

## Ziegler Chairman of Red Cross Fund Drive; Plans Ready

Appointment of R. D. Ziegler, West Bend, as general chairman of the 1953 fund campaign of the West Bend chapter, American Red Cross, has been announced by Reverend D. L. Wandschneider, the chapter chairman. Ziegler will direct the 1953 fund drive in the West Bend chapter area with the objective of surpassing the quota before March 15, in the hope that West Bend will be among the first chapters in the nation to top its goal.

Officially the drive opens March 1 and continues through the month, but local plans are already complete and work has begun. First returns have been most encouraging, the chairman said, indicating that the people of this area recognize the value of the humanitarian services offered on a local, national and international scale by the American Red Cross.

"Within the past few days we have all seen the valiant story of Red Cross service reenacted in the disaster areas of England, Holland and Belgium. Next week or tomorrow the scene may change to this country, even to our own state. But wherever disaster strikes, the Red Cross will be there, providing comfort and rekindling hope in the hearts of the victims. It is for this kind of service to humanity that the American Red Cross seeks the generous support of each one of us," Ziegler said.

Still another major activity for which funds are needed during the year ahead is the collection and processing of blood to meet the needs of civilian hospitals, of the wounded in Korea, of the nation's plasma reserves, and of the vital new gamma globulin battle against polio. The total program will require an estimated five million pints of blood and will cost the Red Cross nearly 17 million dollars in the next year, the chairman disclosed.

"We are especially interested in the new gamma globulin program inasmuch as Red Cross has been asked to expend its blood collections to produce as much gamma globulin for next summer's epidemic needs as blood processing laboratories can handle. It takes a full pint of blood to produce a single shot of this new polio fighting serum and minimum needs are for two million shots.

"A program of this importance deserves the wholehearted support of every American. We are confident that the people in the West Bend chapter area will line up solidly in support of the humanitarian work of Red Cross," he added.

Chairmen have been appointed in all precincts of the West Bend chapter area and quotas will be announced next week. In general, it is expected quotas will be about ten per cent over last year, largely due to the need for additional funds for gamma globulin processing.

Noting that the West Bend chapter has made an outstanding record in achieving its quota early in the campaign, Ziegler emphasized that he hopes this area will be among the first in the nation to go over the top in 1953.

Persons interested in working on the campaign are urged to contact Red Cross headquarters in West Bend, phone 392, or to get in touch with the precinct chairman in their area. Names of all precinct chairmen will be announced next week.

### GUILD PLAYERS TO APPEAR AT HIGH SCHOOL ON MONDAY

The Guild Players, comedy and musical quartet, will appear on a school assembly program sponsored by the University of Wisconsin Extension Division at Kewaskum High school at 12:45 p. m. on Feb. 16.

The two young men and two young women will present skits showing comedy from the time of ancient Greece to the present and mix them with humorous musical sketches.

### FOOD SALE AT PARISH

The Ladies' Altar society of Holy Trinity congregation is sponsoring a food sale Saturday, Feb. 14, at 2 p. m. in the church hall. Everyone welcome.

## STANDARD AGENT RECEIVES RECOGNITION

Norman Jaeger (right above), local Standard Oil Company agent, returned from Milwaukee after attending a recent 2-day clinic for Standard Oil trainer agents. Jaeger has been on the staff of the company's Milwaukee sales field agent training program for the past several years. The company's Milwaukee sales field covers a large

## 10 From Kewaskum Attend Bird Truck Jack-Knives, Weber Testimonial Fete

More than 800 of Martin Weber's friends, including ten from Kewaskum, turned out Tuesday night at the Nightingale ballroom near Menomonee Falls for a testimonial dinner to the sports veteran who is retiring after 30 years as director of the Land of Lakes baseball and basketball activities. Martin and Mrs. Weber of Merton were presented with a complete silver service set and other gifts.

Among the speakers were Charley Grimm, manager of the Boston Braves; Tommy Holmes, manager of the Milwaukee Brewers; Jack La Velle, nationally known football coach; Fred Miller of the Miller Brewing Co., Zip Morgan, director of Milwaukee's municipal sports program; Bill Chandler, former Marquette university basketball coach; Joe Conway, Big Ten official, who recently returned from an instruction tour of Japan; Red Smith, general manager of the Brewers; Russ Lynch, sports editor of the Milwaukee Journal; Rep. Glenn Davis of Waukesha; Fred Mendelson, manager of the Milwaukee county stadium, and Roman Benz, Lloyd Larson, Milwaukee Sentinel sports editor, was master of ceremonies. A delicious turkey and ham dinner was served.

Weber helped organize the Lakes league in 1922 with six teams. In his 30 years as director it grew to four leagues. In its peak year, 1950, more than 15,000 boys and men played on 108 teams. A basketball league grew out of the baseball promotion. Weber now is an Oceanowoc insurance man.

### ALTAR SOCIETY HOLDS ITS MONTHLY SOCIAL MEETING

Members of the Altar society of Holy Trinity church held their monthly social at the church hall on Tuesday evening. After a brief business discussion and a talk by Father La Bue, cards were enjoyed by some while others engaged in missionary work. A delicious lunch was served by the hostesses who were: Mrs. Cyrus Campbell, Mrs. Oscar Hirsig and Mrs. Michael Kohn, Jr.

### JEROME STAUTZ, BERNARD HAFEMANN FAMILIES MOVE

Mr. and Mrs. Jerome Stautz and daughter Karen recently moved from the upper flat of the Arvin Merwin home on Clinton st. into upper flat of the Wm. Bruhn home on N. Fond du Lac ave. recently vacated by the Allen Tessars.

### MR. AND MRS. BERNARD HAFEMANN AND DAUGHTER BONNIE MOVED FROM THE UPPER APARTMENT OF THE MRS. JOHN F. SCHAEFER HOME, VILLAGE, TO THE FORMER Wm. F. SCHAEFER HOME WEST OF KEWASKUM.

## Board Meets, Plans New Sewage Plant

Regular Meeting, Jan. 5, 1953  
The Village Board of Kewaskum, Washington County, Wisconsin, met in regular monthly meeting with President C. Miller presiding and all board members present. The minutes of the previous meeting were approved as presented.

Mr. Nick and Harry Brabender of 311 Benjamin Street, Port Washington, Wisconsin, discussed with the Board the advantages of preparing an Assessor's Plat Map and also presented samples of the work they had done for other communities.

Mr. Gensch and Mr. Clinton of the McMahon Engineering Co. discussed with the Board the preliminary plans for a new sewage disposal plant. Motion was made by L. Kohn, seconded by J. Eberle that the McMahon Engineering Co. also present a set of plans which would incorporate an incinerator. Motion carried.

A meeting of the Board with representatives of the Rosenheimer Malt and Grain Co. and of the Wm. H. Heinemann Creameries was tentatively set for 8:00 P. M. Jan. 19, 1953.

The Commissioner and the Chief of Police were instructed by the Board to notify the Remmel Manufacturing Co. to remove the sidewalk barricade on First street.

The Commissioner was instructed to arrange for additional trucks in the event a snow removal program is started.

Motion by A. Martin, seconded by E. Schaefer and carried that all bills and wages as recommended and approved by the finance committee be allowed and paid.

## In the Service

### PFC. HAROLD STERN HOME FROM KOREA; DISCHARGED

Pfc. Harold E. Stern, son of Mr. and Mrs. Fred C. Stern, who live on Route 2, Kewaskum, was released from active duty Feb. 5, at the army separation center in Camp Carson, Colo.

Stern served for 6 months as a rifleman with the 2nd Division in Korea. He has been awarded the Combat Infantryman badge and the UN and Korean service ribbons.

He entered the army in February, 1951.

### SGT. ALLEN STAHL RETURNS FROM KOREA; IS DISCHARGED

Sgt. Allen Stahl, son of Mr. and Mrs. Arno Stahl, R. 1, Kewaskum, returned home recently from Korea, where he was stationed for 15 months with Radio Co. 304, Sig. Ogn. Bn. He received his honorable discharge at Camp Carson, Colo. after being in the service two years.

### LEO NIGH AT FORT CUSTER, BROTHER AT BRECKINRIDGE

Pvt. Leo Nigh, overseas veteran, who formerly was at Walter Reed Army hospital, Washington, D. C., now is stationed at Fort Custer, Mich. His address is Pvt. Leo A. Nigh US 55219905, Hq. Co., 5450 ASU, Fort Custer, Mich. Pvt. Nigh's brother, Pvt. Vincent Nigh, is at Camp Breckinridge, Ky. at present and his address is Pvt. Vincent J. Nigh US 55319633, Co. 1, 53rd Abn. Inf. Regt., 101st Abn. Div., Camp Breckinridge, Ky. They are the sons of Mr. and Mrs. Elmer Nigh of the town of Auburn.

