Bend, announced that he will be a candidate.

Edwin Pick, register of deeds, will be a candidate for re-election. Milton Schaefer, surveyor, could not be reached for information.

IN THE SERVICE

BOEGEL AT PENDLETON Pfc. Lambert Boegel, son of Mr. and Mrs. Oscar Boegel of the town of Wayne, now is stationed at Camp Pendleton, Calif. His address is Pfc. Lambert Boegel 1197492, N Co, 3rd Bn, 2nd Inf. Trng. Regt., Pfc. 3, T & R Comd., Camp Joseph H. Pendleton, Oceanide, Calif.

SGT SCHLOSSER, WIFE HERE

Sgt. Rollie Schlosser and wife and baby of Fort Devens, Mass. are spending the former's 22-day furlough with Mrs. Schlosser's mother, Mrs. Al Runte and family in Kewaskum and other relatives. Mrs. Schlosser is the former Bette Searies of this village.

ZEHREN INFANT IS BAPTIZED SUNDAY

The infant daughter of Mr. and Mrs. Aloysius Zehren was baptized Sunday in Holy Trinity church, receiving the name Joan Elizabeth. Sponsors were Miss Betty Jane Feucht of Mayville and Eugene Zehren of Kewaskum. Guests at dinner included Mr. and Mrs. Alois Feucht and daughters Betty Jane, Charlotte and Gertrude of Mayville, Mr. and Mrs. George Zehren of Campbellsport and Mr. and Mrs. Eugene Zehren of Kewaskum.

MISS MEYER BETHROTHED

Mr. and Mrs. Fred Meyer of R. 1, Kewaskum, are announcing the engagement of their daughter Elvina to Vincent Nigh, son of Mr. and Mrs. Elmer Nigh of R. 2, Campbellsport.

Behind The Scenes In American Business

By Reynolds Knight

NEW YORK—The Federal Reserve Board has relaxed Regulation W to exempt all items with all items with a price tag of less than \$100 from installment-buying controls.

Previously, only goods selling for less than \$50 were exempted.

Because of this a quick pickup in "time" buying is expected and many retailers are planning special ads and promotions to encourage such sales. However, this is not likely to produce any great gain in retail sales in the long term, and any surge resulting from the easing of restrictions will probably be short-lived.

Such an action by the FRB during a tight money period would have lasting effect, probably, but we aren't in a tight money economy. The consumer has plenty of cash. The exact reasons why he won't spend it are still a mystery to the economists. High prices, insecurity and satiated markets may be the answer in whole or in part.

The answer is certainly not that he can't scrape together enough for the required down payment, for savings are at a record high.

Nevertheless, the results of easing Regulation W requirements will be watched closely. The makers of the "big ticket" durable goods have been asking for better credit conditions for their customers, too, and results of the move will be extremely important to them.

POPULATION VS. PRODUCTION—In the next ten years the country faces the prospect of its population's increasing faster than its civilian labor force, an analysis of government figures shows. Thus, if we are to increase our standard of living at the same rate as we have in the last decade, output of goods and service per worker must rise some 43 per cent by 1960.

Longer working hours, faster working and improved working efficiency and management might help, but most experts agree the greatest promise lies in the application of new technological developments.

The trend toward "automaticity" in production has already started. John Procopi, engineer in the Industrial Division, Minneapolis-Honeywell Regulator Company, told a meeting of chemical engineers recently. Continuous-process methods in most modern chemical and oil operations bring them close to the goal of the automatic factory," he said.

The development of tools to hasten automaticity can be seen, he noted, in the fact that we now have electronic methods which make possible the introduction into industry of controls that detect variables previously measurable only in the laboratory.

THINGS TO COME—A new electronic gimmick hardly bigger than a book of matches automatically starts the mechanism to roll up the windows of your car—and raise the top, if it's a convertible—at the first drop of rain. . . . Bakeries, meat packaging plants, groceries, restaurants, furniture and carpet warehouses—and the home—can be protected from insects by a new vaporizer which is said to cover effectively 10,000 to 15,000 cubic feet. A bag of crystals described as safe, odorless insecticide will last two weeks of continuous service. . . . a new chrome towel rack has thirteen rods which fold down when not in use. Plenty of space for a large family's bathroom needs.

JET CANS—Products from whipped cream to insecticides are being squirted out of cans these days.

At a recent packaging exposition the American Can company showed a long line of new, customized, valve-type, metal "jet containers" which can be tailored to fit the need of individual customers. The pressure cans are adaptations of the firm's 211 (beer type) can and 202 (citrus concentrate type) can and range in size from two inches to four and one-half inches. The full line contains 24 models which can be adapted for certain types of food and dairy products, pharmaceuticals, cosmetics, deodorants, lubricants, paints, waxes, and a variety of other items, according to T. F. Brennan, manager of Canco's packaging development division.

Particular attention was given to the new "jet-container" line at the exposition by customers seeking methods to give their products unique shelf space identification and eye-appeal, Brennan said.

There are no longer enough wild honey bees in the West to pollinate the alfalfa crop. Entomologists of the USDA say honey bees need to be provided in fields where alfalfa is grown for seed.

Report On Chemical Weed Control

Here's a 1952 report on chemical control for vegetable crops. It comes from John Schoenemann, horticulturist at the University of Wisconsin.

First, he says that most chemical weeding does not fit into small-scale use for the home gardener. Unless you grow a fair sized patch of a certain vegetable crop, chemicals are not advised. They will fit a program for farmers who grow canning crops, for commercial vegetable growers, and for some market gardening operations.

Here's the question to ask? Is weeding with chemicals better than weeding by hand even if labor is available at low cost? Schoenemann feels it is—when chemicals are used widely.

There are several ways that the crops themselves can be protected from these plant killing chemicals. In some cases you apply sprays before the crop is up. And then some of the chemicals are selective. They kill only the weeds, not the crop.

Schoenemann points out that different chemicals are recommended on different crops and spray methods vary. He suggests that extreme care should be taken when using the chemicals. The chemical 2,4-D can be especially harmful where carelessly used. Other chemicals now in use are TCA, dinitros, Stoddard solvent, and PCP.

Weed control chemicals are no substitute for usual good farming practices, he feels. It's still important to practice good tillage, proper seed bed preparation, timely cultivation, and any other means to cut down the weed problem.

University of Wisconsin biochemists have been able to combine amino acids to form protein-like compounds for the first time in a scientific laboratory. The discovery promises to be a helpful tool in studying body processes which are essential to life.

TWO FRIENDLY KIDS—A trifle tense, nine-year-old Pauline Bailey manages a smile as another kid named "Patch" lands on her shoulders. The orphan baby goat was cared for by London zoo assistants, and a familiar question at closing hours was, "Who's taking the kid home tonight?"

"MISS INDIA"—Mrs. Indrani Rehman, 23-year-old wife of a Calcutta architect, displays the charms that won her the "Miss India of 1952" title at Bombay in the country's first nation-wide beauty contest. The New York-educated beauty's mother is a former American citizen.

French City Improves Milk Supply With U.N. Aid

As part of its milk conservation program the United Nations International Children's Emergency Fund (UNICEF), has supplied dried milk, bottling and pasteurizing equipment to several countries in Europe and the Middle East. Soissons was the first French city to make compulsory the bottling of milk sold at retail, and has been provided with a bottling machine by UNICEF. At the right, milk newly arrived from a Soissons farm is dumped into the pasteurizer, while the manager of the dairy M. Guerland (left) samples milk from a bottle which was filled on the machine furnished to the city by the United Nations International Children's Emergency Fund.

