

Memorial Day Parade, Services Here in Morning

Robert G. Romaine Post 384 of the American Legion will conduct the annual Memorial Day parade and services in Kewaskum Monday morning, May 30, to commemorate the dead of all wars.

The local observance will begin with a parade at 9:30 a. m. sharp and all units taking part in the parade are urged to be present before that time.

The parade will originate at the Kewaskum Community High school and will proceed east on First st., south on West Water st., west on Main st. and north on Fond du Lac ave.

The order of march in the parade will be as follows:

- 1. Colors and Guard. 2. Firing Squad. 3. Legion Members. 4. Gold Star Mothers. 5. Legion Commander, Rev. Rodenbeck, J. O. Reigle. 6. Disabled Vets. 7. Auxiliary President, Auxiliary Chaplain. 8. Village President, Trustees. 9. High School Band. 10. Kettle Moraine VFW. 11. Kettle Moraine VFW. Auxiliary. 12. Fire Dept. and Equipment. 13. Boy Scouts. 14. Girl Scouts. 15. Cub Scouts. 16. Brownie Scouts. 17. Kiddies.

Following is the program to be conducted at the Legion clubhouse after the parade:

Star Spangled Banner—High School Band (audience participation).

Invocation—Rev. F. L. Rodenbeck.

Gettysburg Address—Rosemary Struening.

Triple Trio (singing 'This Is My Country')—Gloria Schaefer, Audrey Kral, Adeline Ketter, Judith Weddig, Sue Weddig, Carol Rohlfinger, Mary Ellen Jaeger, Gwen Edwards, Sharon Dreher.

Flanders Field—Gladys Becker.

America—High School Band (audience participation).

Memorial Day Address—J. O. Reigle.

Placing of Memorial Wreath—Auxiliary Chaplain.

Benediction—Rev. F. L. Rodenbeck.

Firing Squad—Members of Post Taps—Richard Wesenberg.

LEGION AUXILIARY WILL SELL POPPIES SATURDAY

Ladies of the auxiliary of Robert G. Romaine Post 384, Kewaskum, will conduct the annual poppy sale all day Saturday, May 28, Poppy Day.

SHEEPSHEAD TOURNAMENT

Sheepshead tournament at Heisler's tavern, Kewaskum, Monday evening, May 30. Entry fee \$2.15. All are invited.

Prize winners at the last tournament were: 1. Elton Schrauth, 22-6-32; 2. Walter Schmidt, 38-6-32; 3. Leo Bonlander, 36-6-30.

First Night Ball Game Here June 2

All scheduled ball games in the Land o' Lakes league last Sunday were postponed because of rain and wet grounds.

A heavy slate of games faces the nine league clubs this holiday week end when seven games are on tap.

The Kewaskum Chevrolets are idle Sunday but will play at Germantown on Memorial Day.

The reason Kewaskum will be idle on Sunday is because the team will play instead next Thursday night, June 2, when Grafton comes here for the first home night game in history.

All the rest of Kewaskum's home games for the season will also be night affairs and all will be played on Thursday nights.

COUNTY ELEMENTARY GRADUATION FRIDAY

The Washington county elementary commencement exercises were held at the McLane school in West Bend on Friday evening, May 27, at 8:00 p. m.

The Newburg State Graded school pupils, directed by their principal, Mr. Czynski, presented several entertainment selections.

Former superintendent of the Horicon schools, Walter Bussewitz, gave the commencement address.

During the recent years the speaker has traveled throughout the South American countries, Europe, Africa, and Asia as a Rotarian representative to the international conferences.

HOLY TRINITY PUPILS ON PILGRIMAGE TO HOLY HILL

The pupils of Holy Trinity school were taken on their annual pilgrimage to Holy Hill on Wednesday, May 26.

NO SERVICE AT POST OFFICE MEMORIAL DAY

The post office will be closed on Monday, May 29, Memorial Day. Only one mail will be received and that is on Train 217 due here at 5:00 a. m.

BIRTHS

STOFFEL—A son to Mr. and Mrs. Alan Stoffel, Kewaskum, Monday, May 23.

NIGH—A son to Mr. and Mrs. Gregor Nigh, Kewaskum, Monday, May 23.

RESCH—A daughter, Diane Lilian, to Mr. and Mrs. Leo Resch, R. 2, Kewaskum, May 5.

School District Votes to Erect New \$450,000 High School Here; Election On Bond Issue June 6

Despite inclement weather, more than 100 electors of the Kewaskum Community Union High School Joint District No. 2 met at the high school Monday night and unanimously voted to erect a new school in the district.

Preceding the vote on the building, Architect Raymond N. LeVee of Appleton explained the preliminary plans and sketches for the school. After the meeting of the electors, the school board members met and adopted the initial resolution to bond the district for \$450,000 for erection of the new high school.

A special referendum election on the bonding of the district has been set for Monday, June 6, in the high school gymnasium in the village.

The approved building, which has the approval of the district's building committee, school board and state department of public instruction, will be of two-story construction and will have a total of 20 rooms.

Included in the Kewaskum Community High school district are the villages of Kewaskum, townships of Kewaskum, Barton, Wayne and Farmington in Washington county, along with the towns of Ashford and Auburn in Fond du Lac county.

Officers of the school district are Melvin Riley, town of Farmington, president; Clifford Stautz, Kewaskum, clerk; Henry Rosenheimer, Kewaskum, treasurer, and Leo Bingen, town of Auburn, and Miss Paula Petri, town of Wayne, directors.

The site for the proposed building has already been selected in the village of Kewaskum.

The official referendum ballot appears on another page of this issue.

MINUTES OF MEETING OF KEWASKUM COMMUNITY HIGH SCHOOL JOINT DISTRICT NO. 2

The meeting was called to order by Melvin Riley, president of the Board of Education.

Mr. Riley then called for nominations for chairman of the meeting. Melvin Riley was nominated by L. N. Peterson.

It was moved by Al Muckerhelde and seconded by Gottlieb Walz to close nominations for chairman. Motion carried.

Mr. Riley introduced Raymond LeVee, architect, who explained the proposed building plans and the location of the building on the site.

The following resolution was then read by the chairman:

RESOLUTION BE IT RESOLVED by the Electors of KEWASKUM COMMUNITY UNION HIGH SCHOOL DISTRICT JOINT NO. 2 OF THE VILLAGE OF KEWASKUM, WASHINGTON COUNTY, KEWASKUM, BARTON, FARMINGTON AND WAYNE TOWNSHIPS, ASHFORD, AUBURN TOWNSHIPS, FOND DU LAC COUNTY, WISCONSIN:

1. That said School District erect and equip a high school building on the site heretofore purchased by the District.

2. That the School Board of said District be and it hereby is authorized and directed to do all things necessary for or incidental to the erecting and equipping of a high school building on the site heretofore purchased by the District including but not by specification limited to: the selection or approval of plans and specifications; the letting of contracts; the retention and payment of professional assistants; the purchase of furniture, fixtures or equipment with or without advertisement for bids; and the approval and payment of contract and other costs in connection with such building.

It was moved by L. N. Peterson and seconded by Fred Spoel to adopt the above resolution as read. Motion was carried unanimously.

It was moved by Al Muckerhelde and seconded by L. N. Peterson to adjourn. Motion carried.

Meeting adjourned. Clifford C. Stautz, Clerk

Polio Vaccination Will Begin in County Tuesday

The Polio Vaccination program for first and second grade children of Washington county will be held next week.

The Salk vaccine will be given at three large clinic centers located at Richfield, Hartford and Barton.

The schedule for the centers is as follows: RICHFIELD—FIRE HALL—TUESDAY, MAY 31, 9:30 a. m. HARTFORD—CITY HALL—WEDNESDAY, JUNE 1, 1:00 p. m. BARTON—PUBLIC SCHOOL—FRIDAY, JUNE 3, 9:30 a. m.

The children from each school in the county will be assigned to a specific center. Parents of the first and second grade children will receive letters through the school or directly from the county nurse's office advising them of the center which their children should attend.

Parents will also receive a second request slip which must be signed if they wish their child to receive the Salk vaccine.

The initial request blank will be disregarded and only children who have a second signed parental request will receive the vaccine.

The signed request must be returned the day of the first injection.

The dates of the second injection will be published at a later time.

The supply of Salk vaccine to be used in Washington county has been obtained from the Parke Davis company.

DEATH OF MRS. EDWARD REMMEL IN MILWAUKEE

Mrs. Helen Remmel, 57, nee Ball, of 1226 W. Wisconsin ave., Milwaukee, died Sunday, May 22, of husband, Edward N. Remmel, is the youngest son of the late Mr. and Mrs. Math. Remmel, former Kewaskum residents.

She is survived by her husband, a daughter, Joyce A. Kampenroer, of Brookfield, her son-in-law, four grandchildren, three nephews, and other relatives.

Funeral services were held Wednesday at 8:30 a. m. from the Zwaska Funeral home, Milwaukee, and at 9 a. m. at St. Leo's church. Burial was in Holy Cross cemetery.

Milk cows in this country at more than 18 million tons of grain and concentrates last year.

Our Police Chief Says:

Drive carefully over this Memorial holiday week end, obey all traffic laws, don't make it a Memorable day for your survivors.

There were 426 bicycle accidents in Wisconsin during 1954.