### WINNERS AT BAND PARENTS CARD PARTY ANNOUNCED

A benefit card party was held at the Legion club house Tuesday evening, Feb. 10, by the Band Parents organization. Door prizes were awarded to Paul Moritz, Mrs. Ray Schaefer and Mrs. Henry Becker. The winners in the card games were: Bridge—Mrs. Henry Rosenheimer, Mrs. E. M. Romaine, Mrs. Fred Miller, Mrs. August Bartelt; sheephead—Mrs. Elmer Zuehler; Harvey Jansen, Mrs. Harvey Jansen; 500—Mrs. Edna Reysen, Paul Belger; skat—E. M. Romaine, Fred Schief, Aug. Bartelt; gin rummy—Maurice Hammer.

The Band Parents wish to thank the Robert G. Romaine post of the American Legion for the use of the club house.

## Board Meets, Plans Slinger Walloped by Chevs, 79-35

### LAND OF LAKES STANDINGS (Second Half)

Team	Won	Lost
Mayville	3	0
KEWASKUM	2	1
Oakfield	2	1
West Bend	2	1
Slinger	2	1
Horicon	2	1
Random Lake	2	3
Hartford	1	3
Watertown	0	3
Rosendale	0	3

Scores last week end—Kewaskum 79, Slinger 35; West Bend 82, Rosendale 66; Oakfield 99, Hartford 72; Mayville 88, Horicon 79 (double overtime); Random Lake 98, Watertown 86.

Games Saturday, Feb. 14—Kewaskum at Hartford, West Bend at Watertown, Horicon at Rosendale.

Games Sunday, Feb. 15—Kewaskum at West Bend, Watertown at Horicon, Mayville at Slinger.

After being upset by Oakfield in the first game of the second half the week before, the Kewaskum Chevies bounced back with a vengeance Sunday night here and took it out on hapless Slinger. The team soundly shellacked Slinger, 79-35, a margin of 44 points. This was Slinger's first defeat of the second half and knocked them out of first place.

The one-sided victory put Kewaskum in a tie for second place with four other teams. Mayville went into undisputed first place by edging Horicon in double overtime.

Slinger lagged far behind all the way. The home team started slowly and led at the quarter, 11-6. In the second period the locals went well ahead, 29-12. Kewaskum poured it on in the last two quarters, scoring 50 points to Slinger's 22. The Chevys put home 28 points in the third stanza while holding Slinger to a mere seven. This brought the count to 67-19, a margin of 38 points. The winners again outscored the invaders in the final period, 22-16.

Everybody on the Chev squad got into the scoring column and even Manager Billy Honeck went in to score three points. Although the scoring was divided, Fred Engel was high man with 15, followed by W. Tessar with 13, Edwards with 12 and Bilzo with 11. Center Lofy paced Slinger with 15. Slinger's high scoring forward, Nick Mago, who is up among the league leaders, was checked without a single field goal. This was the first time in years that Mago was held without a basket by any team. He sank only two free throws. The Chevys dropped in 21 free throws to Slinger's 11.

The team plays at Hartford Saturday night and again the next night at West Bend. That is on Sunday in a big one. The Chevys expect to have their hands full with the ever-improving Benders. A big crowd from here intends to follow the team.

### GIRL SCOUTS TO CELEBRATE 41ST BIRTHDAY WITH SUPPER

The Girl Scout committee met at the home of Mrs. Paul Landmann Tuesday evening, Feb. 3. It was decided to celebrate the Girl Scout organization's 41st birthday, March 12, with a supper at one of the churches during that week. This gathering will include the Intermediate Girl Scouts and the Brownie scouts, their parents and their committee members. Following the supper the investiture service will be held. Badges will be awarded and a short program will be presented by the intermediate scouts.

## Death of Edwin Jung Thursday

Edwin J. H. Jung, 40, town of Ashford farmer, residing on R. 3, Campbellsport, son-in-law of Chas. Brossemann of Kewaskum, passed away at St. Agnes hospital, Fond du Lac, Thursday, Feb. 12, following an illness of ten days.

He was born Dec. 16, 1912 in the town of Ashford and married Verona Brossemann in the St. Lucas Evangelical Lutheran church, Kewaskum, on June 13, 1941.

Surviving are the widow, his parents, Mr. and Mrs. John Jung, West Bend, and two sisters, Loretta (Mrs. Milton Glander) of Saukville and Stella (Mrs. Hubert Albert) of Iron Ridge, R. 1.

The deceased was a member of the Young Adults group of Salem Ev. Reformed church, Wayne.

The body will be in state at Miller's Funeral home, Kewaskum, after 7:30 p. m. Saturday. The remains will be taken to the Salem church Monday, Feb. 16, to be in state from 12 noon until the time of services at 2 p. m. The Rev. Strookmeyer will officiate and burial will be in Washington County Memorial Park, West Bend.

### EDWARD KREUTZINGER

Funeral services were held Tuesday, Feb. 3, at the Evangelical and Reformed church, Beechwood, for Edward F. Kreutzinger, 76, who died suddenly of a heart attack while seated at the supper table at his home in Beechwood at 5:45 p. m. Saturday. He was an uncle of Henry, Edward and Otto Weddig of here. The Rev. B. M. Frensenborg presided and burial was in the Beechwood cemetery.

He was born Sept. 20, 1876, and was married to Sarah Allmon Feb. 20, 1906. Besides his wife he is survived by one son, Herbert, Adell; one daughter, Marie (Mrs. Ervin Krabn), Beechwood; 15 grandchildren and seven great-grandchildren. Mr. Kreutzinger was a retired farmer having started farming in the town of Lyndon. Later he moved to Beechwood and farmed there for 41 years. For one and one-half years they lived in Batavia. Five years ago the Kreutzingers returned to Beechwood.

### LEO C. ARIMOND

Leo C. Arimond, 72, of 1029 N. 22nd st., Milwaukee, a native of Dundee and former businessman there, died of a heart attack early Tuesday, Feb. 10, at County Emergency hospital in that city. The nephew of many embezzlers, income tax dodgers and check forgers, he helped to expose millions of dollars in frauds and swindles in 40 years as chief investigator for the First Wisconsin National bank in Milwaukee. Mr. Arimond was well acquainted and had many friends in this community. He had been in ill health for about five months but was at his office yet Monday.

As special investigator, Mr. Arimond technically worked under the bank's credit department and his operations resembled those of a detective. Whenever the bank observed financial transactions that seemed to be out of line, Mr. Arimond was assigned to investigate. He worked closely with the police department, postal inspectors and federal attorneys.

Born at Dundee, Mr. Arimond operated a flour mill there and a hydroelectric plant at Campbellsport before going to Milwaukee. On first arriving in that city he worked as a private investigator for a number of firms. In 1913 he became associated with the old Second Ward Savings Bank, later absorbed by the First Wisconsin.

Surviving are his wife, the former Anna Flynn of Campbellsport, and a son, Carroll, day city editor in the Chicago Bureau of the Associated Press.

Funeral services were held at 9:15 a. m. Thursday at the Geau church, Milwaukee. Burial was in St. Matthew's cemetery at Campbellsport.

### JOHN CAMPBELL

Word was received here of the death of John Campbell of Stockbridge, Wis. He was a native of the town of Kewaskum and will be remembered here by many, having attended high school in Kewaskum. He was the last surviving member of a family of five sisters and

## Indians Clinch Share of Crown, Tip Oaks, 64-47

### TRI-COUNTY STANDINGS

Team	Won	Lost
KEWASKUM	10	0
Campbellsport	8	2
Oakfield	5	5
North Fond du Lac	4	6
Lemira	4	7
Rosendale	3	8
Brandon	2	8

Scores last Friday—Kewaskum 64, Oakfield 47; Campbellsport 80, Lemira 60; North Fondy 60, Rosendale 50.

The Kewaskum Indians, toast of this part of the state, won their tenth conference game in a row without a defeat when they trounced Oakfield here last Friday, 64-47. The win clinched at least a tie for league championship. The loop pacing Indians now have a record for the season of 13 wins and one loss. Kewaskum, which ranks sixth best in the state in the "Little 16" by the Wisconsin Interscholastic association, needed only one more win to cop the undisputed title in the conference. The team had two games remaining.

In rolling over Oakfield Friday, the Indians were tied at 11-all by the Oaks in the first quarter but then blasted away for 13 points in the second period and 35 markers in the final half. Big 6 ft. 4 in. Geo. Hanrahan, Kewaskum's star center and leading scorer in the loop, again was tops for the winners with 21 points. He averages 24.3 points per game for the Indians. Guard W. Colleen led Oakfield with 16 points. Leroy Keller tallied 13 and Russ Rodenkirch 14 for the winners.