Korea Shows Cavalry Still Needed; U. S. Disbanded Horse Units Too Soon

America's war leaders made a major mistake in military planning when they decided that horse cavalry was outmoded. Even in the motorized, mechanized warfare of today, there are tasks that horses and mules can do and places they can go in which tanks and trucks are helpless. General Patton himself, our great tank commander, spoke indignantly of the extra "gear ratio" we lost when we disbanded the old cavalry troops which were once the eyes and nerves of the army. Writing in Bluebook Magazine for May, George F. Worts tells how Korea has proved what North Africa should have told us—that we have discarded a vital attack and reconnaissance weapon at the very moment when our field commanders are recognizing how badly we need it.

"If the war horse is outmoded, how come Russia started World War II with forty divisions of horse cavalry, ended it with more than fifty divisions and has increased it materially in the years since VE day—despite the tremendous mechanization of the Russian Army?"

"World War I saw the United States cavalry horse and the pack mule in effective use. In the last war, during the Italian and Burma campaigns, mules were indispensable for transporting supplies. In the rough mountains of Korea, mules were desperately needed. One retired cavalry officer told me that the plight of our Eighth Army and Tenth Corps, separated by mountainous terrain when the Chinese Communists first came swarming across the Yalu, would not have been so severe and might not have existed at all if we had horse cavalry to throw into that breach.

"General George S. Patton, the last of our great cavalry generals, declared angrily: 'It is not only my personal opinion but the opinion of other general officers that, if we had had an American Cavalry division in Tunisia and in Sicily, not a German would have escaped, because horse cavalry possesses the additional gear ratio which permits it to attain sufficient speed through mountainous country to get behind and hold the enemy until the more powerful infantry and tanks can come up and destroy him.'

"General Lucian K. Truscott, at one time commander of the Third Infantry Division in Italy said that if a well-trained regiment of American cavalry had been available to him when the Third Division began its advance north, the battle of Cassino would never have taken place. Anzio would have been unnecessary and the Italian campaign might have been ended months sooner.

"Any cavalryman will tell you with great bitterness why the Army horse and mule have been banished from the battlefield. Partly—and obviously—it is because of motorized vehicles, whose sponsors claim that they can go anywhere a horse or mule can go.

"This, the old cavalrymen hotly declare, is a lie. At least half of the earth's land area is mountainous or wooded, or both—and what breed of motorized vehicle can pass between big trees growing close together, or follow a goat trail? The cavalry is needed to supplement our mechanized forces.

"The real reason for disbanding the cavalry is that the American high command is composed of men who don't know horses or mules and therefore cannot possibly appreciate their wartime merits. Most of these men rose through the infantry.

"There is still another reason and it is the most infuriating of all. The high command let experts in the various branches try out new gadgets and new ideas, and then the big brass act upon their recommendations. A great many

of these experts know their stuff, but among them are some wild-eyed theorists who pounce upon an idea because it looks good on paper, or sounds good in a discussion, and they go all out for it with a total disregard for what they have tried, the tested, the proved.

"The Korean War," said Colonel Paul C. Raborg, noted military analyst, "has proved the real and desperate need for horse cavalry as an auxiliary branch of our armed forces. . . . It took not years but generations to build up the know-how and the esprit de corps of our horse cavalry. What a crime it was to let it be lost!"

"The Russians worked out a system whereby reconnaissance by horsemen and airplanes was coordinated. The Chinese Communists have been enabled—so cavalrymen tell me—to keep their high command well informed on our troop dispositions and movements by using horse cavalry patrols with walkie-talkies. Time after time we have lost critical advantages because we had no way of knowing what the enemy was preparing to do—when bad weather made air reconnaissance impossible. And even in fair weather, a man on a horse often can see things that a man in even the lowest flying reconnaissance airplane cannot."—Bluebook.

Merinque Spice Cake

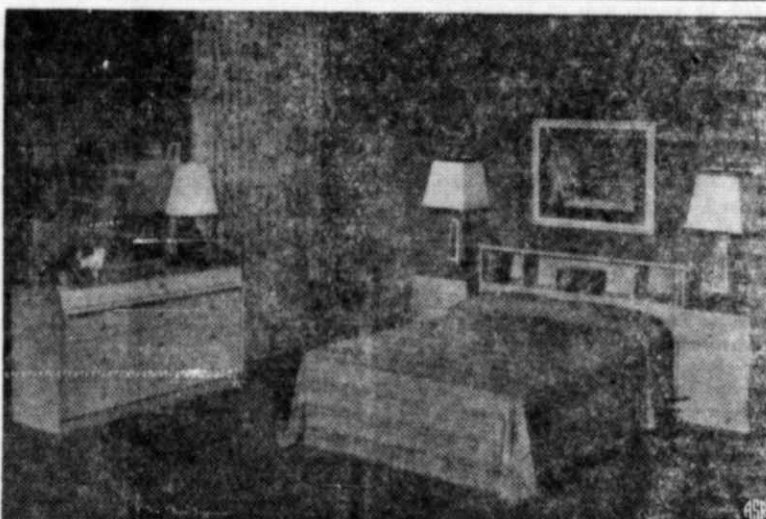

- 2 c. sifted cake flour
- 1 1/3 c. sugar
- 1 1/4 tsp. baking powder
- 3/4 tsp. soda
- 1 tsp. salt
- 1 1/2 tsp. cinnamon
- 1/8 tsp. cloves
- 3/4 tsp. nutmeg
- 1/2 c. shortening
- 3/4 c. buttermilk or thick sour milk
- 1 tsp. vanilla
- 2 eggs, unbeaten

Sift flour, baking powder, sugar, soda, salt and spices into mixing bowl. Drop in shortening. Add milk, then vanilla and beat two minutes at low to medium speed on your electric mixer. Scrape bowl and beater, add eggs and beat 2 minutes more. Turn into 10x10x2 inch greased cake pan and bake at 375 degrees 35-40 minutes.

Make a merinque topping by beating 2 egg whites until they hold stiff peaks. Beat in 1 cup sifted brown sugar gradually. Spread merinque on baked cake and sprinkle with 1/2 cup chopped nuts. Return to oven and continue baking 10-15 minutes or until merinque is browned.

Chemical weeding will be a good practice if you grow a fair-sized patch of a definite crop. It won't pay for the home gardener, says John Schoenemann, horticulturist at the University of Wisconsin.

Furniture Fashions

People like to lie in bed and read or listen to the radio. As a result, the bookcase or headboard bed, is becoming increasingly popular. The expression "all the comforts of home" has a more luxurious meaning when home is equipped with a bedroom such as the one shown above. There are shelves for the telephone, a radio, books, magazines, reading lamps and decorative accessories. The doors of the matching flanking commodes slide up to become bedside trays for reading glasses, snacks, etc. The triple dresser, with slanting drawers is a new style note. The suite shown here is in champagne mahogany, one of the newer finishes and may also be obtained in cordovan mahogany. Moderately priced, this handsome bedroom suite is a striking example of the style and value featured in today's furniture offerings.

Here's the Answer

Sports Afield

By Ted Kesting

How one holds a casting rod while retrieving a lure may not, at first glance, seem to matter much, but it's one of the most important things in fishing. It means the difference between utter confusion, lost fish, probably broken tackle—and having cool, complete control right from the strike.

