

Kewaskum firefighters assist at WB apartment complex fire

WEST BEND-
Kewaskum Firefighters assisted at a large fire that occurred Friday, April 2 in the city at 3:42 p.m. It is believed the fire was the result of a resident of the 24-unit apartment complex leaving candles burning.

Firefighters from Kewaskum, Newburg, Jackson and Slinger assisted

Above: Kewaskum firefighters assist at the blaze, shown in the larger photo.

Andrew Kuehl photos

West Bend Fire Department at 1579 Stonebridge Road.

The apartment building is valued at approximately \$1,200,000.00 and received damage to the structure and the contents of the individual apartments. The exact cost of the damage from the fire is not known at this time.

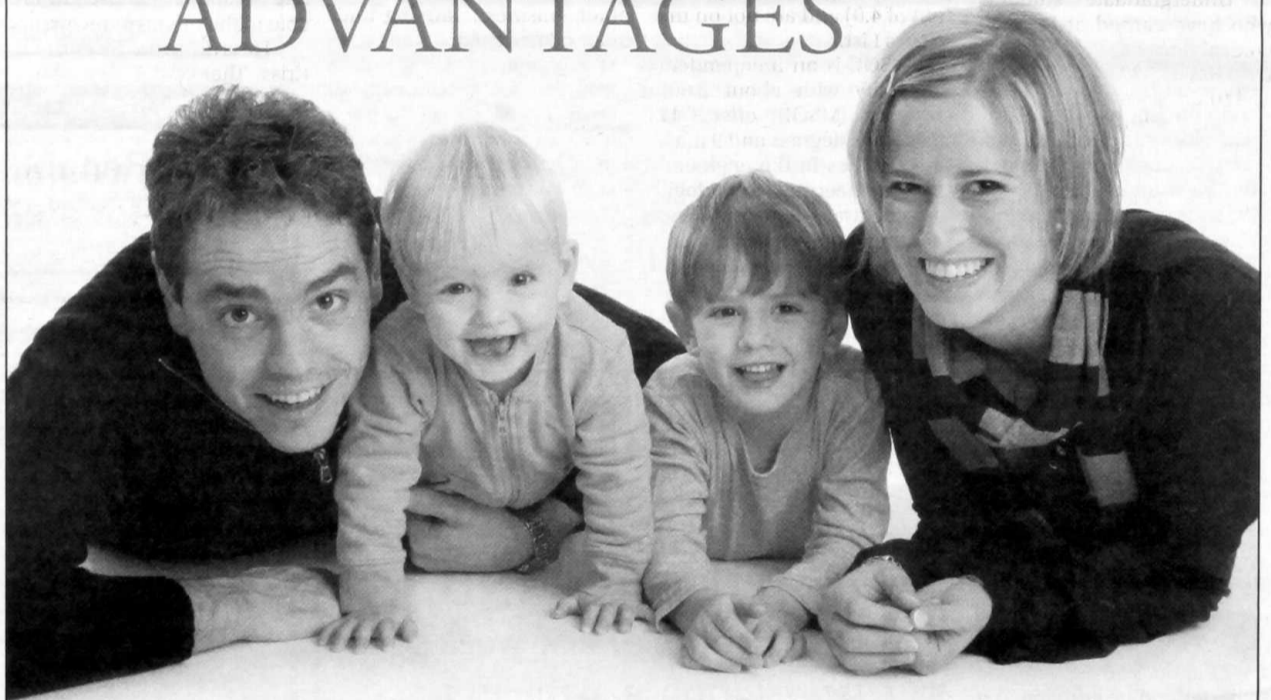

Investigation has shown that the fire was caused by candles that were burning unattended in the apartment number 7 of Joseph J. Turecek, 24.

West Bend Police referred charges to the Washington County District Attorney's Office for Negligent Handling of Burning Materials, however District Attorney Todd Martens declined charging Turecek based on a lack of evidence.

The Red Cross immediately was called to the scene and began assisting the nearly 60 displaced residents. They have worked with St. Vincent DePaul Society who is helping to provide clothing through April 16 while Community Church of West Bend is helping with furniture through April 9.

The Red Cross is also accepting donations so they can continue to help families in need, they can be reached by calling (262) 334-5687. St. Vincent DePaul of West Bend is located at 420 N River Rd and can be reached at (262) 334-7291. Community Church can be reached at (262) 338-0725.

Being local has its ADVANTAGES

You don't have to travel far to receive exceptional health care services. The Kewaskum team of providers include:

- Family practice physicians
- Internal medicine and pediatrics physician
- Family practice advanced nurse practitioner
- Nurse midwifery for women's health
- On site lab and radiology services
- Same day appointments for immediate health concerns
- Access to advanced care specialists from West Bend Clinic and Froedtert & Community Health

New Patients Always Welcome!

To schedule an appointment or a "Get Acquainted Visit" to help select a provider, call 262-626-4616.

January 25, 1985

Three people are dead as the result of a two-car accident in Sheboygan County Tuesday night. The accident occurred at the intersection of Highway 28 and County Road W, just north of Batavia in the Town of Scott. The Sheboygan County Sheriff's Department reported one vehicle was traveling east on W, and the second car was traveling south on Highway 28 when they collided at the intersection. Jeanne Shaske, 56, Adell, the driver of the southbound car, and Ruth D. Fritz, 65, Beechwood, a passenger in the Shaske vehicle, were pronounced dead at the scene by Sheboygan County coroner Robert Sertich. The driver of the eastbound car, Thomas G. Schmidt, 28, Fredonia, was transported to St. Nicholas Hospital, Sheboygan, where he died a short time later.