Chicago Man Killed in Mishap Near Lighthouse

Washington county's sixth traffic death of the year was recorded at 1:12 a. m. Saturday when Frank W. Kramer, 48, of Chicago was instantly killed when a car driven by Gerald C. Huerta, 29, Chicago, left the road, lunged into an embankment and rolled over on a curve about five miles south of Kewaskum on Hwy. 45 near Lighthouse Lanes.

Kramer was riding in the Huerta auto.

Involved in the mishap were two other vehicles when a car owned by Robert Dieringer, R. 3, West Bend and driven by Gordon L. Gorecki, 17, R. 3, West Bend, halted at the scene and was struck by a third vehicle driven by James E. Hoover, 18, of Almond, Wis.

Hurt in the second crash were Dieringer who suffered a head injury and Ellsworth Horne, 19, who sustained head and facial injuries.

Huerta suffered head injuries and shock. Richard M. Kramer, 32, also of Chicago, sustained a back injury. The Chicago group was traveling north on Hwy. 45, enroute to the north country on a fishing trip.

Miss Reiland Bride of Howard Kirchner

Miss Georgiana A. Reiland, daughter of Mr. and Mrs. Jacob Reiland, R. 5, West Bend, became the bride of Howard O. Kirchner, R. 2, Kewaskum, in a service performed by the Rev. Gerhard Kanelless at 1:30 p. m. Saturday, May 14, in St. Lucas Ev. Lutheran church, Kewaskum.

The bride wore a lace and net chapel length gown with a low, round neckline, fitted bodice and long fitted sleeves.

The bride wore a cascade of blue carnations with white ribbon and streamers with tiny white rose buds.

The bride was attended by her sister, Mrs. Virgil Weinreich, as matron of honor. She wore a strapless coral net over taffeta gown which she wore with a lace jacket.

She carried a cascade of blue carnations with white ribbon. Flower girls were Donna Mae Weinreich and Nancy Weiss. They were crowned alike in white net over taffeta and carried baskets of flowers.

The bridegroom was attended by Virgil Weinreich as best man and Jacob Reiland, Jr. as groomsmen. Ushers were Raymond Kirchner, Jr. and Donald Kempf.

A reception was held at the Barton Opera House, following which the couple left on a honeymoon to the western states. They will make their home on R. 2, Kewaskum, where the bridegroom operates a farm.

KINDERGARTEN PUPILS TO REGISTER NEXT THURSDAY

Registration will be held at the Kewaskum Municipal building all day next Thursday, June 2, for children who will enter first and second year kindergarten next fall in the public schools.

Children who will reach the age of four years by Dec. 1, 1955, may register for the morning kindergarten and those who will be five years old by Dec. 1 can register for the afternoon kindergarten.

Mr. and Mrs. Marvin Schaefer and family, Ray Casper and son spent Sunday with Mrs. Bertha Casper at Waukesha at the home of Mr. and Mrs. Rudy Casper.

The event was the birthday of Mrs. Casper.

Mr. and Mrs. Clifford Stautz spent the week end at Madison with their son Floyd, a student there, and attended the annual parents week end festivities. They viewed ROTC units as they participated in the Armed Forces Day parade and several other festivities.

Landmanns Feted On 50th Wedding

Dr. and Mrs. G. A. Landmann of Scotland, South Dakota, celebrated their fiftieth wedding anniversary Saturday and Sunday, when members of their family were present for the happy occasion.

Dr. Landmann was born in Scotland, a member of one of the prominent pioneer families. He attended school there and graduated in medicine from the University of Illinois. He practiced in Parkston, S. D. for three years and then went to Milwaukee where he was on the faculty of the medical school at Marquette university. It is interesting to note that a son, Dr. G. A. Landmann, Jr., attended medical school at that same university. He and Mrs. Landmann moved to Scotland in 1912. Mrs. Landmann was born in Kewaskum, attended high school in West Bend, and later, Milwaukee Downer. Upon the completion of school she traveled in Europe with her parents. The Landmanns were married in Kewaskum.

There are three children in the family, Paul, who lives in Kewaskum, Ruth, Mrs. Wm. Frost, of Stillwater, Minn., and Gustave, Jr., a doctor in Tomah, Wis. There are eleven grandchildren in the family.

Dr. Landmann was mayor of Scotland for nineteen years and it was during his term of office that the fine city hall was built. It was largely through his influence that Lake Henry was formed just a mile east of town, which has proved such a boon to fishermen, picnickers, and swimmers. He gave part of the land where the lake is located. He has always been interested in civic affairs and has been prominent in Republican organizations in the county and state. He has been commander of the American Legion on several occasions. He enlisted in World War I and was a captain in the Medical Corps. He has been a prominent Mason and has been especially active in movements for the preservation of wild life in the state.

Mrs. Landmann also has been prominent in many organizations. She has headed the American Legion Auxiliary, the P.E.O. Sisterhood, the Eastern Star, and the Woman's Civic club. She was president of that organization when the city hall kitchen was equipped and through her efforts a great many of the kitchen utensils were donated by her father who has an aluminum factory in Kewaskum at that time. Her special interest has always been on our youth and providing better and more facilities for the betterment of youth. The Landmanns have been active members of the Presbyterian church for a great many years.

Saturday evening they gave a dinner for members of the family and close friends in the dining room of the Presbyterian church. The tables were most attractive with flowers given by friends and organizations, as well as with decorations and favors carrying out the golden wedding theme. The dinner was prepared and served by women of the church. After the dinner, with Paul Landmann acting as toastmaster, the children and family members paid tribute to the honorees.

Sunday afternoon open house was held at the church from two-thirty until five when many friends, made during the years, called. In addition to a host of Scotland friends, others were present from Menno, Tyndall, Mitchell, Yankton, and Norfolk, Nebraska. Again the women of the church prepared and served the dainty refreshments. The dining room was decorated by members of the American Legion Auxiliary. Mrs. Paul Landmann, a daughter-in-law, and Mrs. Wm. Frost, the daughter, poured, while Mrs. G. A. Landmann, Jr., was in charge of the guest book.

Present from a distance were the children in the family and Miss Lillie Schlosser of Kewaskum who was a bridesmaid at the wedding fifty years ago. Also present were Maurice Rosenheimer, a brother of Mrs. Landmann's, Mrs. A. Clark, a lifetime friend, both from Kewaskum, and Mr. and Mrs. N. G. Bender of Sutton, Nebraska, she being a sister of Dr. Landmann's; Miss Landmann's.

43 to Graduate at High School Exercises June 2

Forty-three members of the 1955 senior class of Kewaskum Community High school will receive their diplomas at graduation exercises to be held next Thursday, June 2, at 8 p. m. at the Kewaskum theatre. A class of eighth grade graduates from the Kewaskum Public schools will also receive their diplomas.

The two top scholastic students in the senior class are Richard Wesenberg, valedictorian, and Norbert Rosbeck, salutatorian.

Pre-graduation activities of the class included the annual senior trip to Chicago last week Monday and the annual banquet at the Republican Hotel next Tuesday.

Following is the commencement program to be given:

Invocation—'Pomp and Circumstance.' Invocation—Rev. F. Rodenbeck. 'Sounds from the Hudson,' trumpet solo—Richard Wesenberg. Theme, 'Youth Builds the Nation'—Narrations by Valedictorian Richard Wesenberg, Salutatorian Norbert Rosbeck, Gladys Becker and Lynn Peterson.

'Now The Day Is Over' and 'Now Thank We All Our God' mixed quartet—Gladys Becker, Joanne Ferber, Thomas Tassar and Mark Rosenheimer.

Presentation of Awards and Presentation of Class of 1955—Principal Clifford M. Rose.

Presentation of Diplomas—Melvin Riley, president, Board of Education.

Class Song—Class of 1955. Benediction—Rev. F. Rodenbeck. Recessional—'Pomp and Circumstance.'

CLASS ROLL

Darlene Mary Backhaus, Gladys Ruth Becker, Mary Margaret Blingen, Mary Ann Breit, Katherine G. Braun, Fred E. Domann, Charles E. Dreher, Richard M. Dreher, Joanne M. Ferber, Harold D. J. Gilford, Roland A. Glass, Rosella Gross, Gerald J. Guidan, Ira W. Heener, Eugene G. Herriges, Harlan E. Horne, Mary Jane Hron, Harold G. Klein, Walter C. Koepke, Robert Wayne Kough, Kathleen Krell, Roger Arnold Kumrow.

James Stuart Landmann, William F. Meyer, Jerome A. Nigh, F. Loy Peterson, Norbert R. Rosbeck, Mark David Rosenheimer, Marlene J. Sauter, Gerald J. Schacht, Rita Margaret Schladweiler, Reuben R. Schultz, William O. Seefeldt, Robert F. Sippel, Barnabas J. Sirentny, John W. Spartz, Shirley V. Staehler, Rosemary E. Struening, Thomas L. Tassar, Donna Mae Votter, Norman L. Walz, Richard Lee Wesenberg, Thomas Jerome Zalewski.

HARRY SCHAEFER GETS JOB AS SEWAGE PLANT OPERATOR

The position of operator of Kewaskum's newly erected sewage plant on the Kewaskum hill has been awarded to Harry J. Schaefer by the village board.

There were 11 applications for the job and the village board interviewed each of the applicants before engaging an operator. The application of Schaefer was approved by the board at a meeting held Tuesday evening and announcement that he had been awarded the position was made on Wednesday.

Schaefer, who also serves as chief of the Kewaskum Fire Department, was formerly in the garage business with his brother Carl. The business was sold recently.