The one absolutely wrong way to hold a casting rod is by the forward grip. Actually, the thing is there for no known purpose. Yes, it does seem a nice place to hold, to keep the rod in easy balance. Then when a big fish hits, the angler raises the rod to set the hook, freezes to the reel handle and pulls. There isn't much else he can do.

All this because, holding the forward grip, with a fish pulling, he can't possibly get his left hand down to control the spool. (Remember, we're speaking only of fishing with a regular casting reel. The forward grip is all right in heavier fishing with a drag-handle reel.)

In order to have control of things in retrieving, hold the rod any way you please, just so your left thumb is ready to drop instantly onto the spool when a

fish strikes. That means keep your hand away from the forward grip.

There are several methods of holding. Most veterans "palm" the reel, holding the tailplate cupped in the left hand—or semipalm, with the lower part of the palm against it but the upper part out a little way. For this, hold with three fingers directly below the reel seat, thumb and forefinger on top, with incoming line passing between them.

Holding this way has one slight disadvantage: When a big fish whams into the lure head on, the thumb must be flipped back a short distance onto the spool before you have control of him.

Jason Lucas has a solution for this problem. When using a level-wind reel, he holds the rod just the same way, but with his thumb against the rear of the top pillar, brushing the revolving spool line. This method of holding gives instant control of a head-on striker. Held so, with butt cap against the midriff, rod-and-reel balance are right in your hand; it seems the least tiring, most pleasant method of retrieving, especially if you fish for long hours.

Bible Comment:

World Peace Must Be Built on Foundation of Righteousness

LAW and ideals are one thing; observances and performances are quite another. Nowhere, perhaps, in all history were there more idealistic regulations than those to be found in ancient Israel. Yet in spite of these, injustice and oppressions were prevalent.

Imagine some thoughtful, intelligent, hard-working farmer, who understands the conditions upon which our life and welfare depends, coming into one of our modern cities. He would observe the ease and luxury of those making no real contribution to society, not to mention the evil and corruption that are so flagrant. Then you can understand something of what the prophet Amos was to his times.

Amos was a herdsman, accustomed to clean living. He was roused to indignation by what he saw. . . . "the dust of the earth on the head of the poor. . . the righteous sold for a pair of shoes." He saw the gross immorality of fathers and sons, the turning of judgment to wormwood, and the abandonment of righteousness. He saw the very acts and rites of religion perverted, feasts observed and offerings sacrificed by those who had no true observance or sacrifice in their hearts.

Amos represents God as saying "I hate, I despise your feasts days, and I will not smell in your solemn assemblies." But he calls for repentance: "Let judgment run down as waters and righteousness as a mighty stream." Don't we need that call today?

The association of righteousness with peace is not accidental. It reminds us of the only true foundation upon which peace can be built, whether it be domestic peace, the solution of industrial troubles or international peace. Organization and negotiation are not enough. We must find, and build upon, a sure foundation of righteousness.

OF EGGS AND EARS AND THINGS

An egg from an Ada farm looks like a cucumber in shape, warts, and all. . . . The size derby gets under way in both directions as Brownton reports a 5-ounce egg measuring 7 1/2 inches around one way, 8 the other, while Perham puts in with two complete eggs in one enormous shell 7 1/2 and 8 1/2 inch circumferences. In the same Perham exhibit is a hen's egg no larger than a sparrow's. . . . A new calf on the Lester Lambert farm near Oklee is perfectly normal in every respect except that it has only one ear.

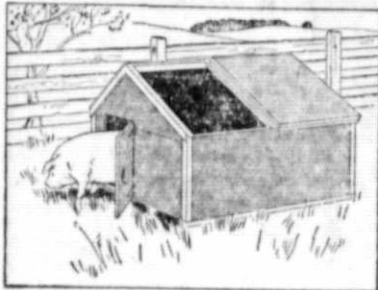

OCEAN LIFE IN GLASS—John Armstrong of New York's Museum of Natural History examines a delicate glass model of a globigerina bulloides, a one-celled ocean animal. The model, made by Herman Muellers, one of the world's most famous glass blowers, is 175 times the size of the actual creature.

Handy Jim's FIX-UP TIPS For Farm and Home

Here's a Sunlit Hog House

SCIENTIFIC hog raising for highest profits requires warm, dry, inexpensive housing. Three prime advantages to having movable experts: Sows can be separated at farrowing time; growing pigs can be kept on clean ground; rye or legume pastures can be utilized in rotation.

When the sun has an opportunity to send its warm and sanitizing rays directly into a hog house, then the farmer

adds a plus. When he is able to build quickly a structure that is both economical and durable, then he has another plus. These add up to the sunlit hog house, shown in the illustration.

Easily constructed, the house is 7 feet long, 6 feet wide and 4 feet 10 inches high. Built on skids, it has a 1-inch rough floor laid on 2 by 4-inch sills. Studding of 2 by 3-inch lumber supports the Masonite quarter-inch tempered hardboard, which is used for the siding and roof. This material is durable and weather resistant. Since it comes in sheets four feet wide, there is a great saving of time in its application.

Four-inch light strap hinges are used for turning back the roof door. The opening, with an area of 12 square feet, is situated on the narrow side of the gabled roof.

Working drawings for building the sunlit hog house may be obtained without charge by writing Farm Service Bureau, Suite 2037, 111 West Washington St., Chicago 2, Ill., and asking for Plan AFB-196.

A TEA TOWEL MUST

"As cute as a bug" everyone will say. Just a few simple stitches and a touch of applique (if you want it) and there's the cutest set of tea towels! This little girl will help keep your kitchen clean as a pin. Seven tea towel designs and matching pot holder come on one hot iron transfer. Order your pattern today. Request C3178, 20c. Send orders to: Homecraft Service, Journal Pub. Co., Inc., 2500 Buchanan, Kansas City 16, Mo.

STRICTLY FRESH

RUSSIA has broken off diplomatic relations with Cuba. The Soviets are pretty good at raising cane, but now what'll they coat their proposals with?

East German Reds promise "dear comrade Stalin" they'll fight "American war mongers," and unify the country. Maybe if they're good boys, Uncle Joe will give back some of their "reparations."

A woman member of the British Parliament has introduced a bill which will send husbands to jail if they refuse to give their wives

sufficient housekeeping money. That's one way of recruiting for the Foreign Legion.

June college graduates face many vexing problems, as usual. Probably the outstanding one is: "Which job shall I accept?"

Italian Reds are at war with the puppet "Erpinotto" which tells children about American aid to Italy. Moscow's puppets hate competition on their stags.

ANSWERS TO Intelligence Test

1—albatross. 2—kitchen. 3—Africa. 4—buffoon. 5—how fast the propeller is turning. 6—mail. 7—(A) Aviation; (B) Hockey; (C) Motor Boating; (D) Tennis.

Smartly Styled Raincoat Low Priced, Practical

Carrying Case Is Larger, Zippered

BY EDNA MILES

THE problem, in the past, with budget raincoats has been mostly a matter of styling. True, they shed the rain and warded off the damp just as efficiently as a raincoat costing far more, but lots of women refused to wear them on the grounds that they were strictly utilitarian, not pretty.

A new "weather duster" has been designed to overcome this problem. Very low priced, it's made of virgin vinyl plastic, and has full-slashed, heat-sealed pockets as carry-alls. A full-length reinforced plaque runs top to bottom on the front facing, providing a guarantee against the elements.

