

Schaefer Bros. Sell Garage Business to Milwaukee Man

Carl and Harry Schaefer, owners and operators of Schaefer Bros. garage and service station on Fond du Lac ave. for the past 34 years, have sold their business to Vincent L. Piccoli of Milwaukee, who took possession the past week.

The transaction was consummated several weeks ago but announcement was withheld until it was approved and completed. In the future the business will be known as Vincent Motors with Vincent L. Piccoli serving as president and manager.

Schaefer Bros. leased the building to Mr. Piccoli with an option to purchase it in 10 years. The new owner formerly held a position as service manager for Regal Motors in Milwaukee, Mercury and Lincoln dealers. He has had 19 years experience in every phase of the automotive business.

Carl and Harry Schaefer had conducted the business since 1921 and also operated the Ford automobile agency from 1925 to 1954. Mr. Piccoli has again secured the Ford agency and will always feature a good selection of new and used cars. He will maintain an extensive used car lot.

Piccoli announces that he will retain all of the present help and will maintain the high standards of business which the people of Kewaskum and community and the Ford Motor company expect. The service business is very important to him and Vincent Motors is very capable of giving good service.

The new proprietor brought with him his parts man, Kenneth Buckingham, from Milwaukee. He has almost 25 years of experience in the parts department.

Piccoli has already begun an extensive remodeling program to the building and used car lot to promote better sales and service. It will be brighter and much improved when the work is completed.

Vincent Motors offers complete sales, service and parts for cars and trucks, 24 hour towing service, bumper to bumper service, and free body estimates. Piccoli is married and has two daughters and the family will move to Kewaskum.

Carl and Harry Schaefer wish to thank all their customers for their patronage over all these years. They also ask their customers to continue having their cars serviced at Vincent Motors. Schaefer Bros. have not announced their plans for the future.

NOTICE OF SPECIAL MEETING

NOTICE is hereby given that there will be a special meeting of the Electors of the School District of THE KEWASKUM COMMUNITY UNION HIGH SCHOOL JOINT DISTRICT 2 OF THE VILLAGE OF KEWASKUM, WASHINGTON COUNTY, THE TOWNSHIPS OF KEWASKUM, BARTON, FARMINGTON AND WAYNE, WASHINGTON COUNTY, AND ASHFORD AND AUBURN TOWNSHIPS, FOND DU LAC COUNTY, WISCONSIN, at the auditorium in the High School in said District on the 23rd day of May A. D., 1955 at 7:30 in the evening.

(1) Notice is further given that the purpose of said meeting is to consider and act upon the question of building a school house for said district.

(2) To do all things necessary for or incidental to the foregoing. Dated this tenth day of May, A. D., 1955.

Clifford C. Stautz, Clerk 5-13-21

ST. MICHAELS WOMEN HOST FOR DISTRICT 13 MEETING

A spring meeting of District No. 13 of the Milwaukee Archdiocesan Council of Catholic Women will be held in St. Michael's on Monday, May 23, at 8 P. M.

There will be music, entertainment, a speaker, election of officers, and also refreshments served by the ladies of St. Michael's parish.

All ladies of the eighteen parishes in the 13th District are welcome.

Chevs Outscore Port in Lakes Game, 10-8

In a free hitting, high scoring tussle to open the home season in the Lakes league, the Kewaskum Chevrolets defeated Port Washington Sunday, 10-8. It was Kewaskum's first win in two starts, having lost the opener to Jackson.

Glen Backhaus and Killy Honeck who relieved him in the 6th inning, shared the mound duties for the winners and gave up 9 hits the same number the Chevs garnered off of M. Monahan and Russart, the Port twirlers. But 12 Kewaskum batters struck out while only 2 from Port went down on strikes. However, 8 Chev hitters walked compared to 3 of them for the losers.

Kewaskum scored all of its runs in two big innings. They pushed over 3 in the 6th and had a giant 7 run rally in the 8th to pull the game out of the fire. They trailed 8-3 going into the inning.

Bud Korth was the big gun for the winners with 3 hits in 3 trips to the plate including a resounding three bagger. He also drove in 5 runs. Augie Bilgo collected 2 for 2. Ford was the only Port player with 2 safeties.

This Sunday the Chevrolets hit the road again, playing at Cedarburg.

Table with columns: PORT WASH., AB, R, H, E. Rows: Sauer, ss.; Puerling, rf.; Bamberg, lb.; P. Monahan, c.; Russart, 3b-p.; M. Monahan, p-3b.; Streff, lf.; Welland, lb-rf.; Lutzen, cf.; Ford, 2b.

Table with columns: Port Wash., Kewaskum. Rows: 10-8, 0-0-0-0-3-7-10.

LAND O' LAKES STANDIN'S

Table with columns: Won, Lost. Rows: Cedarburg, Jackson, Kewaskum, Mequon, Port Washington, Germantown, West Bend, Grafton, Saukville, Scores Sunday-Kewaskum 19, Port Washington 8, West Bend 10, Saukville 6, Cedarburg 3, Mequon 1, Germantown 8, Grafton 6, Jackson bye.

Games Sunday-Kewaskum at Cedarburg, Germantown at Jackson, Saukville at Port, Mequon at Grafton.

TALK TO FEATURE CLOSING MEETING OF WOMAN'S CLUB

The Kewaskum Woman's club will hold its closing meeting of the season on Saturday, May 21, at 3 o'clock in the library. Miss M. Emily Hatch, psychiatric social worker at the state hospital at Winnebago will give an address on "Mental Health." Reports of delegates to the district convention recently held at Port Washington will also be heard.

Hostesses for the afternoon will be Mrs. E. Gnacinski, Mrs. R. Heberer, Mrs. L. P. Rosenheimer.

AIR RESERVE GROUP MEETS IN KEWASKUM

Flight "B" of the 9664th Air Reserve squadron of West Bend met at the Legion club house in Kewaskum Wednesday evening, May 11, at 8 o'clock. There was an intelligence briefing and squadron officers from Milwaukee were present.

Weekend crashes accounted for 13,950 killed and 675,000 hurt during 1954.

Polio Vaccination to Begin in County May 31

Plans for the administration of polio vaccinations to first and second grade pupils of the county schools were revealed this week. The program is expected to get underway on May 31.

Three large centers of clinics will be set up in the county for giving the initial polio vaccinations. The clinics will be established at Hartford, Richfield and Barton. Parents of pupils eligible for the "shots" will be advised by direct letter or through the schools as to which center their children are to attend.

The supply of Salk vaccine to be used in Washington county has been obtained from the Parke-Davis laboratories.

MISS SCHAEFER HIGH HONOR AWARD WINNER AT COLLEGE

Miss Diane C. Schaefer is one of the honor ten students to be recognized for outstanding scholarship leadership, and service to Wisconsin State college, Milwaukee. The awards were given at the third annual Honors Day convocation of the college, held on May 17.

In addition, Miss Schaefer has received recognition from Alpha Delta, national honorary journalism; from Phi Alpha Theta, national honorary history fraternity, and also received the Publications award for work on The TIMES, the student publication newspaper.

A graduating senior in the Secondary division of the college, she is the daughter of Mr. and Mrs. Carl F. Schaefer, Kewaskum.

MRS. ANDREW SCHMIDBAUER, PASSES ON AT HOSPITAL

Mrs. Johanna Schmidbauer, 85, of LeRoy, mother of Mrs. Joseph Kern, Kewaskum, died Thursday, May 12, at Waupun Memorial hospital.

Her husband predeceased her on June 4, 1936. Surviving are four daughters and four sons, Mrs. Peter Kiefer, Lomira, Mrs. Rose Thruene, Fond du Lac, Mrs. Joseph Kern, Kewaskum, Mrs. Arthur Malochie, Cleveland, Ohio, Arthur, Mt. Calvary, Alphons, Mayville, and Joseph and John, LeRoy. She also leaves a brother and two sisters.

Funeral services were held Monday at St. Andrew's church, LeRoy, the Rev. Francis Eschweiler officiating. Burial was in the parish cemetery.

MISS STRUEBING AWARDED WOMAN'S CLUB SCHOLARSHIP

Miss Rosemary Struebing has been awarded a scholarship offered by the Kewaskum Woman's club. The scholarship of \$100 per year will be used by Miss Struebing in furthering her education to become an elementary school teacher. Miss Struebing, the daughter of Mr. and Mrs. Wilmer Struebing of R. 3, Kewaskum, will enter Dodge County Normal in fall. She is a member of this year's graduating class of the Kewaskum Community High school.

The scholarship committee consists of Mrs. Charles Miller chairman, Mrs. Clifford Rose and Mrs. K. Wm. Haebig, and worked with Miss Margaret Browne, senior class advisor.

NIGHT SOFTBALL LEAGUE MANAGERS MEET TUESDAY

There will be a meeting at the high school Tuesday, May 24, at 7:45 p. m. for all team managers who wish to enter teams in the Kewaskum recreation leagues.

Tuesday will be a slow pitch league night and Friday will be a fast pitch league night. Final arrangements will be made and provisions for a schedule will be drawn up.

Tentative plans will have the games beginning the week of June 7.

HOSPITAL NEWS

George Reindl, Kewaskum, is a patient at St. Joseph's hospital, West Bend, where he submitted to an operation on May 17.

Mrs. Oscar Kirchner, R. 2, Kewaskum, was removed to St. Joseph's hospital in the firemen's ambulance Saturday morning, May 14.

Dorothy Hoffman Bride of Saturday

The Campbellsport Methodist church was the scene of a marriage ceremony at two o'clock Saturday afternoon, May 14, in which Miss Dorothy Marie Hoffman, daughter of Mr. and Mrs. Paul Hoffman, Kewaskum, became the bride of Aiton Lee Westover, son of Mrs. Rachel Westover of Gordon, Nebr. The Rev. Robert Wierer of Mayville presided at the rite.

The church chancel was decorated with two large baskets of pink and white gladioli and snapdragons and two small bouquets of yellow and white daisies. During the service Robert Wierer sang two vocal solos, "O Promise Me" and "The Lord's Prayer."

The bride was lovely in an embroidered net and net floor length gown which featured a low round neckline, embroidered net fitted bodice, net cap sleeves, embroidered net trim, and full bouffant skirt of embroidered net with a flounce of net at the bottom. Her lace applique imported illusion fingertip veil cascaded from a half hat of lace with pearl and sequin trim. She carried red and white roses in a fan shape with white satin streamers tied with red rose buds.

