

## Kewaskum Beats Mayville Again For Lakes Title

### COP PLAYOFF SERIES, REPEAT AS DIVISION CHAMPIONS; FACE SOUTH WINNER

The Kewaskum Chevrolets edged Mayville again here Sunday night, 67 to 64, to repeat as champions in the northern division of the Land of Lakes league. The victory was the Chevs' second in succession over Mayville in the title playoff series and so a third game will not be necessary. A fine crowd cheered Kewaskum's first half winners to the win over Mayville's second half titlists. On the previous Sunday the Chevrolets won at Mayville, 70-62.

The Chevs will now meet the southern division winner for the Lakes grand championship. The date and place of the first game of this playoff had not been determined up to Thursday of this week. The Waukesha Zillmers, last year's grand champions, and the Hartland Lions tied for the southern crown and also had to engage in a playoff for the title in their division.

Sunday night's was a typical, close Mayville-Kewaskum battle as they were all season. Each team had won two games before Sunday and the Chevs' win gave them a 3 to 2 edge in the series. Sparked by Augie Bilgo and Wayland Tessar, Kewaskum was ahead throughout the tilt except at the start of the third quarter when the score was tied momentarily. The Chevrolets took a 10 point lead at one time in the third quarter but had to fight off a last period rally by the visitors to save the game.

The first half was on the ragged side with many shots being missed, Kewaskum's failure to connect on free throws prevented them from taking a good lead. The Chevs were on top 14-11 at the quarter but the margin was narrowed to one point, 27-26, at the intermission in the low scoring first half. Tessar, Bilgo and Fred Engel began hitting in the third period and paced their team to a 52-44 lead at the end of the third quarter. Mayville put on the pressure in the final stanza to outscore the winners and come within three points of tying the count.

The game was as rugged as usual between these rivals with a total of 63 fouls being called by the officials, Fossom and Kuss of West Bend, who refereed a fine game. In the first playoff tilt at Mayville 60 fouls were called, making a total of 123 in two contests. This is a very high figure. Kewaskum connected on only 23 free throws in 53 attempts, missing 30, for a poor average. Mayville did far better, sinking 26 in 46 tries, and this enabled them to stay on the Chevs' heels. Mayville lost three players on fouls and had three others with four personals when the game ended. Kewaskum lost two men and also ended up with three others having four apiece.

The big scoring guns, Bilgo for the winners and Mike Harvey for Mayville, shared honors with 22 points apiece. Tessar took second honors for the Chevs with 15 and Engel chipped in 11. Wild contributed 11 and Ayres 10 for Mayville.

MAYVILLE	FG	FT	PF
Wild, f	2	7	5
Heim, f	1	2	5
Harvey, f	8	6	4
Ayres, f	3	4	3
Schultz, c	1	2	4
Stueckmeyer, c	1	2	5
Krueger, g	0	3	4
Hartwig, g	3	0	3
	19	26	33

**RIVERS TEAM ALSO BEATS MAYVILLE IN CLOSE GAME**  
In a preliminary to the Lakes tilt Sunday night, the Kewaskum Rivers cagers also nosed out the Mayville Rivers five, 65-64, in a thriller. Kewaskum scored 17 points in the first quarter and went way ahead of Mayville as the latter was

## Emil Groeschel Dies; Was Former Resident

Services for Emil Groeschel, 45, of 2830 N. 56th street, Milwaukee, a former resident of Kewaskum for many years, were held Monday afternoon at Mount Calvary Lutheran church, Milwaukee. Interment was in Valhalla cemetery.

Mr. Groeschel died Thursday, Mar. 19, at St. Joseph's hospital in Milwaukee after a long illness. He was a sheet metal worker for 50 years, and on Jan. 1, had retired as foreman of J. Groeschel & Son, heating contractors. He was a son of the late Mr. and Mrs. John Groeschel.

Surviving are the widow; three brothers, Otto of Stambaugh, Mich., Albert of Milwaukee, and Erwin of Lomira, and a sister, Mrs. Seima Cocklin of Ladysmith.

## Twelve Teams in Kettle Moraine Dartball Meet

Twelve teams participated in the Kettle Moraine Lutheran Dart Ball tournament at McLane school gym, West Bend, Sunday with Adell winning the title in one division and Slinger taking first place honors in the other division.

The teams were divided into two divisions of six teams each, known as A and B divisions. The results follow: A teams—1. Adell; 2. Dundee; 3. West Bend; 4. New Fane I; 5. New Fane II; 6. Kohlsville. B teams—1. Slinger; 2. Sherman; 3. Batavia; 4. Fredonia; 5. Kewaskum; 6. Scott.

Adell tangled with Slinger at Kewaskum on March 26 for the first place trophy. The loser automatically wins second place trophy.

## HAEBIG IS APPOINTED COURT COMMISSIONER

Three new court commissioners were appointed recently by Circuit Judge William O'Connell. They are K. W. Haebig of Kewaskum, North, J. Griffin and Lester Buckley. Other circuit court commissioners are Stephen O'Meara, Ted Simeser and Tom Koll of Hartford.

Testimonial powers of court commissioners include issuing subpoenas and attachments, compelling attendance of witnesses, administer oaths and affidavits, take depositions and testimony and certify and report depositions and testimony.

## HOSPITAL NEWS

Mrs. Wayland Tessar, Kewaskum, submitted to an operation at Wisconsin General hospital, Madison, Thursday, March 26.

Mrs. Celesta Koerble, Kewaskum, is a patient at St. Joseph's hospital, West Bend.

John Bresemap, town of Wayne, who suffered a stroke recently, was taken to St. Agnes hospital, Fond du Lac, last Wednesday.

## BAKE AND FOOD SALE

The ladies of the Salem church at Wayne are sponsoring a bake and food sale on Saturday, April 4, at 2:00 o'clock, at Petri's store. Come early and get your goodies for your Easter dinner.

## MISS KOUGL ENGAGED

Mr. and Mrs. Francis J. Kougl of R. 1, Kewaskum, wish to announce the engagement of their daughter, Irene Mary, to Sgt. Truman Johnson of Moline, Ill., who is stationed in Alaska.

## BOWL IN K. OF C. TOURNAY

A number of Kewaskum members of the West Bend Council, Knights of Columbus, bowled in the K. of C. bowling tournament held at Beaver Dam last Sunday.

held to 4 free throws. However, the opponents found the range in the second period to tally 20 buttons to Kewaskum's 18, making the count 33-24 at halftime. The third straza scoring was close with Mayville narrowing the gap slightly to 50-42. The visitors bested the winners again in the final quarter but fell short by 4 points of catching up.

## Co. School Board Association Has First Convention

The first bi-annual convention of the County Schoolboard association Monday evening, Mar. 23, was very well attended. The Slinger High school gym was filled and the group displayed a spirit of enthusiasm that exemplified the fact that the boards are fully aware of their own and of the importance of good education for the children.

The program opened with the following musical selections: "Indian Love Call"—Sax solo—Irene Heid; accompanist, Miss Maxam; "Two Pals"—Trumpet duet—Bill Wendt, Robert Steel; accompanist, Stuart Gilbert; "Bird Songs at Even Tide"—Vocal solo—Caroline Bischoff; accompanist, Mary Margaret Kratz; Sax duet—Shirley Meyer, Lois Reichert; accompanist, Mrs. George Reichert.

Mrs. Phyllis Ritter, principal of the Dodge County Normal, gave an interesting talk on the need of teacher candidates. She also stated that history records disclosed the fact Washington county had always worked very closely with the Dodge County Normal Teacher Training school, and that the new building now being constructed would be more enacting to the young people who have an interest in the teaching field. This new school will have all modern conveniences and will cost about \$120,000. She showed the picture of the school as it is to be when completed.

Next on the program was Russell Colwell of the Washington County Farm Bureau. His talk was primarily on the value of having insurance protection for the teacher, the pupils, and against the general public.

Then Deane Bascom, chairman of the new county school committee, presented his committee, and followed this presentation with a short talk on the policy and philosophy of the new committee. He further stated that the immediate task of the committee was to settle the West Bend township problem, and then the Kewaskum village problem pertaining to its high school situation.

The next big job to be undertaken will be that of attaching every district which does not operate its school to a neighboring operating district in order that the tax load will be equalized and so that the county will receive the aids that are lost on closed districts.

Every year the county superintendent's office promotes a contest to see which school clerks will be first in turning in their annual reports. At this spot in the program the county superintendent presented certificates of merit for prompt and efficient reporting to these four school board clerks: Harry Hoelz, Dist. 7 & 12; Polk; Harry Oelhafen, Dist. 6; Wayne; Jacob Oelhafen, Dist. 7; Addison; Paul Schmitt, Dist. Jt. 3; Wayne.

Ray Bast, president of the Washington County Schoolboard association, then took charge of the meeting.

The first order of business was the reading of the minutes of the past fall meeting by the secretary, Alfred Seefeldt. These were accepted as read. Next was the treasurer's report by Arthur Schoedel. This report, too, was accepted as read. Mr. Bast then explained that the board of directors had been working with the committee on the proposed teacher salary schedule, and on certain legislative bills.

