

## Spring Election Tuesday, Apr. 7; 8 in Trustee Race

REFERENDUMS TO BE VOTED;  
COURT JUSTICES, SCHOOL  
SUPERINTENDENTS TO BE  
ELECTED

Tuesday, April 7, is spring election day. The polls in Kewaskum will be open from 9 a. m. to 5:30 p. m. in the municipal building.

Main interest in the village will center around the trustee officers to be elected. Three trustees will be named and there are eight candidates for the offices. The candidates are incumbents Joseph Eberle and Edward Schaefer, and K. A. Horbeck, Jr., Erich F. Jeske, Arvin Merwin, Anthony P. Schaeffer, Charles Sparks and John G. Stelling. The three other trustees hold over in office for another year of their two-year term.

Village President Charles Miller will be unopposed for re-election, as will Supervisor Elwyn M. Romaine, Assessor Ed. A. Bartelt, and Justice of the Peace Lyle Bartelt.

In addition to voting for local candidates for office, voters will also be asked to again vote on the controversial state reapportionment issue. If a majority of voters mark their ballots "No" on this referendum, the state will be reapportioned on a population basis, if a majority of voters vote "Yes" the state will be reapportioned on a population and area basis, with one house of the state legislature being chosen on a population basis and the other on an area basis.

A referendum concerning the method of electing supreme and circuit court judges who are appointed to fulfill an unexpired term will also be placed before the voters. Under the present system, such judges must first seek election for the remainder of the unexpired term during which they are appointed and then must run again for a full term. A "Yes" vote on this referendum would make it necessary only for the judges to seek election for a full term and would permit the judges to fulfill the unexpired term before seeking re-election to their respective posts.

In the race for the supreme court office, Justice Timothy Brown is being opposed by Perry J. Stearns. Circuit Court Judge William C. O'Connell is unopposed for re-election. George E. Watson, state superintendent of schools, is also unopposed, and Harry D. Sheski, county superintendent of schools, is unopposed in Washington county.

### TOWN OF KEWASKUM

In the town of Kewaskum there will be contests for two offices. First side supervisor Henry Muckelrheidt will be opposed by William Lettow, and Lloyd Schmidt, treasurer, will be opposed by Mrs. Walter Melahn. Other candidates are Ed. J. Campbell, incumbent, chairman; Arnold Amering, second side supervisor, who is seeking the office now held by William Backhaus, not a candidate for re-election; Alfred H. Seefeldt, incumbent, clerk, and John Etta, incumbent, assessor.

### TOWN OF WAYNE

Town of Wayne candidates are George W. Peter, chairman; Mike Darmody, first side supervisor; John Oehlafen, second side supervisor; Paul C. Moritz, clerk; Oscar P. Boegel, treasurer; Arnold Hawig, Jr. and Fred Pamperin, assessor, and Bernard Strobel, justice of the peace.

### TOWN OF AUBURN

In the town of Auburn William Wunder, chairman, will be opposed by Henry Sauder. Other candidates without opposition are Henry Ketter and Ervin Matthies, supervisors; Reuben Backhaus, clerk; Jos. Schult, treasurer; Elmer Krueger, assessor; Harold Giese, constable, and Stan Porubcan, justice of the peace.

### HOSPITAL NEWS

Howard Justman, 17, Kewaskum, who was critically injured in an auto accident on March 1, returned home from St. Joseph's hospital, West Bend, Sunday afternoon. He is getting along well. Justman was brought home in the Kewaskum firemen's ambulance.

Mrs. Gladys Schoenbeck, Kewaskum, was a patient at St. Joseph's hospital, West Bend, the past week.

## Local Youth's Car Hits, Injures Boy

A ten-year-old West Bend boy, Ronnie Wagner, suffered bruises and was taken to St. Joseph's hospital in that city Saturday afternoon after being struck by a car along the 400 block of Fourth avenue there. The driver of the auto was Charley P. Jones, 18, of Kewaskum.

Ronnie was crossing the street in the middle of the block and was across the center line when he was hit by the Jones vehicle. Jones was on the wrong side of the street when the mishap happened, according to police. Jones claimed he had swung over to the left side of the street because of cars that were double parked ahead of him.

The accident occurred at about 4:30 p. m.

## Eight Teams Will Enter Lakes Northern Division

Eight teams will definitely enter the northern division of the Land o' Lakes baseball league this season with a possibility that a ninth team will be formed at West Bend, according to Ray Pirelli, West Bend, league director.

Germantown and Saukville will rejoin the division, it was learned the past week. Other teams that have already said they would enter include Kewaskum, Mequon, Port Washington, Grafton, Cedarburg and Newburg. All except Port Washington were members of the division last season.

Port would rely on many high school players as would West Bend if it is organized. The West Bend Boosters, members last year, and Slinger have entered the Rock River league.

### LOCAL SCOUT REGISTERED FOR NATIONAL JAMBOREE

Boy Scouts of our Badger Council area are registering for the 3rd National Jamboree.

At least three boys from West Bend have already paid their registration fees for the trip, as well as three from Germantown and one from Kewaskum. The deadline date for registering is April 10. Cost per person for the three weeks trip plus the three day pre-jamboree training at Fond du Lac will be \$217.50. The goal is to send two full buses (74 people) from the council.

### DR. RASCHBACHER TO GIVE LECTURE TO GRAY LADIES

A Gray Lady organization will be established in West Bend. It is a volunteer organization for the purpose of providing a variety of helpful and friendly service to the sick and convalescent at St. Joseph's hospital in that city. A preparatory indoctrination course will be given on April 13, 15 and 17 to train the Gray Ladies. Meetings will be conducted in the recreation room at the hospital. The course will include lectures, one of them by Dr. John Raschbacher of Kewaskum, who will assist in the course. Women are being sought to join the organization.

### ATTEND TWO-DAY FHA MEETING AT MOSINEE

Mrs. Ruth Teclaw, home economics instructor at Kewaskum High school, and Thelma Rosenheimer, a student, who is a state official of the Future Homemakers of America, attended a two-day meeting of the FHA at Mosinee, Wis., on Friday and Saturday.

### SOFTBALL MEETING

A meeting of the Kewaskum softball team of the Cross Country league will be held at Del's Delicatessen Monday evening, April 6, at 8 o'clock. All players interested in joining the team are urged to attend this meeting.

### BANK TEAM BOWLS IN ABC

Members of the Bank of Kewaskum bowling team spent Thursday and Friday at Chicago where they bowled in the American Bowling Congress events.

## VISITORS FROM PORTUGAL TOUR REGAL WARE PLANT

Three distinguished visitors from far off Portugal spent two days during the past week studying methods of deep drawing metals as employed in the steel cartridge case division of Regal Ware, Inc., Kewaskum. Shown signing the guest register in Regal's display room is Captain Augusto Pais Ladeira, artillery captain and engineer. With him, left to right, are Jose Daniel de Santos and Antonio Barros, plant superintendent at the De Prada Fabrica Militar, Lisbon Portugal; R. F. Draper, executive engineer and A. G. Hron, works manager at Regal Ware, Inc. The three men are visiting various plants in the United States to study, as part of the Mutual Security program, the manufacture of artillery ammunition. (Photo Courtesy West Bend Pilot)

## Campbellsport Supplied With Water From Here

A four-day water shortage came to an end in the village of Campbellsport Saturday when repairs to pumping equipment were completed. Since Tuesday of last week residents of that village were without their normal supply of water and when the thousands of gallons in reserve were used up emergency operations were necessary.

From Tuesday night until Friday water was trucked from Kewaskum to Campbellsport by the Bauer Trucking company in milk tankers which held up to 4,000 gallons. Floyd Bauer, owner of the firm, estimated that more than 20 loads were hauled to Campbellsport during the week.

Workmen overhauling the equipment at the pumping station experienced an unprecedented turn of events when it was discovered that the company doing the work did not have the right type of repair parts needed. M. K. Belsiber, village president, and Eldon Spradau, clerk, had to make a special trip to Aurora, Ill. on Wednesday to pick up oil sleeves and drive shafts. It also was necessary for the company doing the pump repair work to make up, cut and thread the casing pipe. The project was completed late Thursday.

During the period Tuesday to Friday village officials conducted an intensive fire prevention campaign. There was no water available to fight a major blaze over the four-day period. Leakage at the pumping station prompted the repair project.

### BIRTHS

GRUBER—A daughter to First Sergeant and Mrs. Ernest H. Gruber of Ft. Campbell, Ky. Thursday, March 26. Sgt. Gruber is a son of the John Grubers, Kewaskum. They have two other daughters and one son.

BUSS—A son to Mr. and Mrs. Arthur Busch, Kewaskum, Sunday, March 29. The Buschs also have a daughter.

SCHNEIDER—A daughter to Mr. and Mrs. Edward Schneider, R. 2, Kewaskum, Friday, March 27.

### BILGOS BUILDING HOME

Excavating has been completed for a new home to be built by Mr. and Mrs. August Bilgos, Sr. on Bilgo lane. The home's will be located between the August Bartelt and Marvin Schaefer homes, directly east of the high school athletic field.

### MISS LOOMIS ENGAGED

Mr. and Mrs. Stan Porubcan of New Prospect on Palm Sunday announced the engagement of their daughter, Joanne Loomis, to Richard Baker, son of Mr. and Mrs. John Baker of Waukesha.

