

Mothers' March on Polio Climax of Dimes Drive

The climax to the month-long March of Dimes came Wednesday night when approximately 100 volunteer women in Kewaskum and other sections of the county held their annual Mothers' March on Polio.

Not a "porch-light" drive in the true sense of the word, nevertheless it was suggested that a porch light turned on during 7 and 8 p. m. here was a splendid way to light the volunteer workers way to the door. Every home was to be visited, whether a light was burning or not.

In correcting a misunderstanding which apparently exists, the fact was stressed that no salary deductions whatsoever are being made on any payroll checks anywhere in the county to cover a contribution to the March of Dimes. Every donation is entirely voluntary and the Mothers' March was made to contact persons who wished to contribute directly to the drive without sending a contribution through the mails. The Mothers' March on Polio does not take the place of other ways of giving to the fight against polio. Contributions can be made through coin collectors distributed throughout the county, special events, March of Dimes cards, distributed through local and county schools, parking meters, and direct mail, for those who desire to use such means. The Mothers' March was the finale of a full month of giving. It is one way to insure that everyone has had a chance to deliver a personal blow against polio.

Private citizens, civic groups, and all other organizations who wish to make a direct contribution to the drive by mail may do so by sending their checks, money orders, or cash donations to: Chairman, March of Dimes, West Bend, Wis. General chairmen of the drive in this part of the county are Alan Pick and Michael J. Goring, Jr., while Ray Jeffords of Hartford directs the drive in that area.

Other communities in the county, as well as Kewaskum reportedly planned Mothers' Marches in their own respective areas. Included in these is the city of West Bend. In the village of Kewaskum the March was organized by Mrs. Ralph Marx, president of the Robert G. Romaine American Legion post auxiliary. Members of the auxiliary unit visited every home in the community to accept donations on Wednesday night.

On the eve of what may prove to be the most important polio fund appeal in history, was issued this final plea:

"Your contribution to the Mothers' March on Polio will serve as ammunition in this crucial battle affecting us all. Victory against polio cannot be won unless everyone digs deep into his or her pocket-book.

"Give, give generously. It takes a lot of dimes and dollars to make up the millions needed to support such a cause, but over 8,000,000 men, women, and children contributed to the last March of Dimes. Even more is needed in the current drive. There is no greater satisfaction than that derived from extending the "helping hand" and supporting this worthy cause."

In Our Mailbox

Kewaskum, Wisconsin
January 29, 1954
Kewaskum Statesman
Kewaskum, Wisconsin
Dear Bill:

Would you please print this article in the paper in the hopes that it will help the cause of good sportsmanship in this village?

"This is a note to the parents of children of the age of thirteen and under. If you want your children to come home healthy and all in one piece, don't let them go skating at the river skating rink.

It seems as if there are quite a few so-called bullies, (really sissies, who are trying to act big) who do not let the younger children skate in peace.

As an example: My child came home from skating looking like this:

Dr. Edwards Chairman of Heart Fund Drive

Dr. R. G. Edwards has been named chairman of the February, 1954 Heart Fund Drive in Kewaskum.

Dr. Edwards will work with state campaign chairman Wilbur Renk, Sun Prairie, in the drive for funds to support the work of the Wisconsin Heart Association.

The campaign in Kewaskum will be conducted by mail. In larger cities throughout the state direct solicitation campaigns are used.

"Heart disease caused half of all deaths in every county in the state this year," Dr. Edwards pointed out. "It even effects children in the form of rheumatic fever. About one half a million children in the country have heart disease."

"The money that we in Kewaskum give to the Heart Association will be used for research, education of physicians and the public and for the improvement of services in the state for heart patients. Many of us will someday benefit, and I know that we will all be generous."

Anyone wishing to contribute to the Heart Fund Drive can send their donation to Dr. R. G. Edwards.

Erdmann Rural Home is Destroyed by Fire

The Ed. Erdmann residence on R. 1, Theresa, located on Highway 28, northeast of that village, was destroyed by fire last Thursday morning. Mr. and Mrs. Erdmann are the parents of Ralph Erdmann of Kewaskum.

The eight-room residence was occupied by Mr. and Mrs. Erdmann, their son and daughter-in-law, Mr. and Mrs. Raymond Erdmann and their three children, Gary, Lois and Rodney.

Only a few items of furniture were saved in the blaze, loss from which was estimated at \$20,000 or more. The loss was partially covered by insurance. The exact source of the fire was unknown but the blaze started in the basement.

Fire departments from Theresa, Mayville and Lomira vainly fought the flames which were fanned by a high wind. Firemen were hindered by the extreme cold and a shortage of water until trucks arrived to replenish the supply.

REV. R. GADOW ACCEPTS LOUISVILLE PASTORATE

Friends of the family here will be interested to know that the Rev. Richard M. A. Gadow and family of Wauwatosa have moved to Louisville, Ky., where the Reverend has accepted a pastorate. Rev. Gadow formerly was pastor of the Peace Evangelical and Reformed church in Kewaskum. He still visited in the village frequently.

Face all muddy and sooty. Coat and hat and pants all wet, muddy and sooty. Shoes and ice skates soaked with water and dirty.

These big overgrown oafs make snowballs, store them for a day or two until they become ice balls, then when the younger children are skating they knock the children down and throw these ice balls at them. One youngster was thrown down hard, twelve times.

When the little ones look for their shoes, they find that they are hidden and full of snow and water and the ice skates are thrown into the fire as they are removed from the feet.

This rink was to be used for young and old alike—why can't the minority of the children keep it nice so that the majority can have fun and enjoy themselves?

This sort of thing will go on just so long and then the children will find that the village will not bother to take the time to make a place for the boys and girls to ice skate—and I'm sure that those that will really miss it are these big overgrown oafs who make it miserable for so few.

Must this ice be patrolled day and night? Isn't there such a thing in this village anymore as nice, clean fun?

Just a word to the bullies, your names are known and you are being watched so watch your step!!!
Anonymous.

Regal Ware Local Elects Officers

Local 819 of Regal Ware, Inc., Kewaskum, held an election of officers on Saturday afternoon at 1:30 p. m. in the Kewaskum Opera House. Named as officers were the following:

President—Giles Wierman.
Vice-president—Walter Gatzke.
Financial Secretary and Treasurer—Francis Gilroy.

Recording Secretary—Lucille Nischke.
Three-year Trustees—Harold Krueger.

Sergeant-at-arms—Lloyd Teese.
Link.

Guide—Harold Manthel.
Chief Steward Aluminum Division Days—Frank Buchta.

Chief Steward Case Division—Frank Huber.
Chief Steward Aluminum Division Nights—Hans Prause.

Female Bargaining Committee Member at Large—Betty Perkins.

Second Spot Indians Win Sixth Straight

TRI-COUNTY STANDINGS		
	Won	Lost
Campbellsport	8	0
Kewaskum	6	2
Lomira	4	4
Rosendale	4	4
North Fond du Lac	3	4
Brandon	1	7

Scores Friday—Kewaskum 69, Brandon 52; Campbellsport 63, Oakfield 59; Rosendale 62, Lomira 60.

The second place Kewaskum Indians made it six victories in succession at Brandon Friday night when they won, 59-52. Kewaskum has not been defeated since the beginning of the season when they lost the first two conference games to North Fondy and Campbellsport. In other games Friday league leading Campbellsport got a real scare before finally pulling ahead in the last quarter to shade Oakfield by 4 points, 63-59, and Rosendale upset favored Lomira in another close one, 62-60.

The game at Brandon was a good one. The Brandonites tied the count in the final minutes of the game but the Indians fought back enough to salvage the win. Kewaskum trailed at the half, 29-27. Russ Rodenkirch was high for the Mitchellen with 23 points. Center Fred Mollen was the workhorse for Brandon with 19 markers. Kewaskum had 10 17 15 17-59. Brandon had 11 18 9 15-52.

HENRY BECKER INJURED BY RIVET PIERCING HIS SIDE

Henry Becker, Kewaskum, was injured Saturday while at work in the Kewaskum High school building. He was helping install lockers in the school. While shooting rivets into the cement floor with a rivet gun one of them accidentally glanced off and pierced his right side. It became imbedded in a muscle and it was fortunate for him that it did because the rivet was headed right toward his heart. If the muscle would not have stopped the path of the rivet the wound might have been fatal.

Henry lost a considerable amount of blood. He was taken to St. Joseph's hospital, West Bend, for x-rays Monday and returned to the hospital Tuesday to have the rivet removed. He is recuperating at his home at present.

MEETING OF WOMEN'S BOWLING ASSOCIATION

There will be a meeting of the West Bend Women's Bowling Association on Tuesday evening, February 2, at 8:00 p. m. at Lighthouse Lanes. This meeting concerns the city tournament. All members are urged to be present.

LEGION AUX TO HOLD DESSERT CARD PARTY

A dessert card party, sponsored by the American Legion Auxiliary, will be held in the Legion club-rooms at 7:30 p. m. on Tuesday, Feb. 2. All games played. Prizes, including a door prize, will be awarded.