The convention then divided into three groups; the clerks were directed by Harold Placher, the treasurers by Vernon Kauth, and the directors by Roy Wolf. After about three quarters of an hour in group deliberation the convention re-convened as a body, and the results were suggestions as to what school board members desired to better serve in their respective capacity, and to direct the association in better service to its members.

This convention was held in Slinger by invitation of that board, in compliance with an adopted board of directors policy to rotate conventions so as to acquaint the schoolboards of the county with all of the county schools.

This convention closes the first year of the County Schoolboard association as an active association, and the meeting truly indicated that it had been a successful year.

## Eight Candidates Out for Village Trustee Offices

Last Friday, March 20, was the final day to file nomination papers with the village commissioner for village offices in the spring election on April 7. On this date a full slate of officers will be elected except for three trustees who hold over in office for another year.

Eight candidates filed papers for the three trustee offices to be elected and this should make for a spirited balloting at the polls. Incumbent trustee Joe Eberic and Edward Schaefer are candidates for re-election, while the third incumbent, George Hansen, did not file papers for re-election. The six other trustee candidates whose names will appear on the ballot are K. A. Honeck, Jr., Erich F. Jeske, Arvin Merwin, Anthony P. Schaefer, Charles Sparks and John G. Stelpling. "Tony" Schaefer and Sparks formerly held village offices.

All other village officers will be candidates for re-election without opposition. They are Charles Miller, president; Edwin M. Romaine, supervisor; Ed. A. Bartelt, assessor, and Lyle W. Bartelt, justice of the peace.

Holdover trustees are Lester Kohn, Arnold Martin and Marvin Schaefer.

## Girl Scouts Will Deliver Cookies Apr. 4; Hold Dinner

The Girl Scouts will start delivering Girl Scout cookies at 9 o'clock Saturday morning, April 4. Forty dozen boxes of cookies were sold in this community.

On March 19, the Brownie and Intermediate Scouts, their parents and committee members celebrated the Girl Scout birthday with a delicious dinner at the Peace E and R church. Beverly Ruth, Susan Erdman, Helen Schaefer and Cheryl Erdman were invested into the Girl Scout troop. Nancy Fickler, Sharon Harbeck, Rosalie Ewert and Delores Ketter were awarded their second class rank badges. First class Girl Scout badges were presented to Judy Marx, Theresa Vorpahl and Carol Miller. Many proficiency badges were presented to the members of the troop.

On Saturday, March 28, the scouts are presenting skits from "Tom Sawyer," "Little Women," and "Caddie Woodlawn" for the Woman's club.

Tuesday evening, April 7, the regular meeting of the Girl Scout committee will be held at the home of Mrs. Theo. Rohlinger.

## BIRTHS

**DREHER**—A son to Cpl. and Mrs. Robert Dreher of Camp Gordon, Georgia, Saturday, Mar. 21, at the army camp hospital. Cpl. Dreher is a son of Mr. and Mrs. Lester Dreher, Kewaskum, and his wife, Dore, is a daughter of Mr. and Mrs. Ernie Leonardelli, Kewaskum.

**LEONARDELLI**—A daughter to Mr. and Mrs. Ernest Leonardelli, Kewaskum, Wednesday, Mar. 18.

**PACKUS**—Mrs. Ella Backhaus, Kewaskum, received the glad news that another son was born Monday, Mar. 23, to her son Henry O. Backus and wife at Oshkosh.

**SANDERS**—A son to Mr. and Mrs. William Sanders, Kewaskum, Saturday, Mar. 21.

**YOLM**—A daughter to Mr. and Mrs. Sylvester Yolm, Campbellsport, Thursday, Mar. 19. Mr. Yolm is a former Kewaskum resident.

## ST. BRIDGET'S PARISH PURCHASES NEW ORGAN

At the annual meeting of St. Bridget's parish recently, it was voted to purchase a new Hammond organ and also to have the sanctuary floor repaired. The organ was delivered last Friday and was to be installed immediately.

## ATTEND TOURNAY GAMES

The Kewaskum High school basketball team, their coaches, and several other local fans attended some of the W.L.A.A. state high school tournament games at Madison over the week end. Menasha won the state championship.

## Local Red Cross Chapter First in State Over Quota

Word has been received from Midwestern headquarters, American Red Cross, that the West Bend chapter area was the first in the state of Wisconsin to reach its quota in the 1952 Red Cross fund campaign. Contributions to the local chapter topped the \$2,245 goal last Wednesday, just one day ahead of the Milwaukee chapter. It was the first time in the memory of officials of the chapter here that this area led all others in the state in reaching its goal.

R. D. Ziegler, general chairman of the 1952 fund drive in this vicinity, said Monday that contributions as

## THANKS EXPRESSED

I would like to take this opportunity to express my heartfelt thanks to the precinct chairmen and their individual workers who so generously gave their time to make the 1952 Red Cross drive a success.

Thanks, also, to the people in the chapter area for their wonderful support of the 1952 drive.

R. D. Ziegler

of that day were over \$2,100 with a good possibility that they will total \$10,000 before all receipts are in.

"All of us in the West Bend chapter area can take pride in the fact that we have set the pace for the entire state in support of the great humanitarian work of Red Cross. We have kept unbroken our enviable record of generous support to the important work of Red Cross on the local, national and international levels," Ziegler said, adding that credit for the results of the campaign here must go chiefly to the volunteer workers and the many contributors whose generosity is evidenced by the speed with which the quota was reached.

Ziegler said a final tabulation by precincts will be made at the end of this week and results will be announced shortly. It is expected that nearly all of the individual precincts will equal or exceed their respective goals. Allocation of credits to villages and townships is being made wherever possible on those contributions made by people who are employed in West Bend but reside elsewhere, he pointed out.

## In the Service

### PFC. LUDWIG RETURNS FROM KOREA, DISCHARGED

Pfc. Norman V. Ludwig, son of Mr. and Mrs. Vilas Ludwig, R. 2, Campbellsport (Dundee), was returned home after completing two years of service in the army, 19 months of which were spent in Korea and Japan. Pfc. Ludwig has been honorably discharged. He has the following medals: Korean Service medal with three bronze service stars, United Nations Service medal, Army Occupational medal (Japan), and Presidential Unit Citation.

### RENNER AT CAMP ROBERTS

Pvt. Robert A. Renner of Kewaskum has been assigned to Camp Roberts, Calif., where he has begun his military training. Pvt. Renner's parents, Mr. and Mrs. C. Renner, reside on Kewaskum rural route, is in training with Btry. A, 434th A. F. A., 4th Plat. at Camp Roberts.

### PFC. WILBUR KUTZ HOME

Pfc. Wilbur Kutz of Fort Knox spent a furlough with his mother and brother in Kewaskum. He has reported to Tacoma, Wash. for further duty.

### GIESE BAPTISM SUNDAY

The daughter of Mr. and Mrs. Walter Giese, Kewaskum, R. R. was baptized Sunday morning by the Rev. Gerhard Kanless in St. Lucas Ev. Lutheran church. She was named Cheryl Lynn Margaret. Relatives were entertained.

### KLEINKES BUY RAMEL HOME

Mr. and Mrs. Roy Zuehke, Theresa, have sold the home they recently purchased from the Mary Ramel estate to Mr. and Mrs. Marvin Kleinkes, who are moving into the home, located on East Main st.

## Reorganize Lakes Baseball League

The northern division of the Land of Lakes baseball league was reorganized with six teams indicating their intention to enter and the possibility of more teams joining.

The teams entering the league will include Kewaskum, Mequon, Grafton, Newburg, Cedarburg and Port Washington, a newcomer. Other possibilities are Germantown and Saukville, Slinger and Granville, which were in the northern division last season, have switched leagues. Slinger has joined the Rock River loop and West Bend will also play in that league. Granville has been realigned with the eastern division of the Lakes circuit.

The Lakes organization, which consisted of four divisions formerly under the direction of Martin Weber, Sr., was reorganized with four individual directors forming an executive board to rule the entire league. The northern division will be directed by Ray Piroli of West Bend; the southern division will be handled by Rex Henze, the eastern loop by Joe Long, and Lloyd Stapleton will assume control of the western division.

All star games and the grand championship playoffs will again take place this year. A meeting of umpires, to be assigned by the executive board, will be held at Merion Mar. 29. A meeting of all managers in the northern division was held Thursday, Mar. 19, at Clayton's Bar in West Bend.

## "Mush" Bauer Treats High School Basketball Team

On Tuesday evening at Bauer's hotel in Campbellsport Ed. "Mush" Bauer was host to a group of about 75 people at a dinner. Guests included members of the Campbellsport and Kewaskum high school basketball teams and their coaches, sports fans, and Campbellsport and Fond du Lac county old time cagers.

When play started in the recent district tournament at Campbellsport "Mush" promised the Belles he would treat them to a dinner if they upset Kewaskum in the tournament (Kewaskum had defeated the Belles twice during the regular season). He also promised the Kewaskum Indians that he would treat them to dinner, too, if they lost to Campbellsport. They did and Bauer fulfilled his obligation Tuesday.

Campbellsport went on to win the district meet and a regional playoff game against Randolph. They were eliminated by Hartford in sectional play at Middleton. The Hartford team advanced to the state tournament at Madison and reached the semi-finals. Kewaskum was honored for winning the championship in the Tri-County conference and finishing the season undefeated.

Clifford M. Rose, Kewaskum High school principal, was among those who appeared on the program at the dinner.

