

Husband of Local Woman Missing for Two Years Returns

Wanted on an abandonment charge for over two years, Donald Below, 44, a Shawano automobile dealer, was arrested on Monday night by Kewaskum authorities and the county sheriff's department when he returned to his wife, Linda Below, now of Kewaskum, who is employed at the Republican Hotel. Sheriff Ted Lul of Shawano county came to pick up Below on Tuesday morning. He was faced with prosecution on a warrant issued June 2, 1952, charging him with abandonment and non-support of his wife and 14-year-old daughter, Rosalie. Sheriff George Brugger of Washington county said that Below had been the object of an intensive search throughout the United States Canada and Alaska. Below informed the sheriff that he had been working on the west coast as a mason. He said he wanted to come home to his wife for the past year but hadn't succeeded in getting up enough courage until now. Mrs. Below telephoned the local chief of police and Sheriff Brugger from the Republican hotel Monday night when her husband shocked her with a visit. She told the sheriff that there was a warrant out for Below at Shawano and requested that he be arrested. Chief of Police Gerry Guttman assisted in taking in Below, who offered no resistance. According to previous press stories, Below was first reported missing May 23, 1952 when he failed to return to his garage after leaving word that he was going to deliver a used car to a customer in Keshena. The customer said Below never showed up. Six months later, the car in which Below fled was located near Cadott in Chippewa county. Below reportedly sold it to a farmer for \$20 and started hitchhiking west. Trial for Below was held on Wednesday at Shawano. He was given a \$350 fine, was placed on probation for three years, and was ordered to support his wife and daughter, according to reports.

Lakes Team Idle Sunday; Play at Night Wednesday

The Kewaskum Land o' Lakes ball team was idle Sunday. This was an open date on the schedule but rained out games of the Sunday before were made up by six of the teams. The Chevys were rained out against Cedarburg but their contest was made up on Wednesday night of this week at Cedarburg under the lights. No report of the outcome was turned in as yet. This Sunday, July 4, is another open date on the schedule but one tilt will be played. Port Washington and Grafton, which tied for the first half title, will play off on the neutral Saukville diamond for the championship.

Kewaskum, West Bend and Port Washington of the Lakes will compete in the Plymouth district State Semi-Pro tournament next week. The meet will start Monday and will last all week. Pairings have not as yet been completed.

LAND O' LAKES STANDINGS (Northern Division)

	Won	Lost
Port Washington	6	1
Grafton	6	1
Cedarburg	4	2
West Bend	3	4
Saukville	3	4
Mequon	2	5
Germantown	2	5
Kewaskum	1	6

Scores Sunday—Port 7, Saukville 1; Mequon 10, Germantown 9; Grafton 13, West Bend 5. Game this Sunday—Port vs. Grafton at Saukville (first half championship playoff).

BIRTHS

KALB—A son to Mr. and Mrs. Harold Kalb, R. 2, Kewaskum, Thursday, June 24. SCHMIDT—A daughter to Mr. and Mrs. Harold Schmidt, R. 2, Kewaskum, Wednesday, June 23. BATH—A son to Mr. and Mrs. Clarence Bath, Kewaskum, Sunday June 27.

Nurse Many Years, Helen Bruhn Dies

Miss Helen Bruhn, 59, of Kewaskum, a nurse for the past 20 years, who had been engaged in nursing at St. Joseph's hospital, West Bend, for the past 11 years, passed away Friday, June 25, at the hospital following an illness of six months with carcinoma. Miss Bruhn was an excellent nurse and was well known and liked. She was born on Oct. 11, 1903, in Milwaukee. When a baby she moved with her parents to Oakfield and her mother died while a resident there. Later the family moved to the town of Wayne, following which they came to Kewaskum. Miss Bruhn spent from April, 1952, until April, 1954, with her brother Richard and family at Panama City, Panama, following the death of his wife. A daughter of the late Herman and Emma Bruhn, her father predeceased her three years ago and a brother, Werner A. Bruhn, died less than a year ago, on July 5, 1953. Surviving are three sisters, Mrs. Eleanor Leue of Mt. Prospect, Ill., Mrs. Elsie Muckerheide and Mrs. Linda Borchert of Kewaskum; three brothers, Alfred H. Bruhn of Oakfield, Columbia, William A. Bruhn of Kewaskum and Richard E. Bruhn of Panama City; five nieces, four nephews, three brothers-in-law, and two sisters-in-law. The body was in state after 2 p. m. Sunday at Miller's Funeral home. Funeral services were conducted there at 2 p. m. Monday, the Rev. Gerhard Knies presiding. Burial was in Avoca cemetery, Oakfield.

Local Firemen Winners at Badger Tournament

The annual picnic and tournament of the Badger Firemen's Association was held at Cedarburg last Saturday evening and Sunday in conjunction with that city's annual Festival of Music. The events were sponsored by the Cedarburg Fire department. Some 30 bands and bugle corps from several states participated in the Festival of Music and mammoth parade Sunday. The Kewaskum firemen succeeded in getting in on the prize money in both the contests Saturday evening and the parade Sunday. Winners in the various tournament contests were: Hose Coupling—John Ulrich, Germantown; Ray Drickon, Barton; Lee Bohn, West Bend; W. E. Nisse, Grafton; Ed. Arnold, Germantown. Individual Ladder Climbing—Ed. Arnold, Germantown; Augie Bilgo, Kewaskum, and John Ulrich, Germantown, tie; Ed. Brettschneider, Newburg; third, fourth and fifth place was tied by the following: Carl Bohn, West Bend; Syl. Watry, West Bend; Walter Eernisse, Grafton; Marvin Dickmann, Grafton; Ray Schwinn, Newburg. Relay Hose Coupling—Germantown, Barton, Grafton, West Bend, Kewaskum, Cedarburg. Relay Ladder (bucket)—Germantown, Barton, Grafton, Kewaskum, West Bend, Cedarburg. Lay-Out—Saukville, Germantown, Cedarburg, Newburg, West Bend, Grafton, Barton. Parade prizes—Grafton, 42 men; Germantown, 22; Newburg, 21; West Bend, 20; Barton and Campbellsport, 18; Mequon 16, and Boltonville and Kewaskum, 13.

WILLIAM KREAWALD

Mrs. William Krewald, 83, nee Amelia Ebert, of the town of Auburn, died on Sunday, June 27, at the home of her son Walter in that township, following an illness of three months. Born July 30, 1870, in the town of Kewaskum, she was married to William Krewald on April 14, 1896. He preceded her in death on March 8, 1933. After their marriage the couple resided on a farm, later taken over by her son Walter. Surviving are two daughters and a son, Mrs. Charles Wunder of Milwaukee, Mrs. Walter Nieman of Sheboygan and Walter on the homestead; 16 grandchildren; eight great-grandchildren, and a brother, Henry Ebert of West Bend. Besides her husband, her parents, three sisters and four brothers predeceased her. The body was in state at Miller's Funeral home after 2 p. m. Tuesday. Services were held Wednesday at 2 p. m. there, the Rev. Harvey Kahrs officiating. Interment was in Trinity Lutheran cemetery, town of Scott. Six grandsons served as pallbearers for the deceased.

MARIE A. SOMMERS

Mrs. Marie A. Sommers, 80, of Milwaukee, a native of the town of Kewaskum, died in that city on Friday, June 25. Born in the town of Kewaskum, she taught school in and around Washington county for many years. About 75 years ago she retired from the teaching profession and moved to Milwaukee to make her home. Surviving are three sisters, Mrs. Olive Kliekenbusch of Milwaukee, Rose (Mrs. James Gill) of Cascade, and Elsie (Mrs. George Cavanaugh) of Milwaukee; two brothers-in-law, one sister-in-law, nieces and nephews. Funeral rites were held Tuesday morning, June 29, in St. Francis church, Milwaukee. Burial was in Holy Cross cemetery there.

FRANK T. BROSKY

Frank Thomas Brosky, 76, of Lebanon, Penn., father of Mrs. William Ruth of the town of Auburn, residing a couple of miles north of Kewaskum, died unexpectedly at West Bend Wednesday, June 30, following a heart attack. He was a retired district manager of Maier's Baking Co. of Allentown, Penn. Mr. Brosky was taken ill suddenly Wednesday morning while visiting with the Ruth family. He was rushed to St. Joseph's hospital, West Bend, in the Kewaskum firemen's ambulance but was pronounced dead upon arrival. The deceased flew to Wisconsin to attend the wedding of his granddaughter, Florence Ruth, to Earl Marks last Saturday. He was born Aug. 22, 1877 at Reading, Penn. His wife predeceased him. Surviving are a son and three daughters, Charles of Southbridge, Mass., Mrs. Helen Seikrist of Lebanon, Mrs. Amelia Kern of Allentown, Penn. and Mrs. Florence Ruth of here; 11 grandchildren; two sisters, Cecelia Smith and Florence Jablinski, and two brothers, John and Harry Brosky. His body was in state at Miller's Funeral home Wednesday evening and was shipped to his home on Thursday. Funeral rites will be held at St. Mary's Catholic church at Lebanon and burial will be in Gethsemane cemetery at Reading.

Dr. Ogi of Ohio New Veterinarian Here

Dr. Charles Ogi of Apple Creek, Ohio, near Columbus, has taken over the veterinarian practice in Kewaskum recently vacated by Dr. Richard Haxby, with offices located on Fond du Lac Ave. Dr. Ogi is 29, married and the father of two children. He is a graduate of Ohio State university and holds a D. S. degree along with a D. V. M. degree. Just recently he passed his Wisconsin state board exam. Dr. Ogi moved here and assumed his duties on July 1. He will be associated with Dr. K. E. Lloyd of West Bend. Dr. Haxby, who had conducted a practice here for the past year, has moved to Sycamore, Ill., where he will be associated with his brother. He had also been associated with Dr. Lloyd while in Kewaskum.

