

Legion, Woman's Club Entertain Wood Vets at Lake

A busload of 37 veterans from the Domiciliary at Wood, Wis. was entertained at an all-day picnic at Mauthe lake, Thursday, Aug. 21, by the Kewaskum American Legion, Legion Auxiliary and Kewaskum Woman's club.

The Kewaskum Woman's club, headed by Chairman Mrs. Carl F. Schaefer, served dinner in the Mauthe lake shelter. She was assisted by Mrs. Henry Rosenheimer, Mrs. Clyde Smith, Mrs. Albert Hron, Jr., Miss Louise Martin, Mrs. L. N. Peterson, Mrs. E. E. Miller and Mrs. Augusta Clark.

The afternoon's entertainment was in charge of Miss Elsie Bruhn and Carl Schaefer. Ten door prizes were awarded at the noon luncheon, which were contributed entirely by Kewaskum merchants.

The American Legion not only furnished boats, but manned them to take the veterans for boat rides and fishing. Playing cards, soda and a radio also came from the Legion.

The Legion Auxiliary served the potato salad and weiner lunch in the evening. Mrs. Ralph Marx, chairman, was assisted by Mrs. Fred Miller, Mrs. Wayland Tassar, Mrs. Clayton Stautz, Mrs. Joe Miller, Mrs. Reinders, Mrs. Elwyn Romaine and Mrs. Carroll Haug.

The picnic was termed a huge success by the men who came from Wood. Some of them hadn't fished for 27 years, according to Legionnaires who took them out on the water.

The food and chartered Greyhound bus were arranged and paid for by the local Red Cross chapter.

CUBS HOLD SUMMER DAY CAMP AT MAUTHE LAKE

Cub Scouts of Campbellsport and Kewaskum met jointly at Mauthe lake for the annual summer day camp. Campbellsport was represented by 14 Cubs and Kewaskum by six.

EBERLE'S BEAGLES WIN AT BADGER FIELD TRIAL

Joe Eberle's beagles were winners at the Badger club field trial held at Burlington, Wis. last Thursday through Sunday. Joe attended the trial on Friday.

MIDGET BOWLING MEETING

There will be a meeting of the Women's Midget Bowling league at Smoley's tavern, Kewaskum, on Thursday, Sept. 4, starting at 8 p. m.

Baptism of Twin Sons, Other Infants Sunday

The twin sons of Mr. and Mrs. Allen Reinold were baptized by a Capuchin father in Holy Trinity church Sunday. John Reinold and Joseph Gilbert were the names chosen.

Guests entertained for the occasion were Mrs. Catherine Boegel, Adalbert Boegel, Mr. and Mrs. Ray Boegel and son, Mr. and Mrs. Reinold, Mr. and Mrs. George Reindl and family and Miss Frances Schrauth.

The little son of Mr. and Mrs. John McElhattan, Kewaskum, was also baptized Sunday in Holy Trinity parish. He received the name John Edward.

Mr. and Mrs. George Eggert, Jr., Kewaskum, had their infant daughter baptized Sunday in St. Lucia's church by the Rev. Gerhard Kaniess.

Jurors Drawn for Fall Term of Circuit Court

The names of jurors drawn for the September term of circuit court were released to the Statesman last week by Lawrence P. Berend, clerk of circuit court.

Mrs. Cornelius Gundrum and Ted Moser, town of Adelson; Mrs. Helen Hausman, town of Barton; Barbara Hohenstein, village of Barton; Mrs. Herbert Hiller, town of Farmington; Harvey Klumb, Paul Kannenberg, George Hauser and Ray Hildebrand, town of Germantown; Mrs. Clara Hauschel, Robert Frank and Gene Wittenberger, city of Hartford; Mrs. Herbert Indermuehle and Lee Brown, town of Hartford; Mrs. Selma Schmabu and Reinhold Heckendorf, town of Jackson; Mrs. Mildred Rheingans, village of Jackson; James Ryan, town of Kewaskum.

Two persons were injured when trucks driven by Joseph G. Lenz, Kewaskum, and Elroy Glass, Campbellsport, collided a mile north of the Washington county line at 10:15 a. m. Sunday.

TWO PERSONS INJURED WHEN TRUCKS COLLIDE

Work on a new concrete church steps in front of Holy Trinity parish was completed last Friday by Louis Bunkelman & Son, Kewaskum contractors, and crew.

FINISH NEW CHURCH STEPS AT HOLY TRINITY PARISH

The firm of Regal Ware, Inc. of Kewaskum entertained their employees and their families and friends at the company's annual picnic in the village park last Saturday afternoon.

PICNIC FOR REGAL WARE EMPLOYEES, FAMILIES

Mr. and Mrs. Harold Bunkelman and son returned from Greeley, Colo., where the former attended summer school. They are visiting their parents, the Wm. Bunkelman and Erich Jeske.

Chev Errors Give Slinger 4-0 Win

LAND & LAKES STANDINGS (Northern Division)

Table with columns: Team, Won, Lost. Includes Granville, Mequon, Kewaskum, Slinger, Newburg, West Bend, Germantown, Saukville, Cedarburg.

Final games this Sunday—Kewaskum 0; Granville 7, West Bend 2; Grafton 4, Cedarburg 2; Mequon 3, Germantown 3.

Fine shutout pitching by Ray Held and costly Kewaskum errors gave Slinger a 4-0 win over the Chevrolets at Slinger Sunday.

Slinger scored two markers in the second inning on two errors and two hits. They salted away the victory in the fifth frame with two more scores which resulted from an error, walk, three stolen bases and another error.

Kewaskum's crippled team did the best they could. Besides being minus the services of catcher Dick Edwards, who has not been with the team since leaving for ROTC training camp, and Augie Bilgo, injured first baseman, third baseman "Pete" Petermann was also out of the lineup at Slinger.

Held did a masterful performance on the mound. Along with his four-hitter, he struck out nine Kewaskum batters and did not walk a single man. Honeck, in his five-hitter, fanned four and passed two.

Final games of the season will be played this Sunday with Kewaskum traveling to Germantown. However, the Chev's still have a postponed game at Grafton to make up. It has not been decided whether this tilt will be played or not.

Table with columns: Team, AB, R, H, E. Lists players like J. Miller, C. Stautz, W. Prost, E. Dekker, J. Stautz, N. Held, D. Lutz, A. Duenkel, K. Honeck.

SLINGER

Two base hit—N. Held. Double play—J. Stautz to Prost to Miller. Left—Slinger 3, Kewaskum 5. Passed ball—Dekker. Umpires—Potter and Potter.

BIRTH

KNICKEL—A son, Steven Craig, to Mr. and Mrs. Bruce Knickel, Campbellsport, at St. Agnes hospital, Fond du Lac, Monday, Aug. 25. Mr. Knickel is a grandson of Mrs. Elisabeth Schaefer of Kewaskum.

Public Schools to Open Tuesday, Sept. 2; 8 New Teachers

Complete Staff of Instructors Numbers 18; Record Freshman Class of Pupils

The Kewaskum Public schools will open on Tuesday, September 2, at 8:45 o'clock with the following staff of teachers:

Grades 1 and 2—Winifred Gerner, Grades 3 and 4—LaVerne Hron. Grades 5 and 6—Betty Jane Koepke. Grades 7 and 8—Donald Teclaw.

