

U. W. Half Century Club Will Induct L. P. Rosenheimer

Lehman P. Rosenheimer, Kewaskum, is among the 146 surviving members of the Class of 1902 of the University of Wisconsin who will be inducted into Wisconsin's Half Century club at one of the high-light events of the state university's 99th Commencement Reunion week end calendar June 19-21.

The surviving members of the class which graduated from the university 50 years ago will become members of the Half Century club at a luncheon in Great Hall of the Memorial Union of the university's 99th commencement day, Friday, June 20. The class members will be presented with Golden Jubilee certificates in recognition of their 50 years of loyalty to their alma mater.

This year marks the 16th in the history of the university and its Alumni association that the certificates have been presented to Wisconsin graduates of a half century or more, beginning with the Class of 1886, and brings total membership in the club to 954 over the past 16 years.

Dr. Ira L. Baldwin, vice president of academic affairs, will welcome the Half Century club members to the campus at the luncheon, Willard G. Aschenbrenner, Racine, president of the Wisconsin Alumni association, will present the Golden Jubilee certificates to the members of the class of 1902, and Dean Fayette H. Elwell of the UW School of Commerce, will give the main address.

Climax of the university's 99th commencement-reunion week end will be the solemn commencement ceremony at 8:30 a. m. Friday, June 20, in the university field-house, at which some 2,300 students will be given their first and higher degrees and four honorary degrees will be conferred by the university.

Dr. Heidner Speaker at Annual Red Cross Meet

Dr. A. H. Heidner, well known Washington county physician and surgeon, and current president of the Wisconsin State Medical society, will be the principal speaker at the annual meeting of the West Bend chapter, American Red Cross. The meeting will be held in the church hall at St. Michaels Monday night, June 23. Dinner will be served at 6:30 p. m.

In the interest of the coming blood bank clinic in West Bend, in which the Red Cross and the Community Blood Donor club are jointly seeking 1,000 volunteers to donate a pint of blood, half of which will go to Korea, Dr. Heidner has selected as the subject of his talk, "Blood—the Medicine We Make Ourselves." His talk will follow the meeting, a high light of which will be election of nine new members to the chapter board of directors.

Reservations can be made by calling the Red Cross office in West Bend, phone 392. Dinner tickets are \$1.50 each.

HENRY BECKER STORE AT NEW FANE SOLD

Mr. and Mrs. Marvin Kirchner of West Bend recently purchased the Henry Becker grocery store at New Fane and were given possession on June 1. Included in the transaction were the stock, the store and the living quarters.

Mr. Becker had operated the store for the past eight years. Mr. and Mrs. Kirchner have two children, Kenneth and Shirley.

Mr. and Mrs. Becker and family have moved into the K. A. Honock, Jr. home in Roseland Heights, formerly occupied by local teachers, where they will reside until their new home in the Bilgo addition is completed.

MAASKE BUILDS TWO HOMES

Work was started this week on two more homes being built by the Harry H. Maaske Realty company in the Belger addition on the east side of town. The homes will be offered for sale.

Mrs. August Degner, Ben Marx Pass On

Mrs. August Degner, 72, nee Ida Oeder, of Boltonville, died very suddenly of a cerebral hemorrhage at her home on Saturday, June 7.

Mrs. Degner was born Nov. 17, 1879 in the town of Scott, Sheboygan county. Following her marriage she lived on a farm in the town of Farmington until 12 years ago when she and Mr. Degner retired and moved to Boltonville. Her husband predeceased her on July 25, 1950.

Surviving are two sons, Carl of Milwaukee and Ervin of Boltonville, three daughters, Adeline (Mrs. Edwin Zahn) of Germantown, Edna (Mrs. Don Gilford) of Boltonville and Cora (Mrs. Fred Tews) of Cedarburg; three sisters, Caroline Oeder of Elkhorn and Emma and Clara Oeder of Kewaskum; two brothers, Herman Oeder of Fargo, N. D. and Otto Oeder of Sheldon, N. D.; the following 18 grandchildren: Carl, Jr., Beverly, James, Judy and Joe Degner, Carol Dutcher and Lois Schug of Milwaukee, June, Audrey, Kathleen and Mary Degner of Boltonville, Harold and Sharon Gilford of Boltonville, Robert, Kenneth and Carolyn Tews of Cedarburg, Gerald and Dallas Zahn of Germantown, and one great-grandchild, Linda Dutcher of Milwaukee.

The body was in state at Miller's Funeral home, Kewaskum, from 12 noon Tuesday until 11 a. m. Wednesday and at the United Brethren church, Boltonville, from 12 noon until the time of services at 2 p. m. The Rev. Maetche presided and burial was in Union cemetery, Boltonville.

BENJAMIN P. MARX

Benjamin P. "Ben" Marx, 74, of 3405 W. Lisbon avenue, Milwaukee, who was born and reared in Kewaskum, passed away Monday, June 9, at the Milwaukee hospital. He moved to Milwaukee from this village when a young man.

Surviving are his widow Flora (nee Poth) and the following brothers and sisters: Nic. Marx of Milwaukee, John of Kewaskum, Helen and Joseph of Milwaukee, Dela (Mrs. Nicholas Stoffel) of Kewaskum, Priscilla, Leo and Sylvia and Mrs. Imelda Kastenzholz of Milwaukee. He also leaves three sisters-in-law, two brothers-in-law, nieces and nephews.

Funeral services were held Friday, June 13, at 8:30 a. m. from the Geo. L. Wieland Funeral home, 3412 W. Center st. to St. Thomas Aquinas church, N. 36th and W. Brown sts. at 9 a. m. Interment was in Holy Cross cemetery.

MRS. LYDIA PETRI

Mrs. Lydia Petri, 81, died at 4 p. m. Saturday, June 7, at her home in Campbellsport following a short illness.

Born March 28, 1871, in the town of Ashford, the daughter of the late Conrad and Mary Hangartner was married to John Petri of Wayne at the Hangartner home on April 20, 1891. The couple resided on a farm in the town of Wayne. Mr. Petri died April 10, 1916. Mrs. Petri resided in Milwaukee from 1929 to 1949 when she returned to Campbellsport vicinity to reside on a farm with her brother, Albert Hangartner, until four years ago when they moved to the village.

Mrs. Petri is survived by two children, Mrs. Leila Schuster, Gillett, and Wendell Petri, Wayne; 11 grandchildren and 11 great-grandchildren. One of 10 children, Mrs. Petri is survived by only one brother, Albert Hangartner.

The body was in state at the Twohig Funeral home where services were held at 2 p. m. Wednesday. Burial was in Union cemetery at Campbellsport.

MILDRED WALLENFELTZ ST. MARY'S SPRINGS GRADUATE

Diplomas were conferred upon 124 students, the largest class in the history of the institution, at the annual commencement exercises at St. Mary's Springs academy, Fond du Lac, last Thursday night. Among the graduates was Mildred Wallenfeltz, daughter of Mr. and Mrs. Lawrence Wallenfeltz, Kewaskum.

Air Force Ground Observer Corps Meeting Here

On June 16 at 8 p. m. an air force officer from the Green Bay Filter Center will be at the Kewaskum Municipal building to give an explanation of the Ground Observer Corps and conduct training in the observing and reporting of aircraft. An interesting movie on the air defense team will also be presented, showing how the team operates and how the individual citizen fits into this system.

In the defense system of the United States, the primary method of aircraft detecting is by radar. However, this is not an airtight defense in that radar is ineffective below 5,000 feet, leaving a low level gap. If this gap in our defense system is not plugged it gives a potential enemy an advantage that we can ill afford to give in this age of atomic weapons.

The Ground Observer Corps, consisting of a network of observation posts located about 8 miles apart through most of the U. S. was organized to supplement radar and provide the low level coverage needed. It is imperative that citizens of communities where these observation posts are located make the posts to observe the movement of aircraft and report to the air force if this country is to have a strong defense. Kewaskum is the site of one of these posts and observers are urgently needed to organize this post in preparation for any emergency that might arise. Citizens are urged to attend this meeting and participate in this vital civil defense organization.

Families, Couples Move During Week

Mr. and Mrs. William Reynolds and family have moved from the former Oppenorth home on First st. to Columbus, Wis. Mr. Reynolds was a member of the Kewaskum High school faculty the past term. He will attend a special summer school course at the University of Wisconsin. Mr. and Mrs. Clifford Nall and family are moving from the former Roger Bilgo home on West Water st. into the home vacated by the Reynolds family.

Mr. and Mrs. Sylvester Eisinger and family moved from one of the flats in the Mrs. Rob. Backhaus residence on Second st. into the upper apartment of the Herrhan Wondra home at Campbellsport. Mr. and Mrs. Harlan Gruber moved into the flat vacated by the Eisingers. Mr. Gruber recently was discharged from the U. S. Army.

Mr. and Mrs. Wayland Becker and daughter, who resided in the upper apartment of the Ray Schaefer home, have moved to Red Granite, Wis., where they have purchased a home and Mr. Becker has purchased a filling station.

SUMMER PLAYGROUND TO OPEN ON MONDAY

Monday, June 16, marks the beginning of the summer playground season, which is being sponsored by the village of Kewaskum. The playground will be located on the high school athletic fields. Activities will begin at 9:00 a. m. and end at 4:30 p. m. each day, Monday through Friday.

