

Board Proceeds With Plans for New Sewage Plant

Regular Meeting, Sept. 2, 1952 The Village Board of Kewaskum, Wisconsin met in regular monthly meeting with President C. Miller presiding and all board members present.

Mr. Carl Schaefer discussed with the board his plan for the relocation of the connecting sidewalk between South street and Fond du Lac ave. which at the present time divides their garage property.

Mr. Harry Koch was advised that they could proceed with their plans for the drawing and presentation of a plat for their property east of the River Road and north of the Belger addition.

The following resolution was introduced by Trustee G. Hansen:

RESOLUTION NO. 3 WHEREAS, The Village of Kewaskum, County of Washington, State of Wisconsin, finds it necessary to construct a new sewage disposal plant, and;

WHEREAS, The Village of Kewaskum has been directed by order No. 6-52-1 of the State Board of Health to complete such a plant according to approved specifications not later than December 31, 1954, and;

WHEREAS, The Village of Kewaskum has already purchased the necessary land for such a plant, and;

WHEREAS, The Village of Kewaskum has retained the McMahon Engineering Co. of Menasha, Wisconsin, as their engineering consultants in this matter.

NOW, THEREFORE, BE IT RESOLVED, by the Village Board of the Village of Kewaskum, that the said McMahon Engineering Co. be and hereby is instructed to conduct a survey of the village sewage problem and present to the Board two (2) plans for the construction of adequate waste treatment facilities as follows:

one (1) plan for the treatment of the Village sanitary sewage waste only, and one (1) plan for the treatment of the Village sanitary sewage and industrial wastes.

BE IT FURTHER RESOLVED, that the Village Board formulate a definite plan for the financing of the construction and the maintenance of such treatment facilities.

BE IT ALSO RESOLVED, that a copy of this resolution be forwarded to the State Board of Health and the McMahon Engineering Co.

Motion by J. Eberle and seconded by A. Martin that this resolution be adopted. Upon roll call all members voting "aye," the resolution was so adopted.

Because of a shortage of funds in the sidewalk account, motion was made by L. Kohn, seconded by G. Hansen and carried that the Village would construct sidewalk for L. N. Peterson, Ed. Fickler and Paul Gruendeman provided that these residents pay for the entire cost of such construction at the present time and that an adjustment be made for the Village portion of this cost on their next tax assessment.

It was decided that the Ordinance Committee would meet at 1 p. m. on Sept. 28, 1952 to review a copy of the revised Village ordinances.

K. A. Honeck, Jr. was granted permission to replace a portion of sidewalk of Fond du Lac Ave. with the Village assuming one-half (1/2) of the cost of such construction providing said sidewalk is constructed according to Village specifications and that the cost is no higher than the Village contract price.

Motion by A. Martin, seconded by M. Schaefer and carried that the Commissioner again contact the State Highway Commission about safety islands and improvements on Fond du Lac Ave.

Motion by G. Hansen, seconded by L. Kohn and carried that a work order be issued to the Wisconsin Electric Power Co. to put the Village street lights in proper working order.

Motion by L. Kohn, seconded by K. Schaefer and carried that the application of Harry Nischke for an operator's license be approved.

Death of Mrs. John Krueger

Mrs. John Krueger, 73, Campbellport, died at 8:30 p. m. Sunday, Sept. 21, at St. Agnes hospital, Fond du Lac, after a two-week illness.

The former Rose Strobel was born Sept. 16, 1879, at St. Killian, the daughter of Killian and Johanna Strobel, and was married June 19, 1923, at St. Killian. The couple lived on a farm at Dundee until Nov. 1, 1942, when they retired and moved to Campbellport.

Besides her widower, Mrs. Krueger leaves four brothers, Peter Strobel, Milwaukee; Frank, Hartford, and Raymond and Leo, St. Killian; and three sisters, Mrs. John Jaeger, Stratford, Mrs. Frank Jaeger, Fond du Lac, and Mrs. Paul Koenigs, Campbellport.

Funeral services were held Wednesday at 9:30 a. m. at the Twobig Funeral home, Campbellport, and at 10 o'clock at St. Matthew's Catholic church there, with burial in the church cemetery. The Rev. Peter Schwamb officiated.

JOHN WALSH John Walsh, 78, former New Prospect tavernkeeper, and a native of the town of Eden, died at Fond du Lac Monday, Sept. 15, after a long illness.

Son of John and Margaret Walsh, he was born Feb. 16, 1874, and was married Oct. 23, 1905, to Ella Calhoun at Campbellport. Mr. Walsh farmed in the town of Eden, later operated a shoe store at Campbellport and subsequently a tavern at New Prospect.

Surviving are the widow; two brothers, Henry, Fond du Lac, and William, Chicago.

Funeral rites were held Wednesday at 9 a. m. at St. Matthew's church, Campbellport, the Rev. Peter Schwamb presiding. Burial was in the parish cemetery.

Break Ground for New E and R Church, West Bend

A ground breaking ceremony was held last Sunday morning at the Immanuel Evangelical and Reformed church, West Bend, signifying the beginning of a \$140,000 building expansion project. The short ceremony, which followed the regular worship service, was attended by the congregation, led by the Rev. Harry W. Hamer, pastor. The first two shovelful of earth were turned over by Carl Schneiss, vice-president of the congregation and Geo. Strothoff, chairman of the planning and building committee.

The initial step of the building program, scheduled to be completed in 1953 at a cost of \$65,000, will not only be the foundation for the complete addition but will also provide badly needed space for Sunday school activities, modernized kitchen facilities and a larger fellowship hall. Extra storage space, new rest rooms, a new boiler room and chimney, and a raised platform or stage are also included in the plans. The addition will extend west from the present building.

No definite time-table has been set up for the complete addition which will include new worship facilities and a study for the pastor. The building lines of the present structure will be carried out, according to the architect's plans.

CUDNOHOSKI BAPTISM

The little son of Mr. and Mrs. Wallace Cudnohoski, Kewaskum, was baptized Sunday in St. Lucas Ev. Lutheran church by the baby's grandfather, Rev. Gerhard Kahlness. He was given the name Richard Lee.

The sidewalk committee recommended that a concrete incline be constructed in the sidewalk just south of the Theater Building to compensate for the difference in the levels of the walk at this point.

Motion by A. Martin, seconded by J. Eberle and carried that all bills and wages as recommended and approved by the finance committee be allowed and paid.

Walter Bade, final payment, recreation director 126.70 Frank Vetter, wages, 1st half (CONTINUED ON LAST PAGE)

Miss Butzke Wed to Paul Blumer

In a 2 o'clock ceremony on Saturday afternoon, Sept. 20, marriage vows were exchanged by Miss Lucille Butzke, daughter of Mr. and Mrs. Arnold Butzke, Kewaskum, and Paul Blumer, son of Mr. and Mrs. Jacob Blumer of near New Prospect, Campbellport route. The Rev. H. A. Kahrs presided at the ceremony in Trinity Ev. Lutheran church at Dundee.

The bride wore a gown of white lace and satin. The fitted bodice was detailed with a sheer nylon yoke and lace gathered to form a carved neckline. The sleeves were long and tapered to points at the wrists. The full skirt was enhanced with a nylon tulle insert, and ended in a long cathedral train which was edged with wide Chantilly lace. Her imported French illusion veil was gathered to a tiara of seed pearls. She carried a bouquet of white roses.

Yellow tulle and lace were combined in the gown worn by Miss Virginia Blumer, the maid of honor. Lace panelers detailed the bouffant tulle skirt. Matching lace gauntlets completed her ensemble. Identically styled gowns in green, shrimp and aqua were worn by the bridesmaids, Misses Janice Butzke, Leona Koepke and Joyce Ann Courier. All of the young ladies carried bouquets of mums and pompons in a colonial arrangement. Little Miss Sandra Narges, niece of the bridegroom, served as flower girl in a white satin and lace gown with a lace bolero. She carried white pompons and white roses.

Serving as best man was J. Henry Blumer. Lester Stern, Ralph Raether and Tom Vic attended as groomsmen. Donald Narges and Alvin Butzke acted as ushers.

A dinner and reception at Forest Lake resort followed the ceremony. The couple left on a wedding trip to the western states, following which they will reside in Kewaskum.

Both the bride and bridegroom are graduates of Kewaskum High school. Mr. Blumer is employed at the West Bend Concrete Products company and his bride is employed as a stenographer at the Amity Leather Products company in West Bend.