Miss Janice Jandre Weds Wm. Barrett

Miss Janice Jandre, daughter of Mr. and Mrs. Walter Jandre of Kewaskum, became the bride of William H. Barrett of West Bend in a 2 o'clock nuptial ceremony performed by the Rev. E. J. Zanow in St. John's Lutheran church, New Fane, on Saturday, June 26. The bride was attired in a gown of Chantilly lace and nylon over satin. The long sleeved bodice was styled with a rousing neckline and she carried white carnations centered with an orchid and streamers. The bride's attendants, Miss Janice Backhaus, as maid of honor, and Miss Joann Waranus and Mrs. Kenneth Jandre, the bridesmaids, were identically dressed in shaded orchid strapless gowns with matching stoles of lighter orchid. Layers of tiny ruffles fashioned the very full skirts. They carried colonial bouquets of yellow carnations and roses with orchid streamers. Little Karen Ludwig served as flower girl. The bridegroom was attended by Buddy Fuller as best man and Kenneth Jandre and Bobby F. Benz as groomsmen. Allen Heider was the ring bearer. Edwin Wren and Ronald Roehl ushered the guests to their places. A dinner and reception was held at Forest lake following the ceremony. The young couple will be at home at 1655 Cedar st. in West Bend when they return from a honeymoon through northern Wisconsin. The bridegroom is engaged in construction work in West Bend. His bride, a graduate of Campbellsport High school, had been employed at the office of the West Bend Aluminum Co.

Theresa Kern Retires from Enger-Kress Co.

Miss Theresa Kern of Kewaskum, one of the oldest employees of Enger-Kress at West Bend, retired on Friday, June 25. She had been employed at the firm since 1925. On June 15 her fellow-workers and friends gathered in the recreation room at Enger-Kress for a party in her honor. Last Thursday, June 24, she was presented with a gold watch by Howard A. Bauman, president, in recognition of her almost 30 years of employment. The watch symbolizes recognition of long service and the plant's appreciation of her many special efforts during her years of work. She often served as an instructor in the sewing department. No special plans have been made for her retirement. Housework, flowers and relaxing will take up much of her time. She resides with her mother here, who is 94 years of age, and still does gardening and other work.

Dr. Raschbacher Leaves Kewaskum

Dr. John L. Raschbacher, who practiced medicine in Kewaskum in the Harry H. Maaske building on North Fond du Lac avenue for the past two years, has discontinued his practice here. On Thursday of this week, July 1, Raschbacher, with his wife and two daughters, moved to Big Bend, Wis., where he is taking over the practice of Dr. Boldt. They had been residing in the Schultz Bros. home in Roseland Heights. During their stay here, the Raschbachers became well liked and our residents are sorry to see them leave. On Thursday evening of this week, Mr. and Mrs. Leonard Rindt and two sons moved from the Ed. Frost home on South Fond du Lac avenue into the home vacated by the Raschbacher family.

Annual Firemen, Legion Picnic Here July 10-11

The annual picnic sponsored by the Kewaskum firemen and American Legion Post No. 384 will be held in the village park on Saturday evening and Sunday all day, July 10 and 11. The featured attraction on Saturday evening will be the famous Blatz Quartette of Milwaukee. The quartette will appear on the stage at 8:30 p. m. Sunday's festivities will get under way with a big parade at 12:30 p. m., featuring many units and musical organizations. Prizes will be awarded for the best children's like, trike and regular floats. Cash prizes will also be given for the winning commercial floats. Special entertainment Sunday afternoon and evening will be provided by Mel's Circus Clown Band, which will circulate throughout the crowds. The highlight attraction Sunday will be three big acts of roller skating, magician and acrobats. Concessions, rides and amusements of a variety will be in operation for your entertainment. Admission to the park is free. Don't miss this annual event.

The annual picnic and tournament of the Badger Firemen's Association was held at Cedarburg last Saturday evening and Sunday in conjunction with that city's annual Festival of Music. The events were sponsored by the Cedarburg Fire department. Some 30 bands and bugle corps from several states participated in the Festival of Music and mammoth parade Sunday. The Kewaskum firemen succeeded in getting in on the prize money in both the contests Saturday evening and the parade Sunday. Winners in the various tournament contests were: Hose Coupling—John Ulrich, Germantown; Ray Drickon, Barton; Lee Bohn, West Bend; W. E. Nisse, Grafton; Ed. Arnold, Germantown. Individual Ladder Climbing—Ed. Arnold, Germantown; Augie Bilgo, Kewaskum, and John Ulrich, Germantown, tie; Ed. Brettschneider, Newburg; third, fourth and fifth place was tied by the following: Carl Bohn, West Bend; Syl. Watry, West Bend; Walter Eernisse, Grafton; Marvin Dickmann, Grafton; Ray Schwinn, Newburg. Relay Hose Coupling—Germantown, Barton, Grafton, West Bend, Kewaskum, Cedarburg. Relay Ladder (bucket)—Germantown, Barton, Grafton, Kewaskum, West Bend, Cedarburg. Lay-Out—Saukville, Germantown, Cedarburg, Newburg, West Bend, Grafton, Barton. Parade prizes—Grafton, 42 men; Germantown, 22; Newburg, 21; West Bend, 20; Barton and Campbellsport, 18; Mequon 16, and Boltonville and Kewaskum, 13.

WILLIAM KREAWALD

Mrs. William Krewald, 83, nee Amelia Ebert, of the town of Auburn, died on Sunday, June 27, at the home of her son Walter in that township, following an illness of three months. Born July 30, 1870, in the town of Kewaskum, she was married to William Krewald on April 14, 1896. He preceded her in death on March 8, 1933. After their marriage the couple resided on a farm, later taken over by her son Walter. Surviving are two daughters and a son, Mrs. Charles Wunder of Milwaukee, Mrs. Walter Nieman of Sheboygan and Walter on the homestead; 16 grandchildren; eight great-grandchildren, and a brother, Henry Ebert of West Bend. Besides her husband, her parents, three sisters and four brothers predeceased her. The body was in state at Miller's Funeral home after 2 p. m. Tuesday. Services were held Wednesday at 2 p. m. there, the Rev. Harvey Kahrs officiating. Interment was in Trinity Lutheran cemetery, town of Scott. Six grandsons served as pallbearers for the deceased.

MARIE A. SOMMERS

Mrs. Marie A. Sommers, 80, of Milwaukee, a native of the town of Kewaskum, died in that city on Friday, June 25. Born in the town of Kewaskum, she taught school in and around Washington county for many years. About 75 years ago she retired from the teaching profession and moved to Milwaukee to make her home. Surviving are three sisters, Mrs. Olive Kliekenbusch of Milwaukee, Rose (Mrs. James Gill) of Cascade, and Elsie (Mrs. George Cavanaugh) of Milwaukee; two brothers-in-law, one sister-in-law, nieces and nephews. Funeral rites were held Tuesday morning, June 29, in St. Francis church, Milwaukee. Burial was in Holy Cross cemetery there.

FRANK T. BROSKY

Frank Thomas Brosky, 76, of Lebanon, Penn., father of Mrs. William Ruth of the town of Auburn, residing a couple of miles north of Kewaskum, died unexpectedly at West Bend Wednesday, June 30, following a heart attack. He was a retired district manager of Maier's Baking Co. of Allentown, Penn. Mr. Brosky was taken ill suddenly Wednesday morning while visiting with the Ruth family. He was rushed to St. Joseph's hospital, West Bend, in the Kewaskum firemen's ambulance but was pronounced dead upon arrival. The deceased flew to Wisconsin to attend the wedding of his granddaughter, Florence Ruth, to Earl Marks last Saturday. He was born Aug. 22, 1877 at Reading, Penn. His wife predeceased him. Surviving are a son and three daughters, Charles of Southbridge, Mass., Mrs. Helen Seikrist of Lebanon, Mrs. Amelia Kern of Allentown, Penn. and Mrs. Florence Ruth of here; 11 grandchildren; two sisters, Cecelia Smith and Florence Jablinski, and two brothers, John and Harry Brosky. His body was in state at Miller's Funeral home Wednesday evening and was shipped to his home on Thursday. Funeral rites will be held at St. Mary's Catholic church at Lebanon and burial will be in Gethsemane cemetery at Reading.

WILLIAM KREAWALD

Woman's Pages

Summer velvet fashions reflect the same frosted shimmer on the summer scene as a frosted drink does on a hot day, says Betty Ann. Velvet has an air, it enriches summer outfits from the most tailored linen or cotton to the frothiest dance dress. In millinery velvet is flattering as velvet around your face. With its four season adaptability, a velvet hat or accessory makes wardrobe money go four times further.

This is the summer when you'll be in fashion if you own a velvet hat. Smart heads, everywhere, will be crowned with them.

You will find velvet hats to wear all day, late day, perfect for garden party and summer wedding. They have a way of looking well with every type of dress fabric. Raspberry, orange, cherry, lemon, melon, larkspur blue, new rose reds offer you a color spectrum to make you radiant.

Summer velvet bags pick up the cool, icy look. Dress up or tailored in type, they lend a richness to your costume; make you feel well dressed. Bamboo hoops or tortoise shell frames are good with town wear.

Never since grandmother's day were so many summer dresses enriched with velvet, according to The Velvet Institute of America. Every important designer has dressed up summer cottons, laces, organdies and silks with bows and bands, ribbons, midriffs, boleros and even ruffles.

Bows frame curved bodices and shoulder lines, or accent the fullness of skirts. Rows and rows of velvet ribbons interspersed with starched organdy make an entire summer dance skirt, starting lovely with a gleaming strapless velvet halter in black or pastels. Wide velvet bands in sunny colors hold together the important scattered colors of a print dress, giving it the rich, deep color coherence an artist gets when he adds a velvet mat to his prized painting.

Sudsing crocheted or knitted doilies is a breeze and you can bypass pinning and ironing if you have a fair sized mirror or glass topped table.

Dip the doilies into thick starch, then smooth them flat over the glass surface and leave until dry.

Press fluted doilies as evenly as possible against the glass surface; then, when almost dry, flute the edges with your fingers. A plastic topped table is as good for this purpose as a glass surface.