The bride was attended by her friend, Mrs. Marie Carderelle, as matron of honor while Mrs. Doris Wesenberg, sister of the bride, and Mrs. Ruth Eggert, friend of the bride and bridegroom, attended as bridesmaids. All of the attendants wore dresses of embroidered net and net in Nile green, orchid and daffodil yellow. They featured low "V" necklines, embroidered net bodices, pleated net midriffs, cap sleeves, mitts, and full bouffant skirts of embroidered net and net flounces. They wore matching picture hats of pleated net with flower trim. The honor attendant, dressed in green, carried red roses and orchid carnations tied with green ribbon. The bridesmaid wearing an orchid dress carried red roses and yellow carnations tied with an orchid ribbon and the one attending in yellow carried red roses and green carnations tied with yellow ribbon. Their bouquets were styled in a fan shape the same as that of the bride.

Fred Wesenberg, brother-in-law of the bride, acted as best man for the bridegroom, while George Eggert and Ardell Carderelle, friends of the bride and bridegroom, served as groomsmen. The bridegroom and his attendants wore dinner jackets with black trousers.

Supper was served and a reception held for 130 guests at the Kewaskum Opera House, where a wedding dance was held in the evening.

Following a wedding trip to Gordon, Nebr. to visit the bridegroom's folks, the young couple will be at home in Kewaskum after May 23. The bride, a graduate of Kewaskum High school, is employed at Regal Ware, Inc. Her husband was just discharged after two years of army duty, having served 18 months in Berlin, Germany.

DEAN-STAHLER

Now at home in West Bend are Mr. and Mrs. Lloyd Dean, newlyweds of Saturday, April 23. Mr. Dean, son of Mr. and Mrs. Paul Dean of West Bend, and his bride, the former Rosemarie Staehler, daughter of Mr. and Mrs. Lawrence Staehler of Boltonville, were married at 10 a. m. in St. Michael's church, St. Michaels, by the Rev. M. Urban.

A dinner and reception in the church hall was followed by a dance at the MWA hall in Boltonville. Both Mr. and Mrs. Dean are employed at the Amity Leather Products in West Bend.

For her marriage the bride wore a floor length gown of chantilly lace with a full train of matching lace accented with pearl embroidery. Matching embroidery trimmed the crown which held her fingertip veil.

The honor attendant, Miss Jeanette Staehler, sister of the bride, chose a floor length gown of green net. The bridesmaids, Arlene and Evelyn Staehler, also sisters of the bride, and Joyce Kempf, the bridegroom's sister, wore orchid, yellow and blue floor length gowns. Honnie Belger, as flower girl, and lit-

Indians Lose to West Bend in District Meet

West Bend and Slinger advanced to the finals of the district baseball tournament at Campbellsport this week. West Bend thumped Kewaskum Tuesday, 15-3, and Slinger downed Lomira, 5-2, on Monday. In the opening tilts of the meet Saturday West Bend beat Hartford and Lomira bested Campbellsport. West Bend and Slinger played for the championship on Friday afternoon of this week.

The Indian pitching and fielding fell apart in the late innings Tuesday as West Bend overcame a 3-0 deficit to win by a big margin. The Badgers still trailed 3-2 after four innings but then pushed over 4, 3 and 6 runs in the last three frames.

Tom Ackerman with three hits, Don Schreiner and Bob Pomahac with two each were the bat stars for the winners. No Kewaskum batter got more than one of the team's four hits. The Badgers collected 10 safeties.

Seven walks and six Kewaskum errors in the last three innings helped West Bend tremendously. They tallied six runs on two hits in the 7th. The Indians got all three of their runs in the 2nd on only two hits. West Bend hit a new low in making four infield errors on one play.

Bob Holzhueter checked Kewaskum with three hits in the first five innings. He fanned eight and walked one. Schreiner hurled the last two stanzas, whiffing two, and was nicked for one bingle. Wierman started for the Indians and later was relieved by Mertzig, a sophomore. Wierman gave up nine hits in six frames and Mertzig one in one inning.

Chuck Walters, West Bend and Heberer, Kewaskum, were defensive stars. The defeat eliminated the Indians from the tourney.

OTTO DORN HONORED ON HIS EIGHTIETH BIRTHDAY

The children of Otto Dorn, Kewaskum, gave a party in his honor on Sunday on the occasion of his 80th birthday anniversary. The event was celebrated at the Ed. Dorn home. A delicious ham supper was served. Fifty guests were present from Kewaskum, West Bend, Waubesa, Milwaukee and Barton.

Paul Dean, Jr. was best man for his brother, and Bob Wallenfels, a friend, Henry Kempf, a brother-in-law of the bridegroom and Kenneth Aivell, also a friend, served as groomsmen. Ushers were Donald Staehler and Floyd Dreher, cousins of the couple. Dennis Zulicke was ring bearer.

Mrs. Alan J. Hermans

Pictured above is the former Mary Jane Mayer of Kewaskum, who became the bride of Alan J. Hermans of 2514 S. Logan ave. Milwaukee, on Saturday, May 7 at Holy Trinity church, Kewaskum. She is a daughter of the late Mr. and Mrs. Joseph Mayer. Mr. and Mrs. Hermans will make their home at 3594 A 1st st. in Milwaukee. (West Bend News photo)

Senior Class On Trip to Chicago; Banquet May 31

On Monday, May 16, the members of the senior class of Kewaskum Community High school with their chaperones boarded a chartered Badger Express coach and were off for their annual trip to Chicago.

The first stop of the group was at Brookfield Zoo. From the zoo, the group traveled to Midway Airport, where a tour of the American Airline hangars and an inspection tour of a plane was enjoyed. The group also witnessed passengers boarding and deplaning from the observation deck of the main terminal building.

The Museum of Science and Industry was the next stop made. Here the seniors enjoyed many exhibits of a scientific nature plus a

COMMENCEMENT ON JUNE 2; WESENBERG VALEDICTORIAN

Graduation exercises for the class of 1955 will be held at the Kewaskum Theater on Thursday, June 2, at 8:15 p. m. There are 43 members in the graduating class, Richard Wesenberg is valedictorian and Norbert Rosbeck is salutatorian. More details on commencement will be published at a later date.

trip through the coal mine, The Street of Yesterday, Colleen Moore's Doll House, an Armed Forces exhibit and many others too numerous to mention.

From the museum the class enjoyed a bus ride through Chintown, Maxwell street, the Loop and Skid Row areas. Next on the itinerary was a two-hour free period in the Loop, after which all members of the tour attended a performance of "This Is Cinerama" at the Palace Theater. After a full day of new adventures and excitement, the group arrived back in Kewaskum in the wee hours of Tuesday morning, tired but happy.

SENIOR BANQUET

The members of the senior class will hold their banquet at the Republican Hotel on Tuesday, May 31, at 6:30 p. m. After the meal the following program will take place: Welcome..... F. Lyn Peterson Class History..... Joanne Ferber Class Poem..... Barney Skrentny Class Prophecy..... Gladys Becker Address..... Prin. Clifford M. Rose Class Will..... Norbert Rosbeck Class Song..... Class of 1955

FLOYD STAUTZ APPOINTED ROTC UNIT OFFICER AT UW

Floyd F. Stautz, Kewaskum, is among the students who have just been appointed new officers of the Army Reserve Officers Training Corps (ROTC) unit at the University of Wisconsin.

The appointments, made by Col. Chester F. Allen, UW Army ROTC commandant, are in recognition of leadership and aptitudes for military service exhibited by the UW student cadets during the current school year. About 1,800 students are enrolled in the Army ROTC at the university. The cadets study military science during the school year in addition to their regular academic courses toward their university degrees. At graduation, they may receive a regular or reserve army commission besides their degree. Both the U. S. Navy and Air Force have similar education and training programs at Wisconsin's state university.

Stautz has been named sergeant in the Army Reserve Officers Training Corps units.

CHAPTER RED CROSS DRIVE MORE THAN \$700 ABOVE GOAL

Robert T. Rolfs, 1955 fund chairman of the West Bend chapter of the American Red Cross, reported this week that receipts for the 1955 campaign as of May 14, totaled \$5,562.46. The goal in the West Bend chapter, which includes Kewaskum, was \$4,850, which figure was reached before the drive's official ending on March 31.

BIRTH

HAWIG—A son to Mr. and Mrs. Edward Hawig of Wayne at the Maternity home, Campbellsport, Thursday, May 12.

Memorial Mass Read for Missing Airman Johann

The Rev. Urban was celebrant of a solemn requiem memorial high mass read in St. Michael's church, St. Michaels, on Wednesday morning, May 18, for A 2/c Roger Johann, son of Mr. and Mrs. Marvin Johann of St. Michaels, Kewaskum rural route.

The Air Force sent word to Mr. and Mrs. Johann last Thursday that an extensive search of the area in which the flying tanker on which A 2/c Johann was a member of the crew, crashed, had been made and that no survivors were found. The tanker crashed in the stormy Atlantic ocean near Iceland on a routine flight from Great Britain on Wednesday, May 4.

Previous message received last week listed the airman as missing and the parents were advised that a search was being made for possible survivors.

The last letter from A2/c Johann was received on Monday, May 2, in which he stated he would soon be leaving on a trip to Iceland. The young man was born at Hartford on July 24, 1935. He enlisted in the Air Force on Feb. 8, 1953, and was sent to England on March 5 of this year.

He is survived by his parents, five sisters, Diane, Barbara, Jane, Mary and Jennifer; four brothers, Ronald, Richard, Claude and William; his maternal grandfather, Joseph Uelmen of West Bend; his paternal grandmother, Mrs. William Johann of Hartford, and many good friends.

MRS. TESSAR NEW VFW AUX PRESIDENT FOR DISTRICT

A meeting of the Sixth District of the Veterans of Foreign Wars was held at Barton Sunday, in conjunction with the dedication of the new VFW clubhouse in Barton. Officers of the organization were elected at the meeting.

VFW auxiliary members also were elected to office in the Sixth District and Laura Tessar of Kewaskum was named president of the organization.

Police Chief Carl Mayer of Barton, formerly of Kewaskum, was elected commander of the Sixth District of VFW. Other officers included Jul. Kunn, West Bend, senior vice-commander; Robert Schiack, Omro, junior vice-commander; William Dricken, Barton, quartermaster; Robert Steenis, Fond du Lac, judge advocate, and Dr. Greg Hoffman, Hartford, district surgeon. Trustees are Frank Hader, Port Washington; Harold Kenzelmann, Sheboygan, and Alfred Gansch, Neenah.

Guests at the session included O. C. Claus and "Doc" Olson, chief of staff of the Wisconsin Department of the VFW.