All boys and girls in the community are extended the invitation to come to the playground. Mr. Bade, director, is anticipating and is prepared to handle a large turnout. Let's use our leisure time profitably this summer and have some fun.

BIRTHS

BELGER—A daughter to Mr. and Mrs. Frederic Belger, R. 1, Kewaskum, Tuesday, June 3, at Memorial hospital, Sheboygan.

McKee—A son to Mr. and Mrs. Merlin McKee, R. 2, Kewaskum, Thursday, June 5.

YOGERT—A son to Mr. and Mrs. Herbert Yogert, Kewaskum, Thursday, June 5.

NEITZEL—A daughter to Mr. and Mrs. Harold Neitzel, Kewaskum, Friday, June 6.

BACKHAUS—A son to Mr. and Mrs. Gerald Backhaus, R. 2, Kewaskum, Saturday, June 7.

Board Orders Light Pole Brackets and Flags for Streets

Sewage Pressure System on Street Approved; Liquor Licenses Granted

Regular Meeting June 2, 1952

The Village Board of Kewaskum, Wisconsin, met in regular monthly meeting with President C. Miller presiding and all board members present. The minutes of the previous meetings were approved as presented.

Mr. Bade presented to the board his program for the children's summer recreational program together with an inventory of playground equipment on hand and his suggestions of what additional equipment should be purchased. This program is to be conducted from June 16th to August 14th.

Motion by A. Martin, seconded by J. Eberle and carried that the commissioner be authorized to place an order with Joys Bros. Co. of Milwaukee, Wis. for thirty-six (36) four-way light pole flag brackets and one hundred forty-four 3x5 flags and staffs for the price of four hundred fifty-six and 48/100 dollars (\$456.48); that the fire dept. pay one-half the cost of these decorations and that the American Legion furnish all replacements for this set-up later on.

The plans for a sewage pressure system on "C" street were presented to the board. Motion by L. Kohn and seconded by M. Schaefer that these plans be approved and placed on file and that construction be authorized if and when the sub-divider makes written application to the board for this service and upon presentation and approval of a plat of the area affected by this project. Motion carried.

Motion by G. Hansen, seconded by J. Eberle and carried that a storm sewer be constructed on Clinton street according to the plans submitted by the village engineers.

Upon motion by A. Martin, seconded by E. Schaefer and carried the following applications for combination class "B" intoxicating liquor and fermented malt beverage licenses were approved and the commissioner was authorized to issue such licenses upon payment of the proper fee: Max Emil Blumke, Walter A. Del, Marlin A. Dreher, Lorraine C. Guth, Louis J. Heister, Sr., Althea H. Keller, Roman W. Miller, Edna McKee, Walter C. Schneider, Boyd R. Smoley.

Motion by J. Eberle, seconded by L. Kohn and carried that all village employees be paid on a twice-a-month basis.

Motion by G. Hansen, seconded by L. Kohn and carried that all bills and wages as recommended and approved by the finance committee be allowed and paid.

ROCK RIVER JUNIOR TEAM LOSES OPENER TO LEROY

Kewaskum's entry in the Rock River Junior baseball league was defeated in a long-winded opener at Leroy Sunday by a close 13-12 score.

Kewaskum outbatted Leroy, 16 safeties to 13, but they didn't get as many in the pinch as the winners. Don Meisenheimer and G. Wierman pitched for the losers while R. Bauer was the winning twirler. Coach Wally Cudnohoske's charges were pally in hitting by Bierman who garnered four hits in five trips. First baseman Koepke collected three for five. Shortstop F. Marisse was top slugger for Leroy with three for five. Kewaskum was a head 9-6 going into the 8th inning when Leroy exploded for six runs to take a 13-9 lead. The locals rallied in the ninth with three runs but fell one run short.

This Sunday Kewaskum is scheduled to play at Jeneau in a morning contest at 10 a. m.

MARRIAGE LICENSE

Sylvester K. Wondra, R. 3, Campbellsport, and Luetcha H. Lubitz, R. 1, Kewaskum; wedding June 21.

Boy Believed Drowned Here Returns Safe

Who's the rescue squad of the Kewaskum fire department was dragging the river, the local ambulance was on hand and his mother and spectators worried over his death by drowning, Larry Roesel, 9-year-old son of Mrs. Meta Heimermann, village, returned home at about 12:30 p. m. on Wednesday, safe and sound and unaware of the concern over his absence.

The boy had been fishing along the river bank across from the village park Wednesday morning. Apparently he got tired of fishing and took off about town, leaving his fish pole on the river bank. When he failed to return home at noon when he was expected for dinner a search was made for him.

With the discovery of his fish pole along the edge of the river and no Larry to be found it was believed he had drowned. The rescue squad was called and began dragging the river. They had been at work about 10 or 15 minutes when the missing boy returned.

Chevs Outlast Slinger, 15-13

LAND O LAKES STANDINGS (Northern Division)

Table with columns: Team, Won, Lost. Includes teams like Granville, Grafton, Mequon, Kewaskum, West Bend, Saukville, Slinger, Newburg, Cedarburg, Germantown.

Scores last Sunday—Kewaskum 15, Slinger 13; Grafton 9, Cedarburg 1; Newburg 3, Saukville 4; Mequon 6, Germantown 1; Granville 16, West Bend 7.

Games this Sunday—Grafton at Kewaskum, Cedarburg at Saukville, Mequon at Newburg, West Bend at Slinger, Germantown at Granville.

In a long marathon on the home field Sunday which went on about three hours, Kewaskum outlasted Slinger, 15-13, in a slugfest.

In totalling up 29 runs, the two teams each banged out 16 hits. R. Heid, D. Mayer and Schmidt worked for Slinger and Duenkel and Honock took turns for the winners. Duenkel starred for Kewaskum and Honock relieved him early in the contest. Then when Honock was put out of the game by umpire Burkhardt for protesting a very questionable decision, Duenkel returned to the mound from right field, Heid walked one, Duenkel three and Mayer four. Heid fanned two and Duenkel two. Honock allowed no hits in the inning he pitched, all 16 being made off of Duenkel in eight frames. Heid was nicked for 11 hits in three frames, Mayer five in three, and Schmidt none in two.

Both teams started out strong with many runs in the early innings. A big third frame gave Kewaskum a 9-7 lead at the time and both teams kept pecking away for the rest of the game with the winners always staying ahead.

Duenkel lashed out three hits in three trips to the plate, two of them doubles, to cop hitting honors. He also batted in six runs. Don Lutz collected three for five. Batter with the most hits was B. Mayer of Slinger with four for five. R. Mayer connected for three for six.

Kewaskum has a tough customer coming up this Sunday when second place Grafton plays here. Grafton has lost only one game and this will be the Chev's hardest tilt to date.

Table with columns: Player, AB, R, H, E. Includes players like Heid, Melius, R. Mayer, Wagner, Roeker, Duenkel, Peterman, B. Mayer, Gass, Mentz, R. Heid, Nelson, Schmidt.

Miss Schmidt Wed to M. Bruce Koth

Joined in marriage at 10 o'clock Saturday morning, June 7, by the Rev. F. C. La Buwi in Holy Trinity church before an altar decorated with white gladioli were Miss Marjorie E. Schmidt, daughter of Mr. and Mrs. Theodore R. Schmidt, Kewaskum, and M. Bruce Koth, Kewaskum, son of Mr. and Mrs. Frank Koth, 8. 56th St., West Allis.

Members of the families and invited guests gathered at the Linden Inn, Big Cedar lake, at an afternoon reception which was preceded by a dinner at the Linden Inn.

The bride graduated from Kewaskum High school and attended Prospect Hall and the University of Wisconsin extension at Milwaukee. Prior to her marriage she was employed in the accounting department of the Internal Revenue Department in Milwaukee. Her husband is a Marquette university graduate and holds a position as an engineer at Regal Ware, Inc., Kewaskum.

The bride approached the altar in a wedding gown of fragile chantilly and nylon tulle with lace molding the bodice and embroidering the cuffed decalage. The skirt was fashioned with a rush of pleated lace, with four full fans set into foaming tulle. She wore a head piece of chantilly lace caught to a French illusion veil. Completing her ensemble was a bouquet of lilies of the valley.

The bride was attended by her sister, Miss Rita Schmidt, Madison, as maid of honor and the bridal aides were Miss Gloria Kusmierczyk and Mrs. Roger Dropp, sister of the bridegroom, Milwaukee. The attendants all wore ballerina length gowns of yellow imported Swiss organdy which were strapless with matching cape. They wore large picture hats with crowns of daisies and yellow velvet streamers. They carried bouquets of daisies, Anne Rudersdorf of Hartford, the flower girl, wore a frock of white imported Swiss organdy with underslip in yellow taffeta. She wore a picture hat with crown of daisies and long yellow streamers. She, too, carried a basket of daisies.

Arthur Koth, Milwaukee, served as his brother's best man. The groomsmen were Robert Schmidt, Kewaskum, brother of the bride, and Kenneth Balogh, Milwaukee. The ushering duties were performed by Ralph Marx, Kewaskum, and Roger Dropp, Milwaukee, brother-in-law of the bridegroom.