Grades 9 and 10—Margaret Browne. Grades 11 and 12—Virginia Krauss. High School Teachers: Madeline Austin—English, History.

Miss Austin, Mrs. Dunne, Miss Krauss, Mr. Meister, Mr. Royal, and Mrs. Teclaw are the new teachers who have been employed to replace Gertrude Baker and Howard Hess respectively.

Schools attended: Donald Teclaw and Herbert Royal attended Milwaukee State, Peter Ayer, Beloit college, while Madeline Austin, Daniel Scheid and Clifford Rose attended the University of Wisconsin.

Word recently received from the State Superintendent of Public Instruction, George Watson, states that the public schools of Kewaskum have again been classified as integrated.

Children whose birthdays fall prior to the first of December will be admitted to the four year old, morning kindergarten, five year old, afternoon kindergarten, and the first grade.

Children who were born during the days of the fair and according to reports did a very fine job.

The entire staff of grade and high school teachers met for three days, Aug. 27 to 29 inclusive, in a workshop session. During the session teachers considered local policies and practices, teaching techniques at the different levels, programs, uses of audio-visual materials, curricular offerings and the co-curricular program.

At 12:30 Friday all teachers reported to West Bend where they submitted to chest x-ray examinations.

Wm. A. Schultz Dies at New Fane Home

William A. Schultz, 63, of New Fane, a retired farmer, died Monday, Aug. 25, at his residence. He had been ill six weeks.

Four children, Harvey, Marie, Verdon and Bernice, preceded him in death. Harvey lost his life in World War II on the battlefield while fighting for the U.S.A.

Services were held Thursday at 2 p. m. from Miller's funeral home, Kewaskum. The Rev. B. W. Friesenbergh presiding. Burial was in the Rosewood Union cemetery.

TEACHERS IN SUMMER SCHOOLS

The following teachers were in attendance in summer school sessions working on advanced degrees or taking work that will benefit them in the local teaching situation.

Word recently received from the State Superintendent of Public Instruction, George Watson, states that the public schools of Kewaskum have again been classified as integrated.

SCHEID YOUTH SUPERVISOR AT STATE FAIR

Daniel Scheid, agriculture instructor in the Kewaskum High school, was in charge of all hosts and hostesses in the youth building at the 1952 State Fair.

There will be no window service at the post office on Sept. 1, Labor day. Only one mail will be received and that is on Tr. 217 due at 5:00 a. m.

NO WINDOW SERVICE AT POST OFFICE LABOR DAY

There will be no window service at the post office on Sept. 1, Labor day. Only one mail will be received and that is on Tr. 217 due at 5:00 a. m.

TEACHERS ATTEND WORK SHOP, VISIT PLANTS

The entire staff of grade and high school teachers met for three days, Aug. 27 to 29 inclusive, in a workshop session. During the session teachers considered local policies and practices, teaching techniques at the different levels, programs, uses of audio-visual materials, curricular offerings and the co-curricular program.

Family Reunion for Mrs. Kern on 93rd Birthday

A family reunion in honor of one of Kewaskum's oldest residents, Mrs. Katherine Kern, to celebrate her 93rd birthday, was held Sunday, Aug. 24, in the village park.

Present were Miss Theresa, Kern, Kewaskum; Miss Eleanor Kern, St. Kilian; Mr. and Mrs. John Kern, Barton; Mr. and Mrs. Joe Kern, St. Kilian; Mr. and Mrs. Reuben Schuckart, Oshkosh; Mrs. Mary Reuter, Milwaukee; Mrs. Bertha Strobel, Plymouth, and Mrs. Clara Kohler, Kewaskum.

Mrs. Kern has 27 grandchildren and 41 great-grandchildren. A delicious lunch and refreshments were served in the park and Mrs. Kern received many gifts.

Holy Trinity School to Open Sept. 3; Expect New High Enrollment of 195

Holy Trinity Parochial school will open Wednesday morning, Sept. 3, for the 1952-53 term. A record number of 195 pupils is expected to attend.

Classes will be taught by a staff of four school sisters. They are Sr. Maurita, Sr. Rose, Sr. Marie and Sr. Janet. Sr. Marie and Janet are returning teachers from last year.

MAASKE ANNOUNCES SALE OF TWO PROPERTIES HERE

Harry H. Maaske, real estate broker, has sold the Ernest Ramthun house and property on North Fond du Lac ave. to Warren Moritz of Kohlsville.

He has also sold the Clarence Buntjer four-room bungalow cottage in the Rosenheimer addition to Charles Schmitz. Mr. and Mrs. Schmitz, who at present reside in the trailer camp on South Fond du Lac ave., and their daughter expect to move into the home about Oct. 1.

WA-FON-DO BOWLING LOOP TO START TUESDAY, SEPT. 2

The Wa-Fon-Do Bowling league held its meeting at King Pin alleys. The following teams have entered: Wallenfels Elec., Heimermann Truckers, Regal Ware, Inc., Comfort Heating, Bank of Kewaskum, Regal Top Flights, Luckow Elec. and one other team.

TEACHERS ATTEND WORK SHOP, VISIT PLANTS

The entire staff of grade and high school teachers met for three days, Aug. 27 to 29 inclusive, in a workshop session. During the session teachers considered local policies and practices, teaching techniques at the different levels, programs, uses of audio-visual materials, curricular offerings and the co-curricular program.

MOVE TO VILLAGE HOME

Mrs. Violet Gritzmacher and Hilbert Gritzmacher, who sold their farm at Wayne recently, moved last Thursday into their home on West Water st. in Kewaskum which they purchased from Roger Bilgo a few weeks ago.

H. Maaske, Real Estate Broker, Leaves Village

Harry H. Maaske, real estate broker, who has been in business in Kewaskum for the past six and one-half years, on Thursday of this week moved his real estate offices to the former Herman Matthews Shop located four and one-half miles south of West Bend on Hwy. 55, which he purchased and remodeled.

Maaske recently sold the Maaske Building Service to Alton Kohl, who had been in the building business with him. With this transaction Kohl leased Maaske's new building on North Fond du Lac ave. occupied by Lenora's Lunch. Dr. J. L. Raschbacher's offices, Kohl's building business, now known as the Long Kohl Company, and Maaske's real estate offices up to the present time, Kohl also leased Maaske's home adjoining the building and he and Mrs. Kohl will move into the house on Sunday from West Bend.

Maaske's new offices are located on Route 1, Jackson. His phone number there is Jackson 14. He will be in his former offices in Kewaskum every Tuesday and Friday night for the convenience of his local associates. Maaske's real estate business here will be in charge of William Tockman with headquarters at his home on Main st. He can be contacted there for any business.

K-M HOMEMAKERS FIRST AT FOND DU LAC FAIR

The Kettle Moraine Homemakers club received a blue ribbon for their homemakers booth at the Fond du Lac county fair. The topic on which the booth was based was 'Lamp Shades Made at Home.'

WIN PRIZES AT LEGION AUXILIARY CARD PARTY

The American Legion Auxiliary held the last of the two dessert card parties Tuesday evening, Aug. 25. A lovely dessert was served, under the chairmanship of Mrs. Fred Miller, followed by an evening of canasta, five hundred, sheephead and bridge.