IN THE SERVICE

SGT. DREHER HOME FROM KOREA; TO BE DISCHARGED Sgt. Merlin Dreher, son of Mr. and Mrs. Edward Dreher, Sr. of Kewaskum, Korea where he had served since last Christmas with the 179th Infantry Regiment, 45th Division. Prior to that he was stationed in Japan since June, a period of six months. After arriving in the states, Sgt. Dreher was sent to Camp McCoy, Wis. for processing. He was then given an 11-day furlough at home, following which he will return to Camp McCoy to receive his honorable discharge from the army on about Oct. 7. He has been in the service since Jan. 8, 1951, almost two years. Sgt. Dreher was awarded the Purple Heart for wounds suffered in action in Korea.

PFC. ROGER HAWIG BACK FROM KOREA Pfc. Roger Hawig, who spent the past two years and three months serving with the army in the United States and Korea, returned on Sept. 11 to the home of his parents, Mr. and Mrs. Arnold Hawig in the town of Wayne.

CUDNOHOSKI IN PANAMA Pvt. Kenneth Cudnohoski, son of Mr. and Mrs. Ed. Cudnohoski of Beechwood, R. I., Kewaskum, now is serving with the army in Panama. His address is Pvt. Kenneth Cudnohoski U.S. 55213690, 37th Eng. Combat Co., Ft. Clayton, C. Z.

KRAUTKRAMER WOUNDED Pvt. Leroy Krautkramer, son of Mr. and Mrs. Robert Krautkramer of Beechwood, has been reported wounded in action while serving with the marine corps in Korea.

BAZAAR AND SUPPER

The annual bazaar and supper at Peace E and R church, Kewaskum, will be held on Thursday, Oct. 23.

Sentence Youths for Burglaries Here and In Area

Sentences were imposed on two young burglars and a third was placed on probation when they appeared before Circuit Judge L. J. Fellenz in Fond du Lac last week to plead guilty to offenses committed recently in a five-county area, including one at the Schaefer Bros. garage in Kewaskum the past summer. They were members of a six-man gang of burglars.

Everett Vossekuil, 22, Fox Lake, R. 1, drew a commitment to the Wisconsin state prison at Waupun of from one to five years for eight counts. John Aarts, 15, Waupun, was sentenced to the Green Bay reformatory for one to three years, Irving Koch, Jr., 23, Fox Lake, R. 1, was placed on probation to the state public welfare department for a year after a one to 2 1/2-year Green Bay reformatory penalty was imposed and then stayed. Koch waived preliminary hearing in justice court at West Bend Monday in connection with four charges of burglary in Washington county and was bound over to county court.

He was accused of three burglaries in Hartford and one in Kewaskum. Earlier one year's probation with the state public welfare department was the sentence ordered by Circuit Judge Fellenz for another member of the gang, William H. Storke, 19, Waupun. A 12 to 14 month Green Bay reformatory term was imposed, then stayed, by the jurist and the probation effected instead. A fifth member of the gang was sentenced a week ago Saturday to Green Bay for a one to two-year term. He was Jerome Gerbing, 19, Fond du Lac. The other member was Lawrence Beekman, 18, Waupun.

First members to be apprehended were Vossekuil and Koch, who surrendered to a posse at Markesan after an unsuccessful attempt to burglarize a motor sales company. They implicated the four other members. The group admitted to a series of 20 to 25 burglaries in Washington, Dodge, Green Lake, Fond du Lac and Columbia counties.

The Schaefer Bros. garage here was burglarized again two weeks ago when tires, batteries and some cash were taken. It is believed that some members or associates in the same gang may also have committed this offense.

WOMAN'S CLUB TO OPEN SEASON WITH LUNCHEON

The Kewaskum Woman's club will open its fall season with a one o'clock luncheon on Saturday, Oct. 4, at the public library, in the municipal building. Members desiring to bring guests and members unable to attend are requested to notify Mrs. Charles Miller, chairman of the luncheon committee, by Wednesday, Oct. 1.

The following new officers will begin their terms: Mrs. H. B. Rosenheimer, president; Mrs. R. G. Edwards, first vice-president; Mrs. L. N. Peterson, second vice-president; Mrs. K. Koepke, secretary, and Mrs. M. Martin, treasurer.

GRADUATES AS DIETICIAN FROM HINES VET HOSPITAL

Miss Betty Jane Krueger, daughter of the Frank Kruegers, Kewaskum, recently graduated from the Hines Veterans' hospital, Hines, Ill., where she served her internship. She is now employed as a dietitian at the Wood Veterans' hospital at Milwaukee.

HOSPITAL NEWS

Mrs. Louella Gantenbein, Kewaskum, left for St. Joseph's hospital, West Bend, Wednesday where she will submit to medical treatment.

Mrs. John Dobke, Kewaskum, returned home Saturday from St. Joseph's hospital, where she underwent an operation on Sept. 16.

VINCENT KOHN INDUCTED

Vincent Kohn, son of Wm. Kohn, of R. 2, Kewaskum, was inducted into the armed forces with a group of Washington county selectees on Wednesday, Sept. 17.

BIRTH

BOEGEL—A daughter to Mr. and Mrs. Gary Boegel, R. 2, Kewaskum, Saturday, Sept. 20.

PARISH SCHOOL CLOSED

On Thursday and Friday of this week Holy Trinity school was closed to allow the sisters to attend the teachers institute in Milwaukee.

BRUCE KOTHS MOVE

Mr. and Mrs. Bruce Koth moved from the K. A. Honeck, Sr. home in the Stark addition into the Walter Jandre home on East Water st.

Indians Defeated at Lomira, 26-6

TRI-COUNTY STANDINGS

	Won	Lost
Lomira	1	0
Campbellsport	1/2	1/2
Oakfield	1/2	1/2
Brandon	0	0
North Fond du Lac	0	0
Kewaskum	0	1

Results last Friday—Lomira 26, Kewaskum* 6; Campbellsport 12, Oakfield 12; Brandon 24, Cambria 14 (non-conference).

Games this Friday—Oakfield at Kewaskum, North Fond du Lac at Lomira.

The Lomira Lions exhibited mid-season form in the opening Fox River Valley Tri-County conference game played under the lights at Lomira Friday night, defeating the Kewaskum Indians, 26-6. In the other season's opener Campbellsport and Oakfield had to be content with a 12-12 tie, which counts for a half game won and half game lost in the standings.

Brandon went out of the conference to defeat Cambria, North Fond, defending champion, was idle. Green Lake dropped out of the circuit last week before launching its schedule.

Lomira was never in trouble as Quarterback John Tagliapietra and Halfback Gordon Schultz were the big guns in the Lomira scoring attack. In the first quarter Fran Michaels ran 15 yards for a Lion touchdown and a pass from Schultz to Tagliapietra accounted for the point after TD.

Midway in the second period Tagliapietra struck paydirt for the Lions on a quarterback sneak. The conversion attempt failed and Lomira led 13-6. Before the end of the half Kewaskum crashed the scoring column when Dick Bunkeiman skirted 75 yards for a touchdown. The conversion attempt failed.

Lomira counted again in the third quarter on a 25-yard pass play, the ball going from Tagliapietra to Schultz. The extra point try was no good and the score stood at 19-6. In the closing period, Niek Seyfert skirted seven yards around right end for the Lions' final touchdown. A pass from Tagliapietra to Don Indermuehle accounted for the extra point.

CHICKEN AND HAM DINNER AT ST. KILLIAN ON OCT. 19

A country style chicken and ham dinner, as you like it, in the parish school hall, St. Killian, will be served by the Married Ladies' sodality, Oct. 19, from 11 a. m. until 3 p. m.

The evening will be given over to a card party at 8 p. m. Various popular games will be played.

Please reserve your date of Oct. 19 for St. Killian. The public is cordially invited. Spacious free parking place on the church grounds.

TWO AUTOS IN COLLISION

Cars owned by Martin Knickel, Campbellport, and Harry Heinecke, Kewaskum, collided at the corner of Main and East Water sts at about 11 a. m. Sunday. The Knickel auto, driven by his daughter, pulled away from the curb and started to make a left turn when it was struck by Heinecke's vehicle. Both cars were slightly damaged.

WOMAN HAS POLIO

Mrs. Willard Meyer, 25, listed as from R. 3, Kewaskum, was admitted to St. Agnes hospital, Fond du Lac, Monday where she is reported to be undergoing treatment for polio.

WOMAN HAS POLIO

Mrs. Louella Gantenbein, Kewaskum, left for St. Joseph's hospital, West Bend, Wednesday where she will submit to medical treatment.

WOMAN HAS POLIO

Mrs. John Dobke, Kewaskum, returned home Saturday from St. Joseph's hospital, where she underwent an operation on Sept. 16.

VINCENT KOHN INDUCTED

Vincent Kohn, son of Wm. Kohn, of R. 2, Kewaskum, was inducted into the armed forces with a group of Washington county selectees on Wednesday, Sept. 17.