Last Rites Held for Publisher, Don J. Harbeck

Don J. Harbeck, 76, owner and publisher of the Kewaskum Statesman for many years, passed away at St. Joseph's hospital, West Bend, on Friday evening, Jan. 22, at 10 o'clock. He had been inactive since Jan. 5, when he suffered a slight stroke, and was taken to the hospital the next morning. Although quite ill at first, his condition seemed to be improving well several days before his unexpected demise.

One of the oldest active publishers in the state, Mr. Harbeck had been in the printing business for 63 years, entering the trade at the age of 13 years. He was with the Statesman for the past 55 years and served as its owner and publisher for more than 37 years.

Don was born at Waterloo, Wis., on Sept. 28, 1877. He started as an apprentice with the Lake Mills Leader in Lake Mills at the age of 13. Later he was employed at the Watertown Gazette and Western Newspaper Union in Milwaukee for several years before coming to Kewaskum.

He came here about 55 years ago to take employment with the late Charles Krahn, then owner of the Statesman. On Nov. 25, 1916 the late Arthur Schaefer and Mr. Harbeck purchased the business from the late George H. Schmidt, later owner. After the death of Mr. Schaefer on Jan. 9, 1932, Don purchased his interest and became sole owner. He had served in that capacity until the time of his death. During these many years he prided himself in the fact that his newspaper never missed an issue.

Mr. Harbeck was well known and active in publishing circles throughout the state. He held membership in the Wisconsin Press Association, the National Editorial Association, the American Press Association, the Holy Name society of Holy Trinity church, and West Bend Council No. 1944, Knights of Columbus. In his earlier years, he organized the Wisconsin Press Association band and accompanied them on their annual tours throughout the state. He was active in musical circles in the area as well as civic affairs. His life was devoted to promoting Kewaskum and its people.

Don was married to Miss Rose Remmel in Holy Trinity church on July 20, 1909. Surviving are the widow; a daughter, Helen (Mrs. Frank Felix) of Kewaskum; a son, William J., who has been associated with his father in the publishing business; five granddaughters, Jeanne and Mary Felix, and Carole, Sharon and Lana Lee Harbeck; a son-in-law, and a daughter-in-law. He was predeceased by his parents, the late John and Victoria Harbeck, one brother, Bill, and two sisters, Bess and Edith.

The body was in state at Miller's Funeral home after 2 p. m. Sunday, where the Knights of Columbus and Holy Name men gathered in a body at 8 p. m. Sunday to pray the rosary. Funeral services were held at 9:30 a. m. Monday in Holy Trinity church, the Rev. F. C. LaBuis presiding. Burial was in the new Holy Trinity cemetery.

Six members of the Holy Name society served as pallbearers. They were Ralph Remmel, Edward Weddig, Walter Schneider, Harold Marx, Lloyd Hron and John Stelling.

LITTLE GIRL BAPTIZED

The infant daughter of Mr. and Mrs. Helmut Lubitz, R. 1, Kewaskum, was baptized in St. Lucas Ev. Lutheran church by the Rev. Gerhard Kanless. She received the name Sandra Louise. Sponsors were Mr. and Mrs. Albert Dorn of Kewaskum.

HOSPITAL NEWS

Mrs. Lawrence Ketter, Kewaskum, was again removed to St. Joseph's hospital, West Bend, Saturday, Jan. 23, for medical care.

MOVE TO WEST BEND

Mr. and Mrs. George Petri and children, who had resided in the former Herman Polzin home at Wayne the past nine years, moved to West Bend recently.

Chevs, Brandon to Play Here Sunday

The Kewaskum Chevrolts-rondu Lac Land of Lakes basketball game scheduled at Fondy last Sunday afternoon was postponed. The date was tentatively set for Thursday night of this week at Elizabeth Waters gym. This was to be the first game of the second half.

This Sunday night Kewaskum plays at home against Brandon, immediately following the Kewaskum-Cedarburg Rivers contest at 7:30. Cedarburg has Dick Peterson, former Marquette U. star back in the lineup and last week beat Horizon 73-70. Horizon tied for the first half title.

In games last Sunday West Bend trimmed Rosendale, 100-64, and Port Washington beat Mayville, 105-56. Doug Ritchie poured in 51 points to establish a new single game mark. This erased the high mark of 50 points set by Johnny Tessar of Kewaskum several weeks ago. With Kewaskum's game being postponed Sunday, Ritchie again took over the scoring lead from Tessar.

Other tilts Sunday are Fond du Lac at Port, West Bend at Horizon and Mayville at Rosendale.

RIVERS TEAM, SLINGER PLAY BUT NOBODY KNOWS WINNER

In a Land of Rivers contest at Slinger Sunday afternoon, Kewaskum played Slinger in a close game and when the final horn sounded no one was sure who had won. The scoreboard showed Kewaskum ahead at the end of the tilt, 65-64. The Slinger scorebook showed Slinger ahead, 66-65, and the Kewaskum scorebook recorded the game as a 65-65 tie.

The battle is expected to have an important bearing on the second half championship. The outcome of the game has not yet been determined but it is possible that it may have to be replayed. Slinger build up an early lead and held it until the last period when Kewaskum caught up. George Hanrahan flipped in what everyone thought was the winning bucket with about a half minute to go.

Not only was the score of the game messed up but also the individual scoring record. Wolf paced Slinger. The Kewaskum book shows Wolf with 20 points and the Slinger book has 21 for him. "Who's on first?"

Kiwians Urged to Join in Solving Youth Problem

Monday evening the Kewaskum Kiwanis committee on youth and church affairs urged all Kiwanians and all members of the community to join in solving our youth problem. Each and every Kiwanian and all others were urged to adopt the prayer at meal-time rule as the first step to bring religion closer to the lives of our youth.

Thursday, January 23, a chest x-ray unit was at the fire house in Kewaskum between 10 and 12 a. m. and between 1:00 and 5:30 p. m. All persons over the age of 18 years were asked to have this free x-ray and bring their whole family. This is 100% for your benefit. Any defect in the lungs that are detected will be reported to you by letter and treated as confidential information.

TWO PERSONS INJURED WHEN CAR TURNS OVER

Arthur O. Mielke, 37, R. 3, Campbellsport, and his passenger, Darlene Mielke, same address, were injured at 10:40 p. m. Saturday when a car driven by the former skidded out of control on a road one-half mile north of the Washington-Fond du Lac county line in the town of Auburn. According to authorities, Mielke was driving northward at 30 miles an hour when the car suddenly started to skid on a control on the ice. The vehicle left the road and tipped over. The road was very slippery at the time.

PARISH SCHOOL CLOSED

Holy Trinity school closed on Thursday at noon for the mid-year holiday. There was no school Friday either. Classes will be resumed Monday.

Ten-Inch Snowfall Heaviest Since '47

Except for flurries here and there, this area didn't have any snowfall for the entire winter and the ground was quite bare. That is until Tuesday night and Wednesday of this week when enough snow fell to make up for the lack of it. A total of better than 10 inches fell during the night and a brisk wind piled into it sizable drifts.

Traffic was slowed, cars were stalled along streets and roads because of the snow and coating of ice underneath, snow shovellers really got a good workout for the first time, plows were put to work and were still at it Friday, and the children happily got out their sleds, skis and toboggans for the first winter's pleasure in the mountains of white stuff.

It was the heaviest single snow storm since 1947 when we remember that big 16-inch snowfall at about the same time of year.

School buses went out Wednesday morning on passable roads but turned right around and took the pupils home shortly after bringing them to school. The public schools shut down Wednesday afternoon. Holy Trinity had classes but many pupils were absent. The public school buses did not go out Tuesday morning because of very icy roads after Monday's freezing rain.

Carl Schaefer on New County Welfare Board

On Jan. 21 the organizational meeting of the newly created county board of public welfare, in accordance with Chapter 513 of the Wisconsin Session laws of 1953, was held at the offices of the county department of public welfare.

The members of the board are Wm. T. Leins of West Bend, Carl Schaefer of Kewaskum, and Robert Laubenheimer of Itchenfield. Leins was selected by unanimous consent as permanent chairman, Eugene A. Brumm, director of the Washington County Department of Public Welfare, was appointed permanent secretary, and Assistant District Attorney Henry F. Renard, a member of the public welfare staff, was appointed as legal counsel for the board.

Chapter 513 of the Session laws creates a uniform system of county welfare departments in all of the counties of the state, exclusive of Milwaukee county.

The function of the board is to supervise the working of the county department of public welfare and shall be a policy making body determining the broad outlines and principles governing the administration of the functions, duties, and powers assigned to the department under state statutes.

KNIGHTS OF COLUMBUS BREAKFAST HERE SUNDAY

The Knights of Columbus, Council No. 1944, of West Bend and Kewaskum will receive Holy Communion in a body at the 8 a. m. mass Sunday at Holy Trinity church, after which a pancake breakfast will be served in the parish hall. Mager McMurray, a teacher at the Central Catholic High school, Green Bay, will be here to speak on "Wanderings in the Wilderness" at the breakfast. This is the story of himself and his family searching for the truth and finally finding it in the church. The Holy Name men of the church are invited to join in this Communion-breakfast.