HOSPITAL NEWS

Mrs. William Becker, Kewaskum, submitted to an emergency appendectomy on Monday evening, Aug. 25, at St. Joseph's hospital, West Bend.

The Rev. F. C. La Buwl, Kewaskum, who underwent a major operation at St. Joseph's hospital recently, transferred to Sacred Heart sanatorium, Milwaukee, on Sunday for additional rest.

**Behind The Scenes  
In American Business**  
By Reynolds Knight

NEW YORK—Don't expect the ending of the steel strike to bring an immediate pick-up in business. It will take a long time for the nation to catch up. There will be shortages of some civilian products, notably appliances, this fall and possibly into the winter. This may stimulate some of that "scare buying" of the type that accompanied previous periods of scarcity.

Retailers and certain wholesalers have been living on their inventories recently. Inventories of most appliances were abundant to start with, but they are running down now, and there will be some delayed-action scarcities. The fundamental sinews of trade—money supply—are still strong. Recent U. S. Treasury financing was heavily oversubscribed. Savings are at record highs. The stock market has been creeping up toward new highs, without fanfare. These things do not spell recession as yet.

**THREE-WAY**—Increasingly popular year-round home air conditioning recently got another boost with the introduction of an oil-fired unit by Servel, Inc., that should greatly widen the air conditioning market. With the oil-fired model, Servel becomes the first company offering "all three"—gas, steam and oil-operated types. So a homeowner now can pick the model which will save him most in fuel costs—an important sales factor.

Oil supply companies will be quite interested in the new air conditioner. For, as John A. Gilbreath, head of the firm's air conditioning division, points out: "Dealers normally have a bad summer-load factor with a terrific 'valley' in demand. Sales of oil-operated air conditioners in their territories will obviously mean steadier oil sales through the summer months when their trucks, personnel and facilities otherwise would be idle."

Like its sister All Year air conditioners, Servel's dual purpose oil-fired model will, at the flip of a switch, heat or cool, balance the humidity and filter and circulate the air.

**THING TO COME**—A new screen enamel which won't clog wire mesh and offers weather and rust protection. . . . Fireproof wall paneling, with a layer of aluminum between two layers of plastic. . . . A "spot-welding" device for securing plywood paneling employs high frequency radio energy to set the glue. According to the maker the "spot-welder," when used with quarter-inch plywood, gives results comparable to what previously was possible only with three-quarter-inch plywood. . . . Fire-resistant bulk filler for use in sleeping bags, mattresses and upholstery. . . . Snag-proof zippers which release threads and cloth by simply pressing the tab.

**DANGEROUS FUTURE**—The physical and psychological dangers the individual American will face in the future worry a great many people, but few are giving that aspect of the future as much thought as the executives of the nation's mutual fire and casualty insurance companies. After all, protection against risks is the reason the insurance business exists.

An effort to appraise the dangers we will face will be the core of the program of the 200th Anniversary of Mutual Insurance of America, scheduled for the week of October 12 in Philadelphia.

Executives now are studying the risks which will arise in the next few decades out of such diverse developments as: the growth of organized crime, advances in medicine, wider use of atomic energy, replacement of workers by electronic machines, shifts in population from country to city and from one section of the nation to another, changes in family life and in the status of women, new uses of psychological techniques and political and economic changes.

The modification of insurance protection in the light of these changes is extremely important and one of the principal problems facing the mutual insurance business.

**PROFESSIONALS**—The advantage of being in a profession is sometimes dubious, what with the expense of training, high operating costs and long, inconvenient working hours. But there are advantages, too. For instance, the Department of Commerce notes that doctors, on the average, earned \$12,518 in 1951, \$980 more than in 1950. Lawyers averaged \$9,375, up \$303 while dentists averaged \$7,743, up \$450.

The worries that go with being in business for yourself sometimes pay off. Doctors working for themselves netted \$3,856 more than their salaried professional brothers. Salaried lawyers made \$1,261 more than independent lawyers.

What people think is not always what they say.

**GNESI'S FLYING SAUCER**—During the past year villagers of Putignano, Italy, have seen a disc zooming over their rooftops, but they're not alarmed. They know that it's not an invasion from outer space but a 30-inch working model of a flying saucer designed by Piero Gnesi. In photo at left inventor Gnesi looks on while builder Piero Agostini, right, puts finishing touches on the 21-ounce model. In photo at right the flying disc, powered by a special gasoline motor, soars through the air at 87 mph. Gnesi, 33, thinks he can build a jet-powered disc nine feet in diameter.

**RARE AND UNUSUAL  
FAMILY REUNIONS**

For the first time in 44 years Mrs. Mary Lee White, San Francisco, visited with her aunt, Mrs. R. B. Hawley, at Brainerd. . . . Fifty-nine years and an ocean were conquered when Mrs. Hanna Jeppson flew from Stockholm, Sweden, for a long visit with her sister Mrs. Swan Hobert, near Slayton. . . . Never before until mid-July this year had the seven surviving Miller sisters of Duluth been together; the oldest, 80, came from California, others from South Dakota, Illinois, Michigan, for a reunion at the home of the youngest, Mrs. Esther Hayes, Duluth.

**One Way**

Pointing to the lessons of history is one way for a debtor to prove any point he may have in mind.—Boston Globe.

United States arms production is seven times as great as before the Korean invasion and output has reached two-thirds the planned peak, a survey showed.

**Planning Defined**  
Planning has been defined as putting off until tomorrow what you have no intention of doing today.

"Flying Van," larger than "Flying Boxcar," gets tests.

**Be Sensible If  
Polio Should Strike**

If polio strikes your home, it is as important to have healthy mental attitudes toward it, as it is to take advantage of modern medical care, states a bulletin from the state medical association.

One of the main things to remember, is to try to avoid panic. Avoid that first impulse to pack the entire family off away from the disease. It will only cause more anxiety in the children, and will put you and them farther away from competent medical care. The hazards of hurried travel and change of food, water and regular routine only add to the feeling of insecurity.

Learn to rely on authoritative health officers for information regarding what to do. Don't spread unsound rumors about the disease, its incidence or seriousness. Your own attitude is the thing that is most important to your child. Make every effort to answer questions honestly and with assurance. Explain that children do sometimes have polio, just as they have measles or chicken pox. Preparing the child for hospitalization should be as natural as preparing him for a visit to the family doctor.

Keep your child in the circle of family and neighborhood playmates. Avoid close association with others. Avoid fatigue and sudden chilling. Wash hands carefully before eating and always after using the toilet. Do not put unclean objects in the mouth. Keep food clean.

Watch for signs of illness, put the patient to bed away from others and call your doctor immediately. Try not to make an issue of enforcing precautions. Use tact to avoid anxiety.

Learn all the facts about polio that are available. You may be able to stem the tide of panic by being able to explain the vital statistics and aiding in the use of common sense. Give your family the emotional security against a possible polio panic.

MRS. J. O.: Can a child or adult drink too much milk? Would it tax the kidneys or add too much calcium or phosphorus? ANSWER: Although this is rare, it is possible. In children it may crowd other needed items from the diet. Most excess calcium is excreted. Whether the increased fluid would be harmful should be decided by the family doctor, because individuals vary.