### FEED DEALERS ELECT BILL RUTH PRESIDENT

William "Bill" Ruth of Koch's mill at Kewaskum was elected president of the Milwaukee District Seed and Feed Dealers association at a recent meeting of the organization at the Moonbi Inn at Germantown. The Milwaukee district covers a 50-mile radius and has members from almost all towns in the area.

### SOFTBALL LOOP ORGANIZED, HAS OPENINGS FOR TEAMS

The Cross Country Softball loop is being reorganized for the coming season. There are still openings for more teams. Any team interested in joining is asked to contact Walter Dei, Kewaskum, or attend a league meeting to be held at the Kewaskum Opera House on Monday, March 30, at 8 p. m.

### SMOLEY'S MINIATURE ALLEYS TUESDAY NIGHT LADIES LEAGUE

	Won	Lost
Smoley's	41	32
Kellerettes	46	35
Meta's	37	47
Frause's	34	50
Week's high—Team 2 games—Kellerettes 3285; team single game—Smoley's 1122; individual 3 games—Shirley Fellenz 690; individual single game—Shirley Kohler 256.		

## Board Discusses New Mercury Type Lighting System

### SERVICES OF KARL GUSE, RELIEF POLICE OFFICER, ARE TERMINATED

Regular Meeting, March 2, 1953  
The Village Board of Kewaskum, Washington County, Wisconsin met in regular meeting with President C. Miller presiding and all board members present.

The minutes of the previous meeting were approved as presented.

Mr. Harry Brabender discussed with the board the making of an assessor's plat map and quoted a price of \$4500.00 for the making of such a map.

Representatives of Regal Ware discussed with the board the problem of providing parking space for their employees and also the obtaining of signal lights on the Second street railroad crossing.

The commissioner was instructed to conduct a traffic check for a twenty-four hour period on the Second street railroad crossing.

Mr. Jerry Boerner of the Westinghouse Electric Supply Co. discussed with the board his plan of converting the present Main street lighting system with the new mercury vapor type.

The petition of the Kewaskum Mutual insurance Co. for new sidewalk fronting their new office building on Main street was referred to the committee on sidewalks.

Motion by J. Eberic, seconded by A. Martin and carried that the granting of an operator's license to Werner A. Bruhn is hereby approved.

At this point President Miller relinquished the chair to Trustee M. Schaefer.

(CONTINUED ON PAGE FIVE)

## In Our Mailbag . . .

To the Editor  
Kewaskum Statesman  
Dear Mr. Harbeck:  
We, the undersigned, urge the voters of Washington County to contact their county board supervisors and object to the building of a completely new county jail at the estimated cost of \$189,000. We have reached the conclusion that a new jail is unnecessary after having interviewed the sheriff and county board members, toured the jail, and read accounts of the county board meetings with the state jail inspector. The following are the reasons why we believe a new jail is unnecessary:

1. The state jail inspector says the present jail could be ranked among the better in the state and that it is adequate for male prisoners provided a fire escape be added to the structure.
2. Only one woman prisoner has been detained in the jail in the last 4 years, according to the sheriff. Provisions can be made for an occasional female prisoner at Sheboygan or Milwaukee.
3. Juveniles are rarely detained, but are put out in custody or on probation.
4. In the opinions of at least one local physician and one local undertaker, there is no need for a county morgue or first aid station.
5. To duplicate an adequate jail would be an unnecessary expenditure of the taxpayers' money, especially in a time when the nation is striving to economize on governmental expenditures.

# Teacup Topics

By Betty Ann

EDITOR  
THE MILWAUKEE JOURNAL  
WOMAN'S PAGES

Lip habits are such dead giveaways to the condition of our mind. Nervous, tense people have so many of them. Old looking, though not necessarily old, people often have many that they've allowed to set. The serene face of a truly beautiful woman has a mobile mouth that she uses for a natural smile and a pleasing voice, but that face never mugs says Betty Ann.

Mugging, which people are always doing unintentionally, is so unattractive. You aren't aware when you are doing it. Many mugging habits may stem from ill health, either mental or physical. But there is something you can do to eliminate these unattractive expressions, from which few of us are exempt. We can ask our closest friends whether we mug. When we become conscious of the bad habits, we can try to eliminate them. Here are some of the ugly muggings one sees all the time:

Pursing the lips outward in a combination of the babyish and the old. Sucking the mouth, or the teeth, with an animal-like sound. Twitching the corners of the lips up sporadically. (This does not refer to a tic, which only a psychiatrist can treat.) Smirking instead of smiling—distorting the mouth into a foolish looking line. Licking the lips frequently, especially while talking. Biting the lips. Rolling the lower lip downward, revealing the membrane of the mouth. Tucking the lips in over the teeth, grimly. Holding the mouth open.

If you can eliminate whatever your unattractive lip habit may be, you will have gone far toward making yourself look many years younger and prettier.

Did you ever stumble out of bed and all but fall downstairs in a darkened house to answer the midnight ringing of a phone—afraid you'd miss the call if you stopped to put on a light?

Did you ever stand momentarily blinded in the glare of a suddenly turned on brilliant bathroom light while on a nighttime search for medicine for a sick child? And did you ever face the perennial problem of a small child's fear of a completely darkened room at bedtime?

Then it's easy for you to appreciate the value of night lights in your home.

Strategically placed—in the hallway, at the telephone table, on the stairs, in the bedroom, the bathroom and the kitchen—these tiny lights can provide a path of light through your home all night long.

And the seven watt bulb in each night light will burn for several nights on just a penny's worth of current, a bargain price for nighttime safety in the house.

Standard night lights, which plug right into any convenient outlet, can be fitted with a soft blue light for use in bedrooms and nurseries or with a clear bulb for locations where you want a little more illumination.

There is also a new "hang up" night light which can be hung on a wall and has a six foot cord to plug into a nearby outlet.

Fresh green cabbage continues to flood markets at bargain prices. Iceberg lettuce and celery supplies tightened a little during the last week and prices for these salad vegetables began to rise after a couple weeks of distress selling. So, while you may have to pay a little more for lettuce and celery than you did, cabbage still should be enough of a bargain to please the thriftiest of shoppers.

Cabbage can be prepared in many ways. Here's a quick preparation five minute cabbage. For it you'll need one quart shredded cabbage. Heat two cups milk and cook the cabbage in it for two minutes. Blend two tablespoons flour and two tablespoons melted fat and add that to the cabbage mixture. Season with salt and pepper and cook the cabbage rapidly for three or four minutes more, stirring constantly. Cabbage will keep crisp and green and delicately flavored when cooked this way.

Panned cabbage also can be cooked quickly. Cut the cabbage in small pieces but do not shred it. For each quart of prepared cabbage, allow two tablespoons fat. Melt the fat in a heavy flat pan. Add the cabbage and cover it to hold in the steam. Cook slowly until the cabbage is tender but not mushy. Stir the mixture now and then so the cabbage won't stick to the pan. When the cabbage is cooked, add salt, pepper, cream, meat drippings or other seasoning to flavor it.

## Newcastle Disease Also Affects Humans

Madison — Newcastle disease, commonly believed to be exclusively a disease of poultry, may have greater significance for man than is generally realized, say four University of Wisconsin scientists.

The disease is known to affect laboratory and packing plant workers, and at present it usually causes only a mild eye infection, and sometimes a sore throat or running nose. In rare instances, the infection is somewhat more severe, and there is always the possibility that the virus might change in character enough to become a new type of epidemic influenza.

The study of Newcastle disease in man was conducted by Drs. Robert W. Quinn, Robert P. Hanson, John W. Brown, and Carl A. Brandy of the University of Wisconsin. They reported their findings in a recent medical journal.

The scientists also report they have isolated and identified the virus from infected humans.

They found that the Newcastle virus, like the virus of influenza, can spread throughout various organs of the body and remain in an active form despite the absence of disease symptoms. This characteristic of the virus would make it possible for mutants to arise which might be more virulent than present forms and cause a more serious disease in man.

"Newcastle disease may have important significance to public health," the scientists say.

# Texas Corn Chips Will Enliven Your Cooking

BY DOROTHY MADDOX

**CATTLE**, cotton, oil, corn chips, tall handsome men and gracious women, that's the Texas we saw. From Fort Worth to San Antonio, from east to west in Texas, we ate chili and nibbled on golden corn chips to our heart's content.

In Dallas, Nell Morris, director of Frito Company's research kitchens, gave us lessons in how to use corn chips to brighten up ordinary dishes. You don't have to live in the hospitable Lone Star State to serve these unusual dishes to your family and friends. All you need is some of the know-how Nell Morris gave us under the Texas sunshine.

### Texas Baked Beef Hash (Serves 6-8)

Two medium old potatoes, 1 teaspoon salt, ½ teaspoon black pepper, 1 medium onion (chopped), 2 cups cooked ground beef, 1 can condensed cream of mushroom soup (diluted with 1 can water), 1 cup lightly crushed corn chips (measured after crushing), ½ cup grated American cheese.

In an oiled casserole, arrange a layer of thinly sliced potatoes sprinkled with salt and pepper. Next a layer of chopped onion. Repeat. Top with the cooked ground beef. Heat soup with one can of water and pour over the beef. Sprinkle corn chips and cheese on top. Cover, bake in moderate oven (325 degrees F.) for one hour.