SEWAGE DISPOSAL PLANT IS NEARING COMPLETION

Kewaskum's new \$250,000 combination incinerator and sewage disposal plant on the Kewaskum hill south of the village is nearing completion. Work on the structure was begun last summer and is scheduled to be completed this summer when it will be placed in operation.

The new units are expected to take care of the village needs for approximately 40 to 50 years. The sewage plant is constructed of concrete and steel and the incinerator is brick veneer. Both the disposal plant and filtration beds are reported to be of the latest type.

Our Police Chief Says:

Complaints are being received that dogs and cats are permitted to run at large, destroying gardens and lawns.

The Police Department has announced that on Monday, May 23, 1955 a 2 hour parking restriction will be erected on the west side of Fond du Lac ave., about 300 feet south of Forest Ave.

The police chief explains this action has been taken because of the habit of out of town people working in other cities parking all day. This prevented shoppers from using this area.

SPRING'S CHICKENS—Painter Jerry Pucci gives a new wardrobe of color to the king-size wood-and-metal barnyard flock which struts all summer long on the Merry-Go-Round at Coney Island's Steeplechase Park in New York City.

IN PERFECT CONDITION—The steaks on the platter, that is, if you've even noticed them. They're covered with a special plastic coating during the freezing process, and are said to keep in a home freezer for as long as two years, according to the Chicago, Ill., manufacturer who has developed the process.

CLEAN-SWEEP VICTORY—Alderman-elect Charles H. Weber of Chicago, Ill., will sweep into office on this motorized street-sweeper. It was the promise that his 45th ward would see one of the gadgets in service that helped him win the nomination. Appearance in the Bavarian costume fulfills another promise—to let his constituents see him in the outfit, a gift from the late mayor of West Berlin, Ernst Reut-

COUNTRY PLAYERS
LES CARROLL

THE narrative style of recording with a musical background is gaining in popularity. Eddie Dean's "I Dreamed of a Hillbilly Heaven" is a tremendous hit (Sage & Sand). And Tommy & Jim Wilson use this style effectively in "Dear Mom, I'm Thinking of You" and in "The Farmer and the Lord" (Mercury).

Boy-girl duets are also in high favor, and Red Foley & Kitty Wells do a terrific job on "Make Believe" and "As Long As I Live," while Goldie Hill & Red Sovine do nicely with "Are You Mine?" (Both Decca). "Full Moon" by Bob & Wanda Wolfe is a fine, peppy release (King).

One of Hank Snow's best releases is "Yellow Roses," a beautiful ballad, well-backed by the rhythmic "Would You Mind?" And Skeeter Bonn puts a wealth of feeling in his singing of "Conscience" and "Number One In Your Heart" (Both Victor).

Some excellent sacred releases are "Wait a Little Longer, Please, Jesus" (Bill Monroe, Decca), "Love Thy Neighbor As Thyself" (Louvin Bros., Capitol), and "Walk Beside Me" (Eddie Dean, Sage & Sand).

Kitty Wells sings two lovely ballads, "Makin' Believe" and "Whose Shoulder Will You Cry On," while the Karroll Sisters have a sprightly number with a

Big Ben Will Be Repaired Soon

London's famed clock, Big Ben, will be overhauled this year, perhaps temporarily silencing its world-travelled voice.

Big Ben actually is the 13½-ton bell that strikes the hours, heralds news broadcasts and booms a deep-throated E note over London rooftops. The clock is the faithful authority that countless Englishmen have set watches by while passing Westminster Palace, home of Britain's Parliament, the National Geographic Society says.

Big Ben's origin goes back to the flames that destroyed the Houses of Parliament in 1834. In the rebuilding, a 14-ton clock bell and four smaller quarter bells were ordered. London facilities produced the quarter bells. The casting of Big Ben—named for Sir Benjamin Hall, First Commissioner of Works in 1856—was entrusted to a foundry at Stockton on Tees, 217 miles northward.

Storm Threatens Bell
Foreshadowing difficulties ahead, a storm at sea almost capsized the ship bringing Big Ben to London. Then, while being tested on the Palace grounds, the bell cracked under vigorous hammer strokes. It was melted down and another bell ordered.

Finally, in 1858, the new bell was drawn by 16 white horses through thronged London streets to Westminster. This bell, the present Big Ben, developed a flaw but, was retained in use.

The clock is one of the world's most accurate public time-pieces. Some say it has stayed, except for a few stoppages, within four seconds of Greenwich time and has operated for weeks within one-tenth of a second. Nearly all concede that it meets the Astronomer Royal's requirement that "the King of clocks was to be the Prince of time-keepers."

Its performance, however, has been disturbed by man, bird, hurtling bomb and weather. A painter's ladder propped in a wrong place and a workman's bungling hammer caused trouble. A rat's nest and 50 starlings that perched on a minute hand both disturbed its delicate balance. Once, a quarter bell failed to chime during a winter freeze.

Bomb Burst Near By
A bomb bursting on the House of Commons in May, 1941, endangered the clock. The belfry was marred and the glass of the dials damaged. Word comes down that Big Ben faithfully struck only one and a half seconds behind Greenwich time when its broadcast voice told Englishmen on far war fronts that London still stood.

The clock is enormous. Each of

STRICTLY FRESH

SOVIET hoboes can now hitch train rides without fear of being jailed—jail term for the offense has been abolished. But if they can't pay a 100-ruble (\$25) fine into the clink they go. That's a prime example of "bum" Communist justice.

At the rate they've moved up the Christmas shopping season for the last several years, this

year we should see Santa Claus arriving in town on a Fourth of July rocket.

Fashion note from Miami, Fla.: Police report that sale of revolvers and automatics zoomed over 100 per cent during a recent week. All the boys felt they needed a new spring shoot.

Fellow in Downey, Calif., arrested for traveling 100 m. p. h., said he promised his wife to be home at 2 a. m., was two minutes behind schedule. He'd apparently rather be in the jug than have one thrown at him.

Burglar in Omaha, Neb., made off with a gas stove, chest of drawers, bookcase, bed springs, mattress and a set of children's books. Setting up light-fingered housekeeping?

Remove Whitewash From Basement Walls

Painting a basement wall that has been whitewashed can be very discouraging unless all of the old whitewash has been removed. This reader wants some help with the problem.

QUERY:

I am in the process of preparing our basement walls for repainting. But the old whitewash has peeled in some places and stuck tight in others. How can I remove all of the whitewash so as to get an even finish? What kind of paint should I use?

—F. H. Y.

ANSWER:

Common old-fashioned whitewash should come off with cold water and a stiff bristled brush. A little scouring powder on the brush will help.

But of recent years, many mixtures have been used in place of whitewash. These are more difficult to remove. They peel in spots, but stick tight on others. If you paint over the top, another spot may peel and leave a bare spot on your walls.

The only safe solution is to remove all of the old whitewash. Since the chemical composition of the material used is unknown, you might try some of the easier remedies first.

Add about a pound of tri-sodium phosphate to a pail of hot water, and try scrubbing with that. Use a long-handled, stiff bristled brush. Ammonia added to the mixture may help.

Another remedy is hot water and vinegar. But I do not have

much faith in this remedy for stubborn cases.

The most satisfactory method of removing whitewash must be used with extreme caution.

Mix one part of muriatic acid with 20 parts of water in a stone jar. Do not use a metal, or enameled container.

Place the water in the jar first, and slowly add the acid, stirring with a wood paddle.

Apply the mixture to the wall with a long-handled brush. It is well to wear rubber gloves and boots to protect the skin while using the acid. It is still strong enough to burn. Using goggles to protect the eyes is also a good precaution. Soak the whitewash with as much of the solution as possible. It should soften the whitewash so that it may be rinsed off with clear water.

Do not allow drippings to stand on the cement floor. The acid will etch holes in the cement. Wash the drippings down the drain with the garden hose.

If you find that the solution is not strong enough to soften the whitewash, you may add more acid.

Be sure to rinse the wall with clear water and ammonia to remove all traces of acid. If the acid is allowed to remain it will eat away cement and mortar.

After the whitewash and acid have been removed, allow the wall to dry. If the wall dries slowly, use an electric fan to circulate the air.

Use either cement base paint, or rubber base paint on the basement walls. Cement base paint may be used while the wall is damp.

Dentists Constantly Find Better Material For Filling Cavities

When your dentist selects a filling material for the cavity in your tooth he must answer a number of questions in his own mind:

Will the material shrink or expand afterwards? Will it be dissolved by mouth fluids? Will it resist the forces of chewing? Will it resist the wearing of opposing teeth? Is it injurious to tissues? Can the material be carved? Is it pleasing in appearance?

Dentistry has not yet found the ideal restorative material that fulfills all these requisites, but it is getting closer.

Porcelain, a modification of high grade china, is one of the most beautiful dental materials. It can be blended with pigments that imitate natural tooth colors. But porcelain is fragile and therefore its use is limited largely to front teeth where qualities of color and appearance are important.

Silver amalgam is the most commonly used filling material. It is an alloy consisting of about 50 per cent mercury, 35 per cent silver and fifteen per cent other metals.

Gold is the workhorse of dentistry. It qualifies in every way except in esthetics. It has strength, affords accuracy in restoration and is durable. It does not expand or shrink significantly. It resists wear. The gold inlay is especially popular. This filling is made in the laboratory after a wax pattern is molded. Thus, the patient's time in the chair is lessened.

For the last several years, acrylic resins, plastics used to make bomber noses and furniture, have been used increasingly in dentistry. While still too new to determine its ultimate place in dentistry, plastic material has many advantages. It can be blended into almost any shade or color. It can be molded into any shape or form. It is not fragile. It is esthetically pleasing.

The unanswered questions on acrylic resins are how to control their high expansion when heated by hot foods and drinks, (the resins expand and contract 7 or 8 times as much as the tooth) how well will they withstand wear and how long they will maintain their color after they have been formed.

Sarah Anne's COOKING CLASS

Butter Spreads Sandwich Fame

The phrase, "bread and butter" became part of the framework of the English language because these two foods are basic in the daily menu. Butter gives flavor and moistness to bread. It also has a flavor-carrying factor that makes its use standard in sandwiches. Butter actually distributes the goodness of the filling throughout the sandwich.

Since butter is so delicate a spread, it must be protected from air, light, the hazards of shipment and from stronger flavored foods near it. It will stay creamier—fresh if packaged in parchment or foil wrap plus a paraffined carton. Unless used immediately at home, butter should be kept in the carton to guard against more dominant flavored foods in the home refrigerator.