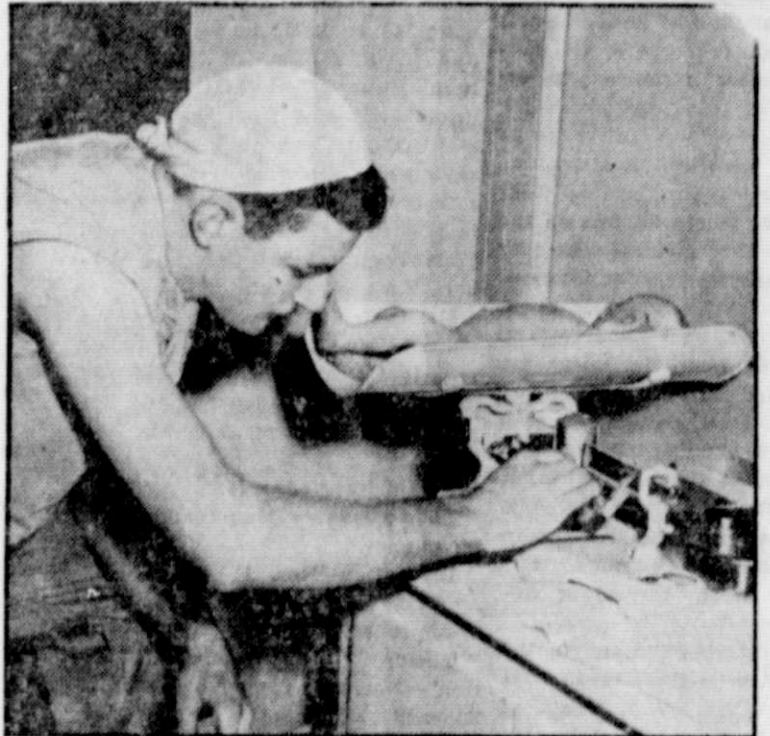

FIREMEN ARE CALLED BUT SERVICES ARE NOT NEEDED

The Kewaskum firemen received a call at 7:30 p. m. Monday to the overhead bridge just north of the village. A resident was burning rubbish under the bridge and evidently some motorist saw the flame and smoke and turned in an alarm. The services of the fire department were not needed.

Frieda Landmann of San Diego, another sister, Mr. and Mrs. Fredrick Bender, also of Sutton, and Dr. and Mrs. Paul Landmann of Joliet, Ill. He is a brother of Dr. Landmann's.

April 12, 1955—Long-hoped-for favorable report on Salk polio vaccine is handed to the press at University of Michigan.

WEIGH-IN—Hospital Corpsman Wendell Pugh, of Western Springs, W. Va., weighs in a new arrival at the National Naval Medical Center, Bethesda, Md. One of four corpsmen assigned to infant care for Navy dependents, the landlocked sailor enjoys keeping everything shipshape for the little tars and Waves to-be.

Microscopes and Rice

After more than 250,000 hand cross-pollinations of various Asian rice varieties, international scientists have obtained hybrid seeds which may as much as double the yield of rice fields in the Far East. This vast agricultural experiment is being conducted in Cuttack, India, by several Asian governments with the technical assistance of the Food and Agriculture Organization (FAO), a United Nations specialized agency. The Cuttack scientists and technicians, such as the one shown above making a microscopic examination of some rice hybrids, worked with eight Japanese and 33 other varieties of rice from 10 countries of South and East Asia. Rice is the basic food of more than half of the world's population today, FAO reports.

Ten Years Old

CHARTER OF THE UNITED NATIONS

WE THE PEOPLES OF THE UNITED NATIONS DETERMINED

to save succeeding generations from the scourge of war, which twice in our lifetime has brought untold sorrow to mankind, and to reaffirm faith in fundamental human rights, in the dignity and worth of the human person, in the equal rights of men and women and of nations large and small, and to establish conditions under which justice and respect for the obligations arising from treaties and other sources of international law can be maintained, and to promote social progress and better standards of life in larger freedom.

AND FOR THESE ENDS

to practice tolerance and live together in peace with one another as good neighbors, and to unite our strength to maintain international peace and security, and to ensure, by the acceptance of principles and the institution of methods, that armed force shall not be used, save in the common interest, and to employ international machinery for the promotion of the economic and social advancement of all peoples.

HAVE RESOLVED TO COMBINE OUR EFFORTS TO ACCOMPLISH THESE AIMS.

Accordingly, our respective Governments, through representatives assembled in the city of San Francisco, who have exhibited their full powers found to be in good and valid form, have agreed to the present Charter of the United Nations and do hereby give it the force of international law and to authorize the present Charter to be known as the United Nations Charter.

Ten years ago this coming June, "We the peoples of the United Nations" determined to save succeeding generations from the scourge of war, set forth in the United Nations Charter their hopes for a permanent world peace. This June, between the 26th and the 28th, representatives of the 60 Member States of the United Nations will gather in the city of San Francisco to rededicate the faith of their peoples in the Charter's principles.

Let Experts Care For Trees

Your trees are valuable. Specimen shade trees are valued at \$5 per square inch of trunk cross section at breast height. This makes a perfect shade tree with a trunk diameter of 10 inches worth about \$400, according to the National Arborist Association. The association urges proper care and protection of all good trees as valuable assets.

Periodical examination and care of trees by a local tree expert not only conserve their values, but will extend the life of the trees for many years, insuring cooling shade and ornamental beauty on the home grounds. A good tree expert or professional arborist is far less costly than an amateur or inexperienced tree man who may damage the trees.

Here's how you select a reliable tree expert in your area.

1. Select a company with a local reputation, in your own community preferably, at least in your general area.
2. Determine the arborist's competence by his local reputation and the homes or communities or industrial companies he has served.
3. Does he have professional status, as shown by his professional affiliations, and by his experience?
4. To be a good tree "diagnostician," the arborist should have sound knowledge of plant pathology, entomology, soils and botany.
5. A reputable arborist will have insurance that protects both your property, as well as his employees while he is working for you.

Many home owners have contracts with responsible arborists, or tree experts, who prune, spray, feed and otherwise care for the trees on an annual basis, thus avoiding the personal dangers of pruning high trees without the proper equipment, and having the advantages of efficient tree feeding and heavy spraying equipment too costly for the individual owner to purchase.

USE WANT ADS

STRICTLY FRESH

FELLOW we heard of had to pay tax on the fee his wife received for turning him in as a smuggler. Internal Revenue boys ruled it was earned income. That's enough to tax a man's impulse to murder.

Gardeners who are looking forward to a crop of flowers just like those pictured on the seed packets often harvest a crop of disappointment.

Stretching a coincidence to the breaking point is the amount of lemon in relation to the total

amount of lemonade sold by small boys from their sidewalk stands.

The fellow who used to ride in the rumble seat with his best girl has advanced to the grumble seat behind the wheel.

Man across the desk from us has gone down for the third time in the office baseball pool. He'll revive from his no-gambling pledge just in time to drown once more in the first football pools next fall.

Former President's Wife Aids Deaf

Mrs. Calvin Coolidge is now leading a national effort to raise \$3,000,000 for the Clarke School for the Deaf. Mrs. Coolidge once taught in this school, and former President Calvin Coolidge served as a member of the Board for thirteen years.

It is the oldest residential school in the United States teaching lip-reading and speech to deaf children, and serves as a training cen-

ter for teachers who do both research and teach the deaf.

Mrs. Coolidge hopes that through this national effort people of the United States will be better acquainted with the problem of deafness and with the education of the deaf. She believes that schools, such as the Clarke School, prevent deaf people from being doomed to a life of silence, isolated from communication. (Mrs. Coolidge, who graduated from the school's teacher-training program, had been teaching at

Clarke for three years when she met Calvin Coolidge and married him, fifty years ago this October.)

A Western auto dealer, while sitting around waiting for his allotment of new cars, likes to remember a certain occasion, not so many years ago, when he sold two cars to the same man in one day—and made immediate delivery.

His customer was an Indian suddenly grown rich from oil which

had spouted on his land.

The Indian bought a high-powered car, and with a gallon of gin in the front seat, fared forth to see the world. In about an hour, he came back, bleeding and bruised, ready to buy another car.

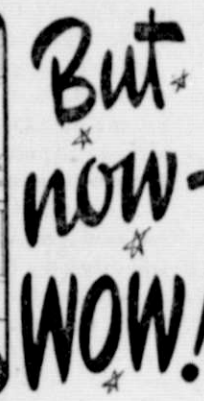

"For Heaven's sake, what happened?" the dealer inquired.

"Down the road a piece," said the Red Man, "fences come fast. Telephone poles come fast. Soon bridge come down the road and I turn to let go by. Need new car."

Keep Basement Dry

It is possible to have dry basements without sewers. If you do not have enough natural drainage to drain the water from the basement floor level, you will have to use an electric sump pump.

Build a cement sump in the basement floor, with the drains from the foundation running into it. The sump should be 18" to 24" in diameter, and about 30" deep.

Another way of stating the size: It should be large enough to hold the water coming in from the drain until the sump pump can take it away. If the down spouts drain directly into the dry well as illustrated, the sizes as stated above should be large enough for the ordinary home.

Install an automatic electric sump pump with the outlet draining into underground sewer tile outside the house. Whenever the water in the sump rises above a certain level the pump starts working and drains it into the dry well.