BACKHAUS GETS HERD NAME FOR REGISTERING CATTLE

Loran L. Backhaus, Kewaskum, has been given the privilege of the exclusive use of the name "Loran" as a herd name in registering his purebred Holstein-Friesian cattle. This prefix name is granted and will be recorded by the Holstein-Friesian Association of America, Brattleboro, Vt.

Over 1,400 prefixes were reserved for breeders in 1953.

BIRTH

THULL—A son to Mr. and Mrs. Jac. L. Thull, R. 2, Kewaskum, Friday, Jan. 22.

Dan Scheid, Ag Teacher at High School Resigns

Daniel Scheid, vocational agriculture instructor at the Kewaskum High school, is leaving his position here at the end of the first semester of school to teach agriculture at Fort Atkinson, Wis. He will take over his new position Monday, Feb. 1, the semester having ended this week.

The new agriculture teacher at Kewaskum High school will be Orval Behnke of Reedsville, who at present is teaching at Princeton High school. Mr. Behnke is a graduate of Wisconsin State college at Platteville.

Kewaskum regrets Mr. Scheid's leaving. However, he will be advancing to one of the better vocational agriculture positions in the state. During his past three and a half years here, few people have realized the progress that has been made through Mr. Scheid's efforts.

He organized the first vocational agriculture courses in the school. These courses are available to those high school boys interested in farming. At present there are sixty-nine boys enrolled in the course. There is also a Young Farmers group which has members in the 18-25 year age group. This organization, along with the Adult Farm group, which is composed of farmers beyond the age of 25, study the existing farm problems. The latter two groups have a total membership of sixty-five.

LOCAL DONORS GIVE BLOOD AT CLINIC IN WEST BEND

A total of 108 donors contributed a pint of blood at the first blood donor clinic of 1954 held at the West Bend High school. The clinic was sponsored by the County-West Bend Community Blood Donor club, which includes every resident of Washington county. The goal had been set at 120. Three of the donors were from Kewaskum.

You Think of Your Kewaskum?

Did you ever realize that parents as well as pupils can attend the football and basketball games played by our high school team? Really the faculty would welcome more parents to attend and become better acquainted with the school's athletic activities.

Having had a talk with Mr. Rose, we find that the school board pays 25c per mile and \$1.50 per hour to the driver for school busses to take pupils and whatever parents wish to go to the games.

The cost to run a bus to one of these games is about \$15.00 to \$20.00. About 40 persons fill a bus and the school charges about 50c per passenger. This is not a bad charge. Who can run his car round trip to say Oakfield for 50c? Also should an accident occur, all persons riding in the bus, including non-pupils such as parents or guardians, are fully covered by insurance.

It really startled the committee to find that so few parents are interested in the scholastic activities of their children. This lack of interest is one of the contributing factors toward the youth problem. Yet we complain about the way youth behaves today. Is it a wonder that such a condition exists if we grown-ups show no interest in what youth does? Youth loves to be appreciated even in its sports. Let's participate.

Many times 20 or 30 pupils cannot go to a game because 20 is not enough to deray the expense of a bus run. Why not phone the school to see if a few more are needed to fill the bus, go along if possible, and take the children, rather than cause many youngsters to drive in their own family car. Thereby, in case of a mishap, their parents are liable for any costs.

Why not make a date with the kids for next Tuesday's game at Oakfield? Call the high school office not later than Tuesday noon and make your reservation. Let's fill the bus.

BOOST KEWASKUM
Notice—Feb. 5 Campbellsport plays at Kewaskum.

Teacup Topics

By Betty Ann

EDITOR
THE MILWAUKEE JOURNAL
WOMAN'S PAGES

Not everyone can be an interesting conversationalist, says Betty Ann, but anybody can be a good listener if he is really willing to listen with his whole mind. That means looking at the person who is talking, concentrating on what he is saying, and asking the kind of questions that will show genuine interest.

You can't fake attention, for nothing is so apparent as a wandering mind.

A soapy cloth wrung out in very hot water and applied to the eyebrows before tweezing reduces discomfort and helps to prevent infection.

The clever career girl has a fragrance break along with her coffee break. A touchup of her favorite scent gives an extra lift to her spirits and her efficiency—and the office is a pleasant place for herself and everyone in it.

When changing the water of flowers, it is wise to flush the vase out carefully to kill bacteria. It is also a good idea to sprinkle a little water on the leaves and blossoms. You'll delay wilting if you cut a half inch off the stems every few days.

Onion Soup

Four tablespoons butter; two large onions, chopped; 2 large onions, sliced; 2 cloves garlic, finely chopped; 2 teaspoons flour; 1/2 teaspoon salt; 1/8 teaspoon pepper; 1 sprig parsley; 1/8 teaspoon thyme; 1 tablespoon tarragon vinegar; 6 cups water; 6 bouillon cubes; 3 tablespoons butter; 1/4 teaspoon tabasco; French bread slices or bread rounds; Parmesan cheese.

Melt butter; add onion and garlic. Cook until onion is tender, but not brown. Stir in flour, salt and pepper. Add parsley, thyme, vinegar, water and bouillon cubes; simmer one hour. To make croûtons, melt butter, stir in tabasco. Brush mixture on bread slices. Bake in moderately hot oven, 400 degrees, 10 to 15 minutes, or until lightly browned. To serve, place tabasco croûtons on onion soup, sprinkle with parmesan cheese. Yield: 6 servings.

Grapefruit salad baskets are especially appealing and provide an attractive way of serving a mixed fruit salad. Fruit sections are placed in grapefruit shells lined with salad greens.

Apple Pancake

One pound tart apples; 1/3 cup melted butter; 1/3 cup sugar; 1/8 teaspoon nutmeg; 1/4 teaspoon cinnamon; 2 large eggs; 1/2 cup milk; 1/2 cup sifted enriched flour; 1/4 teaspoon salt; 5 tablespoons melted butter; 1/4 cup sugar.

Pare and core apples; cut in thin slices; cook in one-third cup butter five minutes. Combine one-third cup sugar, nutmeg and cinnamon; add to apples; cover; cook over low heat 10 minutes longer, or until apples are crisply tender. Remove from heat; cook to lukewarm. Combine eggs, milk, flour and salt; beat with rotary egg beater or electric mixer two to three minutes (batter will be very thin). Heat one tablespoon of remaining butter in 10 inch frying pan. When hot, pour batter into pan.

Bake in hot oven, 450 degrees, 15 minutes. As soon as batter puffs up in center (about three minutes) puncture with skewer or fork, repeating as often as necessary. Lower heat to moderate, 350 degrees; bake 10 minutes longer or until golden brown and crisp. Batter will creep up on sides of pan, forming a shell. Remove from oven; pour half the remaining butter over surface, sprinkle with half the remaining sugar. Spread apple mixture over half the surface; fold as for an omelet; remove to hot platter. Pour remaining butter on top; sprinkle with remaining sugar. Makes six servings.

Kitchen arithmetic: One head of cauliflower that weighs about two and one-half pounds will serve five or six persons.

Baked pears make an out of this world dessert when they are served with a custard sauce made with brown sugar and toasted nuts.

Empty a can of sliced apples into a pie plate. Sprinkle with a little brown sugar and cinnamon. Bake in a moderate oven until bubbly and hot. Serve with vanilla ice cream for a delicious quick dessert.

Self-Governing Puerto Rico Spurred By New Industries

Autonomy and industry are marching forward together in Puerto Rico.

Now in its second year of United States Commonwealth status, the crowded Caribbean island has raised employment 25 per cent in the last decade. National income has doubled, and per capita income is up 70 per cent. More than 150 newly established plants turn out textiles, toys, lenses, shoes, Christmas-tree ornaments and many other products.

Job Shortage

With a population density matching that of New Jersey, Puerto Rico has long been plagued with unemployment, says the National Geographic Society. Lack of arable land and natural resources has further handicapped its economy. The island produces only half its food requirements.

Puerto Rico is the eastern anchor of the Greater Antilles chain of West Indies islands. Its 2,250,000 inhabitants are squeezed into

3,435 square miles. Among American states and territories, only Rhode Island has more persons per square mile.

The island's precious soil is intensively cultivated from the shores to the summits of its 4,000 foot-high mountains. Sugarcane is the major crop, sugar production averaging about one million tons annually. Before new businesses came in from the mainland, four major industries—sugar processing, needlework, tobacco, and rum—accounted for 75 per cent of manufacturing employment.

Puerto Rico's population has doubled since 1898, the year Spain relinquished its four centuries of rule to the United States. Spanish is the language of the people, but English is common in business and government.

In 1917, territorial status brought U. S. citizenship to Puerto Ricans. On July 25, 1952, the island became a self-governing commonwealth. A new constitution, approved by the U. S. Congress and President, put the 100-mile-long island's internal affairs completely in the hands of its elected lawmakers. The way is left open for Puerto Rico to become a state in the Union later if it desires.

