

Re-elect Eberle, Stellplug; Tessar Defeats Sparks in Trustee Race

OTHERS RE-ELECTED WITHOUT OPPOSITION; ONLY 278 BALLOTS CAST IN ELECTION TUESDAY

Even though the skies were sunny and the weather warm, the lack of much opposition resulted in a light vote in the spring election Tuesday in the village. A total of 278 ballots were cast, about half of the voting potential in Kewaskum.

Voters cast their ballots for candidates for village, one county and one state offices and two referendums. The only opposition on the village ticket was for the three trustee offices which had five candidates.

Trustees Joe Eberle and John G. Stellplug were re-elected to office, while a newcomer, Wayland Tessar, defeated the other incumbent, Charles Sparks, for the third trustee office. Eberle polled the most votes with 201 and Stellplug and Tessar were close behind with 199 and 195 votes respectively. Sparks trailed Tessar by 79 votes, receiving 116. The fifth candidate, Ned Sengpiel, polled 81 votes.

All other village officials were re-elected without opposition. They are Charles Miller, village president, 219 votes; Edwin Bartelt, assessor, 242; Elwyn M. Romaine, supervisor, 242; and Lyle Bartelt, justice of the peace, 217. Ed. Bartelt and Romaine tied for the largest number of votes with 242 apiece.

Justice Milton Meister, seeking his first full term as county court judge, proved the largest vote-getter in the village, amassing 256 votes. He was elected without opposition. The only other candidate on the ballot, Supreme Court Justice Grover L. Broadfoot, collected 165 votes from village electors. He, too, was unopposed for re-election.

As in the rest of the state, local voters voted heavily in favor of two state referendums providing for the retirement of supreme court justices and circuit court judges and establishing the borrowing power of school districts based on the equalized value of taxable property in the district, rather than the local assessed valuation. Local electors voted 160 to 59 in favor of the former, and 161 to 66 in favor of the latter.

TOWN OF KEWASKUM

In the town of Kewaskum there was no opposition for offices and a light vote was cast. Incumbents re-elected included Ed. J. Campbell, chairman, 58 votes; Henry Muckerheide, supervisor No. 1, 56; Arnold Amerling, supervisor No. 2, 58; Alfred H. Seefelt, clerk, 58; Lloyd Schmidt, treasurer, 59; John Litt, assessor, 55.

TOWN OF WAYNE

The town of Wayne had a very lively election. There was opposition for all offices and several close races ensued. A large vote was cast. Chairman George Peter was re-elected by the slight margin of only five votes. He polled 170, to 165 for Earl Schulz and 31 for Wm. J. Hawley. Supervisors elected were John Oehlafen with 274 and Mike Darmody with 185. The third candidate was Ewald Rauch with 166. Clerk Paul Moritz was re-elected over Orville Kern, 221 to 155. Treasurer Oscar Boegel was defeated by Erich Erdman in a close one, 184 to 180. The race for assessor was also tight with Fred Pamperin receiving 184 to 177 for Arnold Hawig, Jr. Justice of the Peace Bernard Strobel, the only candidate without opposition, polled 213 votes.

TOWN OF FARMINGTON

Results in the town of Farmington were as follows: Chairman, Harvey Dettmann, 88; supervisors, Walter Liepert, 91, Oscar Hauch, 81; clerk, Elmer Plaum, 99; treasurer, Art Schoedel, 98; assessor, Merton Murray, 88.

TOWN OF AUBURN

Elected in the town of Auburn were: William Wunder, chairman; Edwin Gatzke and Erwin Matthies, side supervisors; Reuben Backhaus, clerk; Joseph E. Schiltz, treasurer; Elmer A. Krueger, assessor; Stanley Porubcan, justice of the peace, and Frank Klostermann, constable.

Last Call for Members in Legion Enrollment Drive

The following letter was received by Gilbert N. Sell, commander of Robert G. Romaine American Legion Post 384 of Kewaskum from Seaborn P. Collins, national commander, Indianapolis, Ind., in which he asks all posts to stage a final 1955 membership enrollment drive to be known as "Operation Mop-Up."

March 25, 1955
Dear Comrade Legionnaire:
May I, as your National Commander, thank you for your unselfish interest in The American Legion and convey to you my personal appreciation for your efforts in behalf of membership enrollment.

In view of the fact that at this moment the national membership current total shows a gain over last year at this time, we have reason to feel pleased in this respect.

We both realize that our current totals are not enough. Right now, the benefits and services which we believe in so dearly are in serious jeopardy. The increasingly bold challenge to the very concept of veterans benefits stems primarily from the recommendations of the Hoover Commission on Government Organization—made within the last few weeks.

The American Legion will fight with every resource at its command to preserve and protect essential veteran benefits. This fight will be based upon principle, not personalities; on facts, not opinions. A greatly increased membership is the best weapon we have to protect those benefits.

With that in mind, I urge all American Legion posts to stage a final 1955 membership enrollment campaign which shall be known as "OPERATION MOP-UP!" Now is the time. From April 1 to April 27 we have four good week ends to do that all important job. In some cases a "dawn to dusk patrol" will be enough to mop-up the remaining "hold-outs" among veterans in your community. Ask all eligible veterans to join with us in this fight for veterans.

I know you share my pride in The American Legion's accomplishments over the years. With your help in making "OPERATION MOP-UP!" a success, we can do much more in our combined efforts to continue to serve our country and help maintain an enlightened program of mutual benefit to the community, state and nation.

Sincerely,
SEABORN P. COLLINS
NATIONAL COMMANDER

DISCUSS EASTER SEAL SALES ON WBKV SUNDAY

The local UAW-AFL sub-council No. 3 of Washington county will sponsor a radio program over WBKV, West Bend, Sunday at 12:45 p. m. to discuss sales of Easter Seals. The program will consist of a panel discussion to consider the functions, purposes and services of the society.

Included on the panel will be Eugene E. Cooper, public relations director and field representative of the Easter Seal society for crippled children and adults; Miss Mary Cook, county nurse; Leroy Bier, Kewaskum, and Victor Plzak of the UAW-AFL.

GILBOYS BUILDING HOME

Excavating has been completed and the foundation is being poured for a new home to be built for Mr. and Mrs. Francis Gilboy, Kewaskum, by Lester Dreher and Son on Elgo Lane, east of the high school athletic field.

BIRTHS

KELLER—A son to Mr. and Mrs. Alex Keller, R. 2, Kewaskum, Sunday, April 3.

SPOHL—A son to Mr. and Mrs. John Spohl, R. 3, Kewaskum, Wednesday, March 30.

Cast Chosen for Senior Class Play April 29, 30

Lucia Rizzo, director of dramatics at Kewaskum High school, last week selected the cast of characters for the annual senior class play to be presented in the school auditorium on the evenings of Friday and Saturday, Apr. 29 and 30.

The title of the three-act play is "One Foot in Heaven," and is based on a true life story. It has to do with the experiences of a minister and his family and was written by Hartzell Spence. It has been staged as a movie, on TV and as a New York play.

Richard Wesenberg as the Rev. William H. Spence; Gladys Becker, a Hope Spence, his wife; Robert Sippel, as Hartzell, their son, and Mary Bingen as Eileen, their daughter, will portray the Spence family roles. Other characters in the cast include:

Norman Walz as Dr. Romer, Mary Hron as Louise, Catherine Braun as Maria, Marlene Sauter as Molly, Tom Tessar as Ronny, Donna Vetter as Letty, Joanne Ferber as Mrs. Sandow, Shirley Staehler as Mrs. Digby, Mory Ann Breit as Mrs. Cambridge, Rosemary Struebing as Mrs. Jellison, John Spartz as Major Cooper and Mark Rosenheimer as Bishop Sherwood. Harold Klein will take the part of the Rev. Fraser, prologue and narration.

Around The Town

—Lyle Bartelt returned home after an extended stay in Florida. His brother, David Bartelt, also returned after a short stay in that state.

Banns of matrimony have been announced in St. Bridget's parish for Ervin Beine of near Hartford and Lorraine Theusch of St. Bridget's.

—Local persons were among those who attended funeral services for Mrs. Annie Miller at Fond du Lac the past week.

—Mrs. Clara Kohler returned home recently from Tarzana, Calif., after an extended visit with her son Pirmin and family there.

—Mrs. Clarence Mertes returned last Friday, from Florida, where she spent the winter months.

—Miss Anna McLaughlin of Fond du Lac visited Sunday with Miss Rose McLaughlin.

—Mrs. Edna Ziegler, Mrs. Helen Deibelberg and Mrs. Morgan McCargo of West Bend surprised Mrs. William Schaub on Friday afternoon on her birthday.

—Mrs. Karl Schultz and Mrs. Wm. Schaub called on Sharon Klein who is confined at St. Joseph's hospital, West Bend.

—Mike Rafenstein of Milwaukee visited Mr. and Mrs. Louis J. Heisler a few days this week.

—The following guests were entertained by Mr. and Mrs. Edwin Fickler Sunday in honor of the confirmation of their daughter Nancy:

Rev. and Mrs. F. Rodenbeck, Mr. and Mrs. Carl Welk and family, Mr. and Mrs. Harold Fischer and family, Mr. and Mrs. Ed. Fickler, Sr., Mr. and Mrs. A. Bruesewitz and Mr. and Mrs. Bert Fickler.

—A number of local invited guests attended a linen shower in Milwaukee last Wednesday night given in honor of Miss Barbara Lane Borchardt, who will become the bride of Donald W. Dei, Kewaskum, on Saturday, April 16.

—YES, it's auer's at Kewaskum for quality home furnishings at most reasonable prices. Open daily until 6 Fridays until 9 p. m. Free deliveries.

ATTEND DEMONSTRATION OF NEW OXYGEN DEVICE

Two members of the Kewaskum fire department first aid squad, with Fire Chief Carl Peters and members of the West Bend rescue squad, attended a demonstration of a new pneulator. The demonstration was conducted by Roy Christensen, head of the safety division at the West Bend Aluminum company. The new pneulator is designed to administer oxygen to persons in emergency cases.

CUR POLICE CHIEF SAYS

If you leave your car out overnight, be sure you lock your trunk and doors.

Approve Kettle Moraine Drive Paving Project

Highway Commissioner Al Retler of Washington county this week confirmed the approval of major highway projects in this county as well as authority for minor repairs totaling approximately \$800,000.

In addition to \$50,500 already approved for gang maintenance by county crews on state and federal highways in Washington county, approximately \$75,000 to \$80,000 in additional funds for general maintenance is still expected as well as winter maintenance funds which should be forthcoming in addition to gang maintenance funds already given approval.

The major highway projects scheduled in the county for this year include paving of Hwy. 170 (old 41) from Menomonee Falls to Slinger; paving of Hwy. 115 (old 45-55) from the south county line to Germantown and the paving of a portion of the scenic Kettle Moraine Drive in the northern portion of the county (east of Kewaskum).

The 3.391 miles of the Kettle Moraine Drive approved for paving in Washington county and an additional .734 mile of the drive to be paved in Fond du Lac county came as a "bonus" paving project. Funds for this project do not come from the state highway department but from the state conservation commission so that paving of state and federal highway projects in the county will not be affected by this grant, thus eliminating the possibility of needed repairs being held up because of allocation of funds for this work.

Paving of the Kettle Moraine Drive approved by the conservation department applies to the portion of the drive which extends southward from the Washington-Fond du Lac county line to the junction with County Trunk Highway "H" in Washington county or a distance of 3.391 miles in this county and .734 of a mile north of the county line in Fond du Lac county to the junction of County Trunk Highway "S" in that county. It is estimated this project will cost approximately \$325,000 including the base and grading. Bids on this project are scheduled to be let in Madison on Tuesday, Apr. 12.