Fashion points come with the stand-up collar, French flared double-button winged cuffs, and a new hugger curved hood that allows the long ties to fall through the tab collar, hanging gracefully and yet providing real protection against wind and rain.

The impractical, too-small carrying envelope has been replaced by a larger, 10-by-12-inch all-purpose utility bag that's both deep and wide. It is, in addition, fitted with a new plastic finger-tip slip zipper.

Budget-priced but fashion-wise, the new "weather duster" features a stand-up collar, French flared double-button winged cuffs. And it comes in an improved, roomier carrying case.

Test Your Intelligence

Score 10 points for each correct answer in the first six questions:

- What kind of bird was shot by the "Ancient Mariner" in the poem?
—eagle —condor —albatross —pigeon
- What is the galley of a ship?
—front —rear —mast —kitchen
- The Republic of Liberia is in:
—Africa —Asia —Europe —South America
- Which of the following is not a musical instrument?
—tambourine —oboe —buffoon —balalaika
- In an airplane, the tachometer indicates:
—how fast the propeller is turning —rate of climb
—ceiling —weather conditions
- In Britain a pillar-box is used for:
—rubbish —mail —games —watering horses
- Listed below are four famous trophies and opposite them, scrambled up, the sports in which they are awarded. Match them, scoring 10 points for each correct answer.

- | | |
|----------------|----------------|
| (A) Thompson | —Tennis |
| (B) Stanley | —Motor Boating |
| (C) Harmsworth | —Aviation |
| (D) Davis | —Hockey |

Total your points. A score of 0-20 is poor; 30-60, average; 70-80, superior; 90-100, very superior.

Nation Must Rebuild Blood Bank Supplies

Blood is still needed by the Red Cross—for the Armed Forces, for the usual demands of accidents, disasters and disease, and for a stockpile for civilian defense. The heavy fighting in Korea used up reserves normally kept for civilian use; the need for a reserve supply was then clearly seen. In addition, the Office of Civilian Defense is attempting to establish a blood bank to use in time of disaster. Said Howard A. Rusk, M.D., of Bellevue Hospital, "Blood is life-saving medically. It could be nation-saving in the event of all-out war."

Everyone between the ages of 18 and 59 is eligible to give blood every ten weeks. A physical examination makes certain that donors are able to give.

The pain is only a pin-prick. The after effects are slight—most people hardly realize they have donated. Nature quickly replaces the pint of blood. But of course, you can always help nature by eating blood-building foods.

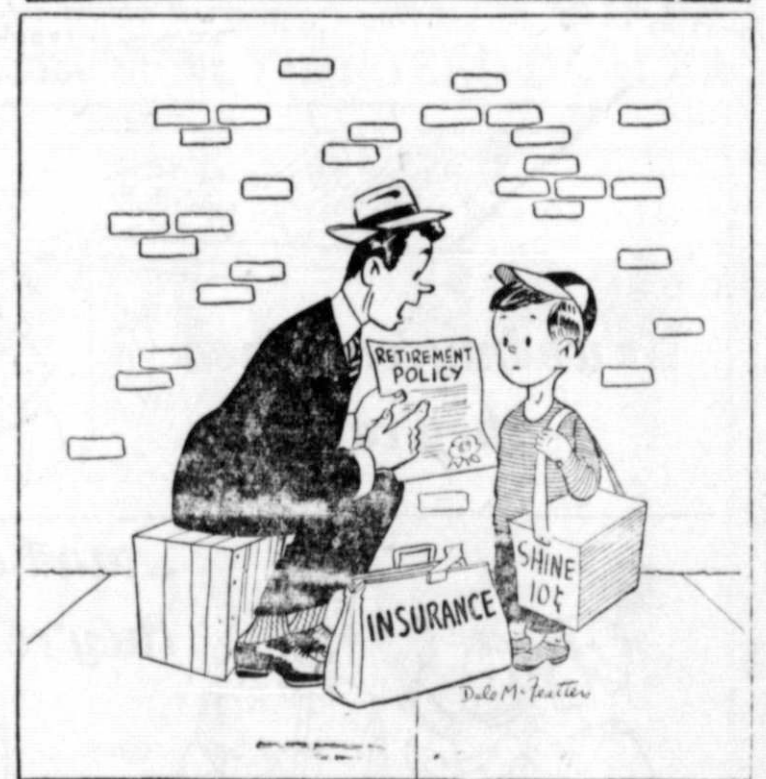

Liquid is very important—in fact, the liquid intake should be doubled the day of donation. Plenty of beverages, fruit juices, soups—and just plain water—will help. Protein and iron are needed to help the body replace the red blood cells. Protein is found in meat, fish, eggs, cheese and milk. Iron is found in liver, New Orleans molasses, eggs, raisins and red meat.

A molasses milk shake is one of the easiest ways to get all three needed elements. Simple to prepare—just stir 2 tablespoons New Orleans molasses into a glass of milk. It may be spiced as desired, shaken or beaten to a high froth. But however it is served, it contains the three essentials: milk for protein and liquid and New Orleans molasses for iron.

Make an appointment at your local Red Cross Blood Donor's Center or Bloodmobile now. Your lifeblood is a lifeline and it can help fulfill the nation's plans for defense.

"They say he has a million dollars. That's what I like in a man—character!"

Proper handling could make whey cream butter a good product, according to L. C. Thomson, dairy specialist at the University of Wisconsin.

A group of Wisconsin cranberry growers near Three Lakes, have started an experiment to try to develop the wild blueberry into a commercial product.

Go-Everywhere Cottons For Summer Use New Specially Woven Fabrics

Cottons are more adaptable than ever this year—in designs and fabrics suitable for play, travel, work or dating. One group, in fabrics especially woven for McCall's Magazine in crease-resistant, soil-resistant finishes, features checks, stripes and prints in styles especially created for them by leading American designers. High-lighted in the collection according to Fashion Editor Estelle Lane, are dresses with full skirts and fitted bodices, halter tops with cover-up jackets, wide shiny belts that give a soft one-piece look to separates, and reversible stoles. Writing in the April issue, she describes these go-everywhere summer fashions that were photographed for McCall's in the bright sunny weather of Havana:

"For a versatile go-everywhere summer wardrobe by Toni Owen, start with a checked skirt and add variety. The first top is a matching jacket that gives you a neat cotton suit for travel, for shopping, for your job. The first change is another checked jacket, short-sleeved with an Empire midriff. Belt it tautly for the look of a one-piece dress that's soft and becoming. Change again to a white pique blouse with a puffy scarf collar, shiny coin buttons. Now try this with the same skirt—a sleeveless checked-cotton blouse collared in sharp white, buttoned with pearly white. With it, wear the unusual touch of a wide pastel leather belt.

"Black-and-white woven-check cotton by Dan River has Wrinkl-Shed finish, keeps its just-pressed look. It is the material used in the following dresses, also by Toni Owen. For play, or housework, slim-hipped shorts of checked cotton, high-waisted and cuffed, to wear all summer long. With them, a long-sleeved shirt of rosy broadcloth, cut like a boy's.

"Party specials for any place in the world—One is a one-piece dress of cotton check with a reversible sash, one side checked, the other rose, to match a full petticoat of broadcloth that you can wear as a skirt. The other checked outfit is in two pieces—a halter top with little white buttons down the front and a very full skirt with deep flat pleats center front and back, unpressed pleats over the hips. You can wear this skirt with any of the tops described above.