Mr. and Mrs. Koth will make their home in Kewaskum when they return from a wedding trip in the West.

HOSPITAL NEWS

Miss Paula Kohler, Kewaskum, returned from St. Joseph's hospital, West Bend, Tuesday after submitting to an appendectomy on Thursday, June 5.

Miss Bertha Wendt, Kewaskum, has returned home from the Milwaukee hospital, where she was a patient, and a visit of a few days with her sister, Mrs. Henry Gronemayer at Richfield.

MISS CUDNOHOSKE ENGAGED

At a family dinner at their home on Sunday evening, Mr. and Mrs. Edward Cudnohoske, R. 1, Kewaskum, announced the engagement of their daughter Marion to Lloyd Keller, son of Mr. and Mrs. Roman Keller, Kewaskum.

BAPTISMS OF FOUR BABIES ON SUNDAY

Three babies were baptized Sunday morning in the St. Lucas Ev. Lutheran church by the Rev. Gerhardt Kaniess. Christened were Orville Charles Koehler II, son of Mr. and Mrs. Orville Koehler of West Bend; Richard Frederic Schultz, son of Mr. and Mrs. Leroy Schultz of Kewaskum; Karen Mayo Laubenstein, daughter of Mr. and Mrs. Roman Laubenstein of West Bend. Mr. and Mrs. Clarence Bath, R. 1, Kewaskum, had their infant son baptized in Holy Trinity church on Sunday by the Rev. F. C. La Buwi. The name of David Harold was given the lad. Sponsors were Mr. and Mrs. Arnold Bohn, West Bend.

Officers Elected by Legion Post and Auxiliary

At the regular monthly meeting of Robert G. Romaine Post No. 384, American Legion, on Monday night at the clubhouse, officers were elected for the coming year. The new officers will not take over until fall when they will be installed at a Washington county meeting to be held in West Bend in September.

Ralph J. Marx, returned veteran of Korea, was elected post commander to succeed Donald Seil. Other officers named are as follows:

First vice-commander, Wilmer Prost, succeeding Clayton Stautz; second vice-commander, Roger Reindl, succeeding Wilmer Prost; chaplain, Dr. Robert Kauth, succeeding Roger Reindl; sergeant-at-arms, Darwin Bruhn, re-elected; historian, Elsie Bruhn, re-elected. Named to the executive board for three years were Lee Honock, Ray Zeimet and Fred Miller.

On the same evening officers of the Legion Auxiliary also were elected. The new officers are as follows:

President, Pearl Miller; first vice-president, Reet Brussel; second vice-president, Laura Miller; treasurer, Lena Belger; chaplain, Eleanor Fellenz; historian, Marge Marx; sergeant-at-arms, Aletta Stautz; color bearer, Marion Petermann.

Kewaskum Safety Patrols Attend Congress at Dells

The Kewaskum Public school and Holy Trinity school safety patrols, 25 in number, under the guidance of Howard Hess and Edmund Haack, were delegates at the annual School Safety Patrol Congress at Wisconsin Dells June 7.

The group left Kewaskum by bus at 4:30 a. m. Saturday morning. Upon arriving at the Dells the boys and girls visited the Kilbourn Hydro-Electric Generating plant, toured the Pioneer Village, and made the three hour boat trip through the upper and lower Dells. At noon the boys and girls joined 3,000 other members of the safety patrols of Wisconsin and 11 bands in a parade. A picnic dinner, swimming and sight-seeing were enjoyed in the afternoon.

Safety patrol members were awarded the trip, made possible by the Kiwanis Club of Kewaskum and the Bank of Kewaskum, for doing satisfactory work in safety patrol work.

LAST SOCIAL OF SEASON HELD BY ALTAR SOCIETY

The Ladies' Altar society of Holy Trinity church held their last social of the season on Tuesday evening with a nice crowd present. The meeting opened with a prayer followed by a general business discussion. A shrine of the Sacred Heart was set up by Mary Jane Mayer for the evening and Father La Buwi gave an appropriate talk about dedicating June and our lives to the Sacred Heart of Jesus.

For entertainment some of the ladies played cards while others cut and pieced quilt blocks for making quilts in the future. A fine lunch was served by Mrs. Ed. Weddig, Mrs. Cyril Wietor and Mrs. Hubert Wittmann, the hostesses. An electric corn popper, the door prize, was won by Mary Jane Mayer.

CANNED MEAT "PARTY" TRAY

Straight from the canned meat shelf come the spreads for these gay appetizers which you can easily duplicate in your own kitchen. Use your cookie cutters to make the designs, then top them with deviled ham, smoked tongue, Vienna sausage slices or chipped beef. Canapes are garnished here with stuffed olive slices, pearl onions and parsley and arranged around colorful cream cheese stuffed crab-apples.

New Chemicals Offer Better Weed Control

The day of weed-free flax may be closer than we think.

Two new chemicals, MCP and TCA have shown the ability to remove nearly every annual weed from flax without seriously injuring the growing crop.

MCP acts in much the same way as the more widely used 2,4-D. It is applied at the same rate and destroys the same type of broad-leaved weeds.

The most important difference between the two chemicals, according to E. J. Mitchell of the Flax Institute of the United States, is that MCP is less likely to delay maturity or injure the flax.

Unlike either MCP or 2,4-D, TCA destroys pigeon grass (fox-tail) and most other grass-type weeds. It so happens that flax is one of the most resistant of all plants to the effects of TCA, and it has successfully withstood many times the recommended application of 5-8 lbs. per acre.

Farmers are cautioned against spraying TCA on fields in which flax is used as a companion or nurse crop for alfalfa or red clover. Established stands of alfalfa or sweet clover can be sprayed safely.

To obtain most complete and economical destruction of weeds, MCP and TCA may be mixed together and applied at the same time. Such a combination offers effective control of almost every common weed except wild oats.

To be most profitable, spraying should be done just as soon as most of the weeds have germinated and in any case, before they reach three inches in height. Many farmers make the mistake of waiting too long.

"Get into the field and down on your knees when you look for weeds," Mitchell advises farmers. "If you wait until you can see them from the road, they are going to be a lot harder to kill. Even worse, you've given them time to rob the soil of valuable moisture and fertility which should have been saved for your flax."

THOSE WERE THE DAYS

THE FUMBLE FAMILY

THE FUMBLE FAMILY

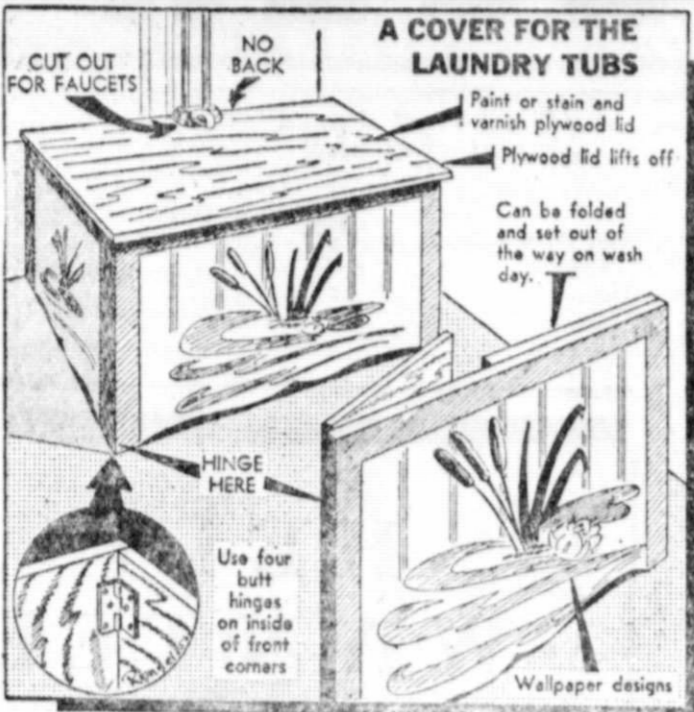

CREATIVE OLDSTER—Peering over a miniature domestic scene she created, Mrs. Ruth Shubert, 61, poses at the sixth annual Hobby Show for Older Persons in New York's Museum of Natural History. The dolls really have the personal touch. Their hair is Mrs. Shubert's.

DOGGY REVIEW FOR "IKE"—Right in step with the boys a dog mascot leads his unit by the reviewing stand as U. S. troops in Frankfurt, Germany, pay a farewell tribute to Gen. Dwight Eisenhower, retiring NATO commander.

HOUSE HUNTING IN KOREA—Carrying his worldly possessions with him, a South Korean farmer trudges along a dusty road seeking a piece of land to till without the aid of bombs or artillery. While peace talks continue, thousands of the war's victims roam the land looking for a new home.

A COVER FOR THE LAUNDRY TUBS

I have drawn up a plan for a covering which can be removed and set aside on wash day.

You will need four pieces of plywood; one for the front, one for the top, and two for the ends. If the back is to be enclosed, another piece of plywood will be necessary.

Cut out decorative design of your own choice on the bottom edge of each piece with a coping saw.

Fasten the ends to the front with butt hinges, as illustrated. At least four hinges will be necessary. Use short screws.

Stain and varnish, or paint the outside of the panels as desired. Added decoration can be obtained

by pasting wallpaper patterns on each panel.