### Corn Chip Tomato Rabbit (Serves 6-8)

Two tablespoons butter or margarine, 2 tablespoons flour, 1 cup milk, 1 can condensed tomato soup (10½ ounces), 1 medium onion (chopped), 1½ cups grated cheese, 2 cups corn chips. Make a white sauce of the butter or margarine, flour and milk. Add 1 cup cheese to white sauce and stir until melted. Add soup

Adding a little vinegar to water used for washing windows will help prevent the glass from streaking and make it shine.

Texas baked beef hash with golden corn chips is a savory combination to tempt the appetite of anyone whether he hails from the Lone Star State or the Empire State. It has universal appeal.

and onion. Pour sauce over 1½ cups corn chips in a baking dish. Sprinkle the top with the remaining cheese and corn chips. Bake in moderate oven (350 degrees F.) for 20 minutes.

## Research Advances, Aid Heart Cases

In connection with the nationwide observance of American Heart Month, Dr. Irving S. Wright, President of the American Heart Association, today called attention to 5 basic facts about heart disease which he said the public should find "encouraging to know and easy to remember."

Heart Associations throughout the country, including the Wisconsin Heart Association have arranged special educational programs as part of Heart Month. In some communities of the state, a campaign is being conducted to raise \$187,000 to support the Wisconsin Heart Association's program of research, community service and education.

"Remarkable changes have taken place during the last generation in the understanding of the heart diseases," Dr. Wright said. "Unreasoning fear and a spirit of fatalism which prevailed not many years ago have now given way to a sane and intelligent attitude based on the knowledge that has been accumulated during the last few decades."

"This is an era of new hope, first and foremost because of research advances, advances in drugs and surgery that have led to improvement in preventive measures and in treatment."

"The hopeful fact is that when heart patients discover their condition early and are wise enough to cooperate with their physicians, they have every chance of a long, useful and satisfying life. Many heart patients, under good medical management, now live 20 or 30 years after diagnosis. Some even live beyond the normal span of life."

"Recent research advances include the development of new diagnostic tools and the perfection of old ones—increasing the possibility of early and more accurate recognition of heart disorders."

"New surgical procedures are correcting many congenital heart defects and, in many cases, damage to heart valves caused by rheumatic fever. In many cases, too, dangerously high blood pressure can be reduced by surgery or by treatment with new drugs. New drugs that reduce the danger of blood-clotting are saving many lives threatened by heart attacks."

"It is possible, now, to prevent rheumatic fever in most instances by the prompt use of penicillin against the streptococcal infection which almost always precedes this disease of childhood and adolescence."

"Here, in summary form, are five brief facts about heart disease which we all should know and take to heart. By acting wisely on them, a lot of potential trouble can be avoided."

First—some forms of heart disease can be prevented—a few can be cured.

## EASTER BONNETS

Madame, have you seen the latest styles in hats? Look this way and you will see seven of our loveliest Easter creations. They can be yours to enjoy, along with the sweet little puppy, every day of the week. Yes, Madame, all seven are yours on one hot iron transfer for embroidery or painting on tea towels, crib quilts, nursery furniture, etc. Order yours now! C3262, 20c.

Send orders to: Homecraft Service, Journal Pub. Co., Inc., 2500 Buchanan, Kansas City 16, Mo.

"Second—all heart cases can be cared for best if diagnosed early."

"Third—almost every heart condition can be helped by proper treatment."

"Fourth—most heart patients can keep on working—very often at the same job."

"Fifth—there are many symptoms widely believed to mean heart disease. Actually they may or may not have any such significance. Don't guess and worry. See your doctor and be sure."

## Bible Comment:

### Free Enterprise Must Be Unselfish To Remain Free

THE ideal society, from the standpoint of the Christian, is one in which men live in fellowship. It is a society where justice is sought for everyone and where the power of the strong is available for the protection of the weak.

Summing up these qualities, it is very evident that even in the best of democracies, we are far from attaining that ideal. The aftermath of a war between nations has been a clash between interested groups seeking position and power for their own members.

Free enterprise is the welcome alternative to totalitarianism today. This form of society should appeal to those who believe in the inherent freedom of mankind. But if free enterprise means the right of management to acquire unlimited profits and the right of labor to strike without limit, it will be that much more difficult for free enterprise to battle the influences of totalitarianism.

Unless it becomes Christian enterprise, it will become weak and ineffectual. We should listen today, to the advice of Jesus and His apostle Paul. Jesus placed love at the foundation of our society. He considered service to be the principle of action. The apostle Paul compared society to the human body, declaring we were all members, one of another.

Even though these things are basic, they have never been properly recognized.

Totalitarianism is represented by communism, and today atheistic communism is a strong challenge which Christianity must meet. And this threat cannot be met by half-hearted Christians.

It can only be met by Protestants, Catholics and Jews who practice the principles of their faiths every day. In the economic and industrial fields, it can only be met by making free enterprise an "unselfish" enterprise which will work for the good of everyone.

## 1 Word Can Change Your Life—DRILL

Sometimes you wonder whether sticking to a thing nets you the promised prizes. Well, it does!

A Scotch Highlander, fighting in the American Revolutionary War, was charged with communicating with the enemy. In his defense he said he sneaked away from his buddies to spend an hour in private prayer.

"Are you in the habit of doing this?" the commanding officer wanted to know. "Yes, sir." "Then kneel right now and pray out loud so that we all may hear you."

The soldier, expecting instant death, did as he was told and when he had finished the officer said: "You may go. You couldn't have met the enemy tonight." Then to the other men he added: "No one could have prayed like that without a long apprenticeship. Those who never attend drill always get on ill at review." Quite so. Whatever it is, praying or working, stick to it. The prizes come to those who drill, the word that can change your life.

FILLING STATION—Taking on fuel before flying to Cairo, Egypt, is three-month-old Mike Ashworth. Assisting is flight hostess Sylvia Velez who takes over the necessary operation while Mike's mother buys tickets at New York's Idlewild Airport.

## Wisconsin Makes Faster TB Progress Than Other States

Wisconsin has made faster progress in controlling TB than most states, a report of the Wisconsin Anti-Tuberculosis Association reveals.

During the period 1930-1950, Wisconsin ranked fifth among all states in tuberculosis death rate decline. The states showing the greatest decline were Wyoming, Colorado, Nevada, New Mexico, Wisconsin, Arizona and California.

Wisconsin is the only one of these states located east of the Mississippi River. The improvement in some of these western "health resort" states may actually not be as great as it appears, the WATA suggests.

Going "west" for a "cure" is not as common today as 20 years ago, probably due to educational work in home states urging patients to seek care in local TB hospitals. The previously high rate in some of the western states was in part due to transient patients going west to cure—and die.

"Wisconsin's record in lowering its TB death rate may be due in large part to our outstanding sanatorium treatment facilities," states Duane Sternitzky, WATA research associate.

Only two states—Washington and Minnesota—have more sanatorium beds available for care of their tuberculous sick, in proportion to deaths, than Wisconsin, he points out.

Moreover, a recent report of the State Board of Health shows that the state's sanatoriums have a high percentage of occupancy.

"We can be proud of this record," Sternitzky states. "But the very fact that our sanatoriums have so many patients shows that there is a big job ahead in tuberculosis control."

## HOW TO SHRINK WOOLENS

To shrink woolen material, roll it in a wet sheet which has been rung out. Let it stand 24 hours, remove the sheet and pat the wool out flat. Let dry another day. No pressing is required.

FIGURE FLATTERY—The draped "portrait" neckline, cummerbund waistline and flap pockets make this latest spring creation a figure-flattering combination. The dress, modeled at a New York fashion show, is made of red cotton shantung.

## GOOD BREAKFAST MEANS GOOD MORNING!

If you find you are not as efficient around eleven each morning; if you begin to get a "draggy" feeling at mid-afternoon; if your youngsters don't show the zip and mental alertness which you expect—maybe it's because the family isn't doing right by itself at breakfast!

That's what a list of learned nutrition experts, doctors and others are saying. They've made extensive tests which show that neglect of the first meal of the day definitely cuts down on efficiency. Some of them go so far as to say that skipping on breakfast is a contributing factor among children in general poor health.

These experts stress the fact that breakfast should provide one-fourth to one-third of the total daily caloric needs as well as a proportionate share of all the essential nutrients. Yet it is the one meal most often slighted by adults and children alike.

A recent survey conducted by the University of Iowa Medical School indicated a neglect of good breakfasts in all age groups. Results showed that out of five children, only one goes to school with a good breakfast.

Among the boys and girls, the survey revealed that sixty percent of the teen-age girls were in the habit of eating a breakfast entirely inadequate to their physical needs while twice as many older teen-age

boys had poorer breakfast habits in comparison with the younger teen-agers.

Women rank as the worst offenders in the older age bracket with only forty percent of them eating what nutritionists term a good breakfast. The men had a somewhat higher average with fifty-six percent of those surveyed saying they had a good breakfast.

The studies showed that those persons eating a good breakfast daily had a greater work output, shorter reaction time and less shakiness after exercising. Those eating a poor breakfast showed a decrease in maximum work output, an increase both in simple and choice reaction time and an increase in tremor magnitude.