Even on the coldest winter day, the spirit of 25 years of AFS in Kewaskum warmed the hearts of approximately 150 people at Kewaskum High School on January 19. Fifteen foreign students spending a year in Wisconsin, their host families, AFS chapter members and prospective host parents, AFS school club members and friends of AFS gathered to share and celebrate. Special honors for the day were reserved for Mrs. L.N. (Pat) Peterson, who as a charter member of the Kewaskum AFS chapter has been active throughout the 25 years. Her list of involvement with AFS is endless and she continues to correspond with most of the AFS students even at present. Mrs. Peterson and her husband plan to visit six former Kewaskum AFS students during their travels to Japan and New Zealand this year. The Kewaskum chapter presented Mrs. Peterson with a special AFS emblem award and a book of memories to which many former students, host parents and chapter members contributed.

At the annual organization meeting the Board of Directors of Valley Bank, Kewaskum, elected Wayland Tessar Chairman of the Board and Chief Executive Officer and Gerald Zimmer as President. Tessar is a native of Kewaskum and has been with Valley Bank for 36 years, serving as President and Chief Executive Officer for the past 13 years. Zimmer is a native of West Bend and has been with Valley Bank for 22 years, most recently as Executive Vice President. Other promotions

include Judith Heberer to Vice President/Cashier from Cashier; William Koehne to Vice President/Loans from Assistant Vice President; Diane Zalewski to Assistant Cashier/New Accounts from Head Secretary, and Linda Theisen to Assistant Cashier/Head Teller from Head Teller.

A daughter, Lindsay Rose, was born to Steve and Carol Hart, Allenton, on January 14. Paternal grandparents are William and Pat Hart of Allenton and maternal grandparents are Lyle and Beatrice Manthei of Kewaskum. A daughter was born to Karl and Marilyn Brath, West Bend, on January 18. Mrs. Brath is the former Marilyn Reindl of Kewaskum. Daughters were born to Charles and Lisa Delvaux, Campbellsport, on January 16; to Thomas and Susan Tillier, Campbellsport on January 16, and to Mark and Donna Ertel, Campbellsport, on January 17. A son, Jeffrey Alan, was born to Mr. and Mrs. Victor Stibb, Campbellsport, on January 14.

February 1, 1985

Jean and Gary Bickelhaupt officially opened the Riverview Inn for business last Friday at the corner of Highway 28 East (Main Street) and Riverview Drive in Kewaskum. The Bickelhaupt purchased the property formerly known as The Chaperal or Apollo's Lyre from Mr. and Mrs. Ralph Scott. They have already made several improvements and will be making additional changes in the hall and kitchen areas. Joan hopes to be serving short order lunches within the next few weeks. She also plans to work in daily specials once remodeling in the kitchen is complete.

While golfing at the Plantation golf course in Crystal River, Florida, Audrey Jaraczewski of Kewaskum got her first hole-in-one on the 140 yard eighth hole on the "Narrows Course" at Plantation, after years of golfing. On the previous day, her brother-in-law, Killian Honneck, also of Kewaskum, got an eagle on the 370 yard ninth hole on the Narrows Course on the Plantation.

A daughter, Ashley Ann, was born to Jon and Diane Kiel of Allenton on January 27, in Milwaukee. Paternal grandparents are Lloyd and Dorothea Kiel of West Bend and maternal grandparents are Leo and Verna Resch of Allenton. Daughters were also born to Darrel and Janine Schroeter, Allenton, on January 24, and to Mark and Anna Vichtner, Campbellport,

on January 25. A son, Michael Merlin, was born to Lenus and Bonny Seelfeldt, Sheboygan, on January 22. A son was also born to Fred and Bonnie Brown, Campbellsport, on January 22.

75 Years Ago

January 11, 1935

It becomes our very sad duty this week to chronicle the passing of one of our most beloved citizens, namely, Mrs. John M. Ockenfels, which occurred at her home in this village on January 9, after an illness of nearly a month. The direct cause of her demise was a cerebral hemorrhage. Mrs. Ockenfels, the former Anna Barbara Lang was born in Kewaskum on March 10, 1860.

William Mayer left Saturday for St. Francis Seminary at St. Francis where he will continue his studies for the priesthood. He spent the past two and one-half weeks with his parents, Mr. and Mrs. Jos. Mayer and family.

A schafskopf party will be held at the Modernistic Beer Garden on January 18. Cash prizes will be awarded according to the number of players. Play will commence at 8 pm.

A son arrived at the home of Mr. and Mrs. Oscar Kohler at Campbellsport on December 22. The little master was baptized Sunday, receiving the name of Eugene Arthur. The sponsors were Peter Kohler and Mrs. William Volm of here.

January 18, 1935

Miss Eleanor Koenen, saleslady at the A.G. Koch, Inc. store, was very badly injured Wednesday evening, while on her way home from work. She was walking along the right side of Main Street, and upon approaching the crossing at the Frank Stellpflug home, was about to cross over and due to the fact that a severe sleet storm was raging at the time, did not see or hear the approaching automobile. The automobile struck her and passed over her body. The driver of the car was also blinded by the storm and did not notice Miss Koenen until he had struck her and on account of the slippery roads, was unable to bring his car to a stop until after the accident had occurred. He at once stopped and took her to her home east of the village where a physician was summoned and found it necessary to rush the young lady to the St. Joseph Hospital in West Bend. Upon xray examination it was found that Miss Koenen's

right shoulder blade and collar bone were broken and both legs were broken below the knees.