"These fashions by Bobbie Brooks use striped fabrics in candy colors and white on Avondale's Mignonette chambray. It's Perma-Pressed, holds its crispness and resists soiling. Stripes can whittle your waistline, as in the short cardigan jacket that goes over a one-piece sleeveless dress with a bodice front of white bubble. Another outfit, in yellow stripes, is a blouse and skirt. The stripes run vertically over the ribs and in the yoke of the skirt for a slimming line. A belt of gunmetal plastic patent comes with the skirt.

"A striped sun dress with a low round neck bound in solid pink is crisp as a peppermint stick. The brief bolero jacket is cut to give a gay zigzag of stripes.

"These fashions designed by Giselle for Jerry Gilden are done in the same striped materials. A simple, full-skirted dress has a wide, low neck and a belt of plastic patent that's shiny as a wet pavement. Forget-me-not blue and white stripes on a simple button-down-the-front dress have a demure air that's perfect for Sunday church or for sight-seeing in ancient cathedrals. It is easy to iron and easy to slip into on a hot, sticky day.

"Stripes can be basic, as in a soft, casual dress with a boat neck and a full, gored skirt. Wear it with a little white hat for every day or with a big one for dates.

"The following creations by Maxine Bentley for Youth Guild were done in a printed fabric pattern like strung beads, on Bates Disciplined cotton which needs no

starch, won't shrink, sheds wrinkles. A print dress with fledgling wings on the shoulders and a dancing skirt is wonderful for romantic moods. The molded bodice is fastened with flashing jet buttons.

"A printed sun dress with a fitted bodice can be worn strapless, or covered up for public appearance with a wonderful tied jacket. A companion print-and-plain is a one-piece dress with black top and print skirt. A wide leather belt and a reversible stole come with the dress.

"Still more charming print fashions were designed by Mildred Orrick for Lynbrook Casuals. You can juggle one of her print-and-plain two-piece dresses all summer long. The skirt and blouse can go their separate ways with other skirts and other tops.

"A dress cut with slimming diagonal lines comes with a short-sleeved black jacket that turns it into a go-everywhere outfit. A perfect date dress that you'll wear wherever you are on a warm summer evening has a billowing skirt and a softly draped bodice ending in tiny cool sleeves."

SQUID SQUASHES 'EM—Previously on the secret list, the "Squid," Britain's powerful new anti-submarine weapon is loaded with projectiles aboard the HMS Daring. Death to the toughest of submarines, the multi-barreled mortar fires a pattern of charges ahead of the destroyer.

WINS WITH HAMSTERS—Winner of the \$2800 Westinghouse Grand Science scholarship, 17-year-old Karl Muench of Evanston, Ill., is shown as he inoculates a Golden Hamster with penicillin. Before and after school Karl spent 25 hours a week on his project trying to find out whether eating meat from chemically caponized roosters might be injurious. Karl, who plans to use his scholarship to study medicine at Harvard, had to learn hamster anatomy, and pointed out errors in published articles on the subject.

PART STANLEY, MOSTLY STEAMER—The Stanley Steamer above lived up to its name when a snowstorm struck Chicago, where the American Automobile Association held special events to celebrate its golden jubilee. Enjoying the novel spectacle is policeman Eddie McNamara.

Teacup Topics by Betty Ann

EDITOR
THE MILWAUKEE JOURNAL
WOMAN'S PAGES

It may seem difficult, as you go about your daily routine tasks, to keep your life from becoming humdrum. After all, nothing new ever seems to happen to you, says Betty Ann.

But have you ever thought of the things that happen around you that are new and exciting? The changing seasons of the year, the birth of a child in your neighborhood or in your family, the success of someone formerly obscure, a new piece of music or work of art. All these things touch your life in some way.

Then, there's always the excitement of watching your own children develop and mature. The activities of the young can hardly be classified as routine. Perhaps your life is losing some of its interest because you are taking yourself for granted.

You may have forgotten how wonderful a new hat or hair style can make you feel.

When was the last time you and your husband had a night out together? Do you show a real interest in your husband's work?

Try to read a book a week, and keep up with your daily newspapers. If your little girl is a member of the Girl Scouts, why don't you spend some of your time with her at the meetings?

Excitement isn't always something tangible. Many people who spend their whole lives on the move, supposedly doing all sorts of stimulating things, are often unhappy and bored.

What really counts is an inner excitement for and toward life. And that is something you can only gain from within yourself.

Don't allow your throat to add years to your age. The crepey neckline, flabby skin and unattractive wrinkles are no longer "to be expected."

A lubricating lotion should be used every morning and night, if you are to see results. To apply properly, pour a few drops in the palm of your hand. Smooth it gently over your throat and neck.

Massage the skin slowly; then stroke your fingers up and out under your chin. Hold your head high and tilt it slightly backward as you massage.

Don't forget the back and sides of the neck. Keep your hair out of the way with a net.

When you apply your lotion in the morning, you can leave it on while you are dressing, to give your skin a chance to absorb it. Then, just before you are ready to powder, go over your throat with cold water or skin freshener.

You can give the simplest vegetable a glamorous new lease on life with the addition of a sauce. Try mustard sauce on string beans or cauliflower, almond butter sauce on asparagus or peas and lemon butter sauce on brussels sprouts, broccoli or spinach. Here are the recipes.

Mustard sauce: Combine one tablespoon butter, two tablespoons all-purpose flour, one cup hot water, two beef bouillon cubes, three tablespoons prepared mustard and one tablespoon Worcestershire sauce.

Melt butter on medium heat and blend in flour. Stir hot water and bouillon cubes into mixture in saucepan and cook until thickened. Switch to low heat. Add prepared mustard and Worcestershire sauce. Heat to serving temperature and serve over vegetables, meat or fish.

Almond Butter sauce: Two tablespoons butter, one tablespoon slivered salted almonds and one teaspoon lemon juice, if desired. Melt butter, add almonds and lemon juice, blend. Serve immediately on vegetables.

Lemon butter sauce: One-fourth cup butter, one and one-half tablespoons lemon juice, dash of salt, dash of cayenne pepper. Melt butter. Add lemon juice and seasonings, blend. Serve immediately on vegetables. Makes about one-third cup.

Tint meringue shell mixtures in delicate shades, then fill with attractively contrasting ice cream balls or fresh fruit.

Here's a new recipe for thousand island dressing: Mix three-fourths cup mayonnaise with one-fourth cup condensed undiluted cream of tomato soup and one-fourth cup India relish. Chill the dressing and serve over hearts of lettuce for a dinner salad.

WILLIAM S. MARTIN, Village Commissioner

AUCTION

SATURDAY, MAY 24

AUCTION WILL BEGIN PROMPTLY AT 3:00 P. M.

A Profitable Business and a Good Investment POINT VIEW TAVERN

Located in the hamlet of Waucousta, in the Kettle Moraine area, 17 miles south of Fond du Lac and 15 north of West Bend on busy U. S. Highway 45 and Wisconsin Highway 55, the most direct route to the north woods.

This modern two story building is 40 ft. x 28 ft. in size. The upstairs consists of three bedrooms, living room and bath, with hardwood floors throughout. Downstairs we have a 20x13 ft. living room, dining room combination with an open archway connecting them. These rooms are beautifully finished in knotty pine with its natural color preserved, together with new durable asphalt tile floors. Modern kitchen, 10 1/2 x 8 ft. with facilities for serving meals. Also modern convenient rest rooms for men and women.