Dwight D. Eisenhower

Adlai E. Stevenson

**WINNING SMILES**—Besides being interested spectators to what promises to be one of the most intelligent, non-mudslinging presidential contests in many a moon, American voters this year will be treated to the infectious smiles of the Republican and Democratic candidates. Long noted for his easy grin, 61-year-old Gen. Dwight Eisenhower, the Republican nominee, will have a tough race in the "ear-to-ear" department as the above picture of 52-year-old Gov. Adlai Stevenson indicates.

**GOOD HEALTH**

**Answer to Question No. 1:**  
Estimated losses from fatal and non-fatal accidents in 1951 were \$8 billion, including wage losses, medical expenses, insurance costs, production delays, damage to equipment and property. Accidents killed 93,000 people in the United States during the year and injured more than 9 million others. One out of every seventeen persons in the country suffered a disabling injury during the year. Automobile accidents killed 37,500, the highest toll in ten years. Home accidents took 27,000 lives and occupational mishaps caused 18,000 deaths. This should be a warning to all of us. Be careful!

**Answer to Question No. 2:**  
The average life expectancy of industrial workers in the United States today is more than 68 years. This represents a sharp increase over the average life span of industrial workers early in this century when it was only 47 years. It reflects, among other things, the wide expansion of medical knowledge, the defeat of many diseases, advances in sanitary practices, improved diet, and better working conditions.

**Answer to Question No. 3:**  
Bursitis is one of the most common, most discomforting and least understood of ordinary human afflictions. It commonly involves the bursa (sac with fluid over a joint) over the shoulder. Bursitis usually comes from an injury or an infection and frequently can be treated by simple means under the direction of your family doctor. If it does not readily yield to this treatment, the physician may withdraw the fluid or give X-ray treatment, or apply a restraining brace. Surgery is rarely needed.  
(Copyright 1952 by Health Information Foundation)

**THIS'LL KILL YA**

**Bible Comment:**

**We Hold Wealth But It Is Subject to Will of Our Creator**

ON a smaller scale and in a more primitive way, the Israelites of old were confronted with all the problems of character and conduct and their effect upon relationships in society, that vex and perplex the more highly organized nations of today. It is this that makes ancient wisdom of so much value for modern life.

Next to the problem of the abolition of war and the establishment of peace, and by no means unassociated with that deeper problem, are the problems of labor—keeping people working under fair conditions and with good living standards—and of wealth—keeping the power of great wealth under control in relation to the rights and interests of all.

So many problems in these spheres remain unsolved that we are apt to fail to realize the great progress, both in relation to labor and wealth, that has been made within the memory of many now living.

It is not so long since labor was regarded as a "commodity" to be bought, like any other commodity, in the cheapest market, under a competition for jobs that in times of unemployment was bitterly keen.

Then came the recognition that labor was human, of blood, flesh and spirit, with families housed in homes—or hovels—and the demand for a "living wage" became so insistent that by now reference to a standard of living is a stressed factor in wage negotiations and contracts.

Similar progress has been made in enforcing recognition of the relationships and responsibilities of wealth. In the days when labor was a "commodity," wealth was largely immune from government control and any sense of responsibility. The prevalent conception was that a man's wealth was his own to do with as he pleased.

Today we recognize not only that wealth has social obligations, but that society is a basic factor in the acquisition, protection and maintenance of wealth. From a Christian standpoint the obligations of wealth are more simple and direct. What a Christian has is not his own, but is held in stewardship subject to the will of God. That is the ideal set forth in the New Testament, and the truer the Christian the more nearly he will attain it in the practical use of what he possesses.

**OLD STUFF**

Washington, D. C., July, 1952—By 1970, the American farm, nostalgic centerpiece of song and story, will be about as romantic as a cannery or an insurance office, if the statisticians of the US Department of Agriculture are correct.

There will be 400,000 less farms, a total of a bare five million, and 34 million more people to feed. In the meantime, the rush of farmers and farm workers for town will continue, six million having left in the last four years.

Well, we're not going to starve, they tell us, nor will we have to live on synthetic foods. By 1970, the five million farms will be business institutions, the old-fashioned family-farm merely a tender memory. On these highly-mechanized, precision-operated farms every cow and chicken, pig and sheep will have a production quota to meet, and the mere handful of super-men who will run them will be too busy to go fishing or waste time going to town or reading the mail-order catalog or shooting a deer or a quail in season.

Somehow, 1970 seems a bit soon for all this. It will take a lot of doing to stop the spring-song of the meadow-lark, the enticing siren song of the brook over the stones, to stifle the perfume of fresh-cut hay or the urge to pet a starry-eyed calf, to say nothing of the narcotic delight of just lying on your back in a clover patch and watching the clouds roll by.

**How to Be Safe in the Water**

Y.M.C.A. Rules for Water Safety

**DON'T ATTEMPT A RESCUE IN THE WATER, UNLESS YOU'RE A STRONG SWIMMER, SKILLED IN LIFE-SAVING.**

**WHEN RESCUING SOMEONE, STAY OUT OF WATER, IF POSSIBLE. TRY TO REACH HIM WITH POLE, CLOTHING OR THROW HIM SOMETHING BUOYANT.**

**WHEN ATTEMPTING A RESCUE, ALWAYS HOLD ON TO SOMETHING, IF POSSIBLE.**

**WHEN GETTING INTO (OR HELPING SOMEONE ELSE INTO) A SMALL BOAT, USE STERN OR BOW, NOT SIDES. THEN YOU WON'T CAPSIZE IT.**

**Sports Afield**

By Ted Kesting

Auto-top boats and lightweight boat trailers have been in the boating spotlight the last few years, but they have cast no permanent shadow on collapsible craft. Let's review this type of boat:

**Canvas folding boats:** Folding canoes and rowboat types are canvas except for the framework. Of course, strength in proportion to weight is not great, and regular models are not suggested for waterways filled with stumps. But boating expert Willard Crandall says these boats are much more difficult to puncture under normal conditions than many think. Once afloat they are just as stable and will ride the waves as well as a solid boat the same size and of the same design.

**European-type craft:** These long, low, slim folding craft also are of fabric, with solid framework. Because of the length, narrow beam and light weight, they are highly maneuverable and very fast with paddles. As a result, when an expert has the paddle some pretty rough water can be taken. They are much like a kayak, though often longer and with more decking. It's this decking that keeps water out in waves and makes the low sides practical. In turn, low sides and of course the low sitting position, help offset the lack of stability that goes with any narrow rowboat. Outboard models are wider, particularly at the stern, and so are steadier than the double-ended type.

**Pneumatic boats:** Surplus rubber boats are old now, and generally unavailable. Like a tire, all these fabric-and-rubber craft have a limited life whether used or not. Sportsmen's models (unlike most surplus ones) are generally of synthetic rubber, which means they withstand oil and grease better. These inflatable boats, because they adapt their shape to that of any wave they meet, are remarkably seaworthy. The familiar doughnut type is very slow and sluggish—still this means its seaworthiness is always there. Sportsmen's rubber boats that have the shape of a solid craft act more like a regular boat and are somewhat faster than other rubber craft. As with kayak types, many long-hour fishermen find the low sitting position uncomfortable.