The most severe storm of the winter was experienced here throughout Wednesday and Wednesday evening. During the day considerable snow fell, accompanied by rain and sleet. By evening the snow and rain had frozen which made walking and driving hazardous.

Officers of the Washington County Old Settlers' Club met at the offices of the secretary in the courthouse at West Bend on January 12 to formulate plans for the annual meeting of the Old Settlers' Club on Washington's birthday February 22. The gathering this year will be of considerable importance and more auspicious than those of recent years in that this year the club will observe its diamond anniversary.

A bright baby girl was born to Mr. and Mrs. Oscar Boegel of Wayne on January 7.

100 Years Ago

January 1, 1910

Charles Weddig of this village, while working at the Barton ice houses, had the misfortune of breaking his leg above the ankle last Tuesday noon. He was assisting his brother-in-law, Fred Schaeffer, in putting up some ice slides at Barton, preparatory to commencing the ice harvest next Monday, when a plank fell and struck his leg below the knee, breaking his ankle. He was brought home on the afternoon train. The fracture is a bad one and will lay him up for some time.

Paul Urban, employed at the malt house, had a narrow escape from being killed last Monday afternoon. Paul was in the act of oiling some shafting in the plant, when his clothes caught on a set screw on a revolving shaft. It was only by the

presence of mind that he saved himself from being whirled around the shaft, by grabbing a steam pipe overhead to which he clung until all the loose clothes were torn from his body. With the exception of a bad frightening and a few bruises, he was not injured.

A little girl made her appearance at the home of Mr. and Mrs. William Pech, New Fane, on the 24th of December. A little boy was born to Mr. and Mrs. Joe Uelmen, St. Michaels, on Christmas Day.

January 8, 1910

The worst blizzard of the winter struck this section last Monday. A heavy snow fall began on Tuesday afternoon, which turned into a blizzard and raged all night, drifting the snow and all the roads were impassable on Wednesday. Trains were from 2 to 6 hours late and freight trains were abandoned entirely on Wednesday. The snow plow was kept in use all Tuesday night and Wednesday to keep the roads open for passenger trains to move. An extra freight train which left here for the north Tuesday at 7 pm was stalled between here and Campbellsport and could not clear the block until 3 am when they were assisted by the engine on the snow plow. Rural carriers were unable to get over their routes on Wednesday. The blizzard was followed by the coldest night of this winter, when on Thursday morning the mercury dropped to 12 below zero.

Beginning with next Tuesday, the local stores will close at 6 pm on every Tuesday and Thursday.

Schaefer and Schultz received their new bar furniture last Monday and had the same set up this week.

Henry Garbisch commenced to put up his ice supply for the season last Monday.

KES students head to Milwaukee

ABOVE: The KES students, stand in front of a Dale Chihuly blown glass sculpture at the Milwaukee Art Museum. ABOVE RIGHT: Students lying on the museum floor looking up at an Alexander Calder hanging mobile.

On Feb. 2, 18 third, fourth, and fifth grade students from Kewaskum Elementary School attended an educational program about "Space - the Last Frontier" at the Milwaukee Performing Arts Center and the Milwaukee Art Museum.

The students attended a Milwaukee Symphony Orchestra concert in the morning where they heard "space" music by Richard Strauss, Richard Wagner, Gustav Holst, Wolfgang Mozart and John Williams. In the afternoon, they had docent led tours at the art museum where they saw works of art with the space theme, and saw many other interesting works by famous painters and sculptors.

The artistically enriched program was part of the district's fine arts program, and students were selected based on their ability and interest in art and music. Elementary Art Specialist Mrs. Peggy Henke, Elementary Music Specialist Mrs. Sherry Gerhartz and gifted and talented education consultant Mrs. Carol Zoerb, all attended with the following students:

Third graders - Ellee Spalding, Samwise Baker, Jayna Bartel, Geena Alexander, Nick Zangl, Lucas Christenson. Fourth graders - Brandon Prim, Cody Resop, Alaina Rosenthal, Destiny Kudelko, Berit Kirkegaard, Eaton Elmazi. Fifth graders - Breanna Mielke, Jesse Jones, Abbey Hardy, Johanna Koller, Conner Enright and Gina Taylor.

VILLAGE OF KEWASKUM NOTICE WOOD CHIPPING SERVICES RESUMED

The Department of Public Works will resume wood chipping services on public streets, beginning Monday, April 5th. Weather permitting. Service will continue each 1st and 3rd Monday of the month through late fall.

Please follow these requirements:

1. Place large (butt) end toward the street, at the curb. Long branches are OK, chipper will feed into itself.
2. Pile branches no more than 2 feet high; a long low pile is best for feeding the chipper. Leave a gap in the pile every 8 feet.
3. For small brush, TIE IN BUNDLES with string or twine. No boxes, bags or cans of branches will be chipped.
4. No roots of any kind, or material with any dirt on it.

Note: Leaves, yard waste, garden plant waste, corn stalks, sun flower stalk, grass and materials that will rot down in a compost pile can be brought to the DPW yard and placed in the yard compost bin.