Shrimp Macaroni Salad

6 ounce can broiled mushrooms; 1/3 cup french dressing; 1/16 teaspoon powdered thyme; 1 cup elbow macaroni (4 ounces); 1 pound fresh shrimps, cooked and cleaned or 2 five ounce cans, drained; 1 tablespoon lemon juice; 1 cup diced unpeeled cucumber; 1/2 cup mayonnaise; 1/4 cup chopped chives; 1 bunch water cress. Drain and quarter mushrooms or use two three-ounce cans chopped broiled mushrooms, saving broth for some future use in soup or gravy. Place in bowl and sprinkle with french dressing and thyme. Meanwhile, cook macaroni according to directions on package and drain thoroughly. Add to mushrooms, tossing lightly together. Chill several hours in refrigerator. Sprinkle chilled shrimps with lemon juice. Add to macaroni and mushrooms with cucumber. Blend mayonnaise and chives. Combine with other ingredients. Serve on bed of short cut water cress sprays. Yield: four to six servings.

Famous Fruit Salad Dressing

1/2 cup sugar; 1 teaspoon flour; 1 egg yolk; 2 tablespoons canned lemon juice; 1/2 cup canned pineapple juice; 1 teaspoon celery seed; 1 cup whipping cream. Mix sugar, flour and egg yolk in a saucepan. Add fruit juices and cook over low heat until thickened, stirring constantly. Add celery seed. Cool. Stir in whipped cream just before serving. Makes about two cups.

Trinidad tempter salad dressing is especially recommended for a green salad. It's seasoned with aromatic bitters.

Use a rubber scraper to remove melted chocolate from the bowl in which it was melted, in order not to lose a drop of it. The tested recipes that call for so many squares of unsweetened chocolate are "quantity" as well as "quality" tested and mean what they say.

About Your Home

By FRANCES DELL

Good lighting in the home plays many roles. Primarily functional, it can be used artistically to achieve many highly decorative effects.

Fluorescent tubes may be built into the cornice to accent a dark window. The light should be directed toward the ceiling—to add more height to a low room, or directed downward—to draw attention to a particularly handsome pair of drapes.

Slimline fluorescent lamps afford the very best in dressing table lighting. There are various ways they can be installed. Perhaps the most attractive is to have a wallpapered valance built approximately four feet over your dressing table top. Then have slimline fluorescent lamps arranged so that their light is thrown into your mirror.

Fluorescent lamps are practical for the reader-in-bed. A valance, similar to the one just described, should be built one to two feet above the head of the bed, with lights installed so that they will fall on your book or magazine.

You can create a dramatic setting for your dining room table by having an extra leaf made for it with a hole cut through the center. A boxed-in lamp is fastened to the under-side so that the light beams from it are reflected on a ceiling mirror. The mirror is sized so that the reflected beams exactly match the size of the table. The light is hidden from the diner's eyes by a centerpiece of flowers, or ornament.

The color of the light bulbs you use in the rooms of your home should be determined by what will best compliment your walls, rugs, furniture and drapes. A bulb with a yellowish light is never used correctly in a room where rose, wine or red is liberally used in decoration. A bluish bulb gives the most pleasing effect in such a room.

In a green room, the proper choice is a bulb that gives a true white cast. A slightly grayish-shaded bulb is best in a yellow room. In a blue or white room a bluish light is again the right choice.

You can create many more personal and decorative effects through experimentation with different lights in your own home. Besides being fun, it's inexpensive, and you're likely to surprise yourself, and the family with the results.

Most symmetrical trees have been attained by pruning and other care throughout their natural life, says the National Arborist Association.

The trained arborist, often called a "tree expert," usually has made the care of trees his life's work, according to the National Arborist Association.

Cod Chowder Made With Milk Is Healthful Dish

BY DOROTHY MADDOX

A TALL glass of cold milk and a slice of chocolate cake—that's one of our favorite summertime snacks. It's a wholesome one, too.

Milk is a basic food, about the best known source of the calcium we need, as well as a good supplier of riboflavin and protein. Some of our daily requirements in milk can be supplied by ice cream, in milk drinks and in recipes using milk. So let's look at one recipe that will add to that wonderful sense of feeling youthful and fit.

This New England chowder is made with nonfat dry milk which possesses all the nutrition of fluid milk except butterfat. It is also very economical.

Cod Chowder (Makes 2 quarts)

One quarter cup diced salt pork, 1 medium-sized onion, sliced; 2 cups diced, uncooked potatoes; 1 teaspoon salt, 1/4 teaspoon pepper, 1/2 teaspoon powdered thyme, 2 cups water, 1 pound fresh or frozen cod fillets, 3 cups liquid nonfat dry milk, 4 tablespoons flour.

Saute salt pork until crisp in a 4-quart saucepan over low heat. Add sliced onion and cook until

More milk—as a beverage or in cooked dishes—means better health and more youthfulness.

tender, about 5 minutes. Add potatoes, salt, pepper, thyme and water. Cover and simmer over low heat 10 minutes. Remove from heat.

Cut fish fillets into 1-inch cubes, add to potato mixture. Return to heat. Cover and cook

5 minutes longer or until potatoes and fish are tender. Remove from heat. Blend small amount of liquid nonfat dry milk with flour to make a smooth paste, add with remaining liquid milk to chowder.

Return to heat and cook, stir-

ring constantly, until chowder comes to a full rolling boil and is slightly thickened. Serve hot with a pat of butter over each portion.

Note: Any mild-flavored fish fillets may be used, such as had-dock, sole or halibut.

Street Tree Care May Improve TV Reception

Television reception and the operation of other electrical appliances can be improved in many localities by expert trimming of street trees so that they do not come into contact with overhead wires, says the National Arborist Association.

In the case of many of the larger trees now standing, sound tree trimming practices can preserve the beauty of the trees, as well as provide line clearance. In new plantings, trees that grow to large size should not be placed directly under overhead wires. There are small and medium sized trees which require little trimming. These are preferred, says the association, to the giant, forest-type trees wherever there is possibility of contact with overhead wires.

Proper pruning and trimming of street trees and other trees in parks and on industrial and home properties also can greatly reduce damage from ice storms and high winds, according to the arborists, by re-distributing the weight of the smaller branches supported by the large, primary limbs. Most large trees can be trimmed to prevent large limbs from falling on overhead wires, which may result in serious stoppage of electrical power to homes and factories. Considerable progress has been made in recent years in the techniques of tree trimming not only to avoid interruptions of power and other damage during storms, but, at the same time, to preserve, and, in fact, improve the natural beauty of the trees.

Earth's Powerhouse In Space Is The Sun

In the warming weeks of spring, baseball takes over the sports pages and car dealers sell more convertibles—two lesser ways that man is affected by the glowing star he calls the sun.

Sunlight and sun's heat control all life upon the earth. Out of that blazing furnace 93,000,000 miles away in space, very likely, this planet was born.

Plant life takes its power for growth from the sun's rays. Animals subsist in turn upon plants. The earth is warmed by the sun, and under its touch, water evaporates from the seas and falls again as rain.

These are the essential gifts of earth's white-hot neighbor, the National Geographic Society says.

But there are other effects of its radiations as well. Some are only barely suspected.

Rhythms In Heartbeat

Before the National Academy of Sciences in Washington recently, Dr. Charles G. Abbot, 82-year-old physicist and former Secretary of the Smithsonian Institution, reported evidence of variations in human pulse rates that seem to have a definite statistical relationship to a well-established cycle of solar variation.

This cycle, based upon a period of 22 years 9 months, may also produce regular changes in the weather. Dr. Abbot has devoted a lifetime of study to such cyclical variations in the power of the sun and the related appearance of sunspots upon its face.

Sunspots are known to be caused by giant explosions of energy in the burning mantle of Old Sol. Although they have been observed for centuries, only in recent decades have their effects upon the earth begun to be understood.

When sunspots appear on the rotating orb, radio engineers brace themselves for severe interference to long-range broadcasts. Navigators at sea are warned of magnetic storms that may affect their compasses.

Northern Lights

Closely linked to sunspots are the spectacular polar auroras, rippling lights that appear in the night skies in high latitudes. Glowing weirdly far above the earth in electrified upper regions of the atmosphere, these "northern lights" are caused by intense currents spouting from the sun's face in the region of the sunspots.

Shooting through space much like streams from a gigantic lawn sprinkler, the beams rain down upon the earth with tremendous energy. A day later, they may be gone.

More constant forms of radiation from the sun give motive power to the weather by creating roaring winds in the high atmosphere, as well as little-understood conditions of temperature, and layers of electrified gases.

Finally, without the gravitational force which the sun unceasingly exerts upon the earth, not only this planet but the entire solar system would fly off into outer space. Robbed of the sun's life-giving rays, the earth would be a frozen ball of rock and ice hurtling through endless night.

Fall color in trees is one of the principal tourist attractions of the Northeastern United States, one of the few areas in the World having such brilliant foliage at that time, says the National Arborist Association.

Winter flounder have both eyes on the right side; summer flounder have their eyes on the left side.—Sports Afield.

School Safety Patrols Reduce Accidents

The observance in Washington by thousands of school safety patrol personnel brings to mind the accomplishments of school safety patrols since they were begun as a national undertaking in the United States in 1928.

The first police officer to start a safety patrol was H. O. Rounds of the Detroit Police Department, who considered it a method of contributing to the reduction of child traffic accidents in Detroit.

His efforts encouraged, Officer Rounds helped expand the project in Detroit and within the State of Michigan and, in 1928, national headquarters of the American Automobile Association established a safety department and the school safety patrol was adopted as one of its national projects.

The most amazing accomplishment of school safety patrols is the reduction in child traffic accidents in the years since it went into operation. The death rate among five to fourteen-year-old school children has decreased thirty-two per cent in the past twenty-five years. During that time the death rate from other age groups in the country increased by seventy-five per cent.

If school patrols had achieved nothing else, this figure would be a most impressive testimony to their value on the American scene. The Patrols in the United States now number more than 550,000 members and continue to spread into every part of the country. Those communities which do not enjoy the benefit of the school safety patrol organization are without the services of one of the really useful organizations promoting safety developed in this country.

Avenues of maples, oaks, magnolias, plane trees and numerous other species are features of many of America's most attractive cities, says the National Arborist Association.

The knot is a unit of speed used in navigation and is equal to a speed of one nautical mile per 6,080 feet.—Sports Afield.

NO TICK-TOCK—Just drip-drip. Tom Kenamer, Doorkeeper of the House of Representatives in Washington, D. C., is glad he need not rely on this ancient water clock when alerting members of the House that a session is about to begin. The one-handed clock's weights were moved by the difference in balance caused when water dripped from upper to lower container. Kenamer today relies on electric clocks and gongs.