Large barroom, 17x20 ft., all furnished in attractive knotty pine with the same hard finish asphalt tile flooring throughout. There is a fully equipped 28 ft. bar with 12 bar stools, four tavern tables, all lighting equipment, neon signs and transformers, candy racks, cash register, blue flash refrigeration cabinet, clock and venetian blinds throughout the building, also bottle gas range, hot water heater, juke box and pool table. Building is heated by oil burning furnace.

This property is located on one of the busiest arteries to the north woods. It is situated on a 1 1/2 acre tract which could very profitably be used as a wayside, or as a site for a tourist court or drive-in. Eight lakes within eight miles. One-quarter mile to public school; bus to high school; one block to grocery and garage. An excellent location, a real profit maker, and an ideal investment.

Building will be open for inspection up to the time of sale. Approximately \$11,000.00 can be financed.

Sale Conducted by BARTLET REAL ESTATE AGENCY, Kewaskum, Wis.

"Healthy Surroundings Make Healthy People"

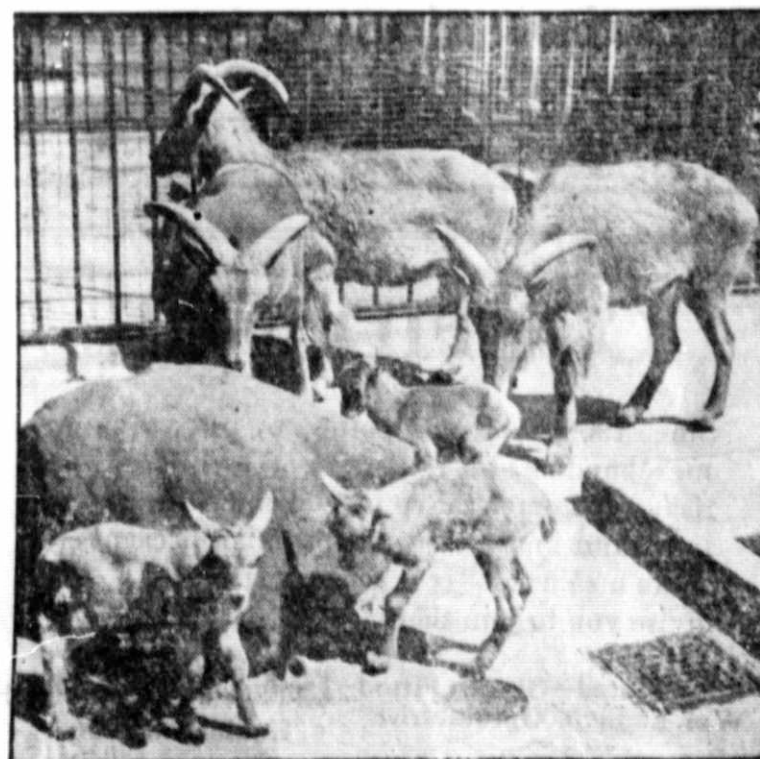

"Healthy Surroundings Make Healthy People"—the theme suggested for World Health Day in 1952—points to a goal shared by all nations. The World Health Organization (WHO), is helping man to conquer his disease breeding environment in many parts of the world. During one of WHO's anti-malaria drives in India (above) it was found that the number of plague cases fell rapidly. Investigations showed that DDT sprayed to kill mosquitoes had also killed the rat fleas and thus cut down the plague.

JOCKEY JOKE—Looking like a bona fide contortionist, Jimmy Breckons smiles and hangs on to what are actually a fellow jockey's boots and legs. Ordinarily serious around a racetrack, Jimmy rides horses at Gulfstream Park in Hallandale, Fla.

WATER GOES PIGGY-BACK—With a bulging pigskin on his back, an Arab water vendor leaves the Mosque of Omar in Jerusalem to sell his precious cargo to housewives living outside the walls of the old city. The ancient mosque, where Mohammed is said to have started on his trip to heaven, harbors the only drinking-water well within the wall.

AOUDADS AND MOMS—Exploring their quarters at New York's Central Park zoo, three baby Aoudads get accustomed to their surroundings under the watchful eyes of their mothers. They were born on three successive days early in April. First introduced to the zoo in 1939, the animals are Barbary sheep found along the coast of North Africa.

Chick Chats

CULL NON-LAYERS IN THE SPRING

If a "layer" isn't laying in the spring, she never will lay!

That perhaps is an exaggeration, but actually it is a pretty good yardstick. This is the time when the flock should be at peak production. If some hens or pullets are not producing, they are costing you money.

You can't afford "star boarders" who don't work for their keep. Egg prices are lower now, but feed costs are not. So, cull those non-layers!

Day-by-Day Culling

It isn't hard to spot the non-layers. Taking care of a flock every day, you can tell which birds aren't laying. They'll have a small, pale, scaly comb. Their eyes will be dull.

Pick up the suspect and examine her. If a bird isn't laying, the abdomen will be hard or fatty; the vent will be small, puckered, and dry; and the color will still be very much in the beak, eyelids and ear lobes.

These are signs of a non-layer. If, in addition to these, the bird has poor body capacity—two fingers or less—it is obvious she'll never make a layer. She should be culled immediately.

Regular culling not only gets rid of the feed-wasters, but also provides meat for the table or for sale. It is a fact that non-layers often lose weight, so it is important to cull them as quickly as they are noticed.

Management is Important

The above applies to those individuals which are the exceptions in an otherwise good flock. However, if the production of an entire flock is low at this time, then better look elsewhere for the reason. It is quite possible in management, or there may be unsuspected disease.

In order to produce well, the flock must have a comfortable house with plenty of equipment, the diet must be good, and disease must be controlled. If the entire flock's production is not where it should be, look for the reason among these things.

Pole Building May Be Answer To High Costs

Pole type farm buildings may be the answer for that new machine shed, hog house, broiler house, or dairy barn you've been planning this spring.

Stan Witzel, farm engineer, says you can keep costs down on these and other farm buildings with new methods for preserving the poles.

He says the pole barn itself is not new. A lot of early Wisconsin settlers put up pole barns. Grandfather made his barn out of white oak that stood through prairie winds and storms. But eventually the poles rotted and the shed was taken down.

The next barn in Wisconsin was set on a sturdy concrete foundation. That one will last for many years to come. The concrete foundation and sturdy frame construction won't cost much to repair and it will give long service. But it may cost more to build than what you get out of it.

Pressure treating for poles has now solved the answer to the old shed that rotted. Poles are soaked with wood-preserving chemicals for long life. This same type of treated poles is used for railroad ties and bridge piers.

The poles are set deep in the ground to resist winds and storms. Framing is simplified in the rest of the building and cost is lowered.

The pole barn can have a trussed, self-supporting, or clear span roof. It will also take a simple roof resting on poles set in the ground 12 to 15 feet apart each way through your building.

Witzel says that county agricultural agents have plans for pole type barns.