Columbus Discovery

Puerto Rico means "rich port". It is the only land under the American flag on which Columbus set foot. Landing there on November 19, 1493, during his second voyage, he claimed it for Spain.

San Juan, the capital, is the oldest city in the new world under the Stars and Stripes. It was established in 1510, a half century before St. Augustine, Florida. With a 1950 population of 224,767, it is second only to Havana among Caribbean cities. The island's principal port, it handles most of Puerto Rico's \$250 million exports and \$400 million imports annually.

Although Puerto Rico lies within the tropics, the island enjoys a perpetually springlike climate. Mean annual temperature is a mild 75 degrees. Ocean breezes sweeping across the mountains from the cool North Atlantic temper the heat. Flowers bloom the year around.

The island's healthful climate and natural beauty have made tourism a leading industry. In 1951-52, 98,000 visitors spent almost \$17 million in Puerto Rico.

AYES HAVE IT—This young father was one of the more than 17,300 inhabitants of the industrial town of Yveriers, Belgium, who voted recently on the question of a "United States of Europe." Result: 74 per cent in favor of such a confederation, 21 per cent against it and 4 per cent noncommittal.

A NAVY MAN FOR 14 YRS, HE FOUGHT IN THE MEDITERRANEAN AND PACIFIC DURING WWII AND IN KOREA TOOK PART IN THE INCHON INVASION.

DISREGARDING ARM AND LEG WOUNDS, HE MANNED A MACHINE GUN THROUGHOUT THE TERROR AND CHAOS OF THE ATTACK ON PEARL HARBOR.

DURING WWII HE WAS ON THE DESTROYER BLUE WHICH SANK IN TORPEDO. 90% OF THE CREW WERE LOST AND KING SPENT 2 HOURS IN THE WATER BEFORE BEING RESCUED.

'ROUND THE FAMILY CIRCLE—These unique circular apartment houses are under construction in a Stockholm, Sweden, suburb. The new-type buildings contain 10 one-room apartments on each of their four floors, the rooms being placed fan-shaped around a large, circular staircase. Each of the houses will be painted a different color.

New Paint Remover Simplifies Refinishing

BY EDNA MILES

THIS is a do-it-yourself era. Mother, father and children retire to workshops and sewing corners evenings and weekends, engaged in making or refinishing furniture, drapes and slipcovers, clothes and accessories.

No matter how complicated the project, there's someone in the family willing to tackle it. Refinishing old furniture bought, presumably, for a song is one favorite way of spending an evening.

But since any well-done refinishing job is largely dependent on removing old paint and getting down to the grain of the wood, a good paint remover is important.

There are many good paint removers on the market. But most of them require much muscle and effort from the man, woman or child engaged in the paint removing.

So one paint remover just recently packaged for home use is a welcome addition to the shelf. This new remover can be used without a scraper. One application will, the makers claim, remove any number of layers of paint, varnish, lacquer or shellac.

And, since the makers say that it will not affect the ply nor warp the veneer, no sanding is necessary.

This remover remains liquid when it is applied, so it's simple to use on scrolled furniture or

A clean cloth and a little pressure will remove old paint and veneer from a picture frame when a newly marketed paint remover is used.

picture frames. Except in the most difficult cases, a cloth is right for rubbing off old paint and veneer with this remover. On stubborn pieces, use steel wool. Then go once over lightly with turpentine and the new

finish can be applied. No drying time is needed.

A word of caution: It will take off fingernail polish just as easily as it removes old paint. So don't decide to use it the day after a fresh manicure.

About Your Home

By FRANCES DELL

Snow injury is a major hazard for most of the evergreens and some of the deciduous shrubs used as decorative plants. Quite a few of them are not entirely winter hardy in the northern states.

Almost all of our garden shrubs have been developed to meet requirements of color, form and texture with little attention to the physical structure. In this group you will find many yews, junipers, arborvitae, retinosporas, hollies, rhododendrons and azaleas. Probably the best thing to do is to plant only shrubs and evergreens that can take your climate without pampering. However, it is possible to protect exotic plants to some degree.

Wrapping and boxing evergreens should be avoided, if possible. It will be better to plant something that will not be quite as effective than to have several months of ugly wrappings on your yard.

Once the snow begins to fall, be sure you have your plants securely tied to permanent stakes. These stakes may be concealed within the plant and driven deep into the ground to give solid support to the main stems. The stems can be tied to the support with dark colored cloth and thus be almost invisible.

Very little can be done to prevent the formation of ice on the branches. A steam spray is about the best thing. Chipping or breaking the ice does about as much harm as good.

Remember, large trees need support during the winter ice and snows almost as frequently as small shrubs.

The same plant support that helps your shrubs will prevent limbs and branches from being broken during summer storms.

Puzzle

Inquiring Son—Father, may I ask one more question?
Patient Father—Yes, my son, just one more.
Son—Well, father, how is it that while night falls, day breaks?

Reason Enough

Excited Patient—Let me up—I want to get out of here.
Nurse—Lie down and be quiet. The doctor is a very excitable man and loses his patience easily.
Patient—So I heard and that's why I want to get away.

New Way of Hanging Wallpaper Makes Redecorating Very Easy

You can change your walls whenever the fancy takes you—thanks to a new way of hanging wallpaper—and you can do it all yourself. The secret is a ready-mixed adhesive and pre-trimmed paper. McCall's Magazine tells you what equipment you'll need and what simple procedures to follow.

"Before you shop for paper, measure the height and length of your walls. From these measurements the dealer will tell you how many rolls you'll need. With this new way of hanging, the wallpaper strips are butted together, not lapped. You'll need paper without selvages, so if your selection has them, ask your dealer to trim the paper. He'll do it for a small charge.

"If the paper you select has an up-and-down pattern, check carefully to see that it does not come off the roll upside down, because with this method paper is rolled onto the wall from ceiling to baseboard. If design is upside down have it re-rolled.

"Prepare the wall first. It must be clean and smooth. If there are more than 3 layers of old wallpaper, or if paper is badly worn, soak it thoroughly with warm water and remove with a wide scraper. You can put new paper over 3 layers or less of old, but edges must be sanded smooth and torn or greasy paper taken off. If wall is plaster, smooth rough spots, remove and replace broken plaster before applying paste. If wall is painted, sandpaper chipped spots. If wall is wood, fill in gouges with plastic filler. You can use this paste on wallboard and canvas too, which need no special preparation.

"Assemble your tools: a flat pan for the ready-mixed paste; a roller for applying the paste to the walls, a brush for corners and angles, razor blade, table knife, scissors, a plumb line and a supply of clean cloths.

"Drop a chalked plumb line from the ceiling and snap it against the wall to act as a guide in hanging your first strip. Apply paste liberally and evenly up to the plumb line, covering an area wide enough for 3 or 4 strips of wallpaper.

"Hang the first strip beginning at the ceiling and following the plumb line down. Allow an extra inch or two at top and gradually unroll, smoothing paper as you go. Cut off at the bottom, allowing an extra inch or so.

"When strip is in position, crease it into the molding or angle of wall and ceiling with the blunt edge of a table knife. Cut along this crease with a razor blade and smooth the paper. Trim paper into place in the same way at the baseboard.

"To paper around a corner, unroll paper and cut a length, matching pattern to last strip hung. Cut this length from top to bottom so it will extend about 1 inch beyond corner. Check corner with a plumb line and hang

"One can hardly say that Betty's face is her fortune."
"No, but it draws a lot of interest."

Bible Comment:

Writers of Bible Illustrate Truths Through Symbols

ONE thing about the Bible that many people forget is that it is an Eastern book.

The daily language and literature of the East has always been full of figures and symbols very different from much of our prosaic, Western liberalism.

The prophets frequently used figures of speech and symbols to express truth.

The parables of Jesus were true to life and revealing in the truth concerning God and man that Jesus sought to impart, but they did not depend upon the incidents described having actually happened.

It was "a certain man" who went down from Jerusalem to Jericho, and it might have been any man so far as the truth and the teaching were concerned.

The parables are stories and teachings for today, and not just stories of something that happened long ago. Their significance is not as historic incidents, but as spiritual tales, or parables, with universality of application.

Take, for instance, the account of how Eve was created from the rib of Adam. Here is how one great Biblical teacher interprets it.

He suggests that the creation of woman from man's side meant that she was to be his equal and helpmate; not from the head was she created that she should lord over him, nor from the foot, that he should dominate her.

This interpretation is in harmony with the high esteem in which women were held among Jews and in contrast with their inferior position among many other peoples.

The story of the beginning of sin symbolizes the subtle and easy temptation of those made in the image and likeness of God; the essence of sin in disobedience to divine command; the knowledge of good and evil as the result of the fall, and the emergence of man into moral struggle and moral responsibility.

Definition

Teacher—Jimmie, what's a peninsula?

Jimmie—A rubber neck.

Teacher—No. It's a neck running out to sea.

Jimmie—That's a rubber neck, isn't it?

