

Indians Win Dist. Playoff, Advance to Whitefish Bay Sectional Meet to Play Shorewood; Games Broadcast

WINNER OVER OOSTBURG AT PLYMOUTH, LOCALS FACE BIG MILWAUKEE SUBURBAN SCHOOL IN TOURNNEY OPEN-ER FRIDAY

The surprising Kewaskum High school Indians, second place winners in the Tri-County conference, have come a long way in WIAA basketball tournament play, a lot further than was expected.

Winners of the sub-district tournament at Campbellsport and the district meet at Winneconne, the Indians defeated Oostburg, Plymouth district champion, in a district playoff game at Plymouth last Friday night to advance to sectional tourney play at Whitefish Bay this week. The sectional tournament is the last stepping stone before the state meet at Madison. At Whitefish Bay Kewaskum bumped into Shorewood of the Milwaukee Suburban conference in the opening game Friday night. New Holstein met West Allis State in the second game of the evening as the smaller schools were matched against the large ones. District playoff winners, like Kewaskum, do not compete in regional play.

Shorewood has an enrollment of 1,226 pupils, more than the entire population of the village of Kewaskum, while Kewaskum's enrollment is 259 pupils, almost 1,000 less. Up to now in tourney play, the Indians were competing against schools their own size but are up against much stronger competition in the sectional. Too bad Kewaskum isn't located in another section of the state so that the team wouldn't have to buck up against the biggest and best in sectional play.

Kewaskum went to Whitefish Bay with an impressive 21-6 record for the season. While their opening opponent won 17 and lost 4, but the Indians weren't up against the high caliber of competition that Shorewood has experienced all season. Shorewood placed second in the Milwaukee suburban race, behind Whitefish Bay, New Holstein, Eastern Wisconsin conference champs, entered the tournament with a 19-1 record. That school's enrollment is 270. West Allis State had an 11-16 record and has a 639 enrollment. Shorewood was highly favored to win the meet as they defeated Hale 65-42 during their regular season and had a much better record.

Kewaskum's main handicap was its lack of size compared to the big Greyhounds. Forward Harold Klein (7-1) is the tallest of the Indians. He's also the squad's leading scorer with an 18 point average. Jack Walters is the top scorer for Shorewood with 40 for the season. Shorewood boasts the best scoring record of any Milwaukee area teams in sectional play. They scored 1,469 points for the season, an average of 67.1 per game. The Greyhounds already won one state championship in 1942 and could repeat this year. Kewaskum and Shorewood played at 7:30 p. m. and Hale and New Holstein at 9.

All of the sectional games are being broadcast over radio stations KEFZ, Fond du Lac, and WPLY, Plymouth, direct from the Whitefish Bay gym on both nights. The broadcasts are sponsored by local firms.

In the district playoff at Plymouth last Friday, Kewaskum's hot tourney team defeated Oostburg by a three point, 50-47 margin. By winning this one the team advanced further in tourney play than any other one in this area. This is the first time in a number of years that Kewaskum has reached sectional competition. They have been there before but never won.

Coach Ernie Mitchell's charges were trailing by a 37-33 margin going into the final period at Plymouth and finished the last eight minutes with a 17-point blast. Don Bradke led the Kewaskum scoring with 22 points on eight baskets and six free throws. Harold Klein flipped in 12 points and "Pete" Peterson added 10. Center Krancenk paced Oostburg with 15 markers. The Indians outscored Oost-

Chevs Trim Bells, Tie for Second Half Title; 1st Half Playoff Sunday

The Kewaskum Chevrolets beat Campbellsport for the second time Sunday night by a 71-59 score to gain a tie for first place in the second half. This final contest of the regular season was played on the Bell floor. The season closed with the Chevs and West Bend deadlocked in first place with five wins and one loss apiece. But according to Manager "Cisco" Backhaus Kewaskum's protest of the recent loss to Mayville may be allowed and this would give the Chevs undisputed first place in the second half. Mayville had two "ringers" in their lineup for this game.

This Sunday night at Campbellsport at 8 p. m. the Bells and Kewaskum will play off for the first half championship. The Bells, Chevs and West Bend all tied for the title. Campbellsport beat West Bend in the first game of the playoff series and Sunday's winner will determine the champion. This tilt was scheduled to be played at Horicon on Thursday night but the gym was not available. So it was decided to play the tilt either here or at Campbellsport and the latter won the toss.

Last Sunday's contest at Campbellsport was not as close as was anticipated. The Chevs had a hot first quarter and pulled away to a sizable 23-6 lead. But they bogged down in the next period and were outscored by the Bells, 16-8. This made the halftime count 31-22, Kewaskum. The scoring was quite even in the third stanza which ended 44-37 and the tilt was still quite close. The Chevs pulled away again in the final quarter, netting 29 points to the opposition's 13 and winning easily.

Frankie Kruezer had one of his best nights and took scoring honors with 26 points. He made only five field goals but dropped in an amazing 16 free throws besides playing a good all-around game. Don Meisenheimer also played well and added 14 points, followed by Hanrahan with 12. The Campbellsport scoring was evenly divided between seven players with Webster's eight being high.

Fifty-nine personal fouls were called, 35 of them on the Bells.

FINAL STANDINGS (Second Half)

Team	Won	Lost
Kewaskum	5	1
West Bend	5	1
Mayville	3	2
Campbellsport	3	3
Horicon	2	3
Rosendale	2	4
Cedarburg	0	6
Scores Sunday-Kewaskum 71, Campbellsport 59; West Bend 69, Cedarburg 60.		

RIVERS TEAM SWAMPED BY HARTFORD IN FINAL GAME

The local Land o' Rivers team closed their season at Hartford Sunday and were snowed under by the second half champions, 102-51. Kewaskum failed to win a game in the second half, finishing in last place with 0-7.

Hartford led all the way, their big guns being Renzaglia with 24 points, and Bliss with 19. Seefeldt's 15, P. Dreher's 12 and Hawig's 11 were best for the losers.

IN THE SERVICE

BRUESSEL JOINS NEW DETACHMENT IN KOREA

Pvt. Jake K. Bruessel, has notified his mother, Mrs. J. Bruessel, Kewaskum, that he has again been moved and is with another new detachment in Korea. He is with the 28th Military Police Co. His present address is Pvt. Jake K. Bruessel, U. S. 55479736, 28th Military Police Co., A.P.O. 971, 5 Postmaster, San Francisco, Calif.

burg at the free throw line but trailed in the field goal department in the exciting game played before a large number of local fans.

Regal Ware Guards Get Air Defense Award

(Photo courtesy West Bend News)

Four employees of Regal Ware, Inc. were honored recently when they were presented with awards by the Air Defense Command in recognition of 5,250 hours spent on observation duty at the guard gate of the local plant.

Sgt. George L. Jacoby of the Air Defense Filter Center at Green Bay is shown in the above photo making the presentations to right to left, Supervisor Leo Wietor, Emil Yeadeke, Paul Hoffman and Henry Uelmen.

This quartet watches over the communities adjacent to Kewaskum, covering over 50 square miles of territory, 24 hours a day, protecting the area and those further south from penetration by hostile aircraft.

All of these men who scan the skies are combat veterans of the two Great Wars and appreciate the value of an alert nation against possible enemy "sneak attack" by air.

Paul Hoffman and Henry Uelmen saw service in World War I in France while Emil Yeadeke and Supervisor Leo Wietor were in the Caribbean and European theaters during the second World War. This combination of the Combat Veterans of two World Wars who continue to be of service to their country should give incentive to many who think that "it can't happen here."

Paul Hoffman and Henry Uelmen saw service in World War I in France while Emil Yeadeke and Supervisor Leo Wietor were in the Caribbean and European theaters during the second World War. This combination of the Combat Veterans of two World Wars who continue to be of service to their country should give incentive to many who think that "it can't happen here."

The other ratings were Darlene Nischke, Judy Dobyns and Sue Weddig; B. Leroy Gross, Richard Roessel and Sandra Grubbe, C. L. humorous declamations, Judy Weddig, Rosalie Below, Audrey Krau, Zora Stark and Adeline Ketter received B ratings in serious declamations. Buddy Isorland, Kathleen Schultz and Barre Murre received B ratings in the extemporaneous reading.

The judges were Mr. Somsen and Miss Balistreri from West Bend, Misses Rizzo and Deifeld of the school staff were advisors.

Mrs. Fred Miller and Miss Ione Terlinden of Kewaskum left with a group of 150 Milwaukee Braves Boosters by train from Milwaukee Sunday morning for Bradenton, Fla., where their favorite team is in spring training. They will see five exhibition games there and also take in Miami and Havana, Cuba. The second annual "spring training" tour of the Boosters lasts two weeks. The group will return home Saturday, March 19. Besides seeing the ball games, the tour includes many places of interest.

Prize winners in sheephead at the tournament held at Heisler's tavern Monday night were: 1. Arnold Probst, 48-4-44; 2. Louis Heisler 46-4-42; 3. Fred Troedel, 46-8-38; 4. Alex Kudek, 40-19-30; 5. Boyd Smoley, 31-5-3; 6. Syl. Serwe, 20-4-26.

12 LOCAL LEGIONNAIRES BOWL IN STATE TOURNAY

Twelve members of Robert Romaine Post 584 of Kewaskum bowled in the state American Legion bowling tournament at Chippewa Falls Saturday and Sunday. Those who made the trip north to bowl in the team events, singles and doubles were: Ray Zelmet, Lenny Raubunas, Lee Hoefck, Gene and Harlan Gruber, Merlin Dreher, Bob Staehler, Darwin Bruessel, Harry Koch, "Tiny" Terlinden, Alex Kuelauskas, and Jerome Stautz.

Some of the local members of the West Bend K. of C. Council also bowled in the state Knights of Columbus tournament at Milwaukee Sunday.

Robert G. Hintz, Racine, who resigned his position as welfare director of Racine county, has accepted the position of Washington county welfare director. He will succeed Eugene A. Brumm, who was dismissed effective last Dec. 19. Brumm's discharge was upheld Monday by the State Personnel Board in Madison.

Kenneth E. Dukert, Hartford, investigator for the Washington Co. welfare department had been acting director of the department in the absence of a department head.

A writ of certiorari hearing in Brumm's dismissal is now pending in circuit court at West Bend. William Marth, attorney for Brumm, was scheduled to file a brief in the case by Friday morning with Dist. Atty. Lee Goring allowed five days to answer. Judge William O'Neill of Milwaukee, who is sitting on the case, is expected to hand down a decision following the filing of briefs, possible before April 1 as the new welfare director is scheduled to take over his duties at that time.

Alfred Rode, chairman of the Washington County Welfare Board, Saturday confirmed the appointment of Hintz as the new county welfare director. Hintz was offered the position last week when it was learned that he was available, having requested the State Welfare Board for consideration on a transfer basis.