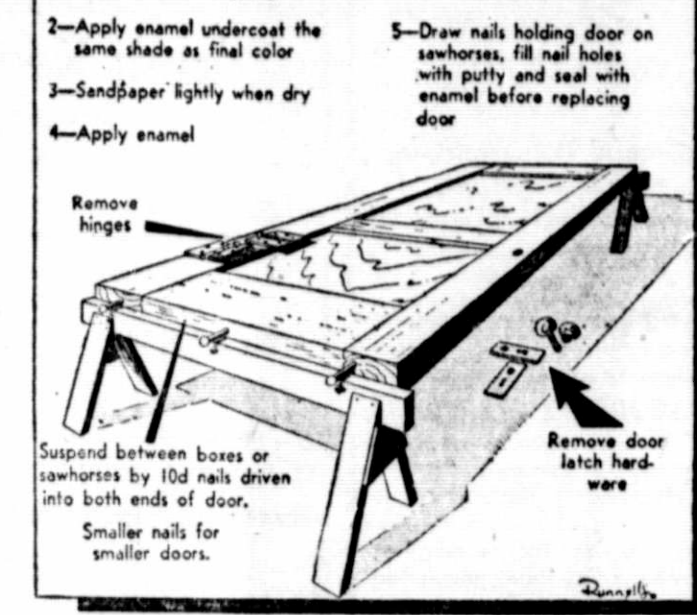

He feels it pays to carry plans and estimates on cost through to the end before you start the pole building.

THE GIRLS GET AROUND

In 15 years Mrs. Winifred Carr, Fairmont, has made 468 quilts. Miss Gladys Running is the first woman accredited by New York Stock Exchange to sell securities in Duluth. . . A year old Adrian lass held up a passenger train an hour at Worthington — she had swallowed a pin and the train waited to rush her to Rochester. . . Three lady grocery clerks in New Richland had appendix operations within six weeks. . . Two sets of Odegaard twins: Donna and Diane 11, Joan and June 8, submitted to a mass tonsillectomy at Moorhead. . . From great-grandmother 69 to great-granddaughter 2 1/2, four generations of ladies visited the same Thief River Falls beauty parlor the same day. . . Just a day apart two Austin women roommates broke their respective right wrists. . . Mrs. Horace Jaynes, 43-year-old Hibbing grandmother, whose own grandmother is living, recently gave birth to a daughter with two front teeth.

TIPS FOR THE AMATEUR ON ENAMELING A DOOR

TIPS FOR THE AMATEUR ON ENAMELING A DOOR

Applying enamel often is difficult for the amateur. Here are a few pointers that may help you:

When applying enamel, always be sure to have an undercoat of the same color before you apply it. Buy regular enamel undercoating.

If the enamel you wish to use is the same color as the old enamel, it can be used successfully if you dull the finish of the old enamel with sandpaper or steel wool.

But even if you intend to use the same color, you will get a better finish on old work if you use an undercoating first.

Cracks and holes should be filled with putty and sanded smooth.

Undercoater will level off right over the cracks and they will not show. But enamel is apt to separate along the crack.

When you use undercoater, you do not need to apply the enamel so thick that it runs. You get the color you want with the undercoater. Enamel gives you the finish.

Enamel is partly transparent. It contains considerable varnish. In order to get depth in a finish, several coats of enamel often are used, one over the other.

The finish is rubbed between coats, to remove the gloss, and plenty of time must be allowed for drying.

Most persons, however, use only one coat.

I have illustrated for you, a stunt that is sometimes used for enameled doors without the danger of runs or sags.

Drive three 10d nails into the

Just For You, Mom

Here's a meal the family can easily prepare for Mother—big baked potatoes boasting a stuffing of creamed chipped beef with more curls of the chipped beef arranged over the top. Colorful salads are prepared of cottage cheese filled peppers, garnished with green pepper rings.

Favorite Recipes

Unflavored gelatin may be used in every course of the meal, from artistic appetizers to delicious desserts. There are three rules to remember in gelatin cookery. First, soften the unflavored gelatin in cold liquid. Second, dissolve thoroughly in hot liquid or over hot water. Third, season or flavor and add the solid ingredients you fancy.

Jellied Chicken Tomato Soup
 2 tbsps. unflavored gelatin
 1/2 cup cold water
 2 cups tomato juice
 2 cups chicken stock
 2 slices lemon
 2 slices onion
 Salt and cayenne
 Soften the gelatin in cold water. Heat the tomato juice and chicken stock with the lemon and onion, add salt and cayenne to taste. Add the gelatin and stir until dissolved. Strain and turn into a well oiled shallow pan and chill. When ready to serve, cut into cubes and pile into bouillon cups.

Tomato and Cheese Aspic Ribbon Salad
Tomato Mixture
 1 quart tomatoes
 1 small onion
 2 teaspoons salt
 Few grains of pepper
 1/2 teaspoon powdered nutmeg
 1 teaspoon each of cloves and ginger
 4 teaspoons sugar
 2 1/2 tbsps. unflavored gelatin
 1/2 cup cold water
 Juice of 1/2 lemon
 Soften gelatin in cold water and lemon juice. Cook together the tomatoes, onions, salt, pepper, nutmeg, cloves, ginger and sugar. When the mixture is well seasoned, strain. Add soaked gelatin. Stir until dissolved.

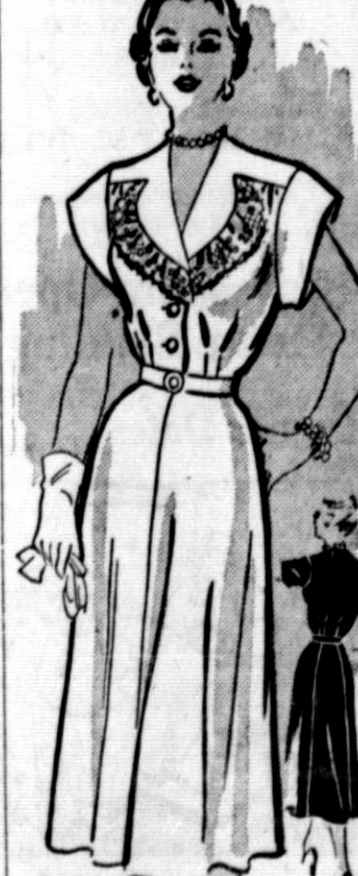

Cheese Mixture for Center of Ribbon Loaf
 2 tablespoons gelatin
 1/4 cup cold water
 1 pint cream cheese
 1 tablespoon salt
 2 tbsps. chopped pimento
 2 tbsps. chopped green pepper
 Milk
 Soak gelatin in cold water; dissolve in a little warm milk. Add to the cream cheese which has been mixed with the salt, pimento and green pepper. Fold in enough twenty per cent cream to bring the amount up to one quart. Grease a loaf pan. Put in a layer of tomato aspic, then the cheese mixture and another layer of tomato aspic. Chill thoroughly and slice when ready to serve.

Harlequin Salad
 4 tablespoons gelatin
 1 cup cold water
 4 cups hot consommé
 3 tablespoons lemon juice
 1 cup minced chicken
 1 1/2 cups cold cooked green peas
 1 cup minced ham
 1 1/2 cups diced cucumbers
 1 minced green pepper
 Slice of hard boiled egg, pimento or tomato slices
 Soak gelatin in cold water. Dissolve in hot consommé, add lemon juice. Cool, when slightly set, divide in 4 equal parts. To the first add the chicken, to the second the green peas, to the third the ham and to the fourth the cucumber and green pepper. Pour the chicken layer into a greased loaf mold and allow to set. Add the other layers one at a time. Chill, when ready to serve, unmold, slice and serve on lettuce. Garnish with slices of egg and pimento or tomato slices.