Hours are 7:00 AM to 3:30 PM Monday - Friday

2009 Consumer Confidence Report KEWASKUM WATERWORKS

Water System Information

If you would like to know more about the information contained in this report, please contact Jerry Gilles at (262) 626-4310. Public Water Supply ID: 26701125

Hardness of Water: Approximately 24 – 25 grains/gallon.

Health Information

Drinking water, including bottled water, may reasonably be expected to contain at least small amounts of some contaminants. The presence of contaminants does not necessarily indicate that water poses a health risk. More information about contaminants and potential health effects can be obtained by calling the Environmental Protection Agency's safe drinking water hotline (800-426-4791).

Some people may be more vulnerable to contaminants in drinking water than the general population. Immuno-compromised persons such as persons with cancer undergoing chemotherapy, persons who have undergone organ transplants, people with HIV/AIDS or other immune systems disorders, some elderly, and infants can be particularly at risk from infections. These people should seek advice about drinking water from their health care providers. EPA/CDC guidelines on appropriate means to lessen the risk of infection by cryptosporidium and other microbial contaminants are available from the Environmental Protection Agency's safe drinking water hotline (800-426-4791).

Source(s) of Water

Source id	Source	Depth (in feet)	Status
2	Groundwater	503	Active
3	Groundwater	460	Active
4	Groundwater	360	Active
5	Groundwater	280	Active

To obtain a summary of the source water assessment please contact Jerry Gilles at (262) 626-4310.

Educational Information

The sources of drinking water, both tap water and bottled water, include rivers, lakes, streams, ponds, reservoirs, springs and wells. As water travels over the surface of the land or through the ground, it dissolves naturally occurring minerals and, in some cases, radioactive material, and can pick up substances resulting from the presence of animals or from human activity.

Contaminants that may be present in source water include:

- Microbial contaminants, such as viruses and bacteria, which may come from sewage treatment plants, septic systems, agricultural livestock operations and wildlife.
- Inorganic contaminants, such as salts and metals, which can be naturally-occurring or result from urban stormwater runoff, industrial or domestic wastewater discharges, oil and gas production, mining or farming.
- Pesticides and herbicides, which may come from a variety of sources such as agriculture, urban stormwater runoff and residential uses.
- Organic chemical contaminants, including synthetic and volatile organic chemicals, which are by-products of industrial processes and petroleum production, and can also come from gas stations, urban stormwater runoff and septic systems.
- Radioactive contaminants, which can be naturally occurring or be the result of oil and gas production and mining activities.

In order to ensure that tap water is safe to drink, EPA prescribes regulations that limit the amount of certain contaminants in water provided by public water systems. FDA regulations establish limits for contami-

Contaminant Group	# of Contaminants
Inorganic Contaminants	16
Microbiological Contaminants	2
Radioactive Contaminants	3
Synthetic Organic Contaminants including Pesticides and Herbicides	23
Volatile Organic Contaminants	20

Microbiological Contaminants

Contaminant	MCL	MCLG	Count of Positives	Sample Date (if prior to 2009)	Violation	Typical Source of Contaminant
Coliform (TCR)	presence of coliform bacteria in >=5% of monthly samples	0	1		NO	Naturally present in the environment

Inorganic Contaminants

Contaminant (units)	MCL	MCLG	Level Found	Range	Sample Date (if prior to 2009)	Violation	Typical Source of Contaminant
ARSENIC (ppb)	10	n/a	5	nd-5	09/16/2008	NO	Erosion of natural deposits; Runoff from orchards; Runoff from glass and electronics production wastes
BARIIUM (ppm)	2	2	.160	.092-.160	09/16/2008	NO	Discharge of drilling wastes; Discharge from metal refineries; Erosion of natural deposits
COPPER (ppm)	AL=1.3	1.3	.2000	0 of 20 results were above the action level.	04/10/2008	NO	Corrosion of household plumbing systems; Erosion of natural deposits; Leaching from wood preservatives
FLUORIDE (ppm)	4	4	.1	nd-.1	04/08/2008	NO	Erosion of natural deposits; Water additive which promotes strong teeth; Discharge from fertilizer and aluminum factories
LEAD (ppb)	AL=15	0	2.60	0 of 20 results were above the action level.	04/10/2008	NO	Corrosion of household plumbing systems; Erosion of natural deposits
NICKEL (ppb)	100	28.0000	21.0000-28.0000		09/16/2008	NO	Nickel occurs naturally in soils, ground water and surface waters and is often used in electroplating, stainless steel and alloy products.
SODIUM (ppm)	n/a	n/a	39.00	26.00-39.00	04/08/2008	NO	n/a
THALLIUM TOTAL (ppb)	2	0.5	.9	nd-.9	09/16/2008	NO	Leaching from ore-processing sites; Discharge from electronics, glass, and drug factories

Radioactive Contaminants

Contaminant (units)	MCL	MCLG	Level Found	Range	Sample Date (if prior to 2009)	Violation	Typical Source of Contaminant
COMBINED URANIUM (ug/l)	30	0	0.6	0.2-0.6		NO	Erosion of natural deposits
GROSS ALPHA, EXCL. R & U (pCi/l)	15	0	4.5	1.2-4.5		NO	Erosion of natural deposits
GROSS ALPHA, INCL. R & U (n/a)	n/a	n/a	4.6	1.4-4.6		NO	Erosion of natural deposits
RADIUM, (226 + 228) (pCi/l)	5	0	2.0	1.4-2.0		NO	Erosion of natural deposits

Notice: The 2004 Consumer Confidence Report was published after July 1, 2005.