Hintz is 29, an Air Force veteran of World War II, and a 1948 graduate of the University of Wisconsin. He served as a case work supervisor for Walworth county before being appointed Racine county welfare director on July 1, 1953.

HONOR MOLDENHAUERS ON GOLDEN WEDDING

Mr. and Mrs. Paul Moldenhauer of the town of Kewaskum were honored by the Ladies' Aid of St. Lucas Ev. Lutheran church Sunday afternoon on the occasion of their fiftieth wedding anniversary. A two o'clock service in the church was followed by a social hour and at four o'clock a dinner was served in the church parlors.

PARISH BAKE SALE

The Women's Guild of Peace E and R church will sponsor a bake sale on Saturday, March 26, at 3 p. m.

Paul Landmann Resigns As School Board Chairman, Succeeded By Melvin Riley; Call Reconsideration Meeting

Last Closed School Dist. in County is Eliminated

The Washington County School committee has now completed one of the first tasks assigned to it by the legislature, that of doing away with the closed school district. A closed school district is one that does not operate a school but sends the children residing in the district to a neighboring school.

At a hearing at the school house in the village of Germantown on Wednesday, March 2, the proposal of the school committee to attach the last such closed school district, School District No. 9 of the own of Germantown, to Jt. School District No. 5 of the village of Germantown received overwhelming approval. The proposal was approved by votes of 11 to 2 by the electors of District No. 5, and 14 to 6 by the electors of District No. 9. The unanimous approval of the school boards of both districts was given at a meeting of the boards with the school committee following the hearing. The committee will shortly issue the necessary orders affecting the attachments.

Thus by July 1 of this year there will not be any non-operating school districts in Washington county. The right of parents in all of Washington county to send their children to public school without personal liability for tuition is now secure. The committee, for the (CONTINUED ON LAST PAGE)

SPECIAL MEETING MONDAY TO RECONSIDER NEW HIGH SCHOOL SITE, PAULA PETRI NAMED TO BOARD

Paul Landmann, chairman of the Kewaskum school board, resigned his position on Feb. 28 after serving for 15 years on the board. His reasons for resigning were that he felt he had served long enough and didn't care to continue any longer. Melvin Riley, principal of the Barton State Graded school, Monday night was elected chairman of the Kewaskum Union Free High School District No. 2 school board at a special meeting to fill the vacancy created by the resignation of Landmann.

In addition to the appointment of Riley as chairman of the board, the group appointed Miss Paula Petri of Wayne, former teacher, to the board to bring the body up to its normal complement of members. Miss Petri had not formally accepted the position at the time of this writing. She had five days to acknowledge her appointment according to Chairman Riley. Monday night's special session was held at the Kewaskum High school and was called following Landmann's resignation.

A special meeting of the electors of the school district has been called for 8 p. m. Monday, March 14, in the high school gymnasium to act on a petition submitted to the board asking that the selection of the Rosenheimer-Volm tract of land for erection of the new high school be reconsidered.

At this meeting Monday voters will decide whether they wish to retain the Rosenheimer-Volm site for the erection of the new school as approved at the Feb. 14 meeting of the electors of the district or if they wish to reconsider their action and possibly consider other sites for the project.

The special meeting was called following the filing of petitions signed by many electors with the school clerk. At the Feb. 14 meeting, electors, by a majority vote, decided to purchase the Rosenheimer-Volm tract of land for the school site. Some time after the meeting, petitions were circulated requesting that the selection be reconsidered.

The school district includes the village of Kewaskum and the towns of Kewaskum, Barton, Farmington and Wayne in Washington county and Ashford and Auburn townships in Fond du Lac county.

This new school site proposition has been the main topic of discussion all over the district in recent weeks, especially since the petition has been filed. In some instances the discussions have become feverish and resulted in heated arguments. As a result a very large turnout of the voters of the district is anticipated at Monday's meeting.

"TRAVEL RAVELINGS" TO BE PRESENTED TO LOCAL CLUB

When the Kewaskum Woman's club meets next on Saturday afternoon, March 12, at 3 o'clock in the municipal building, Miss Mary Dunne of Two Rivers will present "Travel Ravelings". She has traveled extensively, having made three trips to Europe, one to the Orient, and will take those present on an imaginative trip to foreign lands. During the past year she was in England as an exchange teacher. Hostesses will be Mrs. A. M. Hron, Mrs. W. F. Schultz, and Mrs. P. N. Landmann.

DRIVER'S SEAT BURNS

The seat of a car owned by Robert Gavin caught fire while it was parked at the Heinemann Dairy at about 5:30 a. m. Sunday and the fire department was called to put out the blaze. Gavin had already left on his route with a Heinemann truck when fire was discovered by a neighbor. Only the car seat was damaged.

MARRIAGE LICENSE

Ardell Cardarelle, Sheboygan, and Marie Burgert, Kewaskum; wedding April 2

NOTICE OF NOMINATION

Village of Kewaskum
County of Washington
State of Wisconsin

NOTICE IS HEREBY GIVEN that nomination papers are available at the office of the Village Commissioner for the following offices to be elected at the annual Charter election of the Village of Kewaskum, Washington County, Wisconsin, to-wit:

- One president for two (2) years to succeed Charles Miller.
- One trustee for two (2) years to succeed John Stollpflug.
- One trustee for two (2) years to succeed Joseph Eberle.
- One trustee for two (2) years to succeed Charles Sparks.
- One supervisor for two (2) years to succeed Elwyn M. Romaine.
- One assessor for two (2) years to succeed Edwin Bartlett.
- One justice of the peace for two (2) years to succeed Lyle Bartlett.

Nomination papers must be filed with the Village Commissioner not later than 5:00 p. m. Friday, March 18, 1955.

William S. Martin,
Village Commissioner

GRACE BEACRAFT GUEST OF HONOR AT BIRTHDAY PARTY

Grace Beacraft, daughter of Mr. and Mrs. E. Beacraft of Kewaskum, was the guest of honor Saturday, March 5, at a birthday party. Fun-fest games were played with prizes for the winners and lunch was served. Guests included Jeanne Felix, Carol Bohn, Mary Ann Weirnet, Lucy Bogel, Judy Puerling, Catherine Guttman, Kathleen Hron, Diann Ramel, and Judy Heisdorf.

R. FOERSTER GRANTED HERD NAME TO REGISTER CATTLE

Roman Foerster, Kewaskum, has been given the privilege of the exclusive use of the name "Dandy Acres" as a herd name in registering his purchased Holstein-Friesian cattle. This prefix name is granted and will be recorded by The Holstein-Friesian Association of America.

Over 1250 prefixes were reserved for breeders in 1954.

RESERVE UNIT MEETS HERE

Flight "B" of the 964th Air Reserve Squadron held its regular meeting at the Kewaskum American Legion clubrooms at 8 p. m. Wednesday evening, March 9.

HOSPITAL NEWS

Adam Wiesner, R. 3, Kewaskum, was removed to St. Joseph's hospital, West Bend, on Wednesday, March 2, in the Kewaskum firemen's ambulance with minor injuries suffered in an auto accident on Gross' curve north of New June.

BIRTH

'55 Looks Bad For Accidents

It is too early yet to predict that the number of highway deaths in 1955 will rise sharply, but in several areas there is already disturbing evidence that the accident toll on the highways is increasing ominously.

For instance, in Maryland twenty deaths on the highways were recorded in the first ten days of January. At that rate, if it continued, there would be over 60 highway deaths in this state alone, this month. That would be way over the 1954 death rate.

On one recent week end, a Washington D. C. newspaper reported thirty-two deaths on the highways of the District, Virginia and Maryland. And that was not a by the extensive use of evergreens, particularly boxwood. All this is part of an attractive scene that gives the winter visitor the feeling he is seeing Williamsburg at its best.

holiday week end. Eight people were killed in one head-on collision on this week end, a car with five men skidding a thousand feet and then crashing into a car head on, carrying three occupants. All were killed.

Five teenagers, three of them girls, were killed in another of the accidents making up that 32-death week end. The causes of these accidents—the one claiming eight lives and that killing five—were listed as speed and reckless driving. But speed is the great killer of 1955, it appears.

One reason for this great speed is the increased power of the engines in 1955-model cars. One can't condemn a mechanical performance, which 1955 automobiles have, and the blame must be laid to drivers who lack judgment.

As of right now, it looks as if 1955 might be a record year for highway deaths, if caution is not exercised. With the greater speed now attainable in many models, a lack of judgment results in more serious results than here-to-fore.

Jet Non-Stop Flights A Reality in 1956?

An aircraft corporation is reported to be offering commercial airlines an aircraft which would be the first jet plane to be used in trans-atlantic service. The U. S. firm is reported to be concentrating on a turbo-prop aircraft similar to a Super Constellation.

Such an aircraft would be able to fly over 400 miles per hour and could make New York-Paris trip, non-stop, in about nine hours. A turbo-prop engine is one which utilizes propellers, on the rear of the engine, which are driven by the exhaust gases of the jet engine.

Such an engine is considered a first step toward conversion to full jet types, such as have been used by one British company, and which power the famous Comets.

Meanwhile, the race for a jet aircraft that will span the Atlantic, non-stop, on an over-night schedule, continues and concerns other U. S. airlines. Another company is planning to have a piston-driven aircraft, the DC7C, ready for delivery in early 1956.

In Memoriam

And under this—a lonely pl... Lies Rufus Rastus Babbitt; He looked the part, a gunner thought, And shot him for a rabbit. Beneath this weeping willow tree Lies Edward Everett Bier, Who, by another hunter, was Mistaken for a deer.

From all present indications, it appears that jet non-stop flights to Paris and London, on U. S. airliners, will be available by 1956, or even earlier.

Of the half million people who visited Colonial Williamsburg last year, relatively few came during the winter months.

For the most part they either preferred other seasons, or were obliged to do their traveling in spring, summer or fall.

But they, who made their trips in the crowded, peak periods, missed something. As an AAA travel writer found recently in Williamsburg, winter has its distinct charms, attractions—and advantages.

Principally, but by no means exclusively, it is a matter of pace. Williamsburg is a wonderful place to be at any time, but when the throngs descend, en masse, later in the year it becomes rather difficult to tour at one's own tempo.

At least, it is considerably more difficult than during the winter. Then, uncrowded and unfettered, the restored Virginia capitol gives the impression of being closer in spirit to its original early self than in any other season.

The visitor can walk in leisure along historic Duke of Gloucester Street and visit the craft shops where more than a dozen trades of the Eighteenth Century have been re-established. And he can sit with the craftsman, if he wishes, and be well indoctrinated in hand ways of making things by hand.