On Friday night of this week the Indians played at Campbellsport and the Belles stood as the team's only barrier between a clean slate and undisputed crown. The Mitchelmen's final game next Friday is against fifth spot Lemira. Second place Campbellsport, 1929 games behind Kewaskum, was expected to give our champions an all-out and close battle. A huge crowd of local fans planned to follow the team.

## Merriam Joins Schloemer and Stoltz Law Firm

Attorneys Schloemer & Stoltz this week announced the association of Attorney J. T. Merriam as a partner with them. They will continue to maintain their offices at the corner of 6th & Hickory, West Bend, and in the Westphal building, Newburg. Mr. Merriam has been associated with this firm of attorneys since April of 1949. The firm will hereafter be known as Schloemer, Stoltz & Merriam.

Mr. Schloemer began practicing law in 1923. Mr. Stoltz became associated with him in December of 1935. These two attorneys formed the partnership of Schloemer & Stoltz in January of 1937.

Mr. Merriam was born and raised in West Bend and graduated from the Marquette University Law school in March of 1948 after having spent three years with the U. S. Army Air Force. Mr. Merriam maintained his own individual practice in West Bend from March of 1945 to April of 1949 when he first became associated with Attorneys Schloemer & Stoltz.

two brothers. Two of his nephews live in this vicinity—Miles Campbell on the original homestead and Cyrus Campbell, both of the town of Kewaskum.

NIGHT ACTION! A 155-millimeter howitzer in Korea fires on Communist positions. Superior weapons such as this, manned by highly trained soldiers, have given American divisions a decided advantage over the Reds in killing power.

FAST "STEPPING" PARAPLEGICS—Rolling through intricate twists and turns of a fast-moving square dance, pretty paraplegic co-ed Bruce Aldenderfer of Waukegan, Ill., is swung by her partner, Marvin Berron, of St. Marys, O. Both are students at the University of Illinois and participate in a special program for paraplegic college students. Looking on are two fellow wheel-chair occupants, Bruce Atwood of Pana, Ill., and James Lee of Edwight, W. Va.

BIG SQUEEZE—Marine Sgt. William Kuhl of St. Louis, Mo., has been in some tight spots in battle during his Korean war service but nothing like this double hug from his wife, Ruth, and eight-year-old son, Michael. They met in Chicago for a few minutes when Sergeant Kuhl stopped over on his way to march as part of the color guard in Ike's inaugural parade. His wife and son drove from St. Louis for the brief meeting.

ATOMIC TUMMY—Checking the atomic-engine-filled stomach of this model of the submarine Nautilus, on exhibition at Atlantic City, N. J., is Electrician 1/c. William Christian. The vessel, now under construction at Groton, Conn., will be the world's first atom-powered sub. It will be capable of running for months under water at a speed of 20 knots.

Gold Dust From Lab Helps Build Home

Maxine Thompson, of Glendale, California, used dust to build a house for herself, her dental technician husband and their three children. The dust was gold dust, to be sure—but it was Maxine's imagination and energy that parlayed a few cents' worth of it into a home worth nearly \$25,000, says Kate Holliday. Writing in Redbook Magazine for January, she tells the story of how Maxine built "Hilltop House":

"About two years ago, Maxine and her husband, dental technician Bill Thompson, got pretty bored with paying out large sums for rent. They had owned their own place at one time, and wanted to again, especially for the sake of the three young Thompsons: Deanna, Craig and Billy. But 34-year-old Bill was in the throes of building up a dental laboratory. Every spare cent went into new equipment and supplies. "Maxine's brain went into action one day, when she was helping Bill with the bookkeeping at the lab. After he had finished a customer's bridge, she saw him sweep some gold filings into a Mason jar.

"Hey! What do you do with those?" she asked. "Sell them to the refinery." "And what do you do with the money they bring?" "Spend it—on shoes or shirts or something."

"Maxine was silent a moment. 'Bill,' she said finally, 'that's the way to save for a house.' "And so they began saving the dust. Maxine even moved some of the equipment and swept up forgotten filings from the floor. And at the end of six months she took it personally to the refinery and came home proudly with \$250.

"The \$250 was used for a down payment on a lot not far from Glendale with a view of the sea. They borrowed the rest from a bank. After only nine months the gold dust proved such a bonanza that the lot was entirely paid for.

"Then Maxine had a draftsman draw the plans for the six-room home they had both wanted. She learned that the FHA loan would come to only \$8,750, whereas the cheapest bid she got on the construction was \$16,000. Something would have to be done—something out of the ordinary.

"And Maxine finally hit upon that 'something.' She would make the place a 'model home,' but instead of advertising the ability of an over-all contractor, she would use it for the benefit of the little guys who actually did the work of building—the tile men, the plasterers, the plumbers. She would make a movie of how a house really came into being, and show it publicly, in exchange for their services and material.

"She gave each of the companies which were finally involved in 'Hilltop House' a contract which provided that, first, she would make a color motion picture in which their names would

be featured, and, second, she would hold six months of open house when the place was completed, showing the film to all who came.

"She cut and edited her 'production' into a remarkably professional job called 'Birth of a House.' She showed this and its companion on the interior embellishment, 'Decorator's Delight,' to over 20,000 people who came to see the finished home, and she is still going about the service clubs and schools with them, doing her own narrating."

America's first electric sign was hung by Miners Theater at 28th and Broadway, New York, in 1882.

No. More, Please

This little girl had been in mischief all day long, and her mother punished her all day long.

Finally, just before supper, she was especially naughty and sassied her mother to boot. So for punishment her mother sent her to bed without any supper for being so naughty.

When she was ready for bed, she knelt down to say her prayers. At the end of her prayers her mother was surprised to hear her say: "And God bless Mommy and Daddy, but please don't send them any more children, 'cause they don't know how to take care of the one they've got!"

There are in Minnesota 1,743,091 acres of ungrazed farm woodland.

SOME FOLKS GET ALL THE BREAKS

Out at Morris a busy member of the street department dropped a slippery 150-lb. manhole cover on his left big toe. Quarter of an hour later, same crew, same foot, different cover, different man. Half an hour later, same crew, same foot, third cover, third man. No reports since . . . At 3 1/2 months Sue Nell Winters was the youngest fracture patient ever treated in Crookston hospital—an older sister slipped on a rug and the little lady's left leg went into a cast . . . Three young people crawled uninjured from a car dragged 200 feet and thrown into a ditch by a speeding train near Chanhassen.

NEW SLANTS ON THE OLDSTERS

"Aunty" Jennette Dauchy, 96, Menahga's oldest citizen, "felt a bit childish" with a bad attack of mumps . . . At 100 Mrs. Lena Mickelson, Isanti, knits and makes rugs . . . Wearing a gay goatee Claus Dubbels, Elgin, shovels snow with the huskiest corner, despite his 100 years . . . When Ned McDonald was 12 and his sister 16 they were separated in Wisconsin; 60 years later they are reunited at International Falls where the brother came from Montana to visit Mrs. Robert Fritz, 76 . . . Mrs. Mary Sabatka and her twin brother Frank Zahradnik, Jackson, were honored on their 80th birthday.

HAIR BREADTH HARRY

New "KP Kit" For Kitchen Planning

A pencil, a yardstick — and an eraser, if you're the experimenting type! — plus a simple new device just designed by kitchen engineering experts are all the tools you need to plan that perfect "custom-tailored" kitchen all homemakers have stored away somewhere in their dreams. This brand-new "KP Kit" (the "KP" means "Kitchen Planning") was developed by the makers of famous Murray matched steel ranges, cabinets and sinks especially for use by the thousands of homemakers who want to remodel their old-fashioned kitchens or install completely new ones this summer. Using it is as easy as boiling an egg; and, what's more, it's foolproof, free and fun to do!

A cut-out cardboard drawing guide or template, and a carefully-sealed chart marked off in a gridiron pattern of equal squares, make up the handy aid to efficient kitchen layout. Cut-out spaces in the guide represent the areas required for all standard-size gas and electric ranges, cabinets and cabinet-sinks, and also provide for sketching in placement of other major appliances.

By using this new kit, you can arrange your remodeled or new kitchen on paper exactly to suit your family needs, and know in advance that every single piece of equipment you install will fit into place just where you'll find it most useful — whether the room is L-shaped or square, wide or narrow, large or tiny!

As insurance against mistakes in your layout, there's a simple sketch of a properly drawn kitchen plan at the top of each chart, and tips on correct measuring are listed in detail. Tracing guides for window sashes, door widths and even door trims are included. The kits, available for use through Murray dealers in every state, bring to homemakers an easy, sure way to eliminate guesswork in planning their kitchens.