A basic breakfast pattern, such as that being eaten by the typical American family pictured above, has been formulated by leading nutritionists and medical authorities. It consists of fruit or fruit juice, cereal (hot or ready to eat), milk, bread and butter or fortified margarine.

This basic breakfast does not, except in a few instances, equal one-fourth to one-third of the total daily caloric needs. It is merely a nutritional pattern structure to be increased in its portions or augmented with eggs, breakfast meats or other suitable foods to fulfill part of the daily caloric and nutritional requirements.

the habit, parents try harmless bitter substances or bandages on the thumb, but doctors sometimes advise letting the child outgrow the habit.

Answer to Question No. 3: About one-fifth of all women cancer victims die from breast cancer. Most of such deaths can be avoided if the cancer is detected early and treated surgically or with x-ray. Any slight irregularity or lump in the breast calls for prompt inspection by a doctor. Every woman over 40 years of age should have her doctor examine her breasts at least once a year.

Answer to Question No. 2: It is believed that a child sucks his thumb because of some emotional need. The best cure is for parents to make him feel loved and secure. Sometimes the habit persists after the emotional difficulty has disappeared. To break

## GOOD HEALTH

1. WHAT IS A PARAPLEGIC?

A paraplegic is a person who is paralyzed in the legs and lower part of the body, usually as a result of a spinal injury. Exercises, training, new surgery, and drugs are proving so helpful that a high percentage of paraplegics can now get well enough to lead useful, happy lives.

2. SHOULD THUMB SUCKING BE STOPPED?

3. DO MANY DIE OF BREAST CANCER?

WRINKLE RESISTANT—The slimming separate skirt worn by this model is as wrinkle-proof as her pretty face. Just right for spring, it is designed in bold shepherd checks, has small front pockets and a leather belt. Made of a blend of Orlon and wool, it was created by a New York designer.

# Sports Afield

By Ted Kesting

Jason Lucas says fly-rod fishing is simple, but it is simple only when three things are right: one must have a suitable rod; one must get a line to match it; and one must learn correct casting technique. So let's consider today the problem of selecting a rod.

The number and variety of rods shown in catalogues is frightening—long rods, short rods, light rods, heavy rods; rods with actions described as nymph, wet-fly, dry-fly, bass-bug, parabolic, hyperbolic. Lucas advises a rod somewhere between 7½ and 8 feet, and usually weighing between 3½ and 4 ounces. (Not that weight means anything, since the grip and reel seat has much to do with that, but nothing to do with the action or strength.)

You wonder if there isn't danger of breaking such a light rod? Certainly; but anyone who is likely to break it would be almost as likely to break a heavy rod. In the whole history of fishing, a fish has never yet broken a rod; it's the user who does it. Let's digress here a moment to discuss the "unbreakable" glass rod, fly or casting. You've seen salesmen demonstrate it by bending the tip around in a circle to touch the butt. All they were really doing was showing that the rod was about useless for casting purposes; it was designed for bending into a circle, not for fishing. Any rod with good action can be broken by considerably

less mishandling. Bending a rod by hand shows nothing whatever about its action—except that it hasn't any.

Of what material should the rod be? For one of moderate means, and especially for the beginner, Lucas recommends that it be hollow glass, since it will require less care than bamboo, and won't take a set if improperly handled or stored—not that it won't have some limits in these respects, too. And in the lower price ranges, it will be stronger than a bamboo, though not unbreakable if badly mistreated.

How can one tell if a rod in a store has dry-fly action? The best way is to run a line through the guides, fasten it well out in front, and pull a reasonable amount, with the butt about at right angles to where the line is attached. Or, you can make a pretty good guess by flipping the rod gently and quickly; then the butt part should remain quite straight, the front taking a nice, graceful bend.

**HI BOA!**—Staring down a 12-foot boa constrictor is the job of Warren Prince of Lowell, Mass. He is seen above in the Reptilium of the National Sportsmen's Show at New York's Grand Central Palace. The boa's body is draped around Prince's neck and shoulders.

## New Life for Old Barn

A CREAKY, unsightly barn or other farm building can be given a new appearance and a longer life by simply covering the unsightly exterior. By using a durable yet inexpensive material, the owner can salvage the old building, make it presentable, and save the cost of a new structure.

Perhaps the old building will serve in its sorry-looking way, but maybe a wind storm will flatten it and any hope of salvage. It's smarter to fix up the old place and protect the investment.

If the framework has sagged, of course, it is a good policy to have a barn raiser get the building straightened up before anything else is un-

dertaken. The old boards should be repaired, where necessary, and missing boards replaced before re-siding the building with Masonite 3/16-inch Tempered Presdwood, which comes in panels 4 feet wide up to 12 feet long.

These tough, strong panels of pressed wood fiber have the advantages of being long-lasting, resistant to weather and wear, rigid but light in weight, and easy to install. Their smooth, hard surface can be painted any color desired. Screen sides of the panels should be scrubbed with water and stacked, moist sides together, for 24 hours before being applied. The stack should be covered to retain moisture.

Each panel, while still damp, is nailed first through the center. Edges are nailed last. Panels ordinarily are applied vertically and brought to moderate contact. Batten strips of the same material, approximately 2¼ inches wide, are applied over the joints.

## U.N. Highway Signs Would Eliminate Language Problems

The highway signs shown above represent the recommendations of a group of U.N. experts for adoption throughout the world, which would enable highway users everywhere to understand road signs. Lack of understanding of any given language would not impair comprehension of the signs. The reproduced signs are the result of 20 months of work on the part of six experts appointed by the U.N. Secretary-General in 1950. The recommendations now go to the U.N. Transport and Communications Commission and the Economic and Social Council for further action.

## Increase Farm Income Use Cheap Fertilizer

Washington, D. C.—Agricultural authorities are telling farmers throughout the country that increased fertilizer use is their best way to meet the lower farm prices—higher costs squeeze.

Under present circumstances, farmers naturally must keep a weather eye out so as to reduce expenses on items which do not offer adequate returns. Such is not the case with fertilizer expenditures; in fact, the dividends from its proper use make it the farmer's best bargain. In 1940, \$1 invested in fertilizer brought a \$2 dividend in extra crops; six months ago this investment brought an average return of \$3.75 with dividends on certain specialty crops such as tomatoes running as high as \$15. Even with a slump in market prices, far greater than experienced in recent months, fertilizer will remain the best guardian of the farmer's economic welfare. By increasing output per acre through greater fertilizer use, a farmer can maintain and even bolster his net income.

The major explanation for this favorable situation lies in the fact that fertilizer prices have not risen as fast as prices for other commodities the farmer buys. During the past 12 years, according to the U. S. Department of Agriculture, prices paid by farmers have gone up almost 100 per cent and farm wage rates have jumped 140 per cent, but fertilizer prices have increased only 50 per cent. Relatively low fertilizer prices prevail, despite increased labor and transportation charges, bagging, processing, equipment maintenance and replacement costs.

## Behind The Scenes In American Business

By Reynolds Knight

NEW YORK—As in most instances where politics and policy collide, the great battle over cutting taxes or balancing the budget first will be settled by compromise—with politics getting the better of the deal. Probable solution: Pick an intermediate date like September 30 and end both the excess profits tax and the 11 per cent increase on personal income taxes as of that date.

The tax cutters' big edge on the budget balancers is that taxes can be cut simply by doing nothing—or almost nothing. EPT would expire, in the normal course, on June 30, and the personal income tax boost would end as of December 31, without further enactment. Since this is so, the tax cutters ask, why run the political risk of seeming to favor the big corporate taxpayer over the little individual one?

Actually the difference between cutting off the 85 per cent EPT and the 11 per cent personal increase is nowhere near so great as it sounds. Eliminating EPT would add only about 8½ per cent to the after-tax income of big U. S. Steel, for instance.

On, bite on the individual, added at the time of the 11 per cent temporary increase, was a sharp curtailment of the privilege of deducting certain other taxes in figuring income. So far, no one is proposing to lay that chisel down.

HANDS ACROSS SEA—Most of us probably shrug off England's dollar shortage as just "tough turkey" for our British cousins. That's because the average person is so baffled by the mysteries of foreign exchange. It's a fact, though, that Britain's dollar gap has had a stifling influence on our own economy. Many U. S. manufacturers can't sell anything in the sterling market (the countries under British domination). One such has been Willys-Overland, whose four-wheel-drive station wagons, trucks and Jeeps have been in strong demand around the world ever since World War II.

The company's large overseas trade has developed in spite of inability to sell in sterling markets, but now this is being changed via an agreement licensing Standard Motor Co. of Coventry, England, to build the Willys Jeep. Informed estimates indicate this will increase by many thousands the number of Jeeps annually sold abroad. Willys distributors in this country will, in reciprocation, handle certain new products of Standard. Here's a shining example of international cooperation by private companies to make the wheels of industry turn faster on both sides of the ocean.

THINGS TO COME — A new power mower motor, weighing half as much as present ones, uses aluminum castings... An airless spray gun flings paints at the wall with a gear-pump like the one that circulates oil in your motor. That way there are no air bubbles or atmospheric moisture in the paint film... A combination tobacco pouch and pipe holder, attached by vacuum disks to steering post or wing window, makes it safer for the autoist to smoke... A New York company makes cinder and concrete block with marble facings, single or double... A new machine called a flame photometer analyzes the salt content of blood in half an hour. Older methods take at least six hours... Hydraulic steering has jumped from passenger cars to tractors, at \$180 a jump. A Nebraska firm makes an attachment.