The blacksmith, for instance, forges lighting fixtures and fire tools. The baker takes bread and spicy gingerbread from the brick ovens. Other craftsmen and artisans are at the cabinetmaker's, the apothecary shop, printing office, boot and shoemaker's, and the weaving shop. All these are open daily free of charge.

The winter visitor has also the special treat of enjoying the several colonial taverns at their best with crackling fires and even singing hosts to lead evening entertainment. And there is more leisure and fewer crowds in the conducted sightseeing through Williamsburg's magnificent restored and reconstructed buildings and homes. The guides clearly have more time to personalize the tours. This same advantage is manifest at lodging places. The only feature of later seasons lacking at the Inn, Lodge and popular motor courts is congestion. By and large, rates are lower, too.

Williamsburg is almost as noted for its 70 acres of gardens as for its historic buildings. Even in winter these Eighteenth Century gardens are held lush and green.

THOSE WERE THE DAYS

KERRY DRAKE

MARY WORTH'S FAMILY

STRICTLY FRESH

PILFERER in Columbus, Miss., got very little from the grocery cash register; lingered to eat sardines and crackers, and to smoke best cigar in stock. Ungrateful fellow didn't even bother to ring up "no sale."

Police-bus operators' representatives in Reading, Pa., were irked no end when a workman in room above the one in which they were meeting pushed a plank through the plaster. Poor man probably meant well—he was just applying a new plank for a safety platform.

Young lady name of Nickel in Pittsburgh, Pa., gave short change to a would-be burglar. Shoved him right out the front door.

Research Key To Progress

Barton Urges All to Aid Fund for Heart Research

Bruce Barton, author and advertising executive, urged national support of the research program of the American Heart Association and its affiliates through the Heart Fund. "A well-known surgeon once told his students," Mr. Barton said, "that a man can die from a severed main artery in a few minutes. But you can save him in a few seconds . . . if you don't hurry!"

asking you to support right now. "Diseases of the heart and circulation destroy three-quarters of a million lives each year," he said. "With the help of our dollars, premature deaths can be greatly reduced."

"Research is the key to medical progress," Mr. Barton continued. "It has already been responsible for new drugs, new surgical techniques, new methods of prevention, care, treatment and rehabilitation which are saving many lives today. By giving to the Heart Fund, you support research and help your heart."

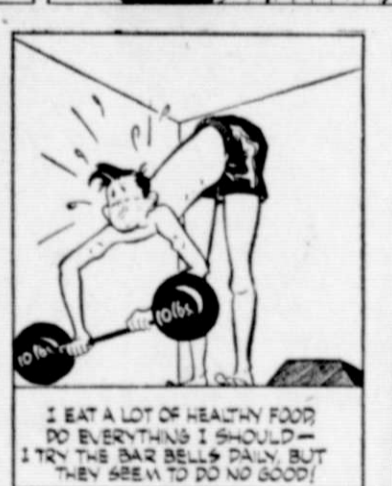

"Use The Stairs"

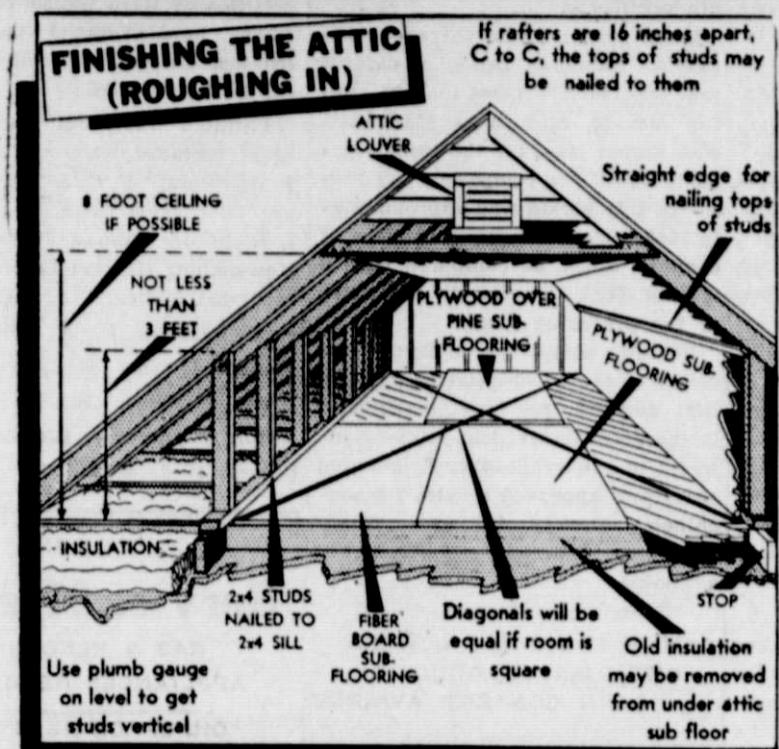

HAIR-BREADTH HARRY

By ART BEEMAN

There's Extra Room Upstairs

The cheapest way to get extra living space is to finish off one or two rooms in the attic. The home owner can do it himself if the space is available. Such rooms can be both comfortable and attractive. The following letter is typical of several received recently.

QUERY:

Our family has increased during the last few years, and we have only a five-room house. There is space enough in the attic for two good sized bedrooms. How much would it cost to have these finished off, or could I do it myself? I have never done any carpentry work worth mentioning.

ANSWER:

The average person can do a reasonably good job of finishing an attic if he is willing to follow directions and do a little hard work. He probably will make some mistakes, but even professionals do that.

The cost of having an attic finished will depend upon the size, number of rooms, and what you want in finishes, plumbing and heating. It is impossible to state a price without actually figuring the job. It is usually safe to figure the cost of materials; then multiply by two.

You can do the job yourself for half the cost of hiring it done. There may be contractors who will do it for less. Why not consult the ads in this paper?

The complete job of finishing an attic is so large that it will be necessary to use several articles to explain all of the necessary construction.

One of the first things to consider is the strength of the present attic floor joists. They should be at least 2x6s, and not more than 16" apart, center to center. If they are not that strong, they should be reinforced by nailing splints to the present joists. If there are load bearing partitions below, the ends of the splints may rest on these. If there are none, the splints should go all the way across the outside walls.

Do not forget the building permit. In some cases, the finished rooms in the attic are included with the original permit. If not, you must have one. It will be necessary to submit a sketch or drawing, showing exactly what you intend to do. You can do this yourself. It is not necessary to have an architect. Present this to the Department of Building Safety.

The height of your present attic will determine how high the ceilings and walls can be. The ceilings should be as near 8" as possible. Some are less. Sometimes it is necessary to make the sidewalls as low as three feet in order to have the room wide enough. But it is advisable to make the sidewalls as high as possible.

One of the first problems is to decide upon, and install the type of subflooring you wish to use. The wall framework must set on top of the sub floor.

The best and easiest type of subflooring to install is 3/4 inch plywood. It is squeak proof, and makes a very firm floor. It makes an excellent surface for tile or linoleum.

Ordinary pine flooring may be used for the subfloor. Then if you wish to use tile or linoleum, cover this with 1/8-inch plywood or tempered masonite.

If sound proof insulation is desired, use soft fiber board for the subfloor and cover this with thin plywood or tempered masonite.

Have your lumber dealer quote you prices on the various types of flooring mentioned.

Select good straight 2x4s, and lay out the size and shape of the room, on top of the subflooring. These 2x4s will serve as the sills for the sidewalls. Measure

Start To Correct Tooth Problems Early

A generation ago, the advice given to parents of young children with teeth that did not come together properly was, "Let them alone. Nature will correct it."

Today it is realized that such natural correction is unusual. Children may not "outgrow" it. The condition should be watched carefully by the dentist so that any necessary corrections can be started at the proper time.

To meet the problem, the dental specialty of orthodontics has been developed.

These experts agree that when corrective treatment of abnormal tooth alignment is needed, it usually should be started by the ninth year.

There are different methods for bringing teeth into proper alignment. In some cases, it is necessary to extract some teeth to make room. In all cases, some sort of fixed wire band is applied to the teeth to guide them into position by pressure.

Since these appliances must be adjusted to increase tension appointments with the dentist will be frequent during the first few months.

How long will orthodontic treatment take? Dentists can only give estimates. Three years might be an average length, although some cases will require only a few months. If the problem is only one of aligning teeth, 12 months would probably be enough.

Parents often ask, "Will the braces cause my child's teeth to decay or become weakened?"

Dentists explain that careful brushing will remove the danger of decay. Some appliances can be removed for each brushing.

There is no possibility of weakening the teeth which are moved. After the treatment, they are as firm as ever.

While orthodontics is most frequently done on children and young people, it is now being extended to older groups.

the diagonals of the floor space. The diagonals should be the same if the room is to be square or rectangular. When you have the space you want, and have it square, nail the 2x4s in place with 12d or 16d nails. Drive one nail in each floor joist.

Cut the studs the desired length. One end should be square. The other end, which is nailed to the rafters, should be cut at an angle.

Toe-nail the square end to the sill. Plumb the stud with the plumb gauge on a carpenter's level. It should be plumbed on both sides. A straight edge may be tacked to the rafters in order to get the studs all vertical without having to plumb each one. Use at least two nails in each joint.

Sarah Anne's COOKING CLASS

Superb Treat You'll Want To Repeat

A delicious dish! That's what every cook likes to serve. And, that's exactly what she will serve when she brings "Apple and Sweet Potato Casserole," flavored with maple-blended syrup, to the table.

Putting together the ingredients for this casserole is the simplest of things. Sliced sweet potatoes and sliced apples are arranged in a baking dish in jiffy time. Maple-blended syrup, mixed with salt and melted butter are poured over the top and the dish is put to bake. Then for 45 minutes you can forget the whole thing. Without cover, it continues baking for 30 minutes.

Plan to serve this casserole with a meat loaf or some other meat dish that requires at least 1 hour to bake. In that way you'll not only save time but cooking fuel as well. And, you'll be serving a treat the whole family will want to repeat.

Apple and Sweet Potato Casserole

- 5 cooked medium-sized sweet potatoes
- 2 green apples, cut in 1/4-inch slices
- 1/2 cup Log Cabin Syrup
- 1/2 cup melted butter
- 1/2 teaspoon salt

Cut sweet potatoes crosswise into 1/4-inch slices and place half of the slices in greased baking dish. Arrange apples on potatoes and cover with remaining potatoes. Combine syrup, butter and salt and pour over top. Cover and bake in moderate oven (350° F.) 45 minutes. Remove cover and continue baking 30 minutes longer, basting frequently. Makes 6 servings.

These recipes are printed by request.

Orange Endive Salad

- 1/4 bunch curly endive
- 2 large oranges, peeled and sliced
- 1/2 large Bermuda onion sliced
- 1 clove garlic cut in half
- 6 tablespoons salad oil
- 2 tablespoons tarragon vinegar
- 1 teaspoon sugar
- 1 teaspoon salt
- 1 teaspoon paprika

Tear endive into bite-sized pieces in salad bowl. Arrange orange and onion slices over endive. Combine garlic, salad oil, vinegar, sugar, salt and paprika in bottle. Shake well. Remove garlic and pour dressing over salad. Toss lightly.