## Mrs. Weninger, Mother of St. Kilian People, Dies

Funeral services for Elizabeth Weninger, 3513 W. Lloyd street, Milwaukee, were conducted at St. Anne's church, Milwaukee, at 9:30 Friday morning, March 27. Burial was in St. Mary's cemetery, Lomira. Mrs. Weninger, who passed away March 24, was the mother of Mrs. Mary Bartzler, Frances Weninger and Mrs. Margaret Straub of St. Kilian, Mrs. Magdalena Roethle of Hartford, Jacob and John Weninger of Lomira and Mrs. Minerva Geiger. She also leaves four sons-in-law, two daughters-in-law, and grandchildren and great-grandchildren.

### GUSTAVE A. MATTES

Word has been received here of the death of Gustave A. Mattes, 6922 S. Parnell ave., Chicago, who formerly resided just north of Kewaskum. He died on March 19. Surviving are his widow Lena, two daughters, Estelle Bonkowski and Fern Frost; three sons, Harold, William and Norman; 10 grandchildren and 11 great-grandchildren. Services were held Monday, March 23, in Chicago.

### VORPAHL FAMILY MOVES; HOUSE TO BE REMOVED

Mr. and Mrs. John Vorpahl and family last week end moved from the Schaefer Bros. home on Fond du Lac avenue into the K. A. Honbeck, Sr. farm home just south of the village park. The home formerly occupied by the Vorpahls is the former L. Rosenheimer homestead which was purchased by Schaefer Bros. last year. The dwelling will be removed by Schaefer Bros. to make room for a used car lot.

## Vote "YES"

On the Reapportionment Referendum April 7 if you believe that control of the State Legislature should be in the hands of ALL the citizens of Wisconsin, and not surrendered to Milwaukee and a few other large population centers. By voting "Yes" on the Reapportionment question you will be voting for reapportionment on the basis of an Assembly determined by population alone and a Senate determined on both a population and area basis. This is the same method our Nation's Founding Fathers selected for the Congress of the United States, and 24 of the 48 States of the Union select their legislative bodies in this manner. If you fail to vote "Yes" on this question you will be surrendering the Wisconsin Legislature to the metropolitan (Milwaukee) areas and the rest of the State of Wisconsin will become "poor country cousins" in legislative matters in future years.

(Sample)  
**Referendum Ballot**  
"Shall Sections 3, 4 and 5 of Article IV of the Constitution be amended so that the legislature shall apportion, along town, village or ward lines, the senate districts on the basis of area and population and the assembly districts according to population?"  
Yes  No

## Bill Introduced By Assemblyman Haebig

A detailed, biennial review by the state legislature of the use being made of the millions being appropriated for buildings at the University of Wisconsin, state welfare and other institutions is provided in an important budget control bill which has been introduced by Assemblyman K. William Haebig, Kewaskum. "Since the 1947 adjourned legislative session \$70,000,000 has been made available for construction by the legislature in state funds and federal aid, yet no session of the legislature has asked for or received a full report on the disposal of these funds," the Washington county assemblyman said as he explained he felt the elected representatives of the voters should get a picture of every session of how building funds are being used.

In addition to the \$70,000,000 already appropriated, another \$16,800,000 is in the budget recommended by Gov. Kohler and the joint finance committee to go into building funds for the 1953-55 biennium, Haebig pointed out. About \$23,000,000 of the total appropriated since 1943 remains unallocated, he explained.

Haebig's bill, 371-A, makes it a duty of the state building commission to report to each legislature the progress being made in the construction program, listing the disposal of all building money made available since the adjourned 1943 session. The report would include by project, final costs compared with estimates upon which original appropriations were based and expected costs of buildings contemplated from money available but not spent.

The measure also provides that "it is the intent of the legislature that it be given a complete picture of the results of its past decisions regarding the state's building program which will serve as background for making further decisions."

Haebig said data concerning the state building fund was contained in a recent study made by the Public Expenditure Survey of Wisconsin, an organization which services local taxpayer associations throughout the state. He declared some of the provisions of his bill were recommended in the survey study.

### SPRING LUNCHEON TO BE HELD BY WOMAN'S CLUB

The annual spring luncheon of the Kewaskum Woman's club will be held Saturday, April 11, at one o'clock in the afternoon. Mrs. Maurice Rosenheimer, chairman for the afternoon, has stated that cards will be played, and also that no one has to notify the committee if they plan on attending. Hostesses for the afternoon will be Mrs. Kenneth Koepke, Mrs. Ernie Mitchell, Mrs. L. P. Rosenheimer, Miss Louise Martin, Mrs. Allen Tessor, Mrs. Casey Heberer, and Mrs. G. Walz.

### SCHOOLS HERE CLOSED FOR EASTER VACATION

The Kewaskum Public schools closed on Wednesday for the Easter vacation. Classes will be resumed on Tuesday, April 7. The local high school was also closed late Friday to allow teachers to attend a convention in Sheboygan.

Holy Trinity school closed Tuesday for the Easter recess and the vacation for the pupils will extend to Wednesday, April 8.

### SKAT TOURNAY AT LOUIS HEISLER TAVERN MONDAY

A skat tournament will be held at Heisler's tavern, Kewaskum, on Monday evening, April 6, starting at 8:15 p. m. Entry fee \$2.15. Prize winners at the last tournament were: 1. Fred Siegel, 25-6-19 games; 2. Lee Rose, 42 points; 3. Wilmer Prost, spade solo vs. 4-55; 4. Wm. Rauch, 16-1-15 games.

### ROOF FIRE SUNDAY AT BACKHAUS FARM HOME

A roof fire at the George Backhaus farm home at St. Michaels on Sunday afternoon resulted in a call for the Kewaskum fire department. Only a small hole was burned in the roof before firemen extinguished the blaze. Cause of the fire was not determined. The Fillmore firemen were also summoned but their services were not needed.

## Worker Escapes Electrocution at Regal Ware Plant

Gilbert Albert, 45, of 732 S. 93rd street, West Allis, suffered the shock of 26,100 volts of electricity passing through his body Thursday morning at Regal Ware, Inc. in Kewaskum and lived, because a fellow worker knew a rope trick.

Albert is employed by the John Hennes Trucking Co. of Milwaukee, which is installing new machinery in the shell plant at Regal Ware, Inc., an aluminum ware factory. He suffered third degree burns to his heels, hands and back, and a cut on the head, when a boom mounted on a truck, which was hoisting a large box, touched a high tension wire. Albert had grasped a steel band around the boom, connected by a cable from the boom. The electricity passed from the wire through the boom and cable holding the box to Albert.

Quick thinking and fast work by a fellow employe saved Albert from death. Chief of Police Edmund Haack said. The man threw a rope around Albert and thus insulated himself while he yanked the victim loose. The cut on the head was suffered when Albert struck the ground after being freed.

It is reported that the worker operating the boom could also have been electrocuted but he jumped clear without coming in contact with the metal of the machine.

Dr. R. G. Edwards, who attended Albert, said the man was "just lucky to have been loosed in time." Albert was knocked unconscious and fell to the ground. Kewaskum firemen applied artificial respiration on the seven-mile ride to St. Joseph's hospital, West Bend, in the ambulance. Albert's condition was reported good at the hospital late Thursday.

The accident occurred shortly after 10 a. m. and shut off power and lights for about 20 minutes in Kewaskum and the surrounding area, it occurred outside of the Regal Ware plant where a large press was being unloaded.

## Local Artists Enter Displays in Art Show

Over 200 amateur artists entered their work in the Eighth Eastern Regional Rural Art show held at the West Bend public library last week. Close to 400 pictures hung on display in the library.

Several persons entered in the art show from Kewaskum. They were Chester Dombrowski, L. M. Rosenheimer, Donald Haebek, K. M. Link and Bernice Trapp.

Hundreds of persons viewed the art exhibit. On the final day, Saturday, March 8, Dean J. Meeker, instructor in art education, University of Wisconsin, was present to judge the exhibition. He was accompanied by two advanced art students of the university. Twelve outstanding entries in the show were selected as the ones to be exhibited in the annual State Rural Art show to be held at the Memorial Union at the University of Wisconsin later this spring.

### INDIANS TO OPEN BASEBALL SEASON AGAINST WEST BEND

The Kewaskum High school baseball squad will open its 1953 season next Friday afternoon, April 10, against West Bend, on the Barton village diamond.

The Indians have been holding practice sessions and are rounding into condition. A return game will be played with West Bend at Kewaskum on April 17.

## In Our Mailbag . . .

Kewaskum Statesman  
Kewaskum, Wisconsin  
Gentlemen:

Much of the success of the 1953 Red Cross Drive was due to the splendid support given us by your newspaper. On behalf of the American Red Cross I would like to express sincere appreciation for your cooperation and contribution.

Sincerely yours,  
The American Red Cross  
H. D. Ziegler  
1953 Fund Chairman

## YOUR HIGHWAYS

by JAY SCOTT

(No. 4 of a series)

Roads Are Primarily for the conduct of business and commerce — they are not monuments!

One Reason for our high standard of living is our motor transport. Over our highways comes 85% of the milk received daily by city populations. About 85% of the country's livestock moves to market by truck and trailer.

Factories bring their raw materials in and send finished products out largely by motor transport. More than half a million commercial salesmen cover their territories by car.

Yes, this is an age of highway transportation—and our present and planned roads are the answer to a public demand for a faster, more flexible means of furnishing goods and services.