"NO BIZ WITHOUT SHOW BIZ"—This famous headline in *Variety* may exaggerate a little, but certainly 1953 is making stage promotion history for American business. Servel, Inc., with its \$1,000,000 extravaganza, "Show of Stars," which has been touring the country to present the company's new home appliances to dealers from coast to coast, is the outstanding example. It doesn't hurt, either, that the big "production number" in this one has a centerpiece that is pretty sensational as merchandise—a refrigerator that turns out a constant, ever-ready stock of ice pieces without using a single tray. This was the year in which the "hard sell" was going to be the grim necessity of sellers all the way from the manufacturer to the retailer, but with such a background the hard sell is proving not all hard to take.

BITS O' BUSINESS — A New York bank, seeking new checking accounts, bids for prospects who have been irritated by those cardboard checks designed for business-machine tabulation. This bank's checks are hard ones, too, but the depositor is told to feel perfectly free to fold, mutilate or spindle... A U. S. court ordered Swiss investors to submit bank records of the ownership of their interest in big U. S. Aniline and Film. Swiss laws hold such records inviolate. Now Switzerland must decide whether to frighten other investors by breaking confidence, or see the alien property office take the company without further ado.

## COUGAR

Cougar ©1952 National Wildlife Federation

An elementary science course of study written by some educators for an important city in the East says that the mountain lion and cougar disappeared from the nearby hills at about the same time. This might be elaborated to say that the mountain lion, cougar, painter, puma, panther, catamount, mountain devil, red tiger, mountain screamer, silver lion, purple panther, brown tiger, sneak cat, king cat and varmint also disappeared at the same time. They are all the same animal no matter what you call them nor where you find them. While some eight races have been recognized the animals are unquestionably all the same species, *Felis cougar*.

Originally the cougar ranged over practically all of the United States with a few specimens reported from Maine and along the southern border of Canada. They are still to be found rather regularly in southern British Columbia and Alberta. The range extends south to Patagonia. Except for Florida, parts of Louisiana and southern Texas, these cats have probably been exterminated in the United States east of the Plains states.

A cougar may measure 9 feet with a 3 foot tail. The weight goes up to 200 pounds. The sexes are colored alike a uniformly yellow brown except that the under parts are lighter. The fur is short, close and uniform. The whiskers are rather prominent.

A cougar is a powerful animal capable of dragging a 900 pound moose 300 feet over snow. It can jump straight up for a distance of 15 feet and can leap safely down a distance of 60 feet. An individual usually claims a territory that may be 60 miles across and in a single night may travel 20 miles. While black bears are known to relish pigs, wolves are known to favor cattle. Similarly coyotes seem to enjoy killing sheep but the cougar definitely favors horses and deer. In the rarest of instances it has been known to attack man.

They may serve a useful function in keeping the multiplication of deer under control. The famous story of killing off the cougars of the Kaibab forest only to have the deer multiply so that they starved in the resulting competition for food is a standard story in all conservation programs. It illustrates definitely that preda-

Top your soup with broiled cheese-topped crackers, deviled egg slices or chive cheese cutouts.

## ANSWERS TO Test Your I. Q.

1. No.
2. New York.
3. No. The American constitution has been amended to limit Presidents of the United States to two terms.
4. Clare Boothe Luce, the lady recently appointed to the post of ambassador to Italy.
5. 19 miles. Florence Chadwick, an American girl.

tors, whether they are fish, birds, insects or mammals, serve a useful function in the economy of nature.

Cougars are usually hunted by dogs with the hunters following on horses. When possible a pursued puma takes to a tree to escape the dogs. There it is shot, photographed, lassoed or otherwise used to satisfy the whim of man.

Cougars pair possibly for life. The one to five spotted young may be born at any time of the year, usually 91 days after breeding took place. The young are blind for about 9 days, crawl at 7 weeks, eat their first meat at 3 months, are weaned at about 4 months, retain their spots to 18 months and remain with the mother from 1 to 2 years. With exceptional luck a cougar might live to a ripe old 20 years of age.

It would seem that these animals under ordinary circumstances should not be completely destroyed in a given area suitable to their needs. This may be questioned by some, of course. But even those who think of cougars only as varmints should recognize that men do get sport from hunting them and sport is quite important in the lives of many people.

—E. Laurence Palmer.

### NOTICE OF VILLAGE ELECTION

NOTICE IS HEREBY GIVEN that the Annual Charter election for the Village of Kewaskum, Washington County, Wisconsin, at which are to be elected the following officers, to-wit: A President, three Trustees for two years, a Supervisor, an Assessor, one Justice of the Peace, will be held at the Municipal Building in said Village on Tuesday, the 7th day of April, 1953, and that the polls of said election will be open at 9:00 o'clock a. m. and close at 5:30 o'clock p. m. on that day. Dated March 23, 1953. WILLIAM S. MARTIN, Village Commissioner 3-27-2t

### WARNING TO DOG OWNERS

Numerous complaints have been coming in that dog owners of the village are getting careless again and allowing their animals to run loose. These dogs are destroying property and causing other damage, and are a general nuisance. Dogs running loose are violating the law and in the future unless they are tied up or kept on a leash, they will be done away with as the law permits. Ed. Haack, Chief of Police 3-27-2t

## ALUMINUM COMPANY

When Bob heard about the new production opening, he went right down and signed up. Now he has steady work, regular hours and brings home a paycheck every other Thursday. There are lots of extras—like insurance, paid holidays, vacation time, and a liberal hospitalization policy.

And he says everybody at work is so friendly too. After a few days on the job, I could tell he felt like he had been there for years. Best of all, he didn't need any previous experience. He's being paid regular wages while he's learning. Be sure to tell Jim to go to the Personnel Office as soon as he can. And the sooner—the better.

FOR SALE—I have some high yielding PIONEER SEED corn on hand. If you can use another bushel or more, I will appreciate it

**"How did it go at school today, young lady?"**

This railroader has more than a passing interest in the young lady's welfare because he knows that a good part of the millions of dollars in taxes paid by the North Western every year helps to maintain her school, buy her books and pay her teachers.

Yes, as property owners in your community, we not only contribute substantially to the upkeep of your school system, but, like you, we also pay our proportionate share for municipal improvements—paying of roads and streets, installation of sewers, water mains and the like.

And when you consider that the North Western operates more than 9,500 miles through countless communities in nine midwestern states, that share becomes a large one indeed. For instance, in 1951 our total property tax bill amounted to \$7,440,405. (Of which \$1,941,460 went to the State of Wisconsin alone!)

So you see, widespread though we are, our business is local in terms of your community, whether it's expressed in the tax money we pay, the jobs we provide or the service we render. And that's the way we like it.

## Your Blood Can Give Hope To Polio Victims

"Gamma globulin" is a term we'll probably be hearing a lot about during the next few months. Experiments have proved that this substance which is found in our blood is successful in protecting children against polio on a short term basis.

It takes approximately one pint of blood to make an average dose of gamma globulin as used for polio. One injection protects a child for a period of one to five weeks.

While this is only temporary protection, still it is anticipated that physicians will prescribe its use widely in epidemic areas. Since gamma globulin is already being used for the modification of measles, the demand will far exceed the supply for some time to come.

The Red Cross has volunteered to take on the added responsibility of collecting blood for this purpose. However, the processing facilities are so limited that the laboratories will not be able to produce the quantity of gamma globulin needed for polio in epidemic areas during the summer of 1953. Some practical and fair method of distribution of the available supply must still be worked out.

Of course we are all aware of the continued need for blood by our wounded servicemen in Korea, its requirement for our military and civil defense programs, and its value for research purposes. But now added to all these comes this new and vital use for our blood.

Polio may reach epidemic proportions in some areas of our state next summer. If so, the demand for this type of protection will be tremendous. Gamma globulin prepared from our blood can give new hope to children exposed to this dread disease. The need is great. So the next time the mobile unit comes around let's roll up our sleeves and give.

### WHAT PRICE EDUCATION?

Medicine and Dentistry run neck and neck for the most costly course at the University of Minnesota, including tuition and special fees, necessary books and instruments, board, room, laundry; Veterinary Medicine is indubitably third in the cost column, with Law, Pharmacy, and Technology (General or Medical) crowding for the next four spots. Nursing is the least costly course, with Basic Professional Nursing far at the bottom of the list because of low tuition fee and low board-room-laundry costs. Average non-resident cost of 14 courses analyzed, fall-winter-spring quarters, is \$1,240; resident costs, figuring board-room-laundry on same basis as non-residents, average \$1,053 for three quarters (lower tuition fees).

### A BIG MAN

With the Army in Korea — Wounded by a bullet through the chest, 2nd Lt. Hunt S. Kerrigan became a candidate for his fifth Purple Heart in two wars. But Kerrigan was more than just a wounded man to his patrol—he was a logistical problem—6 feet 4 and weighing 240 pounds. Four to six men carried Kerrigan up an icy hill until exhausted and then another four to six would take over. As they neared the allied lines, stretcher bearers came out to aid—but Kerrigan overlapped the stretcher on all four sides. Finally, he was delivered to an ambulance jeep.