Barbecued Spareribs

- 3 lbs. spareribs
- 1/2 cup butter or margarine.
- 3 large onions
- 1 can consomme
- 1/2 cup chopped green peppers
- 1 cup tomato sauce
- 2 tablespoons wine vinegar
- 1 tablespoon paprika
- 2 tablespoons chili powder
- 2 tablespoons brown sugar
- Tabasco sauce

Heat oven to 425 degrees. Cut spareribs into easy to handle pieces. Bake about 30 minutes or until brown on both sides. While spareribs are baking, cook chopped onions until golden brown in melted butter or margarine. Stir in consomme, green pepper, tomato sauce, vinegar, paprika, chili powder and brown sugar. Cook just to the boiling point, do not boil. Taste and add Tabasco to taste. Reduce oven heat to 350 degrees. Pour sauce over spareribs and bake 1 hour or until tender. Baste at 15 minute intervals.

Lemon Tarts

- 3 eggs
 - 1 cup sugar
 - Juice of 1 large lemon
 - Few gratings of lemon rind
 - 2 tablespoons melted butter
 - Pastry
- Line tart pans with uncooked pastry. Beat egg yolks well and add sugar. Cream and add lemon juice, lemon rind and melted butter. Add well beaten egg whites. Pour into tart shells and bake in an oven 350 degrees until set.

Fish Fillets

- 2 lbs. fresh or frozen fish fillets
- 1/4 cup salad oil
- 2 teaspoons vinegar
- 2 teaspoons chopped onion
- 2 teaspoons paprika
- Pepper
- 2 teaspoons salt
- 1 cup flour
- 2 well beaten eggs
- 1 cup fine bread crumbs
- 1/2 cup fat

Wipe fillets with a damp cloth. Cut in serving pieces. Mix salad oil, vinegar, onion, paprika and pepper. Dip fish in mixture and let stand 1 hour in a deep pan, turning fish frequently. Drain. Add salt to flour. Roll fish in flour, then dip in egg and then in bread crumbs. Fry fish in hot fat until golden brown, turning only once. Garnish with lemon wedges and serve with tartar sauce.

Tuna Roll

- 2 cups flour
- 1/2 teaspoon salt
- 4 teaspoons baking powder
- 1/4 cup shortening
- 1 beaten egg
- 1/2 cup milk
- 1 cup flaked tuna
- 1/4 cup milk
- 2 teaspoons chopped onion
- 1 1/2 tablespoons chopped parsley
- 1/4 cup chopped sweet pickle
- 1/2 teaspoon salt
- Sift flour with 1/2 teaspoon salt and baking powder. Cut in shortening until mixture resembles coarse crumbs. Add egg and 1/2 cup milk. Mix lightly. Roll 1/4 inch thick on a lightly floured board. Combine tuna, 1/4 cup milk, chopped onion, parsley, pickle and 1/2 teaspoon salt. Spread over dough. Roll up. Bake on a greased cookie sheet in an oven (425 degrees) for 30 minutes. Serve with cheese sauce.

No Insect

There had been a rear-end collision. One of the drivers climbed out in a fit of temper and strode up to a man standing on the sidewalk, thinking him to be the other driver.

"Say, where's your tail light?" he roared.

The innocent bystander looked up at him, "What do you think I am, a blooming lightning bug?"

Q. What is the name of this cut of meat?

A. Pork blade loin roast.

Q. Where does it come from and how is it identified?

A. It is a wedge-shaped cut containing rib bones and blade bone from the shoulder end of the loin.

Q. How is it prepared?

A. By roasting. The meat is seasoned with salt and pepper. Then it is placed flat side up on a rack in an open shallow roasting pan. A roast meat thermometer is inserted so that its bulb is in the center of the largest muscle. The bulb should not touch bone or rest in fat. No water is added and the roast is not covered; roasting is a dry heat method. The meat is roasted in a moderate oven (350° F.) until well done. The internal temperature should reach 185° F. as indicated on the thermometer. Allow about 45 to 50 minutes per pound.

Our Great America by Woody

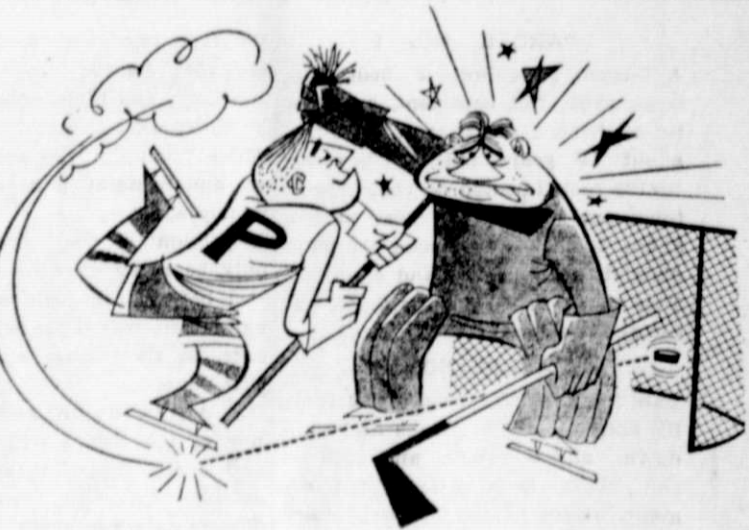

IT'S NOT HAY—The price, that is, of this straw for afternoon wear, which is one item of an exclusive Paris springtime collection. In fact, it's not actually straw. The wide-brimmed conversation piece, worn off the hairline, is woven of natural-color raffia.

Keeping Faith With Lincoln

Food Sense — Not Nonsense

Scoring For You — The Vitamin, Pyridoxine

It's teamwork that scores, whether it's the ice hockey team or that famed team—the food you eat and your body. This changing of food into energy is an organized activity, in the midst of which are the B vitamins, each doing a specific job. One of the least spectacular of the vitamins, but nevertheless playing an essential position, is the B vitamin known as pyridoxine.

Pyridoxine, discovered in 1938, has received little publicity as compared with other members of the vitamin B complex family. This is, perhaps, because there is no apparent lack of pyridoxine players on the food team as the vitamin is widely distributed. Good sources are fish, meats, seeds including grains and yeast. This B vitamin is not destroyed by heat. Therefore, food products produced from grains, such as enriched bread and cereals are good sources of pyridoxine. Only small quantities of the vitamin are found in milk and vegetables.

In the early studies on the B vitamins, this one was designated as vitamin B6. From the beginning, it was recognized as necessary for growth. Research is now focused on the place of pyridoxine in changing proteins into energy and its role in other processes involving proteins. There is some evidence that pyridoxine works with certain fats to prevent a specific kind of skin ailment.

In recent years, studies suggest that pyridoxine is required by humans as shown by its effect on blood levels and other body processes. Only in a few instances have naturally occurring deficiencies of this vitamin been observed in humans, probably because of its abundance in food.

The therapeutic usefulness of pyridoxine now is attracting the attention of scientists. Under observation is the possible beneficial effect of pyridoxine in early pregnancy. Much work remains to be done on this problem and other possible uses for this vitamin.

DEALER ANNOUNCES INCREASE IN FARM MACHINERY SALES

Sales of wheel tractors and other farm implements by The Oliver Corporation, farm implement manufacturer, during the three months ended Jan. 31, 1955, were 41% higher than for the corresponding three months a year earlier. It was announced this week by G. W. Forester, head of Forester's Garage & Hdwe., Oliver dealer for this territory. Forester said that demand for the new line of Oliver Wheel tractors is particularly strong. Sales of most of the principal lines of Oliver farm equipment are higher, than they were in the first quarter of 1954, and it appears that farmers are aware that it is necessary for them to replace their old

farm equipment with more efficient new models if they are to operate profitably.

Total sales of The Oliver Corporation, including sales of defense products, for the three months ending Jan. 31, 1955, were \$28,391,000, 10% higher than for the same period in 1954. The company's net profit for this period was approximately \$908,000, or 39 cents per share of common stock, as compared with a loss of \$22,000 in the first quarter of the preceding year.

Forester also observed that in addition to the substantial increase in the demand for new machinery, farmers continue their primary interest in the availability of genuine parts and approved service for machinery already in use which Forester's Garage & Hdwe. has available.

—Mr. and Mrs. John Kleineschay attended the funeral of the former's sister, Mrs. Charles Derindinger at Monticello on Wednesday. They were accompanied by Mr. Kleineschay's brother, Walter of Weyauwega, who spent Wednesday and Thursday with the Kleineschays here.

—Mr. and Mrs. John Kleineschay and guest, Walter Kleineschay of Weyauwega were Fond du Lac callers Thursday.

—YES, it's Miller's at Kewaskum for quality home furnishings at most reasonable prices. Open daily until 6, Fridays until 9 p. m. Free deliveries.

—Mr. and Mrs. P. J. Haug, in company with their son-in-law and daughter, Mr. and Mrs. G. Goetz and daughter Elaine of Park Ridge, Ill., left on a business trip to Los Angeles, Calif. last Saturday. They expect to be gone about a month.

—SEE FIELDS FURNITURE MART AT WEST BEND BEFORE YOU BUY YOUR FURNITURE, RUGS AND HOUSEHOLD APPLIANCES. YOU CAN BUY FOR LESS AT FIELDS'S, WHY PAY MORE? FIELDS'S FURNITURE MART, WEST BEND, WIS., TEL. 955. OPEN FRIDAY EVENINGS, OTHER EVENINGS BY APPOINTMENT. FREE DELIVERY.

Locate television antennas away from electric wires. A safe distance from wires is the height of the mast plus eight feet.

4-H Club News

THE KEWASKUM 4-H'ERS

At 8:05 p. m. on Tuesday, March 5, President Robert Becker called the meeting to order using the new gavel. The Pledge to the Flag and 4-H Pledge were recited by the members. The attendance record was read off by the secretary. The treasurer collected dues. Secretary's report and treasurer's report were given and accepted.

The children on the window display at Koch's did a wonderful job. Girls should bring their skirts and ribbons to display.

We talked about a Dairy Project tour which would take place Saturday, March 12. Anyone interested in the tour could go.

Our leader, Iray Schaefer, asked the secretary if she would write to the Smith Fishery in Port Washington and ask for a tour of the building after school closes for the summer.

The new refreshment committee is as follows: Gwen Edwards, Patty Edwards, and Duane Etta.

Some of the girls went to the recreation center in West Bend and learned many new games and dances.