**Other craft:** Sectional rowboats no longer are being manufactured, but plans are available. Sectional canoes, primarily for trips to wilderness by air, are being made in Canada. These generally are made ready for water in less time than most folding craft and of course can be built strong and rugged and are suitable for a small outboard.

**QUESTION:** Can you advise me of a safe, yet easy way to set up an outdoor gym in such a way as to prevent motion of the frame-work when swings are in action?  
—R.A., Erlanger, Kentucky

**ANSWER:** Safest and surest anchorage is concrete. For wood post equipment, set angle iron, drilled for bolt holes, directly in the concrete when poured for anchoring the post later. For pipe supports, set either the pipes themselves, or pipe fittings, into the wet concrete. When fittings are so placed, pipe can be screwed into sockets later. Drop a wad of oiled waste into each fitting to prevent rust.

**QUESTION:** I plan to build a small home of concrete or cinder block. If I waterproof the inside walls would that suffice to keep out dampness? Should I use concrete or cinder block?  
—W.R.M., Cambridge, Md.

**ANSWER:** As long as you're building, it's a better idea to waterproof the outside of the foundation rather than the inside. This prevents water penetration of the foundation before it has a chance to cause trouble. Use concrete block below ground level, cinder block above ground level only.

**QUESTION:** I built my house last Fall and did not stain and varnish the windows due to the windows sweating and soaking the wood sills. The wood is now mildewed and I cannot get this stain off even with sanding. A painter tells me I need a bleach but he does not tell me what to use. Can you?  
—J.C., Clarksville, Pa.

**ANSWER:** Try oxalic acid. It is powerful, so protect eyes and hands while working. Rinse with clear water. Then, since moisture will probably raise the grain slightly, sand paper and when the wood is thoroughly dry, stain and varnish. Other bleaches are household chlorine compounds, trisodium phosphate, ammonia. Handle all carefully, following the above general system.

This column is prepared by the editors of THE FAMILY HANDYMAN MAGAZINE as a service to home-owners. If you have any questions or problems relating to your own home, please address a letter to the editor, THE FAMILY HANDYMAN, 211 East 37th Street, New York, New York, Attention of News Syndicate Editor. If the question has widespread appeal in the opinion of the editors, it will be printed with the answer in this column at a later date. However, we cannot enter into detailed correspondence with everyone. THE FAMILY HANDYMAN is available at newsstands and hardware stores everywhere.

**The Smallest Star**

Dr. William J. Dayton, Professor of Astronomy at the University of Minnesota, and Dr. E. F. Carpenter, director of the Steward Observatory at the University of Arizona, have jointly announced the discovery of the smallest known star.

While the new star is only slightly larger than the moon, it is actually heavier than the sun. It is located about midway between the Big and Little Dog Stars, and is in the class known as white dwarf stars. White dwarf stars are all small, hot, and dense.

Computation by the astronomers indicates that the new star is 40 per cent heavier than the sun, which means that the average material of the star is about 55 million times as dense as water. A handful of this material would weigh several thousand tons on the earth.

Make no plans to visit this star in the future rocketship age, because the temperature on the surface of this white dwarf star is about 15,000 or 20,000 degrees Fahrenheit, and the atmosphere is only a few feet deep.

**NEW MRS. VEEP?**—During a shopping tour at a Washington, D. C., grocery, Mrs. Richard Nixon, wife of the California senator and GOP vice-presidential nominee, pauses to select some cookies for four-year-old daughter, Julie, Nixon, 39, is one of the youngest men ever to hold such a high place on a national ticket.

**ANSWERS TO Intelligence Test**

1—Finland. 2—Governor of New York. 3—Nero. 4—Scott. 5—Polk. 6—Africa. 7—(A) Hare; (B) Grapes; (C) Grasshopper; (D) Manger.

**Fresh New Fashions Beat Early Fall Heat**

BY EDNA MILES

IN the transitional days that lead from summer into early fall, there are many spots of really hot weather. These are the days for which summer's wilted cottons are not quite right. Yet, who wants to don a wool dress or even a crepe, the ad writers notwithstanding?

What a woman really wants on such a day is a dress without clutter, one that washes like a slip and possesses the smartness of complete simplicity.

Such dresses, offering the maximum in wrinkle resistance, are to be had for the shopping. In all-cotton or in mixtures of nylon and cotton, they take little or no ironing. Since upkeep is simple, they're always on hand—fresh and ready to wear.

Stripes lend themselves particularly well to these end-of-the-summer standbys and often are worked in vertical and horizontal combinations.

Aiding the air-conditioned effect created by the sheer fabrics are no sleeves or mere cap sleeves. Colors are clear and sharp—praline, navy, shrimp, blue, charcoal or red used in combination with white.

← An uncluttered dress for late summer is this dacron one-piece that washes as readily as a slip. Navy stripes on white are used horizontally in the skirt, vertically in the blouse. A soft roll collar ties at the back in a neat bow.

→ In 15-denier nylon-and-cotton, this dress is just right for wear from late summer into the warmer days of early fall. It takes a quick washing and little or no ironing. A two-piece design it has a buttoned bodice with a huge bow.

**Test Your Intelligence**

Score 10 points for each correct answer in the first six questions: This year's summer Olympic games were held in:

—Norway —Sweden —Finland —United States  
What elective office did Franklin Roosevelt hold immediately prior to becoming president?

—Governor of New York —Senator from Pennsylvania  
—Congressman from Pennsylvania —Secretary of the Navy  
Who is said to have played a violin while Rome burned?

—Julius Caesar —Nero —Claudius —Antony  
The novel, Rob Roy, was written by:

—Tennyson —Scott —Walpole —Lamb  
Who was president of the U. S. during the Mexican War?

—Harrison —Monroe —Taylor —Polk  
The island of Zanzibar is off the coast of:

—Brazil —Argentina —Italy —Africa  
Listed below, at left, are animal characters from Aesop's Fables. Opposite them are other characters or objects with which they are associated. Match them, scoring 10 points for each correct answer

- |              |               |
|--------------|---------------|
| (A) Tortoise | → Manger      |
| (B) Fox      | → Grasshopper |
| (C) Ant      | → Grapes      |
| (D) Dog      | → Hare        |

Total your points. A score of 0-20 is poor; 30-60, average; 70-80, superior; 90-100, very superior.

**Child Expert Says Overuse of Playpen May Cramp Toddler's Development**

Continuous use of the playpen may be a convenience to Mother, but it is a harmful limitation on a baby's freedom. It makes him irritable, says child expert Irma Simonton Black, and prevents him from learning by exploring and directly experiencing the world about him. Writing in Redbook Magazine for August, she tells you at what points you can safely use a playpen:

"One reason that playpens are so popular is that, while they cut down on Junior's freedom, they give Mother the run of the house. This enables her to concentrate on a tricky recipe or to dash to the door to receive a package without coming back to find her toddler beneath a pile of end tables and bric-a-brac.

"I have seen enough irritated, complaining babies standing and shaking the bars of their tiny cells to be convinced that they do genuinely resent severe limitations on their freedom. They should. Overuse of the playpen quite literally keeps them from attaining the fullest physical and mental development of which they are capable.

"A baby learns the properties of his world by constant touching and tasting. It is largely through such physical experiences that his mind awakens, too. Within the one square yard of the playpen there is not enough variety of experience to keep an alert child busy and happy.