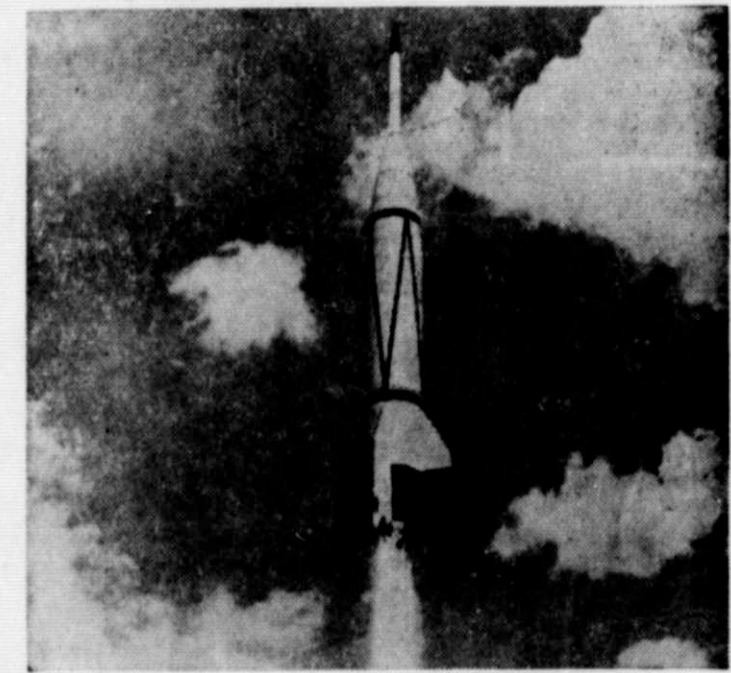

People Who Say "They ought to keep trucks off the roads" are sadly misinformed. Public needs have brought motor transport into being. Business requirements are the most important reason for roads and road improvement.

A Magnificently Constructed road between communities that do not—and will not—need it is not a modern road. Such a highway is only a horizontal monument to poor planning.

We Cannot Afford Such Monuments. On the other hand, when there is an obvious need for new roads and expansion of existing roads, we cannot afford delay. Modern roads are a must.

A Modern super-highway, if it helps to expedite traffic around large cities, is monumental in size only. When it doesn't perform that function, it becomes a useless monument.

WAC CORPORAL ROCKET, shown riding atop the nose of the German V-2, took off on its own when the V-2 neared its maximum height and soared to a record altitude—250 miles above the earth.

MADAM PRESIDENT — Mrs. Dwight Eisenhower is honorary president of the Girl Scouts of America and is seen above receiving her Girl Scout pin from Cynthia Beth Curtis, 12, of West Hyattsville, Md. Smiling girl in center is Virginia Ann Gray, 15, a Washington Scout.

WORKING UP A GOOD SWEAT—Working in an outdoor lab making honest sweat for experimental purposes is this Minneapolis chemist. The artificial perspiration is made of acid and salt. It is used to test its effects on many kinds of finished surfaces.

### WRONG—NUMBER, BOTTLE, TOWN!

Cokato phone conversation: "I've got some trouble. Can you help me?" "Don't know. Is it starter, dead battery, tire, or what?" "Nope, sick cow." "Sorry, you have a wrong number." . . . Early morning, unruly hair, sleepy dresser, wrong bottle, plenty action: A Park Rapids public official poured on disinfectant thinking it was hair dressing. Only lasting damage was a ruddy complexion for a few days . . . Two Minneapolis ladies bound for Appleton, Wis., wound up rather surprised in Appleton, Minn., adding considerably to the time and mileage involved.

### CONSERVATION IS EVERYBODY'S BUSINESS

During the past biennium 123,000 acres have been added to Minnesota's game refuge and public hunting grounds. Eleven new fish rearing ponds covering 272 acres add nearly four million to the state's fingerling fish capacity—about 10 million—with ultimate goal of double that figure. Nearly half a million added brought game food-and-cover plantings to 2,685,100. Fourteen million game and fur-bearing animals taken during the biennium were valued at \$65,000,000; ninety million pounds of fish at \$70,000,000. To bag all of which hunters and fishermen are estimated to have laid out \$250,000,000.

### FRESH FROM THE BARBER CHAIR

On the 40th anniversary of his professional debut with comb and scissors in a Springfield barber shop, his two partners Earl Johnston and Jack Heitzman gave Ike Black a really de luxe going over . . . Marty Pecek was not as scared as some youngsters on the occasion of the first haircut. Marty had full confidence in the barber, his great-grandfather Jalmor Pearson, who has wielded scissors and razor in a Tower shop since 1897—56 years.

Once used to designate dissenters, the word "Tory" later became the name of England's most respected political party, is now a term of reproach.

### 35 PLUS 37 PLUS 106 YEARS

On his 106th birthday Albert Woolson shoveled a lot of snow from the sidewalk in front of his Duluth home, and then shoveled his way through more than 3,000 congratulatory letters and messages. Mr. Woolson is one of two survivors of the Northern Army of 1860 . . . After 35 years Miss Anna Heise loves her Lake City Sunday School teaching opportunity more than ever . . . In 37 years of constant use Edwin Fidal, Linotype operator on the Grant County Herald at Elbow Lake, wore 7 inches off the legs of his comfortable old chair, which he recently reluctantly consented to have replaced with a modern version.

### THOSE WERE THE DAYS

### KERRY DRAKE

### MARY WORTH'S FAMILY

TRAVELING TALKIES First short-wave motor vehicle telephones were installed in the Minneapolis area in 1946, when 25 cars were equipped and one radio channel was dedicated to their itinerant messages. Today three channels handle an average of 336 calls a day and from 274 motor vehicles in Duluth, Fergus Falls, the Twin Cities, and their connecting highways. Several private planes also have air-ground shortwave telephones.

### STRICTLY FRESH

A NEW ENGLAND lawmaker wants to make baby-sitting illegal for kids under 14. Guess he's afraid they will be prejudiced in favor of the youngsters they sit with.

House of Representatives members voted themselves new, high-backed swivel chairs. You must admit, they do need backing for a lot of the stuff they vote on.

A Detroit bus driver, fed up with antics of high school students, took a load of them on a wild ride.

Looks like the kids drove their driver too far.

The new administration in Washington is campaigning against afternoon coffee breaks. Calling for a coffee curfew, eh!

Moscow's newspaper, Pravda, reports that thieves stole two fire engines and sold them. Bet there were some Red faces at that fire sale.

### HAIR BREADTH HARRY

Food Sense—Not Nonsense

NOT SO FAST—Take Time To Breakfast

No pilot would think of taking a plane off the ground without a motor warm-up and a fuel check, yet many folks take off for the day from a cold start, and, no food to fuel their operations.

That mid-morning slump which comes to those who hurry through a meager meal or skip it entirely is very real. School children are less alert. Workers react more slowly. Starting the day without a good breakfast isn't being fair to yourself.

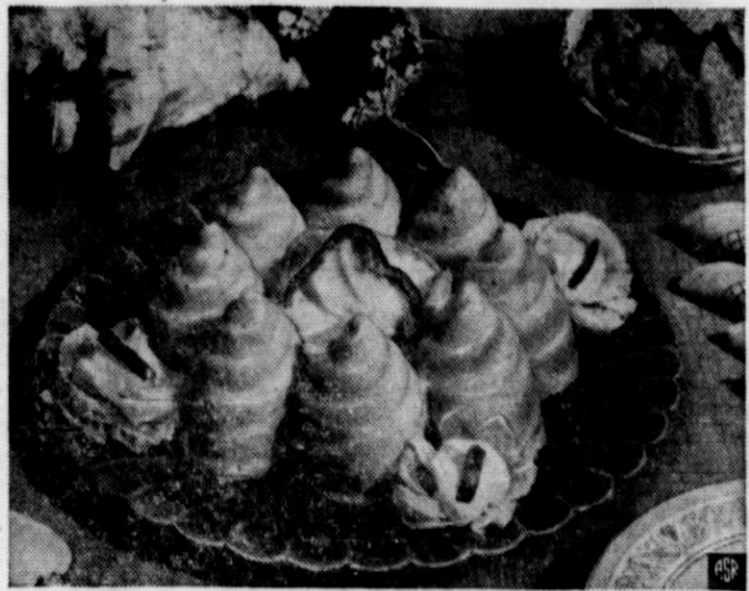

Why not get into the breakfast habit when it is easiest to do. Cold, blustery days are with us and you and your children need more food to help keep you warm and comfortable. Being out-of-doors in cold weather for any length of time demands extra energy. Medical authorities advise that for each 10 degree drop in temperature, persons who will be out in the cold should step up their calories by about three per cent or a total of about 10 per cent when freezing weather arrives.

Instead of doing things by halves nutritionally, get one-third of your food needs when you need them most—at breakfast. The idea of eating one large meal in the evening won't do for the life most of us live. We are not lions who can gorge, then sleep away the day to wear off the effects. All of us need a steady flow of energy, eight hours a day. Only three well-balanced meals eaten regularly will give us this energy flow.

Here is a breakfast menu for a good warm-up on a wind-whistling day . . . fruit, cereal and milk, egg and a breakfast meat, and several slices of piping-hot buttered toast.

Sarah Anne's COOKING CLASS

New Salad Success

Make a Soufflé Salad, the new Fast-Frost way, and you will have prepared a molded salad quicker than ever before possible. The technique calls for putting a basic mixture of real mayonnaise, lemon or lime-flavored gelatin, vinegar, salt and pepper into the freezing compartment of the refrigerator for 15 to 20 minutes, which speeds up the setting time.

Then to this basic mixture, meat, fish, hard-cooked eggs, cheese, vegetables or fruit can be added making the Soufflé Salad an all-purpose salad: appetizer, side dish, entree or dessert. Here for a luncheon entree to be served with soup and hot muffins, or as an accompanying salad with dinner, is a delicious Tomato Soufflé Salad.