CHIEF OF POLICE PLED'S DAUGHTER TO WED JUNE 11

A June 11 wedding at Holy Redeemer church, Milwaukee, is planned by Miss Vivien M. Pledl of that city and Lovers Peter De Back, Genoa City, Wis. A graduate of Alverno college school of nursing, Miss Pledl is the daughter of Mr. and Mrs. Roland Pledl, N. 41st St., Milwaukee. He is chief of police in Kewaskum and will move here shortly.

The prospective bridegroom is the son of Levens C. De Back, 8, 87th St., Milwaukee, and the late Mrs. De Back. He is an alumnus of the Racine-Kenosha Rural Normal school, Union Grove.

WINS HALF A PIG IN GUESSING CONTEST

Two women were tied in guessing the weight of "Chester the Pig" which was offered as a prize for customers of a West Bend store. The women, Mrs. Elfa Baekhaus, Kewaskum, and Mrs. Virginia Gschik, R. 5, West Bend, guessed the pig's weight as 179 pounds. Actually Chester weighed 116 pounds, but their guesses were closest to the actual weight of all entries submitted. The ladies said they will split the pig, with each receiving half.

MAKRIAGE LICENSE

April 4—Ervin Beine, R. 3, Hartford, and Lorraine Ann Theusch, R. 3, Kewaskum; wedding April 16.

April 4—Donald W. Dei, Kewaskum, and Barbara E. Borchardt, R. 1, Jackson; wedding April 16.

Many grasshoppers are expected in the state this year, reports E. H. Fleher, entomologist at the University of Wisconsin. He says the southern two-thirds of the state is apt to get hurt unless farmers do a good job of control.

Annual School Board Convention Draws 200

The second annual convention of county schoolboard members and teachers was held at the Slinger High school on Monday, April 4. About 200 members attended. It was a most interesting meeting, centering around the theme of how the schoolboards and teachers can prevent delinquency of children who have problems, problems which might be due to an emotional, physical or mental condition.

The following summary statements were recorded:

1. There is no single cause for delinquency, for the home, school, and church and community are involved directly in the problem.

2. The schoolboards can help greatly by supplying the children with well qualified teachers, problem facilities and a program of activities which would permit the children to completely use their abundance of energy.

3. Recognizing the problem at the opportune time is most important. If, children, this recognition might need to take place at the kindergarten level, in others, it could be at the teenage level.

4. The changing times call for a re-evaluation of standards by society. This re-evaluation is not to be done for the reason of eliminating a situation as not a problem situation, but in affording a means of understanding. Standards for standards sake only, have little or no value.

5. Publicity given to such cases is harmful to the rehabilitation of the individual concerned.

6. All people involved must be alert to the problem, because our population growth, in itself, will bring forth certain situations that might have added contributive conditions.

One of the most significant statements made was that most of the young people who become delinquent were not wanted by anyone. Because of the genuine interest demonstrated by the teachers and schoolboard members, it is quite possible that another phase of the same topic will be discussed at the fall convention.

HOLD HOLY SATURDAY NIGHT, EASTER SERVICES AT PARISH

Holy Week observance at Holy Trinity church began Wednesday with confessions in the afternoon and evening.

On Maundy Thursday Holy Communion was distributed at 6 a. m. and Holy Mass was at 8 a. m. Beginning immediately after mass and continuing until the mass of the pre-sanctified at 12:15 p. m. Good Friday there was continuous adoration of the Blessed Sacrament. Parishoners were given a schedule of assignments.

Good Friday services from 12:15 to 3 p. m. began with Liturgical Adoration of the Cross followed by the mass of the pre-sanctified. There also was a sermon, rosary, Stations of the Cross, and veneration of the Relic of the True Cross.

Confessions will be heard Saturday at 2 and 7 p. m. Night services Holy Saturday will be held beginning at 11 p. m. with the blessing of the new fire, the Easter candle and baptismal water. These services will be followed by Holy Mass. Holy Communion may be received at this mass.

Easter Sunday masses will be at 7:30 and 10 a. m. The 8:30 mass will also be Holy Name society Communion mass. Food will be blessed before the masses.

FFA BOYS TO PICK UP SCRAP PAPER SATURDAY

The FFA chapter of Kewaskum High school will pick up scrap paper on Saturday, April 9, after 9:00 a. m. Have your paper out on the sidewalk at that time.

HOSPITAL NEWS

Sharon Klein, daughter of Mr. and Mrs. Fred Klein, Jr., R. 1, Kewaskum, submitted to an operation at St. Joseph's hospital, West Bend, last week.

Several thousand Wisconsin farmers are now using combination water heaters and room warmers in their milkhouses.

Senior Girls, Moms to Attend Woman's Club Tea

The girls of the senior class of the Kewaskum High school and their mothers will be guests of the Kewaskum Woman's club at the Senior Girls' tea on Saturday, April 16, at 3 o'clock, in the library, Dr. Wynett Barnett of the Dept. of Speech, Wisconsin State college, Whitewater, Wisconsin, will give the address. The business meeting will be at 2:30.

Hostesses for the afternoon will be Mrs. C. E. Reigle, Mrs. M. W. Rosenheimer, Mrs. C. F. Schaefer, Mrs. Allen Tessar, and Mrs. A. M. Clark.

4-H Club News

KETTLE MORAIN 4-H CLUB

The monthly meeting of the Kettle Moraine 4-H club was held April 4, at Gage school in the town of Auburn.

The opening song was the "Star Spangled Banner." Roll call topic was responded by each member "Favorite Kind of Music."

The publicity committee that was selected for making posters for the public benefit dance are Joanne Kempf, Alice Odekirk, Rachel Petermann, David Smith, and Eddie Kirsch.

We will have a team representing our club in the Fond du Lac County 4-H soft ball league this year.

Food and nutrition members are to have a meeting Friday, April 15, at 4:30 at the home of Mrs. Lorina Petermann.

Each member received tickets to sell for the public benefit dance that we are sponsoring on April 30 at the Kewaskum Opera House. This dance is for raising money for the "State 4-H Club Foundation."

Demonstrations were given by Carl Steiner on "How to Make Wool Pom Poms," Carol Heberer, "How to Shrink Material," and also "How to Sew on Buttons," Harriet Odekirk, "How to Make Clothes Pin Dolls," Joanne Kempf, "How to Make a Scarf," and Patty Egger, "What Articles Are Necessary to Take on an Overnight Trip."

Refreshments were furnished by Mary and David Smith and the Heberers.

LAUBENHEIMER RESIGNS COUNTY WELFARE POST

A veteran member of the Washington County Public Welfare board, Robert W. Laubenheimer of Richfield, tendered his resignation as a member of the board to E. M. Romaine, Kewaskum, chairman of the Washington County Board of Supervisors, last week.

Laubenheimer had served on the board for more than 12 years. His resignation, according to Laubenheimer's letter to Romaine, became effective immediately. The letter was dated March 31.

Carl F. Schaefer, Kewaskum, and William T. Leins, two other veteran members of the welfare board, resigned previously.

FIREMEN ANSWER CALL TO NOLTING PROPERTY

A call shortly after 12:30 p. m. Thursday sent the Kewaskum fire department to the Dr. F. E. Nolting property on Main st. where a garage-shed at the rear of his offices caught fire. The blaze was discovered shortly after it started and only a small hole burned in the northwest corner of the building. Cause of the fire is not known but the damage was slight.

STATE BEAGLE CLUB HOLDS SPRING DERBY TRIAL HERE

The spring derby field trial of the Wisconsin Beagle club was held at Kewaskum last week end. Winning dogs in this trial and other derbies held by various clubs throughout the state will be eligible to compete in the championship derby trial which will be held at Kewaskum in May. Joe Eberle, president of the state club, was lost for the trial.

Modern processing methods do not add or detract from the nutritive value of milk according to scientists at the University of Wisconsin.

Kewaskum One of 9 Teams in Lakes

LOCAL TEAM TO PLAY MOST OF HOME BALL GAMES AT NIGHT; SEASON TO OPEN MAY 8

At a league meeting held at Peet's Inn, West Bend, last Thursday evening, it was announced that the northern division of the Land o' Lakes baseball league will operate as a 9-team league on a split season basis this coming season.

The Kewaskum Chevrolets will be one of the clubs in the circuit and the first team practice has been called for 2 p. m. this Sunday. All players are invited to turn out for the team and they should be present Sunday as there are only four Sundays left to get in shape for the season opener on May 8. This year for the first time Kewaskum will play most of its home games at night under the new lighting system installed last fall. The home opener will be played on Sunday afternoon but thereafter as many games as possible will be held at night.

Kewaskum expects to have a strong team on the field this season. Many players who were not out for baseball last year are expected to return to the lineup. This is because most games will be played during the week under the lights and they will have many Sunday afternoons free.

The three top teams of last season—West Bend, Port Washington and Grafton—all will be back this year. All have lost some of their top players and this should result in a tighter race. The five other teams in the loop along with Kewaskum are Mequon, Germantown, Saukville, Cedarburg and Jackson. The latter team is a new one in the circuit and indicates that it will field a good club.

Kewaskum, which hung around the cellar for the first time last year, should move up in the standings in the coming campaign. It is reported that fireball Johnny Tessar will re-join the team this season. His brother Wayland, "Pete" Petermann and others are expected to be back in addition to most of last year's players.

RED CROSS DRIVE OVER TOP; \$9,307 COLLECTED

The 1955 fund drive of the West Bend chapter of the American Red Cross, which includes Kewaskum, surpassed its goal by approximately \$500 the past week.

The chapter's goal was \$8,800 and Robert T. Rolfs, fund chairman for the local chapter, reported that \$9,307.26 had been collected in the campaign. Of this amount 65 per cent will be retained by the local chapter. The remaining 37 per cent will be sent on for national and international needs.

In the seven-township area, all precincts had completed their drives by late last week although several contributions were still trailing in through the mails.

WOMAN'S CLUB TO BE GUESTS OF CAMPBELLSPORT CLUB

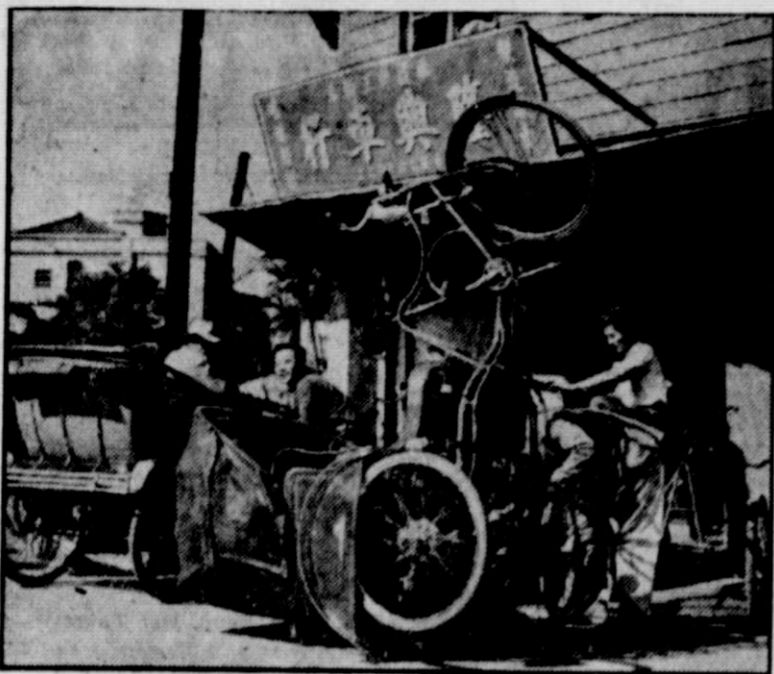

The members of the Kewaskum Woman's club are invited to attend a meeting of the Campbellsport Woman's club on Thursday evening, April 14, at 8 o'clock in the Campbellsport High school. Guest speaker for the evening will be Ruth Hinn Swaziek, who will give a dramatic monologue of "Madame Pandit of India." Mrs. Swaziek is widely known among Wisconsin women, having appeared at Federated Woman's club meetings in many Wisconsin cities.