BIRTH

BOEGEL—A daughter to Mr. and Mrs. Gary Boegel, R. 2, Kewaskum, Saturday, Sept. 20.

Elect Cliff. Rose League Official

All member schools of the Tri-County conference, except Green Lake, were represented at a social science conference held at the high school in North Fond du Lac last Wednesday.

James Jones, supervising principal of the North Fond du Lac schools, said that in addition to the host school, Oakfield, Lomira, Campbellsport, Brandon and Kewaskum were represented.

Highlight of the daylong program was the election of Clifford Rose, Kewaskum, as the executive secretary of the conference. He succeeds Roland Lomhus, Lomira.

Several reports were given on revising social science curriculums in the various schools.

It was voted to hold additional meetings in the future to continue with the curriculum planning program. Hilda Spillman, North Fond du Lac teacher, is chairman of the study group.

Seek Blood Donors for Clinic Monday

With the last opportunity of 1952 for people in this area to donate blood for two vital and needy causes less than a week away, workers were in the midst of an all-out effort to sign up donors this week.

The one-day blood donor clinic will be held next Monday, Sept. 29, with all blood donated going equally to the local blood bank and for casualties in the armed forces. Sponsors of the clinic are the County-West Bend Community Blood Donor club and the Washington County Chapter of the American Red Cross. The clinic will be held again in the gymnasium of the West Bend High school. Hours will be from 2 to 6 o'clock Monday afternoon and from 7:30 to 9:30 in the evening. All equipment and trained medical and technical personnel will be provided by the mobile blood unit from the Junior League Blood Center in Milwaukee.

Cards were going out to prospective donors this week asking them to volunteer for Monday's clinic. Mrs. Irving Johnson, drive chairman for the Community Blood Donor club, emphasized this week that persons receiving appointment cards are asked to keep their blood donor date or if they are unable to for any reason to phone 1270W or 21, West Bend. Approximately 350 donors are needed for the clinic. About 15 will be scheduled each hour.

New donors who have not volunteered at any of the previous clinics at West Bend are also urged to register to give. In June, when 700 persons gave a pint of blood in the three-day clinic there, more than half were first time donors.

Gordon Ohlrogge, president of the Community Blood Donor club, reported that as of Monday of this week the reserve in the local blood bank is 27 pints. A half-share of this goes to the Junior League Blood Center for its expense, effort and time in collecting and processing the blood. Blood from the Community club reserve has been used extensively for injured or ailing people in this area since June and has depleted the reserve heavily. In case after case the blood has been vitally needed and on more than a few occasions has been a life-saving factor.

As for the armed forces, the Red Cross here points out that the national goal during all of this year is 300,000 pints of blood a month to be shipped overseas for combat casualties on the battlefield in Korea or recuperating in hospitals.

Monday's blood donor clinic will be the seventh in which the Community Blood Donor club has taken part.

The community organization was formed with the sponsorship of veterans' organizations, fraternal and civic groups and doctor's of this area in the fall of 1950 and a small group of volunteers donated at the first clinic.

Since then the priceless value of having the right kind of blood immediately available in any emergency has been demonstrated over and over again and enthusiasm for the project has rapidly developed. The first three clinics were held in West Bend under sponsorship of

Cpl. Ray Rosbeck; Wounded in Korea, Dies at Hospital

Cpl. Raymond Rosbeck, 29, son of Mr. and Mrs. Martin Rosbeck of near St. Killian, in the town of Wayne, died suddenly on Monday afternoon, Sept. 22, at Percy Jones hospital, Batte Creek, Mich., where he had been a patient since April 4, 1951. Death was caused from injuries suffered in action near Chijong, Korea, on Feb. 5, 1951, while serving with the 8th Cavalry Regiment.

After being seriously wounded, Cpl. Rosbeck was flown to and was first treated in a hospital in Japan. Later he was flown to the United States for further treatment. Although still suffering from his wounds, he was scheduled to be released from the hospital on Sept. 11 and was awaiting arrangements for his transfer to Wood, Wis. Veterans' hospital when he was stricken.

The young man was born Nov. 20, 1921, at Milwaukee and moved to the town of Wayne with his parents in 1938. Cpl. Rosbeck enlisted on June 5, 1950, and arrived in Korea in October. He was awarded the Purple Heart in April of 1951. While a patient at the Michigan hospital, he was able to spend a number of week ends and furloughs at his home.

The soldier is survived by his parents, a sister, Margaret (Mrs. William Brill) of Milwaukee; three brothers, Robert and Norbert at home, and Ralph of West Bend; a brother-in-law and sister-in-law, relatives and friends.

Cpl. Rosbeck was a member of the Holy Name society, members of which attended the funeral in a body.

The remains were shipped to Kewaskum by train, arriving here at 10 p. m. Wednesday night, and the body was met by members of the Robert G. Romaine post of the American Legion of Kewaskum, relatives and friends. Cpl. Paul E. Barber, a buddy, who was with Cpl. Rosbeck when he was wounded in Korea escorted the body from Percy Jones hospital. The body was removed to the Miller Funeral home to be in state after 2 p. m. Thursday.

Funeral services were held Friday morning at 10 o'clock at St. Killian's Catholic church, St. Killian, the Rev. John B. Reichel presiding. Burial took place in the parish cemetery. Military rites at the grave were in charge of the Kewaskum American Legion post.

HOMEMAKERS TAKING COURSE IN FIRST AID

Members of the Kettle Moraine homemakers held the first of their first aid classes at the home of Mrs. Art. Petermann on Sept. 22. The classes are being conducted by the Fond du Lac chapter of the American Red Cross. Older girls of the Kettle Moraine 4-H club are also taking part in the classes.

On Oct. 1, Mrs. Oliver Petermann, Mrs. Duibert Petermann and Mrs. Henry Sauder will attend the fall council meeting of homemakers at Fond du Lac. At this time, plans will be made for the coming year.

The project of the regular meeting of the Kettle Moraine club on Sept. 16 was making lamp shades. Several members brought lampshades which they received. The hostess at this meeting was Mrs. Leonard Schultz.

the community organization and others were also held last year in Kewaskum and Germantown. Because of the additional vital need for blood for combat casualties the two clinics at West Bend this year have been scheduled in combination with the Red Cross armed forces blood program.

Everyone living in Washington county with the exception of the townships of Hartford, Erin, Folk and Richfield (covered by Hartford) is automatically a member of the Community Blood Donor club. They may receive whatever type blood is needed, in any quantity, any place in the United States and at no cost. The only qualification is residence in this area.

Behind The Scenes In American Business

NEW YORK—Vital statistics, dull though they are, can sometimes provide manufacturers with the key to unlock the mystery of long-range market predicting.

A good example is the emphasis being placed on the recent decline in marriages. Because a relatively small portion of the population is now reaching a marriageable age—due to the low birth rate of the 1930's—fewer families are being formed and for the next ten years or so businesses dealing in furniture, silverware, wedding rings, baby needs, electric irons, washing machines, etc., can't expect to do as well as other types of business.

On the other hand, companies dealing with anything that might interest teen-agers or oldsters can look forward to a sizable business pickup in the coming years because of the bumper war-baby crop now nearing their teens—and because of the increasing longevity in this country.

Those who expect to be on the short end due to adverse trends in vital statistics will do well to start looking for new fields to conquer. Those who will benefit should begin plans now for improved design and greater volume.

POCKETBOOK PROHIBITION—Excessive liquor taxes are putting a severe restriction on the American consumer—a squeeze that amounts to "pocketbook prohibition."

Harry G. Serlis, president of Schenley Distributors, Inc., recently cited the fact that tax-paid withdrawals of domestic whiskey—regarded as an accurate barometer of consumer buying—declined 25,017,000 gallons in the first six months after the new \$10.50 federal excise tax went into effect. The Schenley executive also noted the total of direct and indirect taxes on a \$5 bottle of whiskey have reached the staggering total of \$3.80. This, he says, is "pocketbook prohibition," in that the tax-inflated price of legal liquor has forced many consumers out of the legal market and has brought a dangerous increase in the bootlegging traffic.