Pompano seldom travel north of North Carolina.—Sports Afield.

WHAT'S GOING ON?—Dean Mosley, 6, and brothers Jerry, 10, at right, and Charles, 13, aren't really up to mischief with that garden hose, in Akron, Ohio.

We Often Forget To Follow Jesus In Family Life

IT is interesting to see how much in the ministry of Jesus is associated with homes and families.

Jesus, who in contrast with John the Baptist, described Himself as having come eating and drinking, would seem to have accepted freely invitations to various homes.

He was at the marriage in Cana of Galilee, and evidently had close contact with Peter's family.

After the famous incident of the little man climbing a tree to see Him, He went home with Zacchaeus.

He was the guest of the Pharisee, who invited Him to the home where the "woman who was in the city, a sinner," with apparently an evil reputation, washed His feet with her tears and dried them with her hair.

This occasioned His striking rebuke to the Pharisee, who for some reason had invited Him in, but had failed in the usual courtesies to a guest.

But the home and family most intimately associated with Jesus was in Bethany, where Lazarus lived with his sisters, Mary and Martha.

These and similar incidents suggest that there were probably many unrecorded occasions of the contacts of Jesus with homes and families.

Parental authority and discipline were probably greater determining factors for all the family than they are today.

Possibly the faith and zeal of the head of the family were not so evident in its members, but of that we have no means of knowing. What we do know is that there is a great lack of family religion today.

Are the parents, the schools or the children themselves responsible?

Whatever factor is responsible, there definitely is a lack of family religion where one might most expect to find it—in the home.

Here's a good spread to have in the refrigerator for use at snacking. Father especially will enjoy it. Cream one-half cup of butter or margarine with one-half cup of crumbled blue cheese; mix in worcestershire sauce and celery, salt to taste. Use as spread for crackers, melba toast or for stuffing celery.

There are 136 million acres of national forests in our 11 western states.—Sports Afield.

Ten Word INTELLIGRAM

Check the correct word.

1. The United States and (Pakistan) (Paraguay) recently signed a mutual defense agreement.
2. Arms from Communist (Poland) (Yugoslavia) recently were shipped to Guatemala.
3. End of segregation in the nation's schools (will) (will not) be realized immediately.
4. Handling toads (will) (will not) give you warts.
5. (No) (some) mammals have feathers.
6. Food (does) (does not) cook faster in water that's boiling vigorously, rather than gently.
7. Tigers are native to (Africa) (Asia).
8. The locks at Sault Ste. Marie, Mich., (do) (do not) handle more traffic than the Panama Canal.
9. A zoo keeps birds in an (apiary) (aviary).
10. It (is) (is not) theoretically possible to build a perpetual-motion machine.

Check your answers, scoring yourself 10 points for each correct choice. A score of 0-20 is poor; 30-60, average; 70-80, superior and 90-100, very superior.

THESE WOMEN!

By d'Alessio

"Face the front of the car, please!"

SPORTS AFIELD

By Ted Kesting

On the farm of naturalist Earle Ehrhart practical game conservation ideas were carried on as a matter of course. Grouse sanctuaries were kept inviolate; there was no overshooting in adjacent areas; the birds were fed in winter. But in spite of feeding, and predator control too, the grouse disappeared—almost overnight.

No signs of epidemic disease nor of poachers' snares could be found; even the predators had vanished. It was hard to believe the grouse had deserted or migrated after the kind treatment accorded them. They must be dead. But a search was made until there was just one place left to look—a farm that had been abandoned 15 years before. This farm was surrounded by a fence of cedar posts, around which a hedgerow 40 feet wide and 15 to 20 feet tall had grown. Weeds, sweet fern, bayberry

patches, blackberries, raspberries, sumac, cedars, pines, sassafras, scrub oaks, apple trees, cherry trees, and many other bird-carried or windblown or animal-planted trees were growing in the hedgerow. Over all like a canopy was a matted growth of grapes. When the search party hacked its way through the outer tangle, grouse, quail and rabbits faded into the dense under-cover in every direction.

For days Ehrhart returned to sit in the snow, covered with a bedsheet parka, observing the most intimate details of wildlife behavior. For us, one of his most important findings was that grouse and quail refused to touch grain scattered inside the canopy. They fed primarily on apples, raisins and aromatic shrub leaves.

In that lush environment, all wildlife had increased far beyond the normal per-acre population. Mice, rabbits and rodents increased in the dense cover; birds were attracted, providing a superabundance of food for the hawks, owls, weasels, foxes and bobcats, taking the pressure of both quail and grouse.

We don't need to be mental giants or experienced scientists to see why the grouse had disappeared. Quite naturally the new environment was more enticing than the old, worn out grouse habitat seven miles away.

As a result of this experience, Ehrhart recast his previous ideas about grouse needs, and reached this conclusion: if landowners, farmers and hunters would plant grape and apple seedlings—reintroduce native fruits and shrubs wherever they have become extinct—Nature would soon have the tools to create a new grouse habitat. Which would mean more grouse—and more hunting!

WHAT'S THE ANSWER?

Q. Whenever I take aspirin I suffer from heartburn. Is there any way to relieve this condition.

A. Yes and it's an easy one. The acetylsalicylic acid, which is the active ingredient in aspirin often causes indigestion. Doctors advise taking 1/2 teaspoon baking soda in 1/2 glass water along with aspirin. Baking soda which is pure mild U.S.P. bicarbonate of soda relieves heartburn and also speeds up the absorption of aspirin.

Ticklers

"Next you'll tell me there is a parking meter around here somewhere!"

HE NEEDS HIS SPEED—Roger Bannister, Britain's speed artist, who recently ran the world's fastest mile in 3:59.4, finds his flashing form is none too fast in New York traffic. The British runner competed with Manhattan's fleetest-footed citizens every time he crossed the street during his brief visit to the United States.

DINOSAURS RULED EARTH FOR 130 MILLION YEARS

Conservationists, protesting federal plans for power and irrigation dams on the Green River within Dinosaur National Monument, increase interest in a strange chapter of America's ancient past.

Dinosaur Monument straddles the Colorado-Utah border where the Green and Yampa Rivers meet. Within its western boundary in Utah lies Dinosaur Quarry, the prehistoric boneyard from which a million pounds of petrified dinosaur bones have been removed since its discovery in 1909. From the bones complete skeletons of many dinosaur species have been reconstructed for permanent exhibit in the Nation's principal museums, says the National Geographic Society.

To create this particular depositary, 40 feet wide and high by 400 feet long, flood or other catastrophe struck down hundreds of dinosaurs at one time about 120 million years ago. A river piled their carcasses against a bank and covered them with sand and silt, which soon turned to stone.

"Terrible Lizard"

Dinosaurs were cold-blooded reptiles that ranged every continent of the earth through the 130-million-year period scientists call the Mesozoic era. Mysteriously, their rule of all creatures ended in extinction at least 60 million years ago.

Man by comparison is a newcomer. His most primitive ancestors date from long after dinosaurs—not more than one million years ago.

The word dinosaur is derived from two Greek words meaning "terrible lizard." It is an inclusive word describing not one but several groups of the reptiles of Mesozoic time. Most primitive were the thecodonts (teeth-in-sockets), ancestors of all other dinosaurs and of primitive birds.

The thecodonts gave rise to the flying reptiles such as the pteranodon (wings-without-teeth). These preceded the two great groups to which the word dinosaur is often limited—the saurischians (lizard hips) and the ornithischians (bird hips). The Greek names tell the story of their basic difference—hip bone structure.

Most of the saurischians walked

on their hind legs and ate meat. Largest and most ferocious flesh eater was the tyrannosaurus (tyrant lizard). Ruling the second half of the age of dinosaurs, it was 45 feet long, stood 20 feet high on its powerful hind legs, and could tear other dinosaurs apart with its large mouth full of daggerlike teeth. Allosaur (leaping lizard) was a fierce flesh eater resembling the tyrant, but was smaller (33 feet) and much earlier in time.

Hay-burners Were Biggest

The lizard-hipped group included the sauropods (lizard-footed), whose many species included the very largest dinosaurs—the brontosaurus (thunder lizard), brachiosaur (large-foreleg lizard), and diplodocus (double-beam). These giants reached lengths up to 80 feet and weights of more than 40 tons. Plant eaters, they lived in swamps to escape the flesh eaters and to let the water support some of their weight.

Moving on four feet, these sauropods had small heads on slender necks and long, whiplike tails. With nostrils above their eyes, they could breathe when all but submerged.

The ornithischians, or bird-hipped dinosaurs, were all plant eaters. Most of them walked on four feet. One of the largest, trachodont (rough-toothed) was a duck-billed species. Triceratops (three-horned face) was a sort of heavy-armed rhinoceros.

Dinosaurs were not all large by any means. Some of the 5,000 different species were no larger than a chicken. Hoplosuchus, an early arrival, was 7 1/2 inches long.

Theories are many as to why the reptile rulers disappeared, leaving only the crocodiles and alligators as descendants. Perhaps disease carried them off. More likely, geological and climatic changes robbed them of their temperate swamps and lowlands. Swamp-grass browsers could not adapt to upthrusting dry land. The flesh eaters lost their source of food when the vegetarians disappeared.

Failures in curing pork are caused by the meat not being thoroughly chilled and by too short a curing period, according to University of Wisconsin meats specialist, R. W. Bray.

One hundred pounds of digestible pasture grass costs only 58 cents compared to one dollar twenty-five cents for hay; and one dollar seventy-five cents for corn.

Tourists Will Find Sanitary Conditions In Wisconsin Resorts

The 1954 vacation season is rapidly approaching, and as has been the case in past years thousands of out-of-state tourists will soon be visiting Wisconsin.

People from all parts of the country have learned that it has much to offer the vacationist—scenic beauty, good fishing, boating, golf, in fact most any recreational activity one might desire.

Nor need our summer visitors worry concerning the sanitary

conditions to be found in the thousands of resorts, motels, cabins, and tourist homes scattered throughout our state. Representatives of the hotel and restaurant division of the state board of health work year-round with the resort operators toward the end that tourists will find the accommodations and the sanitary conditions of our public eating and sleeping places to be of the highest standards.