Those of the Kewaskum club who will be driving are asked to take other members with them. It is hoped there will be a good representation of the club.

INDIANS PLAY BASEBALL OPENER AT WEST BEND

The Kewaskum High school Indians baseball squad has been out practicing whenever weather permitted the past week in preparation for their opening game next week.

The season opener will be a practice game with West Bend next Thursday, April 14, and will be played at Regner city park, beginning at 3:30 p. m.

SERVICE BY THE FOOT—Pedi-cabs, half bicycle-half ricksha, get servicing at garages such as this in Taipei, Formosa's capital. Popular because less expensive to operate and hire than auto taxis, they supply a necessary portion of the capital's transportation.

CARVING MEAT CUTS

Tools to Use

Carving sets are available in almost any size, with blades from 5 1/2 to 9 inches long and handles of various shapes and kinds. Most important is the quality of the steel; choose a blade that will take and hold a keen edge.

The standard set includes a knife, fork and steel with which you can do all around carving of roasts. The blade of the knife is 8 to 9 inches long. A guard on the fork protects your hand.

The steak set is a knife with a 6 or 7-inch blade and a matching fork which may have a guard. You can carve all steaks and even small roasts with this set. Most carving needs can be met with this and the standard set.

The roast meat slicer and carver's helper are two extra carving conveniences. The former has a long flexible blade for cutting large thin slices. The carver's helper with its widely spread tines steadies the roast during carving.

COUNTRY PLAYERS

LES CARROLL

THERE is a great demand for sacred music lately, and many fine Gospel songs are being recorded. Martha Carson's "Counting My Blessings" is inspirational and melodious, and Roy Acuff sings "The Thief Upon The Tree" in his good, old-time style (Both Capitol). Cowboy Copas (King) has a very good release, "The Stone Was Rolled Away," while Carl Story's quartet gives an excellent rendition of "They Have Gone Home" (Mercury).

Stuart Hamblen (RCA) bids for the top charts with two great sides, "Go On By" and "Just A Man." The Carlises switch from comedy to do a fine version of the currently popular "Rusty Old Halo" (Mercury). Another currently popular song, "Ballad of Davy Crockett," is well handled by Mac Wiseman (Dot), and Red Foley's "Hearts of Stone" is still zooming (Decca).

A very unusual and funny number is "Cuzz Yore So Sweet," by Simon Crum (they say it's Ferlin Huskey), on Capitol. Two other fine novelty numbers are "Hey, Maw," by Porter Wagoner, and Homer & Jethro's "Nuttty Lady of Shady Lane" (Both RCA).

Honeymooners Wanda Wayne & Billy Barton do a fine answer to the popular "I Love You," with "The Song You Just Played,"

(King). And Montana Slim & Talane Sisters have a very catchy release in "Shoo Shoo Sh' La La" (Decca).

Some fine releases by the girl artists are "Evergreen," (Morgan Sisters, King); "You Sent Her An Orchid," (Jean Shepard, Capitol); "No More" (Duetted by Betty Amos, Mercury); and "I Dreamed of a Hillbilly Heaven," (Anita Carter, RCA).

The late Hank Williams' "Please Don't Let Me Love You" is great, and Audrey Williams also does well with "Making Believe." "No One Knows" is a beautifully sung ballad by Jimmie Williams (All MGM).

Some good old numbers are being revived, and Webb Pierce does a great job on "In The Jailhouse Now" (Decca). Grandpa Jones does "Old Dan Tucker" and "Gooseberry Pie" (RCA), while Bud Jones (MGM) does "Bluetail Fly."

OTHER GOOD RELEASES are "I Gotta Go Get My Baby" (Just-in-Tubb, Decca); "Forgive Me Dear" (Faron Young, Capitol); "Don't Make Me Fall In Love With You" (Held Stewart, RCA); "Skater's Yodel" (Elton Britt, RCA); "The Wall Around Your Heart" (Al Terry, Hickory) and "One Broken Heart" (Ray Price, Columbia).

Prepare Small Child For Hospitalization To Alleviate Fears

The prospect of a trip to the hospital, even for minor surgery, is unpleasant to most people. But when the patient is our own small child, our apprehensiveness increases.

Though the actual physical danger may be small, what with modern drugs and medical skill, we become concerned over the expense, the upset household, and the emotional effect it may have on the child. This latter effect may show up in many ways—fear of returning to the hospital, fright of the doctor, and even reluctance to return to school.

One way to avoid these after-effects is to prepare the child for the operation. Parents can start by controlling their own feelings and not relaying their anxieties to the child. Also a frank and honest discussion with the child, talking to him and letting him ask questions and express his feelings, will help reduce his fears. Assurance that he is going to the hospital to get well will also help.

Though there is no "right time" to tell a child he is going to have an operation, a day before going to the hospital is usually better than either several days, or just a few hours, before leaving home. The fact that there will be some pain should be honestly admitted, but should be accompanied by the assurance that the doctors and nurses will try to make it as little as possible and that they will do their best to make him well again. If he demands that the parents stay with him, he should be told that they will do as much as possible.

"Play acting" the trip to the operating room; allowing the child to help pack his own bag, including his favorite cuddling article; accompanying him to his room; and informing the nurses concerning his personal habits will all help him adjust to his new experience.

The child's emotional adjustment after the operation is as important as his preparation before it. Again the presence of the parents at his bedside as he awakes from the anesthetic is the most important reassurance. As he recovers physically, he should be encouraged to talk about his hospital experiences. He should be allowed to let out any anger or resentment he may have, ask questions, and even cry. Permitting him to get his fears out in the open is most helpful in his adjustment.

For a young child the emotional effects of a trip to the hospital may be far more lasting than the physical effects. Parents should leave no stone unturned to help their child meet such events in his young life.

STRICTLY FRESH

PRETTY limbs in the spring-time bring out the sap in more than trees.

HAIR-BREADTH HARRY

Study of Russian Language Down

Reports tell us that the number of students studying Russian in college is steadily decreasing. The high was reached in 1950-51, when interest in Russia and the Russian language seemed to reach its highest point.

That was on the eve of the Korean war, but since that time, the number of students enrolling in Russian-language courses has steadily fallen. We do not know the reason for this, although some claim it is partly to be blamed upon the fear of many students that studying Russian will bring them under suspicion and possible criticism.

We would urge American college students to study the language of our principal potential enemy, and believe that this is a necessity if we are to better understand Russia and better master her armed forces, in case of

war. Not only that, but the United States and its citizens might as well admit the fact that Russia is one of the world's most dynamic nations and certainly one of the top two or three countries in the world in influence and power today.

We hope the trend away from the study of the Russian language will be reversed, just as hope that American colleges and universities will be successful in keeping pace with the tremendous production of graduate scientists in the U. S. S. R. We will never solve our problems with Russia by refusing to study that huge country, its people and its language. College students should give Russia increasing attention, not less, and, in the years ahead, it is sure to pay dividends.

The paiche is a fish native to the mountain streams of Peru which resembles a musky in appearance and fishing qualities but is larger—some are said to weigh 400 pounds.—Sports Afield.

Chutes Fail But Airman Lives

Private Stanley Melczak, of Hamburg, Pennsylvania, recently jumped out of an aircraft at 1,000 feet. His jump was part of a mass jump by the 503rd Airborne Combat Regimental team, which was conducting Operation Snowbird in Alaska.

The 20-year-old paratrooper realized in a few seconds that he was having trouble with his main parachute. The parachute was flapping loose on his shoulder and was not going to open. He jerked the cord of his emergency chute immediately, but it was too late.

He crashed to earth before the emergency chute opened and observers thought he had been instantly killed.

The thing that saved him was a four foot snow bank on which he fell. Rescue personnel reached him at the bottom of a hole, where he had gone through the snow.

He was complaining about his breathing and a helicopter rushed him to an Army hospital nearby.

It was expected that he would have all sorts of internal injuries and surgeons were rushed to his side immediately. But, to the astonishment of all present, he was found to have no serious internal injuries and, after being X-rayed from stem to stern, only one small dislocation was found.

Private Melczak is one of the few men who have jumped out of a plane at 1,000 feet, and landed and lived to tell about it without the aid of a chute. And even more remarkable, he landed without the aid of two chutes, both of which he had on when he jumped.

LITTLE AMERICA

When the U. S. S. Atka arrived at Little America, they found much damage at the main camp established by Admiral Richard E. Byrd. A large section of the continental icecap had cracked loose and floated north. The Bay of Whales had completely disappeared.

"Mister Fixum's Handy Hints"

BY ERNIE GARDNER

How To Soundproof An Attic Floor
Noises from the flat above are very annoying sometimes, if you are at all inclined to be nervous. This reader wants a solution to his problem.

Can you tell me how to fix the attic so noises from there will not disturb the people in the apartment below? I suppose you would call it soundproofing. —R.G. ANSWER:

Sound is carried through floors and walls by the studs and floor joists in addition to being carried through the plastered walls. Therefore, in soundproofing, it is best to avoid nailing to any of the structural members of the house as much as possible.

I have illustrated two methods of soundproofing. METHOD NO. 1: Lay soundproofing insulation board on top of the attic sub floor. Use as few nails as possible. Then lay a plywood base on top

of the insulation board, and cover with linoleum tile, or other flooring material.

It will be necessary, of course, to nail the plywood in place.

METHOD NO. 2: Another method is to glue soundproofing insulation board to the ceiling of the rooms below. Again, there is the caution about using nails.

If you doubt the sticking qualities of the glue or mastic used for installing the board, use a few nails.

There are a number of companies listed in the telephone directory that sell soundproofing materials.

Look under the heading of Acoustical Materials.

Send 35¢ today to Ernie Gardner, 1302 So. Elm St., Jefferson, Iowa, for your copy of MISTER FIXUM'S HANDY HINTS. This is a booklet made up of selected jobs from this column. Booklets No. 1, 2 and 3 available. 3 for \$1.00.

Beginner's Luck
Mabel: "It took eight sittings."
Tillie: "What? Have you been having a portrait painted?"
Mabel: "No, learning to skate."

PELLYACHE — Keiko Izumu, 2, shows tender solicitude for her favorite pelican fountain in Hibiya Park, Tokyo, Japan. Despite the fact that it's a worst-in-years winter in Japan, the statue's pipes aren't frozen; the bandage holds the neck in place until repairs can be made.

Beane Actually Up In The Air

Near San Antonio the other day, Lt. Col. W. D. Beane had to jump out of a jet training plane. It was after dark, and the weather was strictly nowhere.

Beane did exactly that. He pulled back the canopy and ejected himself. His plane sped off into the night, to crash at an unknown spot, and Beane pulled his ripcord.

Half an hour later, the pilot was still hanging up there in space. He told friends later that he couldn't even see the top of his chute much of the time, so bad was the weather.

Strong updrafts in freak weather were holding Beane up. It has happened before, but seldom do pilots happen to bail out in such upcurrents. Beane finally came down, after going up, then down, then up, and then hanging there, about stationary, and landed in a tree. He was not injured seriously.

This story reminds us that the weather—the most talked about subject in the world—still has a few tricks the experts don't understand. Just why tornadoes build up when they do, and how, is not certain.

Just why hurricanes do what they do, and how, is not understood. Just why the sky suddenly clears up, when the experts correctly read all the indications as pointing to rain, is a mystery. The airstreams which push along transoceanic planes at great speed are another mystery—not even recognized until in recent years.

For centuries man has been traveling on the ground and on the sea. He has become well acquainted with the sudden flash floods, quicksands, mountain dangers and all the hazards of earthly motivation. But we have been traveling through the air only for a few decades. And there are a lot of questions yet to be answered. Flying and flights are not yet routine.