A dry well is built somewhat on the order of a cistern, except that it has no bottom. It is also customary to use mortar sparingly in places in the wall, so that water may have as much chance to escape as possible.

The kind of soil determines the size of the dry well necessary. If the soil is sandy, waters seep away quickly. If the soil is clay, water escapes slowly, and a larger dry well is necessary.

It is also possible to run tile from the dry well into a distribu-

tion field the same as for a septic tank.

The dry well should not be so close to the house that water will seep back into the basement. In clay soil it should be 50 feet away from the house. In sandy soil, get it as far away as possible.

If you have enough drainage away from the house, it is often possible to allow the drainage from the sump pump to empty on the surface of the ground, and eliminate the dry well.

Grover Cleveland A Great Leader

The only President who was ever elected, then defeated and then elected again was Grover Cleveland. Cleveland, a Democrat, was born in Caldwell, New Jersey, on March 18, 1837.

In many ways Cleveland's administrations were the most memorable of his era. In the first place, he was the first Democratic President elected after the Civil War. Secondly, there was great controversy about his defeat in his second campaign, for reelection to another four year term, he was elected, although Benjamin Harrison was officially found to be the winner in that 1888 campaign.

Four years later, in 1892, he again ran against Harrison and this time he was victorious. Cleveland's administrations were the first for some time in which any success was realized by the Democrats in their effort to lower tariffs. As President, Cleveland was an effective leader, as he had been as Governor of the State of New York and as mayor of Buffalo—where his city administration attracted national attention.

Strangely enough, Cleveland left the office thinking he was the most unpopular man in the country. He had opposed the proposals of silver advocates, including William Jennings Bryan, and even in his own party there were many who held heated opinions about him.

In time, however, his actions and philosophy became more and more respected and President William Howard Taft, a Republican, said this about Cleveland, in 1912:

"... He was a great President, not because he was a lawyer, not because he was a brilliant orator, not because he was a statesman of profound learning, but because he was a patriot with the highest sense of public duty, because he was a statesman of clear perception, of utmost courage of his convictions, and of great plainness of speech, because he was a man of high character, a father and husband of the best type..."

DRIVER NOT SO GOOD.

South Gate, Cal.—Recently finishing an automobile driving course, Mrs. Alicia Borrego, 46, took her brother's new car for a trial run. She stepped on what she thought was the brake. The car leaped forward and snapped off a fire hydrant. The spouting water undermined the pavement and the car sank into the street.

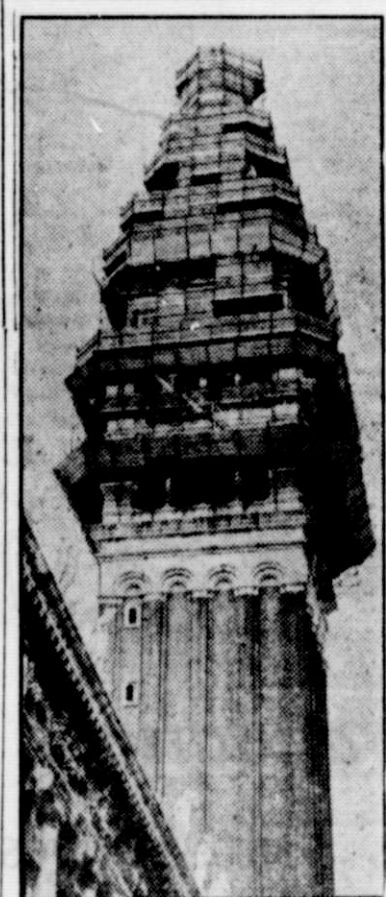

Chance to Vent His Rage

Sarah Anne's COOKING CLASS

Everybody's Favorite

Breathes there a man, with soul so bred, who never to his wife hath said: "I Want a Lemon Pie Like Mom Used To Make!"

Action is the best reply... action quietly engaged in. But when you bake him a pie, make it the modern way with packaged lemon pudding and pie filling mix. Then its texture will be smooth, its flavor rich and tangy. And you'll be sure of it, because, like the modern automobile, which he favors over the horse n' buggy, its formula and production are standardized by science to give the best possible results.

Simply follow the package directions, adding sugar, water and egg yolks, saving the egg whites for the meringue. An added hint—spread the meringue to the edge of the pie, all 'round, to prevent shrinkage. "I'm Glad You Like My Lemon Pie!" will be your demure response when he passes his plate for a third serving.

Lemon Meringue Pie

- 1 package lemon pudding and pie filling mix
 - 1/2 cup sugar
 - 2 egg whites
 - 2 cups water
 - 2 egg yolks
 - 1 baked 8 or 9-inch pie shell
 - 4 tablespoons sugar
- Combine pie filling mix, 1/2 cup sugar and 1/4 cup of the water in saucepan. Add egg yolks and blend well. Then add remaining 1 1/4 cups water. Cook and stir until mixture comes to a full boil and is thickened—about 5 minutes. Remove from heat. Cool only about 5 minutes, stirring once or twice. Pour into pie shell.
- Beat egg whites until foamy throughout. Add 4 tablespoons sugar, 2 tablespoons at a time, beating after each addition until sugar is blended. Then continue beating until meringue will stand in peaks. Spread over pie filling. Bake in hot oven (425°F.) 5 to 10 minutes, or until meringue is delicately browned.

Each recipe you'll want to try. That's the kind of pies we're writing about. They're from a collection of fine recipes that have been favorites for years.

Lemon Pie

- 1/2 cup flour
 - 1/3 cup cornstarch
 - 1/2 cup sugar
 - 1 1/2 cups boiling water
 - 3 beaten egg yolks
 - 1/2 cup sugar
 - 1/3 cup lemon juice
 - 1 teaspoon grated lemon rind
 - 2 tablespoons butter
 - 1 egg white beaten
- Mix flour, cornstarch, 1/2 cup sugar, and a pinch of salt. Slowly add water, cook in a double boiler until thick. Beat yolks with 1/2 cup sugar, add lemon juice and rind. Add a little hot mixture to eggs, stir into hot mixture. Cook 2 minutes. Add butter. Cool slightly and fold in well beaten egg white. Pour into a 9 inch baked shell, cool until firm. Top with meringue.

Meringue

- 1/2 cup sugar
 - Pinch of salt
 - 1/4 cup water
 - 1/8 teaspoon cream of tartar
 - 2 egg whites stiffly beaten
- Cook sugar, salt, water and cream of tartar to thread stage (236 degrees). Gradually pour over well beaten egg whites, beating constantly. Add a little grated lemon rind. Spread over pie. Bake in an oven 425 degrees for 4 1/2 minutes.

Maple Chiffon Pie

- 1 tablespoon unflavored gelatin
 - 2 tablespoons cold water
 - 1/2 cup milk
 - 1/2 cup maple syrup
 - 1/8 teaspoon salt
 - 2 beaten egg yolks
 - 1/3 cup nuts chopped
 - 1 teaspoon vanilla
 - 1 cup whipping cream
 - 2 egg whites stiffly beaten
 - 1 9-inch baked pastry shell
- Soften gelatin in cold water. Combine milk, syrup, and salt in top of double boiler. Heat to scalding. Slowly add a little hot mixture to beaten egg yolks, stir into hot mixture. Cook over hot water until it coats the spoon. Remove from heat, add gelatin, stir until dissolved. Chill until partially set. Fold nuts and vanilla into 3/4 cup cream whipped. Fold egg whites, then whipped cream into gelatin mixture. Pour into pastry shell. Chill. Garnish with remaining cream, whipped.

Chocolate Chiffon Pie

- 2 1-ounce squares unsweetened chocolate melted
 - 1/2 cup hot double-strength coffee
 - 1 tablespoon gelatin unflavored
 - 1/4 cup cold water
 - 3 egg yolks beaten
 - 1/2 cup sugar
 - 1/4 teaspoon salt
 - 1 teaspoon vanilla
 - 1/2 cup sugar
 - 3 egg whites stiffly beaten
 - 1 9-inch baked pastry shell
- Add hot coffee to melted choco-

late. Soften gelatin in cold water, and stir until gelatin dissolves. Add 1/2 cup sugar to beaten egg yolks. Beat lightly. Add salt and vanilla. Add to chocolate mixture. Cool. Beat 1/2 cup sugar into beaten egg whites. Fold into chocolate mixture. Pour into cooled, baked shell. Chill until firm. Top with whipped cream.

Bride's Pie

- 1 tablespoon unflavored gelatin
 - 1/4 cup cold water
 - 3 egg whites
 - 1 cup cream whipped
 - 1/2 cup sugar
 - 1 teaspoon vanilla
 - 1/4 teaspoon salt
 - Chocolate crumb crust
- Soften gelatin in cold water and dissolve over hot water. Add salt to egg whites and beat until stiff. Fold in sugar gradually. Slowly add dissolved gelatin to egg whites. Fold in whipped cream and vanilla. Pour into chocolate crumb crust and chill. Just before serving garnish with whipped cream if desired.

Chocolate Crumb Crust

- 1/2 cup butter or margarine
 - 1 1/2 cups chocolate wafers
 - 3 tablespoons confectioners sugar
- Combine cream, butter and sugar. Add chocolate wafer crumbs. Butter bottom and sides of pie plate and pat chocolate mixture firmly into bottom and sides of plate. Chill before serving.