Since a considerable percentage of our resorts are operated during the summer months only, special attention to sanitation is often required. Accordingly, these facilities are routinely checked and examined. Tests of drinking water are made and waste disposal systems inspected, to insure the health as well as comfort of our tourists and campers.

Safe food, prepared in a sanitary manner, served in a clean environment by clean, physically healthy personnel can also be looked forward to by our traveling public. Each of our thousands of eating places must offer reasonable assurance that these conditions are being met before they are granted a license to operate.

Yes, our summer visitors can rest assured that they will find a wide choice of excellent lodging accommodations in our state. As for the food—we can only warn them, "Watch your waistline."

Metal and bamboo rods should be waxed before you use them in salt water.—Sports Afield.

HERE'S HOW . . .

MAKE UTILITY STEP-LADDERS

A pair of utility step-ladders will find many uses around the home—for cleaning walls, painting, paper-hanging, and general repair work.

The ladder unit consists of two A-frames, made of 1 by 6 lumber, with horizontal 1 by 3's serving as braces and step supports (A). The top horizontal member of the frame is a 1 by 4, to which is attached the top step, one piece of 1 by 14 by 16 (on 2 pieces 1 by 8 by 16).

The base of the A-frame is 35 inches across; the top is 12 inches across. To lay out the job, the craftsman should con-

struct the frames flat on the floor, mark the position of each step, and then nail the 1 by 3 step supports in place. These may be marked off on the frames and thus simplify measurements.

Then the stair treads are screwed to the supports, joining the two frames together.

Since the top will be used as handles for carrying, the top step should be fastened with screws and angle braces.

Drawing (B) shows the completed ladder. A pair of ladders is ideal for use as a scaffold.

"Sorry, Beamish, it's against our policy to loosen up!"

WHAT DO YOU WANT TO KNOW ABOUT BANKING?

If I bank my savings with you, my aunt says they'll work for me—because they'll earn compound interest. Will you please explain what this means?

SAVINGS balances here draw interest—"rent" for our use of depositors' money—not only on deposits but also on interest earned. When you deposit in a savings account here, compound interest helps build up your balance. Why not open an account with us?

Behind The Scenes In American Business

By Reynolds Knight

NEW YORK—The booming chemical industry, which in the past has taken two big bites out of farmers' income, what with synthetic fibers replacing cotton and synthetic detergents replacing tallow-based soap, is about to hand back some of that income.

A long-forecast break in the price of ammonium sulphate, a prime fertilizer material produced by steel companies in coke-oven distillation of coal, will take effect July 1 and apply to the first four months of the fertilizer year. Major producers will cut the price by about \$2 a ton; specific prices vary with shipping points.

An even greater reduction, in terms of the nitrogen which is what the plants want, is contained in the drop from \$128 to \$126 a ton for July and August delivery of nitrogen solutions. These fertilizers sell by nitrogen content. This drop, however, will be rescinded later in the season.

More important over the longer range, but not to be pinpointed to one price decision, is the steady effort of the chemists to find uses for inedible fats that once made soap. In the last half-year more than 120 million pounds went into additives for stock and poultry feeds and 95 million into chemical production, largely plasticizers.

WIDENING MARKET—Bathrooms and kitchens of waterproof clay tile may soon be standard in even the lowest-priced homes as a result of a series of research projects being conducted at Rutgers University, New Brunswick, N. J.

Projects include possible prefabrication of large panels of clay tile, which could be installed in a standard bathroom in less than an hour; pressure-sensitive adhesives, which a tile setter could fix in place merely by stripping a paper backing from the individual tiles and pressing them in place; a tile-cutting tool small enough to fit in a tile setter's pocket, to replace the cumbersome gadget he now uses; and improved grouts. Grout is the material forced between tiles to make the whole wall or floor equally impervious to water.

GAS TREND UP—Although more than 14 million U. S. homes use gas heating equipment, 33 million have gas ranges, and 17 million have gas water heaters, demand for these products will remain high for the next three years, says the Gas Appliance Manufacturers Association.

Continuing high home construction, and modernization of existing homes with emphasis on better kitchen and laundry facilities, and basement utilization, are expected to bring this about. Of the million new houses to be built yearly, GAMA believes some 700,000 will have gas central heating systems or gas room heaters. Most of these homes, if not all, will probably use gas for water heating and cooking.

Replacement of existing ranges during remodeling of homes will account for the sale of hundreds of thousands of these appliances, GAMA forecasts. Demand for gas water heaters in modernizing is expected to be particularly large because addition of bathrooms and modern laundry equipment calls for better hot-water-producing facilities.

BITS O' BUSINESS—The barometric paperboard sales chart signals an upturn: mills have moved up to 91 per cent of capacity. This is below the year-ago ratio, but capacity is higher now. . . . The wholesale price index is stationary despite declines in hog prices and a halt in the rise of hides, both important indicators. . . . Weavers of heavier cotton cloths may extend the traditional week's lay-off over July 4 to two weeks. . . . Department store sales are down 3 per cent for the year.

INTERLOCKED ECONOMY—Local governments in the South have been attracting industry for some years by floating bond issues—tax exempt, of course—which were used to build plants or other facilities which manufacturers were then invited to use. This has been looked upon as unfair competition on a regional basis, and Northern and Eastern members of Congress proposed that the current revision of the income tax law contain a prohibition against it.

To their surprise, the most vociferous opponent was no one from the South, but Austin Tobin, executive director of the Port of New York Authority. He protested that such a provision would put an end to most financing by public port authorities. Pacific Coast seaports and the Airport Operators Council seconded his objections.

The attempt to write a tax section that would hit one part of the country and miss the others has been dropped.

Here's the Answer

Keep Piggies Cool!

SUMMER sun is tough on both man and beast. A simple shelter for pigs or calves will keep them more comfortable on scorching hot days. Also, they'll hold their weight better.

An old wagon wheel assembly is an excellent start for a portable shelter. The top should be made of

Masonite 1/4" Tempered Preswood fastened to framing and mounted on the wheel assembly.

The same principle can be used in erecting a permanent shelter, with the weather-resistant top fastened to posts. Tempered Preswood is an all-around farm fix-up and paneling material with dozens of uses. Among them are liner for truck or wagon boxes, liner for grain bins, dividers in storage bins, workbench tops, new facing for doors, room dividers, walls for new rooms.

TINY "PEACE" BRIDGE—Sole link between Communist China and embattled French Indo-China is this tiny "international" bridge at Moncay, Viet Nam. Natives in foreground, have a constant reminder of the might of Red China in flags and posters heralding Red Premier Mao Tse-tung, which are flung just across the bridge.

AWARDS PRESENTED TO LOCAL SCOUTS AT CAMP

Several Kewaskum Boy Scouts spent last week at Camp Shaghnapi on Lake Winnebago. Awards were presented Friday night during court of honor ceremonies for more than 100 Scouts, Badger Council leaders and guests.

Merit badges went to four Ripon leaders, two from Fond du Lac and one from West Bend. Nine were given first class awards including

Jim Bradley and Glenn Rimmel of Kewaskum. Among the 19 winners of second class awards were Ted Miller and William Hahn of Kewaskum. Seven scouts were presented with tenderfoot awards.

GROWING BETTER CROPS

Quality Crops for Quality Foods

Probably few people traveling through our beautiful farmland these harvest months realize that more than half our vegetable tonnage and much of the fruit reach our tables as canned food.

The grower of these crops is the first link in a great chain ending with the consumer, the final judge of the effort put into the product forged by the rest of the chain. And last year U.S. consumption reached a peak of 102.2 pounds of canned food per capita.

On an average, about 80% of all tomatoes and sweet corn is canned, as well as about 75% of the green peas and beets, half the asparagus, nearly 60% of our cherries and almost half the peach, pear and apricot crops, according to National Canners Association findings.

In one important farming state, Pennsylvania, it has been estimated that 80-85% of the five major commercial vegetable crops is sold to food processors for marketing.

Consumer Is King
As Dr. Amihud Kramer, University of Maryland horticulturist, points out, "It is the consumer who calls the tune, through the links of the retailer, wholesaler, buyer, processor, and determines the kind of product he wants the grower to supply."

"When the processor advises the grower as to variety to be raised, or the stage of maturity at which he wishes the crop harvested, he merely transmits to the grower the consumer's preference as reflected through consumer complaints or sales analyses."

Though modern food processing can work miracles, high quality of pack is basically dependent on high quality of the fresh or raw product.

"If the quality that reaches the factory platform is clean, free from insects and diseases, neither underripe nor overripe," Kramer says, "the processor has an excellent chance of preserving all that excellence, with the ultimate results of satisfied customers, increased sales and increased demand for acreage."

"In many instances, as, for example tomatoes, asparagus and

Good harvesting practices help to insure the profit in a crop.

apples, good cultural and harvesting practices result not only in top quality but top yields as well," the horticulture specialist concludes.

Cutting Waste
The fact that canned food prices have stayed so low is due partly to good raw product quality. It takes costly factory labor and time if unusable ears of corn, mashed or broken beans, sunburned or immature peppers, pitchfork-damaged squash, tomatoes that are overripe, off-color or injured by pests, disease or pickers, must be "weeded out."

Not to mention field debris. Much of this can be kept down by closer supervision of harvest help, careful handling and transportation.

Though the processor bears the direct loss, today's farmer, like any other businessman, knows that in the end everyone foots the bill for waste, just as everyone are sooner or later profits by improved crop and factory production resulting in benefits to the consumer.

New engine power!
New operating economy!

New Chevrolet Trucks...
do more work per day... more work per dollar!

You save hours on the road. Thanks to greater acceleration and hill-climbing ability, you can save time without increasing your maximum road speeds.

You save extra trips. That's because of extra load space. New pickup bodies are deeper, new stake and platform bodies wider and longer.

You save time on deliveries. New truck Hydra-Matic transmission saves time and effort at every stop. Optional at extra cost on 1/2-, 3/4- and 1-ton models.

You save on operating costs. The "Thriftmaster 235" engine, the "Loadmaster 235," and the "Jobmaster 261"

(optional on 2-ton models at extra cost), deliver greater horsepower plus increased operating economy.