"The playpen does have a respectable but limited place. The few months just before a baby learns to walk may be a time when he is perfectly happy playing in his pen and when he even finds the bars helpful in learning to stand. It is also distinctly useful in domestic crises, when a mother needs a few minutes of complete concentration.

"A brief stay in a playpen may be made more attractive by interesting manipulative toys and by setting it up in the same room in which his mother is working. But the baby who shows he is fed up with captivity should always be let out."

**LITTLE SUZY-O**

Cute, isn't she? Add charm to your lawn or garden with this delightful 24" umbrella trellis. The full sized outline pattern makes it a simple task to complete this clever ornament from thin wood. Complete instructions for assembling are also given. Order your pattern today. C9761, 20c.

Send orders to: Homecraft Service, Journal Pub. Co., Inc., 2500 Buchanan, Kansas City 16, Mo.

Watching those fellows play reminds me that golf is a lot like taxes—you drive hard to get to the green and then wind up in the hole.

Dub (to caddie): "Well, what do you think of my game?"  
Caddie: "I guess it's all right, but I still like golf better."

**Improve Forage To Lower Costs Says Economist**

"I'd sure like to cut down costs on my farm!"  
You've heard these words lately? Probably so, because farmers are paying more out of their pockets these days to keep production going.

Ike Hall, Farm Management Specialist at the University of Wisconsin, points to one big cost item, he thinks can be pared down. That is purchased feed—the highest single item of expense on most Wisconsin farms.

Hall believes farmers can make better use of high quality home grown feeds, especially pasture and other roughage. These can be the backbone of bumper milk production.

Here's how Hall thinks forage production can be improved.

He recommends growing crops best adapted to the soil. Much of our Wisconsin soil can use several tons of limestone and several hundred pounds of commercial fertilizer to supplement stable manure.

Use crop rotations that will give good pasture and legume hay. Use plenty of grass for silage when it's difficult to make good quality field cured hay.

Renovate and re-seed permanent pastures for bigger yields. And, he continues, feed all milk cows plenty of high quality roughage—whether it be pasture, hay, or silage. Don't feed grain to the boarders. Feed grain according to individual production, he explains.

If possible, graze pastures in rotation. Fence off several pastures so cows will have young growing grass all through summer. Milk production will drop on old, mature pastures. Then to maintain milk production you need more of that expensive grain.

Finally, he says it will definitely pay to follow this program for the milk cows. Because dairying now looks better than most other farm enterprises in this area.

Prime Minister Churchill has revised the duties of some Cabinet members, giving new responsibilities to Foreign Secretary Eden.

**Aim For Greater Fall Chick Production**

The total number of eggs produced by a layer does not always determine its value to the poultry-raiser. The time of production, or the period during the year when the layer is at its highest point of production, frequently determines the amount of profit earned by a bird. For example, eggs laid in November may be worth 50 per cent more than eggs laid in April or May.

March to June is the period of lowest egg prices, according to a study of a trend in the average monthly farm prices. There is a slight increase in June, with a more decided increase beginning in July. November is the month of highest egg prices, and profits usually go up accordingly. Furthermore, if there is good egg production in fall and winter, the average price per dozen for the year is increased.

**Production Control**

With these conditions prevailing, it becomes evident that the most desirable time to have birds in top production is during the fall months. As a poultry-raiser, it is important for you to realize this trend—and realize that it takes fewer eggs from October to January to pay for a given quantity of feed than during any other period of the year. The greater the egg production during fall and winter the greater the profits!

The important point for the poultry-raiser to keep in mind is this: although the poultryman can't control the prices of grain or eggs from season to season, he can control production—at least to a considerable extent.

**Grading Important**

All this illustrates that efficient methods of production alone do not necessarily bring in the highest net returns from a farm flock. To earn the greatest profits, a poultryman must be able to market his poultry and eggs to the best advantage.

Egg grading offers the raiser another means of increasing egg profits. When small and poor quality eggs are marketed with the good ones the result is lower prices for all the eggs. Careful attention to the size and quality of the eggs will increase the average price per dozen.

The only difference between stumbling blocks and stepping stones is the way you use them.

EDITOR THE MILWAUKEE JOURNAL WOMAN'S PAGES

All that glitters may not be gold in your summer jewelry collection, so you better give some thought to how you will keep your "gems" glistening and gleaming.

Fortunately, soap and water will go a long way in jewelry grooming, says Betty Ann, Editor of The Milwaukee Journal Women's pages. Start out with warm soapsuds, and avoid extreme water temperatures that may crack real or synthetic stones. Have a soft bristled brush handy. Spread a thick towel on the wash basin edge to keep the jewelry from slipping off to the floor or cracking against the porcelain surface.

Check the settings to find out whether the jewelry can be plunged right in the suds. Stones held by prongs, for example, present no washing problem. For pieces that are cemented in place, however, you'll want to use the soft brush dipped in warm soapsuds. Rinse by brushing with clear water. Absorb moisture immediately with a bit of tissue.

Use the soapy brush on bib necklaces and on all porcelain jewelry. Even minute specks of dust show on pure white porcelain, so keep this type of costume jewelry spanking clean at all times.

Real or simulated pearls, especially the pastel toned ones, should be swished through the soapsuds. Hold the necklace by the clasp. For soiled knots between pearls, lay the necklace on a towel and scrub the knots gently with the soaped up soft brush. Dip the necklace in warm rinsing water and pat in a towel. Then, pin it to a towel to dry. The pins should go through the clasp halves and serve to hold the necklace taut.

Diamonds are sturdy enough to take hotter suds and rinses and can then be dipped in alcohol and left to dry. Pick a safe spot, of course.

Don't leave your jewelry grooming until your favorite piece has become dulled with dust and perspiration. Complement your crisp nylons and cottons with a "sparkle" of cleanliness.

Between paint jobs, if you are sure you'll be painting again in a few days, don't bother to clean your brush. Just wrap the bristles in kitchen aluminum foil and they will stay soft for several days. If you postpone painting for a week or more, soak brush in "keeping" mixture of two-thirds raw linseed oil and one-third turpentine—wrap in newspaper to prevent kinking.

**Golden Slaw**

For a slaw that's supreme try golden slaw. Choose your cabbage carefully, make sure it's tender and of palest green. Shred it, then toss it lightly with finely chopped eggs, a touch of mustard, a sprinkling of cider vinegar, some salad dressing and chopped sweet pickle. The egg gives the salad a golden glow, the pickle adds additional crunchiness.

The recipe calls for four hard cooked eggs, finely chopped, three-fourths teaspoon sugar, three-fourths teaspoon salt, two teaspoons prepared mustard, two teaspoons apple cider vinegar, one-fourth cup salad dressing, two cups shredded cabbage and one-third cup chopped sweet pickles. Combine all ingredients tossing lightly. Chill. Serve on beds of lettuce garnished with chopped parsley.

**Fruity Frosteds**

Here's the recipe for fruity frosteds. Mix three to four tablespoons fruit flavored gelatin sirup with a cup of milk and a scoop of ice cream in a tall glass. Stir to blend and partly melt ice cream. To make the syrup, just dissolve one package fruit flavored gelatin (any flavor) in one cup hot water. Add one-half cup cold water. It makes about one and one-half cup syrup or six to eight servings. The syrup may be stored in the refrigerator if not all used at once. Heat gently until melted then cool before making additional drinks.