Tomato Soufflé Salad

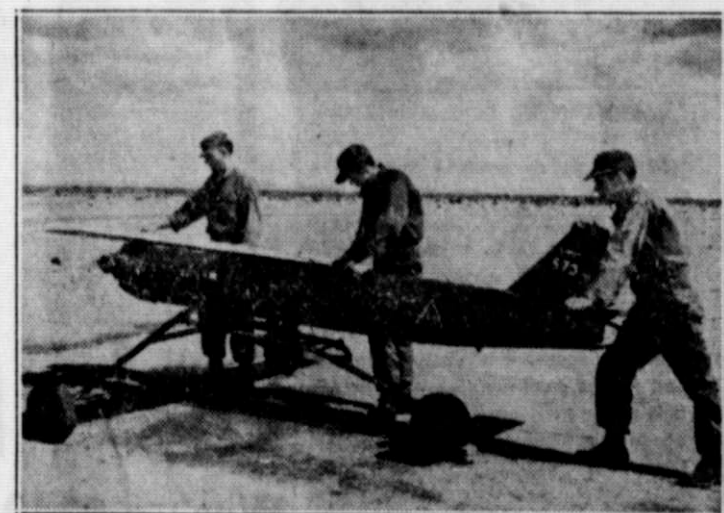

1 package lemon-flavored gelatin  
1 cup hot water  
1 can condensed tomato soup  
2 tablespoons vinegar  
1/2 cup real mayonnaise  
1/2 teaspoon salt

1/2 teaspoon Worcestershire sauce  
Dash of pepper  
2 packages (8 ounces each) cream cheese  
1 cup diced celery  
1/2 cup chopped green pepper

Dissolve gelatin in hot water. Add soup, vinegar, mayonnaise, salt, Worcestershire sauce, pepper, and cream cheese. Blend well with rotary beater. Pour into refrigerator freezing tray.

Quick-chill in freezing unit (without changing control) 15 to 20 minutes, or until firm about 1 inch from center. Turn mixture into bowl and whip with rotary beater until fluffy.

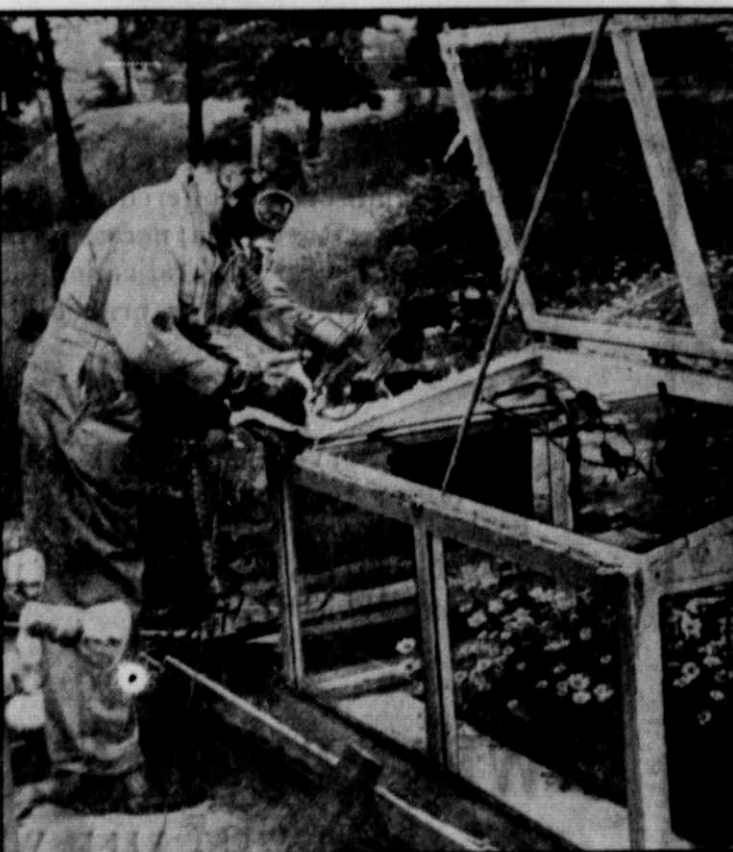

Fold in celery and green pepper. Pour into 1-quart mold or individual molds. Chill until firm in refrigerator (not freezing unit) 30 to 60 minutes. Unmold. Garnish with lettuce cups filled with mayonnaise and topped with strips of green pepper. Makes 8 servings.

RADIO "ACTIVE" target planes like this tiny drone—controlled from the ground by radio—are used by the Army to tow anti-aircraft target flags past alert gunners practicing their sharp-shooting at Fort Bliss, Texas. The sound-guided target plane simulates enemy hedge-hopping aerial maneuvers.

HOT UNDER THEIR COLLARS—Heat stays in and cold is kept out by the American Army's new "cold-bar" suits worn by Pfc. Henry Kelly, of Watson, Ala., at right, and an unidentified G. I. center. The outfits are being examined by a curious Korean at a frontline bunker.

HOT HOUSE—Raised in a deadly atmosphere of radio-active gases, these flowers are tended by a well-protected gardener, entomologist A. C. Miller, who is clad in gas mask, gloves and protective clothing. Located in Pittsburgh, Pa., the "hot" house is used by the Gulf Oil Corp. to raise pyrethrum flowers from which insecticides are made. Miller will use radio-detection equipment and the plants to trace processes by which the drug kills insects.

Psychiatry Lesson

By Orin R. Yost, M.D.  
Medical Director, Edgewood Sanitarium

(Editor's Note: Dr. Yost is a graduate of the Medical College of Virginia at Richmond, studied psychiatry at St. Elizabeth's Hospital in Washington, D. C., taught psychiatry at Columbia University, New York, was division psychiatrist of the 79th division in World War II, and is presently Medical Director of Edgewood Sanitarium Foundation.)

During the past quarter of a century the Mental Hygiene movement in America has concentrated its efforts upon prevention of mental disorders of adults through a program of prophylaxis with children. No other phase of its work has been more important than that carried out through numerous child clinics to which parents are also urged to come for instruction necessary to the proper up-bringing of children and youth.

Parents are brought to realize that their children are pliant, flexible, malleable human beings, easily open to suggestions and very susceptible to the environment in which they are reared. They are led to see how an environment of affection, security, religion and proper regard for work, study and recreation is conducive to good emotional development. They are shown how, on the other hand, over-long subjection to stress, hostility, tension, lack of affection, fear, and rejection can prove as harmful to children's emotions as poisonous chemicals can prove to their vital organs.

Parents are likewise taught the value of firm, yet affectionate discipline, as opposed to indulgence for the young child. They are enjoined to teach the child independence rather than trying to dominate him. Thus, by precept and example, parents can pave the way for their offspring. Through wise guidance children can be shown the right solutions for the numerous perplexities to which youth had formerly known no answer. Parents are warned against setting their goals too high for the child and are reminded that a child is truly as much a product of his parents' emotional behavior as he is of their bodies.

Dr. Franklin DuBose of Silver Hill Foundation, New Canaan, Connecticut says: "The wise parent chooses improvement for his child . . . He is content with his child's accomplishment but consistently helps the child to do better. Accordingly the child feels adequate, competent and secure." On the other hand, Dr. DuBose believes that, if the child is only average, and tries to achieve his parents' perfectionistic ambitions for him, he is likely to develop a feeling of inadequacy or even failure. Strong feelings of inferiority are likely to arise in him and he later seeks escape through neurotic forms of behavior.

Parents are warned against the fallacy that sex knowledge must be withheld from their children. They are instead shown the necessity of answering frankly, briefly and understandably the child's numerous questions about his body and about sexual matters.

Parents are enjoined not to be over-strict or too severe and not to govern their offspring through fear but through love and a sympathetic understanding. Parents must respect the rights of children as individual personalities. They must allow them a seat in the "family council" where family problems, plans and even the budget are "aired." Parents must not condescend to fight their children's battles for them but encourage them rather to stand on their own.

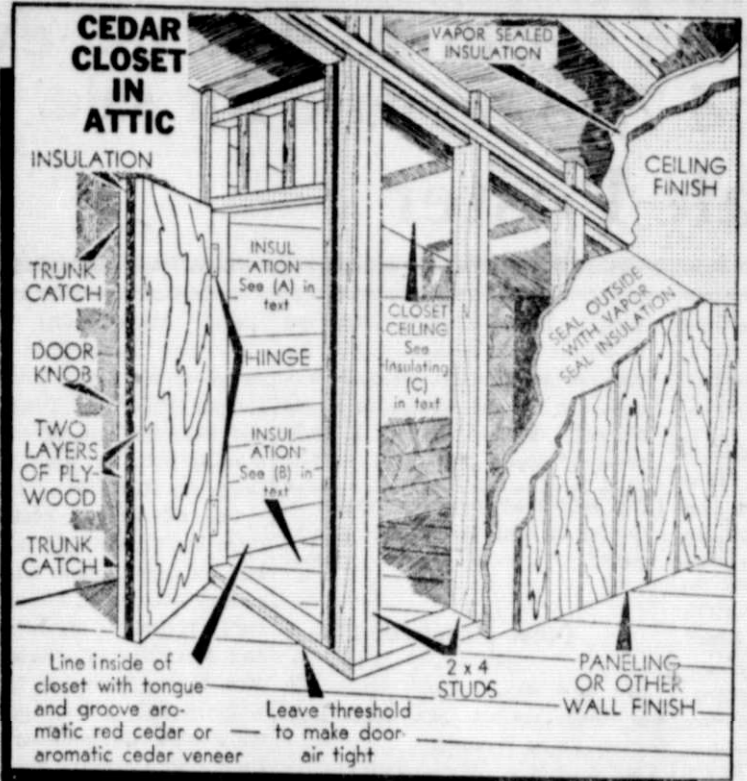

Much other valuable advice is secured from psychiatrists, psychologists and psychiatric social workers found today within America's child guidance clinics.

At one time money made of small sea shells was used in America, Australia, Africa and Asia.