Psychiatry Lesson WHY PEOPLE COMMIT SUICIDE

By Orin R. Yost, M. D. Medical Director, Edgewood Sanitarium

(Editor's Note: Dr. Yost is a graduate of the Medical College of Virginia at Richmond, studied psychiatry at St. Elizabeth's Hospital in Washington, D. C., taught psychiatry at Columbia University, New York, was division psychiatrist of the 79th division in World War II, and is presently Medical Director of Edgewood Sanitarium Foundation.)

In 1933 there occurred 310,000 suicides throughout the world. Today in the United States alone, there are 100,000 attempted suicides each year, of which number 17,000 prove successful. Is it any wonder that both church and state are exceedingly alarmed over this baffling problem?

Are all people mentally unbalanced when they take their own life? Far from it. Though any kind of mental confusion may lead to suicide, the large majority of suicides are not certifiable as mentally diseased, and the law holds every man sane until he can be proved to the contrary. The oft-repeated explanation that Mr. X. suicided while "temporarily insane" can often be traced to a gesture of kind consideration for the family.

Among primitive peoples suicide was demanded and endorsed. Central American Negro women even today poison themselves rather than be accused of the death of their mates. Many despised, penniless prostitutes in Mexico also turn in despair to suicide. The frequent death of Japanese by hara kiri (ripping open their bowels) was commonly reported during World War II. These above-mentioned types and perhaps two-thirds of the remaining victims appears to be in possession of their wits when they seek self-destruction.

Suicides sometimes follow the loss of a loved one, sexual abnormalities, feelings of inferiority,

revenge, jealousy, loneliness, disappointment, frustration, domestic strife, unwanted pregnancies and thwarted love affairs. Occasionally emotionally-unstable children suicide. Not infrequently suicide runs in families. For example, 23 suicides within four generations of a large family in Connecticut took place during a fifty-year period.

It should be remembered that there is a motive for every suicide. Most researchers believe there is a deep underlying cause which can be traced to the individual's inability to meet the situations of life. Many such individuals during childhood had shown difficulty in dealing with hostile impulses and aggressiveness, as well as feelings of guilt and need for punishment. Many who show suicidal tendencies are day-dreamers, are characterized by idealism, mature late in life and seem backward in their development, as well as tending toward self-depreciation.

Researchers believe that approximately one-third of the suicides are psychotic (insane); hence suicide appears to be a conspicuous symptom among many who suffer mental diseases. The act of self-destruction is reported among patients having all types of mental diseases though those afflicted with the depressive psychoses and with the schizophrenias (those with a split personality) are the most common suicides. The tendency to suicide among those who have psychoses during their latter years is very severe. Many mentally ill patients feel that they are driven to the commission of the act. These unfortunate, compulsive individuals believe that they hear voices urging them to kill themselves. Some patients who later recover admit that the intensity and urgency to suicide which had formerly tortured them is practically inconceivable to the normal mind. Although suicide is suspected, it is not always possible to prevent, even in the best-equipped hospitals, if the patient's impulse or urge is strong enough.

HEDGEHOG CACTUS

Hedgehog Cactus ©1932 National Wildlife Federation

Almost anyone can imagine from the name what a Hedgehog Cactus would look like. The botanists do not agree as to which plant the common name properly belongs. One standard book says that the name should be applied to a member of the genus to which the common prickly pear belongs. Most seem to think that the name should be applied to *Echinocereus engelmannii*, but one book gives the name *Calico Cactus* to that plant and another calls it *Saints' Cactus*. It is not appropriate that we here get into this argument.

Hedgehog Cactus is a loosely branched plant to about 1 foot high with the cylindrical upward growing branches to 3 inches in thickness, with 11 to 14 blunt ribs and heavily armed with spines that are to over 1/2-inch long. There are some 60 species in the genus and of these at least a half may be found grown as ornamentals. In some of the plants, the stems sprawl while in others they are erect, not a few appearing more or less like a viciously spined cucumber. In some species the stems may be grouped to form a formidable plant.

The plant is relatively common in the deserts of California and ranges from Utah and Colorado through California, Arizona, Sonora and Lower California. It is essentially a plant of the Lower Sonoran Zone and favors gravelly or stony hillsides and washes.

The flowers of the Hedgehog Cactus are approximately three inches across with a funnel-shaped base and widely spread petals. They are reddish purple and brilliant. They are about as long as they are wide. The fruits are about an inch long covered with spines and a woolly felt. They produce globular black seeds. The fruits are uncommon and some authors have claimed that some members of the group produce no fruits. In most members of the genus, the fruits are thin-skinned and spiny though the spines are easily removed when the fruits reach maturity. Unlike some cacti the flowers of the Hedgehog Cactus open in the daytime and close at night.

The name Calico Cactus which has been applied to this plant refers in all probability to the many-colored spines. These are often curved or twisted and may be yellowish or brown.

So anxious are some persons who collect cacti as hobbies that many of the more attractive plants have been completely eliminated from their native regions. To protect against such depredations some states have laws and the National Wildlife Federation in its general policy is dedicated to the support of laws designed to protect harmless living things that are in danger of being completely destroyed.

The Hedgehog Cactus has no economic importance except to those who strive to get it established in their gardens as an ornamental.

Sarah Anne's COOKING CLASS

Corn Bread and Pork Score Easy "Ringer"

Left-over pork is sweet meat when combined in its own gravy with the full-bodied flavor of corn meal. And there is an easy way to do it so that corn bread, meat and gravy can be served together as the main dish of a tasty meal.

The framework of this nourishing dinner is the corn bread, baked in a ring mold. While the bread is baking, heat the meat in its gravy, and you have a quick meal for a washday Monday or any other particularly busy day of the week.

Corn bread goes well with gravy, too, for it does not quickly become soggy. In addition, it tends to hold the heat in the meat and gravy, keeping each serving piping hot until it reaches the dinner plate.

Pork and gravy in a corn bread ring is a simple way to use left-over meat. Try it soon and score a "ringer" at the table. Your family will be pleasantly surprised at this tasty combination of corn and the economical, left-over pork.

Pork and Gravy in Corn Bread Ring

- 1 1/4 cups corn meal
  - 1/2 cup sifted flour
  - 1 1/2 teaspoons salt
  - 3 teaspoons baking powder
  - 2 eggs, beaten slightly
  - 1 1/4 cups sweet milk
  - 1/4 cup melted butter or margarine
  - 3 cups diced left-over roast pork
  - 1 1/2 cups gravy
- (If self-rising corn meal and flour are used, omit salt and baking powder.)
- Mix and sift together the dry ingredients. Combine beaten eggs, and melted butter or margarine, which has been cooled. Pour liquid over dry ingredients, mixing only until moistened. Pour into a well-greased 8-inch ring mold and bake in a 400° F. oven until it shrinks from the sides of the mold (about 25 minutes). Unmold and fill with pork and gravy which have been thoroughly heated together. Yield: 6 servings.

An invitation for the week end is a delightful way of entertaining one's friends. Well chosen and well cooked food combined with a pleasant atmosphere of the home will always be a pleasant memory in the minds of the guests.

Broiled Chicken

- 2 broilers—1 1/2 lbs. each
  - 1 small onion sliced
  - 1 sprig parsley
  - 1 1/4 cups cold water
  - 1/2 cup Sauterne wine
  - 2 tablespoons lemon juice
  - Salt and pepper
  - 2 tablespoons salad oil
  - 1 tablespoon flour
  - 1 tablespoon butter
- Have broilers split. Cut off necks, put in saucepan with giblets, onion, parsley and water; cover and simmer until giblets are tender. Add wine and strain. Chop giblets fine and set aside. Sprinkle chickens with lemon juice, salt and pepper. Brush with oil. Place, skin down, in a shallow pan. Place low under broiler. Turn occasionally and baste frequently with wine sauce. When chickens are tender and well browned, remove from pan. Thicken sauce with butter and flour which have been rubbed together. Add giblets, season to taste. Pour a little sauce over each serving of chicken.

Turkey and Broccoli au Gratin

- 2 packages frozen broccoli
  - 1/3 cup butter
  - 1/3 cup flour
  - 2 1/2 cups turkey broth or canned consommé
  - 1 cup evaporated milk
  - Salt and pepper
  - Worcestershire sauce
  - 3 cups cooked turkey coarsely diced
  - Grated Parmesan cheese
- Cook broccoli until tender according to directions on package. Drain. Arrange in greased shallow baking dish 8" x 12" x 2". Melt butter and stir in flour; add milk, broth. Cook, stirring constantly, until mixture is thickened and smooth. Continue cooking for 2 to 3 minutes. Season to taste. Lay turkey over broccoli in baking dish; cover with cream sauce. Sprinkle generously with grated cheese. Bake in an oven 400 degrees about 20 minutes or until bubbly.

