

Adjourned Meeting of New High School Dist. Held July 21

The meeting was called to order by Paul Landmann, president of the school board, with 59 electors present.

Minutes of the annual meeting were read by the clerk, Clifford Stautz. It was moved by Edward Miller and seconded by Ray Schaefer to approve the minutes as read. Motion carried.

It was moved by L. N. Peterson and seconded by Ray Bales that the school be named the Kewaskum Community High School, J. School District No. 2.

The budget was explained and discussed. It was suggested by Charles Miller that the item of water under operating expenses be increased by \$355.55 for sewage disposal service charges. It was moved by Charles Miller and seconded by Giles Wierman to increase the proposed budget for 1954-1955 to \$26,000.00. Motion carried.

The following resolutions were passed:

RESOLUTION NO. 1—Be it resolved by the electors of School District No. 2 or the Kewaskum Community High School that the sum of \$96,000.00 be levied on the assessed valuation of the district for the ensuing year, 1954-1955, to be used for current expenses.

Motion made by Charles Miller and seconded by Giles Wierman to accept resolution No. 1. Motion carried.

RESOLUTION NO. 2—Be it resolved by the electors of School District No. 2 or the Kewaskum Community High School that the school year be set at nine months or 180 days.

Motion made by L. N. Peterson and seconded by William Wunder to accept resolution No. 2. Motion carried.

RESOLUTION NO. 3—Be it resolved by the electors of School District No. 2 or the Kewaskum Community High School that there be furnished free text books to all high school students for the ensuing year, 1954-1955.

Motion made by Ray Schaefer and seconded by Mrs. Carl F. Schaefer to accept resolution No. 3. Motion carried.

RESOLUTION NO. 4—Be it resolved by the electors of School District No. 2 or the Kewaskum Community High School that the District Board be and is hereby authorized to borrow from some bank, corporation or individual a sum not to exceed \$75,000.00 for a term not to exceed nine months or beyond May 1, 1955, in the ensuing year at a rate not to exceed 4 per cent for the purpose of defraying the expenses of the district until funds shall be available or received from taxes levied and the district board is hereby authorized to extend such obligations therefore and such security given for the payment of this loan or loans may be agreed upon by the parties in interest and not prohibited by law. Any amount borrowed should be repaid prior to May 1 of the current school term.

Motion made by Albert M. Hron, Jr. and seconded by Ned W. Sengpiel to accept resolution No. 4. Motion carried.

Consideration was given to the method of election of board members in the future. It was moved by L. N. Peterson and seconded by Ned Sengpiel that we elect the member of the board for the 1955-56 school year at a polling place at the school at a time set from 1:00 to 8:00 p. m., the school board being the election inspectors. Motion not carried. It was moved by Alfred Seefeld and seconded by Herman Engleletter that we vote on the proposed board members at the annual meeting and that nominations come from the floor. Vote by ballot was requested by Albert Hron, Jr. Result of the balloting was yes, 53 votes, and no, 6 votes. Motion carried.

It was moved by L. N. Peterson and seconded by Paul Pamparin that the board be given the power to appoint a building committee. Motion carried.

It was moved by Ned Sengpiel and seconded by Herman Engleletter that the board be given the power to select a site and an architect for the new high school building. Motion carried.

It was moved by L. N. Peterson and seconded by Marvin Martin that the board be given the power to rent space for grade school students if necessary in order to provide adequate space for high school students. Motion carried.

It was moved by Mrs. Albert Gross and seconded by William Becker to have all transported students picked up at the driveway where feasible. Motion carried.

It was moved by William Becker and seconded by Mrs. Art Petermann to adjourn. Motion carried. Meeting adjourned.

Clifford C. Stautz, Clerk

Lakes Team Loses Tough One at Germantown, 9-8

The Kewaskum Chevrolets lost a heartbreaker at Germantown Sunday when two unearned runs in bottom half of the eighth inning resulted in their being nosed out 9-8. The team now has lost both of its contests in the second half and shares the cellar with Grafton, of all teams, first half champions.

Kewaskum scored a run and Germantown two in the initial inning. One more by the Chevys and three by the winners in the fourth made it 5-2. Each team counted two in the fifth to bring it to 7-4. There was no more scoring until the eighth when Kewaskum pushed four big runs over the plate to take the lead for the first time, 8-7.

But the advantage was short-lived. An error by catcher 'Fuzzy' Dreher with the bags loaded gave Germantown two unearned markers which were the tying and winning runs. The batter hit a ground ball to pitcher Killy Honeck. He threw to the catcher who let the ball get away and two runs scored.

Kewaskum's big eighth inning was highlighted by another home run by Bud Korth, which gave his team the lead. The losers outfit Germantown 11-11. Korth garnered another hit for himself and Dreher, Bob Felix, Bob Dreher and Gordy Wierman also got two bingles apiece. Howie Schultz led the winners with three for five.

Glen Backhaus started on the hill for the Chevys and was relieved by Honeck, Gutzke and Geiger twirled for the winners.

This Sunday Kewaskum is at home with Mequon furnishing the opposition. Mequon has won two and lost one in this half.

LAND O' LAKES STANDINGS (Second Half)

Table with 2 columns: Team, Won, Lost. Includes Port Washington, West Bend, Mequon, Germantown, Saukville, Cedarburg, Kewaskum, Grafton.

Scores Sunday—Germantown 9, Kewaskum 8; West Bend 8, Grafton 3; Port Washington 15, Mequon 14; Cedarburg 23, Saukville 5.

Games Sunday—Mequon at Kewaskum, Saukville at Germantown, Cedarburg at Grafton, West Bend at Port Washington.

North Beats West in Lakes All-Star Game

A seventh inning rally featured by a home run by John DeMerit enabled the Northern division Lakes all-stars to tie up the game and go on to defeat the Western stars at Hartland Tuesday night, 12-7, in 10 innings.

The North overcame a 6-2 deficit after six innings and rallied with four runs in the seventh to knot the count. They won on a big 6-run barrage in the 10th stanza.

Both teams made 14 hits. McGaw paced the North with three hits. Augie Bilgo was the only Kewaskum player selected on the team, while Killy Honeck was chosen as coach.

The next all-star game will be played in West Bend next Wednesday night with the Northern stars against Grafton's first half titans. The North all-stars meet the winner of the East-South game in West Bend on Aug. 12.

Advertise in the Statesman Want Ad section.

County Fair in Session at Slinger

The 27th annual Washington county fair is now on at the Slinger fairgrounds. It opened Thursday and runs through Sunday. Nearly all available space on the grounds is occupied by exhibit, concessions and the midway.

All indoor space is occupied by the usual exhibits of clothing, foods, canning, baking, vegetables, flowers and educational booths. Livestock entries occupy all available barn space including the new 60 by 100 foot highway storage shed.

Special entertainment programs are being held each day of the fair with a different band providing music each day. Remember that Saturday afternoon is children's day with all rides being reduced to 5 cents.

Complete details on the fair program were carried in last week's issue of the Statesman with the exception of the exhibitors, which County Agent E. E. Skalsky has asked us to announce. They are as follows:

Wisconsin Electric Power Co., County Chevrolet dealers, Washington County Ford dealers, Miller's Furniture of Kewaskum, Arnold Malsack appliances, Slinger; James Larson appliances, West Bend; Farmers Inc., Allenton, poultry; All-State Insurance Co., West Bend, safety display; Roy Arndt, West Bend, home improvement; Ritger Furniture, Allenton; Wayne Appliance Co., Slinger; Weiss Hardware Co., Allenton, appliances and implements; P. A. Mueller & Sons, Hartford, appliances; R. O'Meara Sales, West Bend, appliances; Christensen Sales, West Bend, home modernizing; Liesener Surge Milkier Service, West Bend; Terlinden & Stendel Roofing & Insulation, West Bend; Gordon Appliance, Sheboygan; East Central Breeders Assn., Waupun; Freehauf Implement Co., Hartford, farm implements; Gehl Bros. Mfg. Co., West Bend, farm implements; Syl. G. Strupp, Slinger, implements; Nagle-Hart, Milwaukee, machinery; International Harvester dealers, farm implements; West Bend Implement Co., farm implements; St. Lawrence garage, R. 2, Hartford, farm implements; Minnesota Woolen Co., Milwaukee, clothing; Art Gielow, Milwaukee, lawn and garden tractors; Clyde Hutson, West Bend, corn crib; Washington County Farm Supply, Rockfield, mobile feed grinding unit; Elmer Happel, Richfield, hay driers; West Bend Concrete Products Co., building materials; Walter Rom & Son, Milwaukee, Reda pumps; Boehlke Hardware, Thiensville, gas supplies; Wash. Co. Associated Women of Farm Bureau, dining hall; Margaret Ahlers, R. 5, West Bend, ice cream and honey; Mrs. Claude Condon, Slinger, food stand; Park-Way, West Bend, food stand.

WILLIAM WOLF, FATHER OF MRS. JOHN HEISDORF DIES

William D. Wolf, retired Richfield businessman and father of Mrs. John Heisdorf of Kewaskum, died at St. Joseph's hospital, Hartford, Tuesday, July 20, after a long illness.

Mr. Wolf was born in the town of Germantown on April 1, 1875 and had been a resident of Richfield since 1910.

The funeral was held at St. Boniface church, Goldendale, at 10 a. m. Friday, the Rev. Heummer presiding. Burial was in the parish cemetery.

BACK HOME FROM VACATION AT CAMP FOR HANDICAPPED

Leroy Bier, 19, R. 2, Kewaskum returned home Sunday from a two week vacation at Camp Wawbeek, Wisconsin Delta, Easter Seal recreation center for the physically handicapped.

The cost of sending Leroy to Camp Wawbeek was defrayed by a gift from the Kewaskum Kiwanis club, which shares the costs with the Easter Seal agency of \$10.40 per person for the two weeks.

About 15,000 acres of Wisconsin crops were irrigated in 1953. Potatoes are the main crop under irrigation.

Village Board Rejects All Bids for Incinerator

The Village Board of Kewaskum, Washington County, Wisconsin met in regular monthly meeting with President C. Miller presiding and all Board members present.

Upon motion by J. Stelplflug, seconded by J. Eberle and carried, the minutes of the previous meeting were approved as presented.

Chief of Police Guttman was authorized by the Board to hire extra police help for the Firemen's-Legion picnic.

Motion by J. Stelplflug, seconded by M. Schaefer and carried that the application of Leo Brucker for an Operator's License be approved and that the proper license be issued upon the payment of the required fee.

Motion by M. Schaefer, seconded by C. Sparks and carried that the Commissioner be authorized to order from the Wisconsin Electric Power Co. for the installation of two (2) center suspension street lights on East Water Street north of Main Street and one (1) center suspension street light on East Water Street south of Main Street.

The petitions of Mrs. Henry Burke for sidewalk and Henry Weddig, Sr. for curbing were referred to the Street Committee for further handling.

Motion by C. Sparks, seconded by J. Eberle and carried that all expenses incurred in remodeling the Fire Dept. equipment truck be paid for out of 2% Fire Tax fund.

Motion by M. Schaefer, seconded by J. Eberle and carried that all bills and wages as recommended and approved by the Finance Committee be allowed and paid.

(CONTINUED ON LAST PAGE)

Sign Up for Blood Donor Clinic Here

All residents of the Kewaskum area are urged to sign up for the Blood Donor clinic to be held here next week to insure an ample attendance.