Orange shrub is a frosty drink which takes only a minute to make. Add one pint orange sherbet or ice to one and one-half quarts milk. Beat with rotary beater until blended. Pour into tall glasses. Float a spoonful of sherbet or ice on top. Or for a festive touch, hook sherbet on the edge of the glass. For a special occasion garnish with sprigs of crystallized mint leaves and a maraschino cherry. Yield: Six servings.

**GONE SWIMMIN'**—Humphrey comes up from a plunge in his private swimming pool at San Francisco's Fleishacker zoo to tell us that he may not look too bright but at least he has enough sense to stay in the water during this kind of weather. If the truth be known, Humphrey, like most of us, would appreciate a cake of ice to sit on.

**DOGGONE STRONG**—Amazing Frankfurt, Germany night club boers with his strength, a Hungarian shepherd dog balances his 12-year-old master, Hansi, on his head. The dress worn by the small-but-mighty pooch seems to accentuate his strength.

## U.N. Secretary-General Tours Europe

During a recent tour of Europe, U.N. Secretary-General Trygve Lie visited England, Belgium and Austria where he made addresses before several organizations and at the University of Louvain. At Brussels he attended a luncheon given by the Belgian United Nations Association. Seen here at the luncheon are, from left to right: the President of the High Court of Justice of Belgium; Mr. Van Cauwelaert, President of the Belgian House of Representatives; Mr. Lie; Pierre Wigny, President of the Association, delivering an address and Paul Van Zeeland, the Foreign Minister.

## Grade A Label Is Important To Health

That Grade A label on the milk in your refrigerator tells a story that's important to your health. The story begins on many dairy farms. There healthy herds of cows are kept in clean barns and healthy handlers use sanitary practices in caring for the milk. Milk houses are approved for construction and are kept spotlessly clean. Improved methods of handling and processing safeguard not only your health but also the health of the farmer and his family.

Special care continues in the processing plants where skilled operators and employees use modern equipment. There proper pasteurization as an additional safeguard destroys all disease producing bacteria. Proper bottling or packaging keeps the milk safe until it's delivered to your door or you buy it at your grocers.

All these safeguards are the result of careful planning, education, and constant supervision.

The Grade A label means that the milk has met minimum standards adopted jointly by the state department of agriculture and the state board of health. Under these standards the Grade A label means the same thing in all parts of the state.

Sanitarians from official agencies regularly inspect farms and processing plants from which the milk comes. Laboratory tests are used to determine whether or not quality and safety standards are being met. Other tests are made to assure against possible recontamination through improper handling.

The state board of health in cooperation with the state department of agriculture conducts regular surveys of Grade A supplies to determine if the minimum requirements for Grade A have been met, and the health of the consumers protected.

When you pick up your milk at the doorstep or at the grocery store, the Grade A label is assurance of quality and safety.

Forest disease specialists at the University of Wisconsin have shed new light on why oak wilt disease kills trees. Water-carrying vessels of wilt infected trees become plugged. When plugging occurs, the leaves wilt and the trees die.

## Motherly Cats

Lapeer, Mich.—Local cats apparently believe in the good neighbor policy. A Siamese cat, owned by Mrs. S. R. Grant, is mothering a litter of orphaned rabbits, while at nearby Atlas, a cat owned by Mr. and Mrs. Fred Koen is rearing four orphaned beagle pups.

## Mouse Bites Cat

Irwin Idaho — Attempting to catch a mouse, a big white tomcat, belonging to George Clark, had the strange experience of having the rodent leap up and bite him on the neck. The astonished cat shook the mouse and fled down the street.

## DOUBLE TALK

A proud parent called up the newspaper and reported the birth of twins. The girl at the news desk didn't quite catch the message over the phone. "Will you repeat that?" she asked. "Not if I can help it," was the reply.

## Finds 1791 Coin

Tupelo, Miss.—While digging for fishing worms, Thomas Barnes turned up a Dutch coin, minted in Utrecht in 1791.

## GETS 14TH DIVORCE

Seattle, Wash. — After getting his fourteenth divorce, James E. Daniels, 29-year-old trucking operator, said, "never again," but court attendants say he didn't sound too positive. Nine of 14 wives were brunettes, two blondes and three redheads. His first marriage was at 18.

Distrust communism, not fear it, Mrs. Roosevelt urges.

## TOO TRUSTFUL

Bristol, England — Roderick Downs, 2, accustomed to his family's Alsatian dogs, thrust his hand through the bars to pat the wolves in a cage at the zoo. One of the wolves snapped off the tip of one of the child's fingers.

## KERRY DRAKE

## MARY WORTH'S FAMILY

## STRICTLY FRESH

A CALIFORNIA judge ordered that 50 bottles of liquor, held as evidence since 1925, be poured down the drain. At least it means a few more "cases" off the docket.

The word from Moscow is that six government ministries missed their production goals for the second quarter of 1952. Translated from the Russian this means six government ministers will lose their heads in the third quarter of 1952.

Judging from the number of men wearing suits to the office, a

few more summers like this should bring out the topcoats.

A Hartford, Conn., truck driver stopped to see if the dog he'd hit was hurt. The dog bit him. The police he summoned arrested him for driving without a license. Now he probably feels that the country's going to the dogs.

A 23-year-old Londoner stole a kiss from a beautiful blonde who turned out to be a policewoman. The \$5.00 fine may make a hermit of the boy.

## REPAIRING A LEAKING PORCH FLOOR

## REPAIRING A LEAKING PORCH FLOOR

Do you have a cracked cement porch slab which you would like to repair? The crack may not be serious unless there is a basement underneath. If there is, the crack should be filled.

Chisel out a groove, the entire length of the crack. The depth of the groove may vary with the extent of the crack.

A cold chisel and hammer are the most satisfactory tools for this purpose.

Make the groove wider at the bottom than at the top. Then the new cement will form a key which holds it in place.

Clean out all loose material, and wet the inside of the groove with water. This is important to prevent too rapid absorption of moisture.

Fill the groove with a rich mortar of cement and sand. A mixture of one to three is good.

Tamp the mortar into the groove. Finish the surface as soon as the mortar has set enough to trowel.

Cover with wet burlap or cardboard to prevent drying out or freezing while setting.

**NO LITTLE MAN**—Satisfying his curiosity by peering down the business end of this giant saxophone, a prospective musician decides that there's no little man inside. The instrument, used by the French Army band at Roquencourt, France, is as tall as the child.

## Over 1200 Miles Per Hour

Test pilot Bill Bridgeman in the Navy's D5811 Skyrocket has set two new world records. On one occasion he flew his plane to a height of almost 80,000 feet, beating the record set by Orville Anderson and Albert Stevens in a balloon in 1935. He also shattered the world speed record by traveling at the astonishing speed of 1,238 miles per hour.

The speed of sound at sea level is 760 miles an hour. Bridgeman traveled almost twice as fast as sound, well into the supersonic zone. Speeds below the speed of sound are in the subsonic region. Above the speed of sound but not over 3,600 miles per hour are known as supersonic speeds. Speeds exceeding five times the speed of sound are called hypersonic.