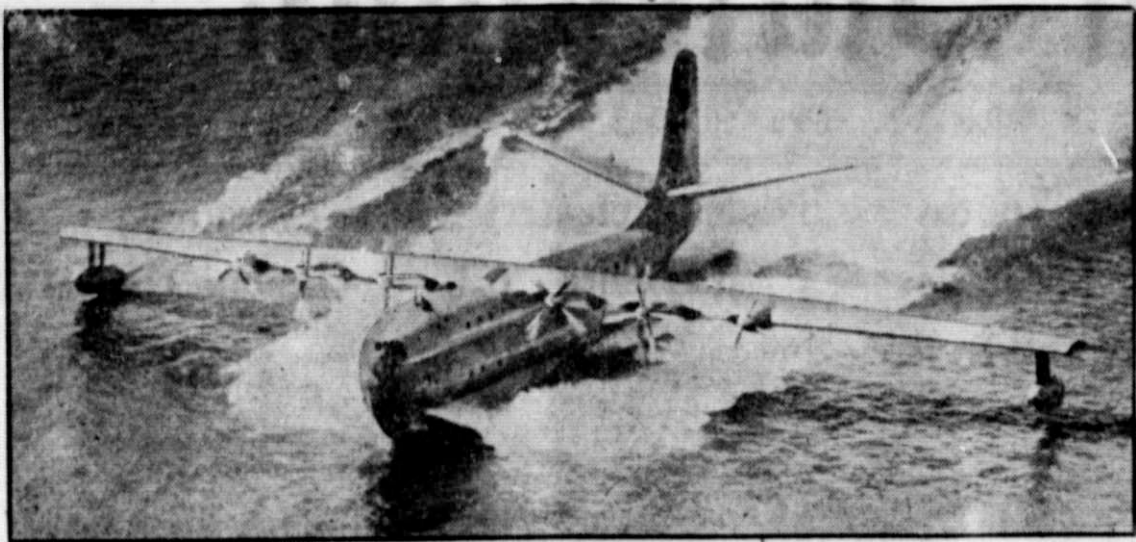

And besides, said Serlis, although the purpose in raising the federal excise tax was to increase revenues, actually the government received \$127,268,728 less in revenues from domestic whiskey than it had the previous six months when the tax was lower and more consumers could still afford to buy legal liquors.

THINGS TO COME—The latest safety device is an ingenious combination of a Geiger counter and a radium-impregnated wristband. The device is set up so that if a worker engaged in a manufacturing operation puts his hand with the Geiger counter in a danger zone the wristband is automatically halted by the machine. . . Hard-board panels with tongue-and-groove edges to eliminate cracks during building are available. . . Lobsters are being canned by a new method. Open the can and you have a tasty, live lobster. . . A world clock is available which tells local time and the time in 83 countries all over the globe.

AIRPLANE EVOLUTION—"The most powerful weapons in the U. S. arsenal are steadily becoming more compact in size and weight." Mundy I. Peale, president of Republic Aviation Corporation told a group of his colleagues in Detroit recently. The Thunderjet builder sees a parallel in aircraft. "There's a growing interest in airplanes that have smaller airframes and more powerful engines."

All of which leads Mr. Peale to make an interesting observation: that jet aviation is in a significant state of evolution—so much so that it's hard to tell whether fighter planes are becoming larger or bombers smaller. But, in order to get the kind of power plants needed for faster planes, Peale stressed the need for more research. He says that the present limiting factor to faster jet planes is the engine—not the air frame.

BITS O' BUSINESS—The average work week for factory employees declined from 40.4 hours to 39.9 hours between mid-June and mid-July. Average hourly earnings were \$1.65, off one per cent. . . Shipments of plastic-coated materials and plastic sheeting during the first six months of the year topped the preceding six months by 1,201,354 linear yards. . . Retail grocers still lead in candy sales in the U. S., accounting for \$335,340,000, or 20.7 per cent of all retail sales. . . Cotton consumption during the July period was at 28,858 for each working day, compared with 34,798 during the previous period and 32,003 bales during the same period a year ago.

TAKING TAXI-TESTS—Britain's giant flying boat, Princess, is seen above in the midst of taking test runs off the Isle of Wight. Thunder of the 10 Proteus prop-jet engines was reported heard several miles away as the big ship circled the island in test flights. Weighing 140 tons, she has a wing span of 219 feet, is 148 feet long.

O'Connell Says: Farmers Should Buy Good Stock

With thousands of feeder cattle now being herded into feed lots, Dr. H. J. O'Connell of the State Department of Agriculture suggested today that farmers will have a far better chance to turn these animals into profit if they will follow two rules.

The rules are: 1) buy only healthy stock; 2) take proper care of the animals you do buy.

"Buy stock only from herds that are known to be free of diseases such as Brucellosis and Tuberculosis," said O'Connell. "If there are any doubts, blood tests should be taken to spot the carrier animals."

"Saving the life of just one steer will pay for vaccinating at

Suggest Fall Pasture Renovation Is Done Better With Field Cultivator

Own a field cultivator? It may easily pay for itself with better pastures.

Tests by University of Wisconsin soils specialists show that well-managed pastures will out-yield plowed pastures or unrenovated pastures if they're worked over with a cultivator. And they won't suffer as much from erosion.

Bluegrass pastures renovated by a large field cultivator lost the least soil in seven years of tests by O. E. Hays at the La-Crosse Erosion Control Experiment Station.

Spring-plowed pastures lost about 18 times as much soil and yielded 1200 pounds less of dry forage. Pastures renovated with the field cultivator yielded about two tons of dry forage more than unrenovated pasture. Soil losses from fall-plowed pastures were about 13 times as much as from the pasture renovated with a field cultivator. The yield of dry forage from the fall-plowed pasture was about 500 pounds less. An alfalfa-brome pasture renovated by the same methods followed the same pattern, but soil losses were smaller. Greatest loss occurs during seeding years. Therefore, Hays estimates that about 30 per cent less soil would be lost if there was some way to lengthen the life of alfalfa stands by three or four years so that they wouldn't have to be seeded so often. Experiments are now in progress to study the effects of several fertilizer application rates at the time of seeding, combined with different rates of top-dressing in the spring.

Bible Comment: Intolerance Should Find No Advocate In Bible Dispute

IN the King James version of the Bible the Epistle to the Hebrews is attributed to Paul, but from early days in the church there has been much questioning regarding its authorship.

But one fact concerning the Pauline Epistles, those by James, Peter and John, which Paul certainly did not write, and the Epistle to the Hebrews, is that they are all agreed in a common faith in Jesus as the Messiah, in belief in his saving power, and in their conception of the Christian life.

James, for instance, emphasizes works as evidence of faith, where Paul puts more emphasis on faith, but in Paul's more extensive writings one would find many passages that, as strongly as James, stress the practical nature of Christian life. So, also, though John is the apostle of brotherly love, all that he says only strengthens what Paul wrote of love in I Corinthians 13. And when Peter writes of believers as "partakers of the divine nature," it is precisely what Paul has written in Ephesians 3:19.

This unity is emphasized in the conception of God's better revelation in Jesus, as presented by the writer of Hebrews, and as presented by Paul. Both are intense in their conviction that Jesus is the fulfillment of the Messianic hope. But Paul is chiefly concerned with doctrine, while the writer of Hebrews emphasizes the character of Jesus, and the fulfillment of the ritualistic side of the Old Testament heritage.

Belief in Jesus as the Messiah is dominant in the Christian church; and it is here that the devout Christian and the devout Jew differ. The devout Jew may regard Jesus as a great teacher, a view now more widely held than formerly, but he looks still for the Messiah and the fulfillment of the prophecies.

It is a difference of belief that is not in any sense occasioned by intolerance or unbrotherliness. If the Jew lives up to all that is good in the Old Testament and the Christian to all that is best in the New, the spirit of both would make intolerance and prejudice impossible. It is in ideals of peace and good will that Judaism and Christianity both find their highest expression.

Sports Afield

By Ted Kesting

Here's good news for bird hunters. The chukar partridge, after many long and disappointing experiments, now suddenly looms as a great white hope over immense stretches of our sub-marginal western land, much of which is worthless for everything except hunting. There is even a mild hope that he may eventually come through in a good part of the United States and southern Canada, according to outdoor writer Byron Dalrymple.

The chukar was first introduced in California in the late 20's; then Oregon tried them; Washington, Nevada, Nebraska and North Dakota came in with some success. The eastern states heard of these experiments and they started raising chukars. Before long, practically every state in the union was working with the bird.

But early hopes and successes were swiftly dashed. The chukar began vanishing just about as fast as the game men could raise and stock him. Outdoor writers began to clamor for an end to such nonsense as chukar raising. It was foolish waste of funds. And then new hunting books were mentioning the chukar with little more than a line saying it had failed miserably and expensively, a most embarrassing thing happened. The chukar did an about-face and put everyone on a hot spot.

Washington woke up one fine day to discover that she had an estimated several hundred thousand chukars living in rugged back-country canyons, and increasing crazily. In Nye county, Nevada, which probably has the largest chukar population of any comparable area in the country today, the state game commission was able to trap for replanting over a thousand birds from a single rugged canyon! In parts of the West the vanished birds were back in force. Nobody knew just why, or how, but there they were. Other states have also been doing a double take.

