

Miss Rosenheimer Bride of Saturday

Miss Suzanne Rosenheimer, daughter of Mr. and Mrs. Maurice W. Rosenheimer of Big Cedar lake, became the bride of Burns Robert Nelthorpe, son of Mr. and Mrs. Burns O. Nelthorpe of Wauwatosa, in a 3 o'clock service performed by the Rev. F. L. Rodenbeck in Peace Evangelical and Reformed church, Kewaskum, on Saturday afternoon, July 9. The bride's father is president of the Bank of Kewaskum.

The bride chose a waltz length gown of white silk shantung which was detailed with a seed pearl outlined scoop neckline and a bouffant skirt. Her finger tip veil was held by a plateau hat of satin and seed pearls. She carried a cascade arrangement of white orchids, staphanotis and blue delphinium.

Attending the bride was her sister, Mrs. Jean Kenkel, as matron of honor. She wore a waltz length gown of delphinium blue silk with white organdy folds at the bodice. Her flowers were red roses with staphanotis and blue delphinium.

Thomas Stouthamer acted as best man for Mr. Nelthorpe, while Howard East and Rudolf Petrovski ushered the guests to their places. Linden Inn at Big Cedar lake was the scene for the reception.

The young newlyweds are spending their honeymoon in northern Wisconsin. They will reside in Madison in the fall where both are students at the University of Wisconsin. The bridegroom is a member of Delta Upsilon and his bride is a member of Kappa Kappa Gamma. She graduated from Wayland academy, Beaver Dam, before attending the state university.

BECKER-RASSEL

Now at home on R. 1, Belgium, are Mr. and Mrs. Carl C. Becker newlyweds of Saturday, June 11. Mrs. Becker is the former Miss Marie Rassel, daughter of Nic Rassel of Belgium, and the bridegroom is a son of Mrs. Ella Becker of Kewaskum. They were married at 9 a. m. in St. Nicholas church, Decada, by the Rev. Raymond Winkler.

Given in marriage by her father the bride wore a floor length gown of chantilly lace and nylon tulle over satin, fashioned with lace bodice with nylon tulle yoke and jewel neckline. The full bouffant skirt of nylon tulle was augmented with inserts of lace forming points in the skirt. A seed pearl and iridescent sequin tulle held her fingertip lace edged veil. She wore a rhinestone cross and earrings which were gifts from the bridegroom. Her cascade bouquet of red roses and white carnations were tied with satin ribbon and streamers.

The bride's sister-in-law, Mrs. Raymond Rassel, was matron of honor, wearing a yellow floor length strapless gown of net with lace front and matching lace jacket. Her flowered headpiece matched her gown. The bridegroom's sister-in-law, Mrs. Linus Becker, attended the bride as bridesmaid. She wore an orchid strapless floor length gown the same as that of the matron of honor. Barbara Jean Becker, niece of the bridegroom, was flower girl in a white frock with matching flowered headpiece. All the attendants carried colonial bouquets of carnations and mums.

The bride's mother wore a beige colored dress and a corsage of pink roses and white mums.

The bridegroom was attended by his brother, Linus Becker, as best man and Raymond Rassel, brother of the bride, served as groomsmen. Ushers were Roderic Becker, brother of the groom, and Nic Rassel, Jr., brother of the bride. Ronald Becker, nephew of the groom served as ring bearer. All of the men attendants wore white dinner jackets and dark trousers.

Dinner and supper were served and a reception held at the Badger Club, Random Lake. The couple went on a honeymoon to northern Wisconsin. The bridegroom is employed at the West Bend Aluminum Co.

Our Police Chief Says:

We are receiving complaints that barking dogs are disturbing the slumber of our citizens.

Used Air Compressor Purchased By Village

Regular Meeting June 6, 1955

The Village Board of Kewaskum, Washington County, Wisconsin met in regular monthly session with President C. Miller presiding and all Board members present except Trustee Eberle.

The minutes of the previous meetings were approved as presented.

The following applications for a Combination Class "B" Fermented Malt Beverage and Intoxicating Liquor License were approved upon motion by J. Reigle, seconded by C. Schaefer and duly carried; Walter C. Buzcek, Walter A. Dei, Louis J. Heisler, Sr., William E. Meredith, Althea H. Keller, Roman W. Miller, Walter C. Schneider, Sylvester Serwe, Boyd Smoley and Helen E. Thom.

The installation of a storm sewer on Prospect Ave. between Fond du Lac Ave. and South Street was authorized upon motion by J. Reigle, seconded by J. Stelplflug and duly carried.

The purchase of a used air compressor from Honeck Chevrolet to be installed in the village garage for the price of \$275.00 was approved upon motion by J. Stelplflug, seconded by W. Tessar and duly carried.

Motion by C. Schaefer, seconded by J. Stelplflug and carried that all bills and wages as recommended and approved by the Finance Committee be allowed and paid.

Honeck Chevrolet, gas & repairs \$169.46
A. G. Koch, repairs 3.43
Myron Perschbacher, welding 9.58
Lee Honeck Farm Supply, brooms & shovels 16.10

Electronic Communications Service, install police radios 49.00

F. N. Bohn, bulldozer service 16.50
Art Rainthun, sand 4.20
Roland Pledl, salary for May 265.60

Armin Oppermann, salary for May 269.6
William Martin, salary for May 41.00

Frank Vetter, wages for May 211.60
Milton Struebing, wages for May 192.89

Carl Hafemann, wages for May 103.95
Arnold Garbisch, wages for May 181.23

Adolph Grueschow, wages for May 216.21
Elsie M. Schleit, librarian salary, May 49.50

Mrs. Milton Borchert, ass't librar. salary, May 29.00

THANKS CONTRIBUTORS TO SALVATION ARMY'S APPEAL

L. N. Peterson, chairman of the Kewaskum service unit of the Salvation Army, expressed appreciation this week to the people of this community for the support which they have given to the Salvation Army annual appeal.

Those who have not yet made their contribution may do so by sending their check to our local treasurer, M. W. Rosenheimer, % Bank of Kewaskum.

tiency, courage and devotion.

You can help your local committee to meet emergencies as they exist here in your community by contributing to The Salvation Army appeal, and at the same time support the state-wide rehabilitation program of this wonderful organization.

Monday—5:30, K-M. Lutheran league. Tuesday—7:15 & 8:15, Easy Pitch league. Wednesday—7:30 & 9:00, United Church league. Thursday—8:00, hardball. Friday—7:00 & 8:30, Recreation league.

Register Next Week for 2nd Swimming Lessons

Recreation program swimming lessons will terminate with lessons on Monday, Tuesday and Wednesday mornings. New swimming classes will be organized and will run for three and one-half weeks beginning Monday, July 25. Registration days are Thursday and Friday of next week. The bus will not transport children but they are welcome to join the classes if you want to take them.

Monday p. m.—Puddles practice at 1 girls' softball at 2:30, volleyball for boys and girls at 3:30.

Tuesday—Small Puddles game at 1:15, volleyball and badminton for girls.

Wednesday p. m.—Puddles practice at 1, girls softball at 2:30.

Thursday a. m.—Small Puddles game at 9:30, girls volleyball, at 10:30. p. m.—Puddles practice, handcraft.

Friday a. m.—Girls' softball 9-11, boys' volleyball. p. m.—Puddles practice, quiet games and handcraft.

Picnic Here Is Grand Success; Winners Listed

The annual Firemen and American Legion picnic in Kewaskum Saturday night and Sunday drew large crowds and was one of the most successful held in years. The sponsors made out very well on the event and everyone had a gala time.

Ideal picnic weather helped swell the crowds. Warm, sultry weather Saturday evening resulted in a good crowd filling the park and it was late at night before all of the people left. Another hot day Sunday with a fanning breeze helped jam the park with people throughout the day. The breeze turned cool at night and the crowd left earlier than Saturday night but it again was late before the affair ended.

Sunday's parade again was an excellent one and received much favorable comment as being one of the best held in this area. The streets were jammed all along the line of march. Kewaskum's parade traditionally attracts a host of entrants and spectators and this year's was no exception.

The parade featured numerous beautiful commercial floats, visiting firemen, American Legion and VFW marching units, children's floats and individual entries, the South Milwaukee Municipal and Kewaskum High school bands, scouts, comedy units, firemen's equipment and many other units. The comedy entry that really made a hit and had the people screaming, especially the women who were picked up, was the old time police paddy wagon from Milwaukee. This was manned by a group of cops of the keystone variety with old time music, riotous acts, squirting water and all.

First prize winner in the commercial float division were the Schaefer Oil Co. of West Bend and Germantown. Pretty Elaine Hutson, West Bend High school senior, added to the attractiveness of the float.

Other winners were the floats of Billy's Car Hop and Miller's Furniture of Kewaskum. Outstanding floats were also entered by the town of Trenton 4-H Rangers made by 4-H members of the Newburg area, the Kewaskum 4-Hers and Campbellsport VFW. Winners in the children's division were: 1. Jimmie Casper; 2. Dean and George Martin; 3. (6 tied) Kathy Guttman, Uncle Sam, Red Cross, boys in dusters (horseless carriage), Colleen Fickler, Mary Gruber.

Winners of the big prizes given away Sunday night, on which advance tickets were sold, were the following lucky people:

1. One-half of beef and year's locker service, value \$200—Elmer Moldenhauer, Kewaskum.

2. 7 1/2 h. p. Martin outboard motor, value \$199.50—Mrs. Olga Koch, Kewaskum.

3. Lewyt vacuum and attachments, value \$75—L. M. Schleit, R. 2, Campbellsport.

4. Bridge set, table and chairs, value \$59—"Feet" Miller, West Bend.

5. 3 pieces luggage, value \$25—Wendy Koch, Kewaskum.