Luncheon Sandwich

- 8 slices bread or toast
- Butter
- 1 cup chopped chicken, flaked or canned crabmeat, salmon, tuna or ground cooked ham
- 1 hard cooked egg, chopped
- 2 tablespoons chopped green pepper
- 1/4 cup finely diced celery
- 1 teaspoon prepared mustard
- 1/4 cup mayonnaise

Spread bread or toast with butter. Mix together remaining ingredients. Pile on top of 4 of the buttered bread slices; top with remaining slices.

YIELD: 4 servings.

Flavored Butter Spreads

(Enough for 40 canapés or tea sandwiches)

1. Soften 1/2 cup butter. Add 1/2 cup finely chopped watercress and 1 tablespoon chopped parsley, 1 teaspoon lemon juice and 1/2 teaspoon minced onion. Mix well.
2. Soften 1/2 cup butter. Add 2 tablespoons horseradish and 3 tablespoons minced pimiento. Mix well.
3. Soften 1/2 cup butter. Add 1 small can deviled ham, 1 teaspoon prepared mustard and 1/2 teaspoon Tabasco. Mix well.

Here are some rules to remember when using herbs.

To bring out the flavor of dried herbs, soak in lemon juice just before adding.

Remember dried herbs are 3 to 4 times as strong as the same measure of fresh herbs.

Go easy when using herbs. It is easier to add than subtract.

Aux fines herbes means that a dish is flavored with a mixture of finely chopped fresh herbs. Vary the amount of each to suit your taste.

Herb Butter

- 1/4 cup butter softened
- 1/8 teaspoon salt
- 1/8 teaspoon pepper
- 2 teaspoons parsley, chopped fine
- 2 teaspoons lemon juice
- 1 teaspoon dried thyme
- 1 teaspoon dried basil
- 1/4 teaspoon garlic salt
- Add to butter salt, pepper and parsley. Blend well. Add thyme, dried basil and garlic salt. Add lemon juice slowly.

Parsley Rice

- 1 cup cooked rice
- 1 cup milk
- 4 tablespoons melted butter
- 1/2 cup grated cheese
- 1/2 medium sized onion, chopped fine
- 1 cup chopped parsley
- 1 egg well beaten
- 1/2 teaspoon salt
- 1/4 teaspoon paprika
- 2 tablespoons chopped pimiento
- Mix well. Fill buttered ring mold. Bake about 45 minutes in an oven (350 degrees). Fill with creamed chicken or shrimp.

Tomatoes With Herbs

- 6 tomatoes
- Thyme
- Basil
- Watercress
- Chopped fresh chives
- Peel and cut in fairly thick slices. Sprinkle each slice with a little thyme and basil. Place in layers in a large plate and let stand in the refrigerator for 2 hours. Serve on watercress with chopped fresh chives.

Peas and Mushrooms

- 2 lbs. mushrooms, grind stems
- 1/2 cup bacon drippings
- 4 cups broth
- 3 lbs. shelled peas
- 1 grated onion
- Salt and pepper
- 1/8 teaspoon nutmeg
- 1/4 teaspoon marjoram
- 2 tablespoons butter
- 2 tablespoons flour
- 1/4 cup sherry
- Heat the bacon drippings and in them saute the mushrooms with the ground up stems for 10 minutes, cover with broth. Bring to a boil and add peas, onion, salt, pepper, nutmeg, marjoram and cook closely until peas are tender. Melt butter, blend in flour. Drain liquid from vegetables and add to flour and butter. Cook, stirring constantly until thickened. Add

sauce to vegetables and mix thoroughly. Add sherry just before serving.

Lamb Potis

- 2 tablespoons fat
- 2 pounds breast of lamb cut in 1 inch cubes
- 2 cups potatoes, cut in 1 inch cubes
- 1 1/2 cups small, whole onions
- 1 teaspoon salt
- 2 tablespoons flour
- 1/4 teaspoon basil
- 1/4 teaspoon savory
- 1/4 teaspoon marjoram
- 1/8 teaspoon pepper
- 1/2 cup chopped parsley
- 1 recipe for crust

Heat fat in Dutch oven. Add meat and brown well. Add water to cover, pan and let simmer 1 1/2 hours. Remove bones, add vegetables to meat and additional water to cover. Add salt, cover and continue cooking 40 minutes or until vegetables are tender. Remove meat and vegetables to a casserole. Stir flour to a paste with a little water, blend with the juices in the pan. Stir over low heat until smooth and thickened. Add herbs and seasonings, pour over meat and vegetables, sprinkle parsley over all and let stand one hour. Cover with thin crust. Bake 10 minutes in an oven (450 degrees.) Reduce heat to (350 degrees) and bake 30 minutes.

Herb Dressing

- French dressing made with lemon juice
- 1 teaspoon finely crushed, dried marjoram
- 1 tablespoon chopped parsley
- Few drops Worcestershire sauce
- To the French dressing add marjoram and parsley. Season with Worcestershire sauce.

"MITE TOO FAST"—"Uncle" Billy Lundy, 107, gazes back over a long vista of years that span, as he tours Elgin Air Force Base, Fla., as part of his 107th birthday celebration. He is one of the two known living Confederate Army veterans.

HE "NOSE" HOCKEY—Detroit Red Wings' high-scoring Ted Lindsay fails to score on this play with anything but his nose, as he's dumped by Montreal Canadiens' Butch Bouchard during second game of Stanley Cup playoffs at Detroit, Mich. Detroit put the game on ice, 7-1.

Answer To Farmer's Pest Problems

New insecticide is good news for bean grower (above), bad news for Mexican bean beetle (right).

The insect spray program which the farmer adopts this year will determine the quality and yield of the crops he harvests. No matter what fruits, vegetables or field crops he produces, a good insect control program is a necessity. High insect killing power combined with a high degree of safety to man, animal and crop, make malathion the fastest growing insecticide in agriculture today. Already established as one of the most versatile insect killers for fruit, vegetable and nursery crops (over 75 pests on 40 crops), it is now gaining equal recognition in the field of animal protection. In areas where flies have become resistant to DDT, dairymen are depending on this new insecticide to kill those resistant species inside and outside the dairy barn. Cattle and hog raisers are also using it for flies. Also, malathion controls two of the most destructive poultry parasites—enabling poultrymen for the first time to kill both chicken red mites and northern fowl mites with only one insecticide. Prior to the development of malathion, the only insecticides which would at the same time control aphids and spider mites on both the important sucking and chewing insects were materials quite toxic to man and animal. These required strict precautionary use measures. In malathion, however, there has been developed for the grower an insecticide that kills the same variety of insects, but as the United States Department of Agriculture puts it, "is one of the safest insecticides to handle."

IN PERFECT CONDITION—The steaks on the platter, that is, if you've even noticed them. They're covered with a special plastic coating during the freezing process, and are said to keep in a home freezer for as long as two years, according to the Chicago, Ill., manufacturer who has developed the process.

CLEAN-SWEEP VICTORY—Alderman-elect Charles H. Weber of Chicago, Ill., will sweep into office on this motorized street-sweeper. It was the promise that his 45th ward would see one of the gadgets in service that helped him win the nomination. Appearance in the Bavarian costume fulfills another promise—to let his constituents see him in the outfit, a gift from the late mayor of West Berlin, Ernst Reuter.

COUNTRY PLATTERS
LES CARROLL

The narrative style of recording with a musical background is gaining in popularity. Eddie Dean's "I Dreamed of a Hillbilly Heaven" is a tremendous hit (Sage & Sand). And Tommy & Jim Wilson use this style effectively in "Dear Mom, I'm Thinking of You" and in "The Farmer and the Lord" (Mercury).

Boy-girl duets are also in high favor, and Red Foley & Kitty Wells do a terrific job on "Make Believe" and "As Long As I Live," while Goldie Hill & Red Sovine do nicely with "Are You Mine?" (Both Decca). "Full Moon" by Bob & Wanda Wolfe is a fine, peppy release (King).

One of Hank Snow's best releases is "Yellow Roses," a beautiful ballad, well-backed by the rhythmic "Would You Mind?" And Skeeter Bonn puts a wealth of feeling in his singing of "Conscience" and "Number One In Your Heart" (Both Victor).

Some excellent sacred releases are "Wait a Little Longer, Please, Jesus" (Bill Monroe, Decca), "Love Thy Neighbor As Thyself" (Louvin' Bros., Capitol), and "Walk Beside Me" (Eddie Dean, Sage & Sand).

Kitty Wells sings two lovely ballads, "Makin' Believe" and "Whose Shoulder Will You Cry On," while the Karroll Sisters have a sprightly number with a

Big Ben Will Be Repaired Soon

London's famed clock, Big Ben, will be overhauled this year, perhaps temporarily silencing its world-travelled voice.

Big Ben actually is the 13½-ton bell that strikes the hours, heralds news broadcasts and booms a deep-throated E note over London rooftops. The clock is the faithful authority that countless Englishmen have set watches by while passing Westminster Palace, home of Britain's Parliament, the National Geographic Society says.

Big Ben's origin goes back to the flames that destroyed the Houses of Parliament in 1834. In the rebuilding, a 14-ton clock bell and four smaller quarter bells were ordered. London facilities produced the quarter bells. The casting of Big Ben—named for Sir Benjamin Hall, First Commissioner of Works in 1856—was entrusted to a foundry at Stockton on Tees, 217 miles northward.

Storm Threatens Bell

Foreshadowing difficulties ahead, a storm at sea almost capsized the ship bringing Big Ben to London. Then, while being tested on the Palace grounds, the bell cracked under vigorous hammer strokes. It was melted down and another bell ordered.

Finally, in 1858, the new bell was drawn by 16 white horses through thronged London streets to Westminster. This bell, the present Big Ben, developed a flaw but was retained in use.

The clock is one of the world's most accurate public time-pieces. Some say it has stayed, except for a few stoppages, within four seconds of Greenwich time and has operated for weeks within one-tenth of a second. Nearly all concede that it meets the Astronomer Royal's requirement that "the King of clocks was to be the Prince of time-keepers."

Its performance, however, has been disturbed by man, bird, hurtling bomb and weather. A painter's ladder propped in a wrong place and a workman's bungling hammer caused trouble. A rat's nest and 50 starlings that perched on a minute hand both disturbed its delicate balance. Once, a quarter bell failed to chime during a winter freeze.

Bomb Burst Near By

A bomb bursting on the House of Commons in May, 1941, endangered the clock. The belfry was marred and the glass of the dials damaged. Word comes down that Big Ben faithfully struck only one and a half seconds behind Greenwich time when its broadcast voice told Englishmen on far war fronts that London still stood.

The clock is enormous. Each of

Remove Whitewash From Basement Walls

Painting a basement wall that has been whitewashed can be very discouraging unless all of the old whitewash has been removed. This reader wants some help with his problem.