The Kewaskum clinic will be held on Monday, Aug. 2, at the high school from 1:30 to 6:00 p. m. Henry Rosenheimer is chairman of the event. Persons wishing to register to give blood at the local clinic may do so by calling Chairman Rosenheimer or Mrs. Harry E. Koch at 179W for your appointment.

A clinic will also be held in West Bend, Blood received at the clinics will be turned over to the County, West Bend Community Blood Donor club for use by all residents of the county in emergency cases where blood is needed. The Junior League Blood Center of Milwaukee is again in charge of the clinics.

EXAM ANNOUNCED FOR SUB CLERK AT POST OFFICE HERE

A Civil Service examination for permanent appointment in the Kewaskum, Wis. post office to position as SUBSTITUTE CLERK has been announced by J. A. Conlon, director of the Seventh U. S. Civil Service region. Starting pay is \$1,611 1/2 an hour with opportunity for advancement. Additional compensation is provided for night work and for authorized overtime. Competition in this examination is restricted to residents of Kewaskum and persons now employed in the Kewaskum post office, who are between the ages of 18 and 59. These age limits are waived for veterans. Persons now holding temporary or indefinite appointments should file for this examination if they wish to be considered for permanent appointment.

The duties of these positions require physical exertion and applicants must be physically fit to perform these duties or they will be rejected.

A written test is required of all applicants.

Applications must be filed with the Regional Director, Seventh U. S. Civil Service Region, New Post Office Building, Chicago 7, Illinois, and will be accepted until OCTOBER 20, 1954.

Full information and application cards may be obtained at the above post office.

McBRIDES LEAVE VILLAGE; LUEDTKES IN NEW HOME

Mrs. Tom McBride and son Michael have moved to Menomonee Falls from the upper apartment in the Louis Bath, Sr. home on First st. Mrs. McBride was engaged as a nurse at Regal Ware, Inc. here.

Mr. and Mrs. Milton Luedtke and family moved to their new home on the east side of the village Saturday from the upper flat in the Charles Breeman home on the River road at the northeast village limits.

SHOWER FOR MISS GESSNER

A surprise kitchen shower in honor of Miss Joan Gessner was given by her aunt, Mrs. Ray Reysen, Kewaskum, the past week. Miss Gessner will be married to Paul Schneiss on Aug. 7. She was presented with lovely gifts by the many guests. An evening of Bunco was followed by a delicious luncheon.

GRASS FIRE CALL

The Kewaskum firemen answered a grass fire call to the Pine Hill Turkey farm east of the village at 11:45 a. m. last Saturday. No damage resulted.

Man Dies of Injuries in Town Auburn Crash

Fred Dennell, about 50, of Milwaukee, died last Friday night, July 23, at St. Joseph's hospital, West Bend, of injuries suffered the Friday evening before in an accident on Hwy. 45 in the town of Auburn in front of the Wallace Krueger farm.

The Dennell car was involved in a mishap with a truck driven by M. A. Mott, 56, of Neilsville. The Dennell car skidded 114 feet before striking the truck and a power pole and rolling over into a ditch. The crash occurred when Dennell tried to pass the Mott truck at the same time that Mott was turning out to pass a car driven by Mrs. Lorina Petermann of the town of Auburn.

Death of Dennell was due to a severe skull fracture. The death was the 11th traffic fatality in Fond du Lac county this year.

Rivers Nine Beaten by Slinger Again, 8 to 3

The Kewaskum Rivers team, which was beaten by Slinger, 9-3, a week ago Sunday, lost to the same team last Sunday by almost an identical score. This time it was 9-3, one run closer. The defeat was the team's third in five starts.

Kewaskum scored 3 runs on 4 hits and Slinger tallied their 8 on an equal number of safeties. Wierman started as pitcher for the losers and was relieved by Mertzig. Gundrum was the winning twirler.

The contest was a dandy battle until the 5th inning. Slinger scored 2 runs in the 1st frame and Kewaskum 2 in the 3rd to tie it up. Each team got a run in the 5th to keep the count knotted until the 8th.

Then Slinger brought home 1 more to make it 4-3. They then rubbed it in with a big 4-run splurge in the 9th to bring the final to 8-3.

C. Koepke was the only Kewaskum batter with two hits. Mayer also collected two for the victors. The Slinger win gave them undisputed first place as Barton lost to West Bend.

LAND O' RIVERS STANDINGS

Table with 2 columns: Team, Won, Lost. Includes Slinger, Barton, West Bend, Kewaskum, Campbellsport, Newburg.

Scores Sunday—Slinger 8, Kewaskum 3; West Bend 12, Barton 9; Campbellsport 8, Newburg 4.

Games this week end—Friday night, Newburg at West Bend; Sunday, Kewaskum at Barton.

INVITE KEWASKUM PACK TO WEST BEND CUB DAY CAMP

Cub Scout packs from West Bend, Barton, Kewaskum, Richfield and Germantown are invited to participate in the 1954 Cub Day Camp program to be held in Regency city park at West Bend on Aug. 2, 3 and 4. The Scout Youth cabin in the park will serve as headquarters for the camp.

Camp hours each day will be from 9 a. m. to 4:45 p. m. and the program will include craft, nature study and sport activities. A family picnic supper will wind up the program next Wednesday. Registration fees for the complete program will be \$2.25. Each Cub should bring his lunch on Monday and Tuesday and will be instructed or what to bring for a noon cook out on Wednesday. Each family should bring its own picnic supper for the 5:30 p. m. Wednesday outing.

BIRTHS

FLYNN—A son to Mr. and Mrs. Lloyd Flynn, Kewaskum, Sunday, July 25.

SAUTER—A son to Mr. and Mrs. Albert Sauter, Kewaskum, Saturday, July 24. Mrs. Sauter is the former Myrtle Pierce.

GATZKE—A daughter to Mr. and Mrs. Delmer E. Gatzke, West Bend, Monday, July 26. Mr. Gatzke is a son of the Norbert Gatzkes, R. 2, Campbellsport.

BEISBIER—A son to Mr. and Mrs. Byron Beisbier, Campbellsport, at St. Agnes hospital, Fond du Lac. Mrs. Beisbier is the former Beulah Westerman, Kewaskum.

215 at Annual Seefeld Family Reunion in Park

Two hundred-fifteen persons attended the fifteenth annual reunion of the Seefeld family Sunday, July 25, at the Kewaskum village park, original settlement area of the pioneer members of the family.

"This Is Your Life" was a feature of the program which honored Dr. Milo Scheid of Rosendale. Narrator was Alfred Seefeld, Kewaskum. Enlarged photographic illustrations in book form pertaining to Dr. Scheid's past were prepared and presented by Mrs. Ray Thornton, historian, Fond du Lac.

Dr. Scheid is the grandson of Wilhelmina Seefeld who immigrated to America from Germany in 1856. He spent his boyhood days at his grandparents' home on a farm near Campbellsport. He attended school in Campbellsport, graduated from Fond du Lac High school, and received degrees from the University of Chicago in 1907 and Rush Medical school in Chicago in 1909. He married Harriet Sizer of Lamartine in 1909. Dr. Scheid started his practice in Rosendale where he is still active in the medical field. He is on the staffs of St. Agnes hospital in Fond du Lac and Mercy hospital in Oshkosh.

It was Dr. Scheid who first interested himself in the Seefeld genealogy, doing research work and locating lost records.

In Dr. Scheid's response, he covered items of interest regarding the other branches of his family. Mrs. Scheid related her part in helping to prepare the surprise on Dr. Scheid.

Dr. and Mrs. Scheid are the parents of three children, Mrs. Alfred Grimm of Dubuque, Iowa, Myron Scheid of Ripon, and Dr. Harriet Scheid of Denver, Colo., who is following her father's profession. There are six grandchildren.

Special recognition and an award were presented to the oldest member in attendance, Herman Seefeld, Kewaskum, who is 86 years of age. Other awards were presented to Russell Rexilius, two-week old son of Mr. and Mrs. Elbert Rexilius of Racine, youngest member; Mr. and Mrs. Neil Johnson, Wauwatosa, most recently married couple; Nancy Grimm of Dubuque, Iowa, who traveled the greatest distance.

Fifteen persons were honored for having attended every reunion for the last 15 years.

Since last year's reunion there were reported seven births, two marriages and five deaths.

At the business meeting conducted by the president of the group, Paul Seefeld of Milwaukee, the following officers were elected: President, Edwin Seefeld, Milwaukee; vice-president, Paul Seefeld, Milwaukee; secretary, Miss Rosella Peisker, Fond du Lac; treasurer, Alfred Seefeld, Kewaskum, and historian, Mrs. Ray Thornton, Fond du Lac.

Committees named for the 1955 reunion included kitchen and tables, Mr. and Mrs. Arnold King, West Bend; refreshments, William Albert, Campbellsport, R. 3; entertainment, Mrs. Oscar Hanke, Fond du Lac, Mrs. Frances Blanke, Fond du Lac, and Mrs. Charles Schemmel, Adell; singing, Albert Zimmerman, Reedsville; refreshment tickets, Mrs. Alvin Seefeld, Campbellsport.

The afternoon was spent informally. Games were played under the direction of Miss Esther Klumb, West Bend, R. 1.

Community singing was led by Albert Zimmerman, Reedsville, who was assisted by Elmer Seefeld, West Bend.

A group photograph was taken by Ray Thornton.

Communities represented were Campbellsport, West Bend, Kewaskum, Gren Bay, Racine, Sheboygan, Plymouth, Cascade, Loyal, Milwaukee, Chili, Lomira, Antigo, Franksville, Rosendale, Adell, Eden, Reedsville and Fond du Lac.

Greetings were read from the Mrs. Hulda Hillenberg family of Calgary, Canada, and Mr. and Mrs. Harold Grant, Northfield, Minnesota.

OUR DEMOCRACY — by Mat

AS DAY IS FROM NIGHT—A LARGE PART OF THE TWENTIETH CENTURY HAS SEEN TOTALITARIAN SYSTEMS TRIED IN VARIOUS PARTS OF THE WORLD. DARKNESS HAS DESCENDED UPON THOSE PEOPLES, AND CLOSED OFF THE BORDERS OF SEVERAL FORMERLY FREE AND INDEPENDENT NATIONS.

IN OUR DEMOCRACY, WE STRIVE EVER TO BROADEN THE SPIRITUAL, POLITICAL AND ECONOMIC BASE ON WHICH WE STAND, AND TO BRIGHTEN THE RAYS OF ENLIGHTENMENT INSTEAD OF DARKENING THE MINDS OF MEN. AS DE WITT CLINTON SAID IN 1826: "A GENERAL DIFFUSION OF KNOWLEDGE IS THE PRECURSOR AND PROTECTOR OF REPUBLICAN INSTITUTIONS, AND IN IT WE MUST CONFIDE AS THE CONSERVATIVE POWER THAT WILL WATCH OVER OUR LIBERTIES."

PIPIT

© 1953 National Wildlife Federation

Most Americans associate the name "Pipit" with the word "Tawny" and if asked what the tawny pipit might be would say that it was a movie about dicky-bird watchers or something like that. While the "Tawny Pipit" was viewed by millions of Americans from coast to coast, it is doubtful if any American ever saw a free wild tawny pipit on American soil.