6. Electric fry pan, value \$25—Walter Yeska, 2215 W. Tripoli Ave., Milwaukee.

7. Cordless iron, value \$15—Betty Durtelle (?), 3623 W. Villard Ave., Milwaukee.

8. Garden cart, value \$10—Byron Martin, Kewaskum.

9. Groceries, value \$10—P. J. Haug, Kewaskum.

10. Groceries, value \$10—Louis Zahn, 2104 N. Douman, Milwaukee.

11. Groceries, value \$10—Eldon Odickirk, R. 1, Campbellsport.

12. Pen and pencil set, value \$10—Harry J. Lehner, R. 2, Kewaskum.

13. Case of oil, value \$7—Joe Haber, West Bend.

14. Glass rod and reel, value \$7—Morrie Rosenheimer, Kewaskum.

15. Trouble Lite, value \$7—Jean Schaub, Kewaskum.

16. Cash, \$5—Atyissus Voin, R. 2, Kewaskum.

HOSPITAL NEWS

John S. Schaefer, Kewaskum is a patient at St. Joseph's hospital West Bend.

Mrs. Fred De Boe, St. Kilian Native Dies

Mrs. Fred De Boe, 78, nee Katherine Melzer, native of St. Kilian, died at her home in Milwaukee Sunday morning, July 10, following a short illness.

Surviving are her husband and son-in-law, Charles Schiffarth; a sister Julia (Mrs. Paul Schmidt) of Milwaukee; a brother-in-law, Paul Kohler, and sister-in-law, Mary Melzer of St. Kilian, and many nieces and nephews of this community.

Funeral services were held at the Ritter Funeral home, Milwaukee, and burial was in Wisconsin Memorial Park in that city.

The following from this community attended the funeral: Mr. and Mrs. Peter Kohler and family and Frank Kutz, Mr. and Mrs. Wm. Voim and family, Mr. and Mrs. Merlin Volm, Mr. and Mrs. Alvin Volm, Mr. and Mrs. Phillip Volm, Mr. and Mrs. Elroy Schrauth, Mr. and Mrs. Raymond Boegel, Mr. and Mrs. Joe Melzer and family Mr. and Mrs. Adolph Wahlen, Mrs. Mary Melzer, Mr. and Mrs. Ed. Westerman, Mr. and Mrs. Roman Hartmann and daughter, Mr. and Mrs. Donald Miodzik, Mr. and Mrs. Byron Belsbier, Mr. and Mrs. Harold Westerman, and Mr. and Mrs. Cyril Westerman.

A. Schlaefter Graduates from Optometry School

On Sunday, June 26, Anthony A. Schlaefter graduated from Northern Illinois College of Optometry in Chicago and received his Doctor of Optometry degree. He is the son of Mr. and Mrs. Math Schlaefter of Campbellsport.

Anthony attended St. Lawrence High school at Mt. Calvary, Wis and Mary Immaculate seminar in Garrison, New York. Here he had

three years of college work. In November 1948 he enlisted in the Air Force and served at San Antonio, Texas, Washington D. C., Tampa Fla. and Shreveport, La. He was discharged in September, 1952 and started optometry school that same month.

Having had the required two years of college with the necessary credits, he could start the three year optometric course. There were 50 in the graduating class Sunday and they were from all parts of the country.

Anthony is now associated with his father who is practicing optometry in Campbellsport.

Lakes 9 Tips Germantown, Grafton By 7 to 2 Scores

The Kewaskum Chevrolets moved into a tie for second place in the second half standings in the Land o' Lakes league with two decisive victories over the week end. Last Thursday in a night game here the Chev's downed Germantown, 7-2 and on Sunday they repeated their feat with a 7-2 win over Grafton in a tilt played on the Saukville diamond.

John Tessar pitched the night win over Germantown and was opposed by J. Pintor on the mound. Tessar hurled a three-hitter in one of his best performances of the season. He struck out nine and the only thing that got him in hot water was his wildness. He walked 14 batters. The Chev's slammed Pintor for 15 safeties but he passed only one and whiffed eight.

Tessar not only pitched his team to an easy win but also led them in the hitting department with four for five. One of his four bingles was a long triple. Wayland Tessar, Augie Bilgo, Bill Zacho and Floy Dreher each chipped in two hits in the batting spree.

Glen "Hefty" Backhaus was the winner over Grafton Sunday in a game in which he bested M. Zahn. Backhaus held Grafton to seven hits, struck out four, and walked only one. Kewaskum touched Zahn for nine hits but got more of them when they counted. Zahn fanned seven batters but also gave up five bases on balls.

The Chev's have no game this Sunday, playing instead next Thursday night under the lights here against Jackson. This is a league contest and on the following Thursday night, July 28, they meet Campbellsport of the Rock River circuit in an exhibition tilt at home.

Germantown .. 0 0 0 1 0 0 1 1—2
Kewaskum 0 0 0 3 0 0 1 X—7
Grafton 2 1 1 0 0 2 1 0—7
Germantown 1 0 1 0 0 0 0 0—2

LAND O' LAKES STANDINGS (Second Half)

Won Lost
Cedarburg 3 0
Kewaskum 2 1
West Bend 2 1
Mequon 1 1
Saukville 1 1
Jackson 1 2
Port Washington 1 2
Grafton 1 2
Germantown 0 2

Games Sunday—West Bend at Mequon, Cedarburg at Saukville, Port at Germantown.

Game Thursday night—Jackson at Kewaskum.

RIVERS NINE DOWNS ST. KILIAN BY 7-2 SCORE

Young Dave Mertzig pitched and batted the Kewaskum Land o' Lakes team to a 7 to 2 victory over St. Kilian Sunday. The win was Kewaskum's third in four starts.

Mertzig, 15-year-old high school hurler, went the route for the winners, allowing St. Kilian 5 hits. The winners also got 8 hits off of K. Felix, the losing pitcher. Although the hits were even, Mertzig was stingy in the clutches.

Mertzig also paced both teams in batting with 3 hits in 5 trips. W. Koepke chipped in 2. Campagne and pitcher Felix each got 2 for St. Kilian.

This Sunday Kewaskum is scheduled to play Barton at home but the contest may be played at Barton because of a softball game here. St. Kilian goes to Slinger Sunday. West Bend, which is in first place with 4 straight wins, played Newburg Friday night and faces Slinger next Tuesday night.

BIRTHS

GULDAN—A daughter to Mr. and Mrs. Jerome Guldán, Kewaskum, Sunday, July 10.

MARQUARDT—A daughter to Mr. and Mrs. Arthur Marquardt, R. 2, Kewaskum, Monday, July 11.

SCHULZ—A daughter, Jnette Joy, to Mr. and Mrs. Ivan Schulz, R. 1, Cascade, at St. Nicholas hospital, Sheboygan, Saturday, July 7.

Mrs. Schulz is the former Myrdel Pirks of R. 1, Kewaskum. The infant has two brothers.

GESSNER—A son, 9 lbs., 2 oz. to Mr. and Mrs. Byron Gessner, R. 1, Kewaskum, Sunday, July 3, at St. Nicholas hospital, Sheboygan. They also have another son.

Large Military Convoy Passes Through Village

The 123rd Anti-aircraft Artillery Battalion of the Illinois National Guard was routed through Kewaskum last Saturday morning on a military convoy movement from Rock Island, Illinois, to Camp Haven, Wis. The large convoy passed through the village at 10:40 a. m. and was routed on Highway 25.

The convoy consisted of 35 vehicles, including eighteen 2 1/2 ton trucks, thirteen 1/2 ton trucks, three 1/2 ton trucks and one 6 ton truck.

Chief of Police Pled of Kewaskum was requested in advance by Henry W. Larson, assistant adjutant of the battalion, to provide road clearance and an escort through the village for the motor convoy movement.

ICE CREAM SOCIAL

An ice cream social sponsored by the Wayne Youth Fellowship will be held at Wayne Reformed church Sunday, July 24, in the afternoon and evening. Everybody welcome. 7-15-55

Advertise it in the Statesman.

Three Persons Hurt in Three Accidents

Three persons were injured and others shaken up in three traffic accidents, two of which occurred Sunday and one on Wednesday. Two of the mishaps took place in the village.

Leo Barber, 29, of Barton sustained a fractured left leg Sunday afternoon when his motor scooter and a Heilmann Dairy truck driven by Harry Heinecke, 29, Kewaskum, collided on First st. just off of Fond du Lac ave. in the village. The mishap occurred shortly after the parade for the Firemen-Legion picnic. The truck made a right turn on First st. from Fond du Lac ave. and traveled about 25 feet when it struck the front wheel of Barber's motor scooter, which was eastbound on the street. Barber was thrown from the scooter. He was removed to St. Joseph's hospital, West Bend, in the firemen's ambulance for treatment. First st. is partly closed and barricaded due to construction of a new dairy building there.

Mrs. Walter Giese, 26, of R. 2, Kewaskum, suffered an injured right wrist and the Giese baby was shaken up when a car driven by Walter Giese, 30, collided with one driven by Gerald Backus, 18, of Kewaskum at 4:10 p. m. Sunday on Fond du Lac ave. (Highway 45) one block south of the north village limits. Both vehicles were northbound when the Backus car stopped suddenly to turn into a driveway at the Mrs. Selma Backhaus residence. The Giese machine struck the rear of the Backus auto causing the latter car to strike a tree. Property damage to the vehicles was estimated at \$400.