QUERY:

I am in the process of preparing our basement walls for repainting. But the old whitewash has peeled in some places and stuck tight in others. How can I remove all of the whitewash so as to get an even finish? What kind of paint should I use?

—F. H. Y.

ANSWER:

Common old-fashioned whitewash should come off with cold water and a stiff bristled brush. A little scouring powder on the brush will help.

But of recent years, many mixtures have been used in place of whitewash. These are more difficult to remove. They peel in spots, but stick tight on others. If you paint over the top, another spot may peel and leave a bare spot on your walls.

The only safe solution is to remove all of the old whitewash. Since the chemical composition of the material used is unknown, you might try some of the easier remedies first.

Add about a pound of tri-sodium phosphate to a pail of hot water, and try scrubbing with that. Use a long-handled, stiff bristled brush. Ammonia added to the mixture may help.

Another remedy is hot water and vinegar. But I do not have

much faith in this remedy for stubborn cases.

The most satisfactory method of removing whitewash must be used with extreme caution.

Mix one part of muriatic acid with 20 parts of water in a stone jar. Do not use a metal, or enameled container.

Place the water in the jar first, and slowly add the acid, stirring with a wood paddle.

Apply the mixture to the wall with a long-handled brush. It is well to wear rubber gloves and boots to protect the skin while using the acid. It is still strong enough to burn. Using goggles to protect the eyes is also a good precaution. Soak the whitewash with as much of the solution as possible. It should soften the whitewash so that it may be rinsed off with clear water.

Do not allow drippings to stand on the cement floor. The acid will etch holes in the cement. Wash the drippings down the drain with the garden hose.

If you find that the solution is not strong enough to soften the whitewash, you may add more acid.

Be sure to rinse the wall with clear water and ammonia to remove all traces of acid. If the acid is allowed to remain it will eat away cement and mortar.

After the whitewash and acid have been removed, allow the wall to dry. If the wall dries slowly, use an electric fan to circulate the air.

Use either cement base paint, or rubber base paint on the basement walls. Cement base paint may be used while the wall is damp.

1/8 teaspoon pepper
½ cup chopped parsley
1 recipe for crust

Heat fat in Dutch oven. Add meat and brown well. Add water to cover, cover pan and let simmer 1½ hours. Remove bones, add vegetables to meat and additional water to cover. Add salt, cover and continue cooking 40 minutes or until vegetables are tender. Remove meat and vegetables to a casserole. Stir flour to a paste with a little water, blend with the juices in the pan. Stir over low heat until smooth and thickened. Add herbs and seasonings, pour over meat and vegetables, sprinkle parsley over all and let stand one hour. Cover with thin crust. Bake 10 minutes in an oven (450 degrees). Reduce heat to (350 degrees) and bake 30 minutes.

Herb Dressing

French dressing made with lemon juice
1 teaspoon finely crushed, dried marjoram
1 tablespoon chopped parsley
Few drops Worcestershire sauce
To the French dressing add marjoram and parsley. Season with Worcestershire sauce.

"MITE TOO FAST"—"Uncle" Billy Lundy, 107, gazes back over a long vista of years that span, as he tours Elgin Air Force Base, Fla., as part of his 107th birthday celebration. He is one of the two known living Confederate Army veterans.

THE USS NAUTILUS ushered in a new era of transportation when it got under way January 17, 1955, under nuclear power.

HE "NOSE" HOCKEY—Detroit Red Wings' high-scoring Ted Lindsay fails to score on this play with anything but his nose, as he's dumped by Montreal Canadiens' Butch Bouchard during second game of Stanley Cup playoffs at Detroit, Mich. Detroit put the game on ice, 7-1.

Answer To Farmer's Pest Problems

New insecticide is good news for bean grower (above), bad news for Mexican bean beetle (right).

The insect spray program which the farmer adopts this year will determine the quality and yield of the crops he harvests. No matter what fruits, vegetables or field crops he produces, a good insect control program is a necessity.

High insect-killing power combined with a high degree of safety to man, animal and crop, make malathion the fastest growing insecticide in agriculture today.

Already established as one of the most versatile insect killers for fruit, vegetable and nursery crops (over 75 pests on 40 crops), it is now gaining equal recognition in the field of animal protection. In areas where flies have become resistant to DDT, dairymen are depending on this new insecticide to kill those resistant species inside and outside the dairy barn. Cattle and hog raisers are also using it for flies. Also, malathion controls two of the most destructive poultry parasites—erubing poultrymen for the first time to kill both chicken red mites and northern fowl mites with only one insecticide.

Prior to the development of malathion, the only insecticides would at the same time control aphids and spider mites and other important sucking and chewing insects were materials quite toxic to man and animal. These required strict precautionary use measures. In malathion, however, there has been developed for the grower an insecticide that kills the same variety of insects, but as the United States Department of Agriculture puts it, "is one of the safest insecticides to handle."

The farmer-owned co-op with over 13 years experience in artificial breeding with care. See Adley's Holstein and other breeds.

BUSINESSMEN URGED TO FILE CENSUS REPORTS

Collection of reports in the 1954 censuses of business, manufactures and mineral industries, which are being conducted nationwide by the Bureau of the Census, Department of Commerce, now is moving into the home stretch.

Thirty-eight temporary field offices, established early this year to conduct these censuses, are concentrating on the task of working themselves out of a job. These offices will be closed as soon as all business men have filed their reports and these reports have been checked and relayed to Washington.

Among these field offices the one covering this area is that of Census Supervisor Paul Binzak located at Milwaukee. Here 14 employees are at work processing reports received to date from 42,597 establishments. They are aiming for completion of the job in the next few weeks when reports from a remaining 4,250 establishments have been received.

Registered letters are being sent to establishments which have not

filed their reports in compliance with census law, formally notifying them that their reports have not been received despite several previous reminders and that these reports must be returned promptly in accordance with the law.

Thirty-nine per cent of the deaths and 35 per cent of the injuries due to motor vehicle accidents last year occurred on Saturdays and Sundays.

REDDY KILOWATT SAYS
Keep your basement DRY

Banish dampness this summer with an ELECTRIC DEHUMIDIFIER

EXCESSIVE MOISTURE takes a toll . . . probably even more costly than you realize because it does its damage quietly and steadily. Damp, musty basements are quite common but you can easily correct this condition in your home by plugging in a convenient, portable ELECTRIC DEHUMIDIFIER. Many families have found that it's like adding an extra room because it dries the air and removes the musty odor. It makes the area pleasant to use and a safe place for valuable furniture, clothing, recreation equipment and tools. If there is any evidence of harmful, excessive moisture anywhere in your home—be safe and get an ELECTRIC DEHUMIDIFIER now!

CAUSE OF LEG AND KNEE PAINS MAY BE OVERLOOKED

Often one suffers for many years with a painful knee. Observation and treatment has been limited strictly to the knee. The course of the trouble, however, might originate some distance from the point of pain. Due to a twist or distortion of the hip bone the large nerve trunks supplying the legs become irritated, or may cause the weight to be borne improperly on the knees and irritate the nerves at the knee directly.

Sometimes minor displacements or the bones of the feet or fallen arches give rise to the same symptoms.

By correcting these bony displacements the chiropractor in many cases aids these painful conditions by removing the cause.

SHOWER GIVEN MISS JOAN WARANIUS AT JAEGER HOME

Decorated with spring flowers, the Norman Jaeger home in Kewaskum was the scene of a linen shower honoring Miss Joan Waranius who will become the bride of Robert Bauer on May 21 at St. Michael's Mission Catholic church in the town of Mitchell.

Court whist was played with prizes awarded to Mrs. Len Ru-

bach, Mrs. William Otte, Mrs. Earl Etta and Miss Joyce Hensen.

Refreshments were served at tables centered with spring flowers. The honored guest's table was centered with a birthday cake, the shower event also being the date of her birth.

The bride-elect received gifts of linen and a corsage. Hostesses were Mrs. Norman Jaeger and Mrs. Joseph Bauer, aunt and mother of Miss Waranius' fiancé.

TEACUP TOPICS

By BETTY ANN

More hat is the word for spring, as milliners present toppers to complement the new long, lean silhouette of dresses and suits, says Betty Ann.

Many of the hats feature back interest, with hats covering the back of the head much more than in recent seasons. Other hats have accent brims, many turn down all the way round, to achieve the droopy effect suggested by the skinny clothes of spring.

The sailor is important again this spring, looking new worn back of the hairline. Many of the hats are worn either level or tilted slightly forward.

As usual, there are plenty of flower hats, but the flowers are given fresh treatments. One designer stitches the petals flat all over his hats, giving an effect of a print and sometimes adding a feather band.

Packable hats are high in importance, permitting women to pack half a dozen hats flat in a suitcase.

You'll be seeing the dome silhouette, the cloche and many versions of the beret, but always with a more hat look this spring.

Until now, the term "stretch" has applied to the budget when a homemaker went shopping. But this spring and summer, it also applies to what she wears.

More and more women's clothing is being made in yarns that stretch to fit the body contours but spring back for easy storage or packing of the garments.

First appearing in men's socks, the yarns are made into women's knee socks, stockings, briefs, girdles, gloves and bathing suits. Sweaters are in the experimental stage.

The way to buy clothes is to consider that they can be worn all year around, whenever the weather's suitable. A spring coat, for instance, might be equally wearable on a cool day in June, an afternoon in September or in the coolness of tropical weather.

When you are a house guest and have other friends in the same town you may mention to your hostess that you'd like to see them sometime during your visit. But don't invite them to her home. If she wants to entertain them, she will invite them.

Teen-ager crave a sitting room when she has a bedroom? Change the look of her bed with piles of pillows. She'll enjoy novelty pillows made like watermelon slices, a pie or a banana.

The fashion proportion for spring is the long torso, slim waistline, higher bosom and low placed skirt fullness.

Apple Strudel

1½ cups all-purpose flour; ¼ teaspoon salt; 1 beaten egg; 1/3 cup water or milk; 2 tablespoons melted butter; 4 pounds finely chopped tart apples; 1½ cups raisins and currants; 1½ teaspoons cinnamon; ¼ pound blanched shredded almonds; 1 cup sugar; 5 tablespoons melted butter.