What appears to be happening in emergency, can be used to mend a gasoline tank of your automobile, a pail or wash tub, a boiler or even a large pipe that develops a leak, according to Handy Jim's.

is that a new race of American chukars has been slowly building itself up in the West, a race forged in the hard going of a new land which all but did in its stocked ancestors. This seems especially evident when current stocking methods are considered. Pen-reared stock, still used to some extent, is not very successful in planting. But when the "native" birds are trapped and transplanted, they do fine.

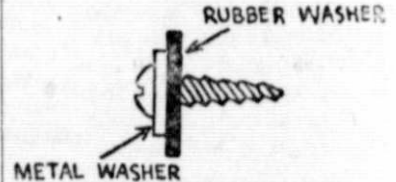

The chukar is now being talked of in many sportsmen's circles as possibly being the savior of deteriorating wing shooting. Game men won't go that far, but they are mighty happy and quietly optimistic, just the same.

For Making Quick Patch When Speed's Vital

A TEMPORARY patch, useful in an emergency, can be used to mend a gasoline tank of your automobile, a pail or wash tub, a boiler or even a large pipe that develops a leak, according to Handy Jim's.

You'll need a self-tapping screw, a metal washer and a piece of scrap inner tube. Slide the washer to the head of the screw and then push the

point through the rubber. Now drive the screw into the leak until it is tight.

This type of patch will hold quite a while, even though it's purely a temporary cure.

WILLOW PTARMIGAN

©1952 National Wildlife Federation Willow Ptarmigan

Eskimos have to keep a sharp lookout when they are hunting Willow Ptarmigan, for the big birds are clever at concealing themselves. When snow covers the ground, they're mostly white, with just a little black on their tails. After the spring thaws, they turn partly brown to match the summer landscape.

Most people in the United States never get to see the changeable birds, because they stay so far north all year. The National Wildlife Federation says that Willow Ptarmigan make their summer homes from Greenland to Alaska. In the winter they come down to central and southern Canada, and only a few of them venture into the northern fringes of our country.

So hardy are the Willow Ptarmigan that they build their nests on the bare ground of the treeless Arctic plains. In a hollow lined with a few feathers, leaves, or bits of grass, the female lays from six to fifteen large eggs. The eggs are a deep, reddish-cream color, with splotches of purple-brown.

After the female keeps them warm for 26 days, the eggs hatch sometime in July. Both before and after the young birds appear, the male stays near to protect his home against fur-bearing animals and birds of prey.

Getting food for the nesting family is another problem for the parents themselves are big, and the young have hearty appetites. In the summer, while they are still in the far north, they eat the leaves of bushes and trees, together with some insects now and then. For winter meals, they like berries and the tips of tender twigs.

Though they sometimes have trouble in finding enough food, Willow Ptarmigan grow to be large birds—measuring seventeen inches from bill to tail. They are plump, too, and this is much to the liking of the Eskimos, who make many a meal of Ptarmigan.

To hear politicians talk, you'd think the fate of the world hung in the balance in their bid for election.

State Raising Fewer Chickens

Farm laying flocks may be smaller this fall than they were in the fall of 1951, according to the Crop Reporting Service of the Wisconsin and United States Departments of Agriculture.

This year Wisconsin farmers raised 20,355,000 chickens, the smallest number raised in the state in any year since 1948. The number of chickens raised this year is seven per cent smaller than last year and 14 per cent below the 1941-50 average. The decrease in chickens raised in Wisconsin this year results from a reduction in the number of chicks purchased for farm flock replacement.

Chickens and egg prices dropped sharply this spring. The decrease in egg prices and the relatively high feed prices made egg production unprofitable and reduced the demand for hatchery chicks this spring. In recent weeks, however, egg prices have risen to a level almost equal to a year ago, and egg production is becoming a little more profitable.

With a seven per cent reduction also reported for the number of chickens raised in the nation, the size of farm flocks probably will be smaller this fall than a year ago. Egg production may fall short of the fall and winter output last year.

FLIGHT TO FREEDOM—Fleeing a Communist East German regime, this young German mother climbs aboard the "Refugee Air-Lift" in Berlin's western zone, with her baby in her arms. She will land in free West Germany. Thousands of former red-zone residents are crowding into West Berlin, creating a refugee problem which the West Berlin Senate hopes to lessen by chartering cargo planes, converting them to passenger-carrying units in the air-lift to freedom.

Economical Home Design Wins First Prize Award From Small Homes Guide

3 Bedrooms, Rear-View Accent

A combination of architectural interest and economical construction has won the home shown here a design award. Rear-view living is emphasized in the plan, with even the garage having a window wall on one side, making it an ideal living and entertaining room in the summer. The rectangular shape of the plan, plus storage walls replacing partitions, plus built-in features, add to the economy and livability of this house. Room-to-room circulation is regulated by the fireplace wall, which also includes utility items. Fine touches are the double closets at the entrance and the small but useful lavatory off the garage. The house, not counting garage, has a floor area of 1,200 sq. ft. The plan is the creation of Designer Richard B. Poliman. Information on blueprints and their cost can be obtained by writing to Small Homes Guide, 82 W. Washington, Chicago 2, Illinois.

FLYING START—The Democratic presidential candidate is on the move as campaign days begin. Seen here leaving a plane at Chicago airport, Illinois Gov. Adlai Stevenson carries a briefcase full of notes and the look of a man in a hurry.

WHO, U.N. Agency, Sponsors Seminar On Mental Health

Chichester, Sussex, England—The World Health Organization (WHO), one of the United Nations Specialized Agencies, has enabled 51 doctors, nurses and other professional workers concerned with child health problems in 28 countries and territories to participate in a Seminar on Mental Health and Infant Development, being held at Bishop Otter College.

WHO sent participants from Austria, Belgium, Denmark, Finland, France, the German Federal Republic, Greece, Ireland, Italy, the Netherlands, Norway, Portugal, Spain, Sweden, Switzerland and Yugoslavia. WHO's various regional offices arranged for participation of personnel from Australia, Canada, Egypt, Iran, Japan, Mexico, Peru, Puerto Rico, Thailand, the Union of South Africa, Uruguay and Venezuela.

Most of the WHO participants hold responsible positions in the public health services of their own countries, or in training institutions connected with public health. They include social workers, a teacher, psychologists, psychiatrists and pediatricians as well as public health doctors and nurses.

The seminar is being sponsored by the World Federation of Mental Health, with assistance contributed by the World Health Organization, the United Nations Educational, Scientific and Cultural Organization, the International Children's Center in Paris, the United States National Advisory Mental Health Council and the Grant Foundation of New York.

SHE'S COLLARED—Pretty Barbara Ralston, secretary at the United States embassy in Rome, wears a colorful horse-collar which is being sent to Gen. George Marshall by Palermo craftsman Angello Vasello. It completes the harness ensemble and horse cart seat the soldier-statesman by Sicilians appreciative of Marshall Plan assistance.

Avoid Facial Wrinkles With Foot-ease Exercises

BY EDNA MILES

YOUR feet are your surest method of getting from one place to another. All day long, they take you shopping, walking, move you quickly about on your household duties, then sometimes take you dancing in the evening. In return, you should give them the utmost consideration and care.

When your feet hurt or ache, your face quickly reflects the pain. To a dancer like Allyn McLerie, now appearing in the Broadway musical, "Desert Song," tired lines and sagging facial muscles would be disastrous. Here, then, are her expert tips on keeping in good shape by exercise.

To strengthen her arches, she likes to spread a towel on the floor, sprinkle it with marbles and then attempt to pick up the marbles with her toes. Practice makes perfect and you'll get better as you go along. You will also acquire stronger arches, the better to support you, as you acquire skill at the game.

A second important exercise from Allyn McLerie's beauty notebook is good for toes, arches and for toning up leg muscles as well. To do it, alternately stand on your tiptoes on two piled up telephone books, then slide back on your heels. Do this for 20 counts each day.

When you take your nightly bath, brush your feet briskly. That's an aid to circulation. Massage your feet with oil or cream several times a week. You'll find a mentholated cream is soothing to aching feet.

Be sure that your stockings fit properly and that they allow enough room for your toes to wiggle easily. It's preventive care such as this that will keep away severe foot aches and pains that women frequently develop in their middle years.

Graceful actress-dancer Allyn McLerie demonstrates her favorite arch-strengthening exercise. Scattering marbles on a towel, then retrieving them with her toes tones up foot muscles, makes them ache-free and comfortable even after her many dance routines in Broadway musicals.