Americans who use the Peterson bird guides as their ornithological Bible might tell you that there were two pipits to be found in the country, the American Pipit pictured on this page and the Sprague's Pipit whose back is more striped and under parts less striped than in the American Pipit. Each of these species shows white outer tail feathers and each wags its tail, bobs its head like a dove when walking, and walks rather than hops like a sparrow with which it might be confused by a careless observer. Offhand one might say that because of the white outer tail feathers there might be the suggestion that the bird observed was a Vesper Sparrow but the Vesper Sparrow hops like a self-respecting sparrow.

Unlike the sparrows, too, the pipits have relatively slender bills and this character will help distinguish pipits from the longspurs which are of course sparrows and have the characteristic coarse sparrow bill. Longspurs walk instead of hop normally but the white on the tail is usually not confined to the outer tail feathers as is the case with the pipits.

If one can master the confusion which may have been created by pointing to the slightly complicated differences between pipits, longspurs, horned larks and Vesper Sparrows, between nodding heads, walking legs and streaked upper or lower parts and wishes to go farther, he will find in Bent's books on birds of North America that there are really five kinds of pipits that have been found in America even though one of them, the Japanese Pipit, was never found here but once. Bent lists the American Pipit and the Sprague's Pipit of the Peterson book and the Meadow Pipit and Red-throated Pipit which we cannot consider in the space here allowed.

The American Pipit is probably better known in the West than in the East. It breeds from northern New Mexico and the high mountains of Oregon north to near the tree limit in Canada. There is an eastern and a western race apparently. The center of winter abundance is in our Southwest or along the Pacific Coast north to Washington. The center of winter population in the eastern race is from New Jersey and Ohio to the Gulf Coast. In any of these areas the birds' presence is more frequently noticed by the thin peeping call given when the birds are flying overhead in their characteristic flocks.

The pipits are primarily insect

STRICTLY FRESH

A LAD in Mauch Chunk, Pa., snared a large fish which was stolen by a cat before he could measure the prize catch. This fish story turned into a cat's "tale."

Factual News About The Eyes

If you're opening a charge account and the store wants identification, your spectacles probably won't serve the purpose, admits the Better Vision Institute. But any criminal had better take care not to leave his individually prescribed glasses at the scene of a

crime, or they may lead to his detection. Since no two people have exactly the same eye characteristics, your specs tell a pretty detailed story about you. Their lenses tell how far the pupils of your eyes are from the center of your nose (this usually differs for the two eyes), and just what your visual troubles are. The distance between the nose pads indicates whether your features are large or small, and may disclose the fact that your nose is broken, if it happens to be. The length and angle of the temples reveal head size and shape as well as the position of your ears. Any foreign material on the spectacles may give a hint as to your occupation. Finally, it's often possible to trace a pair of glasses back to the supplier, and even to the patient for whom they were made.

—E. Laurence Palmer

First Trans-Atlantic Telephone Cable

The American Telephone and Telegraph Company recently announced that the first telegraph cable system across the Atlantic Ocean will soon be laid. The project, which has been under study and planning for some 25 years, will cost \$35,000,000.

The AT&T, British Postoffice and Canadian Overseas Telecommunication Corporation will jointly own the cable. Until this cable is in operation, trans-Atlantic telephone service will continue to be by short-wave radio.

The longest telephone cable yet to be laid across an ocean floor is that between Key West, Florida, and Havana, Cuba.

The cable to be laid will be able to handle thirty-six simultaneous conversations, although it does not carry a wide enough band for television transmission. There will be more than 100 underwater repeaters along the ca-

ble, which will be protected by a wrapping of copper foil, over which there will be jute and steel wire wrappings.

Although it is estimated that some 75,000 calls were completed between the United States and Great Britain last year, the new cable will allow AT&T to expand its service and improve it. The project, however, will not be completed until 1957 or 1958. At its completion, overseas telephone service will have been available for approximately thirty years, since it was on January 7, 1927 that a single radio telephone circuit connecting New York and London was initiated.

The new cable will mean that telephonic communications to London and other overseas points will be completely reliable and readily available. The new cable will be the longest undersea cable in the world and represents an achievement in the field of science for American, British and Canadian engineers.

FIGHTING SHIPS

THE USS RENSHAW DDE-499
A VETERAN OF WW II WITH 8 BATTLE STARS, WAS BACK IN THE THICK OF THE KOREAN CONFLICT—STILL ONE OF THE NAVY'S PROUD—
FIGHTING SHIPS.

LATE ONE NIGHT IN OCTOBER, 1951, AFTER MONTHS OF COMBAT, THE RENSHAW SET A NAVAL PRECEDENT—SHE SANK AN ENEMY SHORE BATTERY.

THE GUN WAS LOCATED ON THE BRINK OF A CLIFF HIGH ABOVE THE STORMY SEA—HIDDEN BY CAMOUFLAGING. SHARP RENSHAW LOOKOUTS SPOTTED IT.

NOT SATISFIED WITH THAT RECORD, THE RENSHAW SET ONE MORE AS HER CREW GAVE 171 PINTS OF BLOOD TO A MILITARY BLOOD BANK IN HAWAII—EXEMPLIFYING THE SPIRIT OF A TRUE FIGHTING SHIP.

WITH YOUR MODERN MACHINERY YOU CAN DO MORE IN A DAY THAN YOUR GRANDPA DID IN A WEEK!
WELL... YES!

AND YOUR YIELD PER ACRE IS MUCH HIGHER!
YES BUT TAKE THE STREAM IN THE LOWER MEADOW...

GRANDPA COULD CATCH MORE FISH THERE IN AN HOUR THAN I CAN CATCH ALL DAY!

IT SAYS HERE THAT BEFORE GOING ON A DIET YOU SHOULD HAVE A PLAN—DECIDE ON EXERCISE AND FOODS!
THAT'S EASY! WALKS AS OUR EXERCISE!

PEGGY BUT WHAT FOODS SHOULD WE GIVE UP?

I'VE GOT IT! LET'S WALK TO THE MALT SHOP EVERY DAY AND HAVE JUST TWO SCOOPS OF ICE CREAM INSTEAD OF THREE!

YOU KNOW, SALLY, IT'S GOING TO BE TOUGH—BUT IT'LL BE WORTH IT!!

THOSE WERE THE DAYS!
Art BEEMAN

PLEASE EAT YOUR SUPPER, BILLINGATE—WE WANT TO CLEAR THE TABLE!
I'M DOING SO, MAM!

But NOW-WOW!

HE NEVER DINES, HE'S JUST PASSING THROUGH!!
HURRY UP, EGGHEAD—OR YOU'LL MISS YOUR EVENING PROGRAMS!

FOUR GRAND FOR BEING PHOTOGRAPHED BY THAT DAME!—HEAVY SUGAR FOR SUCH LIGHT WORK, LEFTY!
HUMPH!—I WASN'T BORN TUESDAY, MAYSIE!

GUSSIE, DARLIN'!
LEFTY BABY! OH, HONEY MUFFIN! I—
BREAK CHILLIN'! WE HAVE PLACES TO GO!

I'VE GOT A TABLE AT BOOTS THORS!—WE'LL DRINK A BUTTERMILK TOAST TO TONIGHT'S WIN!—AND TO YOUR NEXT ONE!

NEXT ONE?... LEFTY!—DOESN'T SHE KNOW...?

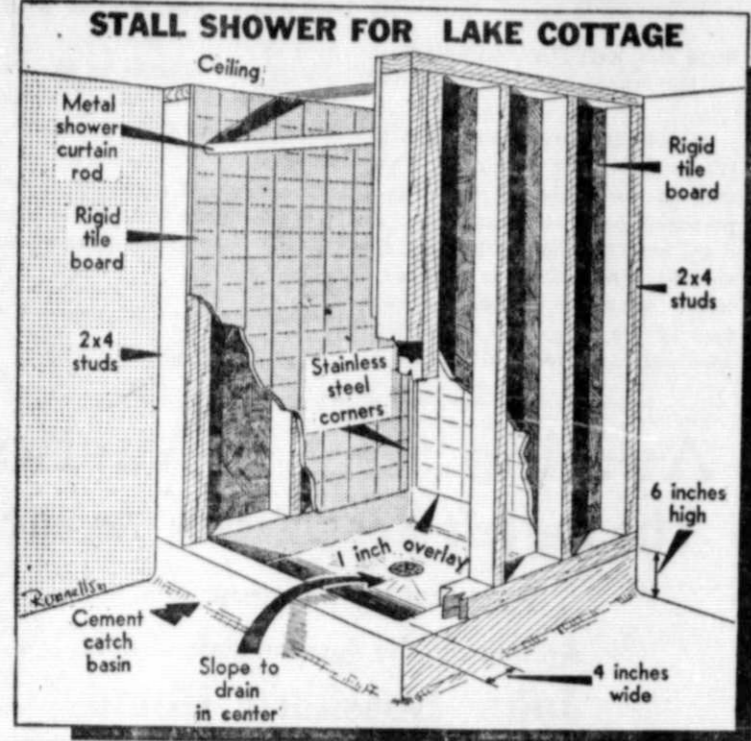

KERRY DRAKE

THIS GIRL IS A MINOR, TATTOO! IF HER MOTHER WANTS HER TO COME HOME, SHE'S GOT TO OBEY! GET YOUR THINGS, FLUFF!
DON'T WORRY, MR. DRAKE! I KNOW HOW TO HANDLE MOM!

REMEMBER, FLUFF! I'M CRAZY ABOUT YOU! ... BESIDES, YOU KNOW TOO MUCH ABOUT MY BUSINESS FOR ME TO LET YOU QUIT!

AND AN HOUR LATER...
MY BABY!

HI, MOM! GLAD TO SEE YOU—BUT NOT VERY!

LIGHT WEIGHT STALL SHOWER

A stall shower at a lake cottage is much in demand. Here is one designed so that it can be built right on the first floor if the floor joists are of normal strength.

Floor joists should be 16" apart center to center. They should be doubled under load bearing partitions. If the span is 12' or more, the joists should be 2 x 10s. If the span is 10' or less, 2 x 8s may be used.

The first part to build is the cement basin for the shower. If you use light weight aggregate in mixing the cement, it may be poured right on top of the floor.

For the light weight aggregate, use vermiculite, or expanded mica. This material is commonly used as insulation, and sold under the trade name of Zonolite. The cement made of this mixture will be only about one-tenth the weight of cement mixed with gravel.

Cut a hole in the floor and install shower drain trap. Allow for at least 2" of cement under the surface plate of the trap. More is better.

Connect the drain pipe with the sewer to comply with local plumbing codes.

Build the form for the basin. The outside of the basin should be about 6" above the surface of the floor. The wall of the basin should be slightly thicker than the width of a 2x4.

The inside wall of the forms should be built so that it may

be removed as soon as the cement has set. This is to permit the troweling of rounded corners at the joint of the wall and floor.

Insert 3/8" bolts to permit fastening of the sills for the walls.

Construct the walls of the stall of regular 2x4 lumber. The outside may be covered with plaster board, paneling, or any other material that will harmonize with the interior of the cottage.

Cover the inside walls with tempered masonite, and over this, rigid linoleum tile. Lap the linoleum tile board about 1" over the top of the cement basin. Be sure to cement the bottom of the tile to the basin.