Definition of Terms

Term	Definition
AL	Action Level: The concentration of a contaminant which, if exceeded, triggers treatment or other requirements which a water system must follow.
MCL	Maximum Contaminant Level: The highest level of a contaminant that is allowed in drinking water. MCLs are set as close to the MCLGs as feasible using the best available treatment technology.
MCLG	Maximum Contaminant Level Goal: The level of a contaminant in drinking water below which there is no known or expected risk to health. MCLGs allow for a margin of safety.
MFL	million fibers per liter
mrem/year	millirem per year (a measure of radiation absorbed by the body)
NTU	Nephelometric Turbidity Units
pCi/l	picocuries per liter (a measure of radioactivity)
ppm	parts per million, or milligrams per liter (mg/l)
ppb	parts per billion, or micrograms per liter (ug/l)
ppt	parts per trillion, or nanograms per liter
ppq	parts per quadrillion, or picograms per liter
TCR	Total Coliform Rule
TT	Treatment Technique: A required process intended to reduce the level of a contaminant in drinking water.

nants in bottled water, which shall provide the same protection for public health.

Number of Contaminants Required to be Tested

This table displays the number of contaminants that were required to be tested in the last five years. The CCR may contain up to five years worth of water quality results. If a water system tests annually, or more frequently, the results from the most recent year are shown on the CCR. If testing is done less frequently, the results shown on the CCR are from the past five years.

VILLAGE OF KEWASKUM CURB SIDE BULK ITEM COLLECTION THURSDAY, APRIL 22, 2010

The 2010 garbage and recycle contract will provide residents with curb side collection. The date is Thursday, April 22nd. {There will be no collection in the public works yard.} Veolia will follow the normal garbage collection route for the bulk collection.

Veolia will place a dumpster for appliances that do not contain Freon or coolant on Rail Road Street along the guard rail near the Second Street end.

Also a dumpster for TV and microwaves will be provided. Under the E-Recycle law passed by the legislature, electronic goods are not permitted in the landfill.

VEOLIA BULK WASTE COLLECTION RULES

Place items at the curb on Thursday April 22nd for collection.

The following items are identified as bulky waste that will be collected:

- Furniture
- Rolled carpeting (4ft maximum length)
- Cabinets
- Countertops
- Mattresses/bed springs
- Non metal doors
- Wood windows
- Play equipment- Must be able to handle.
- TV/microwaves (collected in a 20 yard bin on Rail Road Street)
- Large appliances, scrap metal (collected in 20 yard bin on Rail Road Street) {No appliances with Freon}

Excluded items:

- Uncontainerized or piles of construction material
- Freon containing appliances
- Tires
- Batteries
- Used oil (Can be recycled through village program, pick up information slip at the municipal building.)

Great Grilling

Tips for a blowout barbecue on a budget

FOR LESS

FAMILY FEATURES

With spring around the corner, it's time to dust off the grill (if you put it away, that is) and showcase your skills with an early start to one of America's favorite family pastimes — charcoal grilling. An outdoor cookout is an inexpensive way to gather family and

friends for great-tasting barbecue that celebrates the start of warmer weather.

Whether it's a quick meal fired up for the family, or a big backyard cookout for the whole neighborhood, grilling gives you the flexibility to prepare delicious food that feeds a crowd without spending a fortune. Try these cash-saving tips:

- Ribs, whether beef or pork, are an inexpensive, yet popular star of any cookout. "The secret to any rib is to cook it low and slow so you get tender meat and great flavor," says Chris Lilly, owner of Big Bob Gibson Bar-B-Q in Decatur, Ala. and six-time Memphis in May champion.
- Expensive cuts of meat tend to get a lot of attention — but you can create a great meal with a cut that costs less. Try grilling chicken wings instead of chicken breasts, or go with flank steak for a different beef option.
- Nothing says a backyard barbecue like a hot dog — try taking this staple to the next level by topping with flavorful fixings right from the charcoal grill, such as onions, peppers or a spicy corn relish.
- Hamburgers are the most popular food to hit the grill for very good reasons — everyone loves them and they are inexpensive to prepare. These days, burgers seem to be getting bigger and bigger, but grilling veteran Lilly recommends keeping it simple. To achieve burger perfection, choose fresh ground beef and handle it as little as possible. That means flipping just once while cooking!
- Choosing the right charcoal is key to any cookout. This spring, Kingsford charcoal has improved its briquet formula to make it better than ever. America's top-selling charcoal now features deeper, wider and longer grooves to catch the flame more quickly and burn longer, making your bag of charcoal last longer.

For more tips, recipes and instructional videos inspired by new Kingsford briquets, visit Kingsford.com.

Champion Pitmaster Chris Lilly

Pepper and Herb Crusted Flank Steak

Created by Champion Pitmaster Chris Lilly

Expert's note: The flank steak is one of the most overworked muscles of all cuts of beef. If prepared wrong, it is the toughest. If prepared right, it is one of the best-tasting charcoal-grilled foods. Try using this versatile cut of beef as a topping for salads, a filling for quesadillas, or as a signature entrée. Some fresh herbs, a quick grill, and KC Masterpiece on the side will make this steak explode with flavor.