A panel truck owned by the Henry Novelty Co. of Green Bay and driven by Robert Joannes, 39, 515 Cherry st., Green Bay, was extensively damaged in a traffic mishap at 3 p. m. Wednesday on Highway 28, about one-half mile west of Hwy. 45. Joannes was eastbound on 28 when he lost control of his truck due to a defective steering gear and it turned over in a field on the north side of the road. The truck was hauling vending machines and hundreds of pennies were strewn about the scene. Three fence posts and wire owned by Edward Theusch, R. 3, Kewaskum, were damaged. Joannes suffered a laceration to his head and a neck injury. He was treated by a local physician.

Miss Basile Bride of Raymond Kluver

Newlyweds of Saturday, June 25 are Miss Marianne Basile, Milwaukee, and Raymond Clarence Kluver, Kewaskum. The Rev. Albert Gonsler officiated at the 5 p. m. rites at Christ Evangelical and Reformed church, Milwaukee. The bride is a daughter of Mr. and Mrs. Anthony X. Basile, S. Wentworth ave., and the bridegroom is a son of Mrs. Clarence Kluver and the late Mr. Kluver of Kewaskum.

The bride wore a ballerina gown of white Italian silk styled with a portrait neckline. A crown of pearls and sequins held her veil and she carried a bouquet of white carnations and staphanotis.

Miss Pasquale Basile was attendant for her sister and the bridegroom's sister, Miss Elaine Kluver, was bridesmaid. They wore strapless ballerina gowns of orchid and white striped silk organza with matching stoles and headbands with face veils. Bouquets of pink roses completed their ensembles.

Melvin Kluver was best man for his brother. The usher was the bride's brother, Andrew Basile.

The reception was held at Hawthorne Glen, Milwaukee. Mr. and Mrs. Kluver will reside in Appleton.

ICE CREAM SOCIAL

An ice cream social sponsored by the Wayne Youth Fellowship will be held at Wayne Reformed church Sunday, July 24, in the afternoon and evening. Everybody welcome. 7-15-55

Advertise it in the Statesman.

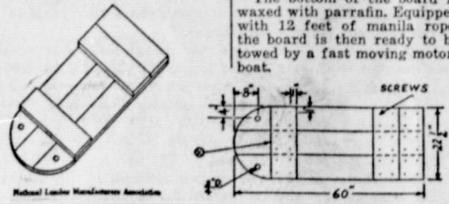

ANTHONY A. SCHLAEFER

HERE'S HOW . . .

MAKE AN AQUAPLANE

Aquaplaning is fun! A broad "plane" for the beginner is easily made of 1-inch lumber preferably light-weight. Three pieces of 1 by 7 1/2-inch lumber are edge glued to form a rectangular slab, 60 inches long and 22 1/2 inches wide. The top pieces, or cleats, are each 1 by 7 1/2 by 22 1/2 inches. Holes are drilled, as shown by the dots in the drawing, for three dozen No. 14, 1 1/4-inch brass, flathead screws to be countersunk. Set the boards in place as shown, and with a nail mark the position of the holes on the bottom boards. Then drill holes 1/4-inch deep

into the bottom boards to accommodate the screws. Using the point "X" midway along the leading edge of the front cleat, draw a semi-circle with pencil and string from one leading corner to the other. Locate the position of the two rope holes as shown in the drawing. These are 3/4-inch in diameter and go through the board. The semi-circular end is then cut with a compass saw. The entire board should be sanded, and it may be painted. The two rear cleats form a foot rest. These may be covered with a thin corrugated rubber mat, cemented in place. The bottom of the board is waxed with paraffin. Equipped with 12 feet of manila rope, the board is then ready to be towed by a fast moving motorboat.

ATLANTIC SALMON
© 1954 National Wildlife Federation

Salmo Salar
Formerly this salmon was one of the most important food and game fishes from Delaware north along the Atlantic Coast. Now it has practically vanished from the waters of the United States. Its disappearance may well be due to a large extent to the pollution of the streams in which it bred, to the erection of dams beyond which it could not go to its breeding spots and to unwise harvest of the crop by men who could profit by taking them. Atlantic salmon have become resident in some lakes and there may be taken by sportsmen acting under practices definitely designed to maintain a supply.

Many Americans have enjoyed vicariously the pleasures of taking these fish by reading about them in the sporting magazines. Henry Van Dyke wrote about them so well that many a fisherman read his stories again and again when the urge to go fishing became almost too great to resist no matter what the law or the weather or the terrain said. Varieties of the fish are mentioned in the literature and include the Sebago Salmon, Landlocked Salmon and Ouananiche. The Atlantic Salmon and the Rainbow Trout both belong to the genus *Salmo*.

From February to June it is the custom of Atlantic Salmon to migrate upstream to spawn. The female lays her eggs in a nest in a riffle where they are fertilized by the male. A forty-pound female may lay from 10,000 to 20,000 eggs but a 20-pound female may also lay as many as 20,000 eggs. About 5 months after the eggs hatch the young fish may reach a length of 3 1/2 inches and be known as "smolt." By the 9th month, they may be 5 inches long and be known as "parr." Fish that have spent a year in the sea may be about 2 feet long and weigh from 3 to 6 pounds. Those that have lived 2 years in the sea may measure 3 feet and weigh about 10 pounds. A

fish that has lived 4 years in the sea may measure to 4 feet and weigh to 74 pounds.

The eggs are heavy and not sticky. With water at 57 degrees F. they may hatch in 22 days and under ideal conditions may at a temperature of 63 degrees F. grow an inch a month for awhile. Young parr feed much as do trout on aquatic insects

but they are more inclined to be bottom feeders.

Sports fishermen commonly take their salmon on artificial flies. The fish are more deliberate about taking flies than are trout ordinarily and because of this the strike is more delayed than that practiced by the trout fisherman. Commonly salmon are taken in waters so clear that the

fish may be seen in the act of taking the bait. Atlantic salmon are still taken commercially in Canadian waters and the fish may be bought for food in some eastern fish markets.

So involved is the task of maintaining a supply of these fishes that it challenges the best in fish managers. Politics, ethics and financial interests are in-

involved, and commercial interests clash with recreation, with carelessness and the fate. The results have not been universally gratifying to the National Wildlife Federation and to other groups interested in the welfare of fish and wildlife.—E. Laurence Palmer.

SANDWICH CUTTING CUES

Sandwiches that are to be wrapped and carried for picnic eating may be cut in as many interesting ways as those to be served for a more formal meal at home. The type of filling to a large degree will determine the way it should be cut. The diagrams below indicate seven ways to cut sliced bread sandwiches and the usual way to cut a sandwich made with hamburger buns. Hold the sandwich together with the thumb and first finger of one hand, then with a very sharp knife in the other hand, cut the sandwich in desired sections. Two or three sandwiches may be stacked and cut all at one time if desired.

Use baker's sliced bread. Take the two slices of bread that lie next to each other in the loaf. Matched slices will assure even edges. Leave crusts on bread to help hold the sandwich together. Butter or margarine should be at room temperature (not melted) before being used. Melted fats soak into the bread and do not form the protective coating needed to prevent moist fillings from soaking into the bread. Use a spatula for spreading soft fillings because the flexibility of the blade makes spreading easier. Spread both butter and filling to the edge of the bread. All sandwiches should be prepared quickly and carefully under sanitary conditions. If they are to be made in advance of use to be stored in a mechanical refrigerator or an icebox, they should not be held for more than twelve hours. In the event that they are to be frozen and held until the picnic day, they may be kept in the

freezing compartment of the refrigerator for as long as a week, or stored in a food freezer for two weeks. Suitable ingredients for frozen sandwiches are peanut butter; egg yolk; grated Bleu or grated processed cheese; sliced or chopped, cooked or canned meat, fish or chicken.

Varieties of breads and of fillings add to the picnic eating interest. Enriched, whole wheat, rye, pumpernickel, Boston Brown bread and the ever popular frankfurter and hamburger buns all lend themselves to picnic carrying and can be made up with fillings to suit any appetite.

For crispness use as accompaniments, sweet or dill pickles, relishes, celery, green peppers, cabbage, carrots or cucumbers.

A picnic isn't a picnic without some form of sandwich—but their varieties are as endless as the miles which picnickers will travel during July—America's favorite Picnic Month.

STRICTLY FRESH

FELLOW in Los Angeles who won \$28,000 on the Irish Sweepstakes says he's going to "eat four times a day." At one Los Angeles restaurant we've heard about, that dough won't last very long.

Long Island Railroad is going to install welded rails on one stretch of its line, eliminating the clackety-clack of the wheels.

What the road really needs is something to eliminate the yackety-yack of the commuters when a fellow's trying to sleep.

Dental technician up for practicing dentistry without a license in Lima, Ohio, really has pull. Got his case postponed. Said he had a dental appointment.

Burlesque's getting breezier in Britain. Fan dancer, called upon by police, was told she wasn't moving her fans fast enough.

Vacationers who get burned to a crisp trying to get a tan are often half-baked in the head.

HERE'S HOW...

DO OUTSIDE PAINTING

Normally a well painted house with wood siding does not need re-painting more often than once in four to six years. Painting too often may result in an unnecessarily thick coat that may crack or peel.

Check the condition of the paint. Dirty paint may be scrubbed with a brush and a mild detergent, then rinsed with a garden hose.

If painting is needed, check first to see if wood parts need to be replaced, repaired or re-nailed. Then, check all cracks or loose knots, and repair with a good wood filler and knot sealer.

Where old paint has cracked or peeled, scrape and sand the loose material. Brush the surface clean after filling and sanding. Coat sanded areas with primer.