Send 35c today to Ernie Gardner, 14189 Faust Ave., Detroit 23, Michigan, for your copy of **MISTER FIXUM'S HANDY HINTS**. This is a booklet made up of selected jobs from this column. Booklets No. 1, 2 and 3 available. 3 for \$1.00.

To Broaden Your Conservation IQ

Minnesota has no "worthless timberland" because some form of timber will grow anywhere in the state. Taxonomy is the classification of mammals, of which rodents are the most numerous. On the average 32 gallons of Minnesota maple sap will make one gallon of maple syrup—compared with a general average requirement of 50 to 60 gallons of sap. Game wardens cannot be compelled to disclose the source of violation information. In 1894 six lakes averaged 1,844 acres and yielded 12.1 fish per trip, bass by far the most numerous; same six lakes averaged 1,437 acres in 1952 and yielded only 2.4 fish per trip, sunfish most numerous, bass scarce.

The poor man must walk to get meat for his stomach, the rich man to get a stomach to his meat. —Benjamin Franklin.

Share The Work Is Advice To Fathers

How to work eight hours a day at one job and four at another, with Saturdays and Sundays thrown in, and at the same time be an understanding and well-groomed wife and an understanding and well-balanced mother, is the overwhelming problem of life in these times for most working mothers.

It is also the source of so much tension, and strain in the mother herself and in her home that a bulletin was issued on the subject recently. Better organization of home tasks and sharing of responsibilities are regarded as essential by the doctors for the health of mother and family.

The trouble is that some mothers feel a frantic compulsion to keep up their houses and their entertaining on the same scale as if they were not employed outside the home. That means that they are trying to carry out two full-time jobs at once. Others neglect one or the other and find themselves with unruly children and broken homes because the mother, in these cases, did not prove equal to an almost super-human task.

To steer a clear path between extremes the doctors advise the fathers to take a hand. First they must try to understand what the problem is. Then they must help to organize the work on a fair and sensible basis. Working partnerships created, share and share alike, between wife, husband and children. Everybody will be happier for it, according to the bulletin, and nobody will be forced to burn the candle disastrously at both ends.

In an economy built around a large family income there is little prospect that all working mothers can ever go back to old ways, the doctors acknowledge. But life in a family with two working parents can be organized successfully, they believe.

What could be more refreshing during this hot weather than chilled desserts using fresh fruits? Try these refreshing and cool desserts some hot night.

Fruit Compote
1 1/2 cups dark, sweet cherries
1 1/2 cups orange sections
1/3 cup orange juice
3/4 cup grenadine
1 1/2 tablespoons lemon juice
Drained canned cherries may be used in place of fresh ones. Combine all ingredients and chill several hours or overnight. Serves six.

AMPLE "EXPOSURE"—Adding a warm touch to a stream-cooled gown near St. Louis, Mo., is Laura Holmes, who had to leave her cool summer retreat for the sizzling sidewalks of New York. She was the "real cool" choice of St. Louis press photographers as their entrant in the recent National Press Photographers' Beauty Contest.

Sarah Anne's COOKING CLASS

An All-Time Favorite

A big dish of succulent Sauerkraut and Pork Hocks is a sure-hit with the men in the family. Both the sauerkraut and pork hocks (or knuckles), are easy on the food pennies.

If your family prefers another vegetable instead of sauerkraut, canned greens, or green and wax beans are seasoned to perfection with pork hocks. Cook the meat slowly and add the vegetables a few minutes before serving. Where time is an element, cook the hocks the night before or in the morning and store in the refrigerator. Serve fluffy mashed potatoes, canned spiced peaches or apricots, and a crisp salad to round out the main course. It's an easy meal to get when you use canned foods. The cleaning and pre-work has been done in the canners' kitchens.

Sauerkraut and Pork Hocks
2 cups water
3 lbs. pork hocks (4 to 6 hocks)
1 1/2 teaspoons salt
1 No. 2 1/2 can sauerkraut

Bring water to boiling; add pork hocks and salt. Cover and simmer very gently until tender (about 2 hours). Add sauerkraut and continue to simmer for another 10 minutes. Four to six generous servings.

TRY THESE CANNED VEGETABLE AND PORK HOCK COMBINATIONS:
(1) Peas and onions with pork hocks.
(2) Spinach or other greens with pork hocks.
(3) Green or wax beans with pork hocks.

Peach Pie
1 cup peach syrup
1 package lemon flavored gelatin
1/2 cup cold water
1 pint vanilla ice cream
1/8 teaspoon almond extract
Fresh sliced peaches, about 2 to 2 1/2 cups
1 9-inch baked pastry shell
Whipped cream

Heat syrup to boiling. Remove from heat and add lemon gelatin. Stir until dissolved. Add cold water. Cut ice cream into six pieces and add to hot liquid. Stir until melted. Add almond extract. Chill until mixture begins to thicken and mound when spooned—about 40 minutes. Fold in 2 cups of peaches. Pour into cooled, baked pastry shell. Chill until firm. Garnish with whipped cream and peach slices.

Peach Sherbert
2 cups sugar
1 quart water
1 teaspoon gelatin
2 cups fresh peach syrup
Juice from 1 lemon
Juice from 2 oranges

Boil sugar and water together for 5 minutes. Add the gelatin which has been softened in a little water. When the mixture is cold, add the peach pulp which has been pressed through a sieve. Add fruit juices and freeze.

Minted Fresh Fruit Medley
3/4 cup fresh pineapple, diced
3/4 cup sliced banana
3/4 cup cubed orange segments
3/4 cup quartered maraschino cherries
3/4 cup quartered marshmallows
1 1/2 tablespoons confectioners sugar
1 1/2 cups gingerale
1/2 cup lemon juice
3/4 cup chopped mint leaves
Whipped cream

Mix gingerale and lemon juice. Pour over pineapple, bananas, oranges, cherries and marshmallows. Add sugar. Chill for two hours. Drain off gingerale and juices. Add mint, tossing lightly. Serve topped with whipped cream. The gingerale and fruit juices make a delicious drink.

Filled Peaches
Ripe peach halves
1 cup cream whipped and sweetened
1/2 cup shredded coconut
1 tablespoon crystallized ginger cut in very small pieces
Strawberries

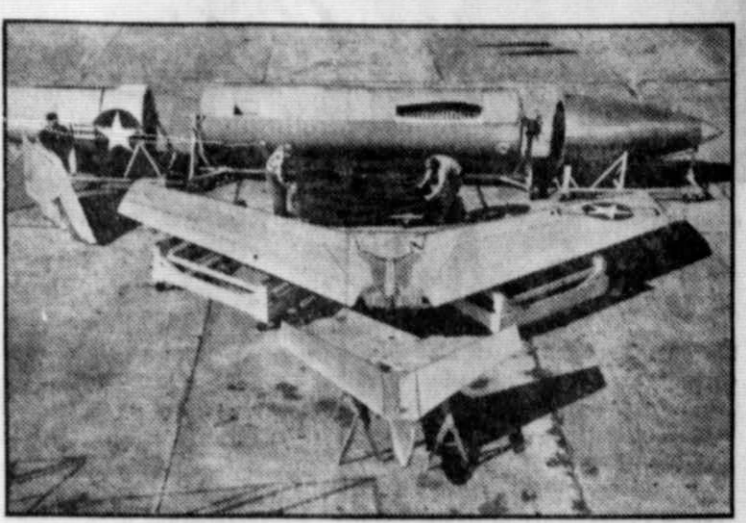

Combine whipped cream with the coconut and ginger. Fill the centers of the peaches. Put in freezer tray and freeze. When ready to serve garnish with a whole strawberry.

Frozen Strawberry Cake
1 1/2 cups crushed strawberries
2/3 cup sugar
1 tablespoon lemon juice
3 cups graham cracker crumbs
1/2 cup cream
1 1/2 teaspoons vanilla

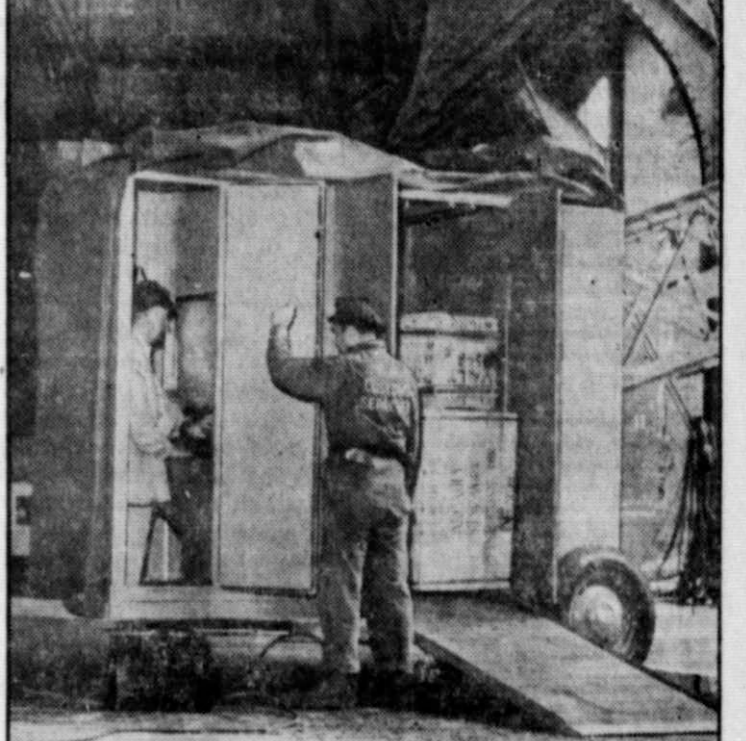

Combine ingredients in order listed and blend well. Line a freezing tray with oil paper, fill with mixture, and freeze until firm. Cut into squares and serve

OH, YOU KID!—French model Johanne is just a grown-up "kid" model. She's clad in an all-leather ensemble recently displayed before the French National Leather Council, in Paris. Black suede is set into the yoke of the jacket and waistband of the skirt, both of which are cut of white kid. Gloves, beret and shoes are of white kidskin.

PACKAGED DESTRUCTION—Seven units of a "Matador" pilotless bomber appear in this form just before packaging. The high-speed, deadly aircraft are constructed in seven units, which are interchangeable with any other packaged bomber shipped from the Glenn L. Martin Bomber plant in Baltimore, Md. Final assembly is made by Armed Forces units, much as you'd assemble parts from several model kits.

EVERY CHILD WILL WANT ONE—Just the thing for pre-Christmas and birthday inspections by small fry is this cargo examining unit, used by the Port of New York Authority. Sealed cartons to be inspected are loaded into the machine and an operator, at left, views an X-ray image projected on screen to check for contraband or undeclared articles.

NEWEST SAINT ENSHRINED—A crystal bier containing the remains of St. Pius X, Roman Catholicism's newest saint, is set in place in the Basilica of St. Mary Major, in Rome. Enshrinement of the silver-masked body of the late Pope took place following his canonization before St. Peter's, witnessed by perhaps the largest throng to assemble for a religious ceremony in modern times.

FOR KITTEN'S BRITCHES, TOO—Children's traditional "smarty pants" answer to a question, "cat's fur to make kittens' britches," isn't too far from the truth. Scientists at Syracuse University in New York State are producing a number of products from the common plant, the swamp cattail, and believe the by-products could someday help fill the world's food and fiber needs. Dr. Ernest Reed, seated, director of the Cattail Research Center, and researcher Leland Marsh examine fibers from the plant. On table, from left, some byproducts of their research are: Cattail roots, which, when prepared, can be eaten like potatoes; cattail flour, and cookies baked from the flour; fiber, a bundle of cattail stems, and pieces from the stems used for caulking barrels.