Toll Bridge

"Say, old man, does your wife play contract bridge?"
"Well, judging by what it costs her, I would say she plays toll bridge."

Ten Word INTELLIGRAM

Check correct word.

1. There (is) (is not) an historical record of the Exodus.
2. President Andrew Johnson was a (tailor) (lawyer) by profession.
3. All bacteria (are) (are not) harmful.
4. Winters in places near the ocean are (colder) (warmer) than those inland.
5. The tenth wedding anniversary is the (ruby) (tin) anniversary.
6. Germany attacked Russia in (1941) (1942).
7. Condiments are (derogatory statements) (food seasonings).
8. Robert E. Lee (was) (was not) offered the command of the Union Forces.
9. The Tar Heel State is (North) (South) Carolina.
10. A prawn is a (garden tool) (food).

Check your answers, scoring yourself 10 points for each correct choice. A score of 0-20 is poor; 30-60, average; 70-80, superior; 90-100, very superior.

"Every time the conversation gets to the point where there's nothing more to be said, she SAYS IT!"

SPORTS AFIELD

By Ted Kesting

What's wrong with wildlife administration of our states?

It's politics you say. And no less authority than Dr. Ira N. Gabrielson, former director of the U. S. Fish and Wildlife Service, agrees with you. He places "politics" at the head of the list of chief defects in current state game administrations.

In more than half the states the wildlife department and its funds are at the mercy of partisan and personal politics. A good wildlife program requires continuity of effort and personnel to have a chance to succeed. It is not likely to have either under the kind of political administration that still prevails in over half the country.

The second most potent factor contributing to poor game management is sportsmen's pressure. Sportsmen's groups are too often ignorant, even if they are enthusiastic. By organizing pressure to secure unwieldy privileges and to cause the adoption of unsound programs, they have been responsible for an appalling waste of conservation funds and effort.

Third most important factor in producing poor game administration is lack of adequate authority to manage the wildlife harvest. Every state game department needs the authority to open and close seasons, to control bag limits, and to make such other regulations as are necessary to limit the harvest taken each year.

There are many other factors that contribute to poor wildlife management, but these are the three most important. What's the solution? Dr. Gabrielson sees only one answer: Interested sportsmen must become so thoroughly organized that they can force the removal of these handicaps.

Sportsmen's groups, sufficiently aroused, have demonstrated many times that they can secure sound legislation on which a good program can be built. They can do the greatest service to their own interests and to the interests of America by insisting that their state conservation department be free from partisan and personal political interference, that it have adequate authority, that it resist ignorant pressures from hunting and fishing groups, that it have an adequate enforcement staff, adequate personnel to make accurate inventory of game stocks each season and trained research men to work on its problems, that it have a sound educational program, and that it devote its funds to sound basic work to produce more fish and wildlife.

During the holiday lull in Minnesota basketball, Art "Basketball" Johlf's, Minneapolis sports-writer, takes an analytical look at the first fast month. Several teams score quite regularly in the 90s, a lot of 80s have been reported, and there have been scads of scores in the 70s—scoring so far ahead of all past years that a whirlwind state tournament is in prospect, according to Art.

REGIONAL BASKETBALL FAVORITES EMERGING

The eight regions already have been matched for tournament play: 1 versus 5, 2 vs. 8, 3 vs. 7, 4 vs. 6. After a month's play Art picks the various regional favorites this way:

Region 1—Austin, Albert Lea, Winona; pitted in the tournament against 5, where chief contenders are Hopkins, Minneapolis North, Minneapolis Roosevelt, Shakopee, Melrose, St. Cloud Tech.

Region 2—Jackson, St. James, Pipestone, Wells, Welcome look good, while sparklers in their tournament opponent Region 8 are Bemidji, Thief River, Crookston, Roseau.

In Region 3 it now looks like Montevideo, Granite Falls, Renville, or Danube vs. Duluth Denfeld, Duluth Central, Chisholm, Nashauk, Hibbing, or Eskos in Region 7.

Region 4 early leaders are St. Paul Mechanic Arts, Red Wing, St. Peter, Lake City; their opponent, Region 6, may come up with Brainerd, Crosby-Ironton, or Alexandria.

Region 2, in Johlf's opinion, is the "darkhorse powerhouse." The colorful little team of this year's tournament probably will come out of the southwestern section of the state—Welcome and Wells are very strong. Jackson has an unusually tall team, and Pipestone has beaten Hibbing.

And They Need Dough

Old Gentleman—I hear that your big brother is going to be a baker.

Tommy—Yes, but father's afraid he'll become lazy.

Old Gentleman—Oh, why?

Tommy—Because all bakers are loafers.

WATCHDOG MOUNTAIN — An "around-the-clock" sky watch is kept to guard the San Francisco Bay area from surprise air attack. The \$5 million U. S. Air Force radar center on Mount Tamalpais picks up unidentified planes on radar screens and relays the information by radio to fighter headquarters at nearby Hamilton Field. The ball-shaped sphere at center stands 65 feet high and houses radar antennae. Wooden poles at right are 90-foot-high radio antennae towers.

SNOOK © 1953 National Wildlife Federation

This intriguing name is applied to a number of fishes closely kin to *Centropomus undecimalis*, a fish related to our fresh-water basses and perch. Snook are found in the warmer seas that border Florida and the coast of the Gulf of Mexico. In the Texas region they may be found in large schools and were formerly abundant in the Everglades area. They run up many coastal streams and sometimes are at their best for sportsmen in brackish waters. A representative of the group is found in the Pacific from Mexico to Peru. As is usually the case the common name is applied to a number of fishes recognized as being different species by fish students. The so-called "Snook" of the coast of Africa is not a close relative.

While Snook weighing to over 70 pounds have been taken, the average size is between 5 and 10 pounds. They are excellent fighters when hooked, leaping into the air frequently to free themselves and making strong runs.

The lower jaw of a Snook has a superficial resemblance to that of a pike or pickerel while the rest of the fish bears some resemblance to a perch. The lateral line is black and the dorsal fins are well separated from each other. The tail is moderately forked. Superficially the Snook looks like a green and white or silver fish, the upper parts being green or sometimes brown while the underparts are silvery or white. The dorsal fins are gray to dusky and the paired fins, yellowish.

The baits used in taking snook are small aquatic animals such as shrimps, crabs, molluscs and fishes. The best fishing may be expected around pilings or wharfs, the very places that are considered as inviting by the average fisherman. The bottoms over which Snook feed may be either sandy or muddy and the feeding areas may shift with the changing tides so that a spot good at one time may be bad at another. At another time the reverse may be true. I well remember catching my first Snook off the West Coast of Florida and wondering at the time what it was. So unique is the shape of the fish that I am sure the identification made for me by my boatman was correct.

I regret to state that to my knowledge I have never tasted Snook but for that matter there are few fishes outside the trout that make any important appeal when they are served on my table. I much prefer to be identified with catching them in their native element than with eating them. The flesh I understand is excellent, being flaky and white when well cooked.

Snook are frequently called Robalo. The Robalo Blanco, or White Snook, is considered to be superior as a fighter to the Robalo Negro, or Black Snook. The former is considered to have a softer mouth and because of this to require more skill in making a landing. They may be taken by plug casting, by baited hook, on artificial flies and by spinning. In the Florida area they are commonly taken in mangrove-bordered waters and once hooked they recognize in the mangrove an excellent place for tangling a line and getting free from the hook. Because of the sharp edges exposed on the cheeks and gill-covers, a wire leader is almost essential in

Australian Scientists To Establish First Weather Station on Antarctica

Ten Australian scientists and technicians will sail from Melbourne in January to set up Australia's first scientific station on the mainland of Antarctica.

The expedition is expected to base on the coast at a point southwest of Western Australia, reports the National Geographic Society. The advance party will land supplies, erect buildings, and make a limited land survey during the first year.

Detailed weather studies will begin early in 1955, as will research in geology, biology, cosmic rays and geophysics. Each expedition member will do a 12-month tour of duty. The frigid outpost will be maintained thru 1958.

Antarctic "Weather Eye"

The Australian Government began its long-range plan to explore and develop the neighboring Antarctic area six years ago, when weather stations were established at Heard and Macquarie Islands. On these lonely, windswept land spots meteorologists conduct a 24-hour-a-day study of an eight-mile-high column of air to classify Antarctic weather sweeping up into the temperate zones.

Antarctica is known to contain huge deposits of coal and other valuable minerals—possibly uranium. Its seas hold tremendous food resources in whales, fish, seals, birds and plankton, to which the world might eventually be obliged to turn. Flights between South America or South Africa and Australia may some day be routed over the Antarctic.

Australia's Antarctic territory lies between longitudes 45 degrees east and 160 degrees east. The area embraces 2,472,000 square miles and is almost as large as Australia itself. At its nearest point, Antarctica is only 1,500 miles south of Australia.

Most of the men in the advance party have already served on Heard or Macquarie Islands. They will sail to Antarctica in the 1500-ton Danish motor vessel, *Kista Dan*. It has speed of 12 knots when fully loaded, a range

of 14,500 miles, and is one of the world's most modern ice ships. The *Kista Dan* is powered by a directly reversible six-cylinder diesel engine, with propeller and rudder protected against ice. It will take soundings in uncharted coastal waters.