The craftsman will need ladders (or scaffolding for over two stories), drop cloths, rags, paint thinner, screening, extra pails for mixing, stirring paddles, scrapers and sandpaper. Brushes 4 1/2 to 5 inches wide are used for large surfaces; and 1 1/2 to 2-inch brushes for trim. Use sash brushes around windows.

For new wood surfaces use a primer first. For old surfaces primers are not necessary except on scraped and sanded areas. See your local building

supply dealer for advice as to the best paints for the job. Apply paint during a dry spell when humidity is low; but not on an extremely hot day. Choose moderate temperature; never below 40 degrees F. Wait until the dew has dried, and work in the shade.

Mix paint thoroughly, dissolving all pigment. Use paint sparingly on the brush—never more than half a brush full at a time. Work the paint into the surface of the wood by stroking back and forth to avoid running and streaking.

Always paint the sash, trim and doors first. If right-handed, start in the upper left corner and stroke to the right, working from top to bottom of the area. Make sure the surface is covered; fill any voids before the paint has dried.

National Lumber Manufacturers Association

DO OUTSIDE PAINTING

Under normal conditions, a house with wood siding does not need painting more often than once every four to six years. Quality paints wear away slowly and they give their best service when they are about five one-thousandths of an inch thick—about as thick as a new dollar bill. Painting too often may result in an unnecessarily thick coat that may crack or peel.

So, the home craftsman should check the condition of the paint. If it is just dirty, it may be scrubbed with a long-handled brush and a mild detergent, and then rinsed thoroughly with a garden hose.

If the house has been neglected, it may be desirable to replace some of the wood parts, especially in areas where moisture may have accumulated. This is the first important step. Next, any loose boards should be securely fastened in place. Then check all cracks and loose knots. Use a wood filler for the cracks and one of the knot sealers available on the market.

Surfaces where old paint has cracked or peeled may be applied evenly. Sanded areas should also be given a coat of primer. After the surface has been filled and sanded, it should be brushed with a stiff dry brush to clean away any loose material.

For difficult jobs, the craftsman should employ a regular house painter—one who is equipped to do the job and who has all the equipment needed for his safety. This is especially true of roof painting. However, for the ordinary outside walls, the

home craftsman should have ladders (scaffolding is recommended for houses over two stories), drop cloths to protect surfaces not to be painted, rags, paint thinner, screening, extra pails for cleaning and mixing, stirring paddles, scrapers and sandpaper. Brushes 4 1/2 to 5 inches wide are needed for large flat surfaces; and 1 1/2 to 2-inch brushes for trim. Use a sash brush for working around windows.

For new wooden surfaces use a good primer and a quality house paint. For old surfaces primers are not necessary except on scraped and sanded areas. Consult your local building supply dealer for the best paints for your job.

Painting should be done during a dry spell when the humidity is low; but do not paint on an extremely hot day, or the paint may blister. Choose a day of moderate temperature; do not paint when the thermometer reads below 40 degrees F. Wait until the dew or early morning moisture has evaporated from the surface, and time your progress to enable you to work in the shade.

House paint should be mixed or stirred until all the pigment has dissolved. Do not allow too much paint to gather on the brush; for large areas the brush should be about half full of paint when the stroke is started. Work the paint into the surface of the wood by stroking back and forth; if paint is applied without working it into the surface, it will run and streak.

When starting a large area, always paint the sash trim and doors first. If right-handed, begin in the upper left corner of the surface and stroke as far to the right as can be comfortably reached, working from the top to the bottom of any one section of the surface before moving on to the next. Make sure all areas are covered; stop occasionally to view your work, and fill in any voids before the paint has dried.

On TV Programs

The television industry has been rocked by several blasts sometime ago. Among them has been a savage lambasting—of one network—by a nationally known entertainment world columnist.

Other criticisms, aimed at the industry as a whole, have been heard also. Many of them are legitimate criticisms. In brief, the major criticism seems to be that one or two of the major networks are not meeting the challenge of the times in regard to television programs, we agree with many critics who feel that the present bill of fare in the field of television often becomes assinine. It is almost as if producers wrote scripts and produced plays on the assumption that they were being shown to morons.

While we have no doubt that there are several million morons who probably watch television, we see no obvious advantage in adjusting the caliber of programs to the lowest intellectual level of viewers. Filmed home-life skits, supposed to be funny and filled in with canned laughter, should be relegated to the junk heap as soon as possible.

Color television, which has been pushed and promoted refreshingly by RCA, which also was a major pioneer in radio, should be brought into being as soon as possible. Innovations, new types of programs and ingenuity should be utilized to a greater extent by the television networks.

Viewers can reward sponsors who offer the public clean, sensible and high-type entertainment by buying their products. They should protest, in letter form, against programs which do not constitute high-type entertainment for reasonably intelligent viewers.

Sarah Anne's COOKING CLASS

Mix 'em yourself ...it's fun!

Come summer, the smart mamma sets up a soda fountain at home, the best of insurance for keeping the small fry in seeing distance and for keeping close tabs on teenagers.

Easy enough to do—tall glasses, straws, iced tea spoons, chilled sparkling water, a variety of syrups and fruits, and plenty of ice cream. Let each one make his own. There will be no need for "Come and get it" bell-ringing!

ICE CREAM SODAS—HOME STYLE

The idea, in general, as to the making is simple. Into a large glass put about 1/2 cup of crushed sweetened fruit—strawberries, raspberries, peaches, apricots, pineapple, or about 1/4 cup syrup—chocolate or maple for example, then two tablespoons of ice cream. Mix the syrup or fruit with the ice cream. Almost fill glass with chilled sparkling water. Stir. Add a scoop or two of ice cream. Add more sparkling water to fill to top of glass.

If you don't believe that steaks and chops are the best sellers, drop into a chophouse one day and see for yourself. The great number of men found there will prove it to you. When you have steak at home, try and have some of the appetizing accessories which are served with them in so many restaurants.

Tomato Crusts
Toast as many slices of bread as you need. Slice tomatoes 1/2 inch thick. Lay a slice of tomato on the untoasted side of the bread and cut around them with a biscuit cutter, so that the toast round will just fit the tomato slice. Dot the tomato slice with salt and pepper and a little sugar. Put under the broiler just before time to serve. Serve with broiled lamb, mutton, chops or calves' liver.

Ground Liver Patties
Pour boiling salted water over beef, or calves' liver and let it simmer just a few minutes. Put the liver through the food chopper. Season with salt and pepper and a little onion juice. Moisten with some of the water in which the liver was simmered and shape into patties. Wrap slice of partially cooked bacon around patties and fasten with toothpicks. Broil under low flames until bacon is crisp.

Deviled Swiss Steak
Mix 1 tablespoon of dry mustard with 1/2 cup flour. Pound into 1 1/2 pounds of 1 inch steak. Season with salt and pepper. Brown on both sides in a little fat. Place on a small roaster and pour over it 1 cup sliced onions, 1 carrot, diced, 1 1/2 cups canned tomatoes, 2 tablespoons Worcestershire sauce and 1 tablespoon brown sugar. Cover. Bake in an oven 325 degrees about 1 1/2 hours.

Baked Lamb Chops
6 lamb chops, cut 1 inch thick
1 cup sliced onions
3 tablespoons shortening
4 cups sliced tomatoes
2 cups sliced cucumbers
2 teaspoons salt
2 cups canned tomatoes
1/2 teaspoon pepper.

Saute the lamb chops on both sides and when brown, place in bottom of a greased baking pan. Pour the drippings over the chops. Saute the onions in the shortening until soft and mix them with the cucumbers and potatoes. Season with salt and pepper. Cover the lamb chops with the vegetables and pour the tomatoes over them. Cover and bake two hours in an oven 400 degrees.

Ham Baked With Fruit
Use a good thick center slice

Add straws and serve. Different flavors of ice cream can be used by way of variation—the choice depending upon the syrup, sauce or crushed fruit used.

TRY FLAVORED SPARKLING BEVERAGES

Cola, root beer or gingerale sodas are good. First, stir a portion of ice cream and beverage together. Then, almost fill with chilled beverage desired. Stir well. Add a large scoop of vanilla ice cream.

FRUIT JUICES ARE GOOD

Fruit juices and nectars may be used in much the same way, though they're really not a true soda. A good one is made by putting a generous scoop of vanilla, pineapple, or lemon ice cream into a glass. Pour ice cold pineapple juice over it. Muddle it just enough to mix the flavors slightly. Add a spoon and gay straws, then more ice cream. This makes a tasty light top-off to a summer meal.

of ham. Place in an oblong baking dish and cover with one medium size can of pineapple, peaches or apricots. Bake in an oven 350 degrees for 1 hour.

Broiled Fillets of Beef
Have slices cut from fillets 2/3 inch thick. Broil 4 to 5 minutes. Serve with parsley gutter.

Parsley Butter
1/4 cup butter
1/2 teaspoon salt
Pepper
1/2 tablespoon chopped parsley
1/4 tablespoon lemon juice
Work butter until creamy and add salt, pepper and parsley. Add lemon juice very slowly.

Veal Cutlets
1 1/2 lbs. veal cutlets cut thick
1 small egg
Bread crumbs
The meat may be cut into pieces or served whole. Season with salt and pepper, dip each piece into well beaten eggs, drain and coat with bread crumbs. Shake off all loose crumbs. Melt and heat a little fat in frying pan and cook the meat golden brown.

Squash Ring
3 cups cooked yellow squash
1/4 cup melted butter
1/4 cup milk
3 eggs well beaten
Salt and pepper
Cayenne
1 tablespoon grated onion
1/4 cup buttered crumbs
Put squash through a coarse sieve before measuring. Add other ingredients. Pack into a 1 quart ring mold. Set in an oven, 350 degrees until firm. Turn into serving dish. Fill with buttered peas, tiny white onions, or cream mushrooms.