Fisherman Fisher Reels In Trouble

FORT BENNING, Ga.—For a fisherman, Army Captain Carl A. Fisher of Patchogue, N. Y., has a hard luck tale he can't forget. Here's what happened during a recent fishing tournament which started after he got up at 4:30 a.m.

He forgot his boat keys and had to break the lock.

Someone else was fishing at his favorite spot.

The boat sprang a leak and he had to bail water out every 30 minutes.

He was ashamed of his catch and didn't turn the fish over to the tournament officials.

A bat struck him on the head. A water moccasin ate the fish he had tied to the boat.

On the way home after dark his car had a flat tire.

Sarah Anne's COOKING CLASS

A New Cereal Cooky Pleasure

Grownups, as well as children, will like these new Maple Rice Crisp Cookies. Their crunchy goodness and subtle flavor makes them real teasers. Eat one—and you'll want several more.

The delectable crunchy goodness of Maple Rice Crisps is obtained by using generous amounts of pre-sweetened rice cereal. It is used in the cookey dough, and for coating each ball of dough before baking.

This new cookey recipe is a real find. The recipe is easy to follow and the cookies keep well (if you can keep the family out of the cookey jar). You'll find these nutritious cookies are just the thing to pack into the lunch boxes—or serve with simple desserts.

Maple Rice Crisp Cookies
1½ cups sifted all-purpose flour ½ cup shortening
¾ teaspoon baking soda 1 cup granulated sugar
1 teaspoon salt 1 cup pre-sweetened rice cereal
1 teaspoon cinnamon ½ cup chopped nutmeats
1 egg, beaten 1½ cups pre-sweetened rice cereal for rolling cookies
¼ cup milk 1 teaspoon maple flavoring

Combine and sift flour, soda, salt and cinnamon. Combine egg, milk and flavoring. Cream shortening and sugar until light and fluffy. Add dry ingredients and liquids alternately one-half at a time. Stir only until dry ingredients are moistened. Fold in cereal and nuts carefully. Roll rounded teaspoonfuls of cookey dough in additional pre-sweetened rice cereal. Place on greased cookey sheet and bake in a moderate oven (350°F.) until done, about 15 minutes. Remove from cookey sheet, cool. Yield: 40 to 42 cookies.

It is a comforting thought to know your desserts are ready and waiting. These desserts in addition to being pretty and good are perfect to serve after any main meal where a small serving is indicated.

Frosted Ice Cream Cake
1 ounce square unsweetened chocolate
¼ cup milk
1/3 cup confectioners sugar
½ teaspoon vanilla
½ pint cream whipped
1 layer sponge cake 1½ inches thick
¼ cup toasted chopped almonds

Melt chocolate over hot water—add milk and sugar. Stir until smooth. Add vanilla. Fold in whipped cream. Freeze until stiff mush. Cut sponge cake to fit refrigerator tray. Remove frozen mixture from tray. Stir through and pour over sponge cake. Sprinkle top with almonds and return to refrigerator to freeze.

Ambrosia Tapioca Parfait
1 egg white
2 tablespoons sugar
1 egg yolk
2 cups milk
2½ tablespoons sugar
1/8 teaspoon salt
3 tablespoons quick cooking tapioca
½ teaspoon vanilla
1 teaspoon grated orange rind
1/3 cup cream whipped
2 oranges
Grated fresh coconut

Beat egg white until foamy, add 2 tablespoons sugar, 1 tablespoon at a time. Continue beating with rotary beater until mixture will stand in soft peaks. Set aside. Beat egg yolk, add about ¼ cup milk in a saucepan. Add 2½ tablespoons sugar, salt, tapioca and remaining milk. Place over medium heat and cook until mixture comes to a boil, stirring constantly about 5 to 8 minutes. Pour small amount of tapioca mixture gradually on egg white, blending well. Then quickly add the remaining mixture, stirring constantly. Add vanilla and grated orange rind. Cool for 20 minutes. Fold in whipped cream. Chill. Peel and section oranges. Sweeten to taste. Place half the orange sections in parfait glasses. Fill glasses with the tapioca cream. Garnish with remaining orange sections and sprinkle with coconut. Serves 6 to 8.

Bahamian Coconut Tart
½ lb. grated coconut
Juice of 1 lemon
2 tablespoons melted butter
1 small can evaporated milk
Pastry
1 cup sugar

Cook coconut, evaporated milk and sugar together in a saucepan for 20 minutes. Let it simmer slowly, add lemon juice. Put it in pastry lined tart shells with strips across the top. Bake slowly in oven 250 degrees until brown.

Pecan Tarts
1 cup corn syrup light
½ stick butter
½ cup sugar
3 eggs
½ teaspoon vanilla
1 cup pecans chopped

1/4 teaspoon salt
Pastry—whipped cream
Pecan halves
Boil gently syrup, sugar and butter together for 5 minutes. Beat the eggs well, add the hot liquid, stirring constantly. Add vanilla. Add chopped pecans. Pour into pastry lined tart pans. Bake 10 minutes at 450 degrees, then reduce heat to 350 degrees and bake about 20 minutes. Chill. Cover with a thin layer of whipped cream. Garnish with pecan halves.

Nesselrode Pudding Pound Cake
1 package lemon flavored gelatin
1 cup heavy cream, whipped
½ cup broken pecan meats
½ cup Maraschino cherries chopped
1 tablespoon rum

Grease mold lightly. Cut cake in thin slices, then cut slices to fit mold, making enough for 3 to 4 layers. Crumble cake scraps to sprinkle in any spaces left between cake pieces. Prepare gelatin as directed on package. Chill until the consistency of unbeaten egg white. Whip with rotary beater until light and fluffy. Fold whipped cream, pecans, cherries and rum. Arrange a layer of cake pieces in mold. Spoon a layer of filling on top, then another layer of cake and filling, repeat until all is used. Chill several hours. Unmold. Frost top with additional whipped cream and garnish with colored sugar and Maraschino cherries.

Don't drop raw potatoes, fish, shrimp and other food of that type in a deep-fat fryer carelessly.

BUDDHA IN EXILE — The Chag Chia, the "Living Buddha," poses before his shrine on Formosa, where he sought sanctuary from Chinese Communists in 1949. Claiming to be in his 19th reincarnation, he heads the Chinese Buddhist Association, is said to be titular head of all Chinese Buddhists.

"LOVE" FOR A SHILLING—These English lasses are willing to pay to be courted—tennis courted, that is. Six shillings in the meter buys light for one hour's night play at the Queen's Park Lawn Tennis Club, Bournemouth, Hampshire, England. The unique "pay as you play" plan has attracted the interest of some American tennis clubs.

It All Comes Out In The Wash

The aftermath of a home decorating job with old-fashioned painting methods used to include a messy, time-consuming and costly operation of cleaning up painting equipment.

This problem has been eliminated, however, with the development of paints based on synthetic latex. In addition to ease of application, outstanding washability, and non-painty odor, the latex paints have given both amateur and professional painters an important PLUS advantage—brush or roller are quickly rinsed clean in ordinary tap water.

Hands no longer need be exposed to strong solvents to remove paint—water does the job. Any splattering of latex paint on woodwork or floor can be simply wiped up with a damp cloth. The result is a considerable saving in cleanup time. Yet, when thoroughly dry, even grease stains or crayon marks can be scrubbed from the amazingly tough finish.

These quick-drying paints are now available in gloss, semi-gloss, and flat finishes.

OUR DEMOCRACY — by Mat

"POOR RICHARD" FLIES A KITE

HOW BENJAMIN FRANKLIN, SEEKING TO CONTROL THE FORCE OF ELECTRICITY, FLEW A KITE TO LEARN THE NATURE OF LIGHTNING, IS PART OF THE AMERICAN STORY. SO IS HIS ADVOCACY OF THRIFT.

HARNESSED TO THE NEEDS OF MAN, ELECTRICITY TODAY REINFORCES THE PRODUCTIVE POWER OF AMERICA. AND THE DEVELOPMENT OF ELECTRIC LIGHT AND POWER HAS BEEN MADE POSSIBLE LARGELY BY THE GROWTH OF THRIFT IN AMERICA—THE INVESTMENT OF LIFE INSURANCE FUNDS AND OTHER SAVINGS. "POOR RICHARD"—FRANKLIN THE INVENTOR—WOULD BE AMAZED AT HOW HIGH HIS "KITES" HAVE FLOWN.

our dear wife and mother, Mrs. Henry Burke. Special thanks to the donors of flowers, Miller's and Ritter & Deusch Funeral homes, and all who showed their respect by calling at the funeral home.

Henry Burke Mr. and Mrs. Elmer McWenks Today, more than 98 per cent of all Wisconsin farms have electric lights.

Low Quality Seed Too Costly at Any Price

Everyone knows the biblical warning against building a house on sand, also the folly of spending money on the materials that go into a house and trying to save on a cheap foundation.

But do farmers realize that the same principle applies to the purchase of seed for planting? Good stands of grasses, clovers and other crops come only from good seed.

Fertilizer, labor and machinery are also necessary, but they are often wasted when spent on poor seed which is the foundation of a good stand and, in the end, a good crop. And the cost of good seed is often little compared to other costs. Especially is the difference in price between high and low quality seed relatively low.

When sown at the rate of 8 or 10, even 15 or 20 pounds per acre, a possible difference in cost might be \$1.00 to \$1.50 or at most \$2.00 per acre. Is it worth taking a chance on your crop for as little as that? And with perennial grasses and legumes, this increased cost is only for one year, while the better crop resulting from it is likely to be repeated for a number of years.

Since most hay and pasture seeds are purchased from a seed dealer and not grown on the farm where used, it behooves the farmer-buyer to know how to buy his seed intelligently.

Seed of uncertain quality bought from a neighbor, either directly from the combine or as "fanned" by a farm fanning mill, may "look" good. Or the truck peddler may have some rather good looking seed to offer at a "bargain" price that is tempting. But, what do you really know about these seeds?

What Makes Good Seed

1. Adapted variety
2. High yield records
3. High quality of crop
4. High seed purity
5. Small total weed seeds
6. Freedom from noxious weeds
7. High germination
8. Freedom from diseases

Do you know the germination? Or purity? Their freedom from noxious weed seeds? Their truthfulness to variety? Can you depend on verbal or unreliable statements as to these? Certainly not—see that the seed you buy bears the analysis tag of a reliable dealer who will stand back of the statements made. And remember, too, that price shouldn't be the deciding factor.

It costs money to produce high quality seed. Seedsmen have a heavy investment in costly cleaning and refining machinery of many kinds and employ skilled operators and technical staff for their seed-testing laboratories for a good reason. But the cost of the seed from a reliable seedman is more than justified by the high quality obtained.

The seed-analysis-tag required by law on every bag is for the farmer's protection. It tells him the quality—how free of weeds it is, the purity, the germination, and date of test. If the seed is of an improved variety, it should also bear the certified tag of an official State certification agency. This high quality seed is the foundation to build on. High quality seed of known origin and known quality, and preferably of known variety, is the least cost in making a good crop.

No other low-priced car even comes close

to matching these important Chevrolet advantages . . .

- If you're planning to buy a new car, the one you just can't afford to miss seeing is Chevrolet—for 19 straight years America's best-selling car. The Motoramic Chevrolet offers you so much more than the other low-priced cars that it's hardly fair to compare them. And even the high-priced cars don't have all the advantages that today's Chevrolet offers you.
- The beauty's built in—not bolted on! Chevrolet's beauty is inherent in the basic contours of metal and glass. There's no excessive bolted-on ornamentation to go out of style overnight.
- The Body's by Fisher! You see Body by Fisher on lots of the high-priced cars—and only Chevrolet has it in the low-price field!
- Today's most modern engines! That goes for Chevrolet's new V8 and two new sixes as well. All bring you a modern 12-volt electrical system—double the voltage of other low-priced cars. Then Chevrolet's new "Turbo-Fire V8" has the shortest piston stroke in the industry!
- A drive to suit your driving! There's silky, peppery Powerglide (even better this year!), new Overdrive (both extra-cost options), and a new Synchromesh transmission that's as smooth as they come.
- All the power helpers you want! Windows, seat, steering, brakes—all are available with built-in "muscles" to make driving as effortless as you wish. They're optional at extra-cost—and worth it!
- Come take the key! There have never been so many good reasons why you should drive a Chevrolet!