Beef Casserole

- 2 tablespoons salad oil
  - 1 medium onion finely chopped
  - 1 green pepper finely chopped
  - 1 lb. ground beef
  - 2 cans tomato sauce
  - 1/2 cup red wine
  - 1 cup corn meal
  - 1 cup whole kernel corn cooked or canned
  - 1 cup grated cheese
  - Salt and pepper to taste
  - 2 eggs slightly beaten
- Heat oil in a heavy skillet. Add onion, pepper and beef. Cook, stirring with a fork until beef is browned. Add tomato sauce and wine. Bring to a boil. Stir in corn meal; cook, stirring constantly for 3 to 4 minutes. Remove from heat and add corn and 1/2-cup of cheese. Salt and pepper. Stir

ARMORED ENSEMBLE—Padded and protected with the latest lightweight armor, Marine Cpl. Andrew Shuman of Washington, Pa., sprawls prone with his rifle ready to take potshots at North Korean Communist soldiers. Shuman wears bullet-proof vest and lower attachment which protects G.I.'s from all but flesh wounds.

RING IN THE NEW—President-elect Dwight D. Eisenhower will be serenaded by these bells of the Washington Church of Epiphany being inspected above by the carillonneur, Adolf Torovsky, and Rev. Leland Stark. The music will be broadcast across the country as part of the inauguration day program.

MAIDS IN ENGLAND—Looking like typical American majorettes, these pretty English girls give a Yankee atmosphere to the American Air Force European championship football game at London's Wembley Stadium. They went through their paces before the game and at half time with expert baton twirling, struts and cheers.

LUCKY FISH—Held high by his captor, pretty Mary Timm, this fat fish has a smug look of satisfaction. The curly-haired Long Beach, Calif., girl holds the title of California Tuna Queen. Her main claim to the crown is the 15-pounder dangling from her line. Apparently hooking a poor fish is no problem for Miss Timm.

pulled an upset here Sunday night when they surprised the strong Juneau team to the tune of 62-46. Juneau was among the loop leaders in the first half of the split season. Kewaskum did it decisively by a margin of 16 points.

Pacing Kewaskum were Hawig, Smith and Keller with 15, 14 and 18 points respectively. Pluckhan and Oestrich were the good shots for Juneau with 11 and 13. Kewaskum outscored their opponents in every quarter and led at halftime, 24-14.

Wednesday night the Rivers five played at Fillmore and it was the other way around. Kewaskum was upset in a close 51-48 game. This was Fillmore's first win of the season. It was tight all the way. Fillmore was ahead at the end of every period but never by more than a few points. The score at the intermission was 21-27.

A. Kempf and B. Donath were the big noises for the winners with 19 and 18 points respectively. Ha-

wig was top point getter for Kewaskum with 14. One of the local team's top scorers, Des Smith, did not play and this made it a lot easier for Fillmore to win.

**Behind The Scenes  
In American Business**  
By Reynolds Knight

NEW YORK — Self-service, night shopping and suburban stores were the big topics of discussion at the just-ended convention of the National Retail Dry Goods Association in New York. While most attention was devoted to the problems of the big department stores which sell most merchandise, some of the suggestions advanced were of the kind useful to merchants of every kind and size.

Self-service, if limited to things about which there can't be more choice than is indicated by the price tags, was proposed as releasing scarce sales help for explaining and demonstrating goods where decisions are more complicated. This would mean putting stockings, for example, in packets of one and three pairs, in racks, and moving the stocking salesgirl to the blouses.

Prof. Malcolm McNair of Harvard said that big department stores had thrived for generations on low labor costs and being located where most folk had to shop. Now, he said, the workers demand wages comparable to other fields, and the more affluent customers have moved to the suburbs. Taking the opposite side of this debate, one store owner suggested it wasn't too late for the central stores to agitate for cures of the traffic jams and school failures which drive residents out of big cities.

There was general agreement that Saturday work, in this era of almost-universal five-day operations in industry, made it hard to compete for the trade of young workers just entering the business world.

PECK ORDER UPSET—Sociologists have had lots of fun with "peck order" in the barnyard, since they observed that one hen is able to peck all those "below" her. No. 2 pecks all but No. 1, and so on. As if to provide much-needed reassurance of the superiority of human beings to other animal life, the Sheaffer Pen Company has systematized the claims of its employees to parking space, so that there need be no battling over the peck order of fender-fighters.

The oldest-on-the-payroll driver gets the parking space closest to the factory door at the Sheaffer Pen Company's Fort Madison plant. In case of a tie, the man who brings other employees with him gets a closer spot than the one who drives alone, and the man who drives every day gets a break over the one who uses his own car only in bad weather.

Each of the 522 lots has an employee's nameplate. It's expensive, but the company says it's worth it.

THINGS TO COME—An aerosol cleaner which will literally blow stubborn grease off a stove or pan with gas is in the research stage. . . . A British punch-card machine, to be marketed in the U. S. soon, uses cards only 2x3 inches in size. . . . A new highest-soluble fertilizer, for use in a spray from a siphon attached to your garden hose, will go on sale in February. It peeps up grass, vegetables, flowers, and shrubs. . . . An electronic stethoscope has been devised that will listen to bearings and detect flaws before the part breaks down in service. . . . The Department of Agriculture has devised a way to strain the escaping flavor of cooking fruit out of the steam and put it back in the preserves. . . . You can buy for \$225 a 150-pound container to keep your plutonium in, but its capacity is only a fraction of an ounce. . . . A pocket-sized pyrometer, made by a Cleveland company, will measure temperatures ranging to 3300 degrees Fahrenheit.

CADDY'S PLAYMATE—To no one's surprise, the Cadillac was rated "car of the year" by Motor Trend magazine in its annual appraisal of 20-odd American-made stock cars. Less casually received, perhaps, will be the rating of the newest of all passenger cars, the Aero Willys. It took second place on the basis of performance, handling, safety and economy. In two of the four categories, safety and all-around handling quality, the Willys was rated the best car of 1952.

BITS O' BUSINESS—The Supreme Court upheld an ICC ruling which will have the effect of ruling out the return-trip leases whereby farm truckers pick up cargo for small truck lines. . . . White sales cleaned out bedsheet inventories; some mills are refusing orders through February. . . . TV manufacturers say they will sell at least 6,400,000 sets this year. . . . Speaking of trucks, the TVA's transport chief wishes they weren't made with 80,000-mile engines and 40,000-mile valves. Then he would just throw them away when something broke, assuming that everything else would be breaking pretty soon.

**STATUES SEE THEIR ANNUAL SHOW**

The Italian "Teatro Olimpico" in Vicenza, Italy, is one of the world's most elegant and least used theaters. Built in 1582 and filled with delicately carved wood and statuary, it is opened each year for a period production in costume. Seen at left, a statue of a Renaissance Italian seems enthralled by the play. Contrasting symbols of modern times are the spotlights beaming between the statues. Actors on stage, seen at right, take bows.

**Life's Sweetest Story**

The old couple had just celebrated their golden wedding anniversary. Now all the guests were gone, and they sat by the open fireplace, hand in hand, with her head on his shoulder, and reminisced.

"Mary," he said tenderly, "You're still my sweetheart, in fact, I've never had another sweetheart because I never found anyone as sweet and beautiful as you."

"Henry," she replied, "you're as big a liar as ever, and I believe you just the same."

Minnesota's 179,101 farms are owned by 106,487 persons.

**Utah Mother Solves Babysitting Problem By Starting Own Nursery**

Evelyn Hansen of Tooele, Utah, has the job of being both a full-time and a part-time mother. She cares for her own four children and, as if that weren't enough, she looks after twelve neighbor children while their mothers work at local plants making supplies for Korea. But capable as Mrs. Hansen is, her job wouldn't be possible, says Household Equipment Editor Elizabeth

Sweeney Herbert of McCall's Magazine, if it weren't for her huge home freezer and her automatic washer. Writing in the January issue of the magazine, Mrs. Herbert tells how Mrs. Hansen organizes her work to get everything done and yet give all sixteen children "balanced diets and plenty of affection".

"When the Korean crisis hit Tooele, Utah, the three big ordinance plants in the neighborhood clamored for extra workers. Evelyn Hansen wanted to go. With costs and the birth rate rising (she'd recently had her fourth child) she knew she could use the extra money. But she decided baby Barbara was too small, and there were the two other little girls as well. So she hit upon the idea of taking out a license to care for other children while their mothers worked.