The top should be finished to match the sides. The top is not fastened to the sides, so that it may be lifted off when the tubs are to be used.

ORDER TODAY

"MR. FIXUM'S HANDY HINTS" is a collection of 31 selected jobs from this column, printed in attractive form, for 35c.

Send coins, not stamps, to Ernie Gardner, 14189 Faust Avenue, Detroit 23, Michigan.

Here Are Hints To Boost Crops In Your Garden

There's some luck and a lot of work in a successful home garden.

You can't control the weather, but you can do a good many other things to harvest those bumper crops in the garden.

One of the biggest enemies of the vegetable is the all-conquering weed, according to James G. Moore, horticulturist.

The magic words "weed chemical" have led some gardeners into a pitfall, according to Moore. The home gardener might as well forget about chemical weed control this year and resign himself to the old—if not popular—hand weeding. Little weeds are easier to destroy that big ones and Moore says "get 'em early."

He continues, there may be some insects just waiting around for your crops to come up. Take for example the cucumber beetle. First plants out of the ground may be the ones that the beetle gets. You can examine plants every day and then move to counter-attack the insects.

The beetles attack melons, squashes and pumpkins, as well as cucumbers. Squashes, planted in bands and transplanted have a chance to get started before beetles attack. Three per cent DDT or two per cent Dilan will give some protection. Use until vines are strong and healthy.

You can almost assume that maggots will attack onions, radishes, cabbages, and similar crops. Act to prevent their attack. Dust or spray these plants at the base of the stems with chlordane. Dust radishes just after they come up. Thoroughly wash before eating the plants.

Dust onions when plants are an inch to an inch and a half high. Repeat in two weeks. Dust cabbage within a week after setting out and repeat in two weeks. DDT can be used but it may be less effective.

Protect cabbage and tomato plants from cutworms with a plant band or strawberry box-bottom knocked out, and sunk in the soil around the plants. Protect row crops from cutworms with DDT.

Synthetic Fabrics Need Special Care

The new synthetic fabrics now on the market need some special care in washing and ironing, says Gladys Meloche, University of Wisconsin clothing specialist. And the new materials present some problems in construction, too.

Vicara, dacron, cynel, orlon, and nylon are affected by high temperatures, she says. If the label on your garment or yard goods says that the material is washable, be sure to wash it in just moderately warm water. And use a cooler iron for pressing the fabric. If your iron has a temperature control dial, set it for rayon.

What about sewing on the new fabrics? First, don't try to tear them, Miss Meloche cautions. Nylon, orlon, dacron, and dynel are very strong and should always be cut with good sharp shears.

Be sure, too, that you have fine, sharp pins for pinning the pattern to the fabric and for pinning pieces of the material together. If your local merchants have only coarse heavy pins, ask them to put in a supply of fine ones.

You'll want a fine (00) needle on the sewing machine. Miss Meloche continues. While 12 to 14 stitches to the inch are recommended for cottons, 8 to 10 are enough for synthetic fabrics.

It's all right to use mercerized thread for sewing synthetic materials. However, it's better to use nylon or dacron thread since they're stronger. When you're using nylon or dacron thread remember that it should always be cut, not broken.

Many synthetic fabrics ravel easily so it's a good idea to finish plain seams with a row of machine stitching along the raw edges. A lapped seam is another good one to use on synthetics, and on very sheer fabrics you may find a French seam is best. Be sure to test the stitch of your machine on scraps of the material. If it puckers, try loosening the upper tension a little and then stitch slowly. Rapid stitching may cause the seam to pucker.

If ripped-out stitches leave holes that don't disappear when the material is pressed, try to avoid ripping by making your fitting alterations in the pattern.

Hiccups Can Have Serious Complications

Although minor cases of hiccups are often common, there are many serious cases of actual physical illness caused by them, and the sufferer should know what to do if they persist, states a bulletin from the Minnesota State Medical association.

Folklore treatments for hiccups are wide and varied. Many of them actually have been known to work—especially the method of rebreathing air exhaled into a paper bag. This returns exhaled carbon dioxide to the lungs, and carbon dioxide stimulates the respiratory areas of the brain, which are involved in hiccups. Doctors apply the same principle when they place a mask over a patient's face and have him breathe a mixture of carbon dioxide and oxygen.

No one should be afraid to seek medical advice for hiccups because they are often a symptom of disease, such as appendicitis, liver trouble, diabetes, ulcer or brain tumor.

Besides trying to find and remove the source of irritation, doctors also use "symptomatic" measures to ease the spasms themselves. One thing is common to all hiccup sufferers—the diaphragm is not working as it should. Good results in some cases have been reported for a wide variety of drugs. Electrical stimulation of certain nerves has also helped.

When simpler treatments fail to give relief and a patient's life is threatened, doctors begin to think of surgery. Since the spasms come from a misbehaving diaphragm, and since this organ received its impulses by way of the phrenic nerves, it is possible to paralyze the diaphragm by crushing or severing one or both of these pathways.

Although surgery is one of the surest methods of curing hiccups, doctors do not use it except as a last resort.

If hiccups do not leave after using the most sensible of the common methods, the sufferer should not hesitate to call a doctor. He may discover that they are a symptom of a more serious disease.

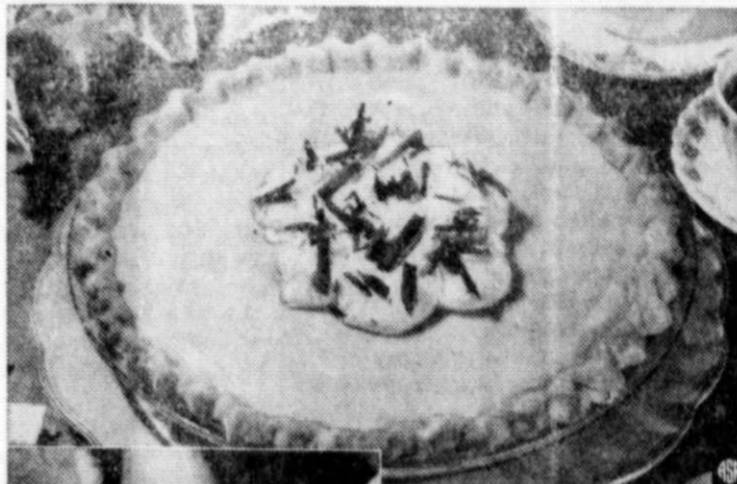

NOT SO SOLEMN

New York—Becoming suspicious, police slipped quietly into an upper East Side funeral chapel and arrested 36 men—thirty-five of whom allegedly were playing dice alongside a candle-decked altar, while the thirty-sixth was the owner, Anthony Piragnoli, 63, who got \$25 a night for the use of his chapel as a place for gambling.

The more you leave things to chance, the less chance there is for you.

One Magic Recipe Gives New Family of Pies

1. Sift flour and salt together. Cut in shortening until particles are the size of small peas.

2. Sprinkle milk over mixture, tossing lightly with fork until dough is moist enough to hold together. Form into a ball.

3. Roll out on floured board or pastry cloth to a 10-inch circle. Fit loosely into 8-inch pie pan. Gently pat out air pockets. Fold edge to form standing rim; flute. Pick crust with fork.

4. Bake in hot oven (425°F.) 10 to 12 minutes. Cool. Makes 8-inch pie shell.

Apricot Filling

1 package orange-flavored gelatin
1 1/4 cups hot canned apricot nectar
1 pint vanilla ice cream

1. Dissolve gelatin in hot liquid in 2-quart saucepan.

2. Add ice cream by spoonfuls, stirring until melted. Then chill until thickened, but not set (15 to 20 minutes).

3. Turn into cooled baked pie shell. Chill until firm (15 to 20 minutes). Garnish with whipped cream and shaved chocolate.

Gingerrees

3 cups pitted dates
1 cup black walnut meats chopped
1 tablespoon ginger syrup
1 tablespoon preserved ginger chopped
Colored cocoanut
Chop the dates, add the walnut meats, ginger syrup and chopped ginger. Run through a food chopper. Make into balls and roll in colored cocoanut.

Combine sugar, brown sugar, corn syrup, water, butter and vinegar and cook to 240 degrees or soft ball stage. Cool slightly, add vanilla and pour over mixture of rice flakes and nuts. Pour into a pan and cut into bars when cool.

Stiff ball stage, the syrup forms a stiff ball which retains its shape for a second or two when removed from the water and then flattens out.

Hard ball stage, the syrup forms a hard ball which will roll about on a cold buttered platter when removed from the water.

Light to medium crack stage, the syrup forms spirals or threads which are brittle under water but which soften when removed from the water and stick to the teeth when chewed.

Hard crack stage, the syrup forms spirals or threads which are brittle when removed from the water and do not stick to the teeth when chewed.

How to Color Cocoanut Sprinkle some shredded cocoanut on waxed paper; add a little food coloring and rub evenly throughout. Dry and store in jars.

TOPNOTCH TODDLER TRAINERS—Sixteen-month-old Donnie Davis gets expert assistance from former world heavyweight champ Ezzard Charles, right, and Judge Vincent Carroll at the opening of a new Police Athletic League center in Philadelphia. Looking on are PAL officials who helped in the dedication.