Over Ten Million Chevrolet owners—Two Million more than any other car!

LEGAL NOTICE

NOTICE OF PUBLIC HEARING ON PROPOSED AMENDMENTS TO THE COUNTY ZONING ORDINANCE.

Notice is hereby given that a public hearing will be held at the courthouse in the City of West Bend, Washington County, Wisconsin on the 8th day of April, 1955 at 8:00 o'clock in the evening on the proposed amendments to the Zoning Ordinance of Washington County as it effects the boundaries of zoning districts, all pursuant to section 59.97 (3) Wisconsin Statutes, as follows:

1. That the boundaries of the Agricultural zone in the Town of Wayne be changed to a Commercial zone. Petition by Town Board.

CORRECTING CAUSE STOPS FORMATION OF KIDNEY STONES

Kidney stones are painful and can become serious. The larger stones do not cause a great deal of discomfort, but the smaller ones move into the urinary tubes and may cause pain and injury.

It is not sufficient to remove the stones by surgery as more will be formed unless the cause of their formation has been corrected. The primary cause of stones in the kidneys is nerve interference. Nerve interference causes faulty chemistry in the kidneys directly or indirectly affecting the parathyroid glands in their control of body calcium and phosphorus.

The chiropractor locates and removes interference, thereby allowing nature to normalize chemical function in these organs.

TEACUP TOPICS

By BETTY ANN
Editor, The Kewaskum Statesman, Women's Page

When a leading woman in the world of Paris fashion made a trip to the United States, she told the somewhat startled reporters that she had about 40 pairs of shoes—all cut from the same last.

For a woman confident of her taste, this is a wonderful idea, says Betty Ann, but one sincerely hopes, for the sake of the health of her legs and feet, that this woman was leaving some of the story untold.

Women who, by virtue of their work or position, must wear pumps most of the time should most definitely have a firm, comfortable pair of flat heels to wear on the side.

For, if you wear high heels as your only shoes, you will find that the muscles of the legs take up to conform to the position of your foot.

And pretty soon you find that the calves of your legs are very uncomfortable when you're out of your pumps. To avoid the discomfort, you find yourself doing laundry or washing dishes in your heels. And so on.

The cycle needs to be broken some time during the day by wearing flat heels, low heels or going barefoot. The shortening of the muscle is less drastic, but the general idea is close to the ancient practice of binding feet. Our fine well designed bodies are made to conform to some idea of beauty. This wrecks the design.

Are you wondering how to care for an orlon sweater or some stretch nylon socks?

Orlon sweaters definitely are washable but should be treated as wool, say technicians at American Institute of Laundering, Joliet, Ill., research and educational center of the laundry industry. It is important that orlon, like wool, not be washed in high temperatures or tumbled in an automatic dryer. Water 90 degrees in temperature is best for the fabric.

The new multiple size nylon socks also are an item for the laundry bag and are handled the same as light socks. Nylon will shrink if the temperature is too high (150 to 160 degrees), so they should be kept away from the home dryer.

Wake up yourself and your face with a thorough cleansing in warm water and mild soap. Next, freshen and tone your face with a brisk patting with a good quality witch hazel. There is added zest if it's chilled in the refrigerator. Then comes the foundation: Cream for a dry skin, liquid or cake make-up for an oily skin. Now do a careful make-up job and you'll face the world looking as pretty as you feel.

Orange flavored apples with pork chops are dressy enough to serve for company and a delicious treat for the family, too. Combine two teaspoons grated orange rind, one-half cup orange juice and one-half cup granulated sugar in saucepan or skillet. Core four spicy apples and cut into quarters. Arrange apples, skin side up, in the liquid and cover. Simmer over low heat 10 to 15 minutes, or until apples are tender. Arrange apples on heated platter with pork chops. Cook orange sauce until thickened and spoon over apples. Serves four.

Deviled Tuna and Olives
Three-fourths cup ripe olives; 2 hard cooked eggs; 2 tablespoons minced onion; 3 tablespoons butter; 4 tablespoons flour; 2 cups milk; 1 teaspoon salt; 1 teaspoon prepared mustard; 1 teaspoon Worcestershire sauce; 1 (6 or 7 ounce) can grated tuna; hot cooked rice or biscuits.

Cut olives in large pieces. Dice eggs. Cook onion in butter slowly five minutes. Blend in flour. Gradually add milk, salt, mustard and Worcestershire sauce and cook and stir until thickened. Stir in olives, eggs and tuna and heat. Serve at once on hot cooked rice or on hot biscuits. Makes four to five servings.

Enticing bait for appetites is a casserole of spaghetti with fish sticks baked on top. Use two cans of spaghetti in tomato sauce and a package of frozen fish sticks. Empty the spaghetti into a casserole or eight inch square baking pan. Arrange the unthawed fish sticks on top. Bake in a hot oven (400 fahrenheit) about 25 minutes. Makes four generous servings.

Rub a little paste wax on the edge of desk or dresser drawers to keep them from sticking.

Sharp Retort

"Are you going to take this lying down?" shouted the politician. "No, the shorthand reporter is doing that," cried a voice.

About Your Home

Gardening can be hard work—so hard that the pleasure is lost. When this is the case, usually one or all of six basic things are wrong. The design of the garden, choice of plants, pest control, wind and rain, soil management, and the use of equipment.

In the first place, be realistic! Keep in mind that many plans that look exciting on paper require far too much upkeep once they are installed. Clipping and edging can be a big problem. Work over your garden so that it will require as little labor as possible.

Your garden should be built around your interests, climate and soil. Beware of growing plants. Crowding encourages pests.

Choose your plants very carefully. Choose hardy ones that can take both summer and winter without special care. They should be pest-resistant and have the correct habit of growth, and size to do the desired job.

Don't struggle with plants susceptible to mildew, blackspot, and Japanese beetle.

Space your plants generously. Don't try to keep a fast-growing giant evergreen chopped down to baby size.

Have the proper gardening equipment. It is foolish to do a lot of hard work by hand, or to pay someone else to do that, some handy tool could do with half the effort and time.

Spring bulbs are easy to grow and sure to bloom. It is necessary to supply only water and sunshine in most cases. When large flowers are desired, order "top-size" bulbs and water generously and regularly.

Spring bulbs are just the thing to use for a colorful groundcover in shady places. This is especially true if the shade is heavy all summer long.

Remember, however, that bulbs make all their growth in the spring.

Bulbs can make a quick flower show for a new house. By planting enough bulbs to make a show of green and blooms about the front entrance and other important points of interest you can wait to discover which parts of your garden will be most livable at different times of the year.

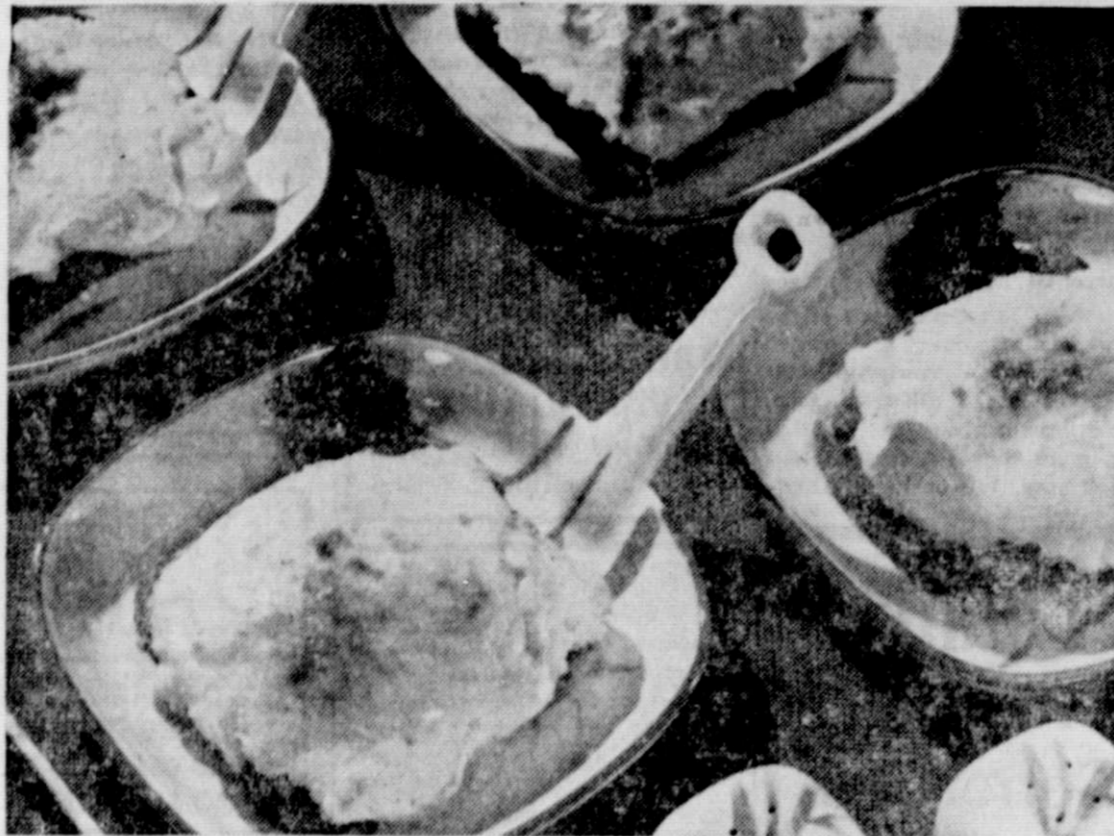

Sports Quiz

1. Who is Eddie Brannick?
2. What horse won the recent Flamingo Stakes?
3. How did the U. S. team come out when it played Canada in the world hockey games recently?
4. Who is Don Hoak?
5. Who is Jerry Barber?

THE ANSWERS:

1. Road Secretary for the New York Giants.
2. Nashua.
3. It was defeated 12-1.
4. Brooklyn Dodger (NL) baseball player.
5. Professional golfer who recently set a course record at Memorial Park in Houston.

Hot Puffy Cheese Sandwiches Make Hearty Fare

A golden puff of cheese lightly brushed with brown forms the top of these hearty deviled Swiss puff sandwiches. A juicy slice of red tomato and zesty deviled ham filling are smothered beneath just waiting to be discovered with the first delectable bite.

Hot from the broiler, these sandwiches are wonderful fare for crisp days. Since they are rich with dairy foods—Swiss cheese and evaporated milk—you can be sure they're also full of the nutrients that provide lots of energy for fun-filled days.

DEVILED SWISS PUFF SANDWICH

4 Servings
1/2 cup evaporated milk
1 tablespoon flour
1 tablespoon water

- 1 egg, slightly beaten
- 1 cup shredded processed Swiss cheese (1/2 pound)
- 1/2 teaspoon onion juice
- Dash of Tabasco sauce or few grains of cayenne, if desired
- 3/4 teaspoon baking powder
- 6 tablespoons deviled ham
- 2 tablespoons evaporated milk
- 4 slices tomato
- 4 slices bread

Heat the 1/2 cup evaporated milk in top of a double boiler. Mix flour with water. Stir into the milk and cook until thickened, about 5 minutes. Add the beaten egg, cheese and seasonings, and continue cooking until the cheese is melted and the mixture is thick and creamy. Set aside to cool. Blend the ham with the 2 tablespoons

evaporated milk. Spread the slices of bread with the ham mixture, then top each with a slice of tomato. Blend the baking powder into the cooled cheese mixture. Spread the cheese mixture thickly on each sandwich.