Sift flour and salt into a bowl. Add beaten egg. Heat water or milk until lukewarm and add. Combine ingredients quickly with pastry blender. Knead dough on a board until it is elastic and no longer sticks to the board. Place it on a floured board and cover it with a warm bowl for 30 minutes. Work two tablespoons melted butter into the dough. Place it in the center of a large table covered with a floured cloth. Gently pull and stretch the dough, placing both hands under it, until it is as thin as paper. Be careful not to tear it. Strudel is stretched to tremendous dimensions, two by two yards or more. Spread the dough with apples, currants, cinnamon, almonds, sugar and five tablespoons melted butter. Do not feel bound by these ingredients or proportions.

Fold the dough over one side, hold up the tablecloth and let the strudel roll into a huge roll. Twist the roll into a large, greased pan or cut it into pieces and trim the edges. Bake the strudel for one-half hour in a hot oven 400 degrees, reduce the heat to 350 degrees and bake it until it is crisp and brown. Serve it before it is cold.

As a tasty accompaniment to a bowl of hot, clear soup, cover salted crackers with grated American cheese. Sprinkle with curry powder and put under broiler just long enough for the cheese to bubble.

Slogan of a diaper service in Chicago: "Rocka Dry Baby."

Salt-water catfish spines contain a mild poison which causes some pain if a spine punctures your skin.—Sports Afraid

Delicious Cinnamon Bread Spices Winter-Weary Appetites

BY DOROTHY MADDOX

WITH spring in the air, treat your appetite to a change. A new dish, a new bread—anything to freshen up the menu—that's what most of us want. So try this really delicious cinnamon bread. You'll enjoy it.

Cinnamon Bread

One cup milk, ¼ cup margarine or butter, ¼ cup sugar, 1 teaspoon salt, ¼ cup warm, not hot, water (lukewarm for compressed yeast); 1 package or cake of yeast, active dry or compressed, 1 egg, beaten; 4½ cups sifted, enriched flour.

Scald milk. Stir in margarine or butter, sugar and salt. Cool to lukewarm. Measure water into large mixing bowl (warm, not hot, water for active dry yeast; lukewarm water for compressed yeast).

Sprinkle or crumble-in yeast. Stir until dissolved. Stir in lukewarm milk mixture and beaten egg. Add sifted flour and stir until mixed.

Turn dough out on lightly floured board and knead 8 to 10 minutes, or until dough is smooth and elastic, and does not stick to the board. Place in a greased bowl and brush top lightly with melted shortening. Cover with a cloth.

Let rise in a warm place, free from draft, until doubled in bulk, about 45 minutes. Punch dough down and turn out on lightly floured board. Divide dough in half. Roll each half into an oblong about 8 x 10 inches.

Brush lightly with melted margarine or butter. Sprinkle with half of cinnamon mixture. Roll up tightly, as for jelly roll. Seal edges by pinching together firmly. Place sealed side down in greased bread pan 8½ x 4½ x 2½ inches.

Brush top with melted margarine or butter. Cover with a cloth

Cinnamon bread, fragrant-fresh from the oven, is a real spring-time treat for winter-jaded appetites.

and let rise in a warm place, free from draft, until doubled in bulk, about 65 minutes.

Bake at 350 degrees F. (moderate oven) 40 to 50 minutes. Ice top while hot with Plain Icing.

Cinnamon Mixture

One-half cup sugar, 1 tablespoon cinnamon. Mix together sugar and cinnamon.

Plain Icing

One-half cup sifted confectioners' sugar, 2 teaspoons milk, ¼ teaspoon vanilla extract. Combine ingredients and beat until smooth.

In FASHION now

Custom fashions are gentler in look this spring and summer. Dresses and suits have carved bodices, fitted midriffs and tubular skirts. Many of the evening gowns are full length and fashioned in floating chiffon, organzas and swiss eyelet laces that veiled darker underskirts.

Meticulous detail is an important feature of the new spring clothes. Collars on many outstanding suits are either rolled, with wrapover lapels crisscrossing high on the bodice, or are wide Peter Pan types that are cut away from the neck. The necklines on dresses are their outstanding feature in many cases. They are draped into graceful cowls, scooped out in deep cuffs and rolled away from the throat in low cuffs.

Jersey suits are very popular. They are flattering to most figure-types and travel like a dream. Jersey has also been adapted to the long torso line.

The Dior hat collection is most interesting. Outstanding was his flower pot cloches and pictures-que wide, shallow-brimmed models.

Misty, ultra-feminine colors, such as pale green, pinks and baby blues are popular for summer evening gowns. Some of the newest tones for daytime suits and dresses include beige, honey, caramel and milk chocolate.

Huge Iceberg

Members of an Antarctic expedition, aboard the U. S. S. Atka, recently came upon an iceberg which was estimated to be fifty miles long. The huge iceberg was bounded on all sides by vertical ice cliffs that rose about 100 feet above the water.

It is estimated that the underwater depth of the sides was at least 800 feet. The U. S. S. Atka, as a result, had to divert its course and it took four hours to steam around the iceberg and reset a straight course to the port of Buenos Aires.

Experts say such large icebergs often break up into smaller ones, each creating a dangerous obstacle in the path of shipping. Such huge icebergs are formed when the ice sheet, which covers the continent, pushes out to sea and cracks off.

Phosphorescence in the ocean is often caused by animal plankton such as tiny jellyfish and sea squirts.—Sports Afraid

FOR PILLOW SLIPS

Designs for pillow slips, towels, luncheon sets, aprons, blouses, children's clothes, etc. Embroider or textile paint these beautiful and clever designs. Some of the suggested items are shown in the background. There are 34 designs of various sizes on this usable-several-times Hot Iron Transfer. Each of the designs may be used for a number of things. C3150, 20c.

Made To Order

The lanky, sharp-nosed mountaineer dragged his gangling son down the hills to the district school in the heart of the worst feud country in Kentucky.

"This youngun needs some schoolin' and I heard you all is learnin' 'em trigonometry and that's just what Lem here needs. He's the only pore shot in the family."

There Was

There once was a maiden from Siam. Who said to her lover, young Kiam, "If you kiss me of course, You'll have to use force— But I'm certain you're stronger Than I am."

You have probably found that if you are in the hot sun for a long time you will develop a headache. It may be that you do not react well to a cold shower, that you get sinus trouble if you swim in fresh water or any number of other things.

It is a wise person who heeds these physical eccentricities. You will be adding comfort to your life and may actually be adding to your life span.

If strain and fatigue hit you at the back of the neck you will find heat and massage helpful. You must learn to relax. These same steps have been known to cure a headache.

Try not to worry about the things in life you can do nothing about. This may sound easy, but it is an art and even the wisest of men have found it impossible.

About Your Home

It is time again, in most sections of the country, to start thinking about roses. Roses are not hard to grow if you choose healthy plants and stick to the varieties that are blight and bug resistant. Plant only those types that do well in your part of the country.

Do not look for bargain plants. Buy only the best grade plants from a reliable dealer.

The cones of dormant rosebuds should number three or more. At least two cones of the floribundas should be fifteen inches long—eighteen inches for hybrid-teas and twenty-four for climbers.

The low buds should be plump and unscarred. Buds should be dormant with some growth showing late in the spring. The bark should be green to the tips, unshriveled and show no signs of rough treatment.

Be sure to check the neck of the plants you buy to make sure they have not been split in packing. The roots should be well branched and unshriveled.

Plant your bushes as soon as possible after they arrive. Never allow the roots to be exposed to the sun or wind.

Follow careful planting directions. If you must hold the plants for a few days before you plant them, set them in a shallow trench and mound them with moist soil.

The same two factors that determine the nature of every living thing—heredity and environment—is what does or does not make your roses beautiful.

Environment is equally important and includes not location, climate and soil but the planting, feeding, pruning, watering and spraying also.

Professional gardeners are striving all the time to develop new, better and more beautiful roses. For successful rose culture you must have sunlight for half of each day at least, and average good soil. Make a roomy hole a foot deep. Dig humus and well rotted manure into the next foot of soil and mix thoroughly.

Firm the soil around the roots with your hands. When the hole is about three-quarters full, pour a pail of water in and let it sink in before filling the hole level. Don't use fertilizer at planting time. Save it until the plants are growing well.

High Plane Flights Dangerous to Obese

There are some indications high altitude flights are dangerous for fat people. In at least two cases recently, fat passengers have collapsed while flying at high altitudes and subsequently died.

One collapsed at 35,000 feet altitude and the other at almost 40,000 feet. Both were dead within twelve hours after their initial collapse.

The cause is not thought to have been a lack of oxygen, since a normal oxygen supply was available in the aircraft. However, there is a growing belief that decompression sickness was the cause of death in these cases.

Decompression sickness is caused by a rapid decompression as a jet aircraft gains high altitude. Some scientists believe this causes a gaseous super-saturation in fat deposits in the body. If this is severe enough, fat cells are set free into the bloodstream and nitrogen bubbles may enter the heart.

It would seem then that there is some indication that high-altitude jet flights, and especially rapid ascensions, could be dangerous to fat passengers.

Factual News About The Eyes

Most of us have some degree of astigmatism (irregular curvature of the eye's cornea or lens), according to the Better Vision Institute, but it isn't always severe enough to cause trouble. In many cases it exists decidedly before the age of six, decreases by the tenth year, remains fairly constant until middle age or longer, and then increases. Anyone with much astigmatism needs the help of individually prescribed glasses.

Nearsightedness is often found in young schoolchildren, says the Better Vision Institute. Its usual tendency is to progress until the age of 19 or 20 and then remain stationary. With the help of the right glasses, almost all nearsighted people can get comfortable, efficient vision.

The first death from an automobile accident occurred in 1899, according to the Better Vision Institute. Since then, more than a million Americans have met death on the highway, and inadequate vision has been to blame in many cases. Fortunately, all but one of the states now require some sort of eyesight test before issuing a driver's license. It would be a good thing if every would-be driver had a professional eyesight examination first, to make sure he's able to pass this test and to get the thorough analysis and help which only a specialist can give. Moreover, drivers should have rechecks at frequent intervals, because the eyes are constantly changing while the glasses that may be prescribed remain fixed and become adequate after a while.

The eyes of many ostriches weigh more than twice as much as their brains, according to the Better Vision Institute. Not so with man—but through man's eyes comes an estimated 83 per cent of all his knowledge.

"No matter how fearful a person may be of the future, he hopes he will live to see a lot more of it!"

Bible Comment: Gospel Teaches Strength of Life in Christ

IN many places in the New Testament there are verses or passages that stand out superbly. They offer the concentrated expression of a great fact, a great experience, an exhortation to righteousness and Christian living, or an inspirational incentive of encouragement and uplifting power.

One, in particular, expresses all the reality and power of the Gospel experience, the fact of what belief in Christ and the acceptance of His message of salvation can do for man. It is found in II Corinthians: "Therefore if any man be in Christ, he is a new creature; old things are passed away; behold all the things are become new."