All bids must be presented on or

before 8:00 P. M. Monday evening, August 2, 1954.

The Village of Kewaskum reserves the right to accept or reject any or all bids.

Village of Kewaskum
William S. Martin
Village Commissioner

IN MEMORIAM

In loving memory of Henry Dettman, who passed away five years ago, July 26, 1949: A beautiful memory dearer than gold. A father whose worth can never be told. Years may pass but memories stay. As near and dear as yesterday. Deeply missed by his wife, Mrs. Henry Dettman, and children.

KEWASKUM DEALER WILL ATTEND FEED CONFERENCE

H. Weddig and employees of the L. Rosenheimer Mill of Kewaskum have been invited to participate in a regional feed conference of Doughboy Formula feed dealers of this area to be held August 2 at the Friedens Evangelical Reformed church in West Bend.

Purpose of the meeting is to provide Doughboy dealers and employees with the latest feeding, management and marketing information so that they may better serve their customers.

Speakers will include Paul Nelson, poultry specialist for the same New Richmond, Wis. feed manufacturer.

The poultry-dairy conference is in charge of Tony Schulz, Madison, Doughboy representative for this region.

FREDERICK SCHROEDER, THREE OTHERS ELECTED DIRECTORS BY E. C. B. A. C.

At their annual delegate meeting in Beaver Dam on July 27, East Central Breeders Ass'n Co-op (E. C. B. A. C.) elected four directors. They are Arthur H. Weiner of Columbus (Columbia county) who was re-elected; Frederick Schroeder of West Bend (Washington county); Martin Schmitz, R. 2, Fond du Lac (Fond du Lac county), and Albert Frei, R. 1, Markesan (Green Lake county).

Schroeder, Schmitz, and Frei are newcomers to the board of directors. They replace the following three directors who were ineligible for re-election this year because they had already served six consecutive years, namely, Guido Schroeder of West Bend, Carl N. Waldson of Fond du Lac, and V. S.

Around The Town

—Mrs. Rose Kudak of Oklahoma City, Okla. spent the past two weeks visiting relatives in the vicinity. She is a sister of John S. Schaeffer of Kewaskum.

—Edwin Paik of Milwaukee called at the Statesman office Wednesday and paid his subscription for another year. The Paiks are on vacation, having returned from a week in northern Wisconsin.

—Mr. and Mrs. Otto Weddig attended the New York Giants Milwaukee Braves ball game at Milwaukee Sunday.

—The infant son of Mr. and Mrs. Walter Faber of Young America was baptized Sunday morning at St. Lucas Ev. Lutheran church here by the Rev. Gerhard Kaniess. The baby received the name Randall Lee Harold. Sponsors were Mrs. Arnold Kutz, Donald Jones and Wilmer Crass. In honor of the occasion, Mr. and Mrs. Faber were hosts at a dinner at Lehn's, Little Kohler.

—E. J. Schowalter of Jackson, candidate for assemblyman of Washington county, called on us Saturday. We wish to thank him for presenting us with generous portions of delicious buffalo hamburger and buffalo summer sausage. This was a rare treat.

—Mrs. Lauretta Wollensak of Chicago visited her folks over the week end.

—WANTED — FARMS FOR SALE. INQUIRE H. MAASKE. PHONE 24, KEWASKUM, 5-28-47

—A letter was received from Mr. and Mrs. Clarence Buntjer of Grand Rapids, Mich., subscribers and former residents, informing us that the Buntjer family spent two weeks in Canada visiting the shrine at St. Anne De Becupre. They wrote that they will never forget this visit to the shrine. They also sent along the address of their son, Richard, now stationed overseas with the navy and ordered the Statesman sent to him.

—Mr. and Mrs. Arden Jordan of Lomira spent Saturday night with

the W. J. Harbeck family.

—Mr. and Mrs. Aug. C. Ebenleiter spent a few days calling on the industrial trade.

—Erna Merkel of Milwaukee spent Wednesday and Thursday visiting relatives.

—Mr. and Mrs. John Van Blarccm enjoyed vacationing in Michigan from Saturday to Tuesday.

—About 30 relatives and friends from Kewaskum were guests of the Blatz Brewing company, Milwaukee, and the Bintlzer-Waehler Post 347 of Lomira at the Blatz auditorium Friday night at a celebration honoring the 70th birthday of Mike Rafenstein of that city and his 25th anniversary as a member of the Blatz quartette. Many other guests from Milwaukee, Lomira and other cities were also present. Mr. Rafenstein is a brother-in-law of Mrs. Louis J. Heisler of here and has many friends in the community.

—Mrs. Aurilla Romaine and daughter Verna of Waupun Mr. and Mrs. Roland Romaine and son Alvin of Waucousta, Mrs. Herb. Holtz, son Gus and his son Mark and Mrs. Clara Seefeldt of Milwaukee and Miss Joanne Schroeder of Monroe visited Mr. and Mrs. Elwyn Romaine Sunday. Mrs. Seefeldt also attended the Seefeldt family reunion in the Kewaskum park.

—YES, it's Miller's at Kewaskum for quality home furnishings at most reasonable prices. Open daily until 6, Fridays until 9 p. m. Free deliveries.

—Mr. and Mrs. Joe Slesar and son Peter of West Bend spent a week vacationing at Yellowstone National Park, Wyoming. Joe is a son of Mrs. Josephine Slesar and Mrs. Slesar is a daughter of the Joe Eberles of here.

—Mr. and Mrs. John Weyker and Mr. and Mrs. Ted Pouell and sons of Port Washington called on Mr. and Mrs. Jac. Harter and Mrs. John Poesch Sunday.

—Mr. and Mrs. Dick Schoofs and daughters of Hapeville, Ga. are spending a week with the former's mother, Mrs. Jos. Schoofs and other relatives.

—Mrs. Carrie Romaine of Birnamwood, who spent the past four weeks with her son, E. M. Romaine and family, left Tuesday for Campbellsport.

—Mrs. Bill Paff of Town .cott called on Mr. and Mrs. Jac. Harter and Mrs. Jennie Schlosser Monday.

—Floyd Stautz has completed six weeks of surveying at Devils Lake.

—MODERN PAINLESS CHIRO- PRACTIC. ROBERT G. ROBERTS, D. C. 702 ELM ST., WEST BEND, WIS.

'54 State Fair To Parade Wisconsin's Famous Farm Products

The farmer's show window—the 100th Wisconsin State Fair with top exhibits of agricultural achievement provides hours of fascinating educational entertainment for all fair visitors. Livestock exhibits feature open class competition Aug. 21 through 24 with Junior Fair showings Aug. 25-29. The change in exhibit schedule provides more space for judging facilities, and allows greater variety and number of entries. Farm Crops Exhibits graphically portray Wisconsin soils and their productivity; Poultry and Waterfowl Exhibits have a record number of entries and the Farm Machinery Show provides a look at everything new in agricultural equipment. Every important exhibit becomes another reason why the Wisconsin State Fair is truly "The Nation's Greatest Fair."

Teacup Topics

By Betty Ann

Editor, The Milwaukee Journal Woman's Pages

Choosing the correct needle for a sewing job depends on three things, says Betty Ann. The fabric, the thread size and the kind of stitch.

Heavy fabrics are made of coarse yarns and call for sturdy needles. When the fabric is fine and closely woven, use a needle fine enough to slip between the yarns without splitting them or leaving a hole in the fabric. In invisible hemming, the needle must be fine enough to pick up a single thread easily.

The needle's eyes must be large enough to let the thread slide through it without being snarled. The eye also has to produce a hole in the fabric large enough to allow the thread to pass through easily.

Generally, use a long needle when you're sewing with long stitches and vice versa. Fine stitches placed close together require a short needle. Invisible hemming or light tacking requires a very slender needle.

Let the sun at this time of year supplement a youngster's intake of vitamin D. This is the vitamin that helps to build strong bones, muscles and good teeth.

The ultraviolet rays can't penetrate clothing, so sun bathe baby in his diapers. But remember, his delicate skin can take only short periods in direct sunlight.

Start with a five minute session and add two minutes a day, up to a half hour. Be sure to protect his eyes and do not allow him to get uncomfortably hot.

If you want to put up a hem, but there's no one at home to measure it, you can do it yourself.

Put the skirt or dress on, get a yardstick and some pins, and stand before a full length mirror. Keep one end of the yardstick on the floor, being sure to hold it straight. Turn around slowly and mark with pins an even distance from the floor around the fullest part of your hips. Put a pin in the front to mark the length you wish.

Take the skirt off and measure from the line of pins down to the desired hem length. Turn up the hem and baste. Put the garment on again to check the evenness of the length before finishing the hem.

When unexpected guests drop in for the evening, prepare this delicious snack quickly to serve with coffee. Just make a smooth paste of mashed Roquefort or grated American cheese and add a little grated onion and butter. Spread on your favorite cracker or toasted bread and place under the broiler for about a minute to melt the cheese and give it a golden brown look. Serve immediately.

Sugar Dusted Fruit Bars

1 cup seedless raisins; 1 cup cooked dried apricots; 1 cup cooked prunes; 3 eggs; 1 cup granulated sugar; 1 1/4 cups sifted all-purpose flour; 1 teaspoon baking powder; 1/2 teaspoon salt; 1/4 teaspoon cinnamon; 1/4 teaspoon all-spice; 2 teaspoons grated orange rind; 1 cup chopped walnuts; Confectioners' sugar.

Rinse raisins and drain well. Drain and chop apricots. Cut prunes from pits into small pieces. Beat eggs until very light and gradually beat in sugar. Sift together flour, baking powder, salt and spices. Fold gradually into egg-sugar mixture. Blend in rind, walnuts and fruits. Pour into greased pan, about 9 by 14 inches or two pans eight by eight inches. Bake in slow oven (300 degrees) about 40 minutes. Cool. Cut into bars or squares. Roll in confectioners' sugar. Makes about three dozen bars.

For a new twist to french toast, blend two parts peanut butter and one part honey, and spread a generous two tablespoons of the mixture and fry in a small amount of fat, or bake in a hot oven for about 40 minutes.

Oil of camphor, briskly rubbed in with a dry cloth, will remove white rings from furniture. Then polish with wax or regular furniture polish.

If you plan to close your home while vacationing this summer, here are a few "don't forgets" many people overlook: Don't forget to store candlesticks in a cool place, guard books against mildew by leaving charcoal to absorb dampness, take in screens and store matches in metal container.

Doctors List Rules For Boating Safety

Most people think they know what to do in a boat and yet the annual toll of drownings from boat accidents has already begun for 1954 and continues year after year, according to a bulletin issued recently.

In the hope of saving lives that might otherwise be lost in vacation drowning tragedies this summer, the bulletin lists the following instructions about what to do in a boat.

1. Take out only a boat that will float if it capsizes. That means a boat or canoe made of wood, or a metal boat with buoyancy chambers.

2. Include one or more life preservers in your equipment. They come in various forms, including cushions.

3. Hang on to the boat if it tips over or to a life preserver if you can't catch the boat. Or to any large floating object because it may have some buoyancy value.