Place sandwiches in individual shallow casserole or in a shallow baking pan. Place under broiler. Using moderate heat, broil until the cheese is puffed and slightly browned on top. Serve at once.

Note: The cheese mixture may be prepared, except for the baking powder, the day before it is to be used. It should be removed from the refrigerator an hour before using, so that it will soften for easy spreading. Add the baking powder just before using.

British To Build Twelve Atom Plants

The British Government has announced a plan to build twelve atomic power stations in the next ten years. It is a historical decision and becomes the first program of its kind announced by a major power.

This announcement furthers a trend in Great Britain toward civilian use of the newest power source—atomic energy. The British have concentrated more on civilian use of atomic power than has the United States Government, and this has brought about some criticism in this country.

Geoffrey Lloyd, Minister of Fuel and Power, in making the announcement, said that within ten years, the British may be building only atomic generators and no other kind of sources of electricity. This is certainly a sign of progress, and one which the U. S. Government should take note of.

the Snapshot Guild

Intentional double or triple exposures are fun to make—all you need is a dark background and a few simple props.

It's Fun to Make Mistakes on Purpose

March evenings seem to us to be the ideal time for trying something new and different, for experimenting and finding new interests. And today we've got a suggestion to pass along—trick photography.

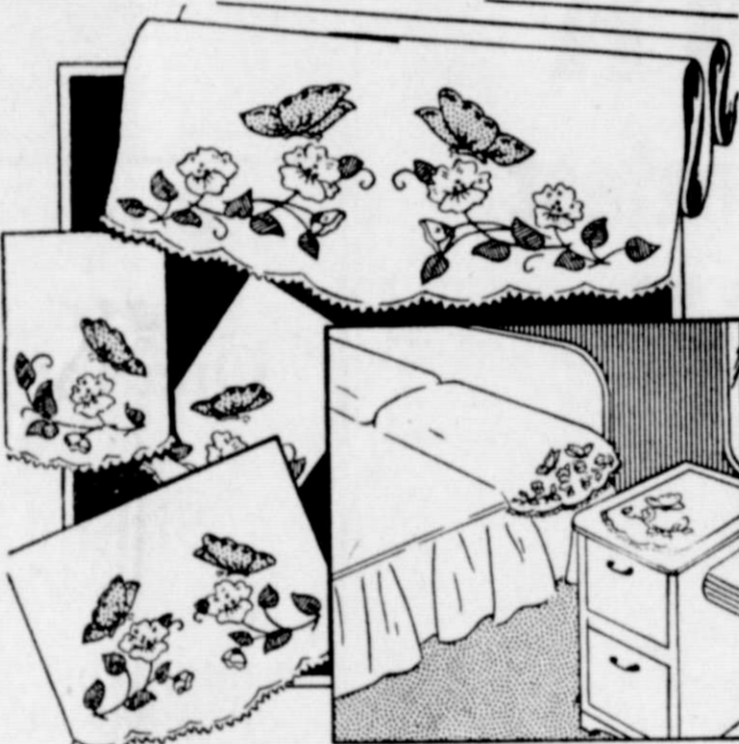

Don't think for a minute that trick photography's something for the experts—the box camera crowd can have their fun with it too. As a matter of fact, much of trick picture taking is merely a matter of making mistakes on purpose.

One of the easiest and most effective varieties of trick photography is based on that familiar snaphooting gremlin, the double exposure. Most of us know all too well how to do this when we don't want to, but now we'll tell you how to do it for fun.

First of all, you have to put your camera on a tripod or other solid support, because these have to be time exposures. Camera movement would spoil the trick in this case.

To take a picture like the one we've used to illustrate today's column, set up your table where you can have a plain dark background. One way to achieve this is to put it in front of a door which is opened into a darkened room. Place your subject in the first position. Snap the picture. Then, without winding the film, move her to the next position and snap another picture, and so on, if you want her in the picture a third time. Be careful not to move the table. It has to be in the same position for each exposure.

—John Van Guilder

BEDROOM ENSEMBLE

Here is a fresh looking bedroom ensemble with a touch of spring that lasts and lasts! The designs are lovely whether worked in embroidery, textile paint or applique. Use the designs on blouses, serving trays, scarves, etc. The usable-several-times Hot Iron Transfer includes all necessary designs and instructions. C3049 20c

Factual News About The Eyes

Growing Visual Burdens Should Be Eased

As civilization becomes more complex, it makes heavier demands upon our visual capacities, the Better Vision Institute points out. Eyesight is taxed not only by exacting work but by such recreation as movie and television viewing, games, and sports. As for reading, although a good many people think it went on the skids as an American habit in about 1949, the figures tell a different story. Since that year, book sales have risen, daily newspaper circulations are up by a million and a half, and magazine circulations are up 20 millions.

The strange thing is that most eyes perform rigid tasks with little immediate loss of efficiency. In a recent study, a group of young adults were required to do work involving prolonged and concentrated near vision for a number of days, and to begin and end each day's work with a special test-task of a visual and mechanical nature. The effects of their ocular fatigue were judged by this test-task and by visual examinations made before and after each day's work. The results showed that at the end of the day visual acuity decreased an average of two per cent, eye-muscle balance changed five per cent, attentive-

Health & Beauty

Did you go haywire eating at Thanksgiving and then again at Christmas and at New Years? Well, you aren't alone.

Many of us had just managed to lose some weight and begun to look well in our last winters clothes when along came Thanksgiving. You may have gained four or five pounds.

Then the struggle began to lose the extra weight. When success was near, Christmas arrived. Don't despair! Make up your mind to do something about those pounds.

Give up starches, fats and sweets for a week. Get a moderate amount of exercise. Providing you are in good health, this will do wonders for you.

Keep in mind that over-eating, and the conditions it brings on are responsible for more deaths than any other single thing.

Your complexion will suffer from an over-rich diet and not enough exercise.

Try standing in front of a full-length mirror and looking at yourself honestly. Chances are that you will find the appearance of age is made up of many small factors. Almost all due to over-weight. They include a roll over the girdle, a protruding abdomen, a double chin, a dowager's hump, rounded shoulders, a drooping jaw line—to list a few.

If you need to lose a good bit of weight, consult your doctor. He will outline a safe diet and tell how fast you should lose weight.

All of us have our own personal beauty problems. The best way to cope with them can be very valuable information.

Your trouble may be cold sores that always seem to come at the most inconvenient time. Blame a virus for these hot and irritated bumps which come on your lip at a moment's notice. It is not the same type virus which causes cold, but it is related.

The best treatment is to apply hot compresses to the sores, then dab them with spirits of camphor. Cover the sore with one per cent yellow oxide of mercury. If the cold sores reoccur frequently, they can be treated with smallpox vaccinations.

Cracked lips cause suffering the year around but during the winter they are almost a common sight. This condition can be due to dozens of things. An allergy to certain tooth brushes, drinking cups and cosmetics, to name only a few.

A most common cause is a deficiency of vitamin B. Eat more whole grain cereals, liver, lean meats, milk and eggs. Try eating brewer's yeast for a bad case.

Permanent goose-pimples is a name given to a condition doctors call follicular hyperkeratosis. They are found on almost any part of the body. Particularly on the leg or the under side of the upper arm. It is usually a sign that you lack enough vitamin A, the B complex vitamins and the type fat found in margarine, butter and lard. It is a blemish usually associated with a low-fat diet.

The condition is brought on by

Bible Comment:

The Last Sorrowful Days Of Jesus

THE last sorrowful days of Jesus before His Crucifixion were brightened with hope, even as He spoke of tribulation: "Be of good cheer: I have overcome the world."

The disciples may well have recalled these words of good cheer after the Resurrection as they saw, by the light of obedience to their Master's command, the Christian faith spreading and beginning its world conquest.

But in the darkness of that hour, with their Master saying strange words of what was to befall Him, their hearts and minds were still evidently set upon the idea of an earthly kingdom.

We can well understand their confusion. Peter was about to deny vehemently that he knew the Master who had been apprehended. Yet it was this same Peter who had been with Jesus on the Mount of Transfiguration and who had hailed his Master as the Messiah, "the Christ, the Son of the living God."

Peter's denial was, in all probability, a reaction of disappointment from all that had led him to leave his fishing nets and follow Jesus. Yet his renunciation had in it something of impulsiveness, and when the crisis of his denial had passed, he went out and wept bitterly.

But neither the denial nor the repentance could overcome his disappointment. He had left all to follow Jesus, but he was going back to his fishing nets. "I go fishing," he said to his fellow disciples, and they were ready to go with him.

But then came the revelation of the living Christ, and it was a different sort of fishing in which Peter engaged on the Day of Pentecost.

Out of these days of sorrow and triumph came the message of the friendship between God and man, and man's eternal place in the love and life of God.

Safety First Baffles Hospital Attendants

Safety First recently was involved in an unusual accident. First, 61, is a sales director in Los Angeles, and his name baffled hospital attendants.

It happens that First was probing through an attic over his office. He managed, somehow, to fall through the ceiling and crash-landed on the floor below.

Taken to a hospital, he was treated for bruises and scratches, and asked his name. When he answered, "Safety First," hospital attendants thought they were hearing some advice or having their legs pulled.

Safety First cleared it up, however, when he explained that his name was given him by his parents some 61 years ago, and that he had a sister who was named June First. The hospital attendant no doubt advised Safety First to live up to his name.

months, even years of incorrect eating. So don't expect it to clear up in a couple of weeks. It may take as long as three months.

DON'T LAUGH, FELLOWS—The little lady may arrive home from her spring shopping tour with a peek-a-boo item such as this. The lightweight picot original is being modeled in Paris, France.

SURREALISTS—Here's what's underfoot in Paris, France, as Fashion offers surrealistic footwear for milady's spring pleasure. Looking upside-down when it's rightside up, heel-to-toe model, at left, is said to have been inspired by the works of Picasso. "Geared" to the little model at right are the works in metal of Fernand Leger. Metallic toenails and a wrought-iron-like heel complete the creation.

SPORTS AFIELD

By Ted Kesting

Bottom fishing is the simplest form of ocean fishing next to netting, and corresponds to bait fishing in fresh water for pan fish. It usually is looked down upon by those who angle for big tuna, sailfish, dolphins, marlins and such species. But having done considerable fishing of both kinds, outdoor writer Bill Wolf says he fails to see why bottom fishing should be scorned.

The man who lands a big tuna or sail can credit about 90 per cent to his tackle, his boat and his boat handler, and only 10 per cent to his own skill. The bottom fisherman exercises at least that much skill, and often more. He has more fun for much less money and he certainly catches more fish.

Even novices haul in porgies, sea bass, croakers, tripletails and the like. But I have always noticed that the experienced angler catches more than the beginner and takes bigger and more desirable fish—so skill is involved.

Since knowledge of the tackle used is most important in bottom fishing, I'd like to relay on to you some of Wolf's ideas about rods. He says "If I could influence the average fisherman, I would suggest throwing out 9/10ths of what he owns and buying lighter tackle. He invariably goes out equipped to horse in whales."

Many boat rods weigh 14 to 19 ounces; they are used to catch fish weighing from 1/2 to 3 pounds, or approximately what a 4-to-6-ounce fly rod will take in fresh water. Granted, a boat rod must handle heavy lead at the bottom of the line. But this doesn't justify employing a rod big enough to land a 50-pound fish. So buy a boat rod as though you were going to use it as a rod instead of something with which to beat a fish to death.

Wolf prefers a rod with a light-weight tip of 4 1/2 to 5 1/2 feet, plus the length of the butt, because then you can fish comfortably from a pier or from one of the less desirable spots on a party

boat where a longer rod can reach over the side.