"She started with two neighbor babies; now she has a dozen—all pre-school age, of course. Five days a week the Hansen house and yard overflow with them, and the entire Hansen family pitches in to help. Father Leonard fixed up the playroom and back yard, built extra kitchen closets. Son Benton, 14, cuts the grass. Glenn, 10, and Joan, 9, are experts at wholesale face-washing, hair-combing, lunch-serving. For baby Barbara, now 3, it's wonderful fun to have so many little playmates right at hand.

"The first money they earned went right back into the 'business' to purchase equipment needed to cope with the extra work. The automatic washer goes every day, the vacuum cleaner every night. The home freezer is really a big one—18 cubic feet—which means that they can buy in bulk meat, ice cream, fruits and vegetables. Evelyn doesn't raise herself.

"Mothers start bringing the children at 7:30 on their way to work. On fair days they play out in the big, grassy, fenced-in yard. There are many shade trees, flowers, a wading pool, swings, and a sandbox. On bad days the children find fun in the playroom, living room, big kitchen. We've outfitted the playroom with a cupboard full of toys, dolls, a doll buggy, blocks, crayons, coloring books. The children amuse themselves," says Mrs. Hansen.

"On weekends I cook, for the week," says this busy mother. She makes big batches of soups, spaghetti sauce, meat stews, pies, cakes, cookies. She also makes the fixings for husband Leonard's box lunches. They all get put away in the huge freezer. "The children's lunch and our main supper dish every day come from the freezer ready to warm and serve."

"With good sense Evelyn has chosen furnishings easy to clean. The girls are dressed mostly in fabrics requiring no ironing. She folds sheets as they come from the line. Living-room curtains are of unbleached sheeting, which she dyed a gay golden-yellow—they wash endlessly."

**Her Risk**

Mrs. Smith was reading a letter at breakfast. Suddenly she looked up suspiciously at her husband. "George," she said, "I've just received a letter from Mother saying she isn't accepting our invitation to come and stay as we do not appear to want her. I told you to write and say she was to come at her own convenience. You did write?"

"Er-yes," said George, "but I couldn't spell 'convenience,' so I made it 'risk.'"

**Perfect**

Detective — And do you know what we policemen mean by a perfect crime?

Pretty — Sure. If you stole a kiss, that would be perfect.

**Foot Rules For Winter Comfort**

The most important items in the winter sportsman's equipment are his boots and socks. And the most important information he can take with him into snow country, according to doctors of the Minnesota State Medical association, is a knowledge of how to take care of foot blisters and frostbite.

Today's bulletin from the association gives a few simple instructions about both, which apply not only to skiers but to anybody who gets outdoors much in cold weather.

First about shoes. Water-proofing boots and shoes is not the complete answer to the foot problem, the doctors say. Some old-timers refuse water-proofing entirely because air-tight shoes tend to prevent perspiration from drying; and dampness in below freezing weather helps along frostbite and infection. Water-proofing may be helpful, according to the bulletin, but only if at least two pairs of woolen socks are worn inside and only if two spares are carried along so that you can have clean, dry ones at each wearing. In any case, two thinner pairs of woolen socks are better than one heavy pair, whatever boots are worn. Also, both boots and socks should be roomy. Foot powder, an antiseptic adhesive and enough salt or alum for foot baths are also carried along by old hands who are out continuously in below zero weather.

Second, about infection and frostbite. The first thing to do at campsite is to tend your feet. Prevent infection first. If there is a blister or even the tiny red spot that pressing blisters, wash it and cover it with gauze or adhesive. If a blister has developed, open it near the base with a needle sterilized by passing through flame and then apply zinc oxide adhesive. Even if there are no blisters, a warm, short foot bath with salt or alum and water with thorough drying afterwards, is a must. If frostbite or freezing does occur, DO NOT rub with snow and DO NOT use a hot water bottle. Most authorities advise leaving the part exposed at comfortable room temperatures. Rapid thawing causes severe pain in the absence of medical resources.

**Quite Appropriate**

Tombstone Dealer (after several futile suggestions) — How would just a simple "Gone Home" do for an inscription?

The Widow — I guess that will be all right. It was always the last place he ever thought of going.

**Probably Would**

Boss (handing back two letters to stenog.): "It would perhaps be better, Miss Smith, if you signed the letters to Dear Jack and Darling Harold yourself."

**Not Yet**

"Have you any children, Mr. Smith?"

"Yes—three."

"Do they live at home with you?"

"Not one of them — they are not married yet."

**Bible Comment:**

**True Greatness Is Won by Service And Humility**

LEARNING to live together is the hardest lesson many of us must learn during the course of our daily lives. This task is not unique. Every group has faced the same problem based on differences in personalities and personal jealousies.

Even the disciples suffered from these human frailties. Once, when someone had evidently offended Peter, he went to Jesus asking how many times a brother should offend his brother and be forgiven. Peter set, what apparently seemed to him to be a reasonable limit, asking: "Until seven times?"

But Jesus put forgiveness on a much larger basis with His answer: "Not until seven times, but until seventy times seven." And it is on this greater plane that forgiveness should be considered if there is to be any true forgiveness at all.

Thus the disciples were taught. They were extraordinarily fortunate in having such a teacher who also knew the meaning of greatness. He defined greatness in terms of service, saying: "He that would be greatest among you, let him be the servant of all." To make a deeper impression, He taught them by example, washing their feet and explaining that He was not there to be ministered to, but to minister to others, even to give His life as a ransom for many.

"It is more blessed to give than to receive," He said. Unfortunately, this has not yet been adopted as a creed by the world. But the world must acknowledge the true greatness of those who have adopted Jesus' standards as their own.

It is men like Father Damien, St. Francis, Dr. Grenfell, and others who have become the servants of their fellowmen, who are honored and revered. They have learned the greatest lesson, that of living with and for others.

**Sports Afield**

By Ted Kesting

One of the most grueling and at the same time one of the most exciting and unusual winter sports I know about is coyote hunting the way it's done in the Great Lake area. It is indeed sport in the full meaning of what hounds were fashioned to do. They not only have to run long, hard and sure, under difficult conditions, but they have to fight. When a coyote decides that he has run enough, he'll simply quit and turn to put up a whale of a fight. It is one of the most curious animal reactions I know of.

According to outdoor writer Byron Dalrymple, the coyote has one of the strangest histories this continent ever produced. A century ago it was almost unknown east of the prairies. As stockmen, sheepmen and farmers moved in both men and coyotes felt each other's pressures. So destructive were the coyotes that the greatest mass poisoning project ever seen got under way and was carried on for almost a quarter of a century.

Nobody knows how many coyotes were killed; but when it was all over there still were plenty of coyotes left. They had become tougher, far more crafty and determined. And they spread out. It was not long until they were up in Alaska where none had been known before and as far south as Costa Rica, a distance of over 7,000 miles. A few years ago coyotes began to be sighted all the way from Maine to Florida. Today in the East the so-called "brush-wolf" is fairly common and hunted with hounds by those who have what it takes physically to follow this sport.

An interesting side light on how the coyote was able to survive and to extend his domain so greatly is revealed in many stories concerning his toughness. Expert fox trappers will tell you that almost never is a fox caught that has a missing foot. But coyotes have been taken with all

four feet gone! Dalrymple saw one old coyote last winter that was known to have been around those parts for at least 10 years. Hunters and trappers by scores had tried for him. He was finally run down and killed by a greyhound. His teeth were worn almost to the jaw, every foot had toes missing, one leg had sometimes been broken and countless other scars were on him.

In other words, where injuries eventually kill other predators, the tough coyote can take it. He will eat practically anything, from grass and berries to rabbits, mice and carrion. And our "new" coyote is, on the whole, larger and much changed in habit. The average western coyote will weigh from 20 to possibly 35 pounds. Eastern and Great Lakes animals have been taken that weighed as much as 60 pounds. That is a right hefty chunk of animal.

STARTING A MINK COAT?—Carrying her own rare white mink, Selina Tanner, 20, of London, England, has the beginnings of a priceless fur coat. The mink is a present from her fiancé, John Morely, who bred the animal.

### Handy Jim's FIX-UP TIPS For Farm and Home

#### Under-the-Stairs Closet

THE wise use of waste space is the sign of an efficient home craftsman. Whether it's a basement corner, an offset in a room, or the space under a stairway, it's best to enclose it and make it dustproof and functional.

Until the closet shown in the illustration was installed, the space under the stairway was a catch-all that was untidy and a probable fire hazard. Its neat appearance now invites orderliness.

Creating such a closet is a rather simple operation with a modern building material like Masonite Presdwood. Panels of this material, one-quarter inch thick and four feet wide, go into place rapidly. They are nailed to a framework of lumber. The panels, lumber, nails and other materials needed are available at lumber yards.

With the Presdwood, the home craftsman can make a permanent, good appearing installation at a minimum of cost. Even the door can be built on the scene, using lumber framing and Tempered Presdwood for a durable wearing surface. Many leading manufacturers of flush panel doors are using these materials.