To keep a dark line from forming on the wall under a picture, tack a small cork to the back of the frame.

## Still More Cows Than People In Wisconsin

Wisconsin has more cattle but the number of all other species of livestock is smaller than a year ago, according to the recent livestock inventory made by the Crop Reporting Service of the Wisconsin Department of Agriculture.

At the beginning of the year Wisconsin farmers had 4,152,000 head of cattle of which 2,504,000 head were milk cows two years old or over. The number of all cattle was 5 per cent larger than a year ago and an increase of 3 per cent is shown for milk cows. More young stock than a year ago is also shown among the cattle numbers. The number of heifers one to two years old and over kept for milk cows is 9 per cent

above a year ago. The number of heifer calves saved for milk cows is 7 per cent larger than at the beginning of last year.

The total number of hogs on farms at the beginning of this year was 10 per cent below a year earlier and decreases from Jan. 1952 of 6 per cent for sheep and lambs, 14 per cent for horses, and 3 per cent for chickens. The recent inventory shows that Wisconsin farmers began the year with 1,835,000 hogs, 273,000 sheep and lambs, 148,000 horses, 2,000 mules, and 13,774,000 chickens. This year farmers have fewer hogs over 6 months. The number of stock sheep as well as sheep on feed is smaller this year, and a substantial decrease is shown in the number of pullets on farms. The number of hens is larger than a year ago.

### IT'S IN THE CARDS

From a matriarch of 89 to a young chit of 62, four ladies whose ages average exactly 75 years, have played cards together in Waseca for 37—note well—pleasant and harmonious years. . . . Four bridge bidders went a little overboard at Shakopee and one of them wound up playing a contract for seven, which went down a couple of tricks; none of which is news except that when play was concluded it was discovered that each player had 11 cards of the same suit.

Commercially canned fish is equal in food value to fresh fish and you can use it in salad and sandwiches without cooking. It's also good for chowders, croquettes, loafs and casseroles.

WHERE'S THE BALL?—Looking like people playing a game of blind-man's buff, these three basketball players seek and reach in every direction for the ball which seems to be floating off at far right. At far left is Charles Jarrigan of the University of Iowa; next is University of Illinois' Clive Follmer, and Iowa's Robert Mau. The game, played at Iowa City, Ia., was won by the University of Iowa, 67 to 62.

KID-SIZE CAR—Rolling along in the miniature Lucciola is six-year-old Roy Ratcliffe of Brooklyn, N. Y. He tried out the car at the World Motor Sports Show in New York's Madison Square Garden. Seen in the background is the most expensive auto at the show, a \$30,000 Spanish Pegaso. The Lucciola is powered by a 12-volt battery, costs \$495.

Junior jet maker, 18-year-old Henry Cassidy, Jr., of Painted Post, N. Y., built this unusual turbo-jet engine out of tin cans, stove pipe and other things he "found laying around the house." The engine burns natural gas or propane as fuel. The model has been entered in a contest for Westinghouse scholarships in Washington, D. C.

### THOSE WERE THE DAYS

LOOK HERE, MOTHER! ISN'T THIS CALENDAR BEAUTIFUL?

UNCLE GEORGE SAID YOU LIKED LARGE FIGURES!

### KERRY DRAKE

### MARY WORTH'S FAMILY

### STRICTLY FRESH

STRIKING British civil-service workers dressed in striped pants, derbies, etc., while walking picket lines. Only the English would battle pay cuts in cutaways.

Canadian small-town councilmen were disappointed when only one spectator came to their first meeting after they spent \$500 to rent extra chairs. Probably some taxpayer wanting to complain about the expensive chairs.

Caught by customs men as he smuggled a bottle of brandy into the country, a sailor was told to post \$250 bond for the bottle. Our advice: Just leave that bottle in bond!

Baltimore thieves stole a pre-fabricated building, came back to take the foundation. For not filling in the hole, the owner was fined. Guess he's in the hole pretty deep now!

Oklahoma police sought a gunman described as six feet, two inches tall, and so thin he weighed only 135 pounds. Apparently, for him, crime wasn't paying so much at the time.

## IDEAS ON MODEL TRAIN PLATFORMS

### ELECTRIC TRAIN PLATFORM

Dad is usually a willing victim for building a platform for junior's electric train.

If the platform is built 28 to 30 inches high, the children will have to stand up to operate the train. Our family likes the platform about 10 inches above the floor for several reasons.

• If the train is derailed, or falls to the floor, it will not break into quite as many pieces as it would from a high table.

• By leaving the table low, the children are able to reach farther, and build their own houses out of model bricks, logs, etc. In fact, they actually crawl onto the table to do some of the building. Our boy and his pals get as much fun out of building their own build-

ings, as out of running the train.

• We encourage our boy's pals to leave their snow pants on when they come in to play with the train. Thus, sitting on the cold basement floor does them no harm. We also provide cushions for those not wearing snow pants. The cushions are sometimes used for the purpose intended.

### Formula Given For Machinery Purchases

Keep enough machinery to do your work. But don't have too much, says Agricultural Agent Fred Evert, here in Burnett county.

You don't get a good return for extra money invested in machinery. A good rule is to hold machine investments under 35 dollars per acre. And that investment includes custom service.

Next, keep machinery in good, workable condition, he says. Try to shelter as many implements as possible. Arrange for repair work to be done when you're not working in the fields.

Maybe you wonder what size machinery to get for your farm. A 40 inch combine is large enough for 60 acres. A five foot combine will handle 90 acres, while a six-footer is enough for 110 acres.

A hay baler can handle hay on 120 acres, on both first and second crops.

The field chopper, with at least three wagons and a good blower, will harvest, hay, grass silage, straw, and corn silage from 900 acres during a summer. A one-row corn picker will accommodate 125 acres—a two-row picker will harvest 240 acres.

### HARDWARE MEN SEEM TO WEAR WELL

When William Bofenkamp died in January at Ellsworth, at the age of 87, he had been 52 years in the hardware business. . . . Hunt Brothers Hardware, Red Lake Falls, at 75 years of age, is one of the states oldest business institutions and Sam E. Hunt, President, is a member of Our Own Hardware's Fifty Year Club, along with Al Danek of Silver Lake, Julius Jetka, Little Falls, C. E. Srsen, Owatonna, A. O. Strand, Benson, and Albert N. Thysell, Hawley. . . . Among a growing collection of hardware antiques in the Biederman store, Osseo, is a hoe-like instrument with long square handle and half-round blade 7 inches deep, 14 inches wide.

### Psychiatry Lesson

By Orin R. Yost, M.D.  
Medical Director, Edgewood Sanitarium

(Editor's Note: Dr. Yost is a graduate of the Medical College of Virginia at Richmond, studied psychiatry at St. Elizabeth's Hospital in Washington, D. C., taught psychiatry at Columbia University, New York, was division psychiatrist of the 79th division in World War II, and is presently Medical Director of Edgewood Sanitarium Foundation.)

Many adolescents today are encountering grave difficulties while in the throes of personality development. Misunderstood, misguided, scolded, rejected and punished through no actual fault of their own, millions of these American youths are becoming woefully maladjusted, and not a few are merging into psychoses (laymen's term for "insanity").

Psychiatry staunchly contends that serious emotional disturbances, one of the prime causes of such maladies, could be largely eradicated were the emotional climate of the child's environment more conducive to mental health and happy adjustment to life's realities. Briefly stated, fewer maladjusted individuals would be found if the public realized that noxious factors upsetting the child's emotions prove just as harmful to his mind during the tender, plastic years as do poisons entering his body.

Perhaps no other period of an individual's life proves more trying or is more significant than that difficult transition between childhood and maturity—adolescence. It is during this critical era of metamorphosis that the individuals seem exceedingly unpredictable, as it were.

Were the psychological bases for adolescent behavior more widely known, those concerned with the behavioral reactions would realize that back of every mode of adolescent behavior there lies a just cause. For instance, when the individual enters the stage of adolescence, along with his structural alterations such as change of voice, of body shape, growth of nose, skin blemishes, and so on, there is a very powerful instinctive drive creating within him an extraordinary turmoil.

He who previously has been "one with his parents" now seeks to become independent of them. An intense struggle ensues. He who has hitherto identified himself with respected personalities of his own sex now seeks the acceptance of the gang of his own age level. Rejection of him by the gang would prove a stifling blow, while acceptance of him might require of him conformity to things of which he actually does not approve.

To those over-strict parents who impose apparently meaningless restrictions and prohibitions and who find fault and scold, the adolescent will react either with rebellion, disrespect, resentment and anger or with submission. Confusion regarding religion, his future occupation, the law, and so on, are added to his desire to form of himself an entirely new image in which he is respected, wanted, useful, loved and considered worthwhile. To appear important and to excel in something are also matters of great moment to him. Though teen-agers actually wish to win their parents' approval, often they resist following the guidance.

Because the ego of the individual is still in the process of formation during adolescence, the teen-ager is further at a loss regarding the proper expression of his sexual energies for which no adequate outlet has been provided within the present social order. The intensity of the sexual drives creates untold turmoil which the youth's undeveloped ego is yet incapable of dissolving.