Test Your Intelligence

Score 10 points for each correct answer in the first six questions.

- What name doesn't belong with the other three: —Chico —Harpo —Ropo —Groucho
 - In what sport is the word "chukker" used: —badminton —tennis —hockey —polo
 - Gilbert and Sullivan are famous for their: —tennis game —exploring exploits —operettas —cough medicine
 - The last of the 48 states given statehood was: —Texas —Arizona —Montana —California
 - The largest planet is: —Jupiter —Venus —Mars —Saturn
 - Who wrote the poem, Charge of the Light Brigade? —Kipling —Tennyson —Lee —Southey
 - Listed below at left are four famous cathedrals and opposite them, jumbled up, the cities in which they are located. Match them, scoring 10 points for each correct answer. (A) St. Paul's —Rome (B) St. Peter's —Paris (C) Notre Dame —New York (D) St. Patrick's —London
- Total your points. A score of 0-20 is poor; 30-60, average; 70-80, superior; 90-100, very superior.

Your Eyes Must "Learn" Television Says The Better Vision Institute

As eyesight authorities dig more deeply into the effects of television on seeing, there is increasing agreement that the TV screen is not necessarily harmful, says the Better Vision Institute. Special spectacle lenses have been devised to cut out the more unpleasant sensations. If you still experience eye fatigue, it may be because you are forcing your eyes to learn a new kind of skill.

The trouble with television, according to this theory, has to do with stereopsis, or depth perception, whereby one sees things in three dimensions. This is an acquired skill, derived largely from experience. A baby has trouble in learning it, but when he becomes annoyed at trying to figure out the third dimension he closes his eyes or looks somewhere else. That is, he lets his attention lapse.

A television screen is approximately a flat surface in two dimensions. An ordinary photograph is also flat but we have no trouble in imagining a third dimension of depth in it, because we have learned to look at it that way. But on the flat TV screen we actually see motion as well as depth, and that is something we have not learned to connect with a flat surface. So the eye struggles to learn how motion can be associated with flatness.

It is quite true that the screen in a movie theater is also flat, and the motion of the picture does not cause any trouble to most eyes, though some people still feel visual fatigue at the movies. The movie screen, however, is large and surrounded by dimness, so that it occupies practically the whole field of vision. There is nothing to destroy the illusion of looking through a picture window. A television set, however, is a box set in the midst of other motionless objects, all more or less illuminated and all reminding us that we are looking at a small, flat screen on which, or behind which, we are asked to believe that movement is taking place. Another complication is that the eye has to contend with different amounts of illumination

at the same time, the bright screen sending its rays to the central part of the eye and the less illuminated surroundings recording themselves on the outer parts of the retina.

Scalloped Eggs and Shrimp
1 cup medium white sauce
1 cup boiled shrimp
4 eggs hard boiled and sliced
½ cup buttered bread crumbs
In a greased baking dish arrange layer of hot white sauce, shrimp, eggs and crumbs. Brown in an oven 350 degrees. Garnish top with whole shrimp and egg slices.

Advertising makes any good business larger.

There is nothing wrong with business a good tax reduction wouldn't cure.

Caring For Horses Takes "Horse Sense"

Old Dobbin seemed to be on the way out a few years ago, but now thousands of Americans who own valuable saddle and running horses are getting a new appreciation of these four-legged friends, the American Veterinary Medical Association points out.

Also, many equine sport-enthusiasts are woefully lacking in "horse sense" when it comes to caring for their animals, AVMA officials said.

They pointed out that horse owners frequently overlook the fact that their animals need (1) proper treatment of bruises and scratches; (2) balanced rations; (3) regular dental care; (4) adequate parasite control.

When horses receive cuts and injuries, proper treatment of the wound is needed to avoid infection and the formation of excessive scar tissue.

Feeding of balanced rations is essential in helping prevent lameness such as subclinical osteoporosis or bone disease and various vitamin deficiency diseases.

Regular equine dental care, including the filing of sharp points on teeth, is needed to allow the animals to eat painlessly and thus help avoid indigestion or nutritional troubles.

Neglect of parasite control may cause horses to become rough-coated, poor doing, and suffer serious weight losses, the report concluded.

How to launder white nylon, to keep or restore its whiteness, is an important home laundering problem, says Betty Ann. To give practical aid to homemakers in response to this demand, research was conducted by the United States department of agriculture on the cleaning efficiency of 10 different soaps and synthetic detergents on sale in retail stores, effects of these detergents on the fabric, and home methods of restoring whiteness to nylon garments, discolored after wear and repeated laundering.

As a result of laundering soiled samples of white nylon in the laboratory, it is reported that all detergents do a better cleaning job in soft than in hard water. Soaps and one synthetic detergent built with alkaline salts proved most effective in removing soil from white nylon, but the un-built synthetics showed little soil removing ability with this fabric.

Tests of the effect of detergents on white nylon showed that no detergent tested caused shrinkage or weakening of the fabric after 75 launderings. However, white nylon, like other fabrics, became dingy or yellowed by repeated washing with soap in hard water.

Home economists advise washing white nylon separately from colored clothes, soaking before washing, washing with soap in soft or softened water, or with a built synthetic detergent, and, finally, thorough rinsing.

In searching for home methods to restore whiteness to discolored nylon, testers worked with 20 slips and blouses that had been worn and laundered many times. Success was reported in removing soil and hard water "soap curds" by soaking garments in four changes of water softened with sodium hexametaphosphate, a product that sells at retail under brand name.

To remove grayness or other discoloration, different household bleaches were added to the suds, according to directions. Though chlorine bleach proved most effective for whitening, it has the disadvantage of weakening nylon fabric. To offset this as much as possible, bleached garments were rinsed in acetic acid solution.

Moving to a new home often finds the homemaker faced with ill fitting window curtains in which the fabric is still sturdy. The homemaker who is handy with a sewing machine can easily convert these into decorator assets without upsetting the household budget.

For example, to revive a pair of discolored, shrunken curtains, rip open all seams and do a thorough laundering job. A quick tinting job will bring back original luster. After ironing all sections, take accurate measurements of new window arrangement and determine how much new material is needed to make up for shrinkage loss.

Frequently, all that's needed is a wide band of some cheery printed cotton. Ruffled edgings of frilly fabrics, moss fringes, and many other trimmings available by the yard at upholstery and decorating counters often solve the problem of adding length and width to too small curtains.

Blueberry Cobbler

There's nothing like a blueberry cobbler to send a diner into raptures about big, juicy blueberries topped with hot biscuit dough. An innovation of this recipe is the combination of blueberries with fresh or canned apricots. The recipe calls for two cups blueberries, washed and well drained; two cups fresh or canned apricots, halved; one-half cup sugar, two tablespoons quick cooking tapioca, one and one-half cups sifted all-purpose flour, one-fourth cup sugar, one-fourth teaspoon salt, one-fourth cup shortening, one-third cup milk and one egg, slightly beaten.

To make filling: Place blueberries and apricots in 10 by 6 by 2 inch baking dish. Combine sugar and tapioca. Sprinkle over fruit.

To make topping: Sift together flour, sugar, baking powder and salt. Cut in shortening until mixture resembles corn meal. Stir in milk and egg mixture until dough forms a ball. Turn out on lightly floured board. Roll into rectangle to fit baking dish. Place over fruit. Brush lightly with milk. Bake in moderate oven, 350 degrees, 35 to 40 minutes. Serve warm with cream. If frozen blueberries are used, thaw and drain. Proceed as with fresh berries. If canned blueberries are used, drain. Proceed as with fresh berries. Makes about eight servings.

Furniture Fashions

Moderate-priced outdoor furniture, which comes in a wide selection of new models, may be attractively arranged for loafing or dining al fresco. Summer furniture is keeping pace with the recent design advancements made by all other types of furniture. It is becoming more durable, more comfortable, more decorative, and infinitely more sophisticated. An outdoor living room, that every member of the family can enjoy, is now within the average family budget. Not so long ago, the outdoor living area was limited to the narrow confines of a porch or a shade tree. Today, all you need is an outdoor area that's protected from the wind and the blazing sun.

FRONT LINE ACTION—Here is a photograph of a typical scene during the fighting on Korean terrain. (Department of Defense photo.)

RAISING THE ROOF—Nonchalantly walking away from a hut in Korea, a Leatherneck of the First Marine Division doesn't even turn to see the damage wrought by the phosphorous grenade he has thrown. The hut was destroyed to prevent enemy snipers from using it.

HIGH HOPES FOR ROCKET-MAIL—Prof. Albert Puellenburg, standing at switchboard on left, watches his rocket make the first of five test flights from a 20-foot ramp near Bremen, Germany. He is experimenting on mail-carrying possibilities of the missiles, using experience gained as designer of Germany's V-bombs which blasted London during World War II. Allied security inspectors watched the experiment and saw Germany's first postwar rocket in action.