Mrs. Helen McColgan, Holbrook, Mass., housewife, is helped to shore after rescue of Raoul Houle, 13 (hatless), who fell through thin ice.

"Mister Fixum's Handy Hints"

CEDAR CLOSET IN AN ATTIC

The above design will make the closet as nearly moth proof as cedar can make it. Moth larvae which are on clothing when put into the closet will hatch and do their usual damage. But they will not enter the closet unless carried in on clothing.

Build an ordinary closet, as you would for regular storage, except that the ceiling should be open all the way to the roof. It is a good idea to leave the portion of the roof over the closet uninsulated. Without insulation, the air in the closet will become very hot during the summer months. A temperature of 125 degrees will kill moth and larvae if exposed for periods of five or six hours.

Insulate the sidewalls of the closet, also the floor. If one or more walls are to be the outside wall of the house, use vapor sealed insulation, with the vapor seal toward the inside of the closet. On the floor, the vapor seal should be down.

Line the inside walls, floor, and door with aromatic red cedar. This is sold in regular tongue and grooved form, or in the form of plywood faced with cedar.

Close all cracks where dirt or air might enter, or where lint may accumulate. Never paint, shellac or varnish cedar. To do so would seal in the aroma which moths do not like. Be sure the door closes tightly.

ORDER TODAY

"MR. FIXUM'S HANDY HINTS" is a collection of 31 selected jobs from this column, printed in attractive form, for 35c.

Send coins, not stamps, to Ernie Gardner, 14189 Faust Avenue, Detroit 23, Michigan.

MONEY ALWAYS MAKES NEWS

A \$5 gold piece dated 1852 and a silver dollar dated 1878 are among the coin and antique collection of Mrs. Joseph Rosenstengel, near Sleepy Eye . . . She turned a New Ulm corner, the car door flew open, she heard a bump, but closed the door and drove on. But when Mrs. Pearl Benda of Madison Lake reached for her purse a little later, no purse. A quick check with the police, and there it was, with \$427.85 intact, picked up by Elfred Flitter of Madelia and turned in without a glance at the contents . . . When one of Leo Juetten's cows was operated on at Maple Lake, not only nails but one nickel and one quarter were extracted and bossy went right on with her milk making . . . No one at International Falls Daily Journal can account for the dollar bill a distant subscriber recently found wrapped with her copy of the newspaper.

"Monthly Pains" stopped or amazingly relieved

In 3 out of 4 cases in doctors' tests!

• Chances are you're putting up — unnecessarily — with the functional pains caused by cramps and weak, "no good" feelings of menstruation!

For, in actual tests by doctors, Lydia Pinkham's Compound brought complete or striking relief from such distress in 3 out of 4 of the cases!

Lydia Pinkham's is modern in its action!

So get Lydia E. Pinkham's Vegetable Compound—or new, improved Tablets with added iron. See if—taken through the month—it doesn't give relief from those backaches, jitters—help you feel better before and during your period!

Or—if you suffer from functional "hot flashes" or "change of life," find out how wonderful Pinkham's is for that, too!

It has a quieting effect on uterine contractions that often cause "period" pain!

## NOTICE OF VILLAGE ELECTION

NOTICE IS HEREBY GIVEN that the Annual Charter election for the Village of Kewaskum, Washington County, Wisconsin, at which are to be elected the following officers, to-wit:

A President, three Trustees for two years, a Supervisor, an Assessor, one Justice of the Peace, will be held at the Municipal Building in said Village on Tuesday, the 7th day of April, 1953, and that the polls of said election will be open at 9:00 o'clock a. m., and close at 6:30 o'clock p. m. on that day.

Dated March 23, 1953.

WILLIAM S. MARTIN,  
Village Commissioner

3-27-24

## WARNING TO DOG OWNERS

Numerous complaints have been coming in that dog owners of the village are getting careless again and allowing their animals to run loose. These dogs are destroying property and causing other damage, and are a general nuisance. Dogs running loose are violating the law and in the future unless they are tied up or kept on a leash, they will be done away with as the law permits.

Ed. Haack, Chief of Police

# Teacup Topics

By Betty Ann

EDITOR  
THE MILWAUKEE JOURNAL  
WOMAN'S PAGES

The suit, as always, is the leading spring fashion, and the pump is, of course, the perfect shoe, says Betty Ann. This doesn't mean that this year's spring parade will look like last year's. Because there's lots that's new and different in both suits and shoes.

The new pumps pick up to perfection the slimmer, softer, finer feeling in spring costumes. They are lighter in weight, softer in construction, slimmer in line, higher as to heel. There is infinite variety in pumps. The sling is a big favorite, but the closed pump runs it a close second for early wear.

A tremendous hit fashion is the pointed toe patent leather pump, with low square cut vamp and very high curved heel. It's the most feminine and flattering of shoe fashions, wide open with a single curved strap, or closed front and back with open sides. So take your pick in the patent pump. It's the top of the news for spring.

Also new looking, very smart and sophisticated is the tailored pump, and again with very high curved heel, in one of the beautiful soft shades of aniline calf, light wood tones and warm beiges.

Women in the know are choosing these rather than the classic spectator to wear with their new more feminine tweeds and flannels.

Suede has its place, with the honors going to black and rich navy in more open types of pumps to wear with silk town suits and ensembles. In some instances suede is combined with faille in these dress pumps for more formal costumes.

Gleaming black patent is the fashion spotlight this spring, complementing smooth textured fabrics, smartly pointing up the black and white trend. A good stocking color to wear with patent leather shoes is a misty grayish beige with mauve undertones.

Hosiery with contrasting heels flatters a slender leg. The ruby outline heel is a fine companion for the red shoe, worn as the one flash of color with a beige or navy costume.

The graceful elegance of late day and evening apparel calls for shoes with tapering toes and slim stiletto heels, and for stockings with ultraslender and very dark seams.

Keying stocking style and color to your shoes and costume helps achieve the well coordinated look that makes for good grooming.

Panels of scenic wallpaper, placed in simple frames, are being used by many smart home-makers these days as inexpensive and attractive substitutes for conventional wall pictures. Wallpaper for this purpose might be available at small cost from dealers' leftovers.

**Fruit Salad Dressing**  
If you're planning a women's luncheon soon most of your guests will heartily approve of a fruit salad. It's easy to serve if you arrange the fruits on a large platter and let the guests help themselves. Most of them will enjoy the salad plain but just in case someone wants a dressing here is one especially good with fruits.

Combine one-fourth cup orange juice, two tablespoons lime juice, one-fourth cup sugar, two eggs, separated; one-eighth teaspoon salt and one-fourth cup heavy cream, whipped. Heat fruit juices with two tablespoons of the sugar in top of double boiler. Beat egg yolks slightly; add salt. Stir in hot juices slowly; return to double boiler and cook, stirring constantly until mixture coats spoon, about one minute. Beat egg whites until stiff; add remaining two tablespoons sugar gradually and beat until very stiff. Fold cooked mixture into beaten egg whites and chill. Just before serving, fold in whipped cream. Yield: One and three-fourths cups.

A good, quickly made snack can be prepared from English muffins. Toast the muffin halves, spread them lightly with butter, add a layer of tomato and one of cheese and put them under the broiler for a few minutes until the cheese bubbles.

**Brainy Gal**  
"Is my girl friend clever? She's got brains enough for two."  
"Then she's just the girl you ought to marry."

## Fluoridation Aid In Reducing Tooth Decay

Wisconsin has taken a big step towards improving the dental health of future generations. With 83 cities adding fluorides to their drinking water, the state now leads the nation in the number of communities using this method to prevent tooth decay. Thirty-eight other Wisconsin communities have approved similar projects and are installing fluoridation equipment.

Science has proved that fluorides added to the drinking water harden the enamel of teeth and makes it more resistant to acid, so that decay is reduced up to 65 per cent. Constant use of fluoridated water by children will build an armor that will keep the decay rate low throughout life.

In Sheboygan, the first Wisconsin city to adopt the plan, a recent survey shows that after seven years of adding fluorides to the drinking water, more than half the kindergarten children examined have no decayed teeth compared with only one out of five without dental caries before fluoridation. Studies in other areas of the country where fluoridation has been in progress over a period of years have shown similar startling reductions in dental decay.

A survey of the teeth of older children has produced evidence of the job fluorides are doing in fortifying the permanent teeth from decay. The number of older children without any cavities has increased 66 per cent since fluorides have been added to Sheboygan's drinking water.

Many studies have been conducted in areas where the drinking water contains high amounts of fluorides to determine the effect of this element on the human body. All such studies prove conclusively that such water has no injurious effect and is perfectly safe to drink.

Fluoridation of drinking water is not an expensive project. The

# Knitted Look Is a Must for Spring Finery

BY EDNA MILES

ONE fashion idea that's taking an important hold for spring is the knitted look. This means that dresses, basic suits, even cravats, are knitted, crocheted, or hand-woven.

Designer Ann Fleischer has done a whole group of these fashions on a knitted theme, even combining them with classic cashmeres in some instances. She has used monotone or multicolored tweed-ribbon collars, cuffs and belts on cashmere sweaters and matched this trim to woven-ribbon skirts and jackets.

A skirt of hand-woven ribbon in a red, white, and blue check was shown with three versions of the navy cashmere top. One black cashmere with three-quarter-length sleeves and scoop neckline kept company with a black, hand-knitted silk skirt dotted with large, hand-knitted poppies.

For the first time linen yarn is crocheted in an Irish lace pattern and cut into a dress-top worn with a matching hand-loomed linen skirt. For a hand-knitted sweater-dress, the designer uses dusty pink, flame, and wine for a triangular top and pairs it with a skirt in solid wine.