Strapped to the ship's decks will be two light aircraft. Mounted on floats or skis, they will be used for reconnaissance flights, flown and serviced by Royal Australian Air Force personnel.

Expedition members will be equipped with polar ski boots from Norway, windproofs of Australian design, eiderdown jackets from France, and polar tents made in Britain. On land they will travel in "weasels," tracked snow vehicles manufactured in the United States for use in World War II. Dog sledges will be hauled by huskies bred and trained at Heard Island.

Teacher—Can you tell me the name of any animal peculiar to Australia?
Boy—The rhinoceros, sir.
Teacher—Wrong. That's not found in Australia.
Boy—Well, sir, that's exactly why it would be peculiar.

Good Farm Records Is Smart Business

How's your set of farm records? In pretty good shape?

Then you'll be able to spot the weak spots in the farm enterprise and that's essential in these days of high operating costs.

I. F. Hall, farm management specialist at the U. of Wis., says a good set of farm records is sure smart business these days. Such things as feed bills and crop yields can be put to the acid test—to see if each part of the farm business is standing up under the economic pressure.

Records will tell just what you did this year compared to last year and where you can head next year.

Dairy herd records kept on individual animals are helpful in culling out the least profitable cows. Hall feels that now is just as good a time as any to get rid of the low-producing cows.

Field records show how different fields rate over the years as affected by cropping, pasture, and soil management programs. And when you plan a crop rotation ahead, you can pick up seed and fertilizer bargains along the way.

Finally, income tax time is here and there'll be fewer headaches if records are kept up-to-date.

He says records don't have to be complicated. A simple crop, feed, and livestock account will do the job.

Behind The Scenes In American Business

By Reynolds Knight

New York—Factoring, a highly specialized method of meeting the credit needs of business, has just begun a year in which it hopes to surpass its 1953 volume of \$3 billion.

The factor, once a feature of textile financing almost exclusively, has of late years moved into some 50 lines where the manufacturer or wholesaler needs more cash than he himself commands, to keep his business operating most economically while various sums are tied up in accounts receivable due from his customers at future dates.

The factor agrees to buy the seller's receivables for cash, deducting a small commission, and extends to buyers the customary terms of the trade. The seller then notifies the buyer that his debt is to the factor and not the supplier. The factor takes full responsibility for credit extension, collections and bookkeeping.

FOUNTAIN PEN TAX—Removal of the manufacturers' excise tax on fountain pens is the writing equipment industry's principal hope for 1954. Coupled with expanding markets and improved merchandising techniques, industry leaders say, this could bring a record sales year.

Walter A. Sheaffer II, president of the W. A. Sheaffer Pen Company, pointed out that repeal of the tax would reduce selling prices and dealers' inventory costs, and bring enlarged opportunities for aggressive selling at retail.

Expansion of the primary school age group, and increasing use of fountain pens, ballpoints and mechanical pencils in all school grades gives writing equipment makers the strongest potential for sales increases since 1946, he said. He forecast growing popularity for ballpoints as "second pens."

RECORD FOR RUBBER—Production and sales of rubber products this year will be nearly as great as in 1953, one of the rubber industry's greatest years, John L. Collyer, president of B. F. Goodrich Company, predicted in a year-end statement.

Consumption of new rubber is expected to be about 3 per cent below 1953's record of approximately 1,340,000 long tons, Mr. Collyer said. This would mean use of 1,300,000 long tons of new crude and man-made rubber, with more than half coming from U.S. facilities.

The rubber industry will probably do better than industry in general, Mr. Collyer said, because it will benefit from high production of automobiles in the last three years. Many of these will need replacement tires in 1954.

ELECTRONIC COMFORT—Electronic devices, for the first time, entered the American home in sizable numbers in 1953 as bringers of comfortable temperatures in all parts of the house, the head of the world's largest producer of automatic controls declared in a review of his company's year.

Paul B. Wishart, president of Minneapolis-Honeywell Regulator Company, said one of the major developments in automatic controls in 1953 was adoption on a mass scale of scientific electronic control systems, to supplement the less flexible—even though efficient—single thermostat.

He forecast that by the end of 1954 there would be 50,000 American homes in which indoor temperatures were automatically varied by controls in response to weather conditions outside.

12,000-PLANE YEAR—The aircraft industry enters 1954 after a year of substantial production, expecting to see output relatively steady during the coming twelve months, according to Mundy I. Peale, president of Republic Aviation Corporation.

Mr. Peale estimated that the aircraft industry in 1953 delivered to the armed forces approximately 12,000 new planes, including several new types of bombers, fighters and fighter-bombers. He forecast that this rate of delivery would continue well into 1954, with variations as new models are developed.

Republic Aviation, in mid-1953, closed out its famous Thunderjet series with a total of 4,457 of this pioneer jet fighter-bomber, capable of carrying atomic bombs, in the service of 16 nations.

GLASS USES RISE—Glass for construction and for many industrial uses, including automotive glazing, had a record year in 1953 and looks forward to continued good business in 1954. That is the word from George P. MacNichol, president of Libbey-Owens-Ford Glass Company.

Libbey-Owens-Ford, in the last three years, has invested heavily in new facilities, chiefly to make plate glass and to fabricate laminated and insulating glass. These helped bring the company a 25 per cent sales gain in 1953 over 1952.

Handy Jim's Fix-Up Tips For Farm and Home

This Wall's a Blackboard!

How about installing a blackboard wall in the nursery or children's playroom? It will be educational for the youngsters and easy on Dad's pocketbook.

The wainscot blackboard (see drawing) is simply four-foot-wide Masonite Tempered Presdwood, applied right over the old wall. Over it, Dad can spread some chalkboard material, which may be obtained in green or black at most paint stores.

Youngsters will enjoy the blackboard, which can be redecorated eventually. Tempered Presdwood wears durably and won't be affected by scuffs and bumps. Here's the way to make the blackboard:

Apply two coats of clear sealer, sanding down the first thoroughly and the second lightly. Now apply a thick coat of the slating material. When it is dry, rub it down with a clean cloth. Commercial chalkboards are made of the same materials.

The Tempered Presdwood may be applied directly over old plaster by using a wallboard adhesive. Panels one-eighth inch thick are suitable. In new construction, quarter-inch panels may be applied directly to the studs.

APPLES—Delicious, Russets, Jonathan, Northern Spys, Winesaps, Tolman Sweets, Greenings, Erics, etc. Reasonable. If possible bring containers. Henry Schille, West Bend, R. 1. One and one-half miles south of Newburg, County Trunk Y. 1-1-54

PAINTING—Interior and exterior painting, spray or brush. Rug cleaning. Leonard Rindt, call 58, Kewaskum. 5-22-54

CARD OF THANKS
Our heartfelt thanks and sincere gratitude are extended to relatives, neighbors, associates and friends for their thoughtfulness, expressions of sympathy and assistance in our sad loss, the death of our beloved husband and father, Don J. Harbeck. The many kindnesses touched us deeply. We are grateful to Father La Bue, the choir and organist, Knights of Columbus, Holy Name society members, the radio and press, especially neig-

horing newspapers, palibearers, drivers, donors of spiritual and floral bouquets, cards and gifts. Miller's, traffic officer, ladies who served and prepared the meal, all who assisted in any way, expressed comforting sympathy, showed their respect and eased our burden in any form.
Mrs. Don J. Harbeck
Mrs. Frank Felix
William J. Harbeck

ERDMANN'S EXTEND THANKS
We want to thank all our friends, neighbors and all others who came so willingly to help us during the burning of our home. Without the help we never could have saved our other buildings.
We also wish to thank the Theresa, Lomira and Mayville Fire Departments for their efforts and John Widner and Sons, Purity Cheese Factory, Noll Bros., Wilmer Pahl, Orie Haag and John Weigand for hauling water and Weber Brewing Co. and Baker Canning Co. for furnishing water.
To all those who furnished us with clothing and contributed to us during this emergency, we want to express our sincere appreciation and thanks.
Mr. and Mrs. Edwin Erdmann
Raymond Erdmann Family

DUNDEE
Mr. and Mrs. Melvin Ramthun and Mr. and Mrs. Chas. Pagel visited Sunday with relatives in Milwaukee.

The infant daughter of Mr. and Mrs. William Leng was baptized Sunday at the Trinity Lutheran church by the Rev. H. A. Kahrs and received the name Mischell Ann. The sponsors were Carl Dins and Mrs. Harold Lipman of Wauzeka. A number of relatives were entertained at the Leng home during the day in honor of the occasion.

Mr. and Mrs. Walter Lakoski entertained at their home Sunday for the pleasure of the latter's birthday anniversary. Guests were Walter Lakoski, Mr. and Mrs. Russell Lakoski and daughters, Nancy Ann and Karen Ann, Mr. and Mrs. John Burke, Mr. and Mrs. Walter Koelsch, Mr. and Mrs. Ted Baaura of Milwaukee, Mr. and Mrs. Sylvester Majeskey and son Monte from here.