COLITIS AND BOWEL TROUBLE TRACED TO NERVES

Colitis occurs chiefly in women (85%). Some of the symptoms are, feeling of distention, pain through the abdomen, and shreds of mucous in the stool. It is characterized by chronic constipation. The disease can progress until the bowel becomes ulcerated and inflected by the bacteria normally found in the intestines. Bacterial invasion is merely a secondary condition brought on by lowered resistance in that area. This condition, if not attended to, can ultimately result in tumors or cancer.

Dr. Bell, professor of pathology at the University of Minnesota, states that constipation is a forerunner of colitis and that the disease (colitis) is believed to be neurogenic in origin. The nerves control the movements, excretions, and absorption in the bowel. It is through this nervous mechanism that Chiropractic adjustments reach and benefit both constipation and colitis.

TEACUP TOPICS

By BETTY ANN

Aside from voodoo and wild superstition, the interested mature woman ought to pass up nothing in her campaign to enhance her natural looks.

Young things may get a way with a dash of lipstick because their skin glows and their hair is vibrantly colored. Mature women should rely more and more on painstaking care and scrupulous assessment of their good attributes, says Betty Ann.

For this reason, though it may seem like a pretty persnickity piece of business, a grown woman may want to plan her face make-up to go with the lighting.

Almost everyone does this to some degree. A party, brilliant with color and gaiety, demands make-up that borders on the garish. Small gatherings in a home need make-up that will stand close scrutiny.

But mature women may want to go even further in matching make-up to the occasion.

For instance, daytime make-up, which is generally an understated pointing up of our faces, goes best in outdoor natural light. This is the make-up worn for being out and about.

Natural indoor light, the light that comes in windows, needs a heightened version of the outdoor make-up. Indoor light is less bright and one needs a touch of more color to look natural.

Electric light brings up a more involved problem. This is a yellowish light, however white it may appear. This light fades out yellow-reds. If you want to look highly colored in artificial light, you need reds with a hint of blue.

Office workers know well how flattering fluorescent light is. Some of us who have this kind of light over our dressing tables know all too well, too. For this blue-white light a restrained daytime lipstick with bright red lipstick is best.

Browned pork sausage links with glazed apple rings, hot corn bread and coffee make a delicious Sunday lunch. Serve orange or tomato juice and cereal first, if desired.

If you switch from using polish to using wax on your furniture, or the other way around, remove the old finish by washing the wood surface. Wipe with a well soaped cloth, then a clean, damp one. Then give it a good chance to dry.

You could make it yourself—a beach or after bath wrap-up of terry. Make it with a difference, with wide lurid stripes going crosswise rather than up and down.

Crunchy Walnut Waffles
3½ cups sifted all-purpose flour; 4 teaspoons baking powder; 2 teaspoons salt; 2 teaspoons soda; 4 eggs; ¾ cup buttermilk; 2/3 cup melted butter or margarine; 1 cup chopped walnuts.

Sift flour with baking powder, salt and soda. Separate eggs and beat yolks lightly. Combine with buttermilk and butter. Stir into flour mixture. Fold in stiffly beaten egg whites. Bake on hot waffle iron, spreading batter to edges. Sprinkle with chopped walnuts before closing iron. Makes about 16 ordinary sized waffles or 9 four inch square ones.

Fluffy raisin muffins are as light and tender as the name implies. They are quickly mixed and can be baked while the table is being set and other last minute preparations are being made. To insure getting all of the good batter into the muffin pans always use a rubber spatula when filling the cups and scraping the bowl.

When rolls or muffins become too hard, sprinkle them with water, place them in a brown paper bag and warm them in the oven for a few minutes.

If you're baking and find yourself out of baking powder, here is a satisfactory substitute: One teaspoon baking soda blended with two teaspoons cream of tartar.

Black fabrics won't get that shiny look if pressed on the wrong side, using a cloth which has been dampened with a little vinegar.

Bake a package of cake mix in two layers. Split one layer in half to make two thin layers and sandwich together with prepared packaged vanilla pudding, top with chocolate frosting. Top the remaining cake layer with penuche frosting and save for another meal.

Cut up fresh oranges and sprinkle them with a mixture of cinnamon and sugar, for a simple dessert. Chill and serve.

Women Suffrage Makes Progress

Although many Americans tend to think about the fight for woman's suffrage as a fight fought and won many years ago, the truth is that the fight is still being waged actively in many countries of the world.

It might be surprising to the average American to point out that only about half the nations of the world permitted women to vote as late as the end of World War II—in 1945. And it was a hot question in many of these countries whether women should be given that right.

Countries such as France, generally regarded as a modern nation, did not allow women the right to vote, as men did, until recent (post-war) years. Closer home, in neighboring Mexico, women have not yet voted, but that right has just been granted—and they will participate in the next election.

Altogether, the twenty-four nations have granted partial or full political rights to women since the United Nations charter was signed in 1945. It should be noted, in this connection, that the U. N. has been one of the leading organizations pushing the issue of woman's suffrage, and is due much of the credit for progress made in this field in the last nine years.

But still hanging back in this matter of granting women the right to vote are a number of countries—among them Switzerland, Egypt, Iran, Nicaragua, Paraguay and many others. In all these countries—sixteen in number—women can neither vote nor hold office. These countries represent about one-fourth of all those polled by the U. N. recently in an effort to see how much progress the fight for women's suffrage has made in recent years.

It is apparent that much progress has been made but it is also surprising to learn that a considerable percentage of the countries of the world today still refuse women the right to hold office and vote. Progress comes slowly especially in the field of political reform, but it is steadily continuing in the fight for woman's suffrage.

About Your Home

Finger painting is quite popular with children and will keep them entertained for hours. The only drawback is that somehow children manage to leave spots of paint in strange places.

For this reason, if the children of the family go in for finger-painting, it is a good idea to know the best way to remove paint from different kinds of commonly used fabrics.

To remove paint from cottons, rayons, nylons and washable wools, first soak in clear cold water; then wash in warm sudsy water. More rubbing is needed if paint has dried.

Removing paint from wood floors or linoleum is no problem—just clean with a sudsy cloth. If paint has dried, it can be brushed away with a stiff brush. Paint that won't brush or wipe clean can be softened with cleaning fluid.

On deep-pile rugs, sponge with cleaning fluid and rub until the spot is removed.

Chili Bean Chowder Is a Hearty Mainstay For a Quick Supper

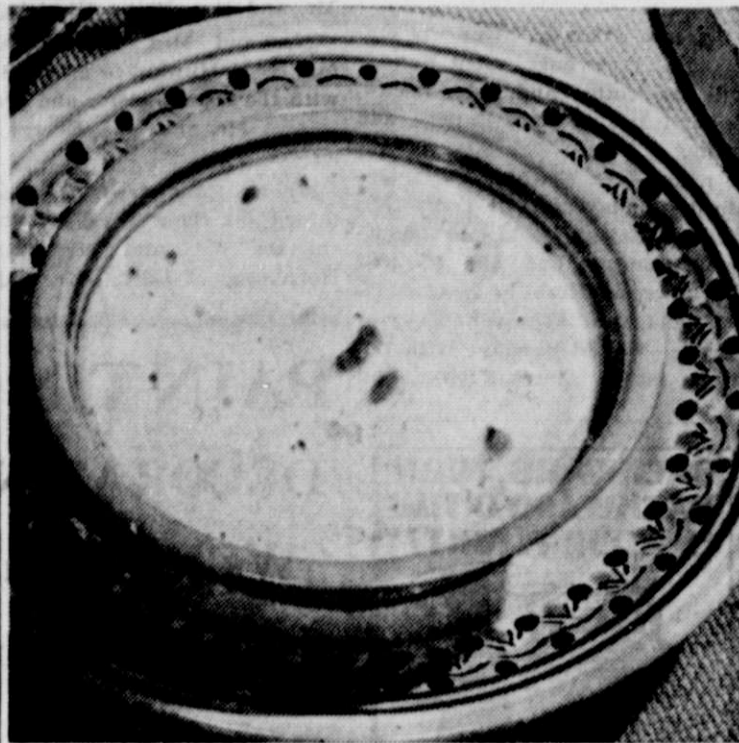

When the weather calls for something hearty, chili bean chowder is in order.

It's full of plump meaty beans seasoned to perfection with onion, garlic, chili powder and oregano—all in a creamy base of double rich evaporated milk.

If you know you're going to want supper in a hurry, you can make the basic chowder hours beforehand. Then when the hungry crowd arrives, all you have to do is add the evaporated milk and heat the soup to serving temperature.

Chili bean chowder is extra nutritious. It uses evaporated milk in undiluted form so it contains a double amount of all the important nutrients that milk provides.

- CHILI BEAN CHOWDER**
6 servings
- 2 tablespoons butter
 - 2 cloves garlic
 - ½ cup finely chopped onion
 - 2 tablespoons flour
 - 1½ teaspoons salt
 - 1½ teaspoons chili powder
 - 1 teaspoon oregano, crumbled
 - 2 cups water
 - 1½ cups evaporated milk (1 tall can)
 - 1 No. 2 can kidney beans (2½ cups)

Melt butter in soup kettle that holds at least 3 quarts. Add garlic and onion. Cook gently over low heat until onion is yellow and transparent. Remove garlic. Blend in flour, salt, chili powder and oregano. Stir in water. Continue cooking gently until mixture comes to a boil. Boil about 2 or 3 minutes, stirring occasionally. Stir in milk and kidney beans. Bring to serving temperature.

Falls Rank Highest In Home Accidents

Each year more people are killed by falls in the home than by all other home accidents combined. In fact, merely walking from one room to another in our homes seems to be a most hazardous activity.

Many lives have been lost each year due to falls in our homes. Surprisingly enough most of these deaths were caused by falls on the same level, not a stairway, nor off a ladder or chair. And the regrettable part of all this is that most of these falls could be prevented.

First of all, if we could somehow protect elderly people from the hazards of falls this needless toll could be cut considerably. In fact, less than 15 per cent of all deaths due to falls occur to people under 65 years of age. This is easy to understand. Young bones are harder to break since they are relatively flexible, while aged bones are brittle and knit with difficulty. Further, old eyes do not guide the body with safety. Also, when an older person falls, a condition of shock often results. Pneumonia may complicate matters causing a death which is correctly listed as due to the fall that started the trouble.

Scatter rugs on slippery floors, dark hallways, absence of night lights near the bed, loose toys scattered around the floor, and lack of handholds near the bathtub are some of the most frequently listed causes of falls in the home. By recognizing these dangers, correcting those that are due to construction, and remaining constantly alert to the others, many of these needless injuries and deaths could be avoided.

By protecting those who are incapable of protecting themselves; by recognizing dangers and avoiding them, and by actually practicing the rules of safety, many of these unnecessary injuries and deaths due to falls could be avoided.

Health & Beauty

Sleep is an important function in our lives. Without enough sleep our bodies break down mentally, emotionally as well as physically.