The hand-woven ribbon material has been adapted to men's cravats. Women like to buy ties that match their own dresses and give them to their husbands. These have banded details or solid stripes.

Ann Fleischer designs an elegant hand-woven ribbon-tie, in white, with a contrasting band worked on a slant. This is one of the cravats she shows with her tailored knits for husband and wife style harmony. The dress combines a cashmere pullover and hand-woven black and white ribbon-skirt, collar and cuffs.

## 1 Word Can Change Your Life—STRENGTH

What you find in your conscience many other people find in theirs. Pinpoint that fact. It can be a real source of strength.

You say: "I'm convinced man doesn't live by bread alone, but by God." That's true and it's good to remember a lot of other people go along with you. Such conviction lines the foundation of the corporate personality of mankind. From this common feeling rise strength and courage.

You say: "I'm trying hard to do good." Fine, and it helps to remember you're not alone in this. You've never gone solo fighting the fight for the good. Others are signed up for action. God's in the ranks, too. The battle, no matter where or when it is fought, is made up of the skirmishes of thousands of people who, like yourself, are struggling to win.

Win you will! Good finally succeeds. God won't have it any other way. So tap this source of strength, the word that can change your life.

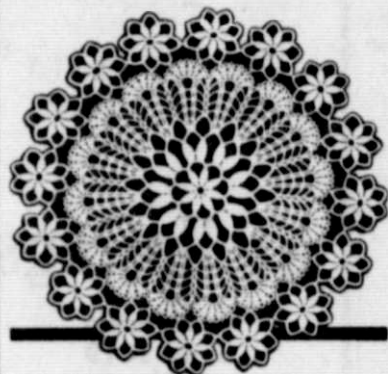

**NEW NIPPON LOOK**—Japanese fashions have changed since V-J day. At left is a modern adaptation of the traditional costume. Both are made of the same pattern-cloth. Note the bare shoulder and short skirt on the new-style dress. The fabric is Parisian. The place is Tokyo.

### Good If He Can Do It

A tough drill sergeant ordered every man in the squad to hold his leg straight out in front of him. By mistake, one rookie held up his right leg, which brought it out to his neighbor's left leg. "Okay," shouted the hard-boiled sergeant, "who's the wise guy holding up both legs?"

estimated cost is less than ten cents a person per year. Any community that has a public water supply can receive the benefits of such a program.

### CIRCLE OF FLOWERS

Exquisite as a flower, haunting as a melody best describes this beautiful doily. Made with two colors of thread, or just one color if you prefer, it will accent your room and highlight each season. Complete easy instructions, yardage requirements and color suggestions are given. Order your pattern now and make several. C3259, 20c.

Send orders to: Homecraft Service, Journal Pub. Co., Inc., 2500 Buchanan, Kansas City 16, Mo.

### Taking Advice

Hoping to inspire his workers with promptness and energy, a Canadian business man hung a number of signs reading "DO IT NOW" around his factory and office.

When he was asked some weeks later how his staff had reacted, he shook his head sadly.

"I don't even like to talk about it," he said. "The head book-keeper eloped with the best secretary I ever had; three typists asked for an increase; the factory hands decided to go on strike and the office boy joined the navy."

### Bible Comment:

## Jesus Inspired His Followers to Do Great Things

IF we were to disregard the things about Jesus which make Him the unusual figure that He is, we would still find that He stood as a remarkable figure in the pageant of history.

Other men have become famous for the books they have written, power they have won, organizations they have founded, or codes and laws which they have created. But Jesus wrote nothing, organized only teachers and evangelists, and established no codes. He did not even organize His teachings in codified form.

There was something casual about His life, yet this apparent casualness seems to have been part of God's purpose. The Christian religion, like the Master Himself, was not to become a circumscribed thing, but was to take a free course.

Perhaps it was essential to the future well-being of Christianity that such an attitude as this remained with the early church. The problems to come were many. If there had been no room to adjust to changing conditions, the church would have lacked much of its early vitality.

In this way we see the general pattern of His effective influence. The Master, who did not write a book, inspired what was to become the greatest book of our time. Though He had no formal organization of His own, He so inspired the disciples that they carried on after Him and became Christian leaders.

His church became so well organized it spread out across the world, finding bases for operation in many countries. Later it went still further to reach every part of the globe.

These things are being done today. With the strength and inspiration found in the New Testament, Jesus' twentieth century disciples are still working and building the structure based on His teachings.

It is our privilege, as friends of Jesus, to carry on.

## Change Your Looks With Basic Hair-dos

Are you a little tired of the way you look? You can create an entirely different appearance very simply, says Beauty Editor Peggy Bell—by changing your hairdo. Writing in McCall's for March, she describes and gives setting hints for six becoming hairdos worked out by hair stylist Victor Vito. They were tried for effect on models Pati Curran and Alice Wallace.

"Pati Curran looks like an impertinent elf when she brushes her red hair back and up and wears a little French fringe of bang over her forehead. This hairdo is charming with any sort of fashion—soft or tailored. For this gamin cap coiffure, the hair on sides and back may be from quite short to medium long. The bang should be about two inches long.

"Pati changes to the ingenious, wide-eyed type when she wears her hair in a smooth pageboy. This simple cut is easy to keep in place, needs almost no setting—very convenient for busy girls. To set the smooth cap: Part hair on the side or in the center. Dampen hair slightly and shape over a roll of cotton or mesh. Cover with a net until thoroughly dry.

"Alice Wallace looks very gentle and feminine when her hair is parted in the middle and curled forward all around her head. This is a good hairdo for hats, as all the detail is around the edges and there are no top curls to crush. For this beau-catcher hairdo: Part hair in middle and set short ends at forehead in forward-turned pin curls. Set sides and back in rows, alternating direction of curls.

"Alice appears more worldly when her hair is fluffed back at the sides and up on the nape of her neck. The width at temples makes her face seem small and delicate, her beautiful eyes even larger. For this flirtatious fluff: Set short or medium-length hair in rows, alternating direction of curl. When dry, brush front hair into a wave, sides and back up and out in a soft, curly fluff behind ears.

"Alice becomes the perfect sweater-and-skirt girl when her hair is parted on the side, with the ends curled forward. The top is slick as a whistle. It's an easy-to-set hairdo, wonderful for hard-to-handle hair. For this outdoor hairdo: Part hair low on the side, comb it smoothly over the crown, set ends in forward-turned pin-curls all around hairline. For variation, add wispy side bang.

"Hairdo Hints: To minimize a prominent nose, avoid straight lines, add a side or forehead bang for balance. To add height, build hair up over forehead with pompadour wave or reverse bang. To soften a prominent jaw, bring soft curls toward cheeks with width behind your ears.

"To balance a receding chin, keep hair off forehead, long enough for fullness at nape of neck. To round out a thin face, wear a hairdo that follows a circular line from chin to crown. To thin down a round face, add height above temples with hair close to head below them."

The famous Bayeux Tapestry, now in Bayeux, France, was made by the wife of William the Conqueror in 1088.

## Thousands Of Dollars Are Lost

Thousands of dollars in social security benefits are being lost each year. The exact number of people who are losing monthly old-age or survivors insurance benefits due to incorrect reporting of wages or self-employment income or the failure to file an application for benefits is not known. Experience has shown that each month there are some.

In many cases this loss of social security payments could well mean the difference between want and an adequate standard of living. In the event of death of a working member of your family or upon your attaining the age of sixty-five, contact your local Social Security Office.

### Here's the Answer

# Sports Afield

By Ted Kesting

A woodsman is known by the time it takes him to light his fire with materials on hand in the woods. Here are some fire-building hints from Col. Townsend Whelen, one of our top authorities on camping and woodcraft.

If birch grows in your locality the very best kindling is birch bark. Next in order are shavings from any dry sticks you find on old stumps, sticking up off the ground or the lower dead branches of standing trees. Long chips can also be split from any standing dead tree and reduced to shavings.

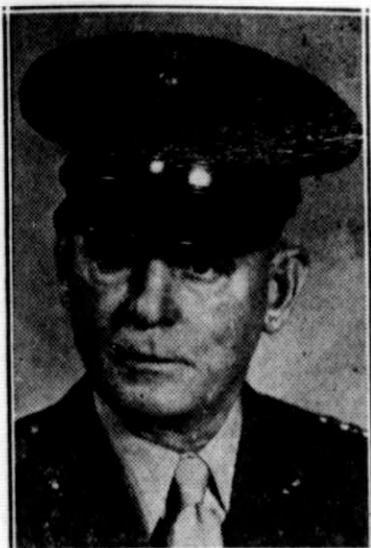

First lay a piece of bark about 8 x 10 inches, or a pile of shavings the size of a football; on top of that a pile of dry sticks, possibly half an inch in diameter, preferably split. Then light from the bottom and, when it is going well

but not before, add heavier sticks, then heavier dry wood or logs. You cannot start a fire with anything green. In the pelting rain or heavy snow you may have to shelter the whole operation under your coat, a poncho, or a dry place under a big spruce.

Of course, there are a multitude of ways to start a fire, as anyone who visits picnic or public camp grounds can see for himself. In the realm of camping there is probably no one thing that is so often mismanaged as the campfire. A poor fire causes all kinds of troubles.

I can't close without a word about safety. Never start a fire where it will spread dangerously. Wind can carry a spark an unbelievable distance. Once in a high wind a mere spark ignited dry grass a 100 yards from my own fire, although I had thoroughly cleared the ground for 25 yards windward. If we had not extinguished that fire promptly, 20,000 acres of virgin timber would have gone up.