The appearance of jet engines and rockets during the last war indicated that we were approaching the time when flyers would cross what became known as the sonic barrier. On October 14, 1947, Major Charles E. Yeager, flying the Bell X-1, flew faster than sound for the first time in history.

It has been said that crossing the sonic barrier was the most significant event in the history of aviation since the Wright brothers made their first flight in 1903. The Bell X-1 is now a historical exhibit in the Smithsonian Institution.

The new record of over 1,200 miles per hour points toward the next goal of passing supersonic speed to hypersonic, or over 3,800 miles per hour. At hypersonic speed metals now used would melt like the wax wings of Icarus when he flew too close to the sun.

If higher speeds are to be reached, future researchers will have to concern themselves with developing metals that are more heat-resisting. Efforts must be expended in developing even better cooling systems than the one in the Skyrocket. Oils must be prepared that will stand up under heat intense enough to melt aluminum. Just as the art of building and designing planes had to be started all over again to pierce the supersonic region, the same appears to be true of the hypersonic zone.

## WILD STRAWBERRY

The big red strawberries that taste so good with shortcake and cream come from plants growing in home gardens and on truck farms. They are carefully tended to make them produce berries that are just right for eating fresh or for making into preserves.

There was a time, though, when the only strawberries to be had were wild ones growing in fields. To get the tasty fruit in those days, you had to take a basket and search for a berry patch.

If you were living in the eastern half of the United States, the chances are that you would have found good picking. That is the region where the Wild Strawberry has been abundant for years. It is still plentiful from New England to Florida and west to Oklahoma and South Dakota.

The place to look for the plant, says the National Wildlife Federation, is in fields, pastures, and grassy slopes. It grows out in the open where there is sunshine to keep the ground dry and to ripen the fruit in the late spring.

Like cultivated strawberries, the Wild Strawberry is a low plant—from three to nine inches high—that spreads over the ground. It grows from runners, or shoots, which reach out and take root at many places.

Fastened to the runners are leaves, growing in clusters of three leaflets apiece. Each leaflet has coarse teeth along its edges and a rough, hairy surface. It is about two inches long.

Here and there among the leaves are small white flowers. Each flower is from a half to three-fourths of an inch in diameter and has five round, white petals.

Attached to the same stalks that bear the flowers are the sweet red berries. Though not as large and attractive in shape as cultivated strawberries, the wild ones look and taste very much like the kind that come from gardens.

As you might guess, the reason for the resemblance is that Wild Strawberries are the ancestors of the garden variety. By working with the wild plants, experts have produced the strawberries which we cultivate.

Wild Strawberries now rank second to their tame cousins, but they still furnish fruit for eating. And wherever they grow, they perform a useful service by clinging to the ground and protecting the soil against erosion.

# Sarah Anne's COOKING CLASS

## Ice Cream Plus Fruit Tops In Refreshment

This time of year, heavy desserts don't do the trick. Tangy flavor and cool foods are in order, and they're easy to achieve, too, if you use pre-packaged ice cream.

An elegant dessert for eight, this appetizing buffet platter is simple to arrange and serve, and simpler still to provide, since it means only buying two pints of pre-packaged ice cream when you do your marketing, keeping them in the handy paraffined cartons in the freezing compartment of your refrigerator until you're ready to put them on the table with their timely trimmings of sliced fruit, melon balls and berries.

### Baked Fish Fillets

- 1 pound fish fillets
- 1 cup milk
- 1 tablespoon salt
- Fine, dry bread crumbs
- 1 tablespoon oil or melted butter

Cut fillets into serving pieces. Combine milk and salt. Dip fish into milk, then into crumbs, being sure fish is completely covered with crumbs. Place in a greased baking dish, sprinkle with butter and brown quickly in an oven 500 degrees about 10 to 20 minutes. Do not add water. Serve with lemon butter sauce.

### Lemon Butter

- 1/2 cup butter
- 3 tablespoons lemon juice

Cream slightly softened butter, adding lemon juice gradually. Serve on fish.

### Smothered Fish Steaks

- 1/2 teaspoon salt
- 1/4 teaspoon pepper
- 1/4 cup flour
- 2 (1 pound) fish steaks
- 1 1/2 cups milk
- 2 mild onions, sliced
- 1 tablespoon fat
- 2 slices bacon

Combine salt, pepper and flour. Sprinkle over fish. Place on bottom of shallow baking dish, add milk and bake in an oven 425 degrees for 10 minutes. Brown onions in fat. Place onions and bacon on fish and bake 10 to 15 minutes longer or until fish is tender.

### Fillets of Sole, Marguery

- 8 flounder fillets
- Salt and paprika
- 1/2 cup white wine
- 2 1/2 cups fish stock
- 1 boiled lobster
- 18 littleneck clams or small cooked shrimp
- 3 tablespoons butter, melted
- 3 tablespoons flour
- Pepper

Place fillets in buttered baking dish, sprinkle with salt and pepper, add wine. Cover with buttered paper and bake in an oven 350 degrees for 15 minutes. Combine fish stock, shell of lobster and 6 clams. Simmer until liquid is reduced to 1 cup. Blend butter, flour, add strained fish stock and 1/4 cup liquid from fillets. Season with salt and pepper. Arrange fillets on serving platter. Pour strained sauce over fish and garnish with sliced lobster meat and remaining clams. Sprinkle with cheese. Bake in an oven 350 degrees until cheese is melted and fillets are heated through. Garnish with watercress.

### Mackerel Grill

- 1 (4 pound) mackerel
- Salt and pepper
- 1 tablespoon butter
- 1 mackerel roe
- 8 strips bacon
- 2 tomatoes, cut in halves

Place cleaned split mackerel on greased broiler, skin side up. Season, place 4 inches under moderate broiler heat and broil 6 minutes. Turn fish, brush with melted butter, add roe and bacon and continue cooking 5 minutes more. Add tomatoes, turn roe and bacon. Cook 5 minutes longer or until browned.

### Codfish Balls

- 1 cup flaked cooked fresh cod
- 1 1/2 cups mashed potatoes
- 1 egg beaten
- 1 tablespoon butter melted

### Maine Baked Finnan Haddie

- 1 tablespoon chopped green pepper
- 1 tablespoon chopped green pepper
- 3 tablespoons butter
- 3 tablespoons flour
- 1/4 teaspoon paprika
- 2 cups milk
- 2 cups cooked finnan haddie
- 1 cup buttered bread crumbs

Cook onion and green pepper in butter until tender. Mix in flour and paprika and add milk gradually. Heat to boiling and pour over fish in greased baking dish. Cover with crumbs and bake in an oven 350 degrees for 20 minutes or until crumbs are browned.

One Block West of Depot

**POWER FOR FREEDOM!**

The great productive strength of America's workmen is multiplied many times over by the availability of plenty of electric power. Wisconsin's electric utility companies have more than doubled their generating capacity since 1941. Power plants now under construction will add one-third more capacity in the next three years (provided government restrictions do not cause delays).

SEPTEMBER 1, 1952

America's strength lies in its system of freedom for all—for workers and for industry. On this special day, we salute the workmen of America...

**CONGRATULATIONS!**