Much as he likes bamboo in most rods, he thinks that glass will become the standard material for salt-water boat rods. And he cannot advise exact weights for rods since conditions vary greatly around our eastern and western coastlines and the Gulf of Mexico. But pick the lightest instead of the heaviest. Actually, there is no objection to using a fresh-water bait-casting rod, although the longer butt of a boat rod is more convenient.

Many hooked fish eject their stomach contents.—Sports AfIELD.

MISSED — KISSED—Anneliese Wolf, "Miss Hanover of 1955," gets a congratulatory kiss from runner-up Heidi Hermann, left, as the German city makes an early bid for the "Miss Germany" title, and a chance for an eventual try at winning the "Miss Universe" crown this year.

Safari Clubs & Big Game

A report from faraway India tells that the Government of India is taking action to prevent the extinction of several species of beasts and birds in that country. Among them are one-horn rhinoceros, the leopards, the black buck, the gazelle and many other animals, and the great Indian bustard.

Indians have complained recently that too many safari clubs were being organized in foreign countries, notably the United States, and that these clubs were bringing foreigners into India to shoot game at an alarming rate. Moreover, most of these safari clubs are profit-making clubs and therefore, they are out to get the game and make a profit and not always interested in game conservation.

Some of the maharajahs in India are halting their age-old custom of taking visitors out into the hunting preserves for a week end of shooting. This new trend was evidenced recently when Marshal Tito, of Yugoslavia, visited the Maharajah of Madhya Bharat in South Central India. Tito went out into the hunting preserves for a shoot, but the only thing he shot was his camera.

The Wild Life Board of South India has recommended a ban on the killing of the animals mentioned above for fear that they are exterminated. In South India the threat of extinction comes more from wandering tribes than from professional hunters and trappers, and, therefore, the Government of India has an education job on its hands, as well as a problem caused by too many safaris.

It appears that the fad of going to India to kill a lion, or an elephant, will soon be definitely on the wane. This will be a good thing, for Americans should not get the mistaken idea that there is much sport in going on a safari, with high-powered guns and many natives, and killing (or having the guide kill) a lion or elephant. It would be more sporting to go out, in the same fashion, and get color pictures of these animals and let them live for others to see and photograph.

Sausage-Linker No Good as Egg-Hatcher

George McMillan, of Christchurch, New Zealand, recently undertook an egg-hatching experiment. Trying to match the skills of a mother hen, McMillan climbed up into a pine tree and tried to roost-hatch six eggs.

McMillan spent three weeks in the tree, but the eggs didn't hatch. Of the six eggs he strapped to himself, three of them broke and the other three made little progress.

However, the stunt was not a complete failure, since he raised \$3,069 for a club. That's pretty good for a three-weeks egg-hatching expedition, although being thirty-three feet off the ground in a pine tree is a little bit inconvenient, especially with eggs strapped onto one's carcass.

All of which goes to prove that Mother Nature still has a few secrets and that one performs best in his own profession. McMillan is a sausage-linker. We presume he is now linking sausage.

Answers to Who Knows

1. Directly across the Strait of Gibraltar from Spain, being bordered on the West by the Atlantic and on the North by the Mediterranean.
2. It is a monarchy, a protectorate of both Spain and France.
3. 1,849,568 by the 1950 census.
4. Over 4,000,000 for the first time in the nation's history.
5. 2,823,000, also a record in the nation's history.
6. 2,186 nautical miles.
7. A statute mile is 1.15 times the length of a nautical mile.
8. 43,560.
9. One square mile.
10. One-eighth of a mile.

Not All Blindfish Inhabit Underground Pools & Streams

Eerie blindfish that live in underground streams and pools continue to puzzle naturalists more than a century after they were discovered.

Still unsolved is the riddle of when, why and how some 10 kinds of fish took up residence beneath the earth's surface. The shy, sightless creatures reveal little about themselves in captivity. Their egg-laying and spawning habits have not been observed.

Totally blind fish have been found in limestone caverns in North and South America, southern Europe and Africa, the National Geographic Society says. The various species seem to be limited to a small area and a special type of limestone formation.

Eyes Disappear

The most famous blindfish, *Amblyopsis spelaeus*, lives in Mammoth Cave, Kentucky. The colorless, ghostlike fish grows to a length of about five inches. The young are hatched with eyes that become useless and covered with tissue in adulthood.

Like others of its kind, the Kentucky blindfish has a highly developed sense of touch. The head and body are ridged with sensitive bumps that enable the fish to flourish in absolute darkness.

Observers report that the blindfish appear to live solitary lives, paying almost no heed to each other. In the endless search for food, however, they seem to be aware of their surroundings.

Blindfish prey on several kinds of sightless invertebrates — crayfish, mites and worms. These non-carnivorous creatures in turn must depend on vegetable and organic matter seeping down from the surface.

Not all blindfish live underground. Among the eight members of the North American cave fish family, *Amblyopsidae*, one species lives in springs and another inhabits muddy ditches in South Carolina rice fields. But all eight branches have degenerate eyes, and five have traces only.

Cuban Blindfish

Two entirely different species of blindfish live in fresh-water caves in Cuba. They belong to the salt-water family, *Brotulidae*, and probably became landlocked long

WORKING DIPLOMAT—It's a striped apron, not striped pants for Liberian Consul William H. Jones, as he makes up a form on a Chicago, Ill., newspaper. When not inking visas for his government, he's busy with printers' ink, which tells the world the doings of other diplomats.

ago when changes occurred in reefs.

The difficulty of observing cave fish has preserved their aura of mystery. The first blindfish were found and described in the United States in 1842. During the 19th Century and early 20th Century, only a few caves were known to contain fish.

The origin of aquatic cave life is obscure. Most naturalists dismiss the idea that fish were swept into caves by accident. One dominant theory is that ancestors of some blindfish remained in streams that gradually sank underground. Safe in darkness, the fish developed along with their habitat.

In Fashion Now

Silk and silk-mixtures are very popular now and will continue to be during the spring and summer. A silk print will be a must for the fashion-conscious lady. There are all styles to be had.

Why not choose one with a jacket or coat over a slim dress. The dress can be worn all spring with the jacket or coat. When the weather becomes warm, discard the coat and, "behold" a lovely dress to see you through the summer.

New spring and summer dresses seem to cry for matching shoes. For this reason you will need to choose your colors carefully. Don't be afraid to buy two or even three dresses in the same color. The outstanding color in your spring print may be yellow. By all means have shoes to complement. Try to find one or two more dresses the yellow shoes can be worn with.

Thick, double shantung is being used in the better dresses and suits. It is beautiful, rich looking and will last and last. This material drapes like a dream and comes in delicious colors. It is necessary to take the same care when having it dry cleaned that you would with regular shantung.

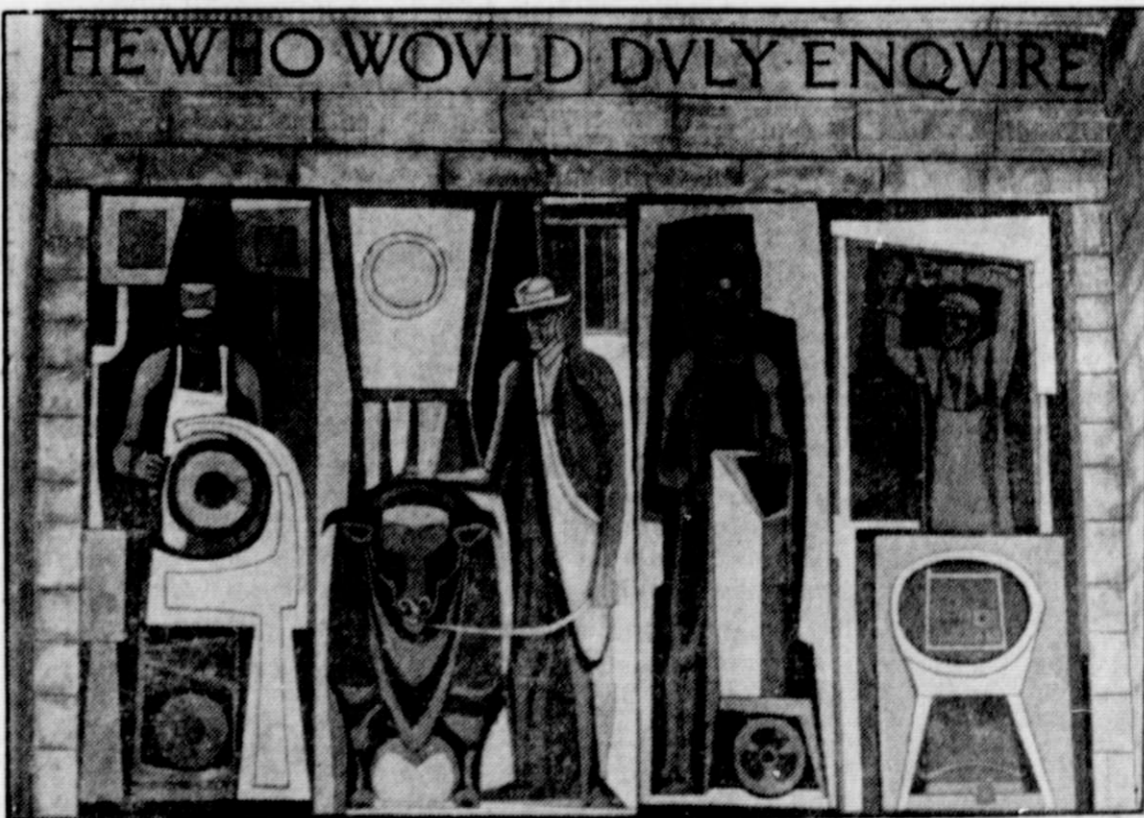

Raffia and straw dresses and skirts are something rather new. They will be worn frequently this summer. One bit of advice—don't try to over-economize on this type garment. If you do, you will find that, after one or two wearings, you have nothing.

Ticklers

By George

"Hey, you! Watch where you toss the banana peelings! You almost hit me!"

"ENQUIRE" ISN'T THE WORD FOR IT—"He Who Would Duly Enquire" is the legend over this mural in the statehouse at Lincoln, Neb., but "enquire" is too mild a word for the row kicked up over New York Artist Kenneth Evett's work. Titled "Labors of the Hand," it depicts, from left: Craftsman, Cattleman, Miner, Builder, and is executed in the modern manner. It caused little comment since its installation several months ago, until Evett's bill for \$25,000 was received by the legislature. Commented one senator: "The artist is old enough to paint a round head on the bull." Another solon said that the work was executed with a "T-square."

Perspiration May Cause Eczema in Dogs

Believe it or not, dogs do perspire.

And now veterinary research workers believe that perspiration may be a factor in two types of eczema that occur in dogs, according to a report from the American Veterinary Medical Association.

The secretion from canine sweat glands tends to become more alkaline as greater amounts of sweat are eliminated, the report said. This excessive alkaline solution irritates the skin and may cause moist and chronic eczema. The possibility of such eczema outbreaks was first suspected after research workers proved recently that dogs do have sweat glands in the skin over their entire bodies.

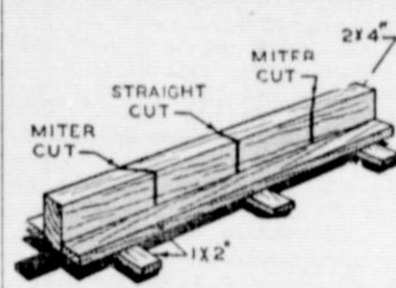

ONLY ONE AT REUNION

New York—In accordance with a fraternity pledge made 58 years ago—to hold reunions at regular intervals for the rest of their lives—Charles H. Blair, 79-year-old alumnus of Cornell's "1900 Club" of the Psi Upsilon Fraternity, was the only member present at the men's bar of the Waldorf-Astoria Hotel on the night of February 9th. In 1950 three members of the club showed up. Out of the original 28, 21 are dead. The others, besides Blair, were unable to attend due to their failing health.