Blueberry Pie

- Pastry
 - 2 1/2 cups blueberries fresh or frozen
 - 1 tablespoon flour
 - 1/2 cup sugar
 - 1/8 teaspoon salt
 - 1 teaspoon butter
- Line pie plates with pastry and chill. Clean berries, drain thoroughly. Mix with flour and put in pie plate. Sprinkle with sugar and salt. Dot with butter. Put on top crust. Prick well. Bake 10 minutes in an oven 425 degrees, then reduce to 350 degrees and bake 40 minutes.

Tenth Anniversary

This modified design of the United Nations official emblem will be used by the U.N. Department of Public Information this year to commemorate the tenth anniversary of the United Nations.

"HE HAD THE REACH ON ME!"—Bill Foster puts up an indignant beef during the 37th annual Navy Junior Boxing Finals at the Naval Academy, Annapolis, Md. Timmy Villarreal, no believer in bells nautical or otherwise, keeps poking the long ones although the bout is over with.

MEN WILL BE BOYS—Danish Ambassador to Norway Mathias Wassard, right, and Norwegian minister of commerce Arne Skaug forget the cares of office for a few moments as they try out three-wheel pedal cycles at the Danish Trade Show in Oslo, Norway.

SOUP OR BREAKFAST

QUEEN VICTORIA AND PRINCE ALBERT OPENED THEIR EYES AND RAYS WITH AN INFUSION OF SCOTCH BROTH.

50 MILLION SOUP SIPPERERS CAN'T BE WRONG. PROVINCIAL FRENCHMEN BREAKFAST ON SOUP DU JOUR. VOILA!

'Hot Flashes Stopped' or strikingly relieved

in 63-80% of cases in doctors' tests. If you're miserable from the "hot flashes," and accompanying irritable, restless feelings of "change of life"—you may be suffering unnecessarily! For... in tests by doctors... Lydia Pinkham's Compound and Tablets brought relief from such "functional" caused suffering to 63% and 80% (respectively) of the women tested! Complete or striking relief! Yes! Research has proved these medicines thoroughly modern in action... has shown you where to look for relief from those distressing nervous, "out of sorts" feelings of mid-life "change!" So... get Lydia E. Pinkham's Vegetable Compound—or new, improved Tablets with added iron! (Wonderful, too, for the functional pains of menstrual periods.) It acts through a woman's sympathetic nervous system to relieve distress of these awful "heat waves!"

ELECTION NOTICE

TO THE ELECTORS OF KEWASKUM COMMUNITY UNION HIGH SCHOOL DISTRICT:

NOTICE IS HEREBY GIVEN. That a special election will be held in Kewaskum Community Union High School District Joint No. 2 of the Village of Kewaskum, Washington County, Kewaskum, Barton, Farmington, and Wayne Townships, Washington County, Wisconsin, Ashford, Auburn Townships, Fond du Lac County, Wisconsin on June 6, 1955, for the purpose of submitting to the qualified electors of said school district the proposition set out in full in the form of ballot hereinafter provided:

The following is a facsimile of the official ballot:

OFFICIAL REFERENDUM BALLOT

If you desire to vote for any question, make a cross (X) or other mark in the square after the word "Yes" underneath such question; If you desire to vote against any question, make a cross (x) or other mark in the square after the word "No" underneath such question.

SHALL THE FOLLOWING INITIAL RESOLUTION BE APPROVED:

INITIAL RESOLUTION authorizing \$150,000 general obligation bonds.

BE IT RESOLVED by the District Board of Kewaskum Community Union High School District Joint No. 2 of the Village of Kewaskum, Washington County, Kewaskum, Barton, Farmington, and Wayne Townships, Washington County, Wisconsin, Ashford, Auburn Townships, Fond du Lac County, Wisconsin, that there shall be issued \$150,000 general obligation bonds of said school district for the purpose of erecting and equipping a new high school building in and for said school district. Provided, however, that such bonds shall be issued in such manner that the aggregate indebtedness of said district shall never exceed the constitutional debt limit.

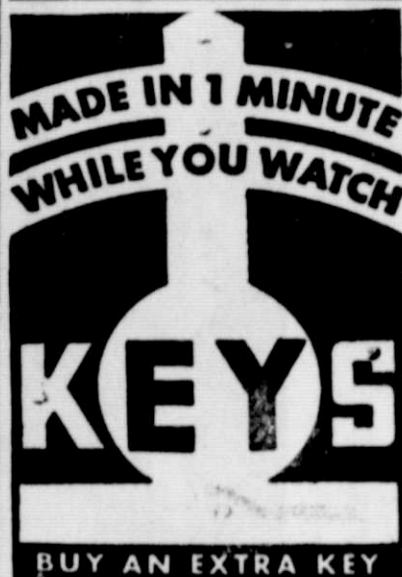

YES NO

Said election will be held at the following polling places: High school gymnasium in the Village of Kewaskum in said district.

The polls at said election will be open at seven o'clock in the forenoon and will be closed at eight o'clock in the afternoon. Dated this 23rd day of May, 1955.

By order of the School Board.

BOTTLE ROUND-UP TIME

Now's the time to corral those empty milk bottles that have wandered off the range. Check your basement and garage. Simply rinse the stray empties and have them ready for your milkman. He'll be glad to pick them up, and you'll gain additional shelf and storage space. Consider the convenience of the glass milk bottle. Nothing to clutter-up your disposal cans... nothing to lug out to the incinerator... nothing to burn. Remember, sterile glass milk bottles are best.

NERVES, JUST NERVES — Many have been lightly told, "Your trouble is nerves, just nerves. That's all." Nerves are too important to be dismissed so easily.

Nerves make possible sight, smell, taste and hearing. Nerves maintain balance and keep the body temperature at 98.6 degrees. Nerves control blood pressure, blood flow, speech and breathing. Nerves make the bowels move. Nerves make it possible to swallow. In fact, there is no function taking place in the body without the control or coordination of the nervous system.

The spine acts as a conduit for nerves. The Chiropractor works with the spine and nerves. His object is to locate and correct nerve trouble that may be causing abnormal function or disease.

TEACUP TOPICS

By BETTY ANN

Trends in fashion this year demand special shopping techniques, says Betty Ann. Many women have discovered that their old habits, buying a skirt and three weeks later, a blouse, simply won't work today.

Elongated lines of the tunics, overblouses and narrow suits make it impossible to coordinate everything unless you have everything right with you.

The makers of the primary items on a women's shopping list, girdles and brassieres, have a few helpful hints on shopping amongst these new, flattering fashions.

The long smooth line, with its more subtle bosom, cannot be fitted over last year's bra and girdles. So if you're looking for the latest, go first to the foundation department and get yourself comfortably and well fitted there.

Then, when hunting for a new suit or dress, wear your new undergarments. You may have been planning to save a pretty long line bra for dressup, but force yourself to wear it when you try on dress-up clothes.

Then choose a slip, or slips, in the same color as your foundation but cut along the new lines. For a fitted, high bosom don't get a slip with bunchy tucks over the bosom.

Then choose stockings. Color is news in hosiery right now, so get it color co-ordinated to your dress or suit. Get shoes and handbag to complement the lines of your suit. If it has a couple fussy details, avoid them on your shoes.

Then the hat. Be sure you try it on with the rest of the ensemble in place. A luscious concoction may look like a wedding cake with your particular suit.

Change of hat for spring? Definitely. New shoes and gloves? Fine idea. Fresh new perfume? Yes, indeed.

How about a change of make-up too? Your complexion changes with the season and you should honor its feminine temperament by dressing it up with a change of face.

If you wear a make-up foundation, pick a new one. Get one somewhat lighter than your winter shade. This creamy base colors, protects and satins your skin. Apply sparingly, a dot here and there. Blend it well. With suits and dresses having lower necks in the warm weather, put it on your neck, all the way down to your collarline, too.

Take off the excess with a blob of cotton, then powder. Your powder should probably be lighter, too. Don't kill the delicate pastel pinks that are so popular by using a deep tan powder shade. Try for something that's as natural as possible.

Several well known manufacturers have made a big to-do over their new lipstick color. What is it? Red. Just plain red. This, of course, is flattering to all hair colors. You may want to try a tube of this exciting new color. But whether you shun it or not, do get a different color from your winter one. It will cheer you up.

The skirt and top designed to go together is a pair of separates that's adored because it solves so many needs in the young wardrobe. Together they serve as a town costume; with other partners, they expand the variety every girl wants for summer. Designers have created many pretty blouse and skirt fashions in fabrics ranging from rayon linens, crisp as lettuce; to orlon and cotton weaves as easy to freshen as a pair of nylons. They're tied together by blending colors and in the details of their styling.

Mayonnaise

2 eggs; 1 1/2 teaspoons salt; 1 1/4 teaspoons dry mustard; 1/2 teaspoon paprika; 2 tablespoons vinegar; 2 tablespoons lemon juice; 2 cups salad oil.

Place the eggs and seasonings into the glass container. At high speed, blend until thoroughly mixed. Stop motor, and with rubber spatula push the ingredients on the sides of the container into the egg mixture. Add lemon juice and start motor at high speed. Move cover to one side and very slowly pour in half the salad oil. Then add vinegar and remainder of oil. Blend again, working ingredients down into processing well with spatula.

Like country style fried steak? Choose round steak that is cut about one-half inch thick and tenderize it by pounding it on both sides with the handle of a heavy knife. Be careful not to break the meat. Toward the last of the pounding, beat in a little flour seasoned with salt and pepper. Brown the steak quickly in a little fat and serve with mashed potatoes and gravy made from the steak pan drippings.