You save with lower upkeep, too. There are heavier axle shafts in two-ton models, bigger clutches in light- and heavy-duty models, stronger frames in all models.

And your savings start the day you buy. Chevrolet, you know, is America's lowest-priced line of trucks!

Come in and see all the wonderful new things you get in America's number one truck.

Now's the time to buy! Get our BIG DEAL! Save with a New Chevrolet!

cancer
man's cruelest enemy
strike back

"CANCER" is an unpleasant word. It's easier not to think about it—to turn the page, to pass on.

MOST FOLKS who see this ad will do just that...

YOU ARE DIFFERENT. The fact that you're still reading this proves it.

PERHAPS you have a special reason of your own for being interested in the fight against cancer. Cancer may have taken away someone whom you loved. It's not unlikely, for cancer strikes one out of five of us. The young. The old. The strong no less than the weak.

LAST YEAR, Americans contributed more than ever before to the American Cancer Society. But still not enough. Not nearly enough for the struggle that must be waged if this implacable enemy is to be conquered for good—if we are to make cancer, like so many once-dreaded diseases, only an unpleasant memory in man's long and victorious struggle against his ancient enemies.

THIS YEAR—please—give more generously than ever. For your help is needed more than ever. Won't you please clip the coupon now—?

Give
American Cancer Society

ing was by "Tiny." On Sunday the Weddigs entertained again in honor of the occasion with relatives as guests.

—Mr. and Mrs. Herman Eichstedt and son Calvin of West Bend visited Monday afternoon with the Walter Engelmanns.

—Mr. and Mrs. Art Raasch of Milwaukee visited the past week with relatives. Art, who used to bring his Milwaukee ball team here frequently for exhibitions, is seeking a softball game with a Kewaskum team of old timers for a home and home series.

—Miss Mary and Dennis Blagen, former residents now residing in San Francisco, Calif., arrived here Tuesday for an extended visit with friends.

—Members of the Lay Lumber ladies bowling team and their husbands attended the Braves-Cubs baseball game at Milwaukee Tuesday night. Team mem-

bers include Mmes. Bill Martin, Lee Honeck, F. E. Nolting, John Van Blarcom, John Stellpflug and Ted Rohlinger.

—Several Kewaskum Girl Scouts are spending a week at Camp Evelyn Heronymus this week. Others will attend camp later on various dates.

—Mr. and Mrs. Ralph Hoffmann and daughters and Mrs. Janet Raasch of Milwaukee visited Sunday with Mrs. Aug. C. Hoffmann and also attended the Beechwood firemen's picnic.

—YES, it's Miller's at Kewaskum for quality home furnishings at most reasonable prices. Open daily until 6, Fridays until 9 p. m. Free deliveries.

—Miss Shirley Pals of Washington, D. C. arrived here Thursday morning to spend a week's vacation with her parents, Mr. and Mrs. Louis Pals. Miss Pals is a teletype operator with the F. B. I.

Prepare Beautiful Lawn Six Weeks Before Sowing

A well planned and prepared lawn properly maintained adds beauty to any home.

Fine lawns as well as fine homes should be well planned. When these plans are properly carried out, a new lawn should last as long as the home it beautifies.

The best seeding time for new lawns is between late August and the end of September. If seeded in spring, it should be done early. Don't sow during the weed-growing summer months. Lawn construction should begin six weeks or more before seeding. It is best to start that far in advance to allow for earth moving, grading, settling, weed destruction and seed bed preparation. In grading don't bury top soil under unproductive subsoil. Distribute it or blend it on surface to a depth of 4 to 6 inches or more.

Test topsoil for acidity and apply pulverized limestone if needed. Apply a complete lawn fertilizer high in nitrogen, also containing phosphorus and potassium in lesser amounts. Mix both lime and fertilizer into the top few inches of soil.

The price of best quality seed is always a good investment. Your seed supplier will help you in selecting type of lawn mixture with best record in your locality. High quality seed of right kinds will always develop into a more permanent lawn more resistant to weeds and drought.

Before sowing, recultivate surface if necessary but be sure to leave a firm seed bed. Do not bury seed more than 1/4 to 1/2 inch as this may retard or prevent germination. Scratch surface and roll lightly after sowing to press

For a DeLuxe Lawn Keep These Things in Mind

1. Begin with a good seed bed.
2. Fertilize soil generously.
3. Sow top quality seed.
4. Water adequately as required.
5. Mow regularly and properly.
6. Feed, feed, feed.

soil around seed and help make soil moisture available.

Protect a new planting on slopes by pegging down a covering of light-weight, coarse burlap or by applying a light covering of straw. The burlap can remain or be removed in ten days or two weeks after the grass shows through.

If necessary, small lawns may be hand watered, but it is usually better on larger lawns to depend on natural moisture to start growth. If rainfall then fails, grass should be kept alive by sprinkling with a fine spray, perhaps as often as three or four times daily. The surface should not be permitted to dry out. Mow regularly with mower set to 1 1/2 to 2 inches cutting height.

Good lawns are obtained only from carefully selected top-quality seed. They are built from the ground up—not from the surface down after a poor start. Costly later operations can be avoided if the new lawn is seeded right, fertilized adequately and managed properly.

Special Announcement

THIS YEAR, AS WE HAVE DONE IN THE PAST, WE ARE CLOSING DOWN FOR PLANT AND MACHINERY MAINTENANCE FOR A PERIOD OF ONE WEEK. THAT MEANS OUR PLANT WILL BE CLOSED FROM JULY 5 THRU JULY 10.

PLEASE ARRANGE TO GET SPECIAL AND REGULAR WORK TO US IN TIME TO BE PROCESSED AND RETURNED TO YOU BEFORE WE CLOSE DOWN. MANY THANKS FOR YOUR CONSIDERATION.

A Famous American Ship

The PRESIDENT COOLIDGE, famed round-the-world liner, was the largest American merchant ship to be lost in World War II, according to the American Merchant Marine Institute. She was built in 1931 for trans-Pacific service. When launched the PRESIDENT COOLIDGE was the largest ship ever built in the United States. Her loss in World War II was doubly tragic because she struck an American laid mine in an early war snafu. Only two of the nearly 5,000 troops on board were lost. Strategically her loss was serious. Foreign ships were not available, and America had very few liners of this size. If the situation was bad then it is critical now. America's passenger ship fleet has almost disappeared from the seas. Only three major passenger liners have been built since the war.

JOHN E. KILMER

HOSPITALMAN, US NAVY

KOREA... 13 AUGUST 1952 HOSPITALMAN J. E. KILMER DISPLAYED GALLANTRY, ABOVE AND BEYOND THE CALL OF DUTY, WHILE ENGAGED IN THE DEFENSE OF A VITALLY IMPORTANT HILL POSITION. FOR THIS, HE WAS AWARDED THE MEDAL OF HONOR

WITH NO CONCERN FOR HIS OWN SAFETY, HE EXPOSED HIMSELF TO INTENSE ENEMY MORTAR AND ARTILLERY FIRE TO TREAT AND EVACUATE THE WOUNDED.

HEARING THE SOUND OF AN ONCOMING ARTILLERY SHELL, HE THREW HIMSELF ON TOP OF A WOUNDED MARINE. THE MARINE'S LIFE WAS SAVED, BUT KILMER WAS FATALLY WOUNDED...

Thos. Nieman

WHO WON?—This "Racetrack Hat," fashioned of burnt leghorn straw keeps the sun out of the eyes, all right, and also the painful sight of your horse coming in last. "Emme," New York millinery designer, used rope to trim the summery creation.

Factual News About The Eyes

Tears Have A Purpose

The human eye is covered by a film of tear fluid all the time, according to the Better Vision Institute. This fluid contains a germ-killing substance called lysozyme, which was discovered by Sir Alexander Fleming, the discoverer of penicillin. He tried to make a drug from it, but found that it was not very effective in other parts of the body. However, tears perform an important function in fighting germs within the eye. And it is believed that they may provide nourishment to the cornea, since this "watch crystal" of the eye has no blood vessels, while tears contain salt, sugar, and other foods.

When you blink the tear fluid is spread over your eyelids. The average blink takes only about one-fortieth of a second.

The tear fluid in the eye is usually held in place by another film of grease produced by glands between the eyelashes. However, when you cry you produce so much tear fluid that it breaks through the grease and rolls down your cheeks. The average daily tear production measures about half a thimbleful, but crying may bring this up to more than a whole thimbleful. You can sometimes control an impulse to cry by a rapid succession of blinks, thus driving the tears through channels into your nose.

USES TO WHICH STATE PUT FARM LANDS, 1950

Almost exactly 33 million acres of Minnesota terrain classified as farm land are divided into 179,101 farms averaging 184 acres each, the largest in the north-west, smallest in the east central. About 20 million acres were in harvested cropland, 1,600,000 most numerous, general farms

acres in cropland used for pasture, another million-plus in idle and fallow cropland, 3,400,000 in woodland pasture, half that in plain woodland, 2,600,000 in other pasture and a like amount in "other land." Dairy farms are next, then livestock (other than dairy and poultry), cash grain, miscellaneous farming, and poultry.

BARGAINS IN STEEL—Steel industry analysts think the operating ratio has hit bottom, and will turn up after Labor Day. That's good news for the nation as a whole, but it is likewise good news for the small individual user that there is still plenty of steel to be had at bargain prices. Warehouses, which serve such

customers, can get steel from users who bought more heavily than they should. It is to the interest of all concerned to move this steel to persons who need it. Once it gets into some usable form, it is off the steel market as

Biologists consider bass the warriest fish.—Sports Afield.

MARINE MILESTONES... this week—'Tin Tavern, birthplace of the Corps'...

REMEMBER?—If there's gray in your hair, and the kids call you "Grandpa," you do. It's Pola Negri, star of the silent movies, and as glamorous as ever to the young in heart of yesteryear. She recently arrived in New York from Hollywood, on a rare business trip.

STRICTLY FRESH

REPUBLICANS in Ripon, Wis., are offering \$1 each for elephant jokes, which they'll publish as part of the centennial celebration of the GOP. Careful, boys—where jokes are concerned, people have memories like elephants.

Fellow in Memphis, Tenn., lost his mustache during an abdominal operation, says it won't grow back, and is suing for \$15,000. He's one patient who really had a "close shave."