4. Do NOT try to swim to shore unless there is no other way to save yourself. The reasons why swimming to shore is dangerous even for young, good swimmers are: (a) The distance is usually far greater than it looks; (b) Clothes handicap even good swimmers unless they are especially trained in the technique of removing them in water; (c) There is danger of heart failure or cramps for people who have not been swimming regularly and if the water is especially cold. Use of a life preserver or buoyant object will make swimming much safer if it is necessary to try to get to shore.

Of course, standing up, careless changing of places, drinking and horseplay in small boats all come under the head of reckless and dangerous behavior and should be banned absolutely at all ages, the doctors declare. Also overloading and use of leaky boats.

JOHN O.: Does cataract grow from the corner of the eye and would cataract make your vision cloudy in the corners first?

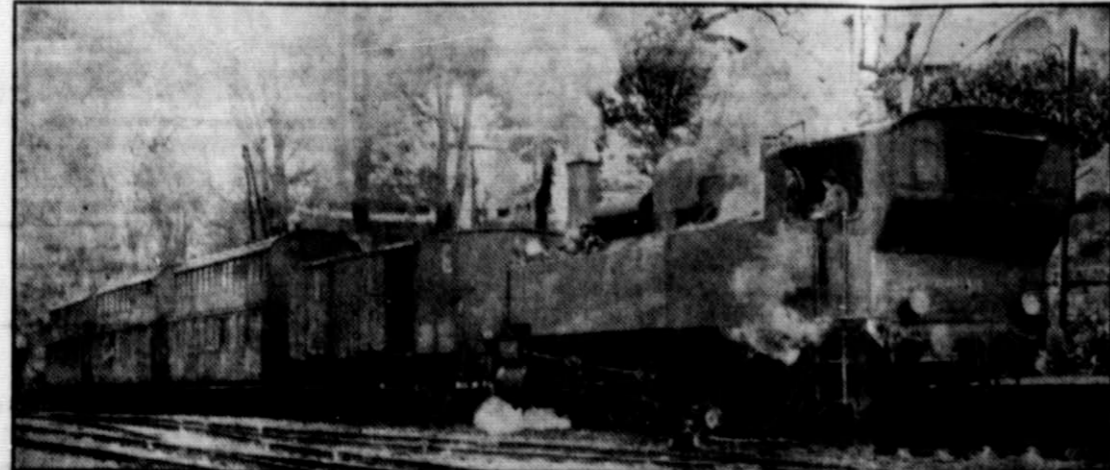

ANSWER: Cataract is a gradual cloudy of the lens. There is no fixed pattern of growth.

HMMMM—Emperor Haile Selassie of Ethiopia enjoys an eye-opening treat as he samples a glass of ice-cold lemonade. The traditional American summertime treat was served to the Emperor when he visited the Edwin Doty farm near Rochester, Minn., while on his tour of the United States.

INTERNATIONAL EMBLEMS—No matter what flag they fly, beauties acquire an allegiance of admiration from all the boys, everywhere. These lovely water skiers performed, from left, under the flags of Great Britain, France, the United States, Spain and the flag of the Confederate States of America, during a festival at Pensacola, Fla.

DREAM TRAIN—Looking like something out of this world, which it soon will be, this ancient tank-type engine puffs its way out of the station at Enghien Les Bains, France. It is nearing the end of its journey from the 1890's to oblivion and during all of its 64 years has shuttled commuters from Enghien to Montmorency. Buses will replace the locomotive and its three double-deck passenger cars.

Blueberry Cheesecake Is a Real Summer Delight

BY DOROTHY MADDOX

HERE'S a delicious cheesecake all your family will enjoy. It is glorified with a glazed topping of cultivated blueberries, and is as beautiful to look at as it is delightful to eat.

Blueberry-Glazed Cheesecake (Makes 8-10 servings)

Crust: One and one half cups graham cracker crumbs, 1/4 cup sugar, 1/4 cup melted butter. Combine crumbs and sugar. Blend in butter. Press mixture evenly on sides and bottom of 8-inch greased spring-form pan.

Cheesecake Mixture

Two 8-ounce packages creamed cottage cheese, 1 cup sugar, 2 tablespoons flour, 4 eggs, separated; 2 tablespoons melted butter, 1 teaspoon vanilla, 1 cup thick, sour cream; 2 tablespoons grated lemon rind.

Force cottage cheese through a coarse sieve. Add sugar gradually, then flour. When well blended, add egg yolks, one at a time, beating until very light. Add butter and vanilla. Fold in stiffly beaten egg whites. Stir in sour cream and grated lemon rind.

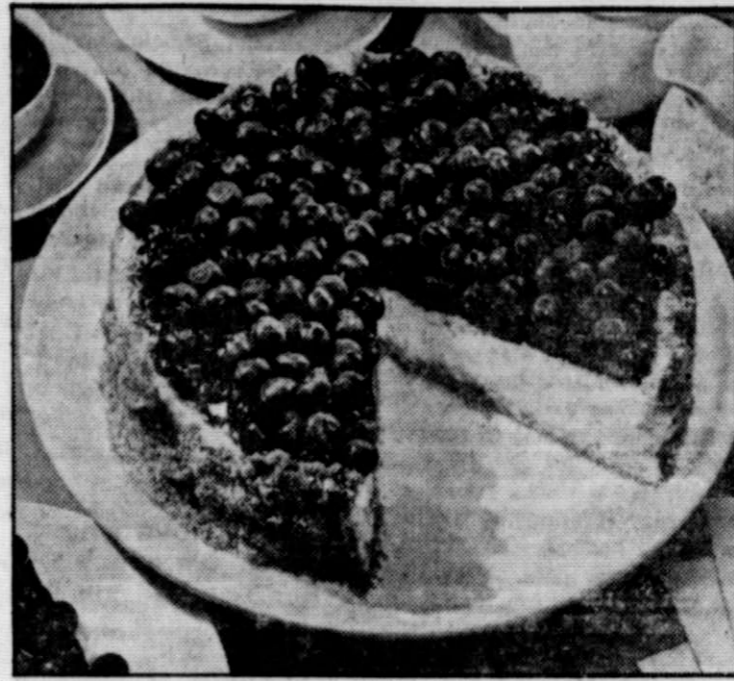

When smooth and not bubbly turn into crumb-lined pan. Bake in slow oven 275 degrees F. 1 1/2 hours or until firm to the touch. Remove from oven and set aside to cool.

Blueberry Glaze

Two teaspoons unflavored gelatin, 1/4 cup cold water, 2 cups fresh, cultivated blueberries, 2 tablespoons water, dash mace, dash cinnamon, 3 tablespoons sugar.

Sprinkle gelatin over the 1/4 cup water in small dish. Wash and drain blueberries. In saucepan, combine 1 cup of the blueberries and 2 tablespoons water. Bring to a boil. Drain berries, saving juice.

Press berries through a food mill or sieve. In small saucepan combine strained pulp, juice, mace and sugar. Stir to blend. Heat. Add gelatin and stir until thoroughly dissolved. Let mixture chill until consistency of unbeaten egg whites. Then spread over chilled

Blueberry cheesecake, served with a beverage, makes a wonderful summertime eating experience.

cheesecake and top this taste-treat with remaining 1 cup of cultivated blueberries.

Chill until frozen is firm.

Note: If frozen berries are used, thaw and proceed as with fresh blueberries. If canned blueberries are used, drain and process with fresh berries.

About Your Home

If you are tired of replanting your spring bulbs each summer, try naturalizing them in drifts. They will bloom year after year and you won't be troubled by the usual drying leaves because you cut them off with the lawnmower.

You will not get big blossoms this way but the effect can be beautiful. Don't try to naturalize the long-stemmed giants. Use common daffodils, hyacinths and crocuses. Take special care to protect the bulbs from moles.

Bulbs will multiply less rapidly. However, you can look forward to an extra dividend in bulbs every five years.

Plant naturalized bulbs informally in big free-form drifts. Use fifty or more bulbs of a single color for the best effect. Individual bulbs can be twelve inches apart in the drift.

If your lawn is shaded, it will not prevent you from naturalizing. By the time your shade trees are fully leafed out, flower buds for next year's bloom are already present inside your bulbs.

Naturalizing isn't a new idea. Our grandmothers used it. Try it for yourself and you'll find bulb-growing a lot more fun than you thought it could be.

Odds and Ends of This and That

In 15 years Mrs. Henry Stuewe, Westbrook, has collected an extensive display of miniature shoes representing 18 states and ten foreign countries. Harry Henning has a 5-year-old lemon tree, or plant, at Tracy, from which he has picked 13-ounce lemons. . . . When the critical illness of a son hindered the spring work of Mr. and Mrs. Edmer Wahlin near Alexandria, 27 neighbors gathered and cleaned up most of their timely chores. . . . Judy Breggeman, seven months, posed at Shakopee with her 90-year-old great-grandmother, Mrs. Sophia Stocker.

DOGGONE—He is, if you take the conventional view of this picture. However, if you turn this page upside-down, you'll see what the man at top of picture is looking at. The "doggy" haidro is the creation of "Bill," French cartoonist, and is on display in Paris.

FARM CROPPERS - 1954

DON'T TAKE CHANCES WITH ANIMALS. Better to chicken-hearted than bull-headed.

Public Bathing Pools Need Safety Measures

Fortunate indeed is the community with a lake in its "backyard." But even in the heart of America's vacationland, such communities are not too numerous. Hence, bathing facilities for our youngsters must, of necessity, oftentimes be of some artificial nature.

If your community is convinced that artificial bathing facilities are desirable for its youngsters it is wisest that proper sanitation and safety measures be given with the very start of the project. Steel or cement construction is recommended—with the bottoms painted a light color so that bathers can be easily seen at all times. Black-top or gravel bottoms have proved very unsatisfactory. They are difficult to clean, algae and other unsanitary growth soon develop; and because of the background, bathers are difficult to see below the surface of the water.

Regardless of the type of construction, the water should be constantly changed—at the minimum one complete change every eight hours is required. Disinfectant should be maintained in sufficient quantities and the water should be free from any foreign matter at all times. So clear, in fact, that a six inch black disc can be seen at a depth of at least ten feet.

Careful thought should also be given to the bathhouse facilities. Routing of bathers so that they pass through the lavatories on the way to the pool is important. Open roofed dressing areas are now found to be much more sanitary than totally enclosed rooms. Foot baths have not proved too satisfactory. It has now been discovered that if the water used to wash the floors contains a disinfective solution athlete's foot, and other infections of this type, can be satisfactorily controlled.

Safety precautions are also of utmost importance. Lifeguards should be on duty at all times the pool is open. Ladders, life buoys and poles, and life ropes separating the various depths are among the minimum necessary safety equipment. Diving boards should extend into the deep sections of the pool with at least ten feet of water below the high boards.

Swimming facilities are tremendous assets to any community—but only if properly constructed and adequately maintained.

Some Minn. Counties Have Indian Names

Gopher Historian, Minnesota Historical Society publication for Minnesota school pupils, analyzes the Indian names among the state's 87 counties. Anoka means in the Sioux tongue "on both sides" because the town of Anoka straddles the Rum river; Chippewa, of course, was named for the Indian tribe; Chisago is a combination of the two Chippewa words "kichi" meaning big and "sago" meaning beautiful—hence "beautiful big county."