About Your Home

There is still time to plant snowdrops, daffodils, crocus, hyacinths, glories-of-the-snow, scillas and winter aconites but don't put off the planting an unnecessary day because there is a chance stocks will be exhausted and it won't be possible to take advantage of the pleasant weather to do your planting in.

Snowdrops, the earliest to flower, should be planted in a sheltered spot, protected from the wind but open to the sun. Place these bulbs two or three inches apart and one and one half inches in the soil.

The Cloth of Gold crocus follows the snowdrop by a few days. Space crocus two inches apart under a tree or large shrub.

Excelsior, a beautiful lavender blue crocus, opens about two weeks later than the cloth of gold variety. Along with Excelsior comes Gladstone, mammoth yellow striped beauty and snowstorm.

Grape-hyacinths and scillas are grouped together and planted one, to one and one-half inches deep in soil.

Hyacinths are very colorful and have a most delightful scent. They do best when planted below oak, elm, locust and sycamore trees. Big hyacinth bulbs should be planted in groups of three to a dozen and must be covered with four to five inches of loose loam.

No bulb garden is complete without several members of the daffodil family. Plant daffodil bulbs so that the blooms will face the light.

King Alfred is a giant yellow daffodil with a long, fluted trumpet. Innocence blooms in clusters, has white petals and yellow cup centers. Actea has white petals with bright red cup centers. Twink has a double bloom, colored with shades of yellow and orange.

When you start your bulb garden, be sure to plan it so that the different color blooms that best compliment each other are placed to their best advantage.

In Fashion Now

The T-shirt dress is one of the best fashions for the transition to balmy or hot weather. The first appearance of this fashion favorite was made last year about this time in southern France.

This season's variations of the T-shirt dress are numerous. Many take their design from the striped gondolier's shirt for their different good looks. Stripes are the current craze in Europe in everything from pin-striped worsted suits to gay cotton skirts and sundresses.

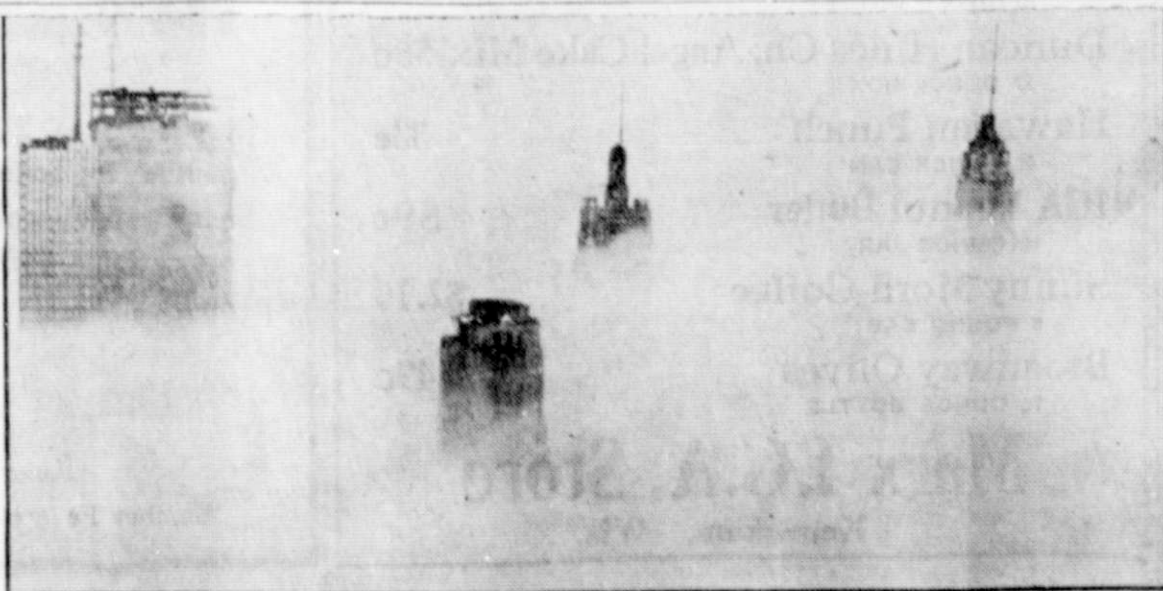

Leather accessories have a new look given them in bright lustrous leathers that come in mist gray, white, avocado, red, coffee, tan, pink and blue. The shoes are flattering and can be worn with all types of clothes, excepting sports clothes. Other accessories include eye-glasses, cigarette cases, key guards, wallets and handbags of all shapes and sizes.

Straw skirts, jackets and accessories have been popular for a number of summers. This summer something new—straw dresses.

They are beautiful, lacey things imported from Italy. The straw lace is as soft as heavy silk and comes in any color you could desire. Most of these dresses are fashioned with a full skirt over a matching slip of silk or silk taffeta. The straight skirt is almost as popular and is quite becoming to the mature figure.

There is an endless choice of brilliant patent shoes and bags. This is an awfully good buy if you are on a budget because the new, better patent leathers wear well and complement many different outfits.

USE THE WANT ADS

CLOUD CITY—Dense fog which rolled in on the wake of a two-day rain hides everyday Chicago, Ill., turns it into a fairytale city of castles in the clouds. Ruined battlements, at left, are in reality upper works of newest addition to the usually Windy City's skyline; the nearby completed Prudential building.

Ham and Chicken Get Along Beautifully in This Casserole

BY DOROTHY MADDOX

BOTH ham and chicken are plentiful and economically priced at this time. So it's the right time to try this tasty combination of the two. It is prepared with economical nonfat dry milk, which provides real milk nourishment without fat. Rich in protein, calcium, riboflavin and lactose, a one-pound package, with a protective foil lining, yields five full quarts of nonfat milk.

Ham and Chicken Casserole (Makes 6 to 8 servings)

One and one-half cups water, 1/2 cup nonfat dry milk, 3 tablespoons flour, 1 teaspoon salt, dash pepper, 1 tablespoon Worcestershire sauce, 1/2 package (1/4 pound sharp process cheese slices, cubed), 2 cups cooked rice (1/2 cup uncooked), 1 cup diced cooked ham, 1 cup diced cooked chicken, 1 1/2 cups cooked lima beans, 1 can (3-ounces) mushrooms, drained; 2 tablespoons diced pimento.

Pour water into top of double boiler. Sprinkle nonfat dry milk powder, flour, salt and pepper over surface; add Worcestershire sauce. Beat with rotary beater until smooth. Add cheese. Cook over hot water, stirring constantly, until slightly thickened. Combine remaining ingredients in 2-quart casserole. Pour cheese sauce over mixture; stir until just blended. Bake in a moderate oven (350 degrees F.), about 30 minutes, or until mixture begins to bubble.

Ham and Baked Beans (Yield: 12 servings)

Four cups (2 pounds) dried beans, cold water, 2 medium onions, sliced; 4 teaspoons salt, 1/2 cup catsup, 1/2 cup unsulphured molasses, 2 tablespoons vinegar, 1/2 teaspoon Tabasco, 2 teaspoons dry mustard, one 4-pound ham shank.

Wash beans. Cover generously with cold water; soak overnight. Add onions and salt. If necessary, add additional water to cover beans; bring to boiling point in covered saucepan. Simmer 1 hour. Drain and save 3 cups bean liquid, adding water to make 3 cups if necessary. Mix bean liquid with catsup, unsulphured molasses, vinegar, Tabasco and dry mustard.

Place ham in pan or large earthenware casserole which can be

Ham and chicken simmer in harmony in this tasty, economical casserole treat for you.

covered. Put beans around ham; add liquid mixture. Bake in slow oven (325 degrees F.) 1 hour and 20 minutes. Uncover; remove ham.

Remove rind from ham, cut into medium size pieces; reserve. Bake beans uncovered 1 hour and 40 minutes longer. Add ham pieces during last 30 minutes of baking.

GAY PANHOLDERS

Let's make some new panholders. Decorative and useful panholders are always welcome and you can make these in a hurry from scraps of material and bits of embroidery. Patterns for the four pairs and the trio of pot holders are included on the multi-stamp Hot Iron Transfer, C9585, 20c. Send orders to: Handcraft Service (The Colonial Company), Journal Pub. Co., Inc., 1243 Swift, Kansas City 16, Mo.

Exchange Program Includes Newsmen

Another group of editors and publishers from foreign countries arrived in the United States early in March and made a thirty-day tour of various parts of the country. The trip was arranged under the International Educational Exchange Program of the Department of State.

The group of editors and publishers referred to arrived on March 4th and came from Chile, Colombia, Guatemala, Mexico, Nicaragua, Panama and Peru. They toured the United States, including such places as New York, Houston, Santa Fe, San Francisco and Wichita.

This group is the first of three such groups which will visit the United States under the auspices of the State Department this year. It takes very little imagination to realize what this tour will mean to these newsmen.

In the first place, they will get a clear idea of the United States customs, traditions and democracy. They saw at first hand the people, the great cities, the great achievements of this country and its amazing versatility. Naturally, as writers, these men will tell this story in the countries mentioned above.

More than any other group of foreign citizens, writers constitute an ideal field in which we can approve international understanding and good will. What they write will be read by millions of Central and South Americans and we North Americans are certainly willing to have our country honestly presented to our neighbors to the South.