A spark so small you would never notice it, settling in a pine-needle covered forest floor, can start a smoldering fire that could go unnoticed for many hours and might cause a full-fledged forest fire. Before you leave that fire-place put the fire dead out—dead as a doornail.

GEN. LEMUEL C. SHEPHERD.

Commandant of the Marine Corps, according to a recent Act of Congress will sit with the Joint Chiefs of Staff for the consideration of matters relating to the Marine Corps.

Gen. Shepherd is a native of Norfolk, Va., and following his graduation from Virginia Military Institute reported for active duty with the Marine Corps May 19, 1917. He sailed for France in June, and as a member of the Fifth Marine Regiment, participated in the Aisne-Marne defensive where he was twice wounded in action in Belleau Wood. Returning to the front in August he participated in the St. Mihiel and Meuse-Argonne offensives where he was again wounded. Following service in occupied Germany he returned to the United States and was on duty as aide to the Commandant and aide at the White House. In the interim until World War II he was on duty at home and overseas. In March, 1942, he commanded the Ninth Marine Regiment and took the organization overseas with the Third Marine Division. Appointed Brigadier General in July, 1943, he was assigned to the First Marine Division and participated in the operations in New Britain. In 1944 he was at the recapture of Guam, and for his leadership was awarded the Distinguished Service Medal. He organized the Sixth Marine Division and led it at Okinawa. He received the surrender of Japanese forces at Tsingtao, China, October 25, 1945. Among his decorations are the Navy Cross, Distinguished Service Cross, Distinguished Service Medal with one Gold Star and the Legion of Merit.

## Handy Place for Sacks

SINCE they are so useful for a variety of purposes, paper sacks should be kept in a handy place. A simple "sack trap" which can be made at home will hold a dozen or more folded sacks.

Using a one-inch thick piece of lumber a foot long and four inches wide, cut parallel grooves the length

of the board to receive panels of quarter-inch Tempered Presdwood. To provide easy access into the "sack trap," remove a circular piece from each panel with a coping, scroll or jig saw. Bevel all exposed edges of the Presdwood slightly with a sandblock or file.

Waterproof glue will keep the side panels securely in place.

The sack holder may be finished with paint or enamel to harmonize with its surroundings. Use a good quality primer and one or two finish coats of the same manufacturer.

## JUNIOR SKATERS, SKILLED AND UNSKILLED

Twelve-year-old titleholder Carol Heiss of Ozone, L. I., displays her skill on skates. She is junior women's figure champion.

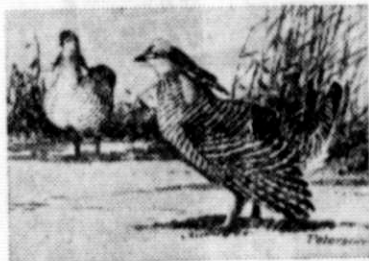

First try on ice was a little bumpy for 12-year-olds "Chip" Davidson, at left, and Lincoln Fritsch, of Darlington, S. C. "Chip" was helped to his feet by pretty Alice Foster, 18. His friend was steadied by Patricia Foster, 13, at New York's Rockefeller Center.

One of the most popular winter sports is ice skating. New recruits are enlisted every year. Several seasons' experience on the ice gives our figure-skating champion, seen at left, the ease and grace of an adult professional. But equally enthusiastic are the two 12-year-olds from South Carolina at right. "Falls" and "drops" are taken good naturedly while being taught by two pretty northern girls.

M-46 PATTON TANKS of the U.S. Army's 73rd Tank Battalion cross a stream somewhere in Korea on their way to attack Chinese Communist bunker positions.

## THE PRAIRIE CHICKEN

©1953 National Wildlife Federation Lesser Prairie Chicken

Many well meaning conservationists spend much useless energy bemoaning the extinction of the Passenger Pigeon, the Heath Hen and the Dodo. They cannot possibly bring back these extinct birds. How much more sensible is the effort now being spent by the National Wildlife Federation to prevent the disappearance of the Prairie Chicken. To call public attention to the plight of this bird, the Federation has selected the Prairie Chicken as the symbol for National Wildlife Week, March 15-21.

The Prairie Chicken is the king of native birds of the grassy and shrubby interior of America just as the Turkey was the king of the wooded East and South's game birds. The Turkey is gradually increasing in numbers. Possibly a similar trend may be started for the open country bird. The difficulty here lies in the fact that the Prairie Chicken cannot survive unless a quarter or more of the range for a stable population is left free from cultivation, over-grazing, burning, or too-close mowing.

Unless proper habitat is maintained the birds die out no matter what the hunting pressure may be. Unless grassy cover at least 6 inches deep is available for nesting and for winter protection, the birds are probably doomed. While pheasants have a future in prosperous farm lands, the Prairie Chicken's hope lies in an increase and stabilization of grasslands before its fate is sealed.

The Prairie Chicken is related to the Grouse and Ptarmigan. Wild Turkeys belong in another family and the Pheasants, Quail, and Hungarian Partridges to still another. The Greater Prairie Chicken, to be found from Indiana to Oklahoma on the south and from Michigan to North Dakota, weighs about 2 pounds, has a length of over 17 inches and a wingspread of 28 inches. It is slightly shorter than the Sharp-tailed Grouse, has a blunter tail that lacks the white of the Sharp-tailed Grouse. It is also more heavily barred particularly beneath than this close relative.

The Lesser Prairie Chicken, pictured here, is a somewhat smaller bird. Its range is in the short-grass country of Western Kansas, Oklahoma, Texas and New Mexico.

An elaborate spring courtship and a less enthusiastic fall session brings from 30 to 40 males to a courtship ground at sunrise or dusk. To a few of the assembled swain go all of the rewards of the season.

The female lays about a dozen

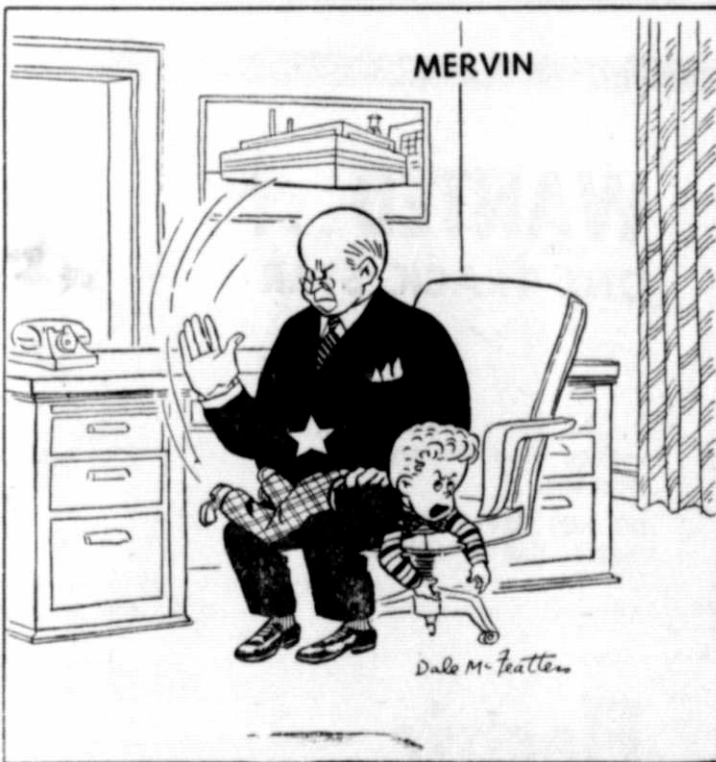

eggs in a nest on the ground and rears the family of the year. When the young become grown they separate and flocks of hens or cocks take up a relatively independent existence. There may be a slight southward migration in the fall but this is usually limited to the females.

The summer food is largely insects such as grasshoppers and tender plants are also eaten in abundance. Waste grain is the major autumn food and the fruits of shrubs or the buds of some trees help the birds survive the winter.

The Federation's campaign to help these birds should be supported by all interested in wildlife conservation. *Nature Magazine* will run a feature article on the subject in its May issue. Your support of the Federation by purchasing your wildlife stamps does much to help the Prairie Chicken in 1953, just as a similar campaign in 1952 helped the Key Deer of Florida.—E. Laurence Palmer.

## Australia Working Rich Uranium Mines

Washington—Australia is fast becoming a rival of Canada, South Africa and the Belgian Congo in uranium production, as new discoveries of radioactive ores bid fair to build a modern state out of the "down under" continent's sparsely settled Northern Territory.

Uranium deposits have been known in Australia since 1910, says the National Geographic Society. Until 1934, they were mined intermittently for radium. Local hawkers sold bottled mine water as a specific for rheumatism.

Profits dwindled, and the mines lay dormant until 1944. In that year, Allied technicians rushed back to the pits, and in a frenzied, top-secret effort, produced many tons of raw material for the atom bombs which ended World War II. Roads and railways could not be built in time, so the ore was ferried from the "outback" districts on camels.

### Scene Is The Rum Jungle

Prospector Jack White in 1949 made a strike 1,000 miles north of previously known deposits to touch off the sub-continent's current uranium rush. The scene was the Rum Jungle, a tangle of bamboo, palm and mango trees south of the little tropical port of Darwin.

Samples White took out of an abandoned copper mine brought prospectors swarming into the region. Cattlemen, sheepherders—even buffalo hunters and pearl divers—dropped everything to share in what turned out to be one of the richest uranium booms in the Western world.

As radioactive treasure turned up in dozens of places under the stimulus of cash rewards for new finds, Australia's government declared all uranium locations to be security areas. There are harsh penalties for unauthorized photography, sketching and taking of notes. Treaties with the United States and Great Britain envisage tri-national exploitation, with the United States to furnish an entire refining plant.