Rest is a cure for many kinds of heart ailments and should be used more often as a preventive for heart trouble. Many women indulge in a little "beauty sleep" after lunch. Perhaps this is one reason why so few of them, as compared to men, have heart attacks. The count is almost three to one.

Men have a good deal of drive and it's a good thing they do. They need it to make a living these days. However, men should learn to take advantage of slack periods, of the day, to relax.

One important American businessman learned this when he was young. He often takes forty winks at his desk after a long tiresome conference or interview. He is now one-hundred years old and still active in business.

It is doubly important to relax after dinner if you are under particular strain. It is amazing how much you reduce the strain on the heart by lying flat for as long as fifteen minutes.

It is high time that young men learn to take care of themselves. There is no medicine that is a substitute for sane living.

America's oldest gun dog is the English setter.—Sports Afield

Water Shortage Is Becoming A Natural Resource Problem

President Eisenhower's warning that water is rapidly becoming the Nation's most critical natural resource points up the habitual shortages of fresh water in many parts of the United States.

Water, the lifeblood of all living things, is also the lifeblood of industry. The production of a ton of finished steel, for example, requires 65,000 gallons.

As the Nation grows, says the National Geographic Society, it gulps down water in ever-increasing quantities. The current demand for public use, industry and irrigation totals an estimated 200 billion gallons a day or 73,000 billion gallons a year.

Falling water tables and squabbles over water rights have plagued the West and Southwest for years. More frequently, lingering droughts have siphoned off wells, ponds and streams in the South. Summertime rationing is becoming common in Eastern cities.

Problem of Distribution
Nature, however, is not rationing rain. The Nation's total rainfall continues to average 30 inches a year—a superabundance of 1,570,000 billion gallons. The basic problem is distribution.

The Herculean task of replenishing water in arid zones or cities where demand is outstripping supply is being approached in several ways: conservation measures such as antipollution and re-use of water, helping nature to increase supplies in areas of scarcity, and conversion of fresh water from the sea. Some methods are old, others new and visionary.

Interior Secretary Douglas McKay says economical conversion of sea water and reclamation of contaminated water offer two of the most promising fields for research.

Several large distillation units are actually operating at oil refineries in remote, sun-baked spots. The largest of these, on the Persian Gulf, supplies 720,000 gal-

lons a day for the Kuwait Oil Company.

Unlimited sweet water from the salty sea is an age-old dream. But present distillation systems are still too costly for general use, the Rand Corp. found in a recent survey. Depending on the process, the cost is \$150 to \$1200 per acre foot compared to \$1.50 to \$50 for natural fresh water in the United States.

Underground Reservoirs
Known principles of laundering sewage may eventually provide industry and agriculture with usable water, and science is looking for an economical way to treat industrial wastes.

Part of the Nation's supply flows in vast underground reservoirs. In some localities, ground water is being tapped much faster than nature can replace it. Artificial recharging of these reservoirs with excess runoff water may restore a cheap source of water.

Hydrologists are studying other schemes, notably surface treatment of watershed lands to stimulate greater soak of rain and snow. Denuded land sheds water like a tin roof, causing floods and loss of fertile topsoil. Reforesting, proper vegetative cover, contour plowing and construction of small detention dams help the earth to absorb rainfall.

Evaporation Losses
Plant life, like man and industry, is a greedy consumer of water. More than 70 per cent of the Nation's rainfall is used by plants or breathed back into the atmosphere. To conserve local supplies, some experts favor the removal of profuse, undesirable plants such as the thirsty, long-rooted salt pine.

Evaporation robs open storage lakes, reservoirs and distribution canals of perhaps half their water. The rate, of course, varies with humidity. Oil layers or buoyant insulation covers might save millions of gallons.

COUNTRY PLATTERS

LES CARROLL

SOME top country artists' children are doing very well as they follow their fathers' footsteps in music. Red Foley and daughter, Betty, team up nicely in a very pretty song, "Never" (Decca), while Cowboy Copas and daughter, Kathy, do a tricky arrangement of "Hello Darling" (King). And Hank Snow's son, Jimmie, offers a cute novelty number, "I Can't Spell" (RCA).

Marty Robbins, who sings sad songs so well, has a beautiful love ballad with a moral, "Gospel." And George Morgan's "So Lonesome" is a haunting love song, backed with "A Cheap Affair," in which he duets well with Shirley Dale (Both Columbia).

On the sacred side, the Jordanaires harmonize nicely in "All The Way" (Capitol). And they back Merv Shiner as he sings the old favorites, "Lord, I'm Coming Home" and "Pass Me Not" (Decca). The Rangers Quartet sings the rhythmic "Heavenly Cannonball" with lots of spirit (Capitol).

The girl artists have chosen love as their theme. Charline Arthur goes mercenary with a novelty number, "Flash Your Diamonds," while Betty Cody's choice is a cute philosophical song, "Butterfly Heart" (Both RCA). "I Could Never Stop Lov-

In FASHION now

Hair styles change with each season. It is fine for a young thing of sixteen to keep up with the latest craze. However, if you are a woman of thirty-six or over, you would do well to concentrate on finding a style that really does something for you.

Chances are that your face will appear more youthful if the general line is up. The hair should be smooth. Leave the careless, windblown look to the younger girls.

If your hair has begun to turn gray, the color will be much more becoming and softer than any dye job you can get. Remember that gray itself is a color. Use a rinse to play up the particular color of gray of your hair. The purple or blue look is a thing of the past and very hard on your features.

Unless you are blessed with naturally curly hair, your best possible investment will be a fine permanent. Some permanent actually impart life-giving oils to the hair, and give it more luster and elasticity.

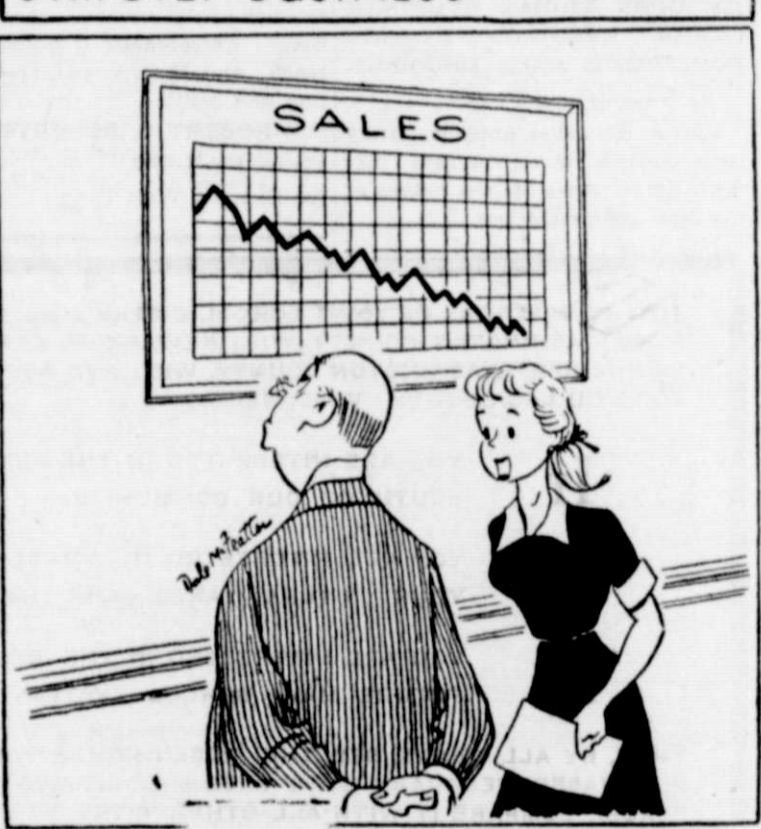

Spring hats and jewelry make the becoming hair style even more important, fashion-wise. It will be worth the cost to go to a good hair stylist and have him design a style just for you.

"If you want to leave your footprints in the sands of time, the best thing to wear is work shoes!"

STRICTLY BUSINESS

by McFeatters

"Maybe it's just gravity!"

the Snapshot Guild

Pictures of children in a favorite play situation add interest to family albums.

Use Simple Props to Make Story-Telling Snapshots

Every one who has ever had anything to do with a "theatrical" production, whether it be a grammar school pageant or a community theater group offering, knows the importance of having the right properties. We've rummaged through trunks in attics, through boxes in basements to find just the right things to use in the setting to help tell the play's story to the audience.

Props can be similarly used in your snapshots to tell a story that will be fun to read and re-read in the pages of your family albums for many years to come.

Instead of taking a picture of little Susie, who is the family's pride and joy, standing staring straight into the camera—picture her in one of her favorite play settings.

You can sometimes do this candidly, but on other occasions you'll want to set-up such a picture. This will enable you to arrange the props for the best possible composition of your snapshot scene.

The picture which illustrates today's column was chosen because it brings out this point very nicely. Whether the little girl had arranged her "pupils" in exactly this fashion, or if the camera-user had a hand in it, we can't say. In either case, they are nicely arranged so that their attention—and the attention of anyone viewing the picture is neatly centered on the little girl playing teacher.

Choose the right props, and arrange them nicely to help your family snapshots tell an interesting story. —John Van Guilder

Bible Comment:

Christians Earned Their Name In Wicked City

THE principal setting of the scenes and events of the New Testament, especially the Four Gospels and the life of Christ, was in Palestine.

But a broader setting involved a great part of what was then the known world as the number of disciples increased.

The city of Damascus, for instance, to which Paul was journeying when his conversion changed his whole life, is said to be the world's oldest city. Its origin dates back to as long before the birth of Christ as our time has been since Christ's birth. It has been said that it was a city before Babylon began.

Damascus was the royal city of Syria; there are numerous references to it in the Old Testament and the records of the wars of Israel. The single New Testament reference is in connection with the conversion of Paul. But it is interesting that a group of Christian disciples were already there, bringing the new life of the Gospel to the oldest of all cities.

It was a different challenge, that Christianity met at Antioch, about three hundred miles north of Jerusalem, in a very new city. Antioch was then a city of about half a million people on the great line of trade between east and west. In its splendor it aspired to surpass all other cities of that ancient world.

But with all its wealth, culture and pagan grandeur, Antioch had a sinister distinction. It was the wickedest, most licentious city of its time. Yet it was here in Antioch that the disciples were first called Christians.

It is a symbol of the Christian Gospel and way of life, ever opposing and conquering evil; establishing a new culture and splendor upon moral and spiritual foundations.

SPORTS AFIELD

By Ted Kesting

Colonel Townsend Whelen, camping editor of Sports Afield magazine, remarked recently that in years past old-timers such as he did not have much use for the dried and condensed foods. They were not appetizing, and they did not give energy or staying power. But there has been a tremendous development and improvement in dehydrated foods since the last war.