Chocolate Custard
2 cups milk
1 square chocolate
3 eggs beaten well
1/2 cup sugar
Dash of salt
Whipped cream
1 tablespoon sherry
Put milk into double boiler, add chocolate. When chocolate is melted and mixture is smooth, add eggs to which the sugar has been added. Add salt. Cook, stirring until mixture coats spoon. Take from heat and add sherry. Serve very cold topped with whipped cream.

When removing hooks from a fish you want to return to water, use dry hands. They grip and hold fish better than wet hands and the small amount of body slime that you remove is soon replaced.—Sports Afield

Lavatory Enclosure
AN ENCLOSURE for a lavatory not only will enhance the appearance of the bathroom but will provide additional storage space.

In the plan illustrated, the inside of the door is faced with a Masonite "Peg-Board" panel. Various items can be stored on it by means of metal hooks and fixtures which fit into the various holes. Both the perforated panel and fixtures are available at lumber yards. The "Peg-Board" panel serves also to keep the enclosure ventilated. Sides and bottom of the cabinet are Masonite Tempered Presdwood, a material which withstands wear and the high humidities of bathrooms.

Around The Town

—Local relatives were among those who attended the funeral of Mrs. Rose Vorpahl Monday at Fond du Lac.

—Miss Leona Nowak of Milwaukee visited last week with Miss Edna Schmidt.

—Mr. and Mrs. Gilbert Seil and son were on a four day trip to Canada, Niagara Falls and other points of interest last week.

—Mr. and Mrs. Curtis Romaine and family of Iowa spent a vacation with his parents, Mr. and Mrs. E. M. Romaine.

—Jim Ryan, Oscar Krueger, Louis Bath, Sr. of here and the latter's son, Brother Labre, of Brookline, Mass. attended the Cincinnati Reds -Braves doubleheader at Milwaukee Sunday.

—Deaconess Alma Buss of Bethesda hospital, Cincinnati, Ohio, is spending an extended vacation with home folks.

—Brother Labre of Maryknoll Novitiate, Brookline, Mass. arrived last Thursday to spend a two and one-half week vacation with his father, Louis Bath, Sr. and wife in the town of Auburn and with relatives and friends in Kewaskum. This is Brother Labre's first visit at home in two years. He will leave again on July 24.

—**HELP WANTED**—Auto mechanic, Ford experience; all benefits, insurance, holidays, etc. Apply Vincent Motors, Ford dealer, Kewaskum, Phone 5X.

—The following from Kewaskum were among the better than 45,000 fortunate persons who had tickets and attended the annual All-Star baseball game at Milwaukee County Stadium Tuesday afternoon between the stars of the National and American leagues: Mr. and Mrs. Killan Honeck, Jr., Mr. and Mrs. Bill Harbeck and daughter Carole, Brother Labre, Miss Arlene Backhaus, Bob Schmidt, Wm. F. Schaefer, Martin Driber and Vic Backhaus, Edward Weddig and daughter Suzie.

—Many former Kewaskum residents came back to spend the week end in the old home town and attend the annual Firemen-Legion picnic here Saturday and Sunday.

—Dr. and Mrs. Charles Ogi and family returned home after spending two weeks at Wooster, Ohio, where they attended the wedding of Mrs. Ogi's brother. A niece, Judy White, returned home with them to spend a week.

KEWASKUM COMMUNITY HIGH SCHOOL JT. DISTRICT NO. 2 BUDGET HEARING
June 27, 1955

The budget hearing was called to order at 7:45 p. m. by Melvin Riley, president of the board of education. The proposed budget was read and explained to the electors. It was moved by Paul Landmann and seconded by L. N. Peterson to adopt the proposed budget for the ensuing year, 1955-1956. Motion carried.

It was moved by L. N. Peterson and seconded by Harry Oelhafen to adjourn the budget hearing. Motion carried.

ANNUAL MEETING

June 27, 1955
8:00 P. M.

The meeting was called to order by Melvin Riley, president of the board of education with 67 electors present.

Mr. Riley called for nominations for chairman of the meeting. L. N. Peterson nominated Melvin Riley. It was moved by Ralph Marx and seconded by Paul Landmann that nominations be closed, and that the clerk cast a unanimous ballot for Melvin Riley. Motion carried.

Minutes of the previous meeting were read by the clerk, Clifford C. Stautz. It was moved by Charles Miller and seconded by Paul Landmann to approve the minutes as read. Motion carried.

It was moved by L. N. Peterson and seconded by Paul Landmann to dispense with the reading of the minutes of intervening meetings. Motion carried.

The auditor's report prepared by the firm, Kannenberg and Marx, was read by Ralph Marx.

It was moved by Paul Landmann and seconded by Walter Wesenberg to approve the clerk's report as shown in the brochure given to the electors. Motion carried.

The treasurer's report was read by Henry B. Rosenheimer. It was moved by Carl Schaefer and seconded by Dr. R. G. Edwards to approve the treasurer's report as read. Motion carried.

The following resolutions were adopted:

RESOLUTION NO. 1—Be it resolved that the 1956 annual meeting of this District be held on the last Monday in June the year 1956 at 8:00 o'clock in the afternoon.

It was moved by Charles Miller and seconded by Joseph M. Miller to adopt resolution No. 1. Motion carried.

RESOLUTION NO. 2—Be it resolved by the electors of School District No. 2 or the Kewaskum Community High School that the school year be set at nine months or 180 days.

It was moved by Carl F. Schaefer and seconded by Mrs. Lorina Petermann to adopt resolution no. 2. Motion carried.

RESOLUTION NO. 3—Be it re-

solved that a tax be levied on all the taxable property of the District for operating expenses for the year commencing in 1955 and ending in 1956 in the amount of \$85,000.

It was moved by Paul Landmann and seconded by John L. Battaglia to adopt resolution no. 3. Motion carried.

RESOLUTION NO. 4—Be it resolved that the school board of this district be and they hereby are authorized to make such temporary loans as may be necessary to pay the operating expense until funds for the payment thereof are realized from the current tax levy.

It was moved by Charles Miller and seconded by Harry Oelhafen to adopt resolution no. 4. Motion carried.

RESOLUTION NO. 5—Be it resolved that the salaries of the members of the school board of this district be fixed at \$200.00 per annum.

It was moved by N. S. Stoffel and seconded by A. H. Seefeldt to adopt resolution no. 5. Motion carried.

RESOLUTION NO. 6—Be it resolved by the electors of School District No. 2 or the Kewaskum Community High School that there be furnished free text books to all high school students for the ensuing year, 1955-1956.

It was moved by Walter Wesenberg and seconded by Dr. R. G. Edwards to adopt resolution no. 6. Motion carried.

The chairman called for nominations for a school board member to serve a three-year term. Paula Petri was nominated by Paul Landmann. Leo Bingen was nominated by Wm. Ruth. It was moved by Jos. Miller and seconded by Nic. Stoffel that nominations be closed. Motion carried.

Nic. Stoffel, Wm. Ruth and Otto Weddig were appointed as tellers. Results of the balloting were as follows:

Paula Petri 36 votes
Leo Bingen 25 votes

The chairman called for nominations for a school board member to serve a two-year term. Leo Bingen was nominated by Paul Landmann. It was moved by Wm. Ruth and seconded by Ray Bales that nominations be closed. Motion carried. It was moved by Charles Miller and seconded by Wm. Ruth that the clerk cast a unanimous ballot for Leo Bingen. Motion carried.

Paul Landmann listed the members of the building committee, namely, Nic Stoffel, Chairman, Louis Opgenorth, Lee Fickler, Harry Oelhafen, Wm. Ruth and L. N. Peterson, and highly commended them for the very satisfactory work they have done.

It was moved by L. N. Peterson and seconded by Harry Oelhafen to adjourn. Motion carried.

Meeting adjourned at 9:00 p. m. Clifford C. Stautz, Clerk

TEACUP TOPICS

By BETTY ANN
Editor, The Kewaskum Journal, Women's Page

The department of agriculture reports that cotton percales treated with a resin finish to develop crease resistance are as easy to care for as fabrics without the finish.

The Missouri experiment station made tests of cotton dress fabrics in an effort to help homemakers buy ready made cotton clothes or yard goods. Two cotton percales, a gingham and a nubby fabric, with and without resin finish, were laundered 20 times and checked at intervals for shrinkage, crease resistance, flatness of seams and fraying of edges.

The resin finished cloth showed improved crease resistance, ranging from 7 per cent in some fabrics to 25 per cent in others.

The resin finished fabrics generally ironed more easily and smoothly than the nonfinished goods.

Although seams on the unlaundered resin finished fabrics were not as flat as on the other fabrics, this problem decreased after laundering.

After cleansing your skin with cream, remember to apply cold water as your final facial rinse, says Betty Ann. Cold water closes the pores and prevents new dirt from getting deep down inside them.

To relax tired hands after washing, ironing or any other household chore when your hands may get stiff, shake your hand hard with wrists loose. Your hands will feel relaxed in a matter of minutes.

For the sake of your clothes, be careful what you wear when getting that home permanent or applying rinses or dye to your hair. Stains from some permanent wave solutions, rinses and tints are almost impossible to remove when the garment is laundered. Protect clothes with several old towels you won't mind wasting to dry your hair and put over your shoulders. It's also best to wear an old dress while grooming your hair.

Dentists recommend that desserts for small children be simple and not too sweet. A dish of cooked prunes or a handful of raisins are perfect. However, a raisin rice custard or prune whip are excellent, too, and not much more work to prepare.