UNINVITED CALLER—Lodged in the doorway of a girl's dormitory, this old jalopy presented a formidable obstacle to University of Illinois coeds looking for an exit. When male students failed in an attempt to raid the dorm, they pushed the car up on the porch. Police from Champaign and Urbana dampened the ardor of the 300 male collegians participating.

FAREWELL MY COMMANDER—Wounded in Korea, a Turkish soldier kisses the hand of Gen. Matthew Ridgway aboard the Jutlandia at Yokohama, Japan, just before the Danish hospital ship sailed for Europe with wounded troops from Ethiopia, Greece, France, Belgium, Holland and Turkey. General Ridgway, who takes over Gen. Dwight Eisenhower's command in Europe, was accompanied on the visit by his wife.

THEY GOT THEIR MONEY'S WORTH

An army-type pair of shoes purchased in 1925 still give comfortable service to Dr. B. L. Cook, Farmington veterinarian. They've been worn regularly and half-soled four times in 27 years. A scoop shovel used 56 years is still equipped with the original handle. This very first article sold by the late Frank Wilkowskie over the counter of his brand new Morristown hardware store 56 years ago, has been returned by the purchaser as a souvenir for the third generation of Wilkowskes now operating the store.

WHO'S WHO IN MINNESOTA ZOO

Hopsie, Poland-China pig on the Laverne Nelson farm near Albert Lea, gets around as lively as any porker on only three legs. A Holstein calf born on the Harvey Urch farm near West Concord without eyes, is heading for the packer. Rushing the season a bit was a five-foot black diamond rattlesnake found on the highway north of Virginia. One albino gopher is news; William Reiland made headlines by trapping three in one week on his father's farm near Mazeppa.

Alice Contest Finals at Seymour on June 27

The state finals for the 1952 Alice in Dairyland will be held in Seymour (Outagamie county) on Friday, June 27, it was announced this week by the Wisconsin Department of Agriculture, sponsor of the contest.

The Seymour Kiwanis club, dairy plant operators in the area and the Seymour Businessmen's association will collaborate in staging the event.

This east-central Wisconsin dairy community, with a population of 1760, was chosen for the contest finals as part of a plan to move the event around the state instead of holding the coronation in the same area each year.

Elimination contests for the 450 candidates will begin throughout the state the first week in June. Following the local and sectional judging, seven regional contests will be held and one girl from each of the seven regions will go to Seymour for the finals.

The celebration at Seymour will begin Friday featuring a parade, judging of the candidates, a banquet in the evening and a dairy promotion program for everyone attending the event.

The winner of the 1952 contest, in addition to becoming official hostess at the Wisconsin State Fair August 16-24, will become a full time employee of the Department of Agriculture. Her duties will include promotional work on Wisconsin farm products.

The six runners-up will become members of the Alice in Dairyland

court and they will be called upon to make promotional appearances in the state when Alice is working on out-of-state projects.

Marjean Czerwinski, Milwaukee, the present Alice in Dairyland, will crown the 1952 winner at Seymour.

Staral Attends Chicago Chapter Work Shop Meet

The 14-year war against polio by the March of Dimes has brought the nation close to the threshold of victory over the disease, A. P. Staral, chairman of the Washington County Chapter of the National Foundation of Infantile Paralysis declared last Wednesday.

Staral returned Tuesday from a seven-state regional conference on polio problems held in Chicago. Attending the sessions were chapter chairmen from Ohio, Indiana, Illinois, Wisconsin, Kentucky, Michigan, and Iowa. More than 145 chapters of the national foundation were represented.

Taking part in the "workshop" discussions at the conference were D. Hart E. Van Riper, medical director; George P. Voss, director of chapters; Miss Elaine Whitelaw, director of women's activities and Miss Dorothy Ducas, director of public relations. The conference was arranged by regional director John B. Middleton.

"From all I heard at the conference," said Staral, "I am convinced that in the years ahead the dark

shadow of polio will be removed from our homes. We all left Chicago with the feeling that the time and work we put into the March of Dimes will be repaid a thousand-fold in the future.

"Meanwhile," he continued, "we must bear in mind that polio still is with us. Unfortunately we have no reason to believe that the disease will relax its hard grip upon the nation this year. We cannot forget the grim incidence figures of the past four years, nor can we put out of our minds that approximately 30,000 cases now seem to be

the Annual expectancy rather than an extraordinary occurrence. Until science defeats polio, our work must continue with greater intensity than ever."

A financial burden which chapters of the national foundation must carry for years to come, he said, is that of caring for an increasing number of severely involved patients, stricken in previous years, who need financial help.

The national foundation estimates that between 40,000 and 45,000 cases from other years were being aided by chapters at the start of 1952.

However, Mr. Staral declared, the national foundation faces the 1952 polio season better prepared than ever to cope with a possible polio emergency.

The annual meeting of the Washington county chapter will be held at the court house, West Bend, on Monday evening, June 16 at 8:00 p. m. It is hoped that everyone who finds it possible to attend, will be there. We have just completed a most successful March of Dimes campaign and a final report will be presented by the Co-Chairmen J. Tom Merriam and Ray Jeffords, said Mr. Staral.

IN THE SERVICE

CPL. EDWARDS HOME FROM KOREA; RELIEVED OF DUTY

Cpl. William Edwards, son of Dr. and Mrs. R. G. Edwards, Kewaskum, who served overseas in Korea in the infantry with the U. S. Marines for six months, arrived home on Saturday evening. He arrived in the states on May 28. Cpl. Edwards, who served in the marines the past 16 months, has been relieved from active duty and placed in the reserves.

PVT. KRUEGER, WIFE HOME

Pvt. Merrill Krueger, son of Mr. and Mrs. Wallace Krueger of the town of Auburn, is spending an 11-day furlough at home. Pvt. Krueger, who had been stationed at Camp Pickett, Va. will leave Monday to report at Fort Sam Houston, Tex., where he has been transferred to medic school. He was accompanied by his wife Evelyn, who was with him in Virginia and will also leave with him for Texas.

Behind The Scenes In American Business

By Reynolds Knight

NEW YORK—Suspension of Regulation W and its attendant credit controls is not expected to change the business pattern much. Although the government is not so demanding now, banks are still conservative and they are the ones who actually hand out the money.

Even under the regulation the average American had plenty of ready cash to finance most purchases except for expensive items such as automobiles and the like. And the banks will most likely continue much the same conditions as the government demanded for these expensive articles—at least for a while.

The real effect of the suspension of Regulation W will come about slowly. The main advantage of the move at present is that the individual retailer or bank has the power to regulate credit policies to suit its own changing needs instead of operating under the arbitrary, over-all control of the government.

PLANNING URGED—One building-materials industry is warning the public that the too-small house may be a poor investment.

In a study of new home construction, the Tile Council of America notes that small houses have been increasing rapidly. This trend may well sacrifice not only family comfort but also resale values, the Council believes. Too many of the new, small dwellings have no architectural provision for expansion and have eliminated vital resale factors.

The Council makes the following recommendations for the design of small homes: 1) Plans, including heating system, should provide for expansion; 2) Only durable materials should be installed in areas which receive the greatest wear, such as clay tile in the kitchen and bathroom; 3) Installation of inferior plumbing and fixtures should be avoided; 4) Have a scientifically designed kitchen. This busiest room should be planned to accommodate the needs of a growing family; 5) Bathing "bottlenecks" can be eliminated in small bathrooms by the relatively inexpensive installation of a clay tile shower stall, using the same plumbing lines as the tub-shower combination; 6) Construction costs can be reduced by enlarging the living room and omitting a dining room.

THINGS TO COME—Engineers can now get a compact, durable and accurate slide rule that goes all-out for versatility inasmuch as it also includes a two-color pencil, a magnifier, an eraser, a lead chamber and a detachable, straight-edge ruler.

Another super combo is a step, extension, or stairway ladder that can also be used as two straight ladders. A paint tray which can be locked onto the step ladder is an added feature. For summer loafing look into a precut, easily assembled porch. Lubricating pencil for small parts, zippers, locks, etc., will not soil hands or clothes. A scaffold which is continually adjustable in height will be on the market soon.

BRIGHTER OUTLOOK—Shortages of critical raw materials continue to worry many industries, but one item for which the outlook is brighter is sulphur.

Sulphur, essential in making newsprint, fertilizer, chemicals, rubber, steel, petroleum products and many other commodities, has been in short supply ever since late 1950. This led to government allocation of the mineral both for domestic and foreign use.

Now, reports Langbourne M. Williams, Jr., president of Freeport Sulphur Company, the situation is "very definitely improved." In recent months, he said, some sulphur consumers have not taken all of their allocations. At the same time, projects are under way to bring in substantial additional supplies of sulphur in different forms in the U. S. and other free world nations.

SPACE CADET SCIENCE—Metals are being suspended in space and then melted by a new process developed by Westinghouse.

In some technical laboratory processes special problems arise in melting metals when materials of which the crucible is made sometimes contaminate the materials being worked upon. To circumvent this, the Westinghouse operation suspends the metal in space by means of an electromagnetic field—a trick that was accomplished as early as 1939 at the New York World's Fair—and then melts it with other electrical forces.

The company can process up to 19 ounces so far and melting heavier specimens will be feasible after further development, the company believes.