Jellied Shrimp Salad
 2 cups canned tomatoes
 1/2 cup water
 1/2 teaspoon salt
 1/8 teaspoon pepper
 4 whole cloves
 1 tablespoon sugar
 1 small onion peeled & minced
 1 1/2 tablespoons gelatin

Chocolate Cream Jelly
 1 square unsweetened chocolate cut in pieces
 1 cup cold water
 1 tablespoon gelatin
 1/2 cup sugar
 1/8 teaspoon salt
 1 cup cream whipped
 1/2 teaspoon vanilla
 Add chocolate to 3/4 cup of milk in double boiler and heat. Soak gelatin in 1/4 cup of milk for five minutes. When chocolate is melted, beat with a rotary beater until blended. Add gelatin, sugar and salt. Stir until gelatin is dissolved. Chill. When mixture begins to gel, add whipped cream and vanilla. Pour into mold and chill.

Ten-Foot Garden Will Keep Family In Salads

You don't need much land or gardening experience to increase your own food supply and at the same time cooperate with the government's plan to foster home gardens. Even the tiniest plots will keep you in salads, says expert F. F. Rockwell, who gives you a chart, in McCall's for May, for arranging a ten-foot plot and suggestions on varieties to plant and ways to grow them.

"This year our government wants us to raise gardens to help increase our food supply. You don't have to own an acre to cooperate. Even a tiny plot will give you salads.

"You can grow tomatoes against any fence or trellis, training them up and pruning to one or two stems. Six plant will give a small family enough extras to share with the neighbors, or to can for the winter.

"Cucumbers climb up wire fences very readily and a few vines will add crispness to hundreds of salads. For best results, pick the fruits as they mature. Both pole beans and bush beans are easy to grow and will bear heavily. Plant your pole beans against a trellis, or against poles with rough surfaces that give the tendrils a good hold.

"Of course you'll want lettuce. Remember when you thin your seedlings to add the tender little leaves to the salad bowl.

"Radishes, chives, cress and parsley take little room and can be grown in corners or among your flowers.

"Fresh herbs are something good cooks sing about. Many of them are decorative in flower borders, as well as distinguished in flavor. Borage, fennel, summer savory, dill, basil and mint will grow placidly without too much nursing.

"Of course you'll want seed catalogues for new varieties and repeat a planting of old successes, but we'd like to suggest some varieties that we think you'd like. Just remember, vegetables like plenty of sun. Tomatoes: Marglobe; Burpee Hybrid, red; Jubilee (yellow). Cucumbers: Surecrop, hybrid; Davis Perfect. Pole Beans: Kentucky Wonder; Yard Long Bush Beans; Topcrop; Brittle Wax. Lettuce: Oak-Leaf; Bronze Queen. Radishes: Cherry Belle; Crimson Giant; White Icicle. Peppers: Calwonder; Sunnybrook."

Safe Home Methods To Can Pork & Beans

For those who like to have a supply of home-canned pork and beans ready on the shelf, the U. S. Department of Agriculture and the Massachusetts Experiment Station have cooperated in developing safe home methods that give an appetizing product.

Here are the directions for canning pork and beans with a choice of either tomato or molasses sauce, and for baked beans with pork.

To can pork and beans with sauce: (For 7 quarts or 1 canner load)—Sort and wash 2 1/2 quarts (10 cups) of beans. Kidney, navy or yellow-eye beans may be used. Immerse washed beans in 6 quarts of boiling water, boil 2 minutes then remove from heat and let soak 1 hour. Heat again to boiling; drain and, if desired, save liquid for making sauce.

To make tomato sauce, mix 4 quarts tomato juice; 3/4 cup sugar; 3 tablespoons salt; 1/4 cup chopped onion, and 1 teaspoon mixture of ground cloves, allspice, mace, and cayenne. Heat to boiling. Or, mix 1 quart tomato catsup with 3 quarts water or soaking liquid from the beans and heat to boiling.

To make molasses sauce, mix 4 quarts water or soaking liquid from beans; 3/4 cup dark molasses; 1/4 cup vinegar; 3 tablespoons salt; and 1 tablespoon ground mustard. Heat to boiling.

Fill each jar 3/4 full of hot beans. Add small piece of salt pork, ham or bacon, and add sauce. Leave 1/2 inch at top of jars for head space. Adjust caps according to type used.

Process at once in a steam pressure canner at 10 pounds pressure (240 F.). Process pint glass jars 65 minutes; quarts 75 minutes.

To can baked beans with pork: Sort, wash and prepare 3 1/2 quarts dry beans as for pork and beans with molasses sauce. Place small pieces of pork, ham, or bacon in an earthenware crock. Add beans. Cover with molasses sauce as above. Place cover on crock and bake 4 to 5 hours at 350 F. (moderate oven). Add water if needed. Fill jars to 1/2 inch of top with hot baked beans. Adjust lids and process in steam pressure canner at 10 pounds pressure (240 F.). Pint jars take 80 minutes; quart jars, 100 minutes.

NEAR LIEGE, Belgium, stands a brand new power station which will increase the electricity output of both Belgium and Luxembourg. The power plant was partially financed through a loan of the International Bank for Reconstruction and Development.

AS A RESULT of the International Bank's Loans to Chile, that country has acquired modern agricultural machinery to increase its food production. The tractor in the picture hauls logs to a sawmill located at Concepción near the Chilean coast.

FOLDING HOUSE—One of the new features on display at the annual sports and camping show in Paris is this trailer-mounted folding house. Designed for rapid assembly, the camping hut is extra light for use with a small car. It houses three persons.

New Prospect

Mr. and Mrs. Louis Butzke recently moved to their cottage at Lake Fifteen.

On Sunday Mr. and Mrs. Frank Bowen visited Mr. and Mrs. Walter Dickmann at West Bend.

Mrs. Richard Trapp visited her aunt, Mrs. Garret Romaine at Fond du Lac on Tuesday, who is seriously ill.

Mrs. Paul Giese returned home Monday from St. Agnes' hospital, Fond du Lac. She is reported to be

getting along nicely.

Mr. and Mrs. Phillip Koch of Milwaukee and Mr. and Mrs. Eugene Wendelborn and children of West Bend visited Mr. and Mrs. Richard Trapp Saturday.

Mr. and Mrs. Ed. Roebber and daughter Judy, Mrs. Anna Krueger and Mr. and Mrs. Gordon Krueger of Milwaukee visited Mr. and Mrs. Jos. P. Uelmen Sunday.

Julie and Joan Tenneson of Fond du Lac returned to their home after spending several days with their grandparents, Mr. and Mrs.

George H. Meyer.

Mr. and Mrs. Joe Kohlen returned from their honeymoon on Monday. They visited places of interest enroute to Florida. Mrs. Kohlen is the former Julane Mattnies.

Mrs. Alex Kuciauskas and daughter Ricky and Miss Gloria Kliest of Forest Lake returned Sunday from a month's visit with friends and relatives in Virginia and Carolina.

On Sunday Mr. and Mrs. George H. Meyer and Edith were guests of Mr. and Mrs. Leo J. Ketter and family near Campbelsport in honor

of the celebration of their grandson Phillip's first Holy Communion. A delightful evening was spent at the home of Mrs. Louis Butzke at Lake Fifteen Tuesday by the Mothers' club. At the business meeting Mrs. Alex Kuciauskas was elected secretary and Mrs. Walter Jandre treasurer for the coming two years. On June 17 the club will visit the Kohler plant and the Walter house at Kohler. A delicious lunch was served by the hostess.

COUNTY-WIDE FARM BUREAU MEETING AT ROCKFIELD INN

A county-wide farm bureau meeting will be held Tuesday evening, May 13, 8:00 p. m. at the hall of the Rockfield Inn, Rockfield.

Members of the Sheboygan County Farm Bureau rural youth group will render entertainment.