Makes: 6 servings
Prep time: 15 minutes,
plus 2 to 12 hours for marinade
Cook time: 10 minutes

- 2 flank steaks, approximately 2 pounds each
- 1/4 cup thyme, freshly minced
- 2 tablespoons tarragon, freshly minced
- 2 tablespoons black pepper, coarsely ground
- 1 tablespoon rosemary, freshly minced
- 4 cloves garlic, finely minced
- 2 teaspoons salt
- 2 teaspoons brown sugar
- 2 teaspoons extra virgin olive oil
- 2 teaspoons soy sauce
- 1 teaspoon crushed red pepper

Add all seasonings together in a small bowl and mix well, forming a coarse paste. Spread paste evenly over both sides of each flank steak. Wrap each flank steak individually with plastic cling wrap and refrigerate for 2 to 12 hours.

Build a charcoal fire for direct grilling. Grill steaks directly over coals (approximately 450° to 500°F) for 5 minutes on each side. Internal temperature of steak should reach 140° to 150°F for medium rare to medium doneness.

For optimum tenderness, cut flank steaks across the grain into 1/4-inch slices and serve.

Grilled Chicken Wings

Created by Champion Pitmaster Chris Lilly

Serves: 4
Prep time: 10 minutes
Cook time: 1 1/2 to 2 hours

- 4 tablespoons granulated garlic
- 2 teaspoons red pepper
- 1 teaspoon salt
- 1 pound chicken wings
- 1 1/2 cups Hidden Valley Original Ranch dressing
- 2 cups KC Masterpiece Original Barbecue Sauce

Light grill using Kingsford Charcoal with Sure Fire Grooves. Mix garlic, red pepper and salt; rub onto wings. Pour ranch dressing into food storage bag; add wings. Shake bag to coat wings.

Remove wings from bag; place on aluminum foil, fold into cooking pockets and seal tightly. Place pockets on main grill rack for about an hour and a half. Remove wings from pockets and finish directly on grill over moderate flame. Turn every two minutes until wings develop a crust.

Baste wings with barbecue sauce. Serve warm.

If smoker is available, arrange wings on smoker. Cook for 1 1/2 to 2 hours. Remove and place on grill over moderate flame and grill as directed above.

Expert Grilling Tips to Kickstart the Season

- Your grill may be a little rusty from the off-season, so before you begin cooking, make sure it's in competition-level condition. Scrub the grate with a stiff wire grill brush to remove any residual food and always discard any ashes in the grill before cooking to ensure your meal absorbs the maximum amount of flavor.
- Find the perfect spot in the backyard to set up the grill. Grills should always be positioned in a flat area, such as a patio or designated lawn space and should never be used in covered areas.
- Build the right fire by using different briquet arrangements depending on what you're grilling. Thinner pieces of meat respond best to high-temperature, direct-heat grilling, so spread the coals out evenly across the grate. Thicker pieces of meat cook perfectly without burning the outside with a two-zone fire. Stack briquets to one side of the grate to create high and low temperature zones. Begin cooking directly over the coals until the outside of the meat has reached the desired doneness; then move the meat to the low temperature zone to finish cooking.
- Choosing the right charcoal is key to any cookout and can save you time and money. A bag of quality charcoal will last longer, so you can enjoy more cookouts and more great-tasting barbecue. This spring, Kingsford charcoal has improved its briquet formula to make it better than ever. America's top-selling charcoal now features deeper, wider and longer grooves, allowing it to light easier, heat faster and burn just as long as before.

With the Dick Ellis Experts

River Run.... From the Root to the Brule, rainbows migrate, spawn

Anglers using flyrods and spinning gear claim their spots on the Root River in Racine Saturday and work for Lake Michigan steelhead moving upriver on their annual spawning run. Great Lakes rainbow are just starting their runs on tributaries further north with the Brule River and other tributaries off of Lake Superior opening in late March.

With the forecast promising temperatures in the upper 70s by week's end, I continued to 'shoot' the meandering line of trout fishermen working for steelhead on the Root River in Racine, their trout rods and spinning gear moving up and down to ask the current for just one rainbow. From the Brule feeding Lake Superior to the Pike in Kenosha, steelhead runs mean spring.

It was difficult to believe just a few weeks before I had been on hardwater around the Apostle Islands targeting lake trout. Or that by mid-April I would be following a turkey hunt in Grant County with this same shutter-gun. Wisconsin was once again showing us four seasons and all the reasons not to wander too far from the Badger State.

Below my bridge camera-perch, I looked down and quietly talked with my friends Dave Sura and Bob Merriman. Downstream, I could count maybe 10 other "steelheaders" until the Root turned in the distance on its journey to Lake Michigan. Warm weather was still several days off, and I pulled my coat up against a cold breeze coming off the big lake and continued to talk steelheading like a professional out-

door writer does. "Come on you idiots....how do you expect me to write a story on steelheading if you don't catch me a photo fish?" I asked gently. "Dave, why did you release that rainbow before I got here?"

Sura puts a dent in Lake Michigan fish, almost exclusively from shore and had already taken six fish a few days before and a lonely steelhead at first light. He had come to fish the Root after a reliable friend's report that in this very spot beneath the bridge, almost a dozen trout moving upstream on their annual spawning run had fallen to spawn sacs just the morning before.