Must Develop Child's Sense of Humor Early

You will enjoy your child more if you help him develop his. The ability to laugh at funny situations comes before the ability to talk, says child expert Irma Simon Black, but it needs practice before it can become the rollicking kind of appreciation that is so much fun to live with. Writing in Redbook Magazine for September, she encourages parents to play along with their child's humor:

"The beginnings of humor are not likely to have you in the aisles, but greet them with a smile instead of with a prim 'Don't be silly.' Even before a baby can talk, he can laugh at funny situations. Peekaboo is an uproariously funny game to the year-old child.

"Children enjoy a humor of action that frequently induces heightened blood pressure in literal-minded adults. But if you keep calm and play along with the child, you'll both end up with the good feeling that accompanies a shared laugh.

"For instance, look at a kindergarten class earnestly twirling to music. They are being merry-go-rounds. The teacher plays the signal to stop, and they are all still but one individualist who turns dizzily by himself and grins happily. 'I can't stop. My machine's stuck,' he calls.

"The teacher smiles and says, 'I'm a good mechanic.' She walks over and makes motions of turning switches while the rest of the class watches with obvious amusement. The repair work is successful, and the merry-go-round stops in high spirits.

"Laughing with children definitely does not mean laughing at children. When a child unwittingly makes a funny remark—like the small boy who said his cat had four kittens, two males and two airmails—that is the time to repress the gaffaws, or at least save them for a time when he is not present.

"The child whose parents are responsive to his humor has a good time and the shared nonsense becomes the basis for a good relationship between them."

Patience

A man had been waiting patiently in the post office, but could not attract the attention of either clerks behind the counter. "The evening cloak," explained one of the girls to her companion, "was a redingote design in gorgeous lama brocade with fox fur and wide pagoda sleeves."

At this point the long-suffering customer broke in with: "I wonder if you could provide me with a neat purple stamp with a dinky perforated hem. The tout ensemble deliberately treated on the reverse side with mudge. Something at about 3 cents.

Regardless of what the teenager thinks, even if Pineville loses its football opener, the world will continue to turn.

"Would you mind bringing canned apple sauce until I get my new false teeth?"

It Could Be

A New Englander was enjoying the wonder of California as pointed out by a native.

"What beautiful grapefruit," exclaimed the easterner as they passed a citrus orchard.

"Grapefruit," replied the native sneeringly, "Why they are just small lemons."

Gazing at some huge sunflowers, the visitor asked, "And what are those enormous blossoms in that big field?"

"Just dandelions," the native replied disinterestedly.

A few minutes later they came to the Los Angeles river. "Ah," said the Yankee, "I see someone's radiator is leaking."

"You can't tune me out, mister! I'm the repairman."

HAIR BREADTH HARRY

THOSE WERE THE DAYS

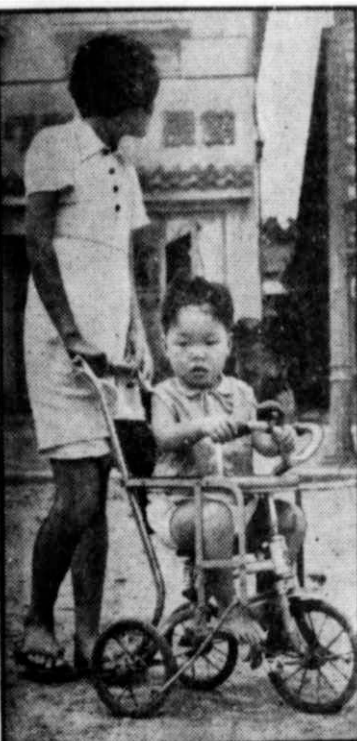

REVIVE GRASS PORCH RUGS

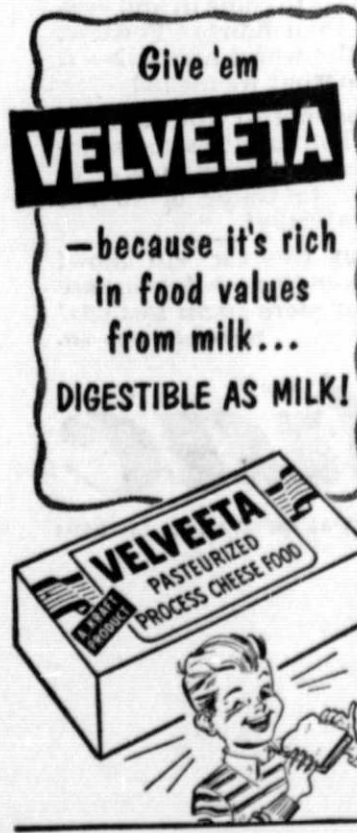

Place rug on garage floor or driveway with newspapers underneath. To paint stripes place two cardboard strips on rug the desired width of stripe and spray with either hand or power spray. To make designs on rug make a stencil of design desired and spray the same as stripes.

REVIVE FADED PORCH RUGS OR MATS

It is not necessary to throw away faded grass porch rugs or mats. They can be made as attractive as new by the home repairman.

CONVEYANCE COMBO—Thanks to his ingenious father, this Tokyo tyke has a combination tricycle-carriage. When mother doesn't feel like pushing, baby takes over, and when he grows up, this Japanese lad will just remove the bars, and presto, he'll have a tricycle.

State Educational Programs On Air For Young & Old

MADISON, Wis.—Wisconsin, pioneer in educational broadcasting since it established "the oldest station in the nation" in 1917 at the University of Wisconsin, will become the first state with a blanket coverage educational network September 14.

UW Prof. H. B. McCarty, director of the Wisconsin State Broadcasting Service, today announced that the last two FM stations in the state network would go on the air with an inaugural broadcast September 14. Their completion will provide state-wide coverage on Wisconsin's two AM stations: WHA on the University campus in Madison; the key station of the network, and WLBL, Auburndale; and on eight FM stations.

The newest links are FM stations: WHHL, Highland, and WHSA, Brule. Earlier FM stations in Wisconsin's educational network are WHA-FM, Madison; WHAD, Delafield; WHKW, Chilton; WHRM, Rib Mountain; WHWC, Colfax; and WHLA, West Salem.

McCarty figures that the total capital investment by the state for the complete network amounts to about 20 cents for each Wisconsin resident; that their total operating cost for a year will amount to the price of a bag of popcorn for every state resident, 10 cents.

Only the key station of the network, WHA, is operated by the University; the others are a joint project of state agencies represented in a State Radio Council. Programming originates on the University campus, but pickups and tapes are gathered from many points in the state including the State Colleges.

Stymied in a bid for both day and night service for its AM outlets, in 1945 the Wisconsin Legislature laid plans for an FM network of stations on frequencies reserved for educational use by the Federal Communications Commission.

Although the AM stations must close at sunset, programming continues on the FM affiliates from 7 a.m. until 11 p.m. each day. Programs center in three areas:

1. "School of the Air" courses, beamed to Wisconsin grade schools, bringing them radio classes in everything from conservation to art;
2. "College of the Air" courses, mainly University lectures and other adult-education programs, which cover fields from agriculture to Greek drama;
3. Classical music, farm, home-maker, weather, news, and public service program. Eight hours of each broadcast day are devoted to music.

More than 500,000 Wisconsin school children were registered in School of the Air programs last year. To supplement the radio offerings, the class workbooks and teachers' manuals are provided for school listeners.

In addition to its own transmitters, State Broadcasting Service programs are carried on a number of commercial stations to which all programs are made available free, if they are carried on a sustaining basis.

Evidence that the state network of FM station has stimulated purchases of FM receivers in Wisconsin was shown in a recent survey. In one Wisconsin metropolitan area, 42 per cent of the homes sampled had FM receivers, and of those who did not, four out of five indicated that their next receiver would include FM.

Lucky Man
"Angus, they tell me you and Brother Donald were in a railway accident. Did you collect any damages?"
"We did. But never a shilling wud we have, had I no thocht to kick Donald in the face!"

No one can be as sure of his opinions as the thoroughly ignorant.

Sarah Anne's COOKING CLASS

Louisiana Shrimp Loaf Easy Canned Entree

For economy's sake, you'll find the Louisiana canned shrimp now on your grocer's shelves a real treat to the budget, as well as to delightful eating. Praises be—canned shrimp are actually less costly now than they were ten years ago, and yet their quality is even better, both points thanks to mechanical innovations in cleaning, peeling and handling. Save money by using the medium and small shrimp, every bit as full of flavor and high nutrition as the great big ones, and easier to stretch in these times of slim food budgets.