When there's home remodeling and partitioning, the wise craftsman today combines lumber and Masonite Presdwood for the best results and economy.

These panels take a beautiful paint finish, which may be applied either with a brush or roller. An undercoat and two finish coats are recommended.

#### Resolution For Wise Homemakers

I resolve! Among your other resolutions here's a good one for homemakers to make. Resolve to save meat by cooking it slowly. You'll profit in more ways than one. Meat cooked at a low temperature not only cuts meat shrinkage but the meat is more juicy and tender and makes a more attractive appearance on your table.

According to the meat cookery expert, Reba Staggs, slow cooking involves all types of meat preparations—meat patties and loaves, roasts and Swiss steaks alike. These facts are based on extensive experimentation at leading educational institutions throughout the country.

Results are revealed from a typical experiment in which two paired beef roasts were used. One was roasted at 300 degrees F., the other at 450 degrees F. until they reached the same degree of doneness as recorded by meat thermometers. The roast cooked at 300 degrees F. lost two pounds, the roast cooked at 450 degrees F. lost four pounds, or two pounds more than the roast cooked at the low temperature. The slow roasted meat was uniformly cooked. The one cooked at a high temperature was charred on the outside and unevenly cooked, thus showing the advantage of cooking meat slowly.

**WATER COLOR?**—Artists will strive to capture a certain effect or illusion on canvas. This Parisian painter, Jean Rignaud, wants a view from the Seine River of Paris' famous dome on the Institute De France seen in the background. Braving the cold, he escapes wet feet by using his long arms to reach the canvas.

## Buy Your Swim Suit Now!

They're New and Attractive!

BY EDNA MILES

A SWIM SUIT with life-of-the-fabric color fastness to salt or fresh water, chlorine in pools, perspiration, sunlight, and atmospheric fumes is the suit every woman would like to own.

It's here, done up in colors that are fresh, brilliant and beautiful. The fabric is a new, color-locked, acetate fiber that offers high resistance to shrinkage and wrinkling, plus added immunity to moths and mildew and is quick drying.

You'll find it in dresses, suits, blouses, separates, sportswear, rainwear, neckties, curtains, draperies, bedspreads and other home furnishings next fall.

#### USE IN WINTER, SAVE TILL SUMMER

BUT right now, you'll be more interested in a swim suit that can go on a winter vacation or that can be put away for next summer's sun. (If you wait too long you'll either not get one or take what's left.)

This made-in-color, acetate fiber started as a black fiber of such extraordinary color fastness that it was adopted by the Navy for sailors' black neckerchiefs.

Now, it's been developed in a wide range of fashion colors. These colors are washable in swim wear and won't run or crack off on towels or beach robes.

A new acetate fiber with color sealed in for the life of the fabric is shown (at right) in this elasticized swim suit by Caltex of California. The eyelet-striped fabric is used with the new fiber with undyed cotton-wrapped latex and nylon. Suit has clever cuff treatment, is a figure-molding maille.

#### Test Your I. Q.

1. When did the state of Virginia take back her part of the District of Columbia?
2. What was the origin of the Washington Monument?
3. During the Renaissance, what invention was the reason for knowledge suddenly becoming a widespread thing available to many people?
4. What is the meaning of the word Boer and to what people is it applied?
5. What is the Edward J. Neil Boxing Trophy and how did it originate?

#### SEEK IMPROVEMENT IN MANY FIELDS

University of Minnesota research facilities are found not only on the St. Paul, Minneapolis, and Duluth campuses, but also at Rosemount, a separate airfield, and in various other strategic spots. The research program covers a wide range of subjects and problems ranging, roughly, from aerodynamics to utilization of wood wastes; some 40 different projects of recent date included six in the field of city planning, urban and rural construction; three in electronics; five in minerals and mining; five involving farm buildings, chemistry, conservation, etc; other mysterious-sounding projects have to do with "dynamics of drop formation" and "linear acceleration"; most far-reaching perhaps involves the widely discussed cosmic ray. Sponsored research, special projects privately paid for, grew from \$87,000 in 1942 to \$1,638,000 in 1951.

#### French And Italian Styles New Patterns

Exquisite clothes designed in France and Italy can come right from your own sewing machine. McCall's Patterns have adopted many of these stunning originals for all occasions—street or evening wear now, suits and blouses for spring, play clothes for summer, says Barbara Olson Hodgkins. Writing in McCall's Magazine for January, she describes these and some exciting prize-winning spring and summer designs by young Americans:

"A distinguished French design, fluted with tucks on the bodice, has unpressed pleats on the eight-gore skirt to hide seams. Fabric is acetate-silk shantung taffeta. For molded street dress right from France, sleeve and bodice front and back on each side are cut together. Fabric is a tweedy mixture of Acrilan and nylon.

"A suit and blouse shows bright Italian idea. Cropped sleeves and a wide neckline stress the silk blouse. The skirt has pleats each side of center back.

"Play clothes the Italian way—blouse, skirt and shorts are carefully designed for the best use of a silk pongee border print in a Paisley motif. A short evening dress of iridescent silk shantung organza shows its French origin in the deft handling of the fichu—two long, draped rectangles.

"Phyllis Bolick and Mary Fairbanks, each just 18, designed these gay clothes. And each won an award in the 25th Scholastic Awards costume design competition. McCall's adapted them into patterns so other girls can make these fresh young fashions. Phyllis designed a three-piece outfit—blouse and skirt and a widely ruffled petticoat that's really an extra skirt. Mary's award-winning buttons off-center, with a line of washable braid or bias tape to give a long slim look.

"Strong stripes of dazzling white and luscious color are good news for spring. Combine them with a matching solid color and give your midwinter fashion feelings a quick, easy pickup.

"Make your spring coat in a neutral shade and choose bright, singing colors like turquoise, gold, jade or cherry red for your dresses and accessories. This sort

of color scheme looks wonderful as winter lingers, is prepared to meet the first sunny, chill days of spring looking new.

"Newest silhouette for the loose coat is straight-hanging, narrow-skirted. Diamond-shaped armholes make sleeve setting-in easy. Fabric is tweed. A midriff smooth as paper on a lovely dress is fitted with inside tucks from hipbone to bosom. The sleeves are draped to near elbow length with six horizontal tucks."

#### Economic Poisons A Must In Insect Control

With the Wisconsin Economic Poison law in effect less than a year, more than 400 manufacturers and distributors have registered close to 2600 different brands of pesticides with the Wisconsin Department of Agriculture. And, according to E. L. Chambers, State Entomologist, nearly 45,000 brands have been registered in the entire nation.

The purpose of the law, which became effective Feb. 10, 1952, is to protect the public in the purchase and use of economic poisons and to protect the makers and distributors from unfair and fraudulent competition.

The law requires that every economic poison which is distributed, sold, or offered for sale within the state shall be registered annually with the department of agriculture. Poisons delivered for transportation or moved in interstate commerce or between points in the state through any point outside also require registration.

An accurate statement of ingredients is required on the label and the pesticide must meet all claims made for its use. The net weight must be stated and information must be included which will prevent injury from misuse.

The annual sale of pesticides in the United States is estimated at over \$200,000,000. With certain insects (developing an apparent resistance) to certain of the chemicals, claims are mistakenly made that the pesticide is not living up to claims by the manufacturer.

These failures, Chambers points out, are sometimes due to faulty labeling of the spray, insufficient application and failure on the part of the user to follow instructions on the label.

With insects alone causing an excessive \$4,000,000,000 in damage and with weeds, rodents and diseases in the United States each year, insecticides causing an equal amount of plant destruction, Chambers declared the use of these pesticides is absolutely necessary for control.

The eyes have it. Especially if they're rested says Betty Ann, Editor of The Milwaukee Journal-Women's Pages. And here's an idea you owe those precious eyes of yours. After any type of fatiguing work, lie down with the feet higher than the head. Take a length of cotton soaked in good quality witch hazel and stretch it over the eyes and forehead. The mild astringency relaxes and tones the delicate optic nerves and muscles. It'll make a new woman of you.

Limp veils can tell the age of a hat with startling accuracy. Yet they're so easy to renew. Place an ordinary veil between two sheets of wax paper and press. Rounded veils should be stuffed with tissue paper before pressing with your steam iron held about an inch away. See that the steam envelops all parts of the veil and keep the paper in place until the veil is entirely dry.

All artificial flowers can be as fresh as daisies, if you'll steam them quickly. Hold the iron away from the petals so that they won't absorb too much moisture and shape them while they're still damp. Air them dry.

Feathers and fur trimming will respond to the same treatment, but remember the importance of having whatever you're reconditioning as free as possible from dust.