Fig Bar Baked Alaska
3 egg whites, 6 tablespoons sugar, 1/2 teaspoon vanilla, 1 package (18) fig bars, 1 pint vanilla or chocolate ice cream.

Heat oven to 450 degrees (hot). To make meringue, beat egg whites stiff but not dry. Add sugar gradually, continuing to beat until whites are stiff and glossy. Add vanilla. For each baked Alaska, line up three of the square fig bars on a cookie sheet, end to end, making a rectangle one bar wide and three bars long. Repeat six times, spacing the sets of three fig bars at least three inches apart on cookie sheet. Top each group of fig bars with one sixth of the ice cream. Quickly spread with meringue the top and sides of each set of the ice cream covered bars. Place in preheated oven for about two minutes, or until meringue is lightly browned. Remove from oven. With a spatula, lift each baked Alaska onto a dessert plate. Serve at once. Makes six servings.

Sponge Roll
4 eggs, 3/4 cup sugar, 2 tablespoons water, 1 teaspoon vanilla, few drops almond extract, 3/4 cup cake flour, 1 teaspoon baking powder, 1/4 teaspoon salt.

Beat egg yolks until thick and lemon colored. Gradually beat in one-half of three-fourths cup sugar. Beat in water, vanilla and almond extract. Beat the egg whites until stiff but not dry. Slowly beat in remaining half of sugar. Fold into egg yolks. Sift flour, measure, add baking powder and salt. Sift again. Fold into egg mixture. Spread evenly in jelly roll pan (10 by 15 by 3/4 inches) lined with greased, waxed paper. Bake in moderately hot oven, 375 degrees, 15 to 20 minutes. Turn out of pan onto clean towel sprinkled with powdered sugar. Strip off paper and fold quickly in towel like jelly roll. Let cool. To serve: Whip cream and sweeten a little if desired. Unroll cake and spread with pineapple filling and half the cream. Roll carefully so as not to squeeze out the filling. Frost with rest of cream. Decorate with pineapple slices and berries. Serves eight.

When putting freshly washed casement curtains back on the rods, you can prevent snagging by putting the end of the finger of an old glove over the end of the rod.

Spaghetti Sauce Brings Eggplant to the Table in New Dress

BY DOROTHY MADDOX

EVERYONE likes to try a new sauce with ever-popular spaghetti. That's why we think this savory eggplant sauce will be welcome at your dinner table.

Spaghetti With Eggplant Sauce (6-8 servings)

One-half cup butter or margarine, 1 medium-size eggplant, pared and cut in cubes; 1/2 cup chopped onions, 3 8-ounce cans tomato sauce, 1 cup water, 1/4 cup chopped, canned pimento; 1 medium-sized green pepper, diced; 1 teaspoon salt, pepper to taste, 1/4 teaspoon thyme, 2 tablespoons salt, 4 to 6 quarts boiling water, 1 pound spaghetti, grated Parmesan cheese.

Melt butter or margarine over medium heat. Add eggplant and onions and saute 10 minutes, stirring occasionally. Add tomato sauce, water, pimento, green pepper, 1 teaspoon salt, pepper and thyme.

Cook over low heat 30 minutes, stirring occasionally. Meanwhile, add 2 tablespoons salt to rapidly boiling water. Gradually add spaghetti so that water continues to boil.

Cook uncovered, stirring occasionally until tender. Drain in colander. Serve eggplant sauce with spaghetti and sprinkle with grated Parmesan cheese, if desired.

Maybe you want a soup that is a meal in itself. Served with big slices of bread and a salad, this salmon-and-vegetable soup makes a wonderfully hearty lunch.

Cream of Salmon-Noodle Soup (About 2 1/2 quarts)

One tablespoon salt, 3 quarts boiling water, 8 ounces wide egg noodles (about 4 cups), 1/4 cup butter or margarine, 1/4 cup finely chopped onion, 1/4 cup all-purpose flour, 6 cups milk, 1 3/4-ounce can salmon, drained and flaked; 1/2 cup cooked Lima beans, salt and pepper to taste.

Add 1 tablespoon salt to rapidly boiling water. Gradually add noodles so that water continues to boil. Cook uncovered, stirring occasionally, until tender. Drain in colander. Melt butter or mar-

Eggplant and spaghetti sauce is an unusual taste treat to serve the family one of these days.

garine over low heat; add onion and saute until tender. Add flour and blend.

Gradually add milk and cook until slightly thickened, stirring constantly.

Add salmon, Lima beans and salt and pepper to taste. Add noodles. Cook over low heat 15 minutes, stirring occasionally. Serve immediately.

About Your Home

Proper ventilation and lighting can do wonders for your kitchen safety and your morale. Install a fan ventilation system to remove grease, heat and cooking odors. It should be located as near as possible to the stove.

The fan should exhaust to the outside through the wall or roof, and must be equipped with a built-in shutter to prevent any back drafts or any bugs from entering the house when the fan is not in operation.

Good lighting is more important in the kitchen than possibly any other room in the home. Proper lighting can do away with fatigue and cut kitchen accidents to almost nothing.

Both natural and artificial light should give the kitchen good overall illumination. Additional lights are needed at work areas.

Avoid glare in the kitchen from exposed bulbs and highly polished materials. If sunlight streams into your kitchen window and into your eyes, it will cause you to become tired much sooner than you would otherwise. Use curtains, blinds or an exterior overhang at the window to prevent this glare.

When wiring the kitchen, provide enough circuits to accommodate all the equipment you will need and prevent the fire hazard of over-loading. In most cases, two circuits are necessary. You will need separate circuits for major equipment, such as the range and freezer. A convenience is to have an outlet located above each counter.

If you are building a new home, the best advice in the world is not to cut too many corners in the kitchen. The kitchen is where the average housewife spends a good deal of her time. It should be an attractive room with as good equipment as she can afford.

Decide how much room you will need in the way of counter space, storage space, and space for major equipment. Keep in mind that a kitchen too small or a kitchen too big will cause you a lot of extra work.

Carport with Woven Fence

A CARPORT with a woven wall makes a low-cost, interesting and mighty useful addition to any house. This is especially true if the carport has a storage area for garden tools.

Such a carport is shown in the illustration. A free plan for its construction is available.

The handsome woven wall is made by weaving strips of Masonite 1/4" siding, one foot wide

and eight feet long, between 4 by 4-inch posts set into the concrete driveway. Readily pliable for this weaving process, the Masonite siding is easy to work with, as it is splinter-free and free of defects. It takes a beautiful paint finish and will last for years.

An important feature of the garden tool storage room is the "Peg-Board" paneling on which may be suspended the various tools by means of interchangeable metal fixtures. These perforated panels, the lumber and other materials needed for this project may be obtained at lumber yards. For the free plan write to the Home Service Bureau, Suite 2037, 111 West Washington St., Chicago 2, Ill., requesting Plan No. AE-296.

No Chances

Cowboy: "My podner and I are taking a trip through the desert next week. He's taking along a gallon of whiskey for rattlesnake bites."

Visitor: "What are you taking along?"

Cowboy: "Two rattlesnakes."

Ten Word INTELLIGRAM

Check correct word concerning these tourist attractions:

1. You'll find cable cars in (Seattle) (San Francisco).
2. To view totem poles you'd go to (Ketchikan) (Montreal).
3. The Redwoods of (California) (Wyoming) are a majestic sight.
4. Head (east) (west) from Chicago to travel through the Amish country.
5. Visit (Salt Lake City) (Ogden), Utah, to see the Mormon Temple.
6. Fill up on tortillas and enchiladas in (New Mexico) (Minnesota).
7. Visit the historic Indian Mounds in (Ohio) (Indiana).
8. Tour (California) (Louisiana) to see the old Spanish missions.
9. Ride a cogwheel railroad to the top of (Pike's Peak) (Mount Rushmore).
10. To spend your vacation in the "Land of Enchantment," visit (North Carolina) (New Mexico).

Count 10 for each correct answer. A score of 0-20 is poor; 30-60, average; 70-80, superior, and 90-100, you rate as a travel guide.

Decoded Intelligram

1—San Francisco, 2—Ketchikan, 3—California, 4—East 5—Salt Lake City, 6—New Mexico, 7—Ohio, 8—California, 9—Pike's Peak, 10—New Mexico.

Health & Beauty

If nothing in your wardrobe looks well on you, the trouble may not be with your clothes. Maybe it is your figure or posture that is to blame.

The first step is to check your weight for your height and age. If you are more than a couple of pounds off one way or the other, here is the place to begin.

You can lose weight without starving yourself. Go at weight-lossing sensibly. Don't starve yourself, keep in mind that it takes time to lose weight. Keep foods like sweets, potato chips, salted peanuts, fravies, and soft drinks to a minimum.

For good health, and beauty, eat the following every day: A green and a yellow vegetable, two fruits (one citrus), a serving of meat, fish, poultry, or cheese (cheese not on a diet to lose), a pint of milk, a serving of whole-grain cereal or bread, some butter or margarine, six to eight glasses of water and three to five eggs each week.

If you need to lose weight, take smaller servings, if you need to gain, drink extra milk and eat larger servings.

Check your body measurements. If you need streamlining (this can apply to fat and thin people alike), take exercises. Make sure your posture is what it should be. If necessary, practice correct posture until it becomes natural with you.

Women & Home

A recent survey among 627 girls in various women's colleges showed that the major preoccupation of a large majority was the question of marriage and a home of their own.

Mrs. Jane Berry, of Hunter College, New York, told the National Association of Deans that a very small percentage of the girls surveyed planned to be career women. She told them the survey showed that almost half the girls questioned thought they would get married before they finished college.