Crow Wing county, properly translated by the early French, would have been Raven Feather county; Dakota and Isanti are for Indian tribes; Kanabec means snake, and Kandiyohi is "where the buffalo fish come." Koochi-ching is the Chippewa name for Rainy River, Mahnomon for wild rice, Wabasha for a line of Sioux chiefs, Winona for a cousin of one of these chiefs. Wadena was to the Indians a "little round hill," and Yellow Medicine was named for the bitter yellow root of the moonseed plant.

Straw flower earrings seem certain for popularity this spring and summer. Since most of them are very large, they look best when worn with very little other jewelry.

Bible Comment:

Society Needs To Practice True Morality

WE often read today of widely publicized divorces and extra-marital relationships in supposedly high levels of society.

Surely there ought to be a sort of "noblesse oblige" on the part of the well-placed privileged, which would help to establish and maintain sound moral and social standards in marital relationships, as in all other relationships.

This is not suggested in any Pharisaic or censorious spirit. Those whose marital lives have been happy and well adjusted might well thank God, and look with compassion upon those less fortunate, the victims of failure and error.

What is significant and of concern is the great lack of decency today in human relationships, the lack of consideration for others, and the lack of common sense and the weakness of will where moral and social issues are concerned.

When a large portion of the population has no religious affiliation or professed faith, the Commandments and the law of God, as they are accepted by sincere Jews and Christians, can have no essential sanction.

But the Commandments and the law of God are not arbitrary decrees. Their sanction is in their inherent right and wisdom, and the evidence of the rightness in human experience.

True morality comes down very much to a matter of decency and straightness. The essence of immorality is dishonesty and crookedness. The good man is the upright man—and "man" in this sense means woman also.

"The man who's always looking down his nose usually gets the wrong slant!"

Color TV sets contain more than twice as many parts as typical black-and-white sets, take three times as long to assemble and test before leaving the factory. That's why initially they will cost between \$800 and \$1,000.

The total figure would be an impressive one, if every business did its part. After all, it's in the best interests of the businesses affected since they are helping to pay the defense bill anyhow, with their taxes.

Americanism-- An Example

Recently the American Car and Foundry Company refunded over \$22,000,000 to the U. S. Army. The company explained it had saved that much money in filling government contracts for delivery of armored vehicles.

The refund was entirely voluntary. There was nothing in the production contract which required the company to refund anything. Yet the firm was able to increase efficiency of production, cutting unit costs, and thus was able to pass on the savings to the Army.

This example is one every American, and every U. S. business, should think about. An army spokesman said shortly after the refund was announced that it was the largest refund of its kind the Ordnance Corps of the Army had ever received.

If one company can save over 22 millions on its contract alone, what would be the result if most of them would effect savings?

Ticklers

By George

"This is my old instructor, come to help me with the diagnosis!"

Ten Word INTELLIGRAM

Check the correct word:

- (Alfred Perlman) (Robert Young) is the new president of the New York Central.
- Sir Winston Churchill recently received the Order of the (Bath) (Garter).
- The nationwide air raid drill showed we (are) (are not) fully prepared for attack.
- (Heroin) (Heroine) is a habit-forming drug.
- Our sun (is) (is not) a true star.
- Metal objects (do) (do not) weaken over the years.
- If it's 6 A.M. in Chicago, it's (5) (7) A.M. in New York.
- Washington is known as the (Mountain) (Evergreen) state.
- The (home) (factory) is the more dangerous locale.
- Nearly one-half of all legal liquor made in the U. S. is distilled in (Kentucky) (Virginia).

Check your answers, scoring yourself 10 points for each correct choice. A score of 0-20 is poor; 30-60, average; 70-80, superior, and 90-100, very superior.

Decoded Intelligram

1—Alfred Perlman, 2—Garter, 3—Are not, 4—Heroin, 5—Is, 6—Do, 7—7, 8—Evergreen, 9—Home, 10—Kentucky.

SPORTS AFIELD

By Ted Kesting

Almost invariably far more fish can be caught during certain types of rain than at any other time. The only reason many anglers don't know this is that they've never tried fishing in the rain. A steady, all-day rain without thunder or wind often produces spectacular fishing. Even a brief rain, without thunder and especially if it's without wind, causes far more productive fishing than you'll get before or after.

Thunder sometimes seems to put fish to the bottom and stop them from feeding—yet some of the most fast and furious fishing for pike that I've ever encountered has been during severe thunder accompanied by wind.

Here, I should warn fishermen who don't already know about it never to stay out on open water or wade a large pool far from high trees during a thunder storm—lightning strikes the highest object around and you may be it.

Which brings us to the subject of rainwear for fishermen. The makers of rainwear have done such nice things for us with light-weight, space-saving plastics. You should always keep rainwear in your tackle box or creel—think of it as belonging there as much as your lures.

There are raincoats of all lengths and there are coats and trousers of the same light material. You can get these with attached hood or with a separate hat.

Now, to prove that rainy-weather fishing works, let me quote Jason Lucas, angling editor of Sports Afield magazine:

"Late last season I was at a hard-fished lake during the middle of August when fishing is always at its worst. It was unusually bad even for then. But one morning when I awoke it was raining—a steady, monotonous rain with no wind. The first gray light in the sky found me anchored in the middle of the lake—all alone. I had a light dry-fly rod on which I put a small cork bass popper.

"Here's what I caught, anchored in that one spot, on that one popper: 75 bass weighing from 1½ to 6 pounds; 8 walleye weighing from 2 to 7 pounds; 6 pike from 3 to 9 pounds; 3 bluegills up to 1½ pounds; 8 crappies up to 2½ pounds.

"A total of 100 fine fish. Of course, I fished steadily for 16 hours but the thing was so fascinating that I couldn't force myself to go in until I'd landed an even 100 fish. This would have been impossible except in such a steady, all-day rain without thunder or wind."

"EMBRACING" WESTERN IDEAS—Some of the 1450 political prisoners of Nationalist China throw their arms wide during morning exercises on their prison island off the coast of Formosa. The detention camp, known as "Home of the Reborn," houses the one-time Communists, suspected Communists, and fellow-travelers until their political re-education is completed.

"GOOD OLD SUMMERTIME" SAD FOR FUR ANIMALS

Summer's hot, humid days used to be happy, carefree times for mink and muskrat. But not any more.

The dog days of July and August have become a favorite season for milady to shop for new fur coats and stoles.

This summer is particularly ominous for fur-bearing animals—the federal excise tax on furs has been cut from 20 to 10 per cent.

Mink Leads in Popularity

With mink fur leading in popularity, imports of mink skins have more than doubled in the past seven years. Domestic production also has doubled. Two and a half million mink pelts were marketed from 5,000 mink ranches last year, compared to 1,200,000 in 1946. An additional million skins were sold by American trappers in 1953, the National Geographic Society says.

Mink raising requires skill and patience. The high-strung little animals, cousins of the weasel, must be handled with extreme care.

Litters average three to five tiny kits and are so delicate they are left strictly alone for the first days following birth. Ranchers wait one or two weeks before even counting the offspring, lest handling harm the fragile creatures. A new-born kit weighs less than half an ounce.

Fur processors prefer domestic mink to imported, although the smaller, thick furred Labrador mink are usually of fine quality.

American mink ranchers improve their product through scientific feeding and care. Cross-breeding produces strange color mutations. Pure white and "pastels" are now favored over the still-popular silver-blue.

Muskrat fur wears well and can be made to resemble closely mink and Hudson seal. A let-out "mink-dyed" muskrat coat, carefully tailored, sells for approximately a sixth the cost of a full-length mink coat.

Sealskin has long been a popular item in coats, capes and trimming. Alaskan seal, almost wiped out a few years ago by indiscriminate slaughter, are now rigidly controlled by the Government. Only 3-year-old "bach-elor" males are pelted, leaving the breeding stock to rebuild the supply.

Other sealskins are imported, chiefly from Norway. "Long-Hairs" Coming Back
The demand for silver-fox fur

has diminished, although "long-hair" furs are gradually coming back. Surprisingly, the raccoon coat is enjoying a revival, but with one important change—it has lost its long-hair character through shearing.

Chinchilla breeding has grown throughout the United States. More than 12,000 chinchilla "farms," some breeding one or two pairs, some hundreds of animals, have sprung up in the last few years.

The first big public auction of chinchilla pelts is being held in New York City early this summer. The few chinchilla pelts on the market so far sold for about \$40 a skin. With 125 pelts required for a coat, chinchilla has been confined largely to trimming on other furs and to small accessories.

The lowly rabbit has practically disappeared from the fashion scene. Fur dealers blame the federal fur labeling act passed by Congress sometime ago. It prohibits the disguising of fur products under any other name.

"Neither dealers nor customers like to call a rabbit a rabbit," one furrier said. "So rabbit has passed out of the picture except as material for men's hats, and an occasional strip used as trim on cloth coats."

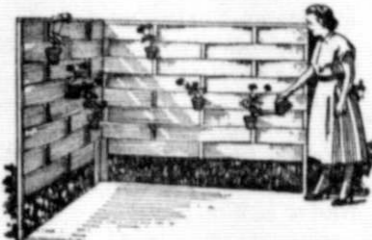

HEAT-HAVEN — There's no heat wave beneath the cooling waters of a lake near Excelsior, Minn., and Gene Lowell, member of the Minnesota Skin Divers Association, has donned helmet and breathing apparatus to go on a carp-spearing expedition in the soothing depths.

Basket Weave Fence

A NEW idea in fencing can provide privacy to your patio, or it may be used as a lawn divider. Some families have used this attractive basket weave design to screen an unsightly corner.

Built in units 6 feet long and 5 feet high, the fence may be set up with a 6 per cent advance over the corresponding 1953 week. The whole month wound up with a mere 2 per cent decline.

Pliable but strong Masonite Tempered Presdwood is used for weaving this fence between lumber supports. Available at lumber yards, the panels may be cut readily with a cross-cut saw. They take a beautiful paint job which, with the unusual basket weave design, will enhance the appearance of any lawn.

Flower pots may be hung on holders formed from wire coat hangers that are hooked over the Tempered Presdwood near a post. The plan may be obtained by sending 20 cents in coin to Craft Patterns, Elmhurst, Ill., and requesting pattern No. 436.

been other religious groups which sought to practice the same form of polygamy, although they have been gradually eliminated. That the idea has not been completely eliminated is illustrated by the raid in Arizona, which stirred up a surprising number of members of the polygamist cult.

Polygamy Gradually Being Eliminated

It is a bit surprising to learn that in 1953 an entire community of hundreds of persons were raided and placed under arrest by a force of more than 100 peace officers in the State of Arizona. Those arrested included over 100 men and women, some of the men being the father of more than twenty children and having as many as six wives.

The defendants comprise the principle membership of a Fundamentalist sect and claim they are true "Joseph Smith Mormons." They claim the Mormon church had no right to renounce the practice of polygamy (which it did years ago) and that interference with their religious beliefs in following this code is an infringement of their constitutional rights.

Officers raiding the community, near the Utah border in Arizona, found the community contained 263 children.

The existence of this community and the accepted practice of polygamy in it is something of a surprise. In past years there have

WINNER GETS ONLY THE CUP—Prize beauties Bobbie Lou Gouvei, left, and Royce Crosby display the 177-year-old Sir Thomas Lipton Memorial Trophy, which will be awarded to the winner of the Waikiki Yacht Club's Invitational Regatta, Oct. 25-31. Gentlemen sailors from all parts of the United States will race for the perpetual star-class trophy at Waikiki.