What does it mean to be "in Christ?" Scholars say it is as if it referred to the place in which one lives. Christ is the environment of the new man in precisely that sense. "If you love Me," said Jesus, "keep My commandments." To live in Christ is to seek the guidance of His spirit and to follow His example.

This passage, too, contains the clear, effective expression of the nature and meaning of salvation. Too often, salvation is made a matter of safety and redemption in some experience beyond this life, without much reference to moral and spiritual reality.

But here the implication and meaning are plain. Salvation is a matter of new life in Christ. It is a moral and spiritual experience of regeneration. God's will and God's provision in Christ and the Gospels is that here and now, for each of us, there may be a new life and a new creation.

Sports Quiz

1. Who won the recent Masters tourney?
 2. What two "old pros" came in 2nd and 3rd?
 3. How old is Joey Maxim?
 4. What Major League team won mythical honors in spring play?
 5. What team was the Yankees' opening days opponents?
- The Answers:
1. Cary Middlecoff.
 2. Ben Hogan and Sam Snead.
 3. Thirty-three.
 4. The Chicago Cubs (NL).
 5. The Washington Nationals.

He's shown briefing students at his school in Chicago, Ill., for future employment by hatcheries, where they'll grade up to 1000 chicks an hour to separate the money-making hens of the future from the roosters-to-be.

SPORTS AFIELD

By Ted Kesting

Nobody living can do good fly casting with mismatched rod and line. About 99 times in 100, the troubled fly caster has a line much too light to bring out the action of his rod. Clerks in tackle stores are largely to blame for this, according to Jason Lucas, angling editor of Sports AfIELD magazine. They usually recommend lines too light, almost never too heavy, and still more rarely, the right size. As a matter of fact, most rod makers, in their catalogs, recommend lines too light for the best and easiest casting with their rods.

On any given rod, you should use the same line for anything from small trout and bluegills up to the largest sea fish—you use the one line that will do the best casting with that rod.

So when you buy a rod, how do you know what size line to get for it? You might hunt up a friend who is a really good fly caster. He is likely to have lines in a couple of sizes, to try on your rod. If you don't have such a friend, get a C level, an HCH double-taper, or a GBF three-diameter.

Lucas bases his choice on the fact that a high percentage of fly rods bought nowadays are of hollow glass, and that a great majority of these work best with lines of those sizes—almost regardless of lengths or weights. Remember that a limber 9-foot rod will take a lighter line than a rather powerful one of only 7 feet, though the 9-footer weighs much more—and nearly all the shorter rods now are quite powerful.

The beginner may do best to get a level, since it is somewhat easier to learn with. A double-taper is practically necessary for dry-fly fishing, and is quite satisfactory for wet flies too. The advantage of a three-diameter line is that it will cast farther than either of

the others. Lucas uses a three-diameter for everything but dry flies.

The new long-floating lines are so superior to those of the older types as to render them obsolete. Lucas says get a floating dry fly line because it is impossible for anybody to pick up a fairly long piece of drowned line for a good backcast—and a good backcast is the whole heart of a good forward cast. Silk or nylon? Well, the one real difference between them is that nylon won't rot or weaken when damp. Whichever you decide on, dress it daily. No line will shoot well through guides without dressing on it.

PIPE DREAM—The "Smokers" by Geneane Payson, 17, recently took first prize at the Pierce County Art Show at Tacoma, Wash. Whatever the judging committee saw in the painting isn't what Geneane intended them to see, as picture was hung wrong. For a correct view, turn this page one-quarter turn to right.

Brucellosis Control Making Good Progress

Farmers are constantly striving to eliminate brucellosis from their dairy herds, and their efforts are meeting with encouraging success.

But this progress must continue. Brucellosis—or undulant fever—may be a painful and crippling disease which can strike with baffling suddenness and linger for and agonizingly long time. It is harbored in animals and passed on to man principally by direct contact with infected animals such as cows, swine, and goats; or through raw milk.

The new drugs have produced encouraging results in treating brucellosis, especially the milder cases. However, prevention is still the prime control method. Prevention first of all necessitates detection and elimination of infected animals, a high degree of care in handling carcasses of animals which may be diseased, and the pasteurization of all milk and milk products.

The joint efforts of livestock producers, dairymen, physicians, and public health workers are necessary in the control of brucellosis. In Wisconsin these groups have cooperated on an intensive control program including the vaccination of calves, testing and slaughtering of diseased animals, prohibiting the sale of diseased cattle for transfer to other herds, and pasteurization of milk.

By July 1, 1955 all producers selling milk on the Grade A program in Wisconsin, as well as the Illinois markets, must have their herds on the Plan A brucellosis control program. This program requires a semi-annual test for indications of brucellosis in the milk of all dairy herds. Where reactors are found a follow-up blood test is required and the diseased cattle destroyed.

President's Farm Being Stocked With Aristocratic Black Angus

Sleek black Aberdeen-Angus, hornless aristocrats of the beef cattle world, hold a new honor: representation on the farm of America's First Family.

President Eisenhower already has a few head of "Black Angus" on his 189-acre farm at Gettysburg, Pennsylvania. He has received a certificate giving him the grand champion heifer of the Ohio Aberdeen-Angus Breeders' Association show at Columbus in April.

Although notable for beef production, Black Angus are comparative newcomers to the United States. The first bulls were imported from Scotland as recently as 1873, long after the introduction of the breed's fellow aristocrats, Shorthorns and Herefords, "Humies and Doddies."

The breed is native to northeast Scotland where the counties of Aberdeen, Kincardine and Angus (formerly Forfar) about the North Sea, the National Geographic Society says. The stretch of cattle country lies about 1,000 miles north of Chicago's latitude. The climate is rugged and chilly.

In hills washed by Scottish mist from the sea, thrifty farmers have raised Aberdeen-Angus for many generations, often calling them by different names. The breed is known as "Buchan humies" in the Buchan district of southern Aberdeen. Angus cattlemen refer to them as "Angus doddies." These and similar Scotch terms — "dodded," "humble," "homy" and "humie"—all mean hornless.

But the many-named cattle's origin is lost in unwritten history. Some Scotsmen believe they sprang as sports from black cattle with horns; others think they were brought by Norsemen from Scandinavia, where hornless cows have a long record. The American Aberdeen-Angus Breeder's Association states, however, that they probably descended from the wild hornless cattle of northern Scotland.

Documentary evidence of the breed's existence in Aberdeen is

Cancer & Smoking

The National Cancer Institute, which is a Government agency, recently reported on a research project into the connection between smoking and cancer. Dr. John R. Heller, the director of the Government program, recently said that although the research program had not progressed to the stage where positive findings could be announced, available information "indicates" the risk of lung cancer among heavy cigarette smokers is ten times as great as among non-cigarette smokers.

Dr. Heller's testimony was given to a House Appropriations subcommittee recently, in secret session, and it was released to the public only a few days ago. Heller believes the Government will be in a good position to reach a conclusion after further study on smoking habits of some tens of thousands of veterans.

Dr. Heller said one study showed that 10,000 workers in a tobacco factory showed no higher rate of cancer than those not engaged in such work. He said the study program was not concentrating on paper used in the manufacture of cigarettes, to see if there was anything harmful in the paper itself.

In addition to his testimony about cigarettes and cancer, Dr. Heller said that it had been proved that there was a cancer-inducing substance in the atmosphere when engine exhaust and industrial process exhausts were present. It may be, he said, that there is an association between air pollution and lung cancer.

Photo Cards Have Many Uses

We're all familiar with the photographic Christmas card. You know how nice they are, both to send and to receive. That's why we think it is a good idea to adapt them for use on other occasions throughout the year on which you want to say the same thing to at least ten people, in a personal and original way.

Your photofinisher does all the work for you—all you have to do is pick out the picture you'd like to use and he'll print it for you on the standard 4 1/2 x 5 1/2 inch card, leaving room for your message. Many photofinishers have facilities which would enable them to print the message you wish on the card. If yours does not, you can take the card to a printer or write your greeting in long hand, if you wish.

They are excellent for saying thank you on occasions such as graduation . . . for extending greetings at Eastertime . . . for invitations to parties and open houses. If you are moving, it's a fine way to not only spread the word of your new address, but to show people where you live as well. It's a simple matter to take a snapshot of the house whether it is new—or just new to you—and have it printed on a card.

You'll want to select a picture appropriate to the occasion, of course, but that shouldn't be difficult. A wedding thank you will bear the picture of the newlyweds in their bridal finery. The graduate's expression of appreciation will have a picture of the boy or girl in cap and gown.

—John Van Gulder

One Loses Distinction

Behind The Scenes in American Business

By Reynolds Knight

While home building has been making most construction news, accounting for the largest dollar volume both in starts and completions, non-residential construction also continues to set records. A corporation which compiles construction data, reports contracts let for this class of building up 43 per cent from March, 1954.

Manufacturing buildings, at \$176 million, are more than twice the dollar volume of last year's corresponding month. A big piece of this was an atomic energy plant for \$20 million, contracted in March.

Government figures on work put in place, compiled by the Department of Commerce, show a record \$2.9 billion of construction for the first quarter of 1955. This is for all building, residential and otherwise. If the year-to-year increase carries into the later months, when more building is normally done, such a pace will mean \$4 billion worth of construction this year. Last year's record was \$37.2 billion.

These data carry a warning for the small business or the individual thinking of building a house or new quarters for his business. Cement and plaster-board plants, which must build far ahead to expand production, fell behind demand at last year's pace, and will fall farther behind if this year's rate continues. Get those pieces of plaster board and bags of cement you need, and squirrel them away somewhere.

NATION'S SYMBOL — High residential construction, of course, depends upon the growing number of "typical suburban" families. This is a household of four or five members, with annual income of \$6,000 to \$7,000, living in a house built since the war, and substituting its own automobile for the city's transportation.

This house and this automobile have changed the face of the nation. Suburban homes stress more space, and quality materials such as ceramic tile for bathrooms and kitchens, copper plumbing, and hardwood finishes for stairs, doors and sills. The house with three bedrooms and one or two tiled bathrooms flourishes.

The automobile has multiplied demand for shopping centers and supermarkets.

The move to the suburbs, begun in a small way even before World War II, flows on without slackening. Now 30 per cent of the country's inhabitants live in suburbs, and twice that percentage of home building is concentrated there.

THINGS TO COME — A new paint combines strontium and aluminum to rust-proof and paint a surface at one swipe of the brush. Another aluminum home help is a venetian blind with the slats hung sideways, for use as a shade or a room divider. . . The owner of a new car with 12-volt ignition system can get a 12-volt bottle warmer for it. . . Sharpen your golf for summer with foam rubber practice balls, \$2 a dozen.