"It's just about the peak of the run right now," Sura said. "They're moving up to

dump their eggs in the shallows. They can't naturally reproduce here like on the Brule off of Lake Superior, so they have the Wehr egg collection station and the DNR hatcheries to help reproduction. They stock the tributaries off of Lake Michigan and the adult fish return to those same streams to spawn."

According to Sura, the fighting steelhead average about five to six pounds. Although the run on the Root, the Pike and other southeast streams like the Menomonee in the Shadow of the Milwaukee Brewers Miller Park are well underway, northern tributaries off of Lake Michigan are just beginning. The famous Brule and other beautiful Lake Superior tributaries don't even open

annually until the last Saturday in March with the season continuing through November 15.

"The runs are triggered by water temperatures with the more northern streams starting later because of the colder water," Sura said. "Usually, the fish are staging with ice-out and move upstream into the deeper holes with the first rain. When the water temperatures reach the low to mid-40s, the fish move up and make their nests (often referred to as "redds") and lay their eggs in the shallow water."

With the reporter's curse shutting off all additional activity, I watched Merriman and Sura fish the Root to no avail. My friends were float fishing and recommend 9 to 11 foot medium rods with a medium action spinning reel. Sura prefers a 10 pound power pro fireline because "superlines" float and allow the angler to easily lift the line to remove any bows on the surface that form riding the current. They used 10 pound fluorocarbon leaders and presented twister tails tipped with waxworms. Spawn sacs, hair jigs, tube jigs, flies and a variety of other baits work too.

Disgusted with such a poor performance, I left those so-called anglers by late morning for a George Webb's breakfast that I knew I could catch. Before I made the 45 minute ride home, the phone was ringing.

"As soon as you left I caught two steelhead," Dave said. "Katie (Sura) is going to come down and take some photos for the papers."

See? Dave Sura is a great friend....and one heck of a fisherman.

Spring wildlife migrations mean great viewing and photo opportunities for Wisconsin residents at numerous wildlife areas scattered throughout the state. Last week. Photographer Ken Koehler spent two days on the KILLSNAKE Wildlife Area in

Calumet County recording the activity of birds, waterfowl, cranes, swans and other migrators. DNR Wildlife Tech Diane Schauer added her thoughts of spring.

By Diane Schauer

Aquatic Invasive Species Coordinator, Calumet County

Spring is a very loud season.

It's easy to tell the arrival of spring. First, the sandhill cranes and redwing blackbirds arrive. Simply close your eyes and listen; you will know when they have come.

Next you'll hear the wave of tundra swans and waterfowl. This week on the KILLSNAKE Wildlife Area in Calumet County, the tundra swans visited in impressive numbers, more than 750 swans at once. Nestled in among the swans are the waterfowl; the redheads, the canvasback, pintails, shovellers, widgeon, teal, scaup and more.

The nice thing to know is that once the tundra swans move north to spend their summer in the arctic, more waterfowl will follow. The massive waves of ducks have only begun their migrations. Mergansers, coots and buffleheads have only begun their trips.

Over the next few weeks, near waterways throughout the state, the osprey will return and begin building their nests in trees and on the platforms erected for their use. The sandhill cranes will become even more raucous as their mating dances and calls intensify. The frogs and toads will sound out, chorus frogs will sing in vast numbers while the trill of the toads is yet another welcome sound of spring.

Take time to wander about in the wildlife areas near you.

KHS linksters appear to be facing a rebuilding year

How will Kewaskum High golf coach Glen Eichstedt replace the talented Ethan Geidel?

Eichstedt, who is starting his 12th season, doesn't have an answer for that question at this point, considering Geidel was a four-time All-Eastern Wisconsin Conference player and the Player of the Year in 2007 and 2008 and qualified for the Division 2 State Tournament as a junior.

Geidel, along with 2009 graduates Nick Gutbrod and Michael Korth, led the team to a second-place finish (15 points behind Plymouth) in the EWC standings a year ago, to a third place finish in the regional. The season ended when the Indians placed seventh of the 12 teams in the Random Lake sectional.

Not only was Geidel solidly the No. 1 scorer the past three seasons, but "as a

senior, he was a good team member, helping the younger players," the coach said.

"This year we're going to working hard to find a consistent top five," Eichstedt last week in previewing his 2010 Indians, who are expected to be led by the two returning lettermen, senior Beau Backhaus and sophomore Tony Gonring.

Gonring competed in all but a few matches, and averaged 44 strokes per nine-hole round, according to Eichstedt, who said, "In the four or five matches he (Backhaus) played, he probably averaged 43."

Two others, senior Jacob Durian and sophomore Dan Bohn, also saw action at the end of the '09 season and are expected to be varsity regulars. "Danny Bohn, as a freshman, played in some varsity matches and played fairly well," Eichstedt said, also indicating junior Alec Larsen "has shown some signs (of being a varsity player) but has not been consistent to this point."

One other player the veteran coach is keeping his eye on is senior Russell Oswald, who saw action in a lot of JV matches a year ago. "He's going to have to compete for us, especially early," Eichstedt said.

Eichstedt does like the numbers and promise shown in the freshman class. "We have about 10 new freshmen," he said, indicating none are quite ready for the varsity but should help on the JV team and are definitely capable of developing into good golfers.

"Mike Holt so far looks pretty solid," Eichstedt said, adding, "Ethan Vetter seems to be a good athlete" and Adam Waala, a left-hander has played a lot of golfer but not a lot of competitive golf."