A process for drying milk in the sun is recorded in Marco Polo's Journals.

Avoid Violent And Sudden Exercise On Your Vacation

With vacation days ahead, Dr. Robin N. Allin warns against unaccustomed athletics because violent and sudden exercises might strain the heart.

This caution and others on high blood pressure, overweight, and self-medication are stressed by Dr. Allin in endorsing a new leaflet, "Be Smart—Protect Your Heart," soon to be issued by the American Heart Association.

Dr. Allin asks that particular heed be taken of the following advice given in the leaflet by well known authorities on heart disease.

"Almost everyone should take some form of mild exercise," Dr. Louis N. Katz, Chicago, warns, "but if you don't ordinarily lift anything heavier than the telephone, or walk farther than the distance from your house to the bus stop, then you should not expect your heart to take kindly to the sudden extra strain of a fast game of tennis."

"No one, if he wants them to last, uses his heart or his car to the very limit of their endurance. It is wise to hold some power in reserve."

Dr. Tinsley R. Harrison, professor of internal medicine, medical college of Alabama, points out that moderate, regular exercise never hurt anyone, but the sudden calls on the heart for all-out effort, such as a sudden dash for the train, can cause a heart attack if the sprinter has an unrecognized heart condition.

Dr. Howard B. Sprague of the Massachusetts General Hospital, Boston, says, "Although high blood pressure is a common cause of heart and blood vessel diseases you may have high blood pressure for years without it bothering you."

"Only your doctor can tell if your blood pressure is causing trouble. Doctors agree that most people with high blood pressure, or almost any kind of heart disease, can live pretty normally if, in addition to the doctor's special instructions, they follow these rules: 1. Walk, don't run upstairs; 2. Don't eat too heavily at any one meal; 3. Don't get overtired; 4. Relax completely for ten minutes twice each day; 5. Keep your weight normal; 6. Choose sports in which winning is not important; 7. Keep out of arguments; 8. Try to do something constructive about your worries. For ex-

WOBBLY WADDLER—"Charlie," a duck that was born with four legs, takes a bow in Houston, Tex., as he is held by S. L. Spinks. In addition to two normal legs, "Charlie" has one between them and another growing from his left side. The five-week-old quacker was hatched by a bantam hen.

Q. What is this method of meat cookery?
A. Braising.

Q. How should meat be braised?
A. Brown meat on all sides in own or a small amount of additional fat in a heavy utensil. (The meat may be floured, if desired.) Season with salt and pepper. Add a little liquid if necessary. Cover meat closely and cook slowly until tender.

Q. What meats are prepared by this method?

- A. Beef—pot-roasts, short ribs, arm or blade steaks, flank steaks, round steaks, cubes, heart, kidney, liver.
- Vent—breast, rib, loin or shoulder chops, steaks, cutlets, cubes, patties, heart, kidney.
- Pork—shoulder steaks, loin and rib chops, spareribs, frenched tenderloin, hocks, patties, heart, kidney, liver.
- Lamb—breast, shoulder, neck slices, shanks.

FIRST AID for Everybody

VII--Treatment of Wounds

(This is another of a series of articles, written especially for Central Press Association and this newspaper on first aid, a subject gripping the nation in the light of threatened atomic aggression. The articles are based on the American Red Cross First Aid course. First aid principles, applicable to atoms as well as other disasters, are outlined. The Red Cross offers a 28-hour course free which teaches fully the technique of first aid.)

By Central Press

THERE ARE four types of wounds—abrasions, incised wounds, lacerations or torn wounds, and puncture wounds. Abrasions are made by scraping off the skin, incised wounds by a sharp cutting instrument. A torn wound can be made by an exploding shell or a fall against an angular object, and a puncture by a bullet, stab or nail.

All wounds are subject to two dangers—infection and serious bleeding or hemorrhage. The danger of infection is present in every case. The bleeding may be relatively slight or severe. Shock is present in all cases of serious bleeding.

In cases of bomb damage or similar catastrophe, the first aider must be prepared to deal with numerous wounds, minor as well as severe. Extensive bruises, inflicted with great force, will be suffered, and lacerations, though usually superficial, may be deep and cause hemorrhage or shock.

THE SIZE of the wound may be misleading. For instance, a small wound may extend through the abdominal wall or a penetrating object may enter the chest cavity. Numerous tiny glass particles may be imbedded under the skin and clothing may give little protection to the victim. In many cases the wounds may be multiple. Therefore, as close an examination as possible is required.

William Barnard, Jr., president of Roadrunners of Arizona, applies head bandage to "accident victim."

Wounds requiring first aid treatment may be placed roughly in two classifications: those in which bleeding is not severe and those where bleeding is severe.

When bleeding is not severe, the chief aim is to prevent more germs from entering the wound. Apply a sterile dressing or compress and bandage. Be sure any material used is free of germs. Do not disturb blood clots.

When bleeding is severe, think first of pressure. Apply direct pressure on the wound and the appropriate pressure point. There are six previously mentioned—in the neck at the side of the windpipe, just in front of the ear, the jaw behind the inner end of the

collarbone, the upper arm and the groin.

Apply a dressing as soon as possible and release pressure at the pressure point for a trial period. Watch carefully for recurrence of hemorrhage. If hemorrhage is not controlled use a tourniquet. The tourniquet is dangerous. Proper handling has been described elsewhere in this series.

The dressings over wounds may become saturated with blood. Do not remove them. Apply more dressings over them.

Remember that shock treatment must be given in all serious wounds.

TOMORROW: Transportation.

Milk Fever Concerns All Dairy Producers

Dairy producers should be prepared for a possible flareup of milk fever in cows which are calving for the third or more times this spring.

"That's because milk fever usually occurs after the second calving, and frequently during the third to seventh calving," says the American Veterinary Medical Association.

A cow that has escaped milk fever for her first several calvings is not necessarily safe from this disease an association spokesman points out.

Milk fever symptoms usually show up between 12 hours and four days after calving. Symptoms may take two forms. The animal may become excited, have a wild look in its eye, tremble, weaken and stagger. Or it may become depressed, lose appetite, and refuse to move. In either case, the animal later collapses, is unable to get up and goes into a coma before death sets in.

Since milk fever drains the blood stream of its normal supply of calcium, treatment consists of restoring calcium to the body. Veterinarians employ two different methods in doing this. Both methods are said to bring about quick recovery, if used in time. Another point stressed regarding milk fever is that it usually attacks the best producers and heavy milkers in a herd.

Drs. Katz, Harrison, Sprague, Barnes and White are all former presidents of the American Heart Association.

Cut Feed Costs With Pastures For Your Pullets

Here's a way to save 250 pounds of feed for every 100 pullets you raise this year.

J. B. Hayes, poultry specialist, reports that you can write off that much feed with a good pasture for the pullets.

That saving isn't peanuts in these days of high costs and scarce protein supplements.

Good pasture in his book means ladino, alfalfa, or equally nutritious grasses. And it also means clipping the pasture so grass remains about knee high to the chickens.

Why is clipping so important? The younger grass shoots are better feed for poultry—more succulent and tender.

The healthy pasture will provide ground cover and aid in keeping the flock clean. With a good pasture you can drop vitamin D and most of the other substances out of a mash for the growing flock.

Hayes says there's no reason why the regular laying flock mash can't be used for the growing flock—providing the price permits.

He points out that rye grass makes a good enough emergency pasture for the young flock. It comes along rapidly and holds unless heat and drought become too serious.

Sports Afield

By Ted Kesting

If one were to pick the single most consistently successful lure for all-around fishing in most parts of the continent, there is little doubt in the mind of Robert Page Lincoln that the winner would be the fly-and-spinner combination in its many forms, shapes and sizes. This combination is an absolute killer for smallmouth bass.

Now the attraction of this lure does not lie in the fly itself but in the revolving spinner, the twinkle and gleam of which catches the fish's eye. It is the spinner that is all-important, and the fly is complementary, giving body to the lure. Of course, the fly's function is quite vital, too. You can fish with a bare hook on the spinner shaft but you won't catch fish.

There is one qualification Lincoln makes in the bass fly used on the spinner shaft, and that is that it be without wing feathers. The reason for this is that when a fly is added to the spinner it

does not seek to imitate a fly, but a minnow. Why have wing feathers if the fly is supposed to look like a minnow?

The use of silver ribbing on a fly body, with no hackle is a good lure; and a solid silver-wound body is frequently a killer. Chiefly, however, you can rely on the typical hackled flies in the regulation patterns such as Coachman, Professor, White Miller, Yellow Sally, Black Gnat and so on. For bass these should be in No. 1/0 size, with either a No. 2 or 3 spinner to back them up.

The No. 2 spinner is best for average shore fishing, but for flowing water the larger No. 3 may be better. Because spinners in these sizes are very small, they need a bright finish to be at their best. This means no inferior finish is suitable. I think that if you used nickel or silver entirely you won't miss out on much. Gold is my second choice.

As to whether you should use a single spinner on the shaft or a double (tandem) spinner depends on the water. For ordinary fishing the single spinner is recommended. The tandem is most useful in clouded water, or in fairly fast to fast water.

Add a spinner to streamer flies, preferably with hackle streamers and with head and optics painted on, and you double the attraction of the lure.