With some State Department programs we take issue, but with this International Education Exchange program, we find ourselves in hearty agreement.

Health & Beauty

For the promotion of health, one should take systematic daily exercise. Walking in the fresh air improves the lung capacity and increases the peristaltic movements of the intestines, which helps to overcome constipation. When walking the chest should be held well up to facilitate deep breathing.

Round shoulders and flat chests are ugly and ungainly. They not only make an unpleasant impression on beholders, but they are productive of disease. This posture cramps the lungs and prevents proper breathing. A noted physician says that a "round shouldered person is one who is carrying his chest behind instead of in front of him." He says further that "this deformity not only gives a person a weak and ungraceful appearance but lessens the breathing capacity and leads to inactivity of the upper part of the lungs, thus inviting tuberculosis and other diseases, which arise from the lodgement of germs in the inactive and weakened portions of the lung tissue."

Sitting in a slumped, relaxed position with the chest flat, the shoulders hunched, is conducive to congestion in the abdominal region. The relaxing of the abdominal muscles due to the bad posture above described, tends to cause prolapse of all the viscera including the liver, kidneys and stomach. When one sits erect the chest is elevated, the abdominal muscles are tense and hold the organs in their proper position, allowing the free circulation of blood through the body.

Bad habits in sitting, standing and walking cause congestions which bring on diseases of various sorts and are productive of headaches, backaches, and other distressing symptoms. Improper posture is conducive to indigestion as well as other bodily ills. Many ailments from which so many suffer would vanish if they discontinued their bad habits of carrying their lungs in the back instead of in front, raised their chests, and kept their spines straight.

Bad habits in sitting, standing and walking cause congestions which bring on diseases of various sorts and are productive of headaches, backaches, and other distressing symptoms. Improper posture is conducive to indigestion as well as other bodily ills. Many ailments from which so many suffer would vanish if they discontinued their bad habits of carrying their lungs in the back instead of in front, raised their chests, and kept their spines straight.

SITTING PRETTY—There's no wrinkle to this new wrinkle in travel apparel. It's a skirt with overlapping panel at the back which wearer can unbutton while seated. Inner panel gets the wrinkle treatment, leaving skirt wardrobe-fresh at end of journey. Shown in New York City in this travel flannel, it's also styled in several types of fabric to suit career girls and theatergoers.

Albert Einstein

The death of Albert Einstein removes one of the world's great minds from active participation in human affairs. Without a doubt, Einstein will go down in history as one of the scientific geniuses of America although he was never quite understood by most Americans.

On some occasions the picturesque scientist delved into fields in which he was no expert. For example, he once appealed for the lives of two convicted spies — The Rosenbergs.

He was, in this case, entering a field in which he was not a genius. But in his own world, that of science and mathematics, Einstein was without a peer.

Once he remarked that he was not understood in the beginning and that the people of this country would not understand him when his work was through, and there is some truth in this. His major discoveries, involving relativity, were rejected by many scientists for more than ten years after he made his findings known.

Eventually scientific observations confirmed what he had worked out in his head—the

"All right, Mervin. I'll reconsider your request for a raise!"

Ten Word INTELLIGRAM

Check the correct word:

- (Hungary) (Czechoslovakia) has a new premier.
- He is (Imre Nagy) (Andras Hegedues).
- New England's (textile) (steel) mills were recently hit by a strike.
- Russian editors scheduled to visit U.S. (will) (will not) make the trip.
- Russia is ready to O. K. (Austrian) (German) independence.
- Western powers (must) (may) agree with the terms before she is free.
- The Grand Canyon is a (national park) (monument) (both).
- It is located in (Arizona) (Colorado).
- It (is) (is not) the largest area under National Park Service supervision.
- Grand Canyon's spectacular formations are a result of (earthquakes) (erosion).

Count 10 for each correct choice. A score of 8-20 is poor; 30-60, average; 70-80, superior, and 90-100, very superior

Decoded Intelligram

1—Hungary; 2—Andras Hegedues; 3—Textile; 4—Will; 5—Austrian; 6—Must; 7—Both; 8—Arizona; 9—Is not; 10—Erosion.

SPORTS AFIELD

By Ted Kesting

What explains the great fascination the fly rod has for all who learn to use it reasonably well? For one thing, it gives the most sport, the most pleasure—it makes big fish out of little ones. Fly fishing lies between spinning and casting in the amount of skill it requires one to develop. And Jason Lucas, angling editor of Sports Afield magazine, says flatly that fly casting has a far more smooth, pleasing rhythm than any other form of casting. Which brings us to a discussion of where it is effective and where it isn't.

Trout—Fly fishing is the traditional method of taking trout in streams and small rivers. But very big trout, generally found in larger rivers, take flies rarely, and to be at all successful you must use lures with spinning or casting tackle. In a lake fly fishing for trout is usually of doubtful value, or useless.

Northern bass — On the average lake in the northern part of the country, taken the season through, the fly rod can't be called at all successful for bass. However, it may work fine in the early part of the season, and very late in the day until late midsum-

mer; in fall it's poor indeed. In the usual northern smallmouth stream, most of the time fly-rod fishing is likely to hook as many good-sized fish as any other method.

Southern bass differ from northern in one respect: in the typical river or natural lakes of the deep South, bass are much more inclined to surface and shallow feeding. This makes fly-rod fishing for them successful a far greater percentage of the time.

Bluegills — There is no other fish in the country for which fly fishing is so superior to other methods; it will invariably catch more bluegills than will live bait, and especially more of the larger ones.

Walleyes — In some shallower rivers these can be taken successfully on a fly rod, with streamers or such. But usually fly-rod fishing for walleyes is very poor.

Eastern Pickerel — A long streamer (my preference is usually white) seems to take these very well. A shiny metal fly-rod lure is better, but disagreeable to cast.

Pike and Musky — Smaller pike can be caught by the same methods used for pickerel. Larger pike and musky can be taken on fly rods — but it's a stunt.

Carp — Carp seldom take artificial bait of any kind. But when other fishing is dull, knead a wet piece of bread into a dough-ball, put it on a small hook with a fine leader, and let it rest on the bottom. Carp on light fly tackle will put up a terrific fight—and it's excellent training and practice for catching large game species.

Just Critics

When paying a visit to George Bernard Shaw, a distinguished visitor expressed surprise that the author had no vase of flowers in his home.

"I thought," he said, "you were exceedingly fond of flowers."

"I am," Shaw retorted abruptly. "I'm very fond of children too. But I don't cut their heads off and stick them in pots all over the house."

Never dip an electric bulb or fluorescent tube in water. If you want to clean the light, remove it from the socket, let cool, sponge the surface with a soapy cloth, and wipe it dry. Be sure the current is off, before the light is replaced.

Needle Becomes Drill

SOMETIMES Mother's sewing kit may be helpful in Dad's workshop.

For instance, if Dad needs a fine drill on short notice, he can make one from a sewing machine needle, according to *American Builder*. He

should grind the needle head off as far as the center of the eye and then file each prong of the tiny fork slightly on the inside.

The pointed end of the needle he will put into the chuck. Since sewing machine needles are made of strong steel, they can be used for this purpose.

THESE WOMEN!

By d'Alessio

"The whole object is to keep the balls out of the two gutters!"

Ticklers

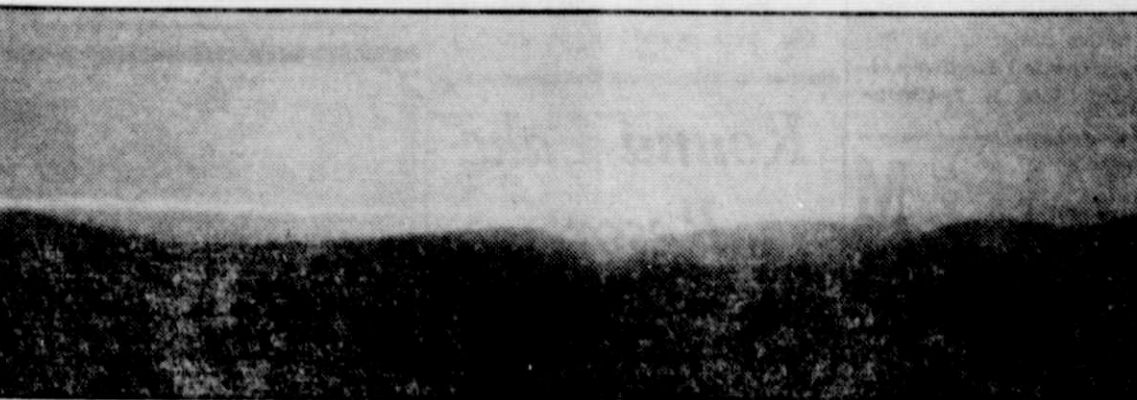

By George

"Maybe I should leave the room so you can get a clear shot, eh, Mr. Davy Crockett?"

REMEMBER THE FIRST ONE?—All the joy of childhood at a first-time treat is mirrored by left to right, Wim, 13, Nellie, 6 and Leendert Hordijk as the trio from the Netherlands taste their first hot dogs. They're shown in Chicago, Ill., where the Hordijk family broke a cross-country journey en route to a new home in California. The Hordijks have been given a farm as a mark of gratitude for sheltering five Jewish refugees from the Nazis during World War II.