The SNAPSHOT GUILD

Reflected sunlight on the light surfaces of swimming pools, or beaches, make it easy to take excellent snapshots of your favorite people.

Take Your Camera When You Go for a Swim

At this time of year, almost everyone finds some place to go swimming. It may be at a famous beach, in a country club swimming pool, at the local lake or in the famed old swimmin' hole.

No matter where you do your high dives and your splashing, it offers a setting for good pictures to add to your collection of summertime fun snapshots.

The situation is colorful enough to be excellent color snapshot material. Furthermore, it is a situation in which all the odds are in your favor for getting top-notch color snapshots with the simple camera.

The secret of this is in the lighting. The bright summer sun is reflected by the water and the light sand or the white concrete walks around a pool. This reflected light fills in the shadows around your subject. In effect, you are lighting from all directions—without the slightest effort on your part.

With a natural set-up like that it is a shame not to take pictures. Speaking of swimming pictures, how would you like to take some pictures of divers in mid-air? You can, even with a box camera.

The secret is in your timing. And in the words "peak of action." Watch your favorite divers closely a few times. Notice that there is always one point in the dive, just before the downward plunge begins, that he or she seems to be momentarily suspended in mid-air. The diver is all but motionless at this moment called "peak of action."

That, of course, is the moment at which you take your picture. Even the speed of the comparatively slow boxtype camera will catch a shot like this without a blur.

Don't be afraid to experiment with picture-taking situations like this. It's fun. And you'll be surprised at what you can do.

—John Van Gulder

HERE'S HOW . . .

TO USE WOOD SCREWS

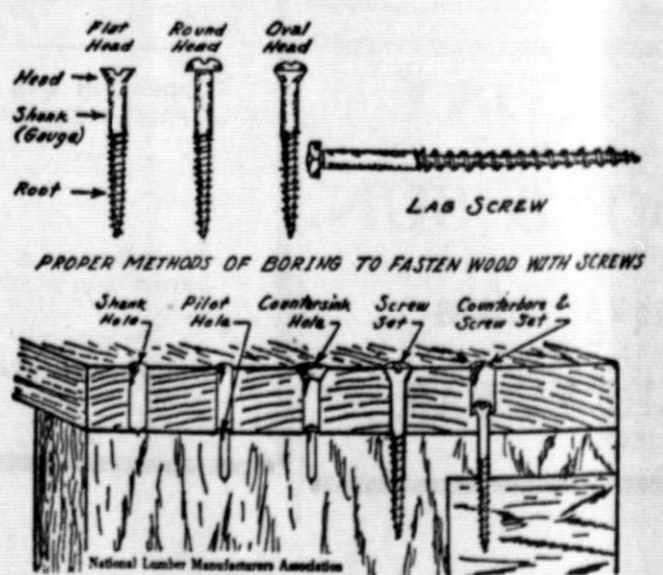

Where permanent holding power is needed, screws are superior to nails for most woodwork. Nails are faster, but screws make a tighter joint and can be easily adjusted or removed when necessary.

To set screw properly, it is necessary first to drill a hole large enough to take the shank of the screw. Within the shank hole is bored a pilot hole to accommodate the root of the screw.

Contrary to what might appear to be the case, the holes do not weaken the holding power of the screws; they increase it by preventing splitting of the wood.

Where heads are to be sunk even with or below the surface of the wood, a third hole, or countersink hole is required. The lag screw is a cross between a bolt and a screw. It is used as a screw, but has a bolt head. It is generally used for heavy work.

Important also is the condition of the screw driver. The tip of the screw driver must be straight. Otherwise it will slip and mar the head of the screw, often so badly that the screw cannot be turned.

Behind The Scenes In American Business

By Reynolds Knight

NEW YORK — Department store sales in the nation's major shopping regions are still having a hard time matching 1953 figures, but the gap is growing narrower.

New York, for the first three weeks of June, showed sales some 6 per cent below the year-ago figures. Then a couple of hot days drove shoppers into the stores for warm-weather clothing, and the June 26 week came up with a 6 per cent advance over the corresponding 1953 week. The whole month wound up with a mere 2 per cent decline.

Philadelphia's stores' sales had been running more than 8 per cent below June, 1953, and a good fourth week there also closed the gap to 2 per cent. However, last year's June was an especially good one, so merchants aren't complaining.

Los Angeles showed year-to-year declines for every week in June, one of them nearly 18 per cent. Year-to-year fluctuations in the West Coast metropolises are always large, possibly because of its relatively high transient population.

Despite the trend to the suburbs and the growing practice of Saturday closings, department store sales are important indicators of business conditions, and government economists are happy that they aren't so far off as they were earlier in the year.

MODERN TORTURE—Torture is not a bygone practice. American industrial products are subjected to it every day, and the American standard of living is raised thereby.

Tortures practiced in industry laboratories are largely responsible for the reliability and high quality of most consumer products. Use is seldom as tough on a product as the tests it undergoes before it's placed on sale.

A prime example of product torture is the subterranean sweat box beneath the research laboratories of the Sheaffer Pen Company. In writing tests to determine ballpoints' performance at 130 degree temperature with 85 per cent humidity, lab assistants give out long before the ballpoints show any ill effects. Testing takes place in a 10-by-14-foot cork-insulated vault which provides temperatures ranging from 20 to 140 degrees, and humidity from 15 to 90 per cent.

Anyone planning a trip to equatorial Africa this summer needn't worry about a quality pen's succumbing to the heat in the midst of a wish-you-were-here postcard, or malfunctioning because of the altitude of a transatlantic flight. The pen has had it worse at the factory.

THINGS TO COME — Wooden doors are now offered on a steel kitchen cabinet line at an extra 10 or 15 per cent . . . Short housewives can use those top shelves now with the help of a swing-down step . . . Form-fitting plastic lenses in a new kind of goggles afford protection against corrosive liquids as well as flying objects . . . A new lid-lifter claims to eliminate twisting or bending jar tops, so they can be used to reseal the containers . . . New plastic dispensing tubes bounce back into shape after being squeezed, ending the old argument as to who squeezed the toothpaste in the middle.

HEALTH INSURANCE — Experience with a health insurance program that's believed to be the broadest ever offered all employees of an American corporation was recently disclosed by C.I.T. Financial Corporation, the nation's largest independent financing institution.

The program was offered to C.I.T.'s 8,000 employees last October. Stanley B. Ecker, vice president and secretary, said the plan has two coverages: a basic hospital-surgical plan, and a major-medical-expense insurance plan. Company and employees share costs equally.

"We hope to set a pattern other corporations will follow," said Mr. Ecker. "The medical program, along with our comprehensive life insurance and liberal retirement policy, gives our employees freedom from worry about the financial hazards of illness, accident and old age."

Ecker said 92 per cent of all employees, and 99.5 per cent of all employees with dependents, elected full coverage. This means some 15,000 employees and dependents are covered.

BITS O' BUSINESS — New York savings banks sold some \$7.5 million of low-interest securities to invest in the New York Thruway issue . . . New claims for unemployment compensation declined in June . . . Controls on corn production will not mean higher prices, if quotations on futures contracts for corn delivery a year from now can be trusted.

The geoduck is a species of clam greatly favored on the West Coast.— Sports Afield.

Upon motion made, seconded and unanimously adopted, the meeting was adjourned to July 15, 1954 at 7:30 o'clock p. m.

William S. Martin
Village Commissioner

Adjourned Meeting July 15, 1954

The Village Board of the Village of Kewaskum, Washington County, Wisconsin, convened in adjourned regular session on July 15, 1954 at 7:30 p. m. in the Village Hall, its regular meeting place, with President C. Miller presiding and all Board members present.

Motion by Carl F. Schaefer, seconded by John Stelplflug and carried that the sum of four hundred dollars (\$400.00) be paid to Emma Honeck and K. A. Honeck, Sr. for an easement for the outfall pipe of the new sewage disposal plant, said easement to cover a width of thirty feet (30 ft.).

Trustee Carl F. Schaefer introduced the following ordinance and moved its adoption:

"AN ORDINANCE providing for the authorization and issuance of \$200,000.00 Sewage System Mortgage Revenue Bonds of the Village of Kewaskum, Washington County, Wisconsin, and providing for the payment of said bonds and other details with respect thereto."

The motion for the adoption of said ordinance was seconded by Trustee Jos. Eberle, and after due consideration thereof by said Village Board the President put the question and, upon roll call, all members voted "AYE." Thereupon the President declared the ordinance adopted. Said ordinance was then approved and signed in open meeting by the President and was attested to by the Village Clerk.

Motion by C. Sparks, seconded by J. Eberle and carried that an easement be obtained from Ada and Walter Meilahn for a water line which is to be laid across their property just south of the south village limits and east of Highway 45.

Upon motion by J. Eberle, seconded by J. Reigle and carried the Board adjourned subject to call.

William S. Martin
Village Commissioner

GROWING BETTER CROPS

August Shows Up Soil Condition

(University of Wisconsin photo)

Cool fall-seeded oat crop benefits plowed sweet corn field.

August is a revealing month both below and above ground for growers.

Starvation symptoms in crops show up to the greatest extent at this time, Dr. Kermit C. Berger of the University of Wisconsin soils department points out. "This is particularly true with nitrogen deficiencies on corn where the lower leaves turn yellow. While too late for this year, steps can be taken for next year's crop to prevent recurrence and proper fertilizers applied for top yields."

Growers can see that these nitrogen deficiency symptoms are most severe where soil has been eroded and top soil washed away, according to the Wisconsin specialist, whose nitrogen tester for corn is in wide use. "Much erosion occurs after harvest and plowing. It is a very good practice to seed oats in the fall after the corn is plowed right on the rough ground. In most northern areas the oats should be seeded before September 15 for a good growth before winter... when such a crop is winterkilled and decomposes in the spring, minor organisms causing this decomposition produce gum-like substances that loosen up the soil, giving a nice seed bed. The oats also help prevent erosion.

"This is one of the good practices making for better farms, larger crops," Berger emphasizes.

Erosion Costs Water

Eroded soils require more irrigation since they store less water and prevent deep rooting. Associate Extension Specialist Wallace A. Micheltree at Rutgers University says in discussing erosion showing up in August.

"Well-managed soils will return much more per irrigation dollar than poorly managed soils."

Micheltree reminds growers that more supplemental irrigation is needed now. "Crops will use 1 1/2" a week now compared with 1" in May and 9/10" in September. A rule of thumb during August, as in July, is to apply 1" every 5 to 7 days on sandy soils, 1 1/2" to 2" every 9 days on loamy soils, depending on depth of rooting. Loam soils will store 2" of water per foot of depth, sands less than 1."

On canning crops, tomatoes will send down roots 48", spinach only 12", sweet corn 36", potatoes only 21", the Rutgers expert notes. "Deeper rooting crops need frequent irrigation."

Orchard Danger Signs

Wind and water erosion can be expected in clean cultivated orchards in August, warns Dr. A. L. Kenworthy, Michigan State College horticulturist. "Poor moisture penetration may be corrected by a soil or cover crop program. Over-wintering cover crops, such as rye or wheat, should be seeded in the latter part of August."

Dr. Kenworthy also notes that poor cover crop stands in orchards are often correlated with magnesium deficiencies.

Your county agent and canner's fieldmen are ready to help on such problems.