About twenty-five per cent planned to go into graduate study. And, even though a large majority of the girls put marriage first, it was also found that a majority planned to work after completing college.

Thus it seems that family life in the United States will remain much the same despite activities of a small number of career women. This is only as it should be, since studies of psychiatrists indicate that women are happier caring for their families and carrying on normal home life than they are competing in the world of business, as their primary activity.

New Office Building

While the Senate has been preparing for several years to build a new Senate office building, a plan to build the House another office building was given a boost by passage of a general supplemental appropriation bill in Congress. Included in the bill was a \$5,000,000 outlay, to begin work on a new House office building.

There is little doubt that Senators and Congressmen often need more room than is now allocated in the Senate and House office buildings. At present, the Senate has only one building — a building constructed many decades ago — and the House has two. Congress has already bought half of the square east of the present Senate office building as a site for the new Senate building. The new House building will probably be built west of the new House office building.

The Heat Pump

There are indications that many major manufacturers are about ready to go into the serious production of heat pumps. Basically, the heat pump is designed to cool and heat a house by taking from the outside atmosphere heat or cold, as needed.

Two new models of a heat pump were brought out in recent weeks by one of the major manufacturers, and these, the first designed to go into homes in the northern part of the United States, were reduced as much as thirty per cent below prices of models which had been sold recently in southern areas.

The basic element of a heat pump is a motor-driven compressor, something like that used in refrigerators. The only fuel needed is electric power and in the summer the compressor takes heat from the atmosphere the coolness which is always present—even on the hottest days—and in the winter it takes from the atmosphere the warmth which is always present—even on the coldest days.

Experts tell us that there is considerable warmth in the air even when the temperature is down to zero degrees. For the coldest climates, however, some of the major manufacturers of heat pumps are adding electric heaters to the heat pump installation, but in a few years heat pumps will probably be effective without any additional or conventional aids.

It is believed in another decade or so heat pumps and systems which utilize either the constant temperature of water underground or the heat principle of the compressor will be standard equipment in most homes.

Bible Comment:

We Inherit Home Ideal From Jews of Old

IN the heritage of Christianity from Judaism, the world owes the Jews a big debt, especially in their concept of the sanctity of home and family life.

A great factor in the strength of the Jews historically, in spite of sufferings, persecutions and tragedies, has been this attitude toward home and family life, and this goes far back into Jewish history and religion.

Christian teaching enforced all that Jesus and the disciples whom He gathered around Him had known in all that Jewish heritage that the Master said He had not come to destroy but to fulfill.

Love in all the relationships of life is the supreme demand of Christ. Love in home and family life in the Christian conception is the prime basis of happy and responsible living.

All this is so obvious and elemental that to state it seems commonplace. But it is the commonplace things of life that are the most important, and too often neglected. Is there any area of life today in which the basic and commonplace things of Christian teaching are neglected, and set at naught, more than in this area of marriage, home and family?

Surely this is a great problem facing Christians and the Christian Church, as well as all who are concerned about the social welfare.

There would be more hope among nations and peoples, if there were more peace in homes, families, and in all the daily relationships of ordinary life.

Stencil MAGIC

TEXTILE PAINTING

Scores of women are discovering the fun of textile painting with both tube and brush. Join them in this fascinating and useful hobby. Your plain blouses, hankies, etc. take on a decidedly individual tone when you put the stencil magic to work. Textile

painting is a versatile art; it's so easy and such fun. Go fancy in any way you choose. Simple directions tell you how to use the transfer for finest results. Send for pattern C9845, for only 20c. Send orders to Handcraft Service (The Colonial Company), Journal Pub. Co., Inc., 1243 Swift, Kansas City 16, Mo.

HISTORIC NEWS FOR LABOR'S RELATIONS—Intense interest of all labor is mirrored by the faces of these Ford production workers at Ford's River Rouge, Mich., plant as they read of the precedent-setting three-year Ford-United Auto Workers (CIO) contract, which brings a guaranteed annual wage for hourly paid employes in the auto industry a big step closer to realization. The new contract guarantees supplemental wage payments of over 60 per cent of normal take-home pay, for as long as 26 weeks, in case of lay-offs. Payments will be figured to make up the difference between unemployment benefits and the 60 per cent-plus figure and will come from a 55-million-dollar fund, yet to be set up. Plan goes into effect June 1, 1956, when fund will have reached a volume from which payments may be drawn if necessary.

SPORTS AFIELD

By Ted Kesting

At least a third of the fun in bass fishing is sizing up plugs in stores or catalogs, buying those that look promising, and trying them out to see what they'll do. Yes, it costs money. All sports cost money (generally more than fishing) and in no sport is one paying for tangible things that one can take home— one is paying for pleasure.

But you could have 100 or more plugs and still be poorly equipped, claims angling editor Jason Lucas. With only half a dozen well-selected plugs you will have at least one that will catch bass under almost any condition you may encounter. Here are the four main types of bass plugs:

Surface Plugs — The general rules, to which of course there will be exceptions, are these: In lakes in the northern and middle states, surface plugs often work well all day in the earliest part of the season. Through midsummer, they are likely to be effective only very early and very late in the day. In fall, they will get few or no bass. In a river of ordinary size, they may work well almost any time, except probably in late fall. In the deep South surface plugs will get some bass almost any time. Bass don't seem choosy about color in surface lures. It's the retrieve that counts.

Pull-under Plugs — These float at rest, but on the retrieve run at a depth of not over two feet or so. Lucas thinks those that are mainly white, with some red, are likely to get bass when they're taking shallow runners. He's also done very well with orange, and with fairly light yellow plugs. About 19 times in 20, plugs in this classification will get most fish when worked quite slowly. Also, some little flips and jerks will give them much more attractive action than if they're reeled steadily.

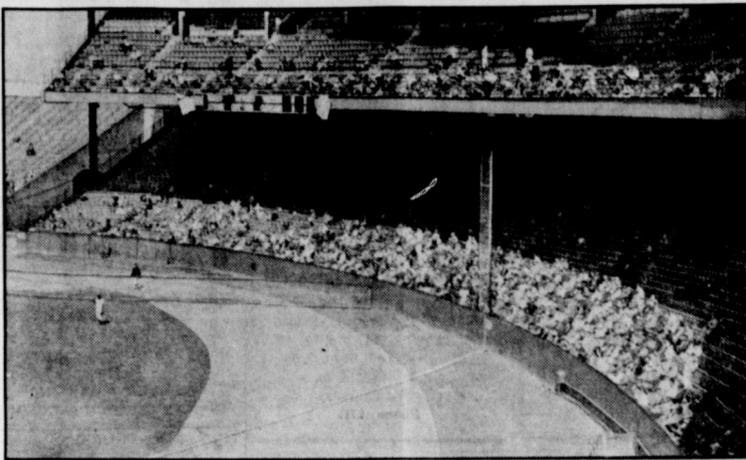

Mid-depth Plugs — These are modifications of those in the preceding class, but sink when at rest. Let such a plug go deep.

Then bring it along slowly, with pauses and twitches, hovering in mid-water. It should neither bob to the surface, as would a deep-running floater, nor sink to the bottom as would a metal lure. In the average lake a plug of this type will get more bass than any other 60 per cent of the time, and in some deep artificial lakes it's best perhaps 80 per cent of the time.

Bottom Plugs — During mid-summer, there's only one method of getting bass that is at all productive: fishing right along the bottom. Let your plug sink clear to the bottom, then work it along, just fast enough to bring out its action, in jumps of five or six feet, letting it sink to the bottom again to rest a few seconds. Lucas has a very strong preference for one color here— plain white.

1. How many oil wells were drilled in the United States during 1954?
2. How much did it cost to drill these wells?
3. When was the Marine Corps established?
4. What is the approximate value of the war reserve equipment of the U. S.?

9. What is the population of the U. S. S. R.?
10. How many immigrants enter the United States each year? (See Answers at Bottom of Page.)

SUNFISHIN'—Seeking to take the nip out of a breeze off still-chill Lake Erie, fans in right-field section of Cleveland Stadium desert their appointed seats to crowd into area of the stands kept warm by the sun. Shadow from stadium overhang almost exactly marks line of the crowd in both upper and lower stands, during a double header with the White Sox.

Factual News About The Eyes

CAR COLOR AFFECTS HIGHWAY SAFETY

A recent study shows up automobile color as an important factor in driving safety, according to the Better Vision Institute. It reveals that one's judgment of the distance of an object is influenced by the contrast of its color with the background. Some colors make objects seem closer than other colors do.

In the experiment, 164 people looked through a small opening at colored cards about 200 feet away. Cards that were either much darker or much lighter than the background seemed closer than those which contrasted less strikingly with the background. Blue and yellow cards gave the impression of being as much as six feet closer than other cards which were actually the same distance away.

These observations are considered significant, inasmuch as six feet more or less in distance judgment may spell the difference between life and death. Evidently one of the safest color choices is a two-toned combination of blue and yellow, since the darker blue will stand out in daylight and fog and the lighter yellow will be easily seen at night.

It's only sensible for a driver buy a car that's plainly visible, says the Institute—and to have his own eyesight checked regularly, so that he may be sure of seeing all obstacles as quickly and efficiently as possible.

Haven't They Heard of Trifocals?
An industrial firm in Wisconsin recently lowered its bulletin boards from three to five inches, according to the Better Vision Institute. The reason? It was discovered that 229 of the employees wore bifocals and were getting stiff necks from craning to read the notices through their low segments.