BIG THINGS AFOAT — During 1955, one of every six Americans will own and enjoy a boat. For the second year in a row, more than \$1 billion will be spent on marine products and services. One equipment manufacturer estimates that 30 million of us will be on the waterways this summer. This number equals the total of bowlers, golfers, tennis players and baseball spectators.

Up and down coasts, and along inland waterways as well, operators of municipal and private marinas report mooring space at a premium. Many small boat basins along Long Island Sound within 50 miles of New York City haven't even berth space for another 12-footer. The small boat boom, interrupted during the Korean war, goes on as if it would never end.

POTATOES GOING UP — It's an ill wind that doesn't boil somebody's potatoes—if a new proverb is what this situation calls for.

A month ago, Maine potato growers were complaining to their congressmen about potato prices on the New York market. Since then, prices have increased from \$1.50 a bushel to \$2 a bushel, and seem likely to go higher.

It wasn't accomplished by protests, but by unseasonable weather in Alabama and Georgia. Normally those states, where new peas and new potatoes for Easter are the mark of the energetic gardener, send a few hundred carloads of potatoes North every year just about this time. Not many, just enough to piece out between the waning big fall crops from Maine, Long Island and Idaho, and the first big spring crop from California.

State, county and township highway departments spend over \$300 million annually picking up litter.—Sports AfIELD

HERE'S HOW . . . MAKE A PORCH SWING

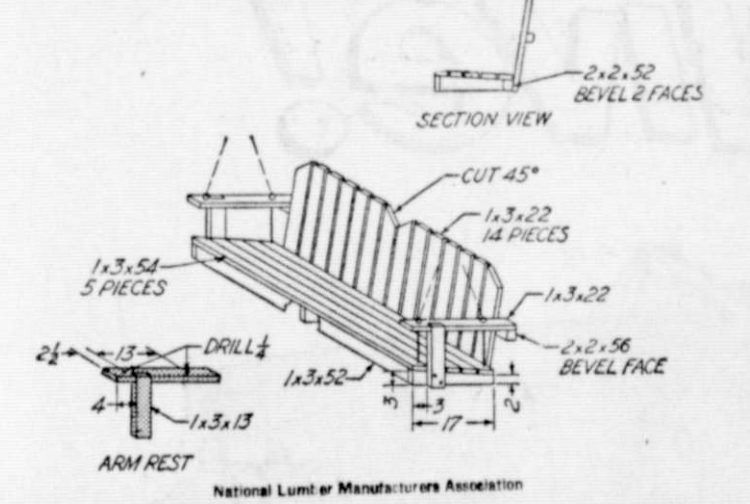

Although the porch swing consists of a large number of pieces, it is easy for the home craftsman to make.

All pieces should be sanded before assembly. Exposed edges should be rounded.

First make the two end supports for the seat; then add the seat boards, using No. 10 wood screws, 2 inches long, countersunk.

Then assemble the two arm rests, as shown in the detail drawing, using three screws in each. Fasten the arm rests in the seat supports, using two carriage bolts, 1/2-inch in diameter, in each.

Establish the slope of the back rest, and mark the position on the arm rest. Bevel one

Winners in Women's Bowling Tournament

A total of 38 teams, 75 doubles and 135 single bowlers won prize money in the recently completed tournament of the West Bend Women's Bowling association, it was announced this week by Audrey Mayer, Barton, secretary of the association.

A special meeting of the association will be held at King Pin alleys, Campbellsport, Wednesday, May 25, at 7:30 p. m. Prize money will be distributed and officers will be elected.

The Bank of Kewaskum team of the Campbellsport league, captured the team event championship with a 2414 count, including handicaps. All teams that totaled 2215 or more are in the money. B. Mueller and L. Weinreich headed the doubles winners with 1117. Doubles teams that registered 952 or higher share in the loot. Singles champion was F. Immekus with a 611 series total. Bowlers who hit 475 or better shared in the money.

Top five teams—1. Bank of Kewaskum, 2414; 2. King Pins, 2409; 3. Schroeder's Jewelry, 2394; 4. Kimla & Wickert, 2387; 5. Weinreich's, 2351.

Top five doubles—1. B. Mueller, L. Weinreich, 1117; 2. M. Marx, P. Peterson, 1098; 3. M. Wagner, M. Klein, 1075; 4. L. Kremsreiter, M. Hetebrueg, 1074; 5. D. Swarthout, D. Werner, 1063.

Top five singles—1. F. Immekus, 611; 2. C. Boden, 582; 3. M. Vogelberg, 575; 4. J. Miller, 574; 5. Marlion Schacht, 569.

The women's tournament was bowled on the King Pin alleys Campbellsport, while the men's events, completed some time ago, were rolled on Lighthouse Lanes and Jack and Joe's alleys, West Bend.

EXPLAIN SERVICES OF NEW CHILD GUIDANCE CENTER ON WBKV PROGRAM SUNDAY

The services of the new Washington-Ozaukee Child Guidance Center were explained on a WBKV radio program Sunday when staff members, a local physician and members of the clinic's advisory committee participated in a broadcast on the UAW-AFL program.

Members of the discussion panel were William O. Brown, clinical psychologist, now of West Bend; Mrs. Norman Weber, Hartford; Victor Pizak, of the UAW-AFL; Miss Marian L. Karr, Madison, psychiatric social worker; Mrs. Roger Sacia, West Bend, secretary of the advisory committee; Dr. A. H. Heider, member of the Washington-Ozaukee County Medical society, and Mrs. W. R. Dunwiddie, Fort Washington, Chairman of the advisory group.

The center, which will serve both

counties, is located in the Regner building, 141 North Main street, West Bend.

A child Guidance Center is an agency concerned with the mental health of children. On the staff is a psychiatrist, psychologist and psychiatric social worker. They work as a team concerning themselves with the emotional and behavior problems of children.

"This team is also interested in any part of the community that has a bearing on the mental health of children and adults," Brown pointed out. "An important part of the clinic's work is to help plan for and promote mental health for all members of the community."

This service does not substitute for the family, church or other community members, it was emphasized. On the contrary, it functions to strengthen the hand of the community to better serve its youth.

4-H Club News

KEWASKUM 4-H'ERS

Our May 11 meeting was called to order by President Robert Becker. The attendance record was read off. If you were present you answered by naming a movie star. The treasurer gave her report and collected dues. The secretary's report was given and accepted.

We had a big discussion over our hike which will take place on May 14. We decided that Arnold Bier's woods would be our destination. We are to meet at Ray Schaefer's house at 1:30 p. m. After a few times of voting we decided to have a picnic after the hike. The ones chosen to get the food were Gwen, Patty, Carole S., Duane and Nancy.

We also discussed the plans for a trip up to Camp Upham near Wisconsin Dells. It will be a two day trip and anyone can go.

The food committee for the next meeting is as follows: Rosalie and Wally Ewert and Jimmy Fickler.

The meeting was adjourned. Games and refreshments were enjoyed by everyone.

KETTLE MORAIN 4-H CLUB

A meeting of the Kettle Moraine 4-H club was held recently. The meeting was opened with the Pleading Song.

We discussed the idea of painting mailboxes and also painting the names on.

Those giving demonstrations for this month were Delores Ludwig, on "How to Make a Table Mat," David Smith, "How to Make a Drift Wood Lamp," and Mary Smith, "The Right Way to Set a Table."

The dance that our club sponsored April 30 turned out to be a success. We thank Math, Lensmire and his orchestra for furnishing the music. We also thank those people who attended and those who bought advance tickets for making it such a success.

The refreshments were served by Harold and Karl Haack.

BOLTONVILLE BUSY BEAVERS 4-H CLUB

Eugene Laatsch, President Judges Mrs. Gene Mueller and Mrs. Carl Gruendemann selected Sharon Fay to represent the Boltonville Busy Beavers' 4-H club at the county speaking contest with her talk, "What About the High Accident Fatality Rate?" The club speaking contest was held during the regular monthly meeting at the Fire Department building, on Wednesday evening, May 11.

Another talk in the safety field, "Safety with a Bicycle" scored second for Marjorie Beck. In the field of health Zandra Riley discussed, "How Many Meals a Day?" Jim Degrutz chose a recreation field, and explained some of the intricacies of baseball playing, and Marjo Weiss spoke on "Why Camp Awana Is Fun", and stressed the fact that all forms of recreation are possible during those three days.

able during those three days.

Sunday will be observed with Harold Gilford and Ronald Zettler supplying floral decorations for the services at the St. John Church of God, and Mary Degner for the St. John's E. & R. church, Boltonville.

The birthday song was sung for Mark Rodenkirch, May 3, and Sharon Gilford, May 10. Progress on the projects being pursued by each club member was reported. Enrollments for Camp Awana included Margo Weiss, Sharon Fay and Zandra Riley. Sharon Gilford might join the girls after more consideration.

For the service projects for the month, the club members will assist in selling poppies for the Triangle B Auxiliary, and will serve for the firemen's picnic, May 28 and 29.

Complete arrangements for the meeting were in charge of junior leader Harold Gilford and Ronald Zettler. At the close of the program and business meeting the boys again proved themselves very proficient as hosts and Ronald

HOMEMAKERS OF COUNTY TO SPONSOR \$100 SCHOLARSHIP

The Washington county homemakers sponsor a \$100 scholarship to be presented to one girl in the county who plans to continue studies in home economics or nursing.

Application blanks are available at the West Bend, Kewaskum, Slinger, and Hartford high schools. They are also available at the home agent's office, post office building, West Bend.

If you know of girls who are interested and would use the scholarship to good advantage, please encourage them to apply for it.

The girl who receives the scholarship is chosen on the basis of need, activities, her work in school, and a brief story of her plans for

Only car in its field with Body by Fisher A new V8 and two new Sixes reach new highs in horsepower and performance Never found on a car of Chevrolet's price before

You can't get any more life in automobile styling than Chevrolet's "Body by Fisher." Those three words say all the nice, reassuring things you can say about automobile bodies. "Body by Fisher" is found in many of America's most luxurious cars.

You certainly want life in your engine. And with the choice of power-thrillers that Chevrolet offers you this year, you've got what it takes to carry you into a whole new world of motor-ing confidence and pleasure. How about trying the V8 soon?

Anti-dive braking that means head-up stopping. 12-volt electrical system delivers twice the punch. Ball-Race steering makes steering and parking easier. But try these things for yourself. Telephone or come in and let us arrange a demonstration soon.