Fly-and-spinner fishing for panfish has made vast strides recently. Fine leader tips are needed because the lures are so tiny. A fly (wingless) tied on a No. 10 or 12 hook will go best with a No. 0 spinner on a shaft for this kind of fishing.

Hindu writings, dating back to at least 2,000 B.C., indicate that butter was used in connection with religious ceremonies.

GOOD LOOKER—Taking time off from movie-making in Hollywood, actress Ann Blyth holds out a mirror to make sure of her looks for anyone who's looking. So who's not looking?

SPLASHING FIRST

SLOPPY SECOND

THE MIRE THE MERRIER—How many of the 26 entrants in the annual Northwest Motorcycle "Mud Race" are still buried in the mire of the rugged course outside Seattle, Wash., is anyone's guess. Kicking up a spray of mud and water, "Red" Farwell, left, of Puyallup, Wash., skids through a deep mud hole as he comes down the home stretch. He sloshed his way around the half-mile bog 15 times to win in one hour and 12 minutes. Donna Walters, right, of Seattle, gets a helping hand after her "steed" skittered out from under her. Donna, one of two women in the race, remounted and finished second. She and Farwell were the only two to actually finish the muddy event.

Handyman

QUESTION: After driving or prolonged rains the antique brick veneer finish of my home becomes saturated and water runs behind the veneer to the sill and eventually into the basement. Should I apply a sealer to the brick, or provide drip holes at the sill line?
—A. W. N., West Singwood, N. J.

ANSWER: Using a sealer on the brick is good practice to preserve them against deterioration. Also, "weep holes" are a good idea to prevent rot of the sill. These may be drilled through the brick at the sill line, squared off with a cold chisel. Air admitted through these holes will help dry up the dampened wood.

QUESTION: Can you tell me of a preparation to clean a discolored bath tub? The stains are apparently just on the surface, but mild abrasive cleaning powders do not seem to remove the stains.
—S. L., Gardner, Mass.

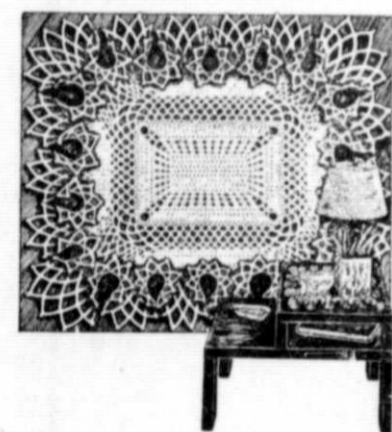

ANSWER: First try some of the bleaching liquids such as ammonia used straight, chlorine solutions, lemon-juice with salt, trisodium phosphate, or sodium citrate. Wet a cloth with these, press over the stains, let stand a while, then rinse. A positive of any one of these mixed with whiting and glycerine and spread over the stains and let stand until dry scrubbed over the area with a few drops of water as a lubricant. These should work on porcelain tubs—but may wear through the enamel-on-metal style tubs.

QUESTION: I wish to replace a rotted sill in an attic window. Can this be done without removing the whole frame?
—C. J., Garfield Heights, Ohio

ANSWER: It is possible to do the job this way, but since sill and frame are usually nailed together at several points, removal of the frame and starting over is the quickest and best way.

This column is prepared by the editors of THE FAMILY HANDYMAN MAGAZINE as a service to home owners. If you have any questions or problems relating to your own home, please address a letter, stating your problem to THE FAMILY HANDYMAN, 211 East 37th Street, New York, New York. Attention of News Syndicate Editor. If the question has widespread appeal in the opinion of the editors, it will be printed with the answer in this column at a later date. However, we cannot enter into detailed correspondence with everyone. THE FAMILY HANDYMAN is available at newsstands and hardware stores everywhere.

RUFFLES ON A RECTANGLE

This pretty ruffled doily is about 13" by 15" in size when finished. It is especially attractive for oval or rectangular end tables, step tables and others. Leave off the ruffles and it is ideal for a chair set or vanity set. Ask for pattern No. 3184, 20c. Send orders to: Homecraft Service, Journal Pub. Co., Inc., 2500 Buchanan, Kansas City 16, Mo.

VIDEO FLIGHT—Raven haired ballerina Pauline Goddard leaps gracefully into the air while rehearsing an exotic dance for a television performance. With the flick of a knob, it's possible to have her in your front room almost every Saturday night.

A Wise Bride Chooses Long-Lasting Orlon

BY EDNA MILES

FASHION, for the June brides of 1952, will be balanced between the long and the short lengths in wedding gowns. The girls who pick the short length are those who want a dress to wear dancing or to parties when the wedding's over. The brides who walk down the aisle in the floor-length gown with train are those who prefer tradition to practicality.

For the formal brides, there are still gowns with many practical aspects. Most brides who choose the traditional wedding gown want to pack it away for a daughter and possibly a granddaughter to wear on her wedding day.

Therefore, this bride will look for a fabric with staying qualities, one that will resist damage from mildew, sunlight, heat and abrasion. She'll find it in a man-made fiber such as orlon.

She will also find that orlon has a luster and texture equal to that of any fine silk or satin. Further, it's comfortably lightweight, drapes gracefully without stiffness and has a luxurious "hand."

For her June wedding, the bride in the picture wears a formal bridal gown with a train in orlon fiber. A Murray Hamburger design, it has a full skirt with inverted double box-pleat at center front. There's a molded bodice with long, tight-fitting sleeves that are pointed over the wrists.

New TB Drugs Not Necessarily Cures

Recent scientific reports tend to indicate that the new tuberculosis drugs, Rimifon and Marsilid, are not TB germ killers, but are helpful deterrents, according to the Anti-Tuberculosis Association.

William Steenken, Jr., head of the world famous Trudeau Tuberculosis Laboratory, recently revealed that patients tended to build up resistance to drugs as the treatment progressed. He said that TB germs became resistant as early as 26 days after treatment began. Efforts are being made by Trudeau scientists to prevent or slow down germ resistance to the drugs.

These Trudeau studies showed that TB germs became resistant to the new anti-TB drugs in about the same period of time that streptomycin did when that antibiotic was used alone.

Dr. A. A. Pleyte, pointed out that the Trudeau study "is only one of many experiments with the new drugs." He added, however, that the report does tend to confirm fears in medical ranks that resistance might develop. The new compounds were announced as "TB miracle drugs" on February 21.

He pointed out that the drugs may still prove extremely valuable in long term treatment of TB, as streptomycin has in combination with other drugs. Streptomycin is bacteria-static (a deterrent to the growth of TB germs) rather than a killer of the "thick-skinned bug."

Drug therapy helps many patients improve to the point where surgery is possible," Dr. Pleyte stated. "Patients who were far advanced and even 'hopeless' are now living longer and many are able to resume a useful life again with newer treatment methods."

LITTLE FOLKS MAKE BIG NEWS

A Richfield patrolman overhauling a driver who missed a school stop, found himself looking down a revolver barrel as the 3-year-old cowboy son in the back seat admonished him, "If you hurt my mommy I'll kill you." A two-year-old New Ulm lad survived unharmed a tumble from a second story window. A 6-year-old Fairmont boy got hungry after a tonsilectomy, slipped from the hospital, and walked 15 blocks home.

FAMILY AFFAIRS GROW VERY NEWSY

William Cyr of Quincy, Mass., and brother Frank Cyr got together for their first visit in 30 years at the latter's Oklee home.

It took 47 years for Emory Trembley to get back from Reedley, Cal., for a visit with brother George at Slayton. John S. Walters, Rochester, retired after 45 years with C&NW, leaving six sons and one grandson with the same railroad, their combined service totting up an impressive 195 years.

From great-great grandfather John Mayers, 91, to Mary Gertrude Beestmann, three months, five generations are spanned between New Munich and St. Paul.

FAMILY PROPOSITION

Mt. Carmel, Ill.—When the petition for Republican W. V. Brown's re-election to the Illinois House of Representatives was returned completed, there was only one family name on it. Twenty-six citizens, all named Garrett, signed the petition when it was circulated in the White county community of Mill Shoals.

Pleasant Spring May Be Bad For Crops

This year is presenting us with an early, warm spring, the most sustained above-normal temperature period that we have experienced in many, many years. A record breaker heat wave in late April and early May has already been experienced.

From the standpoint of comfort this pleasant, unseasonal weather is most enjoyable but, when it is viewed from the standpoint of its effects upon nature's ability to bring forth a good crop and a bountiful harvest, it has disadvantages that border almost on disaster unless corrective weather conditions prevail during latter May and in June. That is the observation of John Brandt, president of Land O' Lakes Creameries, Inc.

Small grain needs cool, damp weather during the early stages of its growth period and, certainly, pasture and hay require rain and cool weather to get a proper start for full production. If there is any doubt in anyone's mind as to what unseasonal weather can do to crop prospects, he needs only to view the flowers—daffodils, tulips, hyacinths and other early flowers. Here we have a demonstration of curtailed growth and earlier than usual blooming which is the result of unseasonal, warm weather, but not exactly lack of moisture as the ground this spring has certainly carried plenty of moisture even though the surface may be a little dry, Brandt notes.