UNANGELIC DAWN—Unearthly light of an atomic "sunrise" is captured in this view photographed from Angel's Peak, some 55 miles from the Atomic Energy Commission's test site at Yucca Flat, near Las Vegas, Nev. Nuclear device was detonated atop a 300-foot tower.

A Flying Machine Is Demonstrated

The Navy has come up with what might be a major innovation in the field of aviation. It has demonstrated a flying machine which is actually a round platform, only five or six feet in diameter, and which has no propeller and no rotor blades.

At a distance the platform looks like a saucer, and it is large enough for a man to stand on. The round platform stands on four legs, and has nothing on it except the motor which drives two fans, which are counter-rotating and located just under the floor of the platform.

The principle is simple. The fans suck in air through holes in the platform and thrust it out with great force at the bottom. The two small engines, which power the fans, develop less than one hundred horse-power and the entire platform is so light two men can carry it. The pilot stands in the middle of the platform, and controls the platform by shifting his weight backward and forward, and using the throttle to increase the fans' speed.

The first man to fly the platform was Phil A. Johnston, World War II fighter pilot, who said afterwards that it was so simple he would be glad to let his children fly it.

The flying platform is a revolutionary development in the field of aviation, for it could be that such platforms will partially replace helicopters. The major disadvantage now connected with the flying platform is the problem of a forced landing. As yet no satisfactory forced landing procedure has been developed for the platform, although as long as the two small engines are kept running, there is little danger.

REAL "CHEESECAKE"—Here's a picture which is accurately described by the term, "cheesecake," which photographers apply to photos of attractive young ladies. Janet Garth, 19, of Southampton, England, collects cheese labels from all over the world as a hobby. When not pasting labels, she pastes up bill posters for her father's firm.

Factual News About The Eyes

OPTIC TOPICS

It's estimated that over 65 per cent of the people who have chronic headaches have one eye placed higher up than the other, according to the Better Vision Institute. Between this condition and other visual irregularities, so many headaches are related to seeing troubles that professional eye care is one of the best preventatives.

Approximately 25,000 Americans are completely blind and 150,000 others have lost the sight of one eye as the result of glaucoma, according to the Better Vision Institute. This insidious eye disease accounts for about 11 per cent of all blindness. And yet it can be detected in a standard professional eyesight examination, and can usually be controlled if caught in the early stages.

At least 10 per cent of all grade school children are in need of special reading help, the Better Vision Institute estimates. Without such help, emotional problems as well as school failures are likely to trouble the poor readers. Eyesight specialists can train both children and adults to read efficiently.

Car-Building Kit

A Detroit designer says he will market a car-building kit which will enable the average "Do-it-yourself" American male to put together an automobile for approximately \$3,000.

The car would, of course, be a sports model, and would require some time, but not much further expense other than the \$3,000. The kit model is supposed to have a body of glass and plastic.

The car would be thirty-two inches high and have an 88-inch wheel base, and retractable headlights. It would have a road clearance of five and a half inches and its performance would be outstanding.

Personally we think the car-building kit is a good idea, but we would like to see one on the market which would sell for less than \$3,000, since the average American will spend less than this on his automobile. Moreover, we think there is quite a need for a build-it-yourself helicopter kit. As long as one is going to the trouble of building his method of transportation himself, he might as well build himself a flying machine, while he is at it.

Man in Painesville, O., was shot by his lawn-mower. Seems he was cutting the lawn and the blades of the mower clipped and exploded a .22 cartridge. Bullet hit him in the foot.

Answers To Who Knows

- Former Governor of California Earl C. Warren.
- That he would not consider running for the Presidency under any circumstances.
- Charles Thomas.
- 435.
- Every two years.
- Six years.
- No.
- James F. Byrnes, George C. Marshall and Dean Acheson.
- An estimated 12,700,000.
- On file in the Library of Congress.

Who Knows

- Who is the present Chief Justice of the United States Supreme Court?
- What significant statement did he release recently?
- Who is the present Secretary of the Navy?
- How many Representatives are there in the House of Congress?
- How often are Representatives to Congress elected?
- What is the term of office for a U. S. Senator?
- Does the District of Columbia have a representative in Congress?
- What three men last held the office of Secretary of State before John Foster Dulles?
- How many people were jobless in 1933?
- Where is the country's largest collection of comic books? (See Answers at Bottom of Page.)

Sports Quiz

- Who is Ed Furgol?
- Who won the recent Masters Tournament?
- Who won the Greensboro Open?
- What club led the National League after the first week of baseball play?
- What Detroit youngster recently hit three homers in one game?

The Answers:

- St. Louis golfer.
- Cary Middlecoff.
- Sam Snead.
- Brooklyn.
- Al Kaline, outfielder.

Behind The Scenes in American Business

By Reynolds Knight

Corporation profits, judging by the reports which have been made public so far this month rose in the first quarter of 1955 to a level 5 per cent above those of first-quarter 1954. If all corporations do as well as those which have reported, total earnings will be close to \$36.5 billion this year.

The average American is not much inclined to dance for joy whenever he hears that corporations are flourishing. Most of us don't keep in mind that corporations can do well only when everyone else is doing well too. In fact, the corporation's own treasury is served last from the national pie, when corporations show wide year-to-year gains, the rest of us are almost sure to show wider ones.

For example, the gain in the corporations' slice this year figures to be \$1.5 billion. The Council of Economic Advisers has just reported that the whole economy promises to gain \$7 billion. That would mean a gross national product of \$369 billion in 1955.

In the first quarter, construction and consumer buying of durables were the big gainers. The rise came in spite of the fact that government spending was slightly off.

STREAMLINED LIVING — Out in Chicago last week the National Packaging Exposition, biggest event of its kind, saw the launching of a campaign to promote the packaging of paste-like foods in fold-up metal tubes.

To get the drive rolling the Collapsible Tube Manufacturers Council distributed thousands of one-ounce tubes of jelly to thousands of packaging experts who were on hand to make sure they weren't missing any ways to get their products into the consumer's food in metal tubes—fish and market basket.

meat pastes, caviar, cheese spreads, honey, catsup, mustard, mayonnaise, even cream cheese, butter and coffee cream—have long been popular in Europe.

"There definitely is a place in the streamlined American way of living for foods in tubes," said Lester B. Platt, executive secretary of the Council. "In this type of packaging the foods would be ideal for making canapes and hors d'oeuvres, for school and work lunch boxes, and for picnics, hiking and camping."

THINGS TO COME — A prefabricated aluminum airport, for protecting the cars of visitors to industrial plants' parking lots, will sustain a load of two tons of snow if the visitor stays that long. . . Pills that melt, flavoring and carbonating water at the same time, are being tested in California. . . A transparent plastic box, for buttons, fishing flies, nuts, screws and bolts, or anything else that one would have to rummage for blindly, is offered by a Wisconsin firm. . . A terry cloth beach bag in a wrought iron frame will appear on New York beaches this summer. . . A new glass percolator's mechanism lifts out with the grounds and leaves the container to be used for serving. . . Home elevators, which once required expensive rewiring of one's home, can now be had to run on house current.

PROFITABLE PACKING — Production of vegetables for processing last year returned the nation's farmers nearly \$240 million. This was some \$22.3 million more than the average for the ten years 1943-52.

Among the leading vegetable products canned and frozen in '54, reports a leading can company, were corn, tomatoes, asparagus, snap beans, cabbage, and green peas. These and other important vegetable crops that were processed made up a total of 11.6 billion pounds. To grow them required more than 1.6 million acres of land.

In a breakdown of agricultural income from vegetables in 1954, the can making firm said that Northeastern farmers netted about \$44 million; those of the Midwest \$77 million; the Southeast \$27 million and the West \$88 million. Gains over the 10-year average were registered in every section.

BITS O' BUSINESS — Housing starts in the first three months of 1955 were a record 295,000. . . Allowances to dealers, first sign of the customary spring price cuts, are appearing in some markets for light fuel oils. . . Future prices signal that metal dealers expect government stockpiling of metals to continue past June 30, present cut-off date. . . The government will spend \$54 million for tools to make ships' turbines, and put them in standby for any emergency.

The average child is usually bright and promising to his own parents.

Only new Chevrolet Task-Force trucks bring you all these truly modern features! If you don't get these up-to-the-minute advantages, you're getting an old-fashioned truck—and stand to take a licking at trade-in time!

Fresher air in all kinds of weather. New High-Level ventilation takes in air through louvers at cowl level.

New Overdrive. Optional at extra cost on 1/2-ton models; Hydra-Matic optional on 3/4-, 3/4- and 1-ton models.

New concealed safety step. A safety feature—steps stay clear of ice and mud. Out of sight with doors closed.

Tubeless tires standard on 1/2-ton models. Greater blowout protection—they deflate more slowly if punctured.

Power Brakes standard on 2-ton models. An extra-cost option on all others. Reduce driver effort; add to safety.

Power Steering. Driving's so much easier with turning effort reduced as much as 80%. Available as an extra-cost option.

Styling that works for you. In two design treatments—styling that catches the eye, calls attention to your business.

The latest in cab comfort and safety. More durable construction; softer seat action; many new conveniences.

New panoramic windshield. For a broader, safer view of the road. And there's more glass area all around.

New suspension, front and rear. For a smoother ride. Frames are more durable with full parallel side members.

King-size 12-volt electrical system. Count on quicker starts even in cold weather, and still have a husky reserve of power.

Year after year, America's best selling truck!

Come in and see the most modern trucks for any job...