A better solution to the problem would be trifocal lenses, says the Institute. These offer, above the low segment for near-point tasks, an intermediate segment which provides clear vision at arm's length (from 18 to 50 inches away). So they enable a wearer to read notices on a bulletin board of ordinary height without any awkward neck-cranning.

Trifocals are helpful in a wide variety of activities, such as playing cards, shopping, playing the piano, bookkeeping, operating machines, etc. They are the ideal visual tools for many people who have difficulty in focusing for clear vision at different distances.

Answers To Who Knows

1. 53,930 — a record.
2. Over \$2 billions.
3. On November 10, 1775.
4. \$20,000,000,000.
5. Approximately 50,000,000 square feet of space.
6. On May 27, at 8:51 o'clock, it registered an even 165,000,000.
7. China, with about 600,000,000.
8. Fourth — being preceded by China, India and the Soviet Union.
9. Officially estimated in 1952 to be 207,000,000.
10. An estimated one every two minutes, with one person leaving the country every twenty-four minutes.

Three Historic Washington Cornerstones Are Missing

Cornerstones may weigh several tons but sometimes are lost as easily as a dime.

"Where are the cornerstones of the White House, United States Treasury and Washington Monument?" Federal authorities asked in the wake of a hunt for New York City Hall's cornerstone. They are apparently obscured by additional building and a dearth of records, says the National Geographic Society. Of the three, history gives fullest account of the Monument stone.

The towering shaft was dedicated on July 4, 1848, amid a throng of 15,000 spectators, including Mrs. Alexander Hamilton, Mrs. Dolley Madison and George Washington Parke Custis, Martha Washington's grandson. The trowel was the one wielded by George Washington at the laying of the Capitol cornerstone in 1793.

Many Mementos
Into the Monument's cornerstone went over 70 mementos, including:

Copies of the Constitution and Declaration of Independence; Washington's portrait and coat of arms; a city map; census, housing and tax statistics; all United States coins from the gold eagle \$10 piece to the half dime; a Godey's Lady's Book (a volume of fashion displays); the Constitution of the Improved Order of Red Men; and newspapers (New York Daily Sun, Mobile Register and Journal, Baltimore Daily Sun and the Western Citizen of Paris, Kentucky).

But where is the cornerstone? It is believed to be somewhere in the northeast corner, probably hidden by subsequent foundation enlargement.

At the Treasury's cornerstone laying, according to tradition, President Andrew Jackson grew sentimental. He handed the mason a lock of hair from his granddaughter's head along with one of his messages to Congress. "I am placing part of my heart in this building," the President reportedly said. But the stone cannot be found in the granite building erected in stages after 1836.

Before the White House renovation in the early 1950's, mine detectors tried to find a metal plaque indicating the cornerstone location. Only "mutterings" were produced from bits of metal in several walls. But in the southwest corner where the stone supposedly was laid in 1792 the detector emitted a full "zing-g," signifying a sizable metal object — perhaps the plaque. The wall, however, was not entered, and the questions remain: Does America's first house have a cornerstone? If so, is it a repository of mementos of the capital's early life?

An Ancient Custom
Some cornerstones are merely solid blocks bearing a date or other inscription. Typical ones, however, are hollowed to hold items reflecting current customs. When the building is eventually razed the contents form a reminder of bygone days.

The practice goes back into dim history. Fragile earthen pots placed in royal tombs at the head of the Persian Gulf may have been pre-historic prototypes. Precious metals have been unearthed in the stones of ancient Babylonia, Persia, Assyria and Chaldea.

In the past cornerstones were placed at corners as supports. Today they may be ornaments in the facade or be imbedded in interior walls or even in floors.

The banging of an oar on the gunwale of a boat, the scraping of a metal tackle box on the floor boards, will cause enough vibrations to frighten all the fish away. — Sports Afield

FBI Report Shows Crime On Increase

The latest Federal Bureau of Investigation report on crime in the United States shows that the rate continues to increase in this country. This is disturbing, since the rate has been inching upward since World War II.

In the last twelve months the national crime rate has increased by five per cent, and a total of 2,277,250 major offenses were committed. Major offenses include criminal homicides, aggravated assaults, robberies, burglaries and automobile thefts.

The increase in the rate of crime means that crime has been increasing many times as fast as has the population. In addition to the increase in the rate of crimes, Federal Bureau Director J. Edgar Hoover says juvenile delinquency is also on the increase, and that the rate of increase is apparent in both small towns and in rural areas—as well as the larger cities.

The crime increase is a poor commentary of social conditions in the United States. We are experiencing a relative boom although not in the farm economy, and jobs are relatively plentiful. The fault seems to lie in a failure to instill in youth the qualities of character and idealism which are necessary to produce good citizens. Parental failure is the major cause of juvenile delinquency.

This problem should get the attention of every sober-minded citizen. Colleges and lower schools should make every effort to increase their treatment of character — building qualities, while civic groups, police departments, and every other individual or organization affected, concentrate on helping to build better citizens, stressing the moral and religious values so needed in this age.

Sports Quiz

1. What American League team won the pennant in 1945?
2. What National League team won the pennant that year?
3. How many times was Native Dancer beaten?
4. Did Gene Tunney ever fight Tom Gibbons?
5. Can you recall the golfer who beat Bobby Jones in the National Open in 1925?

The Answers:

1. Detroit.
2. Chicago. (Detroit won the Series, 4-3.)
3. Once, in the Derby.
4. Yes, he knocked Gibbons out in the 12th round.
5. Willie MacFarlane, by one stroke.

Behind The Scenes in American Business

By Reynolds Knight

One of the amazing young-and-old industries in the United States is the production, gathering and distribution of gas for cooking, heating and industrial use. Dating back to 1816, it's almost the oldest of all the industries that supply our needs today. Yet, showing a 135 per cent gain in sales since the end of 1945, it matches the sprightliness of today's growing newcomers.

Since connections to gas mains have increased only 38 per cent in the same decade, it is obvious that this virile centenarian industry must be selling each customer more gas for more uses.

This is confirmed by the president of a leading gas appliance manufacturers association. Residential use, he points out, rose 153 per cent in the decade—from 7.7 billion therms a year to 19.6 billion therms.

Sales of gas appliances show similar or greater increases. In 1945 there were 1,433,570 gas house — heating units in use. At the end of 1954 the figure was 6,938,468. Gas water heaters continue to lead the field. Their margin over electric water heaters in retail sales was 831,000 units in 1946, and 1,496,000 units in 1954. The gas range, also, remains the housewife's favorite. The aggregate of gas range shipments in the 1946-1954 period was 20,959,000, while makers of electric ranges sold 11,287,000.

TUBES ARE TOPS — Shipments of collapsible metal tubes for shaving creams for the first four months of this year indicate that the foldup containers are solidifying their position as the preferred type of dispenser for these necessities.

January — through — April figures show 19,632,528 units shipped to shaving cream manufacturers, according to the executive secretary of a collapsible tube manufacturers council. He pointed out that this is an increase of 14 1/2 per cent over the like period a year ago.

Brushless shaving cream is favored over the lather kind — only by a whisker.

THOSE GAY TAX BILLS — For many years the Internal Revenue Service and its predecessor, the Internal Revenue Bureau, have used symbols on the envelopes in which tax bills were mailed out to indicate what was inside. That made it certain that no one who ought to get a 1040 return got a higher-bracket one, and that no city fellow got a farmer's blank.

Until last year the symbols were little stars and crosses. They were unobtrusive, but they also were hard to distinguish in the mailing room. So last year IRS went to town with symbols. An under — \$10,000 earner, single or joint, got his return in a red-striped envelope. Over — \$10,000 earners got yellow-striped ones. Green silhouettes of farmhouses blossomed on the rural variety of return.

A great cry of outrage went up from people who didn't want their snoopy neighbors to get a line on their incomes. So next year the IRS will go back to the tiny symbols, and no one will know how much you make but the paymaster, your wife, the bank teller who cashes your check, the stores who sell you stuff on credit, and the finance company who lends you money on your automobile.

THINGS TO COME — A plastic arrow attached to your putter may help teach you to sink those long ones. Barbecue addicts can get a throw-away grill, containing one charge of charcoal with excelsior for easy ignition. . . . Had-to-Come Dept.: A Davy Crockett supplier is using plastic raccoon tails. . . . A light that clips on to one's book for reading in bed turns itself out when the book slips from a sleeper's hand.

BITS O' BUSINESS — Major railroads' net income in April was \$67 million. . . . Soft coal production in the week of May 31 reached a high for the last 19 months, at 9.3 million tons. . . . June shipments of copper to consumers will reach 127,000 tons for the second month in a row, say leading smelters. . . . Idle workers' new unemployment claims have increased by 5,300 in the May 28 week.

He Doesn't

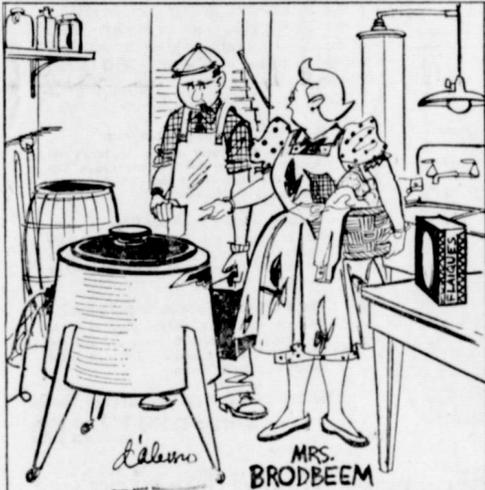

The only person who doesn't profit by his mistakes is a para-trooper. — The Gosport, Pensacola, Fla.