Until the great strikes, less than 30,000 people, half of them semi-civilized aborigines, lived in the Northern Territory. Cattle and sheep were the wealth of a largely desert area bigger than France and Spain combined. When artesian wells in the wide and arid rangeland failed, stock died by the thousands.

New roads, railways, towns and cities are planned to service the uranium fields. Many will come not to dig uranium ore, but to tap deposits of gold, wolfram, mica and rare minerals also awaiting exploitation in the area.

## Behind The Scenes In American Business

By Reynolds Knight

NEW YORK—February was the seventh month in a row to show an increase in industrial output to a new postwar high. The familiar "FRB"—short for "the Federal Reserve Board Index of Production in Manufacturing and Mining"—rose to 239 per cent of its 1935-39 average, from 237 per cent in January.

Still, there were some observers and some business men who were not entirely happy with the situation. The increase in production was attained largely by the consumer durables, notably automobiles and television sets. Release from controls of materials for these, say the worriers, may have led producers to step up their output beyond what will eventually be bought at retail.

How about the economists, the prophets of our modern industrial civilization? Well, the long-range forecasters talk of an economy in 1960 that will be 20 per cent bigger than the one we live in. The short-range seers say there are "no clouds in the sky," at least until June. What happens after mid-year and on into 1954 is sort of skipped over.

Perhaps the best thing to do is keep one's inventory moving and hope for the best.

SADDLING A MOUNTAIN—On the outskirts of the Kansas City business district there's a small mountain whose seven-and-a-half acres have long defied business or industrial development. Now it's to be utilized by the Hallmark Greeting Card company, world's largest in its field, for a new \$6,000,000 ultra-modern home.

The vast expense of leveling the mass of earth and rock deterring former prospective users, but that will be avoided by draping the seven-story building over the mountain like a saddle on a horse. Thus the top floor will overlay the whole mountain, and have a floor area of 188,950 square feet. The ground floor will have an area of only 17,750 square feet.

Street-level docks on each floor will allow raw materials to enter and finished goods to be shipped with the least possible intra-floor handling. Two of the streets framing the building plot have steep grades which provide ready-made ramps, explained Joyce C. Hall, Hallmark's founder and president, "so we'll have direct-from-street access to any floor—even the roof, on which 500 cars can be parked."

THINGS TO COME—A new insect-killing bulb, to be screwed into a electric light socket, vaporizes a compound claimed to be four times as deadly to insects as DDT. . . . Summer's on its way. A new fly-swatter for autoists is designed to smack down wasps or bees in the close quarters of a front seat or truck cab. . . . Rubber floor mats 2½ inches thick are offered for plants where heavy workpieces must be lifted from metal-working tools. A slip will not damage the article, and the mat bounces back. . . . Inflated rubber cushions, to replace conventional steel springs, will make it possible to weigh a truck's load by measuring air pressure, without use of scales.

SWITCH—One of the big tasks of the last 11 years for U. S. industrial management has been the switch from peace production to war output and back to the gadgets of peace.

It's easy for food and clothing processors, not so easy for makers of durable goods, machinery or instruments. However, one firm in the mechanical line has found that its broad development work for the military can be peculiarly useful in the creation of new civilian markets.

As authorities on temperature control, the Minneapolis-Honeywell Regulator people were called in by the Air Force to conceive a regulating system that would keep the occupants of a plane equally comfortable whether sitting on the ground or soaring through the thin upper air.

Through this engineering effort the firm evolved an entirely new concept for heating and controlling heat in homes. It's called electronic modflow and involves a team of thermostats, one inside and one outside the house. The outer control "senses" weather change and alerts the heating unit to compensate for this change, with no interval of discomfort for the homeowner. This new system obsoletes the old-fashioned, one thermostat-type of control for homes, which is particularly inadequate in today's sprawling, picture-windowed homes.

BITS O' BUSINESS—New York port watchmen have gained a special clause in their contract granting them protection against reprisals if they do apprehend dock thieves. . . . All future trading in coffee contracts is at ceiling prices, and Brazilian sellers demand even more. . . . Great Lakes shipping began to move March 1, the earliest date in history.

## Ten Word INTELLIGRAM

Do you know the missing words?

1. Kangaroos are native to \_\_\_\_\_.
2. Egypt's ex-king \_\_\_\_\_ is now in exile.
3. French Guiana is in South \_\_\_\_\_.
4. Abner Doubleday invented \_\_\_\_\_.
5. The \_\_\_\_\_ is 93,000,000 miles from Earth.
6. \_\_\_\_\_ wrote "A Tale of Two Cities."
7. Washington was inaugurated in \_\_\_\_\_.
8. The Territory of Louisiana was purchased from \_\_\_\_\_.
9. A teen-ager is also called an \_\_\_\_\_.
10. The abbreviation "Etc." stands for \_\_\_\_\_.

Now from the words below, insert the proper one in each of the 10 blanks in the Intelligram.

- (1) Arabia, Australia. (2) Farouk, Cheops. (3) America, Africa. (4) Basketball, Baseball. (5) Sun, Moon. (6) Dickens, Balzac. (7) Washington, New York. (8) Spain, France. (9) Adolescent, Infant. (10) Et cetera, Everything.

Total your points, scoring yourself 10 points for each correct choice. A score of 0-20 is poor; 30-60, average; 70-80, superior; 90-100, very superior.

## Time Out for Intermission

**Dundee**

Mr. and Mrs. Herbert Heider spent Saturday in Oshkosh.

Born, a son to Mr. and Mrs. Rol. and Dins Sunday, March 29, at the Memorial hospital, Sheboygan.

Mrs. George Letzier spent Friday with relatives in Milwaukee. She was accompanied home by her husband.

Mr. and Mrs. Burno Fellenz of Random Lake visited Saturday with the latter's parents, Mr. and Mrs. John Waranus.

Charles Roethke and friends spent the week end at Lake de Flambeau and other places of interest in the northern part of the state.

Paul Helmer of Cascade and John Krueger of Campbellsport visited Sunday with Mr. and Mrs. C. W. Baetz and Charles Roethke.

Mr. and Mrs. William Wotho returned home Sunday evening after a two weeks' trip through Texas and other places of interest.

Bethel Kahrs of Ft. Atkinson and Anna Kahrs of New Ulm, Minnesota, are spending their Easter vacation with their parents, Rev. and Mrs. Harvey Kahrs and family.

Mr. and Mrs. Edwin Lepp entertained Sunday at their home Mrs. Herman Lepp, Sr., Mr. and Mrs. Herman Lepp, Jr. and children and Mr. and Mrs. Al Radomski and family, all of Milwaukee.

Mr. and Mrs. Chas. Meinecke of Kewaskum, Mr. and Mrs. Chas. Pangel of Round Lake and C. W. Baetz spent a pleasant Saturday evening

with Mr. and Mrs. Louie Ramthun for the pleasure of the former's birthday. The evening was spent in playing cards. Later Mrs. Ramthun served a luncheon.

Mr. and Mrs. Vilas Roehl entertained Sunday at their home Mr. and Mrs. Edwin Kempf and children Karon and Carmen of West Bend, Mr. and Mrs. Herbert Roehl and son Stephan of Mitchell, Mr. and Mrs. Otto Roehl, Mr. and Mrs. Frank Backhaus and children, Janice, Robert and Eugene from here.

Mr. and Mrs. Louis Ramthun entertained Sunday at their home in honor of the former's birthday anniversary. Guests were Mr. and Mrs. Norman Kutz and Mr. and Mrs. Alvin Brandenburg and daughter Madeline of West Bend, Mrs. Kate Ramthun and Mr. and Mrs. Melvin Ramthun and children Mark and Lois of Round Lake, Mr. and Mrs. Clarence Bohn and son Ralph and daughter Marilyn of Armstrong.

**HOMEMAKERS OF K-M CLUB DISCUSS TOWN GOVERNMENT**

The Kettle Moraine Homemakers held their March meeting at the home of Mrs. Lorina Petermann. Many recipes were collected to be used in a cook book which is being published by the Fond du Lac county homemakers.

Suggestions were also made for projects to be studied during the

**coming year.**

Town government was the main topic of discussion. Reuben Backhaus, clerk of the town of Auburn, spoke about the government in his town. He discussed election of officers, duties of the officers, and the finances of the town. Many questions were asked of him. This discussion left the members with a much greater knowledge of the town and how it operates.

Hostess for the meeting was Mrs. Oliver Petermann.

**GIRLS INVITED TO SCHOOL OF NURSING MONDAY, APR. 6**

An invitation to visit Saint Mary's School of Nursing, 2388 North Lake drive, Milwaukee, Monday afternoon, April 6, from 1:00 to 3:00 p. m. is extended to young ladies who are interested in the field of nursing. Parents and teachers are also invited.

The guests will be taken on an excursion through the hospital and school buildings and will be given an explanation of the program of theory and clinical practice offered at Saint Mary's.

Refreshments will be served.

**PETERSON SELECTED AS SCOUT REPRESENTATIVE**

At the request of the National Boy Scout council, Badger Council scout officials have submitted the names of Wm. Seefeldt, Beaver Dam, and Ben Sadoff, Fond du Lac, as national council representatives at large. The three men who will serve as regular representatives are L. N. Peterson, Kewaskum; Stanley Hetland, West Bend, and Henry Bodden, Horicon.

**T/SGT. KOERBLE PROMOTED**

T/Sgt. Betty Koerble, Kewaskum, has been promoted to the rank of master sergeant by the West Bend Civil Air Patrol. She is in charge of personnel. Sgt. Koerble and Cadet 2nd Lt. Gerald Backus, Kewaskum, were among members who worked in the CAP booth at the Sentinel Sports show, Milwaukee, Saturday.