Enthusiastic salami salesman in San Francisco talked about his product so much that a client

beat him over the head with one of the delicacies. You never saw sausage angry grocer.

Member of Canada's Parliament from Scottish-dominated Cape Breton refused to commit himself as to whether bagpipes are "a weapon or a musical instrument." There's a question?

A home for her cat and kittens will get some politician a vote, advertises a woman in Carson City, Nev. Election officials will have cat-fits about this.

HAIR-BREADTH HARRY

OUR DEMOCRACY

by Mat

"COUNTRY FRESH"

IN THE OLD DAYS, DISTRIBUTION OF "COUNTRY FRESH" TRUCK-FARM PRODUCE WAS LIMITED TO NEARBY COMMUNITIES AND THE LOCAL GROWING SEASON. TODAY, THE BOUNTY OF THE SOIL IS SHARED MORE WIDELY AND THE MARKETING OF PERISHABLE PRODUCE STABILIZED, BECAUSE OF PACKAGING INNOVATIONS, MODERNIZED TRANSPORTATION AND OTHER DEVELOPMENTS.

FROZEN FOOD PACKAGES, FOR EXAMPLE, APPROXIMATED 5 PER CENT OF ALL RETAIL FOOD SALES LAST YEAR. A LARGE PART OF THE FUNDS THAT BUILT THIS HUGE NEW INDUSTRY CAME FROM THE SAVINGS OF THE VERY PEOPLE BENEFITING FROM THIS IMPORTANT CHANGE IN THE LIVING HABITS OF OUR DEMOCRACY.

The Pennant Races Will Be Close Ones

Although the major league baseball season is not yet completed, it has already been demonstrated in both leagues that baseball fans will be treated to two exceptional pennant races in 1954. This was not the case last year, when the New York Yankees and Brooklyn Dodgers wrapped up pennant honors relatively early in the season.

Though unwise to make baseball prediction at this early stage of the season, we go on record as saying the pennant races this year will be close ones, and that the decision in each league will probably not come until late September.

In the National League, when the season was one-fourth completed, only two games separated the first and seventh place clubs. This is an exceptional situation, proving there are a number of strong teams competing for pennant honors.

In the American League there have been at least two surprisingly strong showings which should stimulate interest in that league. The Baltimore Orioles have proved stronger than last year's St. Louis Browns and the Detroit Tigers have been one of the early-season surprises of the league. The Boston Red Sox and Washington Senators have not played up to expectations but the season is still young and their records will probably improve.

Nevertheless, it appears that Chicago, Cleveland and, possibly, Detroit and Boston, will give the Yankees competition in the American League pennant race. In the National League, anyone of a number of teams could win the flag. St. Louis, New York, Philadelphia, Milwaukee, Brooklyn, and even Cincinnati are showing signs of causing the favored Dodgers trouble. Altogether, it looks like a good baseball year for 1954, and we are not so sure that the World Series will once again, this year, be a subway series—as was predicted in March.

Sarah Anne's COOKING CLASS

Now You Can Diet and Eat Dessert Too!

Here is pleasure without pounds, a meal which brims with flavor and yet is amazingly low in calories! The broiled chicken is savory in a sweet and pungent sauce. The green peas, prepared with a touch of basil, are tender and sweet. The salad of tart, juicy grapefruit sections on crisp greens provides the proper amount of flavor contrast. Bread sticks allow for crunchy nibbling. You can enjoy all this and still have dessert—a smooth chocolate pudding parfait—because there are only 500 calories in this delicious meal. Skip the bread sticks and there are just 400!

The secret to such fine eating on a diet is this: Both the sweet and pungent sauce and the dessert were prepared with a new liquid concentrated sweetener, Sweeta, that contains not a single calorie. Just introduced as an aid to the millions of Americans with weight problems, this dieter's delight comes in a convenient squeeze-a-drop bottle. One drop equals one-half teaspoon of sugar; one-fourth teaspoon, as in dessert recipe below, equals one-half cup of sugar.

- #### Chocolate Pudding
- 3 tablespoons cornstarch
 - 3 tablespoons cocoa
 - 1/4 teaspoon salt
 - 2 cups skim milk
 - 1 teaspoon vanilla
 - 1 Dash cinnamon
 - 1/4 teaspoon Sweeta
- Mix cornstarch, cocoa and salt with 1/4 cup of milk until smooth. Meanwhile scald the remaining milk in double boiler. Pour a little of the scalded milk into the cornstarch mixture and blend smooth. Stir this slowly into remaining scalded milk, then cook, stirring constantly, until the pudding is thick and smooth. Cover the double boiler and cook 20 minutes. Stir occasionally. Cool slightly, then add Sweeta and vanilla, stirring in well. Cover and allow pudding to chill. Arrange with white topping in sherbet or parfait glasses.
- #### White Topping
- 1/2 cup cold water
 - 1 tablespoon lemon juice
 - 1/2 cup nonfat dry milk solids
 - 1/4 Dash almond extract
 - 1/4 teaspoon Sweeta
- Place water in bowl. Add lemon juice, Sweeta, almond extract and milk solids. Beat with rotary beater or electric mixer until thick as marshmallow fluff. This topping will stay light and fluffy for about 30 minutes.

FLYING TIGER—No wonder Umpire Nestor Shylak is confused. He's used to ducking high flies, but not "flying tigers," and in this case, it's Detroit Tigers' 2nd. Baseman Frank Bolling who's floating through the air with the greatest of ease. Bolling took off after a wild throw from the plate and this aerial play resulted, during a game with the White Sox at Comiskey Park in Chicago, which the Tigers snagged "on the fly," 3-2.

SHEEP SHEARERS—"Ethel" and "Albert" make life easy for Groundskeeper John Gery at Breardon Field, home of the Allentown, Pa., Cardinals. The "lamb choppers" need no gas and oil, as does a power mower, and keep the grass down rain or shine, according to Gery.

To keep a tree healthy, it should be regularly observed for signs of disease or insects and lack of fertilization, as well as broken limbs that may cause rotting, or even be a hazard, says the National Arborist Association.

The transplanting of large-sized trees has become so efficient, according to the National Arborist Association, that trees of ten up to 40 feet or more in height are moved from one location to another without damage.

Surprising Air Record

A West Coast business man recently flew from Los Angeles to New York, in a conventional (propeller) fighter plane, in four hours and twenty-four minutes. This cracked the old propeller-plane record by some twenty-eight minutes.

The surprising thing about this new record is that it is only sixteen minutes short of the jet record between Los Angeles and New York. Joe De Bonna piloted the F-51 on the record crossing—the plane being owned by actor Jimmy Stewart.

He told reporters he flew at 33,000 feet most of the way in an effort to ride the jet stream, a stream of fast-moving air which adds considerably to the speed of aircraft flying within it. However, he was not able to find the jet stream, and his new record was made without aid from the elusive stream.

It occurs to us that if the F-51 had been able to take advantage of the jet stream, then it would probably have cracked the jet record for a trans-Atlantic crossing. This will surprise some, who have come to the conclusion that propeller-driven aircraft are synonymous with the horse-and-buggy. On the contrary, propeller-driven aircraft, if flown at jet altitudes, are capable of speeds very close to those now being attained by jets.

CLEAN FIREPLACE WITH CAUSTIC SODA SOLUTION

Cleaning smoke stains from fireplace masonry can be done quickly and easily with the following method.

Mix 1 1/2 pounds of caustic soda with one gallon of hot water in a galvanized steel pail. Then fill another pail with clear water and go to work. Apply the mixture to stained areas with a fiber floor-scrubbing brush and rinse the washed surfaces twice with the clear water. Be careful not to splash caustic solution on any painted surfaces during the cleaning process.

SWEETEST MUSIC ON EARTH

Nature arranges things nicely—she always gives us the kind of voice that our own ears enjoy hearing.

"Hot Flashes Stopped" or strikingly relieved

in 63-80% of cases in doctors' tests

• If you're miserable from the "hot flashes," and accompanying irritable, restless feelings of "change of life"—you may be suffering unnecessarily!

• For... in tests by doctors... Lydia Pinkham's Compound and Tablets brought relief from such functionally-caused suffering to 63% and 80% (respectively) of the women tested! Complete or striking relief!

Yes! Research has proved these medicines... thoroughly modern in action... has shown you where to look for relief from those distressing, nervous, "out of sorts" feelings of mid-life change!

So... get Lydia E. Pinkham's Vegetable Compound—or new, improved Tablets with added iron! (Wonderful, too, for the functional pains of menstrual periods.)

It acts through a woman's sympathetic nervous system to relieve distress of those awful "heat waves"!

HERE'S THE ANSWER—The Mosley boys were just "watering the flowers." Their father, Charles Mosley, turned the family's home into an Akron showplace when he painted the exterior with a "garden" of red and yellow tulips.

Have you tried eggplant casserole or corn omelet? Your family will like upside down apricot cake, too. In fact they will enjoy all these foods.

- #### Eggplant Casserole
- 1 eggplant
 - 1 can shrimp or use fresh shrimp
 - 2 medium sized tomatoes
 - 2 tablespoons butter
 - 1 cup bread crumbs
 - 1 small onion
 - 1-2 cup chopped celery
 - Worcestershire sauce
 - Salt and pepper
 - 3 eggs
 - Crushed potato chips
- Boil eggplant until done; drain. Chop fine all other ingredients, season with salt, pepper, and Worcestershire sauce to taste. Mix in beaten eggs, add eggplant which has been mashed. Bake in a greased casserole in an oven 400 degrees for 20 minutes. Sprinkle crushed potato chips over the top and brown.

- #### Corn Omelet
- 1-2 cup fresh or canned corn
 - 1 egg
 - 1-4 teaspoon salt—pepper
 - 2 tablespoons cream
 - 2 tablespoons butter
- Add well beaten egg yolk to chopped corn. Add salt, pepper, and cream. Fold in stiffly beaten egg white. Heat omelet pan, and add butter. Pour in corn mixture and cook until set and well browned. Serve at once.