PAPA-TO-BE—Thanks to American Red Cross classes in new mother-and-baby care, this expectant father will know what to do when the baby comes. Seen above, he is learning the rudiments of diaper changing in Dade County, Fla., Red Cross headquarters. The practice-baby is far from the real thing, being a doll donated for use in the class.

# Sarah Anne's COOKING CLASS

## Ground Beef and Green Beans In A Zesty Combination

Ground beef shows up on menus in lots of ways, but none more interesting or appetizing than in a new beef, green bean and rice combination called Beef Pattie Ring Around. Easy-to-use canned foods are the key to this easy and economical dish. Canned evaporated milk helps extend the meat, and tomato soup is used in the sauce which gives the canned green beans that extra zip.

### Beef Pattie Ring Around

- 1 pound ground beef
- 1/2 cup evaporated milk
- 1/2 cup rolled oats
- 1/4 cup finely chopped onion, divided
- 1 1/2 teaspoons salt, divided
- 1/4 teaspoon pepper, divided
- 2 tablespoons shortening
- 1 1-pound can green beans
- 1/4 cup liquid from beans
- 1 can condensed tomato soup
- 2 teaspoons vinegar
- 2 cups hot cooked rice

To ground beef add evaporated milk, rolled oats, half of the onion, 1 teaspoon of the salt and half of the pepper; mix well. With wet hands shape meat mixture into 8 flat patties. Brown patties in hot fat in frying pan. Drain 1/4 cup liquid from beans; add to soup with vinegar, remaining onion, salt and pepper; pour over patties. Cover and cook over very low heat 30 minutes. Remove patties to warm platter. Add green beans to sauce in skillet and heat beans to serving temperature. Arrange rice in a ring around patties. Place green bean mixture around rice ring. YIELD: 4 servings.

### Apricot Pie Pastry Recipe

- 2 cups sifted enriched flour
- 1 teaspoon salt
- 2/3 cup lard
- 4 to 6 tablespoons water

Add salt to flour. Cut in lard until particles are about the size of dried peas. Add cold water, a little at a time, mixing quickly and evenly through flour with a fork until dough just holds in a ball. Use as little water as possible. Chill before rolling. Roll one-half the dough to about one-eighth inch in thickness and line 9-inch pie pan, allowing one-half inch of the pie crust to extend over the edge. Add filling. Roll out remaining pastry and cut in 1-inch strips to make lattice top. Crimp edges. Bake in a hot oven (400° F.) for 20 minutes.

### Apricot Filling

- 1 pound dried apricots (3 cups)
- 3 cups water
- 3/4 cup sugar
- 1/4 teaspoon salt
- 4 tablespoons enriched flour
- 1 tablespoon butter

Cook apricots in water until tender; drain. Combine sugar, salt, flour and one cup liquid from apricots; cook until thick and clear. Fold in apricots and butter. Cool.

### Smoked Shoulder Butt-Lima Beans

- 2 to 3 pound smoked shoulder butt
- 1 pound dried lima beans
- Water

Cover beans with water and soak over night. Add more water to cover beans, cover and simmer for 30 minutes. Add shoulder butt and water just to cover. Cover and simmer 2 hours or until meat is tender and beans are done. 6 to 8 servings.

### Beef-Potato Burgers

- 1 1/2 pounds ground beef
- 2 cups medium grated unpeeled potatoes
- 2 tablespoons grated onion
- 1 1/2 teaspoons salt
- 1/4 teaspoon pepper

Combine all ingredients and mix well. Shape into 6 or 8 patties. Place patties on broiler rack. Set regulator to broil. Insert broiler rack and pan so the top surface of the meat is 2 inches from the heat. When one side is browned (10 to 12 minutes) turn and continue broiling until other side is brown, about 8 minutes. 6 to 8 servings.

### Sausage and Fried Apples

- 2 pounds pork sausage links
- 2 tablespoons water
- 8 tart apples
- 1/3 cup sugar

Place sausages in cold frying-pan. Add water, cover and simmer until water evaporates. Remove cover, increase the heat and cook until sausage is browned. Remove to hot platter and pour off all but 4 tablespoons of the fat. Wash apples, cut in eighths, core, and brown in the sausage fat, turning occasionally. Sprinkle with sugar, cover and cook slowly until tender. Pile apples in center of chop plate and arrange hot sausages around the apples. 6 servings.

- 3/4 cup water
- 3 tablespoons orange juice or lemon juice

Cook dates with water to the consistency of marmalade. Remove from heat and add orange juice.

### Cookie Mixture:

- 1/2 cup butter
- 1 cup brown sugar
- 1 1/2 cups flour
- 1 teaspoon salt
- 1 3/4 cups rolled oats

Place butter and sugar in a bowl. Sift flour with the salt and add to mixture. Work to a crumbly consistency. Add rolled oats and mix thoroughly. Put 1/2 the mixture into a greased shallow baking pan. Spread a thin layer of the date mixture. Sprinkle with the remaining crumbly mixture, patting it in place. Bake in an oven 325 degrees for 25 minutes. While warm, cut into strips and remove from pan. These are rich and flaky.

### Pattern of the Week

### YOUR BLOOD — IF YOU WERE A DONOR

Here's the other end of the story when you contribute blood. Naval Hospital Corpsman Donald J. Capots of West Pittsburgh, Penna., administers whole blood to a U. S. Marine after recent fighting at Bunker Hill. Capots is attached to the First Medical Battalion of the First Marine Division, a long time front line outfit. (Official U. S. Navy Photograph)

NEW FANGLED SUBMARINE? No. It's an Army tank going through routine maneuvers in the briny deep off Point Sal, near Camp Cooke, Calif.

A snowplow battles wind-driven snowdrifts piled high by 40-mile winds on route 61 near Hastings, Minn. Called a Sno-go, the machine is operated 24 hours a day during a storm by relays of crews. It slows up only when meeting marooned vehicles. It once found a stalled highway department truck.

V-2 INVADERS NEW MEXICO ATMOSPHERE as the Army initiates its V-2 firing program with reconstructed German supersonic missiles. Used primarily for upper atmosphere research, a V-2 rises from a launching stand at White Sands, N. M., bound on a scientific journey to gather facts from a relatively unknown world.

### Our Emotional Health

This column is sponsored by a group of Ozaukee and Washington county residents. Informal meetings are held to study emotional health under the direction of A. B. Abramowitz, Wisconsin State Board of Health, Division of Mental Health. The articles and film previews appearing regularly are planned to communicate some of the understandings gained through guided study and to share with you knowledge about emotional health. Your opinions and questions which are sincerely welcome may be mailed to P. O. Box 245, West Bend, Wis.

### DON'T BLAME YOUR PARENTS

We well-meaning parents, who have been trying to do the best for our children and who are now frustrated by so much conflicting material on the raising of them, might at first glance have a sigh of relief at noting an article entitled, "Don't Blame Your Parents," in the October, 1952 Reader's Digest. The

startling statement that "most of us outgrow the shocks of childhood as we do our baby shoes" prompted the Emotional Health Study Group of Ozaukee and Washington counties to critically review and evaluate this article by Dr. Jacob H. Conn of Johns Hopkins University School of Medicine.

This article was apparently not written in defense of the confused parent, as the title might imply; rather, to implore mothers and fathers to mature and grow up emotionally.

Too many adults with short-comings are interested only in asking themselves, "How did it happen?" Too few ask themselves, "Why do I keep it up?" Today it is the fashion to hold one's parents accountable for every flaw: "I can't save money because my parents never

taught me economy." (But we're never too old to learn). "When I was a child Mother always told me I wasn't goodlooking." (But that shouldn't excuse an adult from never making any attempt to improve his personal appearance).

While the author maintains that the statement, "There are no problem children, only problem parents," is extreme and fallacious, he does admit that parents set the stage for the drama of their children's lives by supplying inspiring or uninspiring examples of conduct which

will influence basic mental, physical and spiritual growth.

He remarks that good, old-fashioned character can determine whether we withstand childhood tragedies or whether they down us all our lives. But where can the child acquire this "good, old-fashioned character" if the important people

in his environment are lacking it?

The statements in this condensation are often confused and inconsistent, but by reading between the lines many of his toid remarks are refuted.

He realizes that parental rejection or over-diminution may seriously handicap some individuals and that everyone would be neurotic if it were true that what happens during childhood fixes us once and for all. Only when we have in our adult life found it necessary to make adjustments are we able to acquire this essence of maturity, which implies making the most of ourselves with whatever we may have. Then, must the troubled child await adulthood and influence outside the home before he can face his own feelings and his life problems confidently?

True, a NORMAL individual outgrows the unhappy experience of childhood, and NORMAL, health-minded youngsters manage to cope with their parents' antics, but by labeling the child NORMAL we definitely imply that the parents have exposed the child to the most vital ingredients of growth and happiness—love and understanding.

A solution lies in realizing that the more the parent will understand about his own childhood emotional demands, fears, and hostilities the better equipped he will be to remedy his current difficulties.

Obviously there are many conflicting questions here that we can't attempt to analyze. Regardless—one thing must be clear—that to get lost in the issue of "blaming" is to get focus away from the important issues. When we live with children we are exposed to their confusions, anxieties and fantasies,

and the more we understand about how they function, think and feel, the better job we'll do of raising them.

A MOSQUITO is like a s. l. boy. The minute he stops making noise you know he is getting into something.—Dan Bennett