Everybody knows that a cold motor starts hard. But not everybody knows that this slow, laborious start is hard on the motor. In cold winter weather it pays to save strain on motors by having them at room temperature—or at least warm enough so the oil and grease isn't stiff—before starting them. If the washing machine, for example, is kept on the back porch or other unheated place, bring it indoors to warm up a few hours before running it. Likewise, take the chill off any other motor driven equipment, large or small, before using it. This applies to the sewing machine or vacuum cleaner kept in a cold place, or to the grinder out in an unheated garage. Even a home freezer or refrigerator should be located where the temperature does not go below 40 degrees Fahrenheit, unless it is specially equipped to operate at low temperatures.

Shelled nuts keep well in home freezers, provided they are in moisture-vapor resistant containers, home freezing specialists say. Those who have freezer or locker space may be able to take advantage of the lower prices per pound often offered for nut meats sold in quantity.

Nuts may be stored in any type of freezer container desired, but the specialists suggest that it may be most convenient to put them in "freezer bags" that hold about the quantity to be used at a time.

Plain shelled nuts held at zero Fahrenheit should keep their good flavor for eight months to a year, salted nuts for several months. Salt has been found to hasten the rancidity of fats and oils in food in frozen storage.

When you're preparing applesauce, cook the apples in as little water as possible, as rapidly as possible. Stir in the sweetening after the apples are cooked. For old-fashioned applesauce, just mash the cooked apples with a fork; for a smooth applesauce, put them through a sieve or a food mill.

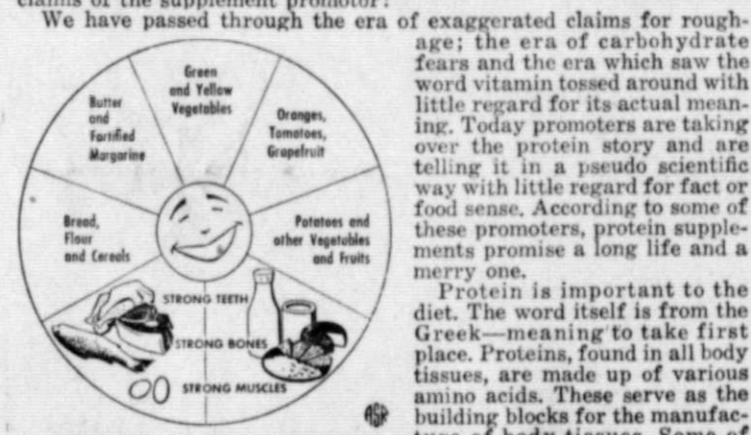

Vegetable stains can usually be removed from the hands by rubbing with a slice of lemon or a slice of raw potato.

Narrow necked bottles, like vinegar cruet, are best cleaned by filling with warm water to which a few drops of ammonia have been added. After an hour rinse well in warm water.

Was one of your pledges to yourself this new year a promise to try more new recipes? It is a good resolution to adopt. Here is a good recipe with which to start. It's called chipped beef biffins. Biffins are really biscuits—pressed into muffin cups. Make your regular biscuit dough and cut into four inch squares. Then press each square gently into a three inch muffin cup. Bake in a 475 degree Fahrenheit oven for 10 minutes. Make your chipped beef as usual and serve bubbling hot in the biscuit cups. Make biffins, too, as containers for many other good foods.

#### Food Sense—Not Nonsense

Is it hard for you to distinguish between food sense and nonsense? Are the claims and counter claims of nostrum peddlers confusing you? Are the faddist attacks on our basic foods increasing your faith in the claims of the supplement promoter?

We have passed through the era of exaggerated claims for roughage; the era of carbohydrate fears and the era which saw the word vitamin tossed around with little regard for its actual meaning. Today promoters are taking over the protein story and are telling it in a pseudo scientific way with little regard for fact or food sense. According to some of these promoters, protein supplements promise a long life and a merry one.

Protein is important to the diet. The word itself is from the Greek—meaning to take first place. Proteins, found in all body tissues, are made up of various amino acids. These serve as the building blocks for the manufacture of body tissues. Some of these building blocks can be manufactured in the body but some of them must be obtained from the food we eat. A supply of essential building blocks is needed day in and day out. Those that we eat over and above our needs are burned by the body to supply energy. In this way they take over some of the functions of more economical carbohydrates and fats.

Selection from each of the basic seven food groups everyday will assure the needed proteins as it will the other food requirements. Two of the basic food groups—the meat, poultry, fish and eggs—and the milk and milk products—are known as the protein food groups because of their high content of excellent quality protein. These foods furnish all of the essential building blocks. Bread, cereals and other thrifty foods also furnish protein, but the quantities of the essential building blocks in these foods is not as well balanced as that of the animal proteins.

The use of bread and other cereal products in a diet which also includes meat, milk or eggs will help put the cereal proteins to as good use by our bodies as the proteins from more expensive sources. This is one reason the baker uses nonfat milk solids in producing the Staff of Life.

One average serving of meat will furnish 20 to 30% of the daily protein requirement of the average man or 25 to 40% of the daily requirement for the average woman. One glass of milk will furnish about 10% of the day's requirement of protein for a man and about 13% of the requirement of the average woman.

In milk and its products, such as cheese, nature has given us the happy combination of quality protein and a liberal supply of calcium. Calcium is needed for good bone structure and buoyant health. One glass of milk furnishes about 1/3 of the day's need for this mineral. A daily diet based on foods of the basic seven is food sense protein-wise. Daily servings of meat, fish and eggs and milk and milk products along with proteins found in enriched bread and other foods, will furnish more of this essential food than your body requires.

Need we fall for the protein supplement promotion?

#### STRICTLY BUSINESS by McFeatters

"What I'm really interested in is something for my nephew to play with in the bathtub!"

#### THESE WOMEN! By d'Alessio

"That one—there's something familiar about his pale blue eyes . . . HA! NOW I remember—the bracelet wasn't stolen! I hid it in the pocket of my pale blue bedjacket!"

#### ANSWERS TO Test Your I. Q.

1. In 1846 President James K. Polk announced that 39 square miles ceded to the federal government by the state of Virginia in 1790 had been returned. The Act of Retrocession permitted the citizens to decide this question.
2. In 1833 the Washington National Monument Society was organized. A fund-raising campaign produced about \$75,000. The cornerstone was laid July 4, 1848. In 1859 money ran out and it stood half finished until President Grant ordered it finished by the Corps of Engineers. Dedicated Feb. 22, 1885, it was opened to the public in 1888.
3. The invention of the art of printing with movable type made books cheaper and easily available to the poor. Learning was suddenly no longer the exclusive property of the nobility.
4. It is a word of Dutch origin meaning farmer. It was given to the early Dutch colonists of South Africa.
5. It originated in 1938 in honor of Edward J. Neil, famous sports writer killed in Spain while covering the Spanish Revolutionary War. It is awarded each year by the Boxing Writers' Association of America to the person doing most for the sport. First winner was Jack Dempsey.

#### Ticklers By George

"Better slow down! They say the cops are really on the job in this area!"

Upon motion by M. Schaefer, seconded by L. Kohn, the Board adjourned subject to call.	
WILLIAM S. MARTIN, Village Commissioner	

members present except Trustee Haasen. The reading of the minutes of the previous meeting was dispensed with.

The purpose of the calling of this meeting was to discuss with the various Kewaskum industries the problem of proper waste treatment and to discuss the preliminary plans and estimates for the construction of a new sewage treatment plant.

The following representatives were present at this meeting: Mr. N. W. Rosenheimer and Mr. Robert Kroncke for the Rosenheimer Malt & Grain Co., Mr. Charles Geiger for the Heinemann Creameries, Inc. and Mr. L. N. Peterson for Regal Ware, Inc. Estimates and plans by the McMahon Engineering Co. were presented by Mr. Clinton. After a lengthy discussion, it was decided to hold another meeting at a later date so as to give each industry represented time to conduct an investigation of their own regarding this problem.

The Commissioner was instructed to keep the Committee on Water Pollution of the State Board of Health informed as to the progress

**MILK FOR TEEN-AGE GLOW!**

TEEN-AGERS are now making "MILK flavored to taste" favorite refreshment. Look at these favorites . . . MILK and grape juice mixed half and half . . . or a ripe banana crushed and whipped into a cool glass of MILK (banana slip, it's called). Chocolate MILK plus a big scoop of chocolate ice cream makes a double chocolate hit . . . and for a drink as smooth as music mix MILK and pineapple juice, half and half.

Try any of these favorites . . . dream up your own special . . . strawberry, cherry, mint . . . and top it with whipped cream or ice cream for extra glamor. Plain or flavored, MILK is always refreshing, always satisfying, always good. Drink MILK . . . it's a smart habit.