- #### Spoon Bread
- 2 cups corn meal
 - 2 cups boiling water
 - 1-2 cups milk
 - 2 teaspoons salt
 - 3 tablespoons butter
 - 3 large eggs
- Sift the meal twice and stir in boiling water, add butter and salt. Add milk and eggs which have been beaten light. Pour in a buttered casserole and bake 40 minutes in an oven 350 degrees. Serve hot from the dish with a spoon and plenty of butter.

- #### Apple Dessert
- 1 egg
 - 3-4 cup sugar
 - 1-3 cup flour
 - 1-4 teaspoons baking powder
 - 1-8 teaspoon salt
 - 1-2 cup chopped nuts
 - 1-2 cup chopped apples
 - 1 teaspoon vanilla
- Beat eggs well. Add sugar, beat until creamy. Sift dry ingredients and add to egg mixture. Fold in nuts and apples. Add vanilla. Pour into a paper lined pan. Bake 30 minutes in an oven 325 degrees. Serve warm or cold with ice cream or plain cream.

- #### Squabs in Casserole
- 6 squabs
 - 1 sprig parsley
 - 1-2 carrot
 - Salt, pepper, paprika
 - 1 onion
 - 1 bay leaf
 - 12 mushrooms
 - 1 tablespoon catchup
 - 2 tablespoons sherry wine
 - 2 cups soup stock
- Season whole dressed squabs with salt, pepper, and paprika. Stuff, if desired. Place in casserole with vegetables, add soup stock. Cover and cook slowly 1 hour in oven or until tender and brown. Pour sauce over squabs, return to oven and when hot, serve in the casserole.

- #### Sauce
- 1 tablespoon butter
 - 1 tablespoon flour
- Heat butter, add flour, when light brown, add the sauce from the squabs. Cook until smooth. Remove from heat. Add mushrooms, sherry and catchup.

- #### Tuna Loaf
- 2 tablespoons gelatin
 - 1-2 cup cold water
 - 1 hard boiled egg sliced
 - 1-3 cup lemon juice
 - 2 7-oz. cans tuna fish (not graded)
 - 1 cup mayonnaise
 - 1-2 teaspoon salt
 - 1 cup chopped celery
 - 1-4 cup chopped green pepper
- Soften gelatin in cold water. Dissolve over hot water. Break up tuna, add all ingredients to the tuna. If desired egg slices may be arranged in a design in bottom of greased salad mold, 5"x9" loaf pan. Combine gelatin and tuna mixture. Pour into mold. Chill and serve on salad greens.

- #### Apricot Upside Down Cake
- 1 stick butter
 - 1 cup brown sugar
 - 1-2 cup nuts
 - 3 eggs
 - 1 cup sugar
 - 1 cup flour
 - 1 teaspoon baking powder
- Put butter and brown sugar in a heavy pan. Cook together until sugar is melted. Then arrange nuts and apricots, (round side down) in butter mixture. Cover with cake batter and bake in an oven 350 degrees-for 30 minutes. When the cake is cold cut in squares and serve with whipped cream.

- #### Cake Batter
- Beat egg yolks, add sugar and cream. Fold in stiffly beaten egg whites. Fold in flour which has been sifted with the baking powder.

ENGLISH "PAPOOSHKA"—This terry cloth beach jacket, designed by Joy Ricardo of London, has a hood which doubles as a carryall for books and magazines for the beach, or as protection for rainy moments. In pink and white, there's a matching make-up case on a string, so the wearer can't be "hoodwinked" for lack of adornment at the right moment.

Major Benjamin G. Lee

UNITED STATES MARINE CORPS

MAJOR LEE WAS AWARDED THE NAVY CROSS FOR EXTRAORDINARY HEROISM IN ACTION AGAINST THE ENEMY WHILE SERVING WITH A MARINE INFANTRY BATTALION IN KOREA ON 27 MARCH 1953.

HE VOLUNTEERED TO ASSUME COMMAND OF A GROUP OF MARINES WHO HAD GAINED A PRECARIOUS HOLD ON AN IMPORTANT POSITION FAR FORWARD OF THE MAIN LINES.

HE HAD TO MOVE ACROSS 1000 YARDS OF TERRAIN... THROUGH VICIOUS ENEMY MORTAR AND ARTILLERY FIRE... IN ORDER TO REACH HIS OBJECTIVE.

UPON REACHING HIS OBJECTIVE, HE PROCEEDED TO REORGANIZE THE MEN IN DEFENSE OF THEIR POSITION. JUST AS THE SUCCESS OF THE OPERATION WAS ASSURED HE FELL MORTALLY WOUNDED.

REDUCE PILES' SWELLING WITHOUT SURGERY!

NEW STAINLESS FORM now ALSO AVAILABLE!

In 90% of cases of simple piles—tested by doctors—amazing Pazo Ointment stopped bleeding, reduced swelling, healed cracking... shrunk piles WITHOUT SURGERY! Pain was stopped or materially reduced. Pazo acts to soothe, relieve itching instantly. In tubes, also modern Suppositories at all druggists. Get Pazo's today for wonderfully fast relief right away.

New Alice Crowned

Introducing Miss Mary Ellen McCabe—our new Alice in Dairyland, official hostess of Wisconsin. This tall, brown-eyed 19 year old brunette received her crown from Mary Ellen Jenks, retiring Alice, Saturday, June 26, in Monroe, Wis. The coronation ceremony marked the climax of the state-wide search for our 1954 Alice. She is the daughter of Mr. and Mrs. Laurence McCabe of Lady-

smith. She has a brother James, 11, and a sister Betty, 8. Her father is an employee of the Ladysmith Milk Products Co-operative. During high school in her home town, Mary Ellen was active in many organizations, among them Girl Scouts, Future Homemakers of America, choir band and forensics. In 1952-53 she was elected national president of Future Homemakers of America. Other honors included class salutatorian, DAR award, A rating in State Forensics meet and she attended the National Citizenship conference at Washington, D. C. In addition she was voted outstanding junior girl at Ladysmith High school. Miss McCabe has just completed her freshman year at Wisconsin State college, Eau Claire. A speech major, she was elected secretary of her class and has been active in the College Players and other organizations. When not in school, our new Alice has worked as a receptionist, model, radio traffic manager, directed radio plays, delivered television commercials and worked in the college speech department. Having a crown on her head is not new to this 5'8" 125 pound beauty. She is presently reigning queen of the Northland Mardi Gras.

Mary Ellen began her duties as Alice in Dairyland the first of July. After personal appearances at Fourth of July celebrations in Spar-

ta and Racine she will fly to New York. Here she will extend greetings from the state to national leaders and the delegates to the International Lions convention. In August Alice in Dairyland will attend the Wisconsin State Fair where she will be the official hostess. Mary Ellen will continue her in and out of state appearances for the next 12 months, bringing news of Wisconsin, its people and its wonderful dairy products to the entire country and a better ambassador would be hard to find.

Eighty Attend Odekirk Family Reunion Sunday

Eighty descendants of the Odekirk family held a reunion Sunday at the home of Mr. and Mrs. Robert Anderson near Campbellsport. This site is the homestead of Mrs. Anderson's great-grandfather, John Odekirk, who came here from New York by oxen and covered wagon and settled in this area in 1859.

William Odekirk of Auburn Lake was the oldest member of the clan present and Michelle Denzin, infant daughter of Mr. and Mrs. Herman Denzin of Waupun, was the youngest member of the family at the reunion.

Going the greatest distance for the affair was Miss Eunice Odekirk, X-ray technician at San Jose, Calif., and Sgt. John C. Odekirk of Victorville, Calif. Honored at the gathering was Mrs. Anderson's father, Ervin J. Odekirk, Sr., who observed his birthday anniversary Sunday.

Others attending the reunion were from Skokie, Ill., Racine, Milwaukee, Sheboygan, Plymouth, West Bend, Waupun, Kewaskum, New Fane, Rosendale, Campbellsport and Fond du Lac.

The next reunion will be held in 1965 at the Anderson home on the last Sunday in June.

COUNTY FAIR DATES JULY 29 TO AUG. 1 INCLUSIVE

The 1954 Washington county fair dates are only a month away. The fair will open on Thursday, July 29, and close on the following Sunday. The premium books are available to any one wishing to have a copy. Phone West Bend 502, or send in your request for a copy.

Red Cross Holds Annual Meeting and Election

About 100 persons attended the annual dinner meeting of the West Bend chapter of the American Red Cross Monday evening at the Fifth Avenue Methodist church in West Bend.

New members elected to the board of directors for a term ending in 1957 were: Robert Rolfs, Jr., Ted Griepentrog, David Rolfs, the Rev. H. W. Baumer, Dr. James Baumgartner, all of West Bend; Margie Klein of Barton; Fred Miller of Kewaskum, and Mrs. Clem Mayer of Jackson.

Other highlights of the meeting included an address on "Functions of the National Board of the American Red Cross" and a review of the West Bend chapter's activities during the past year. The speaker was Philip Robinson, Milwaukee, member of the National American Red

Cross Board of Governors. Charles Sparks, Kewaskum, extended the invitation to hold next year's annual meeting in this village.

Entertainment was provided by the Junior Red Cross Minstrel singers of Newburg. The nominating committee included R. D. Ziegler, chairman; C. A. Collins, Mrs. O. P. Klein, Luke Kauth and A. C. Kiecklauer, Program chairman was Lester Schutt and the business session was under the direction of F. W. Bucklin, chapter chairman. Bucklin lauded Charles Sparks for his outstanding record in the fund raising campaign.

BALL TEAM SAYS THANKS

The Kewaskum softball team of the Cross Country league wishes to thank all the merchants and others who donated prizes toward their dance held at the Opera House last Wednesday night, also all who attended and helped make it a success.

KEWASKUM VETERINARIAN PASSES STATE BOARD EXAM

Dr. H. J. O'Connell, chief state-federal veterinarian, has announced that 76 applicants passed the state examination for license to practice veterinary medicine in Wisconsin. The combined written and oral exam was given June 21 and 22 in Madison.

These candidates, graduates of the 6-year veterinary medicine course, were examined by the Wisconsin Board of Veterinary Examiners. The board members are: Dr. T. H. Ferguson, chairman, Lake Geneva; Dr. G. B. Wrigglesworth, Eau Claire and Dr. L. J. Swanson, Bonduel.

Included in the list of newly-licensed Wisconsin veterinarians is Charles J. Ogi, Kewaskum.