Particularly, they offer a greater variety of tasty dishes than the average camp cook is able to produce, and this means a lot to outdoor appetites. They are extremely easy to prepare, in most cases requiring only the addition of water and heating. Few need pre-soaking, and most of them take not more than ten to twenty minutes to cook. Above all, there is the greatest economy in weight and bulk.

The variety of these foods is amazing: powdered eggs, dehydrated potatoes, Spanish rice, pre-cooked beans, cereals with milk and sugar added, griddle cakes, ginger cookies, concentrated maple syrup, beef gravy, broth, vegetable and meat stews, biscuits, many thick and creamy soups, beef or chicken pot pie, lemonade, fruit punches, macaroni and cheese, chili and beans, tinned

bacon, butter, and countless others. Colonel Whelen has been unable to sample all of these himself, but those he has tried have invariably been excellent, even for a city appetite. However, it's a good idea to try out at home everything you might use on your camping trip.

The price of these foods is right, too. For example, foods cartoned in four different packs, each containing different meals sufficient for the needs of four men a day, costs \$9, or for eight men, \$13.50. The eight man pack, of course, would contain enough food for two men for four days. This is cheaper than one can live at home. Also, envelopes containing various foods may be obtained separately from 30 cents to about \$1.75 each, enabling you to make your own menus.

These dehydrated foods are not so easy to get. I would suggest you send 50 cents in coin to the Potomac Appalachian Trail Club, 1916 Sunderland Place NW, Washington 6, D. C., for its booklet "Hiking, Camping, Mountaineering, and Trail Clearing Equipment," which gives the names and addresses of some makers of these dehydrated foods, as well as where many other kinds of camp equipment may be purchased.

HERE'S HOW ...

MAKE A DOG HOUSE

A sturdy, weatherproof house for the family pet is built with a removable top to facilitate cleaning and airing.

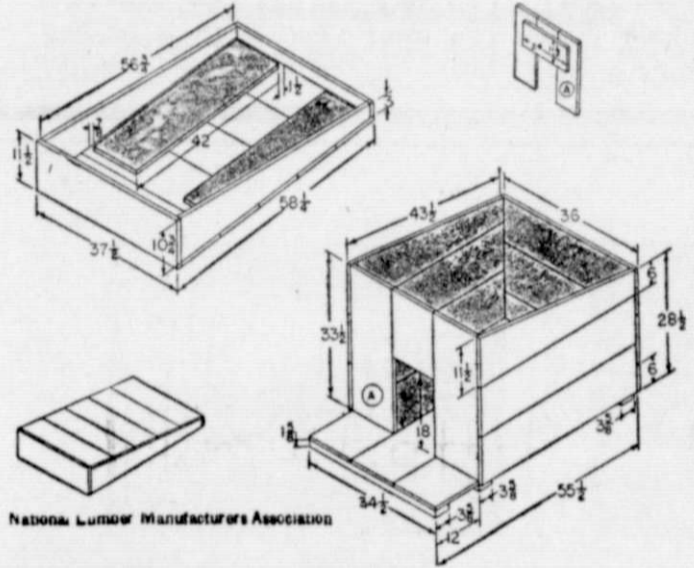

Three 2 by 4-inch sills, treated with preservative, raise the floor above the ground. The rest of the lumber is 1-inch stock.

Note that the lower back board is 6 inches wide, so that

the joints at the back corners are staggered. This eliminates cleats or framing.

The removable top is made as shown, with interior cleats to hold it snugly in place.

Building paper and shingles are added to the roof. The house may be finished to match the garage or dwelling.

Ticklers

By George

"Smith is tired of falling on his head; from now on he's going to be protected!"

PIN-UPS FOR DAIRYMEN—Pollsters would probably find that curvaceous calendar cuties run a poor second these days as pin-up favorites in the eyes of dairymen. Much more seductive curves are those envisioned by milk producers on future sales charts as world political figures lend their faces to milk-consumption programs. At left, Premier Pierre Mendes-France registers enjoyment of milk, during his campaign to increase its consumption and decrease the intake of alcoholic beverages in France. West Germany's chancellor, Konrad Adenauer, center, hoists a gift carton of milk, one of many from all dairying sections of West Germany. And Agriculture Secretary Ezra Taft Benson, right, downs a token toast to the more than 2,500,000 pints of milk consumed in Chicago, Ill., under the government's school milk program.

Comic Books Now Censored

One of the encouraging developments of the last twelve months is the successful establishment of a morals standard for comic books. Until this form of screening was set up, there was no regulation, or standard, which comic magazines with circulations in the millions adhered to.

While the new policy does not include every comic book, it is estimated that in early February, approximately seventy-five per cent of all comic books in the United States bore the seal of approval of the Comics Magazine Association of America, Inc.

Because so much filth, crime and other unfit material was being offered the children of the country, without restrictions, a growing spirit of protest was naturally arising. To solve this very serious problem, the Comics Magazine Association of America, Inc., was formed and it is now headed by former Judge Charles F. Murphy, of New York City.

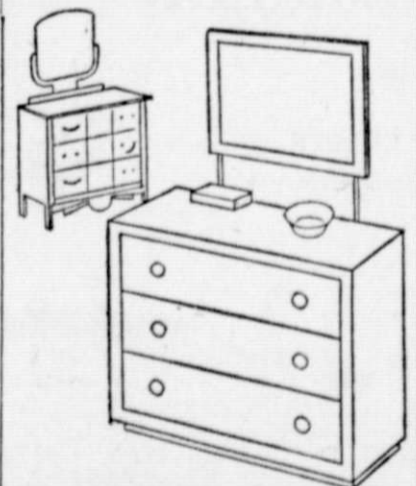

It is encouraging to see that three-fourths of the comic publications are now adhering to the morals standards proposed by the CMAA. We suggest that parents, and younger citizens, limit their buying of comic books to those which bear the black-and-white seal of the CMAA. In this way, the buying public can do much to bring about the adherence of the other twenty-five per cent of comic publications to the standards outlined by the CMAA.

An individual's intelligence can be measured by his attitude toward reading.

Freshen Old Furniture
MUCH old furniture still is useful, but its appearance is against it. Yet, it's too good to give away and not old enough to be considered antique. What can be done? A bit of ingenuity and effort will transform an old dresser into a thing of modern beauty — and at small cost. Note the "before and after" sketches of the same dresser. There's quite a change!

In general, removal of the gingerbread from the dresser is the first step in the renovation. A re-

cessed wood base, instead of legs, does much to modernize the piece. Most likely, the top has been scarred. Easiest cure is the addition of a panel of Masonite Tempered Presdwood, 3/4" thick. This then may be primed and painted. Alternates might be black Presdwood, or Leatherwood, a textured hardboard. One of the gay plastic-surfaced hardboards would be suitable, too, as they are resistant to stains and cigarette burns. Various colors and patterns in Marlite are available.

Matching material, if needed, may be used to re-cover dingy-looking drawer fronts. Standard 1/4" Presdwood is excellent for replacing cracked drawer bottoms and dresser backs.

The HUNGRY SPORTSMAN by Eddie Meier

POACHED SUNFISH WITH MUSTARD SAUCE

There come those winter days when fishing equipment is better gear than duck blinds and shotguns and though waterfowlers seldom sally forth so well equipped, perchance you should run across a string of sunfish in your ventures, here is a savory method of preparation. Poach and serve with a tasty mustard sauce!

For your sauce, mix 2 tablespoons dry mustard, 1/2 teaspoon salt, 1/4 teaspoon pepper, 1/4 teaspoon paprika and 1/8 teaspoon garlic salt. Make a paste by gradually stirring in 3 tablespoons vinegar, then 6 tablespoons olive oil. Beat together 3 large eggs and 3 egg yolks, add seasoning mixture and cook in a double boiler (stirring constantly) until thick. Remove from heat and beat in 4 tablespoons cream.

Poaching liquid is made by boiling together for 3 minutes in 1 quart water, 2 tablespoons lemon juice, 1 small onion minced, 1 teaspoon salt and 1 bay leaf. Sunfish will poach in 10 to 12 minutes.

BAKED CRAPPIE WITH ANCHOVY SAUCE

Season for the big crappies is here and these grandpappies lend themselves excellently to baking and serving with a tantalizing anchovy sauce.

Place crappies in a well-buttered baking dish with 1 cup milk and bake in medium oven (350 degrees) for 25 minutes, or until fish flakes readily.

For anchovy sauce, melt 3 tablespoons butter in a saucepan, and in it saute 1 small onion (chopped fine) until transparent. Blend 3 tablespoons flour and 1/4 teaspoon pepper with the butter and onion, the add 1 1/2 cups liquid from baked fish and anchovy paste to suit taste. Simmer until thickened.

Never put off writing a letter to a relative or friend because you think you haven't any news at all. Some of the best letters tell of the smallest events. It is actually having nothing to say that keeps a person from writing a letter.

Factual News About The Eyes

ARTIFICIAL EYES GO BLACK MARKET IN POLAND

There's an acute shortage of artificial eyes in Poland today, says the Better Vision Institute, and it's almost impossible for a person to find a comfortable one of the right shade.

A recent visitor to the Iron Curtain country tried in vain to find a much-needed replacement for his own artificial eye in Warsaw and several other Polish cities.

It seems that the Communists are completely neglecting the manufacture of artificial eyes. In their emphasis upon high production, however, they have disregarded safety precautions and a high rate of industrial accidents is the result. This may be partly responsible for the shortage.

Polish sailors are reaping a windfall by purchasing artificial eyes in foreign ports, then selling them at home for 10 to 15 times what they paid.

News of this sort should make Americans appreciate the excellent eye-care and ophthalmic products which we have available at moderate cost, says the Institute.

Sports Quiz

1. How did "Home-run Baker" make the news recently?
2. Who won the Australian singles tennis championship recently?
3. What basketball team has been voted first more times during the season than any other?
4. What basketball team was leading the nation in scoring as of early February?
5. Who is Gerry Dean?

- THE ANSWERS:**
1. He was elected to the Hall of Fame.
 2. Ken Rosewall.
 3. Kentucky's Wildcats.
 4. Furman University's team.
 5. Cincinnati (NL) pitcher.

Sh-h!
"Are you sure your wife knows I am going to dinner with you?"
"Sure, she knows, my dear fellow, I argued with her about it this morning for nearly an hour."

LOGGERHEAD SHRIKE
© 1954 National Wildlife Federation

Lanius ludovicianus

It requires good judgment and wide information to understand this bird properly. Bird lovers who witness the blind panic of a flock of sparrows threatened by a shrike may growl with venom that is nothing but a "butcher bird." Orchardists whose trees have been girdled by mice are inclined to praise any bird large or small that through the destruction of mice may be considered useful. Not so obvious is the service these birds render in the destruction of insects. The insects are usually eaten whole and immediately become a thing of the past. The mouse or small bird may be stuck on a thorn of a tree and left there for a passerby to see. All serious studies of these birds have come to the conclusion that on the whole they are useful. Certainly they are interesting at all times.