Better Miter Box

HERE'S a miter box that has two advantages. Miterers can be cut on either or both sides, and the outfit has a solid base. Take three

pieces of 1 x 2 lumber and cut them to a length of 10 inches, according to *American Builder*. Nail them to a 2 x 4 about 24" long into which have been sawed a straight cut and a 45-degree miter. Finally, nail a piece of 1 x 2 about two feet long on each side of the 2 x 4.

Behind The Scenes in American Business

By Reynolds Knight

Senator Fulbright of Arkansas, in preparation for the inquiry into the stock market which began recently, polled 5,500 stock brokers, security dealers, market analysts and economists on whether they felt security prices were too high. He got 1300 answers, not quite 1300 different opinions.

The Senate Banking Committee announces that most of the respondents believe present levels of the market are not too high. There are a few pessimists who say another 1929 is just around the corner. A few extreme optimists reply that the country is "just beginning to adjust stock market prices to the realities of a soaring population striving toward a vastly higher standard of living."

The calm manner of Senator Fulbright's approach, contrasted with the 1933 inquest on the departed boom of 1926-29, is a measure of public education—much of it attained the hardest possible way—on security trading and its meaning. Nobody outside thinks any more of Wall Street as a casino where the chips are pieces of engraved paper. Nobody inside thinks any more of the New York Stock Exchange as a private club whose members' obligations stop with one another.

HEAT TRANSFER—Savings on both sides of the counter are reported by makers of electric deep-fat fryers, casseroles, skillets, roasters and coffee-makers who have been using a new brazing method devised by a heat engineering firm.

The consumer finds that the utensil heats faster, uses less electricity, and responds with more fidelity to thermostatic control. The manufacturer finds that he can assemble his wares faster, reduce production costs, with fewer cases where excessive oxidation makes it necessary to replenish, replace or even discard some articles, interrupting the assembly line.

Secret of the new process lies in a semi-automatic air-gas burner of such sensitivity that all parts of an assembly reach brazing temperature at the same time. Heating elements are attached by brazing the metal sheath of a nichrome heating coil continuously to the vessel it is to heat. The accuracy of temperature control is what allows the use of solders with melting points just 50 degrees below that of the parts attached, so the work is done faster and more firmly.

THINGS TO COME—Production of paper milk containers has increased a billion units a year for the last five years, and the rapid gains should continue for another ten years, students in a Rutgers University short course on milk marketing were told.

During 1954, said an executive of a leading container producing company, which makes the lightweight, one-trip milk cartons, production reached 10.6 billion, giving milk distribution in the United States a flexibility that makes it the leader of the world in this respect.

All milk marketed in retail stores, schools, restaurants and vending machines benefits from this improved container, and milk sold in this fashion is gaining a larger and larger share of the total market.

Another advantage is the wider radius of distribution. Whereas a generation ago every hamlet had to have locally produced milk, today, with nearly 50 per cent of all beverage milk sold in paper, deliveries are made as far as 450 miles from the point of production.

INVENTORY CAUTION—Apparently the last to be convinced that a business upsurge is in progress, the nation's purchasing agents are still being very conservative, their national association reports.

Seventy-six per cent of the agents reported that in February they were buying on an up-to-sixty-days basis. A month ago 95 per cent of them were in this class. A little lengthening of commitments was noted on items like steel and copper, and some bargains in electrical equipment were snapped up on fairly long-range deals.

Some economists believe that the biggest influence in minor ups and downs of business is inventory accumulation or decline. If that is true, the period of inventory accumulation that seems to be still ahead of us can be expected to exert jobmaking effects later in the year.

Tested

"Trust her? You surely don't think she could keep a secret?" "Well, I've trusted her with other things, and she kept them!"

HERE'S HOW...

MAKE A BICYCLE RACK

A designated place for the child's bicycle encourages care of the vehicle.

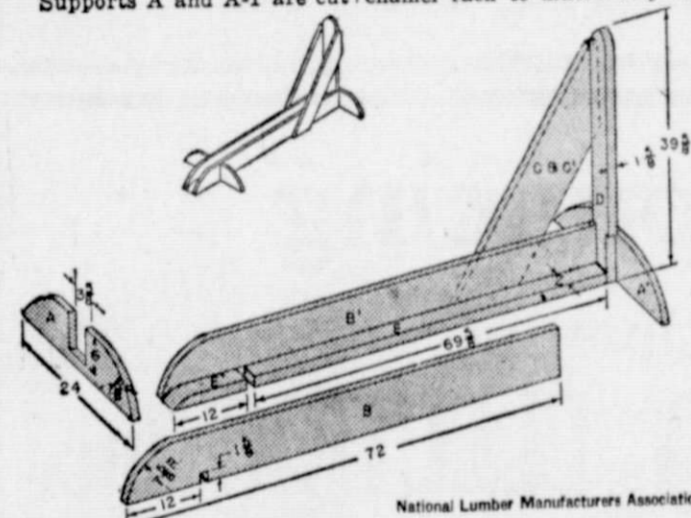

First make the two sides, B and B-1, from 1 by 8-inch lumber, each 72 inches long, rounded at one end. Then cut a 2 by 4 to make post D, notching the lower end to accommodate the two sides, and rounding the top.

Bottom members, E and E-1, are ripped to fit snug with D and between B and B-1, approximately 2 inches. Supports A and A-1 are cut

to match in outline, Notch A, at center, 3 1/2 inches wide and 6 inches deep.

Then fasten the rack together using No. 10, flathead wood screws, countersunk. Try the bicycle in the uncompleted rack to determine the placement of braces C and C-1; these must allow for the front axle. Cut the braces to fit and fasten them to D and E.

All exposed edges should be beveled or rounded. Paint or enamel rack to match bicycle.

New Sowing Technique Betters Grass Stands

Much high quality grass and clover seed is wasted because of failure to obtain stands under conditions that appear favorable.

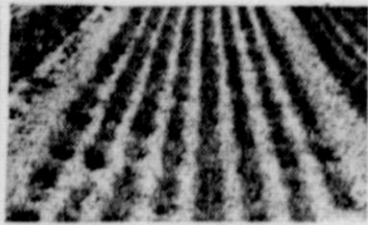

Drilling of grass and clover seed at a depth of one-fourth inch and placement of fertilizer in bands one inch below the seed, with the soil packed over the seed, may be an answer to the problem of making better use of our seed supply.

Tests are under way to develop better methods of planting these crops, by the U.S.D.A. at Beltsville, Maryland. The first season's results, as reported in CROPS AND SOILS by R. E. Wagner and W. C. Hulbert, were decidedly favorable to such precision placement of both seed and fertilizer.

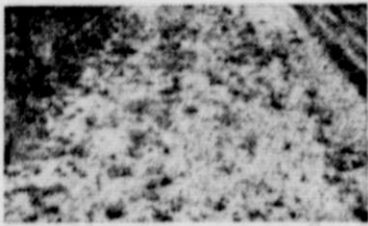

Results of these tests, which are being confirmed by the second year's work, tend to discourage use of broadcast seedings and methods of fertilization now commonly used by farmers. It is indicated that results probably would fluctuate under varying fertility and moisture conditions, but that they would nearly always be favorable.

The advantage of fertilizer placement in a band below the grass seed became evident soon after the plantings were made in September of 1952. Although seedlings in all plots were up within a few days, those in which the fertilizer had been placed in bands one inch below the seed developed most rapidly and weeds were less prominent.

Plants in drill rows eight inches apart, with fertilizer an inch below the seed, grew rapidly and made growth enough to survive the winter, but plants between fertilizer rows developed slowly, many were winter-killed, and none of them con-

U.S.D.A. Photos
 Stand obtained when fertilizer is placed 1 inch below seed.

Poor stand where seed and fertilizer were broadcast at same rates.

tributed to establishing the crop. Fertilizer at the higher rate used in the tests (750 pounds per acre of 3-12-6) placed in contact with the grass and clover seed at planting time, seriously suppressed stands of the clover. Early development of seedling plants where the fertilizer was placed one inch below and one inch to the side of the seed did not equal those where the plants had access to a band of fertilizer one inch below the seed.

Data collected on weed content of the harvested forage showed that where both seed and fertilizer were drilled, practically no weeds were in evidence regardless of the rates used. On the other hand, where seed or fertilizer were broadcast, weeds were a real problem and especially so at low rates of seeding and fertilization.

MACHINERY

RESULTS COUNT

THAT'S WHY YOU SHOULD PLANT

PIONEER HYBRID SEED CORN

YIELD RESULTS

Pioneer won over half of all first places for the three year average of the Official Illinois and Iowa State Corn Tests, conducted by the two state Universities as reported in the 1954 Official University Bulletins. Hundreds of different hybrid numbers entered by many different producers were tested in these corn tests.

Pioneer set a new world's record in the 1954 Official Indiana Five Acre Corn Club Contest with a yield of 241 bushels per acre.

SALES RESULTS

Farmers have ordered 160,000 more bushels of Pioneer hybrid seed corn this year than was on order at this same time a year ago.

Farmers planted 440,000 more bushels of Pioneer hybrid seed corn in 1954 than they planted in 1952.

NEW CHEVROLET Task-Force TRUCKS

—with a whole truckload of new advantages for you! Here's what happens when America's No. 1 truck builder pulls out all the stops! Here are some of the new advances ready to work for you right now.

Work Styling—a new approach to truck design!

Two distinctively different styling treatments—one in light- and medium-duty models, another in heavy-duty!

All models available with new Power Steering!

New Chevrolet Power Steering cuts turning effort up to 80 per cent... cushions road shock. Optional at extra cost.

Six powerful new "high-voltage" engines!

With a modern 12-volt electrical system for increased generator capacity—plus many other new advances.

You can have new Overdrive or Hydra-Matic!

Overdrive is optional on 1/2-ton models; truck Hydra-Matic on 1/2-, 3/4- and 1-ton models at extra cost.

The last word in cab comfort and safety!

New Sweep-Sight windshield for increased visibility. A new concealed Safety Step that stays clear of snow or mud.

Power Brakes standard on 2-ton models!

This great power helper is yours at no extra cost on 2-ton models! Optional at extra cost on all other models.

New capacity—up to 18,000 lb. G.V.W.

Offered in 2-ton models! This means you can do a lot more work on heavy hauling jobs with real savings.

Tubeless tires standard on 1/2-ton models!

New tubeless tires give you greater protection against a blowout... deflate more slowly when punctured!

New more durable, standard-width frames!

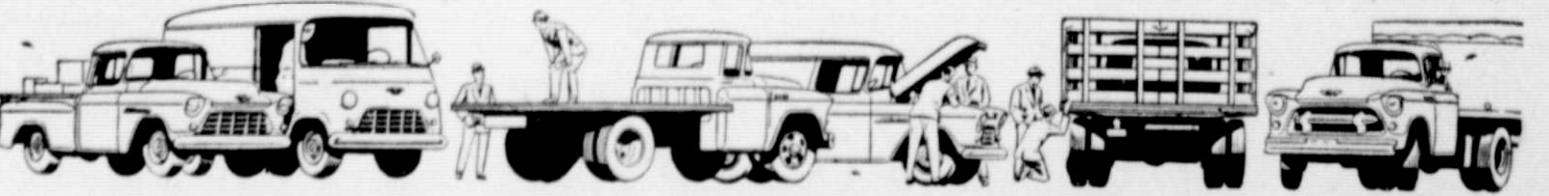

New frames are of 34-inch width to accommodate special body installations. And they're more rigid!

Tubeless tires standard on 1/2-ton models!

New tubeless tires give you greater protection against a blowout... deflate more slowly when punctured!

Come in and see the newest things in trucks!