Concerning the top contenders in the EWC, Eichstedt looks to defending champion and perennial power Plymouth. "I think they have three starters back," he said, "and Kiel is going to be very good, with two of the top five players back."

And how about the Indians? "We'll probably be

in the middle of the pack," Eichstedt said. "This is going to be a year when we're going to gain a lot of experience and build for the future."

The Indians open the season at the 20-team Washington County Invitational on April 10, then they entertain the first EWC mini-tour event on Friday, April 16th.

Eichstedt will once again be assisted by Scott Rohlinger, who is starting his 13th year as KHS JV coach.

For the Statesman

Kewaskum's girls' soccer team is building on five returning all-conference players and looks to move up a notch in the conference standings.

The Indians last year finished in fourth place at 7-7 in the Eastern Wisconsin Conference (EWC) and 10-14 overall. This year, first team all-conference defender Elissa Miller is back for her senior year, along with second team all-conference midfielder/forward Christine Bohn, a junior.

Midfielder Sam Smallish and her twin sister, midfielder/forward Jess, return as sophomores after each receiving all-conference honorable mention status.

Goalie Paige Lightner is back as a junior after earning all-conference honorable mention last season.

"I think we'll be pretty decent. We have the core group back from last year," said Coach Amy Piwoni.

She said ball control and scoring should be the team's strength.

"I think our midfield and our offensive attack," she said. "We did lose some defenders from last year but we're replacing them with some young players and speed."

Getting young players experience will be key, Piwoni said.

"Last year it was the same thing. It took us a while to mesh," she said.

Piwoni said she doesn't yet know how the conference race will shape up, but she expects Sheboygan Falls and Plymouth to field strong teams again, as well as New Holstein.

"My goal for us is to finish third or fourth. Third might be lofty," she said.

Mother Nature has kicked in Kewaskum's home field advantage with her recent drenching. The old field by the tennis courts will have to be used once more this season as the new one next to the Kewaskum Clinic isn't yet ready. The boys are slated to use the new field in fall.

Piwoni said some of her players like the mud while others would rather play on a dry, faster surface.

The Indians kick off the season on Thursday at St. Mary's Springs. Five team members will be missing as they are out of town during spring break.

Kewaskum Gridiron Club

Youth Football & Cheerleading Registration for Fall 2010

Saturday, April 10, 2010

10:00 am to 2:00 pm

at

Hon-E-Kor Golf & Country Club

Participation is open to youths entering the 5th thru 8th grades in the fall of 2010. You must live in the Kewaskum School District.

A parent or guardian must accompany any child registering.

This registration will include both football players and cheerleaders.

The registration fee is \$135 per player. For families having two or more players, the cost for the second player is \$100, and the cost for any third or additional player is \$75. The cost for cheerleaders is \$50 for each cheerleader.

Parents of all participants are required to perform volunteer duties for at least one home game or other activity.

All fees must be paid, and all forms must be completed before any individual will be issued equipment.

Please visit www.kewaskumgridiron.com to download the registration forms. Fill them out and bring them with you to sign up.

**Registration fee for FOOTBALL PLAYERS
signing up after April 10 will be \$175.**

If you have any questions, need more information, or are unable to register on April 10, please call: Randy Schlice at 689-3699 or Jim Korth at 626-2520.

For Cheerleading questions, call Jenny Harbin at 262-305-2050.

Boys track: numbers are not in their favor

PORT WASHINGTON—Coach Jeff Gosse comes into this season with what he calls his strongest fast-pitch softball team yet.

Senior Erica Heberer is back as the ace on the mound. Freshman Jenny Reicher will get a chance to pitch as well.

Strong hitters like Liz Schaller, Monica Dehler, Ashley Faber return and are taking advantage of the mound being moved back three feet this year.

"This is probably the strongest team we've had," Gosse said. "We've got a great bench."

The first week and a half of practices resembled boot camp, Gosse said.

"Hopefully, that pays off and we can make a deep run in the playoffs," he said.

At Port Washington in the season opener last Thursday, the Indians smoked last year's state-qualifying team decimated by graduation, 13-

4. Kewaskum blew up for six runs in the second inning and scored three in the sixth and two in the seventh to keep the game out of reach.

Heberer went the distance, allowing seven hits and six walks while striking out six. She fielded her position well, forcing many grounders back to the mound for easy outs.

"It felt good. I think we were ready for it," she said of the season's start. "It felt good to start out positive on our season."

"She was good," Gosse said. "They weren't giving her

the inside corner. She kept hitting it."

At the plate, several Indians made good contact for line drives, hard grounders and fly balls that found gaps. Faber had a triple, two doubles, a single and two runs batted in. Dehler had three infield singles, a double and two RBIs. Sophomore Michele Marquardt had three singles and an RBI.

Even when they made outs, the Indians connected well.

Gosse said his seniors are jumping at the extra time to

see pitches with the mound moved back.

"They've seen some of the best pitching in the state," he said.

Last season, the Indians lost in extra innings against Port Washington in the home opener.

"I think we did really well," Dehler said. "It was nice coming here having a good memory leaving."

"I'm happy we got a win. They've worked very hard," Gosse said.

Like their coach, the girls are expecting a good season.

They cite good team chemistry as key.

"We have a lot of underclassmen working for their spots," Dehler said. "We bond pretty good."

"I think we'll be good competition as long as we don't get in any slumps," Heberer said.

The Indians next host Campbellsport April 13.