NEW PROSPECT
Mr. and Mrs. Elmer Wren and son Edward of West Bend and Mr. and Mrs. Richard Trapp, Virginia and Gerald, Dolores Geidel, of Five Corners, and Bill Barrett of West Bend were dinner and supper guests at the home of Mr. and Mrs.

Walter Jandre Sunday.
Mrs. Frank Klostermann and daughter Kolleen visited Mr. and Mrs. Ziedell and Mr. and Mrs. E. Skinner at Oshkosh Saturday.

Mr. and Mrs. Paul Giese and daughter Marilyn called on Mr. and Mrs. Walter Jandre Friday evening.
Mr. and Mrs. Geo. H. Meyer and Edith called on Mr. and Mrs. David Tennessen at Fond du Lac Saturday P. M.

Mr. and Mrs. Frank Bowen called at the home of Dr. and Mrs. Leo J. Uelmen at Campbellsport Sunday afternoon.

Mr. and Mrs. Walter Jandre called on Mr. and Mrs. Tony Baumann at Sheboygan Thursday. Mrs. Baumann has been ill and is a sister of Mrs. Jandre.

REP. VAN PELT NAMED TO IMPORTANT COMMITTEE
Representative William K. Van Pelt, Fond du Lac, Republican of Wisconsin, has been named to the important House Committee on Banking and Currency.

INSURED AUCTION Sunday, Feb. 7, 1954, 2:00 P. M. Former Jacob Muckerheide Farm

Located 1 1/2 miles north of Kewaskum on county trunk Y and 1 mile west on dirt road, 6 miles south of Campbellsport on county trunk Y and 1 mile west.—First farm on left hand side. Watch for signs.
60 acres of farm land, approximately 40 acres tillable. This has always been known as a very fine workable farm. It is also in a very desirable location as it is close to Kewaskum and industry.
Estate of Jacob Muckerheide
Leonard Cuttone, Administrator
Col. Lester Dreher, Auctioneer
Paul Landmann, Clerk

*Endlich's is
The Fact!*

And We Can Prove It
A THICK GLASS DOES NOT STAND HOT WATER BETTER THAN A THIN ONE

The reverse is true. Glass is a bad conductor of heat. In a thick glass tumbler the inner layers of the glass are heated before the outer. Heat causes expansion, and the outer layers are burst by the expansion of the inner. In a thin tumbler the whole thickness of the glass is heated almost at once, and all the parts expand at the same time. 1. "Popular Fallacies"—A. S. E. Ackermann. 2. Moderation, Best Rule For Viewing T.V.

Since television apparently is here to stay, modern America must simply learn to live with it. Probably no invention since the automobile has revolutionized the living habits of so many people in so short a time as has TV. Especially important has been its effects on children. The joint committee on health problems in education of the National Education Association and the American Medical Association has noted the increasing importance of television in daily living and the growing concern as to its effects on the physical and mental health of the school age child. They have recently completed an exhaustive study of the problem and their conclusions are worth noting. After careful consideration of the problems involved the committee believes that television, properly developed and controlled, holds great potentialities for education of our children and youth. They state further that in their opinion TV will not injure normal vision if the following conditions are present: the set is the right size for the room—most can comfortably take a 16 inch or larger tube; the viewer is the proper distance from the screen—not closer than 10 feet for a 16 inch or larger tube.

The set should be located against a light colored wall where there is the least reflection. General illumination should be provided at night from shaded lamps six to eight feet on either side of the screen or the room is partially darkened for daytime viewing. Lastly, it is wise to arrange periods of study, play, work, meals, TV viewing, and other activities so that time spent at television will not be excessively long at one sitting. The committee further stated that it was their belief that television will not interfere with the study, playlife, or work assignments of the child, or cause undesirable emotional or social repercussions if parents exercise their parental obligation to work out with the child a sensible schedule for viewing television.

Parents are the greatest possible force in determining the nature of television programs directed to children through careful selection and guidance of the child's choice of programs. Thus it would seem that as is true in most things, moderation in the viewing of television is the best rule to follow.

Lots of Those!
 The colonel wanted a horse, but could not afford a thoroughbred. He decided to buy a cheap animal from a dealer.
 "This one, sir," said the dealer "has been bred in the best military traditions."
 The colonel purchased the horse, but a few days later angrily returned him to the dealer.
 "I thought you said this horse was bred in the best military traditions," he shouted.
 "So he is," returned the dealer. "He'd sooner die than run."

STRICTLY FRESH

PAYING cash on the nose is still better than paying through it . . . to the finance company.

An Austrian stuntman spent a year inside a bottle without any serious effects. There's a man who managed to get along with the bottle, but even he had a limit.

There's safety in numbers, except when the numbers are attached to the saddles of horses.

In Waverly, Iowa, a funeral home advertised: "Those we have served will testify as to our ability." If they can testify, somebody's doing a TREMENDOUS job!

Money means nothing, until you haven't got it!

"Mister Fixum's Handy Hints"

BY ERNIE GARDNER

FORM FOR CEMENT STEPS

There are many ways of building forms for pouring cement steps. This plan was drawn up for five steps, and a brick railing. You should make changes necessary to fit your needs.

If you expect the steps to be permanent, they must have a good foundation. This does not have to be a solid block of concrete, but should be a wall, wide enough to support the load-bearing parts of the steps. The foundation should extend into the earth deep enough to be below frost level for your part of the country. In warm climates, it should be at least two feet deep to keep out rats, and withstand soil erosion.

Build the forms as illustrated. Use good lumber if possible, especially for the front or risers of the steps, which will be left exposed.

Note that a wall of brick is shown inside the forms. This wall is to support the ends of the

steps after they are poured. It is not necessary to fill the entire form with cement. Make sure, however, that each step, and a space 3" or 4" back of each step, is solid cement. Steel reinforcement rod or mesh is desirable.

Fill the space back of each step with dry dirt or rubble, to support the cement after it is poured. This will settle after the cement has set, and will not swell and crack the cement.

Mix and pour the cement, pouring the bottom step first. Level the surface with a wood float. Do not trowel, because you want a surface which is not slippery. The front of each step should be about 1/8" lower than the back, so that rain water will drain off.

The Portland Cement Association recommends the following mixture for porch steps.

- 1 sack portland cement
- 2 1/2 cubic feet sand
- 3 cubic feet pebbles

Keep the steps covered for several days after pouring to prevent drying out. Do not remove forms until the cement has set hard.

After the forms have been removed, minor blemishes may be covered by painting the surface with a mixture of cement and water.

Build the brick railings after the forms have been removed. Be sure to get a good mortar joint between steps and railing.

If you are using cement caps for the railings, precast them in wood forms. When thoroughly dry, lay them on top of the brick railing in a bed of mortar.

So Goes The Mind

By Orin R. Yost, M. D.
Medical Director, Edgewood Sanitarium

(Editor's Note: Dr. Yost is a graduate of the Medical College of Virginia at Richmond, studied psychiatry at St. Elizabeth's Hospital in Washington, D. C., taught psychiatry at Columbia University, New York, was division psychiatrist of the 79th division in World War II, and is presently Medical Director of Edgewood Sanitarium Foundation.)

(Author of: What You Should Know About Mental Illness.)

What About Epilepsy?
What is Epilepsy?—It is chronic functional disease from which man-kind has suffered since ancient times.

What Does the Word 'Epilepsy' Mean?—It comes from the Greek word for "seizure," and a fit or attack or seizure is the most obvious outward sign of the disease.

What is a "Seizure"?—It is a temporary loss of consciousness without any apparent cause, accompanied by muscular movements which may range from a mere twitching of the eyelids to severe convulsions of the whole body.

Are There Various Kinds of Seizures?—Yes; they vary in length, in frequency, in intensity and in character.

Why is Epilepsy Looked Upon with Horror?—Too many people still regard epilepsy as shameful and incurable. This is not so. Before there was any scientific understanding of this distressing illness, the bizarre behavior of the epileptic was looked upon as the work of witches or demons.

How Rare a Disease is Epilepsy?—Epilepsy is not a rare disease at all. It is rather a common affliction affecting about 1 person in 20. This is about the same number that suffer from diabetes or active tuberculosis.

What is the Connection Between Epilepsy and Mental Deficiency?—None at all. The great majority of persons subject to seizures are normal human beings, in every other respect. History even records that many men of genius were subject to seizures, among them Julius Caesar, the Roman conqueror; Paganini, the great violin virtuoso; and the famous Dutch painter, Vincent Van Gogh.

What are the Causes of Epilepsy?—There are three circumstances that contribute to this condition: brain damage, physical disorders affecting the brain, and emotional upsets.

Can Emotional Upsets Cause Epilepsy?—It is believed that emotional upsets do not directly cause seizures. Rather, they may contribute to seizures by some effect which they exert on the brain.