The result of the farmer's efforts in bringing forth a bountiful harvest for 1952 is already in the balance, and weather conditions of the next three weeks can definitely determine the crop prospects regardless of what the weather conditions may be later in the growing season. Pasture and hay crops are being set right now and, while small grains and corn have a long period of the hazards of maturity problems ahead, even the most favorable weather conditions after the middle of June to harvest time cannot mend the damage that is done in the early part of the crop season. Likewise, the most favorable crop conditions up to a few weeks before harvest time can be ruined by bad weather or frost in the late stages of crop maturity, but poor spring prospects cannot be cured by favorable harvest time weather.

This is a spring that requires the utmost care in planting and preparation of the soil so that our growing crops may utilize the moisture and fertilizer to the fullest possible extent. Careless, haphazard preparation of the soil for planting and immediate care after planting may produce some kind of a crop if we have very favorable production conditions but, regardless of whether conditions are favorable or unfavorable, it is the proper preparation of the soil and proper seeding of the right kind of seed that counts at harvest time.

Going the long way around . . . To conduct a Good Friday service a Montevideo Lutheran minister traveled 90 miles around floods to get to Baxter 16 miles distant. . . Pipe Bailey of Browns Valley hung his winter overcoat in an Ortonville restaurant. Six weeks later he got a note from Chicago that the coat would be sent back to him on identification as to size, color, and other details. . . When a Wadena lad missed his coonskin cap a neighbor lady remembered seeing a dog burying a strang object in a neighbor's raspberry bushes. Yep, the lad got his cap back. . . Bronco rode the high crossbars of a power pole two days until a gust of wind blew the frightened cat unharmed to Hibbing terrafirma.

Test Your Intelligence

Score 10 points for each correct answer in the first six questions:

1. Waterloo saw the defeat of: —the Spanish Armada —Napoleon —Kaiser Wilhelm —Czar Nicholas II
2. Which of the following is misspelled: —chief —sleigh —believe —receive
3. The Dodecanese Islands are in the: —Dardanelles —Atlantic Ocean —Pacific Ocean —Aegean Sea
4. The length of the Mexican-U. S. boundary is about: —500 miles —2000 miles —3000 miles —800 miles
5. Aardvarks are fond of: —shrimp —oysters —ants —legumes
6. In the Bible, what did Moses strike to get water: —a rock —sand —a tree —stone tablets
7. Listed below are nicknames and opposite them the states to which they are applied. Match them, scoring 10 points for each correct answer.

- | | |
|--------------|-----------------|
| (A) Hoosier | —Ohio |
| (B) Sooner | —Oklahoma |
| (C) Buckeye | —North Carolina |
| (D) Tar Heel | —Indiana |

Total your points. A score of 0-20 is poor; 30-60, average; 70-80, superior; 90-100, very superior.

THESE WOMEN!

STRICTLY BUSINESS

by McFeatters

"Mr. Weskitt is in charge of colonial houses!"

There'll be plenty of burlap bags and binder twine this year. Barbed and woven wire fencing will also be easier to buy this year than last. Summer's a busy time—and it can be a dangerous time for youngsters. Clean up yards and vacant lots this spring so the children won't get bad cuts.

Ticklers

By George

"Everything I say to him seems to go in one ear and out the other!"

"ALARMISTS" BEWARE—As punishment for turning in false alarms, these Cortland, N. Y., boys get busy scrubbing floors at the local fire station. Work on fire trucks or other glamorous equipment was ruled out because firemen decided such "punishment" might make false alarms a favorite sport.

Now that the gardening season is in full bloom, the man of the house will, no doubt, look for your assistance. You can give him one good tip before he goes forth, spade in hand into the garden, by suggesting he first use hand cream to protect his hands during the hours out of doors.

This initial application of hand cream speeds the "cleanup" job on grimy hands, says Betty Ann. After cleansing, have him smooth the hand cream on again to alleviate any roughness, soreness or chapping. One manufacturer offers hand cream in a clean, refreshing scent and it comes in a handy man sized tube which will suit masculine tastes.

Not just gardeners alone, but also men whose hobbies are golfing or fishing, or those who spend time outdoors at odd jobs around the house and garage, will benefit by a "before and after" application of this protective, medicated hand cream. It quickly disappears into the skin, leaving no oily aftermath. The cream does a double job, giving working hands much needed protection, while its specially medicated formula provides quick and lasting relief from chapping.

Since the beginning of recorded history, women have worn perfume to create a personal atmosphere of charm to underscore their presence fully, unforgettably. And so it is today. Whether a woman is 16 or 60 she enjoys the sense of femininity and fascination which perfume conveys. She appreciates its ability to command and hold an audience, to create a mood and highlight an occasion. In addition, perfume does for her morale exactly what a new hat, or gown, or color does. It gives her spirits a delightful lift.

A coating of clear fingernail polish, applied to medicine bottles as soon as they appear on the bathroom shelf, will prevent their becoming smeared and illegible after spilling or frequent handling.

To repair a wide crack in a wooden bowl, fill the crevice with a mixture of shellac and very fine sawdust. Small cracks may be repaired by simply filling with shellac. Be sure edges of crack are clean and dry before filling.

Light and fluffy apricot cream is a delicious combination of dried apricots, orange and whipped cream, all molded together. It's an easy family dessert. For a party touch, chill it in a pan lined with lady fingers and garnish with whipped cream. Ingredients are two cups sweetened cooked dried apricots, one orange, one envelope (one tablespoon) plain gelatin, two tablespoons cold water, three-fourths cup syrup from apricots, one-half cup granulated sugar, few grains salt, one cup whipping cream and one dozen lady fingers. Drain and chop apricots, reserving syrup. Grate one teaspoon rind from orange. Peel and dice orange. Soften gelatin in cold water. Heat apricot syrup with sugar and salt and dissolve gelatin in it. Add fruits and rind. Cool until slightly thickened. Fold in whipped cream. Line bottom and sides of loaf pan (8 1/2 by 4 1/2 by 2 1/2 inches) with split lady fingers. Pour in apricot cream. Top with remaining lady fingers. Chill overnight. Unmold and cut into slices to serve. Serves six.

Creamy Butter Frosting
To make the creamy butter frosting follow this procedure. Cream two tablespoons butter and one-eighth teaspoon salt. Add alternately two and one-half cups sifted confectioners' sugar, one egg white and four to five teaspoons cream. Blend well after each addition. Blend in one teaspoon vanilla and two drops green coloring; beat until light and creamy.

The skin of fresh mushrooms is just as edible as the rest of the mushroom; it need not be peeled off. If you are redoing your kitchen, consider the advantage of having one wooden counter top suitable for cutting. This saves getting out and putting away a separate cutting and chopping board.

Plan your home garden with freezing in mind, and pick vegetable varieties that freeze well, says O. B. Combs, University of Wisconsin horticulturist.

**County Oil Men
 Elect Officers**

Meeting in West Bend, members
 of the Washington County Petrol-
 eum Industries committee last Fri-
 day night elected officers and en-
 dorsed a six-point program of ob-
 jectives for 1952-1953.

The principles set forth in this
 program of oil men from all levels
 of the industry—service station op-
 erators, dealers, garagemen, and
 jobbers—are:

- (1) To protect road funds by an amendment to the Wisconsin constitution prohibiting the diversion of automotive tax money to non-highway purposes;
- (2) To advocate fair taxation of motor fuel;
- (3) To reduce the oil inspection fees which now exceed the cost of inspection;
- (4) To work for safety on the high-ways;
- (5) To safeguard private enter-prise on the highways by retain- ing the legislation prohibiting state ownership of service stations on controlled-access highways; and
- (6) To advocate repeal of federal excise taxes on gasoline and lubri- cating oils.

Milton Becker of Shell Oil Co., West Bend, was elected chairman of the group. Other officers named were: Lavern Schaezel, Texas, Germantown, vice chairman; Jerry Schloemer, Texas, West Bend, sec- retary; public relations committee: Leo Rohlinger, Sinclair, Kewaskum, chairman; Joe Gundrum, Shell,

Slinger; H. A. Hammer, Standard, West Bend; W. D. Reichert, Shell, Hartford. Legislative committee: Cal Hortief, Sinclair, Allenton, chairman; Doc Hodgson, Continen- tal, Hartford; C. E. Winn, Deep Rock, West Bend. Local affairs committee: E. E. Kurth, Standard, Hartford, chairman; Arnold Mar- tin, Shell, Kewaskum.

A most interesting color film en- titled, "Pipeline on Wheels" was presented by F. M. Elliott, execu- tive secretary of the state Petrol- eum Industries committee. The film illustrated the care and safety with which petroleum products are han- dled.

Following a discussion of the av- ailability of highway funds in the future, the members adopted a re- solution calling attention to the heavy burden of taxes borne by motor vehicle operators and oppos- ing any increase in the state gaso- line tax rate.

**An Open Letter
 to Teen-Agers:**
 School is out! You're all busy with a million
 plans! Most likely these plans of yours involve
 some telephoning. Now we know that every time
 the telephone is busy, a teen-ager isn't using it.
 But, in summer especially, if a telephone gives
 a busy signal in a teen-ager's home, someone's
 sure to say: "Those kids are always on the phone!"
 So if you'll just be careful about sharing the
 line—teens and everyone else will have better
 telephone service.