The species shown here breeds from southeastern Manitoba to New Brunswick and south to northeastern Texas and Virginia. Other species extend this range considerably. Our species winters from the Mississippi Valley and Texas to southern New England.

This shrike is about an inch shorter than the northern shrike and measures just over 9 inches. It has a 4-inch tail and a 13-inch wingspread. The female is smaller than the male. The related northern shrike has a breast that is slightly barred. Both are essentially gray birds with light throats, dark areas on the wings, some white on the tail and a black broad streak from the bill through the eyes and to the back of the face. To some, it seems appropriate that this bird should wear what appears to be a black mask.

Shrikes are inclined to perch high and alone. When attacking or when taking flight they usually drop from their perch and fly directly toward their goal with a steady wing beat. At the end they make a sharp upturn before coming to a stop.

The nest of shrikes is a bulky affair of sticks and weeds with a soft lining of feathers and grass or wool. It may be from 5 to 20 feet above the ground and is commonly in a tree or shrub. Orchards often are favored areas for shrike nests. Four to five eggs, each about an inch long, are laid. Incubation for about two weeks is shared by both parents but is mostly the hen's responsibility. There may be two broods a year.

As suggested earlier the food is animal matter. It includes a great variety of animals, however. Frogs, shrews, snakes, birds, mice and insects large and small are sought, caught and wrought into meals for the shrike family. The larger northern shrike of the West is considered a most effective check on the gopher population.

So well known are the habits of these birds as mouse killers that it is not surprising that they are all protected by law as song birds. There are records of the larger shrikes attempting to capture caged canaries behind closed windows in a house. Probably the owner of such canaries would hardly appreciate the legal protection given the shrikes. But it is to the understanding of such problems in nature that the National Wildlife Federation devotes much of its resources.—E. Laurence Palmer.

PLENTIFUL PORKERS—Hog prices, little more than two-thirds of what they were a year ago, promise to remain low for at least another half-year. Pork, although it hasn't had that large a drop, should remain on the bargain counter also.

Pigs from last spring's bountiful crop are the ones being slaughtered now. (The spring crop is usually twice the size of the fall one.) Marketing of the fall, 1954, crop can be expected to begin with the first cool weather next fall. That crop, too, was up 16 per cent from the 1953 level. Pig numbers are increasing not only because breeding stock is better and more numerous, but also because more pigs grow up. A third of them used to die before they reached marketable weight; now casualties are down to one in five.

ELECTRONICS ON RAILS—The magic of electronics is being used more and more by the giant railroad industry to attack decades-old problems.

In one station, railroad tickets are sold in seconds by means of electronic facsimile reproduction. On a large Ready-Sale Board, all sleeping car space on 23 principal trains to 28 important destinations is in full view to prospective passengers as well as sellers. When the passenger has selected his space, the ticket seller electronically reproduces space reservation and train ticket. Telephone orders are filled the same way, just as fast.

BITS O' BUSINESS—Farm prices in January were 2 per cent above the level of January, 1954. Housing starts of 1.2 million are predicted this year by the Home Loan Bank Board. Automobile makers believed to have built 660,000 cars in January, topping the previous record, set in 1950, by more than 100,000 vehicles.

Behind The Scenes in American Business

By Reynolds Knight

That confidence in the future which President Eisenhower urged in his economic report to Congress keeps busting out all over.

During December, Dun and Bradstreet reports, 12,000 new companies were incorporated. That's the most for any December in history. Total for 1954, at 117,000, was exceeded only by the record 133,000 of 1946.

Biggest steel company, in mid-January, split its stock two-for-one, and promised bigger dividends on the new issue. As the month ended the biggest linoleum maker followed suit.

A leading soap company announced a \$60-million five-year plant expansion program, and a leading paper company disclosed that it will build a \$20-million newsprint plant in the South.

In fact, there's so much confidence around it's making some wise people uneasy. On January 31, the day a stock market average made a 25-year high, Dr. Arthur F. Burns told a Chicago audience that the inherently cyclical nature of business was still to be reckoned with. All citizens, especially businessmen, must help guard against recurring recessions, he said, and not leave the whole problem to Government.

THAT FIFTH SEASON—The textile, apparel and related trades divide the year into five seasons: summer, fall, winter, spring and slack. For years that fifth season, between peaks of demand for the goods manufactured, brought production slumps, employee lay-offs, and bad times generally.

Things are vastly different today, thanks to a specialized form of financing known as factoring. Through factoring a textile or apparel manufacturer can stabilize production and operate efficiently even during the fifth season.

Factoring works like this: At a small discount, a factoring company buys a manufacturer's accounts receivable as fast as his goods are shipped. Instead of waiting 60 or 90 days to collect from his distributors or retailers, the manufacturer sells on what amounts to a cash basis.

Thus he turns over his working capital more often, is able to buy raw materials in his supplier's off-season, and can build inventories for peak demand periods. A factor, having large resources, lets the manufacturer draw money in advance of sales to finance these activities.

THINGS TO COME—This summer you can get an auto-type starter for your power lawn mower, and throw away that rope. . . . A learn-a-language game, played like gin rummy, promises you a 200-word Spanish vocabulary in a month. . . . A 48-pound X-ray machine takes its picture without power; an atom-bombarded piece of mineral is the ray source. . . . Bothered with employees going out for coffee? A new watercooler also furnishes hot water, if your help will drink instant coffee?

PLENTIFUL PORKERS—Hog prices, little more than two-thirds of what they were a year ago, promise to remain low for at least another half-year. Pork, although it hasn't had that large a drop, should remain on the bargain counter also.

Pigs from last spring's bountiful crop are the ones being slaughtered now. (The spring crop is usually twice the size of the fall one.) Marketing of the fall, 1954, crop can be expected to begin with the first cool weather next fall. That crop, too, was up 16 per cent from the 1953 level. Pig numbers are increasing not only because breeding stock is better and more numerous, but also because more pigs grow up. A third of them used to die before they reached marketable weight; now casualties are down to one in five.

Why We Should Reconsider

by Ada M. Mellahn

The electors of the Kewaskum Union Free High School District have selected a site for their new high school and all of us have been so busy thinking of grades and levels, the physical aspects as it were, that we have quite forgotten some of the other considerations. That is why we need to reconsider.

We have seen these democratic processes in operation: a school meeting, a vote, which evidently has displeased a good many, a petition to re-open the issue if desired by a majority, and the calling of another meeting. Have we not enjoyed the privilege each one of us has had to give expression, if we so desired, to our ideas on the subject of a site for our new institution of learning? Most certainly we have. Now let us look to the beginnings of this democratic tradition in our own community. Let us think, if you will, on a higher level, and leave the consideration of contours and grades to the engineers. It is their province, not ours.

The land which you know as the Mellahn site and which you will probably consider again was once owned by a public spirited man. His name was Nathan Wheeler. It was in his home while he owned these very acres that the first election was held for the Town of Kewaskum more than a century ago, on April 2, 1859. He was also the first Postmaster of the Village of Kewaskum. Almost seventy-five years had elapsed since Valley Forge, but this man was helping to preserve the ideals fought for there. There is only one such spot in this vicinity and is it not quite fitting that we should commemorate Nathan Wheeler by building our new High School on it and there perpetuate what he and a long line of other early Americans so nobly be-

gan?

The site is worthy of such a memorial as our new high school will be. It is high and dry, uncluttered by stone fences, brush and buildings. You do not travel to it over an imaginary highway yet to be built. No air castles involved here. Instead you find yourself on the solid pavement of Federal Highway 45 and the hard surface of County Trunk H. The roads are here, no additional tax burden for the people of this immediate community to bear for the building of streets. If they need improvement, they are Federal and County roads and we need not bear the burden alone. Such vantage points as they afford will mean, too, that we are not lighting our candle and hiding it under a bushel. Why spend a half million dollars and then have to buy a pair of field glasses so we can see the building from the roads we daily travel?

Now you may use your imagination, and legitimately. Let it run rampant and picture yourself coming into Kewaskum from the South. You have reached the top of the Kewaskum Hill. There beneath you lies our lovely valley with its church spires and homes, the river, and hills in the distance and there to the left is this fine new school building, an institution for the enlightenment and enrichment of the lives of our young people.

How else could we so much improve the approach to our village? Let us reconsider!

In full view of all corners, let us build this magnificent memorial THE NATHAN WHEELER HIGH SCHOOL on this historical site and there strive to guard the liberties we find so precious.

(Adv.)

NOTICE OF SPECIAL MEETING of the electors of KEWASKUM COMMUNITY UNION FREE HIGH SCHOOL DISTRICT NO. 2 OF THE VILLAGE OF KEWASKUM, WASHINGTON COUNTY, WISCONSIN; KEWASKUM, BARTON, FARMINGTON AND WAYNE TOWNSHIPS WASHINGTON COUNTY, WISCONSIN; ASHFORD AND AUBURN TOWNSHIPS, FOND DU LAC COUNTY, WISCONSIN.

Notice is further given that pursuant to such petition and for the purposes therein stated there will be held a special meeting of the electors of said school district at 8:00 o'clock in the evening on the fourteenth day of March, 1955 at the high school gymnasium. Dated this second day of March, 1955.

Clifford C. Stautz,
District Clerk
3-4-2t

LAST CLOSED SCHOOL DIST. IN COUNTY IS ELIMINATED

(CONTINUED FROM PAGE ONE) past two and one half years has given this project top priority. Reports from other counties indicate that Washington county has been one of the leaders among counties in this phase of school districts reorganization. Both Dodge and Fond du Lac counties have in excess of 25 non-operating districts. The residents of those districts now face the extinction of public education on the grade school level unless they take steps before July

There's even more to Chevrolet styling than meets the eye!

This is beauty with a bonus . . . for Chevrolet styling is designed to add safety and comfort while you drive, and to return greater value when you trade.

Truly modern lines are shaped by usefulness. You can see what we mean in the deep crystal curve of Chevrolet's Sweep-Sight windshield . . . a dramatic style note, certainly, but one that stems from the need for wider, safer vision. Or take high-set taillights—they add to the impressive length of line . . . but they are up where they can be seen for safety's sake.

The smart louvers across the hood aren't just decoration . . . they mark the intake for the High-Level ventilation system for cleaner, fresher air. And the whole shape of the body—its lowness, the dipped belt line—is merely a reflection of a lowered center of gravity, the added stability.

This is truly functional styling that serves you better every mile, and preserves its value against the distant day when you trade. This is Body by Fisher—another Chevrolet exclusive in the low-price field. Come in and let us demonstrate that this new Chevrolet is just as exciting to drive as to look at!