Here's something new, this shrimp loaf, made in a jiffy when you get your shrimp from cans, all shelled, cooked, and cleaned. Serve with a tasty Pimiento Pea Sauce and grilled tomatoes, plentiful this month, and you have a full dinner that will never betray its thrift.

Shrimp Loaf

- 2 eggs
- 1 cup milk
- 4 cups soft bread crumbs
- 2 5-ounce cans shrimp
- 2 tablespoons chopped parsley
- 1/2 teaspoon salt
- 1/4 teaspoon pepper

Beat eggs, combine with milk, add soft bread crumbs and shredded canned shrimp, chopped parsley, salt and pepper. Mix well and pack into well-oiled loaf pan. Bake in a moderate oven (350° F.) 45 minutes. Turn out on platter and serve with grilled tomato halves and Pimiento Pea Sauce. YIELD: 6 servings.

The traditional ways of preparing fish and seafood are still as popular as ever. But we can also enjoy crisp and molded salads, fish souffles and many others. Try these and you'll want to serve them often.

Fish Roll

Baking powder biscuit dough, using:

- 2 cups flour
- 1 1/2 cups flaked cooked fish
- 1 small onion chopped
- 1 green pepper chopped
- 1/2 teaspoon salt
- Milk

Roll biscuit dough to 1/4-inch thickness on floured board. Combine fish, onion, green pepper and salt. Moisten slightly with milk, mix well. Spread mixture on dough. Roll as a jelly roll and cut into 1 1/2 inch slices. Bake on a greased baking sheet in an oven 400 degrees for one-half hour.

Salmon Fondue

- 5 slices bread
- 1 cup milk
- 2 tablespoons butter
- 1 cup flaked cooked salmon
- 3 eggs separated
- 1/2 teaspoon salt
- 1/2 cup grated American cheese

Trim crusts from bread and cut bread into 1/2-inch cubes. Heat milk in double boiler. Add bread cubes, butter, liquid from salmon and well beaten egg yolks. Season with salt and cook until thickened, stirring constantly.

Remove from fire and stir in cheese. Cool for 10 to 15 minutes. Add salmon. Beat egg whites until stiff and fold into mixture. Pour into greased baking dish. Place dish in shallow pan of hot water and bake in an oven 350 degrees for one hour.

Shrimp Salad Bowl

- 2 1/2 cups cooked shrimp, cleaned and halved
- 1 cup cooked peas
- 1/2 cup chopped celery
- 2 hard boiled eggs sliced
- 1 small cucumber, pared, scored and sliced thin
- 1 small head lettuce, shredded
- Mustard French dressing

Have ingredients chilled and combine all except the dressing in a salad bowl. Add dressing and toss until salad is slightly coated with dressing. Garnish top with a few whole shrimp.

Crab Spaghetti Casserole

- 1 9-ounce package spaghetti
- 1 1/4 cups condensed cream of mushroom soup
- 3 tablespoons butter
- 1 cup milk
- 1/2 lb. sharp American cheese, grated
- 1 1/2 cups flaked crabmeat
- 1/4 teaspoon pepper

Cook spaghetti in boiling water until tender. Drain. Heat soup, stirring until smooth, add butter and milk. When hot remove from heat and stir in grated cheese, saving some to sprinkle on top. Combine cheese sauce with spaghetti, crabmeat and pepper. Place in a greased shallow casserole and sprinkle with remaining cheese. Bake in oven 400 degrees about 30 minutes.

Lobster Stew

- 2 tablespoons butter
- 4 tablespoons flour

- 2 cups cream
- Salt
- Pepper
- 1/2 teaspoon sugar
- 2 cups cooked lobster meat cut into small pieces
- 1 egg yolk, if desired

Melt butter, add flour, stirring until smooth. Add cream gradually. Cook for 10 minutes, stirring constantly. Remove from heat. Season. Add lobster meat. The stew should have the consistency of a fairly thick white sauce. Egg yolk added to the stew just before serving gives a richer flavor. The stew must not boil after the yolk has been added.

Scallops en Brochette

- 1 pound scallops
- 3 tablespoons butter
- 6 to 8 slices bacon
- Salt and pepper

Cook scallops in butter for 5 minutes. Cut bacon into 2 inch pieces. Arrange bacon and scallops on skewers and sprinkle with salt and pepper. Stand skewers upright by inserting through mesh of a cake cooler placed over a pan, or insert skewers into a large uncooked potato. Bake in an oven 475 degrees about 20 minutes or until bacon is crisp and scallops are browned.

Pattern of Week

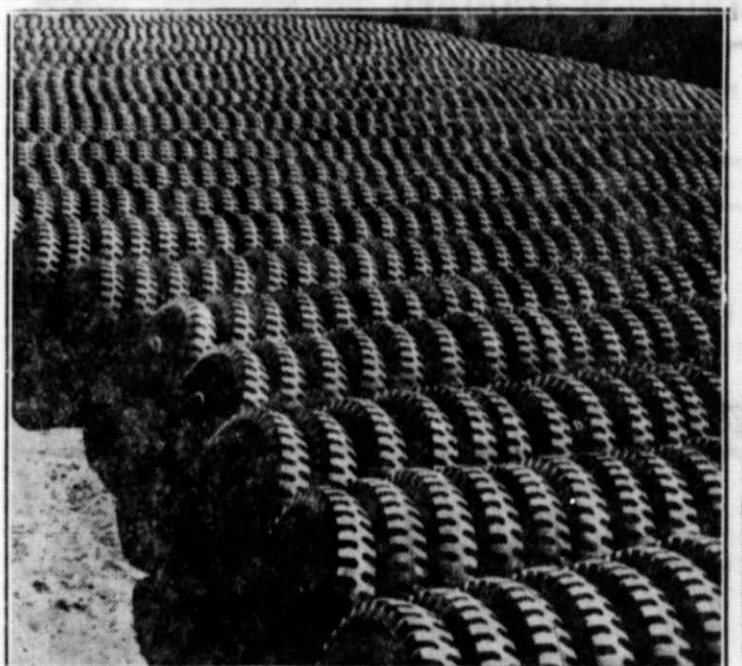

9032 by Marjorie Martin

Pattern 9032 (4 sleeve versions) sizes 34, 36, 38, 40, 42, 44, 46, 48, 50, 52. Size 36 takes 5 yards 35-inch fabric. Send Thirty-five cents in coins for this pattern to 170 Newspaper Pattern Dept., 232 West 18th St., New York 11, N. Y. Print NAME, ADDRESS with ZONE, SIZE and STYLE NUMBER.

Plowettes Unplug Snow-Filled Drives

Clevelanders A. S. Jaffe and Mike Morris, fed up with driveway-shoveling on snowy mornings, invented plowettes to do the job. Jaffe, seen above, is attaching the V-bladed snow-cleaner to his bumper. It will clear wheel-width paths; worked well in snow and sand tests.

PART OF ONE DAY'S SUPPLY OF TIRES AND WHEELS—At an Army repair shop in Japan acres of heavy automobile tires are used in rehabilitating military vehicles which had been abandoned after World War II. These were collected from the Philippines, Guam, Okinawa and other Pacific islands where they had been assembled for a possible invasion of Japan in 1945. The pile pictured here represents the number required for one day's production of 2 1/2-ton trucks. (Department of Defense photo).

KISSES ARE COWLICKS TO DOTTY—Prize Jersey cow Pearl, at right, consoles lonesome Dotty on the Elkhart, Ind., farm of their owner, Larry Snider. Dotty seems to be crying, possibly over harsh words from the bull on the next farm.

THEY LACK MAC, BUT—Without the official blessing of Gen. Douglas MacArthur, his supporters are out to get signatures to place the general on state ballots as candidate for president. MacArthur's running mate would be Sen. Harry Byrd of Virginia. In Chicago, Stephen Turkovich and Jennie Kroeger help the drive by soliciting signatures.

Less Gas!

Drive it Yourself!
 The most wonderful miles of your life start the minute you get behind the wheel of a new Pontiac and drive it yourself! Come on in any time, it's a pleasure for us to introduce you to this great new performer.

Get all the wonderful things you want in a car—including low price! The perfect way to get this done is to come in and look at the great new Dual-Range* Pontiac, then get behind the wheel and drive it yourself. You'll see what we mean!
 Pontiac is big, distinctive and famous for dependability. Pontiac gives you spectacular Dual-Range performance — to match your power to traffic or to the open road, automatically!
 And what economy this car will show! In Cruising Range, engine revolutions are cut 30 per cent—for more go on less gas!
*Optional at extra cost.

Dollar for Dollar you can't beat a Pontiac