How Can Epilepsy be Treated?—First the conditions which contribute to seizures must be corrected. Sometimes, though rarely, an operation can relieve pressure on the brain. Then, physical defects can be located and corrected. Finally, an attempt is made to increase the patient's resistance to seizures. This is done by giving certain medicines and drugs. This must be done under strict medical supervision, and they have to be taken daily over a long period, generally long after the seizures have entirely stopped. In most cases, proper medicines, given under careful medical supervision, greatly reduce the number and severity of seizures. In many instances they stop them altogether.

Can Epilepsy Be Cured?—With adequate medical treatment and adequate social care, 4 out of 5 of those with seizures can lead relatively normal lives. Only 1 case in 10 is serious enough to require institutional care, and even among these patients, there are some who can live more or less normal lives.

Making Sure
A Scot taking part in a novice's boxing match, was hammering his opponent in fine style. The bell rang, but the Scot paid no attention. The referee, tapping him on the shoulder, shouted, "Time."
"Out o' my way, mon," shouted the Scot, still punching his opponent. "Just when I'm winning you ask me the time. Ask somebody else!"

Sarah Anne's COOKING CLASS

So Easy . . . So Good Meal

Have you discovered the magic of casserole cooking? This tantalizing flavor-blend of canned corn, condensed cream of chicken, or mushroom soup, with a juicy pork chop for each member of the family is an excellent example. It's the modern, easy-way to get a meal and what is more it's a penny saver. Check the ingredients needed to make flavorful sauces for baked casserole dishes, and see the saving when condensed soups are used for the sauce.

- Family Favorite Meal**
- Spiced Tomato Juice
 - Pork Chop Corn Bake
 - Hearts of Lettuce
 - Apple or Cherry Pie
 - Coffee or Milk
- Pork Chop Corn Bake**
- 1 can condensed cream of chicken, 4 pork chops (1/2 inch thick) or mushroom soup
 - 2 12-oz. cans whole kernel corn
 - Salt and pepper
 - 2 bay leaves, or onion slices
- Combine soup and corn in a baking dish. Sprinkle pork chops with salt and pepper. Arrange on top of the soup-corn mixture, placing a half bay leaf under each chop. Bake covered in a slow oven (325° F.) about 1 hour. Uncover and continue to bake about 15 minutes until chops are brown. Four servings.
- TRY using drained canned peas, mixed vegetables, or green or wax beans instead of corn.

Never before has the butcher sold so many pounds of hamburger as in the last few years. Use shoulder, bottom round, chuck or bits of well flavored meat. Ground meat dries out rapidly so for the best flavor have meat ground to your order.

- Spaghetti and Meat Balls**
- 1/2 lb. spaghetti
 - 1 can tomatoes
 - 1 lb. cheese grated
 - 1 lb. meat ground
 - 1 teaspoon salt
 - 1 medium sized onion chopped fine
- Boil spaghetti in salted water until done. Make meat into balls and fry. Cook tomatoes. Brown the onion in the grease which the balls have been fried; add the grated cheese, allowing it to melt. Add cooked tomatoes. Into a baking dish make a layer of meat balls, add spaghetti. Pour mixture over this. Sprinkle with grated cheese. Bake in an oven 350 degrees.

- Barbecued Meat Balls**
- 2 lbs. ground beef
 - 2 eggs slightly beaten
 - 1/2 cup milk
 - 2 teaspoons prepared mustard
 - 2 teaspoons salt
 - 1/2 teaspoon pepper
 - 1/2 teaspoon nutmeg
- Mix and shape into 1 1/2 inch balls. Pan-broil. Serve with barbecue sauce.

- Barbecue Sauce**
- 1 medium sized onion
 - 2 tablespoons fat
 - 2 tablespoons vinegar
 - 1 teaspoon chili powder
 - 1 teaspoon salt
 - 1/4 cup lemon juice
 - 2 tablespoons brown sugar
 - 1 cup catsup
 - 3 tablespoons worcestershire sauce
 - 1/2 teaspoon prepared mustard
 - 1 cup water
 - 1/2 cup celery cut up
- Few drops Tabasco sauce
Brown onion in hot fat. Add remaining ingredients. Simmer for 30 minutes. Pour over meat balls.

- Hamburger Steak**
- 2 lbs. ground beef
 - 1/4 lb. suet
 - Butter
 - Onion juice
 - Flour
 - Salt and pepper
- Grind suet and beef together twice. Form into an oval steak about 3/4 of an inch thick. Sprinkle with salt, pepper, a little onion juice and flour. Broil in the oven or saute in a little fat. When ready to serve spread with butter and serve on a hot platter.

- Beef-Corn-Tomato Casserole**
- 1 pound ground beef
 - 4 tomatoes sliced or canned tomatoes
 - 1 large whole kernel corn or cream style corn
 - 1 green pepper diced
 - 2 onions chopped
 - 2 tablespoons bacon fat
 - Salt and pepper
 - 1/4 teaspoon curry powder or chili powder if desired
- Buttered crumbs
Saute pepper and onion in ba-

con fat until light brown. Add ground beef and cook until browned. Put alternate layers of meat mixture and corn in a buttered casserole, season with salt and pepper. Arrange slices of tomatoes over the top. Cover with bread crumbs. Bake in an oven 350 degrees until bread crumbs are brown.

- Hamburger Ring**
- 1 lb. ground beef
 - 1/2 cup milk
 - 1 tablespoon grated onion
 - 1 teaspoon salt
 - 1/4 teaspoon paprika
 - 1/2 teaspoon mixed herbs if desired
- Combine all ingredients, mix lightly and place in a well-greased seven-inch ring mold. Bake in an oven 350 degrees for 1 hour. Invert on a round chop dish. Make gravy with juice in the pan and stock. Add enough tomato juice and cream to make 2 cups. Fill the center with buttered green peas or butter beans. Serve with whole browned potatoes. Garnish with parsley.

Cook a smoked tongue and keep it in the refrigerator. So handy for sandwiches, for a cold meat platter or in a chef's salad.

In the Service

CPL. MERRIL KRUEGER IS GIVEN DISCHARGE
Cpl. Merrill Krueger, son of Mr. and Mrs. Wallace Krueger, town of Auburn, R. 2, Campbellsport, arrived home last Thursday from Fort Sam Houston, Tex., after receiving his discharge from the U. S. Army. His wife, Evelyn, who was with him while he was in the service, accompanied him back. Cpl. Krueger served in the army for 24 months. Except for the first four months, when he was stationed at Camp Pickett, Va., the remainder of his time in service was spent at Fort Sam Houston.

JOHN KOUGL CELEBRATES HOLIDAYS IN FAR EAST

John H. Kougl, radarman second class, USN, son of Mr. and Mrs. F. J. Kougl of Route 1, Kewaskum, recently celebrated the holiday season in the Far East aboard the destroyer USS Ozbourn.

After a month of cruising and battle problems, the Ozbourn went to Yokosuka, Japan for leave and upkeep.

Among the holiday features offered on board ship were rest and recreation at one of the special services hotels in the area, a gala party held for Japanese orphans, and religious services on Christmas.

The ship was expected back from the Asiatic area early this year.

COUNTY TO HOLD TWO-DAY COURSE IN DAIRY HOUSING

This is to announce a dairy cattle housing short course to be held in the Wisconsin Electric Power Company hall, West Bend, on Tuesday and Wednesday, Feb. 9 and 10. This two-day short course will be of interest to builders, carpenters, lumber dealers and all others connected with the farm building program.

The West Bend meeting will serve as an area meeting for several counties. Each day's session will begin at 10:00 o'clock a. m.

Farmers who plan to build in the near future are also invited to attend. Please mark the dates—February 9 and 10—on your calendar of meetings as no letters announcing this meeting will be sent to you.

There appears to be much interest in improving dairy cattle housing facilities and any one interested in such buildings will profit by attending this 2-day short course. Personnel who will be present to conduct the clinic includes Max LaRock, extension architectural engineer; Ed Bruns and Wm. Roper of the Portland Cement association; Carl Neitzke and S. A. Witzel, also of the agricultural engineering department will be available for consultation.

ATTEND YOUR FARM AND HOME WEEK FEB. 1 TO 5

Final plans for Wisconsin's Farm and Home Week are about completed. The sectional meetings will begin on Monday afternoon and will continue each afternoon during the week. Tuesday morning the first general session, beginning at 10:00 a. m., will be held in the Memorial Union theater, Madison. These will be continued on Wednesday and Thursday mornings. On Wednesday morning the general session will include talks by the presidents of the three national farm organizations, namely the Farm Bureau, the Farmers' Union, and the National Grange. A very good program will be presented each day and farm folks are cordially invited to attend.

MARRIAGE LICENSES

A marriage license has been issued by the Fond du Lac county clerk to Erroy M. Kutz, R. 2, Campbellsport, and Lois Ruth Martin, R. 2, Kewaskum.

It's impossible to tell where an orderly woman will put things.—Anonymous

University of Wisconsin economists expect no big change in demand for farm products this year. Supplies will continue large, and price levels will remain about the same, they say. Production costs will drop slightly.
